PERFORMANCE OBJECTIVES:

To learn what an autobiography is.

To become familiar with some contemporary writers.

To become acquainted with some unusual careers.

To develop an awareness that a person's career or job is a very vital part of his life.

LESSON PROCEDURE:

Read following selections from literature book:
"The First Day" - page 327
"Music Inside My Head" - page 334
"from Travels with Charley" - page 344

Read an outside autobiographical selection and make short oral report to class.

Have some local persons who have unusual careers to speak to class.

Work in small groups (3 or 4) and research an unusual occupation.

MATERIALS AND RESOURCES:

Eighth Grade Literature Book:

Foresman, Scott. Counterpoint in Literature. America Reads Series. Pooley, Daniel, Farrell, Gromman, Niles, editors.

Filmstrips, tapes, cassettes dealing with career opportunities (any that are available in a school audio-visual center will feature some unusual occupations)

Resource People:

A song writer or poet, an artist or photographer, a restaurant operator, dorm hostess from college, professional athlete or golf pro, Y.M.C.A. director or playground director.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"THE NEWSPAPER"

GRADE: 8
SUBJECT: ENGLISH

BROAD OBJECTIVE:

To familiarize the students with the newspaper, and to introduce them to careers which are available in the writing, printing, and publishing fields.

PERFORMANCE OBJECTIVES:

To learn the different parts of the paper such as banner, nameplate, flag, headlines, by-lines, editorials, news stories, feature stories, and mast head.

To learn how the newspaper serves as a means of communication and how it influences the life of the community.

To learn what the jobs of editor, managing editor, lay-out and make-up editor, sports writers, feature writers, and news writers consist of.

LESSON PROCEDURES:

Students will:

visit offices of local newspaper, seeing make-up people at work;

have editor or managing editor speak to class on jobs in journalism;

study and discuss various newspapers including own school paper;

work in groups and learning centers to learn the parts of the paper;

make reports on the roles of people involved in the publishing of a paper and on careers in journalism;

publish a mimeographed paper with students assuming the various "jobs".

MATERIALS AND RESOURCES:

Films:

The Newspaper Serves its Community. 65908
Newspaper Story. 37708
Consumer Power - Advertising. 01610

MATERIALS AND RESOURCES: (Continued)

Films: (Continued)

Newspaper Layout. 06510

Films are available from Educational Motion Pictures, State Department of Education.

Resource People:

Staff of local newspaper.
Student editor of school newspaper.

Book:

Adams, Julian and Stratton, Kenneth. Press Time. Prentice Hall, Second Edition.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"OUR TOWN"

GRADE: 8
SUBJECT: ENGLISH

BROAD OBJECTIVES:

1. To enable students to gather facts and to give an impression or reaction in their writing.

2. To make students aware of their town and its industries and businesses.

PERFORMANCE OBJECTIVES:

1. The student will develop skills in gathering information, interviewing, giving an oral report and writing.

2. The student will explore in depth five careers in his town that he finds unusual or interesting.

LESSON PROCEDURE:

1. Have students close their eyes and think about their town for one moment.

2. Have students list as many of the businesses and industries in their town they can think of.

3. Discussion and reaction from the class.

4. Proceed to projects and activities. (The teacher could use as many or as few as desired)

   Activities:

   A. Use as many adjectives as you need to describe the personality of your town.

   B. Develop a topic sentence for a paragraph about the advantages of your town.

   C. Develop a paragraph around the topic "What Our Town Needs Most".

   D. In a two minute talk give one impression of your town on a certain day, or at a certain time of year.

   E. Take an imaginary tour of five businesses or industries in your town and discuss one job you would prefer to do in each one.

   F. Research and oral and written reports.

LESSON PROCEDURE: (Continued)

Activities: (Continued)

G. Make a map of your town showing all places of business and industry.

H. Write a poem about your town.

I. Interview one person in your town who is involved in a career you think might be interesting.

J. Write a letter inviting someone you would like to hear to come to your class to talk about their job.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"A COURAGEOUS CAREER"

GRADE: 8
SUBJECT: ENGLISH

BROAD OBJECTIVES:

1. To study a character who displays courage.

2. To explore careers related to construction.

PERFORMANCE OBJECTIVES:

1. The student will appreciate the danger of high rise construction work and the interrelation of fear and courage.

2. The student will be able to describe occupations and skills required in construction jobs.

LESSON PROCEDURE:

1. Class discussion about fear and courage.

2. Read the short story "Danger in the Wind".

3. Individual research and reports.

4. Study of terminology.

5. Writing assignment concerning the dangers the main character faces in his job and his attitude about it.

MATERIALS AND RESOURCES:

Text:

Pooley, Robert C. "Danger in the Wind" All Around America. Scott, Foresman and Company.

Audio Visual:

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"THE RADIO AND YOU"

GRADE: 8
SUBJECT: ENGLISH

BROAD OBJECTIVES:

1. To orient students to the ways in which radio affects them.

2. To explore careers related to radio broadcasting.

PERFORMANCE OBJECTIVES:

1. The student will be able to relate the use of language to the radio.

2. The student will be able to describe the various jobs, the requirements, salaries and benefits related to a career in radio.

LESSON PROCEDURE:

1. Class discussion concerning the role of radio today.

2. Listen to a radio play.

3. Listen to a record of the radio broad cast of "War of the Worlds".

4. Follow up discussion on the impact of radio.

5. Individual research on careers in radio.

6. Prepare a radio show and tape it.

7. Write an essay about a career in radio.

8. Prepare an advertisement for a new product to be introduced on radio.

9. Write a letter requesting information about a career in radio broadcasting.

10. Prepare a booklet, poster or collage of all the jobs related to radio.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"THE WORLD OF COMMUNICATIONS"

GRADE: 8 AND 9
SUBJECT: ENGLISH

BROAD OBJECTIVE:

1. To orient students to the many types of communications that affect them.

2. To explore careers in the world of communications.

PERFORMANCE OBJECTIVE:

The student will be able to relate English to the world of communication and be able to describe the variety of jobs in the communications industries in terms of job title, requirements and salary.

LESSON PROCEDURE:

To make students aware of the necessity of communication, have several students give directions without communicating orally. Proceed by exploring the meaning of communication, tracing it's origin and discussing the various types of communications that affect us daily. Students could then be directed to a bulletin board and learning center that concentrates on one area of communications and its associated careers. Daily lesson plans could be done by either the teacher or students or both. These lessons should concentrate on one area, giving the class necessary background information. Students should then be allowed to work on related projects for the remaining class time under the direction of the teacher.

Projects:

1. Interview a person in a communications occupation.

2. Write a letter to an industry or corporation requesting information about your interest in a particular communications career.

3. Construct a booklet or poster related to a career in the world of communications. This must include one magazine article, one newspaper article, a want ad, and a picture or cartoon that is related to communications careers.

4. Develop an original skit about a communications career to be performed before the class and if possible to be video taped.

5. Make up your own product, write an advertisement for it, arrange to present it to the class and if possible to have it video taped.

Projects: (Continued)

6. Prepare your own news show, or weather report.

7. Write your own radio play, tape it and present it to the class (concentrate on sound effect).

8. Prepare and tape a radio announcement.

9. Write an essay "Why I Would Like To Be A _____" or "Why I Could Never Be A _____"

10. Prepare your own filmstrip and narrative on topic of your choice. For example: "How To Make A Movie".

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"COULD YOU HAVE BEEN HELEN KELLER'S TEACHER?"

GRADE: 9
SUBJECT: ENGLISH

BROAD OBJECTIVES:

1. To study an autobiography as a type of literature.

2. To explore careers in working with the blind and the deaf.

3. To appreciate the special qualifications of the teachers of the blind and deaf.

PERFORMANCE OBJECTIVES:

1. The student will be able to evaluate an autobiographical account of Helen Keller.

2. The student will be aware of occupations in working with the blind and deaf, training necessary, and the benefits.

LESSON PROCEDURE:

1. Class discussion of importance of sight and hearing.

2. Discussion of Helen Keller and Anne Sullivan.

3. Discussion and information regarding careers.

4. Individual reports.

5. Read "The Great Day".

6. Writing assignment: "Why I Would (or Would Not) Like A Career in Working With the Deaf and Dumb".

MATERIALS AND RESOURCES:

"WOULD YOU LIKE TO BE ANOTHER JULIUS CAESAR"
(Careers in Shakespeare's Play)

GRADE: 10
SUBJECT: ENGLISH

BROAD OBJECTIVES:

1. To familiarize students with the play, Julius Caesar.

2. To discover modern occupations parallel to characters' occupations within the play.

PERFORMANCE OBJECTIVES:

1. The student will have a working knowledge of a Shakespearian play.

2. The student will be more aware of positions in government, the law, and in political science.

LESSON PROCEDURE:

1. Read and discuss the play.

2. Bring in parallel occupations in discussion of characters' jobs within play.

3. At end of discussion of play, assign individual reports on parallel occupations.

4. Role playing and modernization of characters' occupations.

5. Resource people such as lawyers, judges, political scientists.

6. Rewriting of portions of the play with modern occupations - perhaps using well known people in government.

7. Use of audiovisuals and books.

"ENGLISH SKILLS IN THE SALES FIELD"

GRADE: 10
SUBJECT: ENGLISH

BROAD OBJECTIVE:

To help students to become aware of the need for good basic English skills in the field of salesmanship.

PERFORMANCE OBJECTIVE:

To access the need for English skills in a selling occupation.

LESSON PROCEDURE:

1. Students are directed to a display of books, magazines, and pamphlets describing careers in salesmanship and their requirements with special attention to be given to how frequently these qualifications relate to good English habits.

2. An informal talk and discussion period will be led by Mr. Don Dobbins, instructor of Distributive Education, emphasizing the relationship between good English usage and success in Distributive Education and future employment in the sales field.

3. An informal talk and discussion period will be led by one or more local merchants or salesmen concerning the importance of good English usage on the job.

4. Several students who are presently employed in selling will present an oral report concerning how good English usage is necessary in his job.

5. The class will complete several activities pertaining to the ways skill in written English might be necessary to a salesman.
   a. the sales message
   b. orders
   c. order acknowledgements
   d. adjustments

"A CAREER IN LAW"

GRADE: 10 OR 11
SUBJECT: ENGLISH 10 OR 11

BROAD OBJECTIVE:

To interpret the concept of justice through a study of the novels, To Kill a Mockingbird and The Ox-Bow Incident and to acquaint students with the possibilities of a legal career.

PERFORMANCE OBJECTIVES:

1. To study To Kill a Mockingbird and The Ox-Bow Incident as works of art.

2. To study the novel as a literary form.

3. To analyze the characters of each as individual types and to apply this analysis to the student's role in school and community.

4. To define justice and discuss its application to the novels and life in today's world.

5. To discuss the possibilities of a career in law.

LESSON PROCEDURE:

1. Each student will read and discuss the novels on a chapter by chapter basis with special attention to structure, plot, characterization, and the concept of justice and its application to the novels as well as to everyday life.

2. The class will discuss the role of the lawyer in his community including such practical aspects as requirements for a legal career, work performed, employment possibilities, and income.

3. Students will master a vocabulary list of legal terms.

4. An informal talk and discussion period will be led by a local lawyer.

5. Oral and written reports will be presented to illustrate the various areas of a legal career.

6. Television programs related to the legal field will be discussed.

"PREPARATION AND PUBLICATION OF A NOVEL"
(From Writer to Reader)

GRADE: 10 or 11
SUBJECT: ENGLISH

BROAD OBJECTIVES:

1. To teach the novel as an art form.

2. To explore careers connected with the writing and subsequent publication of a novel.

PERFORMANCE OBJECTIVES:

1. The student will be made aware of the wide variety of occupations necessary to the publication of a book.

2. The student will be conversant with the training and qualifications necessary for occupations such as the following:

   A. Editor
   B. Printer
   C. Proof-Reader
   D. Secretary
   E. Writer
   F. Promotions Managers - Businessmen
   G. Salesmen - Books
   H. Advertising

LESSON PROCEDURES:

1. Introduce, read, and discuss a modern novel. (20th Century)

2. Discuss careers necessary to the writing and publication of a work of literature.

3. List occupations suggested.

4. Assign individual reports on each occupation.

5. Use additional audiovisual materials.

6. Talk by local writer on how a book is published.

7. Talk by local printer.

8. Visit to local printing press.

9. Use of books and audiovisuals.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"THE JOB INTERVIEW"

GRADE: 11
SUBJECT: ENGLISH

BROAD OBJECTIVE:

To enable students to prepare for and successfully complete a job interview.

PERFORMANCE OBJECTIVES:

1. To know the steps required in securing an appointment for a job interview.

2. To describe the proper dress and appearance necessary to create a good impression.

3. To describe the proper behavior and attitude for an interview.

4. To study hand-out sheets and basic information including vocabulary words.

5. To score 75% or above on a quiz pertaining to job interviews.

LESSON PROCEDURE:

1. The teacher will provide students with hand-out sheets. (see materials)

2. The teacher will provide students with basic information concerning a successful interview.

3. The teacher will provide vocabulary words and students will discuss the definition of these.

4. The students will view two filmstrips "Your Job Interview" and "The Job Interview".

5. The class will discuss the importance of being on time for the interview.

6. The class will discuss the importance of proper dress and a good overall appearance.

7. Students will discuss the importance of proper behavior and attitude.

8. An informal talk and discussion period will be led by the personnel director of a local firm.

LESSON PROCEDURE: (Continued)

9. Students will use role playing, several selecting a job in which they are interested and preparing for an oral interview for that job. The teacher will act as the interviewer and will acquaint the applicants with the criteria by which each will be evaluated(see materials). The interviewer and all other students will have a scoring instrument and will rate each applicant.

10. A quiz will be administered to test each student's awareness of the proper procedure for a job interview.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"WRITING A LETTER OF APPLICATION"

GRADE: 11
SUBJECT: ENGLISH

BROAD OBJECTIVE:

To learn the exact procedure for creating an effective and successful letter of application.

PERFORMANCE OBJECTIVES:

1. To realize the importance of the job application as probably the single most important factor in securing a job.

2. To learn the steps in correctly planning and writing a letter of application.

3. To become acquainted with the common errors many young applicants make and guard against these.

LESSON PROCEDURE:

1. The class will recognize the importance of creating a favorable appearance by using such tools as appropriate stationery, typewriting, neatness, etc.

2. Students will study the procedure used in writing the letter:

   a. establish a point of contact by stating your purpose;
   b. show an understanding of the employer's needs and the requirements of the position;
   c. show how your education and previous experience fit these requirements;
   d. mention your personal qualifications such as your interest in the employer's type of business;
   e. give references;
   f. make a direct request for an interview.

3. The students will discuss the importance of using concrete details, flashes of human interest, and good tone to increase the effectiveness of the letter.

4. The students will discuss such pitfalls to avoid as negative statements, misrepresentation of facts, illogical organization, lack of supporting details, and vague expression.

Activities:

1. Choose from your local newspaper several help-wanted advertisements which interest you and write an effective

LESSON PROCEDURE: (Continued)

Activities: (Continued)

letter of application for one.

2. Scan the yellow pages of your local telephone directory for a business firm at which you are interested in working. Write an unsolicited letter of application to the firm.

3. From your friend Miss Susan Black, a teacher of elementary education in your local elementary school, you have learned that a position will be open in January for a 4th grade teacher. As a college graduate with two years of experience, write a letter of application requesting an interview.

4. Pretend that you are a prospective employer and study a list of twenty sentences taken from applications. Point out errors or weaknesses in each.

5. Study several sample letters of application and evaluate them. Rewrite any which are not effective.

6. Pretend that circumstances make it necessary for you to quit school and enter the work force. Evaluate the skills you currently possess and list the jobs for which you would be qualified. Write letters of application for these jobs.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"A CAREER IN PSYCHOLOGY"

GRADE: 11
SUBJECT: ENGLISH

BROAD OBJECTIVE:

To read and interpret the novel The Scarlet Letter analyzing the psychological effect of sin upon each main character and to research the possibilities of a career in psychology.

PERFORMANCE OBJECTIVES:

1. To study The Scarlet Letter as a literary art form.

2. To analyze each of the four major characters in terms of Hawthorne's basic themes.

3. To relate this analysis to psychology as a career.

LESSON PROCEDURE:

1. Each student will read and discuss the novel on a chapter by chapter basis, paying particular attention to plot, structure, symbolism, and characterization.

2. The class will study Hawthorne's basic theme concerning the psychological effect of sin and will interpret each character's behavior in terms of that theme.

3. The class will study Hawthorne's supporting themes of Isolation and the Unpardonable Sin and will discuss how certain characters illustrate these themes and how some achieve redemption in the end.

4. The students will explore the field of psychology and the possible careers open in this field including the requirements for each.

5. Students presently taking the course offered in psychology will give oral reports to stimulate interest in and a better understanding of the field.

6. An informal talk and discussion period will be led by a local authority in the field of psychology or a representative of a local help center.

7. Students not participating in number 5 will do one of the following activities:
   a. a written paper concerning the psychological aspects of some other literary work we have studied.

LESSON PROCEDURE: (Continued)

b. an oral report by working students on how psychology relates to their job.

c. an oral report based upon an interview with someone in the community whose work is related to psychology.

MATERIALS AND RESOURCES:

Books:

Hawthorne, Nathaniel. The Scarlet Letter.

Speaker:

Local authority in the field of psychology.
A representative of a local help center.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"THE GLASS MENAGERIE"
(Occupations in Play Production)

GRADE: 11
SUBJECT: ENGLISH

BROAD OBJECTIVES:

1. To study a twentieth century play.

2. To study play production.

3. To discuss several occupations necessary to the production of a play.

PERFORMANCE OBJECTIVES:

1. Each student will be knowledgeable in play production.

2. The student will be familiar with a modern work of drama.

3. The student will gather information on careers such as actor, director, musician, costumer, set designer.

LESSON PROCEDURE:

1. The class will read and discuss the play as a twentieth century art form; perhaps including role playing.

2. Discussion of how the play would be produced on stage will follow.

3. Filmstrips and other materials relevant to play production will be presented.

4. Reports by students on various careers within the field of drama.

5. Resource people.

6. Actual visitation of a theatre production.
   1. Radford College
   2. "The Long Way Home"

MATERIALS AND RESOURCES:

Professors of play production - Radford College
Actors, directors, set designers from local theatre groups or "The Long Way Home".

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"EXPLORING THE OPPORTUNITIES IN THE FIELD OF NEWS REPORTING"

GRADE: 12
SUBJECT: ENGLISH

BROAD OBJECTIVE:

To understand the major duties and responsibilities of the news reporter.

PERFORMANCE OBJECTIVES:

1. To examine the qualifications and aptitudes of the news reporter.

2. To gain knowledge of the advantages and disadvantages of this occupation (news reporting).

3. To become familiar with the educational requirements and the personal characteristics needed for success in this field.

LESSON PROCEDURE:

Activities:

1. Study the filmstrip "The Newspaper Reporter" to learn what is expected of a reporter.

2. Invite a news reporter to describe his duties, his skills, and his qualifications for his position.

3. Study the format for writing news reports - understand that in news stories the reporter gives the main idea in the first paragraph.

4. Examine several news stories and note how carefully the reporter reports the facts without giving his opinion.

5. Select several news stories and find the five W's in the lead.

6. Compile a list of terms that the reporter would need to know.

7. On file cards or slips of paper write situations that a reporter might use for a news story. Deposit these suggested situations in a box. (Each member of the participating group may write several situations.) Draw one or two situations from the box and develop each into a news story.

LESSON PROCEDURE: (Continued)

Activities: (Continued)

8. Imagine that you are a news reporter and write a short paper on some of the disadvantages of being a reporter.

9. Write a letter to a friend telling him why you like being a reporter.

10. Read books (fiction or fact) about news reporters. Share your reading with others who are interested through book reviews or book discussions.

11. Invite staff members of the school newspaper to discuss their duties and explain some of their problems in news gathering.

12. Write news reports for the school newspaper and the local papers.

13. Gather information on news reporting and news reports and prepare questions for a quiz program dealing with this career.

14. Experiment with various grammatical forms for beginning a lead.

15. Interview the guidance counselor or the career coordinator to learn about educational offerings in the field of reporting.

16. Prepare a resume' of personal qualifications for success as a reporter.

MATERIALS AND RESOURCES:

Filmstrips and Cassettes:

Exploring the World of Work. Wilson Educational Cassettes.
702-709 Fresh Perspectives in Composition, "Tips on Writing the News Story". Eye Gate House.
161SATC The Newspaper in America. Singer Society for Visual Aids, Inc.
6103 The Newspaper Reporter. Singer Society for Visual Aids, Inc.

Books:

Mott, George and Others. New Survey of Journalism. Barnes and Noble, Inc., 1970.
Westdal, Lockerbie. Success in Writing. Addison-Wesley Publishing Co., 1970.

MATERIALS AND RESOURCES: (Continued)

Other Resources:

Local newspapers.
Library books - fiction and fact.
Staff members of local newspapers and school newspaper.
Guidance and career education personnel.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"WHAT'S MY LINE?"
(AN ORAL PRESENTATION OF ACTIVITIES IN VARIOUS OCCUPATIONS IN WHICH STUDENTS ARE ENGAGED)

GRADE: 12
SUBJECT: ENGLISH

BROAD OBJECTIVE:

To acquire knowledge of characteristic activities associated with a number of occupations.

PERFORMANCE OBJECTIVES:

1. To gain a broad understanding of many occupations.

2. To be able to use factual information about occupations to make vocational choices.

3. To know the classification of occupations in our society.

4. To understand the nature of work and the motive for work.

5. To be able to convey in concise, effective language the importance of work.

LESSON PROCEDURE:

1. Each student who is presently employed or who has participated in a summer work program will have an opportunity to present a demonstration of some skill or some phase of his employment.

2. Listening students will formulate questions concerning other phases of the work, and the speaker will answer these questions.

3. Students will compile a list of words which seem to be associated with each speaker's employment. These words will be recorded on a poster labeled Vocabulary For Careers and will be used in appropriate vocabulary activities.

4. Employers of the student speakers may be invited to give additional information about the various occupations and to re-enforce the student speakers' remarks.

5. Students will have an opportunity to do individual research. They may share their findings through documented papers and/or oral reports.

6. Students will compile a list of employment opportunities that are available for students in this area - some may wish to apply for some of the part-time or summer jobs.

LESSON PROCEDURE: (Continued)

7. Review methods of research and letter writing.

MATERIALS AND RESOURCES:

Desk Top Careers. Careers. Largo, Florida.

Employers
Career Program Personnel
Guidance Counselors

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"EXPLORING OPPORTUNITIES FOR CAREERS IN NEWSPAPER AND MAGAZINE ADVERTISING"

GRADE: 12
SUBJECT: ENGLISH

BROAD OBJECTIVE:

To become familiar with opportunities for careers in newspaper and magazine advertising.

PERFORMANCE OBJECTIVES:

1. To explore the career opportunities in the advertising field and to discover the qualifications for advertising personnel.

2. To be able to evaluate newspaper and magazine advertisements for promotional effectiveness and consumer reaction.

3. To understand and evaluate propaganda devices that are used in advertising.

4. To be able to compose and lay out effective advertising copy.

LESSON PROCEDURE:

1. Make a chart of career opportunities and qualifications for advertising personnel.

2. Study newspaper and magazine advertisement technique and placement.

3. Study and discuss the value of advertising in mass communication.

4. Collect advertisements from newspapers and study the propaganda devices that are used. Make a collage of these advertisements.

5. Delete loaded words and phrases in advertisements or substitute less effective words and phrases to discover the impact of the right word in the right place.

6. Study the effect of color in advertisements. Make photostatic copies of colorful advertisements and study the difference in eye appeal.

7. Compile a set of questions pertaining to advertising careers and seek the answers from resource personnel or from research activities.

8. Invite local advertising managers or consultants to discuss opportunities in the advertising field.

LESSON PROCEDURE: (Continued)

9. Observe individually or in groups advertising personnel in local positions.

10. Compose copy for one or two effective advertisements and make lay out for each.

MATERIALS AND RESOURCES:

Newspapers:

The Roanoke Times
Richmond Times Dispatch
Radford News Journal
Other newspapers as needed.

Current Magazines

Books:

Alger, Ralph. The Road To Better English. Cambridge Book Co., Bronxville, New York.
Brewton, Kinnick, et. al. Using Good English. Laidlaw Brothers, Puglishers.
Emery, Ault and Agee. Introduction to Mass Communications. Dodd, Mead and Co., 1970.

Filmstrips:

Writing Careers in Advertising. 406, Educational Dimensions Corporation.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"WHO AM I? WHAT CAN I DO?"
A SEARCH FOR IDENTITY IN THE WORLD OF WORK

GRADE: 12
SUBJECT: ENGLISH

BROAD OBJECTIVE:

To discover the individual's potential for success in a particular career and to assume the responsibility of developing that potential.

PERFORMANCE OBJECTIVE:

1. To become knowledgeable about various vocations.

2. To use a logical approach in critical thinking.

3. To evaluate one's self in terms of talent, personality, and objectives in regard to careers and to reach sound conclusions.

4. To synthesize and organize pertinent material for decision making.

LESSON PROCEDURE:

1. View and study filmstrips, "The World of Work", "An Introduction to Vocations", "Finding A Career", and "What Can You Do?".

2. Make a chart of three or four careers that interest you and list your personal characteristics that would be helpful in each career.

3. View the filmstrips, "Job Shopping" and "Working for Someone Else", then go shopping (visit as many places of employment as you can - be sure to get permission from the managers), observe the working conditions in these locales, talk to employees about the work, and write a report of each visit and each interview.

4. Find out all you can, by reading and observing, about the careers in which you are interested. Keep a folder of information that you gather.

5. Take standardized test (Ability and Interest) and have the guidance counselor interpret these in terms of your career choice.

6. Compile a list of vocabulary words related to your career interests and to the personal qualifications necessary for that career.

LESSON PROCEDURE: (Continued)

7. Study guidance material to find prerequisites for further study in your chosen career.

8. Write a short paper on why you are interested in a particular career.

9. Talk over your vocational plans with your parents and others who can give you insight.

10. Prepare questions for an interview with people who are engaged in work in which you are interested. Interview as many as you can. Keep notes on each interview and make comparisons.

11. If it is possible, secure part-time employment in the field in which you are interested or in a related field. Evaluate your interest and your accomplishments in this endeavor.

12. Seek information on educational opportunities in the field and become informed about requirements and advancements.

MATERIALS AND RESOURCES:

Filmstrips:

Finding Your Job

Library books appropriate for individual needs.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CHAUCER'S PILGRIMS ARE ALIVE AND DOING WELL"
CAREERS OF CHAUCER'S TIME ARE STILL IN STYLE

GRADE: 12
SUBJECT: ENGLISH

BROAD OBJECTIVE:

To understand the permanence of vocations and professions.

PERFORMANCE OBJECTIVES:

1. To understand the growth of career opportunities from Chaucer's time to the present.

2. To realize the diversity of job opportunities in today's society.

3. To become better informed of advantages and disadvantages of certain occupations and professions.

LESSON PROCEDURE:

1. Make a list of occupations and professions of the Canterbury Pilgrims. Place an asterisk by each one that is a part of modern society.

2. Discuss the pilgrims' personality in relation to their occupations or professions.

3. Interview people in the community with occupations and professions comparable to those of Chaucer's Pilgrims to discover personal qualifications and appitudes that are necessary for success in various careers today.

4. Make a chart or bulletin board showing how various medieval occupations and professions have become diversified and how modern science and technology affect the world of work.

5. Discuss the educational and vocational opportunities that are available for the various fields of work.

6. Use role playing (a pilgrimage of modern workers) to emphasize the importance of various occupations and the interdependence of the vocations.

MATERIALS AND RESOURCES:

Book:

Chaucer, Geoffrey. The Canterbury Tales in England in Literature. Scott Foresman and Company, 1973.

MATERIALS AND RESOURCES: (Continued)

Resource People:

Local merchant, priest, lawyer, teacher or scholar, sailor, farmer, cook or chef, minister, doctor, and others that can give insight.

MATHEMATICS

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"DRAFTSMAN"

GRADE: 8
SUBJECT: ALGEBRA I - PART I

BROAD OBJECTIVE:

Mathematics is important in the field of drafting.

PERFORMANCE OBJECTIVE:

1. The student will learn how a designer produces a scale drawing.

2. The student will become aware of the use of geometric figures in design.

LESSON PROCEDURE:

1. The student will become familiar with simple scale drawings and construction of geometric figures.

2. A designer will speak to the class concerning basic techniques of original drawings of a proposed structure. He will also relate to the class specifics of his job. The students will be interested in the nature of his job, required training, salaries, and outlook of designers.

3. This unit will include a project that requires each student to make a scale drawing of a miniature golf course. Eighteen holes will be set in a 150' square. The student can use any geometric design for the greens.

4. Each project will be displayed so that others can appreciate the students creativity.

MATERIALS AND RESOURCES:

Textbook:

Junior High School Mathematics. Laidlaw Brothers, 1968.

Poster board, compass, straight edge, protractor, magic markers

Resource Person:

A designer

Films:

Educational Motion Pictures:
62809 Measuring. 16 minutes BW-1970E
39904 Measurement. 11 minutes CO/BW 1966 El-JH-CORE

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CONTRACTING BUSINESS"

GRADE: 8
SUBJECT: MATH 8; ALGEBRA I - PART I

BROAD OBJECTIVE:

Mathematics is essential to the contracting business.

PERFORMANCE OBJECTIVE:

Students will recognize the importance of area and perimeter in the business of selling wall and floor coverings.

LESSON PROCEDURE:

1. The students will do exercises that relate to area and perimeter of rectangles.

2. An individual who sells carpet, fencing, paneling and wall paper will explain how to measure homes for these items. He will also explain the qualifications and working conditions of his job.

3. As a project the students will decide the amount of carpet, wall paper, paint, and paneling needed for various rooms of a six room house. Specific dimensions will be given for each room.

MATERIALS AND RESOURCES:

Textbook:

Junior High School Mathematics. Laidlaw, Brothers 1968.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"PERCENTAGE"

GRADE: 8
SUBJECT: ALGEBRA I - PART I

BROAD OBJECTIVE:

Percent is necessary in many careers.

PERFORMANCE OBJECTIVE:

The student will become familiar with percent usage in banking and real estate.

LESSON PROCEDURE:

1. The students will learn to compute interest and work single reading problems relating to percents.

2. A local banker will be invited to briefly explain types of loans, types of savings accounts, how stock is obtained, how interest is computed, and a resume' of his duties.

3. A real estate agent will be invited to speak to the class about the role of percentages in selling property and commission distribution.

4. The class will do a sample problem to determine the amount of money the seller, listing agent, selling agent, sales manager, broker, and agency will receive when a house is sold.

MATERIALS AND RESOURCES:

Textbook:

Junior High School Mathematics. Laidlaw Brothers, 1968.

Resource People:

A banker
A real estate agent

Filmstrips:

SVE Educational Filmstrip: Interest, Banking and Investing. A539-4
Buying and Selling. A539-2

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"RATIONAL NUMBERS"

GRADE: 8
SUBJECT: MATH 8; ALGEBRA I - PART I

BROAD OBJECTIVE:

Many careers involve a working knowledge of rational numbers.

PERFORMANCE OBJECTIVE:

The students will become familiar with the use of rational numbers that relate to consumer buying, piece goods, and carpentry supplies.

LESSON PROCEDURE:

1. The unit will begin after the student understands the four basic operations on rational numbers. The student can adequately manipulate these numbers and are aware of how rational numbers relate in size to each other.

2. Four stations will be set up in the classroom:

   The grocery store will contain products that are alike but prices and volumes differ. (Ex. Three cans of peas that differ in size and price).

   The fabric shop will contain swatches of fabric priced by the yard and piece. Ribbon will be priced by the foot, yard, and inch.

   The carpenters shop will include pieces of wood priced by the foot, wrenches, nails, and sockets.

   The students will use these stations to play "The Shoppers Game". Rules for the game: Three persons will act as salespeople in the shops. Three persons will by buyers. The buyer will spin a classroom quiz type wheel to get his buying instructions.

   Sample problem: Buy 21/2 yds. of the most expensive fabric from the fabric shop. After the purchase and tax, how much change would one receive from a ten dollar bill?

   The seller tries to outwit the buyer during the transaction. If he succeeds and knows the correct answer, the seller gets a point. If he fails and the buyer knows the right answer, he wins the point. A team wins when five points are accumulated.

MATERIALS AND RESOURCES:

Textbook:

Junior High School Mathematics. Laidlaw Brothers, 1968.

Grocery containers
Pieces of fabric and ribbon
Wrenches, sockets, nails, pieces of wood
Classroom quiz wheel
Play money

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"SALES PERSONNEL"

GRADE: 8
SUBJECT: MATH 8

BROAD OBJECTIVE:

To develop student understanding of the math skills needed by sales personnel.

PERFORMANCE OBJECTIVE:

Each student will be able to determine the correct amount of change to be given back to a person who makes a purchase.

LESSON PROCEDURE:

A cashier in a store or a sales person from a store will come in and speak to the class about uses of math by sales personnel, proper procedures for making sales, and in general, the mechanics of being a sales person and meeting the public.

After the resource person has talked to the class, there will be a discussion of the procedures used to make change. This discussion will center around how a cashier adds rather than subtracts to determine how much change a person should receive back after a purchase. The student practice will include having each pupil act as a cashier, using play money and change, and determine for himself the amount of change a person will receive back after a purchase.

MATERIALS AND RESOURCES:

Resource Person:

Cashier or sales person from a store.

Play money and change

Text:

Eicholz, O'Daffer, Brumfiel, and Shanks. Basic Modern Mathematics. Addison-Wesley Publishing Co., Reading, Mass., 1965.

Film:

"Professional Selling Practices; Personalize Your Presentation". Bureau of Teaching Materials, State Department of Education, Richmond, Virginia 23216.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"ESTIMATION"

GRADE: 8
SUBJECT: MATH 8

BROAD OBJECTIVE:

To develop student understanding of the importance of estimation in various occupations.

PERFORMANCE OBJECTIVE:

The student will be able to estimate to the nearest multiple of 10, 100, and 1000 and be able to identify occupations involved with estimating.

LESSON PROCEDURE:

The students will be introduced to estimation through class discussion and lecture. One presentation will deal with estimating the number of marbles or beans in a jar. Another project will be involved with guessing the price of certain objects, such as cars, tables, lamps or houses. The student will then be taught how to estimate numbers to the nearest multiples of 10, 100 and 1000.

After the students understand estimation and how it relates to math, then a resource person such as a house builder, plumber, professional mover, or any other person who makes bids to estimate the price of their services, will come in and talk to the students about their job. This resource person should relate to the students the uses of math in his job, and how estimation related to his services.

MATERIALS AND RESOURCES:

Some type of container and beans or marbles.

Text:

Eicholz, O'Daffer, Brumfiel and Shanks. Basic Modern Mathematics. Addison-Wesley Publishing Co., Reading, Mass., 1965.

Resource Speakers:

Building contractor, plumber, electrician, or mover.

Prices of various objects used in class discussions.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"LANGUAGE OF MATHEMATICS TO COMMUNICATE"

GRADE: 8
SUBJECT: MATH 8; ALGEBRA I, PART I

BROAD OBJECTIVE:

Every individual needs the language of mathematics to communicate.

PERFORMANCE OBJECTIVE:

The student will become aware of the necessity of numbers in his environment.

LESSON PROCEDURE:

1. This activity will be administered during the first month of school on Friday to eighth grade math students who are taking Math 8 and Algebra I, Part I.

2. The students will take ten minutes and list the ways numbers are involved in his daily activities. The student will keep this list as part one of this project.

3. As an assignment the students will be asked to keep a detailed activity log (being very specific as to when, where, and how many) over a weekend.

4. On Monday, the student will write a brief paper explaining his weekend activities. He must be specific and avoid the use of numbers.

5. After his attempt to write the paper, the student will revise his list in part one.

MATERIALS AND RESOURCES:

None necessary

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"SPORTS STATISTICIAN"

GRADE: 8 AND 9
SUBJECT: MATH 8 AND 9, ALGEBRA I, PART I

BROAD OBJECTIVE:

To develop student understanding of the importance of math to a sports statistician.

PERFORMANCE OBJECTIVE:

Each student will be able to identify and perform mathematical operations needed to compute statistics for athletic contests.

LESSON PROCEDURE:

At the beginning of this lesson, the teacher will have a sports statistician from a local newspaper come to speak to the class about his job and how he obtains data and computes statistics for a basketball game. After this presentation by the resource speaker, there will be a class discussion of and student practice in computing statistics for athletic contests.

The teacher will set aside one day each week in which he will bring to class all the data from the previous week's basketball games and allow the students to work up the statistics for the games. Some of the statistics which can be figured in basketball are field goal percentage, free throw percentage, team percentages, individual player's point averages, team point averages, team defensive average, and many others. This lesson could be used for football and baseball also, and have the students work with data related to these sports.

As a final activity for this unit each student will have to watch some type of athletic contest and collect and analyze his own data.

MATERIALS AND RESOURCES:

Resource Speaker:

Local newspaper sports statistician or T V or radio sportscaster.

Data from sports contests.

Charts used to record data for a sports contest.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"TRANSPORTATION"

GRADE: 8 AND 9
SUBJECT: MATH 8 AND 9, ALGEBRA I, PART I

BROAD OBJECTIVE:

To develop student understanding of the uses of math by truck drivers and other transportation related occupations.

PERFORMANCE OBJECTIVE:

Each student will be able to compute miles per gallon of gas, wages earned, rate, time, and distance and identify their importance in jobs related to transportation.

LESSON PROCEDURE:

At the beginning of this lesson, the teacher will introduce the students to rate, time, and distance and have them solve problems related to these areas. The students will also be taught how to figure the number of miles per gallon of gasoline a car will go and how to find weekly and monthly salaries of hourly wage personnel.

After the students have completed this lesson on computing rate, time, distance miles per gallon, and hourly wage salaries, then a truck driver or some other person involved in road travel will come to speak to the class. This resource speaker will explain to the class the uses of math in his occupation, the procedures of his job, and the qualifications and abilities needed to obtain a job in his field.

MATERIALS AND RESOURCES:

Maps and rulers

Resource Speaker:

Truck driver, taxi driver or salesman

Text:

Eicholz, O'Daffer, Brumfiel and Shanks. Modern General Mathematics. Addison-Wesley Publishing Co., Reading, Massachusetts, 1965.

Film:

"Truck Driver", #54108. Bureau of Teaching Materials, State Department of Education, Richmond, Virginia 23216.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"VACATION TRIP"

GRADE: 8 AND 9
SUBJECT: MATH

BROAD OBJECTIVE:

1. To develop student awareness of the importance of math in planning leisure time activities.

2. To provide student experience in planning a vacation trip.

PERFORMANCE OBJECTIVE:

Each student will be able to plan a budget for a trip and properly prepare a financial statement of expected expenses.

LESSON PROCEDURE:

Each student will bring to class a poster or an advertisement of some place he would like to visit in the United States. This place must be at least 600 miles away and not more than 1000 miles. After choosing the destination, the student will plan a trip there. The trip must last for at least six days and five nights. The vacation budget will be planned for two people taking the trip.

After choosing the destination, each student will chart his course on a map. Each student should have a map illustrating the route.

The teacher will make out a form that the students will complete as they work on their project. This form will involve determining the most economical and efficient method of transportation, the cost of lodging and food, etc.

After each student has completed his planning for the trip, he will make a brochure explaining the details of his trip. This brochure will include relevant information from the trip form completed by the student.

As a final activity, the students will display and explain their brochures in the class.

MATERIALS AND RESOURCES:

1. Newspapers and magazines - to obtain ideas, and posters of places.

2. Hotel brochures and rates - can be obtained from local hotels - preferrably nationally known hotels, such as Holiday Inn, Marriott, Ramada, etc.

MATERIALS AND RESOURCES: (Continued)

3. Maps of United States - can be obtained from service stations - best source is probably the Automobile Association of America(AAA).

4. Rulers - for determining distances on the map.

5. Train rates and schedules.

6. Plane rates and schedules.

7. Bus rates and schedules.

8. Menus - from hotel restaurants preferrably.

9. The Chamber of Commerce.

10. Vacation trip form - attached.

VACATION TRIP

I. 1. Destination _____
2. Departure Date _____
3. Arrival Date _____
4. Distance to be traveled
a. One way _____ miles
b. Round trip _____ miles

II. Transportation
1. Plane
a. Cost of round trip ticket $_____
b. Departure time _____
c. Arrival time _____
d. Total length of flight _____ hrs. _____ min.
e. Point of departure _____
f. Point of arrival _____
g. Rent-A-Car
A. Cost per day $_____ per mile _____¢
B. Number of days will use car _____
C. Approximate number of miles will travel in car___
D. Approximate total cost of rental car $_____

2. Train
a. Cost of round trip ticket $_____
b. Departure time _____
c. Arrival time _____
d. Total length of train trip _____ hrs. _____ min.
e. Point of departure _____
f. Point of arrival _____
g. Expected Rent-A-Car cost $_____

3. Bus
a. Cost of round trip ticket $_____
b. Departure time _____
c. Arrival time _____
d. Point of departure _____
e. Point of arrival _____
f. Total length of bus trip _____ hrs. _____ min.
g. Expected Rent-A-Car cost $_____

4. Car

a. Miles per gallon gasoline car obtains _____
b. Number of miles to be traveled _____
c. Number of gallons of gas to be used _____
d. Cost per gallon gas _____¢
e. Total gas cost $_____
f. Availability of gas good _____ fair _____ poor ____
g. Total cost of running car (approximately 15¢ per mile for gas and wear and tear) $_____

5. Mode of transportation will use _____
Why? _____
_____

III. Motels (must stay in at least two different ones)

a. Name and location of motels
1. _____
2. _____

b. Telephone numbers (for reservations - include area codes)
1. _____ 2. _____

c. Restaurant with motel
1. _____ 2. _____

d. Cost per day of motel (double room)
1. $_____ 2. $_____

e. Number of nights will spend there
1. _____ 2. _____

f. Total cost of each motel
1. $_____ 2. $_____

g. Total motel cost for trip
$_____

IV. Food

a. Number of breakfasts _____
b. Number of lunches _____
c. Number of dinners _____
d. Approximate cost of breakfast (for two) $_____
e. Approximate cost of lunch (for two) $_____
f. Approximate cost of dinner (for two) $_____
g. Cost of breakfast for trip $_____
h. Cost of lunch for trip $_____
i. Cost of dinner for trip $_____
j. Total cost of meals on trip $_____

V. Places of interest to visit on trip (at least three)
1. _____
2. _____
3. _____

VI. Miscellaneous expenses (entertainment, snacks, etc.)
$_____

VII. Total cost of entire trip $_____

Amount of trip can charge on credit card
(gas, possibly motel) $_____

Amount of cash will need $_____

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"BUYING AND SELLING STOCKS"

GRADE: 9
SUBJECT: MATH 9 AND ALGEBRA I, PART I

BROAD OBJECTIVE:

To develop student understanding of the mechanics of buying and selling stocks.

PERFORMANCE OBJECTIVE:

Each student will be able to look in the newspaper listing of stocks and determine the worth of a particular stock.

LESSON PROCEDURE:

As an introduction to this lesson there will be a short explanation by the teacher on what stocks are and how their worth is figured. After the teacher's lesson, a stock broker will be invited to speak to the class on investing money, how stocks are bought and sold, local stocks of interest, what to look for when buying stocks, and the duties and responsibilities of his job.

As a final activity for this unit, each student will be given $1000 play money to buy stocks with from the teacher. The student must buy at least two different stocks and no more than three, and at least five shares of each. To determine the current prices of the stocks and which stocks they would like to buy, the students will look in the newspaper listing of stocks. After the students have purchased their stock, they must follow the ups and downs of their stock every day in the newspaper. Each pupil will keep a daily log on the price of his stock and how much money he is making or losing.

This project will last for four weeks. At the end of that time, each student must determine how much money they made or lost on their stock and if they would like to keep or sell their stock. Every stock used by the students will be put on the blackboard along with how much money was made or lost on the stock, so that everyone can see how stocks rise and fall.

MATERIALS AND RESOURCES:

Newspapers
Daily log sheet for each person.

Resource Person:

Stock Broker

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"MATHEMATICS FOR COMPUTERS"

GRADE: 9
SUBJECT: ALGEBRA I

BROAD OBJECTIVE:

Knowledge of mathematics is necessary for many careers.

PERFORMANCE OBJECTIVE:

The computer programmer uses mathematics.

LESSON PROCEDURE:

1. Class should study Digital Computer Methods as a part of the regular curriculum or as an enrichment unit.

2. Invite a speaker from the computer science department of a university, or a computer programmer from a local industry.

3. Show a film on computers, or plan a field trip to the data processing department of a local business.

MATERIALS AND RESOURCES:

Resource Person:

Computer programmer or computer science speaker.

Film:

"Computer Revolution", #19709. Bureau of Teaching Materials, State Department of Education, Richmond, Virginia 23216.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"MACHINIST"

GRADES: 9 - 12
SUBJECT: ALGEBRA

BROAD OBJECTIVE:

Student awareness of mathematical abilities needed in some fields of industry.

PERFORMANCE OBJECTIVE:

To enable the student to recognize the mathematical competence needed by a machinist in the areas of his work.

LESSON PROCEDURE:

This will not deal with one particular aspect of algebra but with the course as a total. A resource person who is a machinist will be invited to tell of his mathematical background, and how he uses the different parts of algebra in his work as a machinist.

MATERIALS AND RESOURCES:

Resource Person:

Machinist

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"PYTHAGOREAN THEOREM"

GRADE: 9, 10, 11
SUBJECT: GEOMETRY

BROAD OBJECTIVES:

1. To help students gain some understanding of how Geometry (one small phase) can be used in a practical situation.

2. To correlate one of the concepts of Geometry to practical situations.

PERFORMANCE OBJECTIVE:

1. The student will be able to apply the Pythagorean Theorem to practical situations such as: (a) obtaining a square (90°) corner without the aid of a delicate instrument, (b) roughly being able to mark off a rectangle shaped area, (c) roughly being able to lay off foundation for building, (d) being able to check and see if some object is vertically alined, etc.

LESSON PROCEDURE:

To make students aware of the importance of the Pythagorean Theorem, each geometry class will spend a class period laying off square corners and checking to see when a pole is vertically alined. Each class will be broken down into groups of three students per group. Each group will have the following equipment to work with: (1) 9 short stakes, (2) a hammer, (3) one pole about 6 ft. in length, (4) up to 100 ft. of rope (cord, etc.).

Each group will erect at least two square corners with different leg measure for each corner. Also, they will erect one 6 ft. pole and make sure that it is vertically alined with the ground.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"TRAVEL EXPENSE"

GRADE: 10
SUBJECT: MATH

BROAD OBJECTIVE:

In todays world people are constantly involved with travel.

PERFORMANCE OBJECTIVE:

The student will be able to plan a trip including the figuring of mileage, time, expenses, and incidentals involved with travel.

LESSON PROCEDURE:

Each student will select a spot somewhere in the continental U. S. where he would someday like to vacation. After selecting the spot, he will figure by use of maps the following:

1. Total distance traveled
2. Amount of gas
3. Time for travel
4. Lay-over
5. Food expense
6. Lodging expense
7. Incidental expenses

MATERIALS AND RESOURCES:

Maps
Atlas
Brochure of travel spots

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"PURCHASING A HOME"

GRADE: 10
SUBJECT: MATH 10

BROAD OBJECTIVE:

Most productive citizens are involved either directly or indirectly with the purchase of a home.

PERFORMANCE OBJECTIVE:

The student will be able to compute interest, amount of insurance, taxes, legal fees, and the amount of payment involved with the purchase of a home.

LESSON PROCEDURE:

Each student will select two houses which he would like to own.

He will research the areas of competitive prices, present interest rates, and current tax rates.

From the research he will compute the following:

(1) Price of house
(2) Amount of down payment
(3) Term of loan
(4) Interest rate
(5) Insurance needed
(6) Taxes
(7) Amount of payment

RESOURCES AND MATERIALS:

Resource People:

Real Estate Agent
Loan Officer from Bank

Text:

McNelly, A. E.; Olson, Milton C. Business and Consumer Arithmetic. 6th Edition. Prentice-Hall, 1969.

Materials:

Payment Book

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CHECKING ACCOUNTS"

GRADE: 10
SUBJECT: MATH 10

BROAD OBJECTIVE:

Most careers require people to have and be able to use a checking account.

PERFORMANCE OBJECTIVE:

The student will be able to write checks correctly, fill out deposit slips, balance a checking account, and coordinate reconciliation statements.

LESSON PROCEDURE:

To start the unit on checking accounts, a banker will be brought in to explain the uses and procedures of checking.

The students will then be shown how to write checks correctly and will write checks for common bills (electric, phone, etc.).

Next the students will be shown the proper method for filling out deposit slips.

After the check and deposit slips are filled out, the students will be given bank statements and reconciliation statements and show the relationship between the two and how each is read and computed.

As a final "check", the students will be given a case of written checks, deposits, and service charges and will be asked to balance the bank statement.

MATERIALS AND RESOURCES:

Samples of bank statements, checks, stubs, deposit slips, and reconciliation statements.

Text:

McNelly, A. E.; Olson, Milton C. Business and Consumer Arithmetic. 6th Edition. Prentice-Hall, 1969.

Resource Person:

Cashier or Banker

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"MAINTAINING A HOME"

GRADE: 10
SUBJECT: MATH 10

BROAD OBJECTIVE:

Regardless of a chosen career, people will be involved with the maintenance of some type of dwelling.

PERFORMANCE OBJECTIVE:

The student will be able to estimate the cost of specific maintenance repairs such as painting, wallpapering, carpeting, and tile.

LESSON PROCEDURE:

Each student will draw detailed floor plans of their homes.

From these plans, they will figure areas to be covered and the square footage.

From these figures the student will compute the cost of each covering.

MATERIALS AND RESOURCES:

Text:

McNelly, A. E.; Olson, Milton C. Business and Consumer Arithmetic. 6th Edition. Prentice-Hall, 1969.

Materials:

Samples of coverings and cost (from Central Lumber Company or The Carpet Shop).

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"LINEAR MEASURE"

GRADE: 10
SUBJECT: MATH

BROAD OBJECTIVE:

Everyone needs a working knowledge of the concept of linear measure.

PERFORMANCE OBJECTIVE:

The student will be able to apply the concept of linear measures to a job task.

LESSON PROCEDURE:

A group of students will draw a scale drawing of a football field.

From this drawing they will mark and line off the football field for Thursday and Friday night games.

MATERIALS AND RESOURCES:

1. 100 foot tape measure
2. Paint sprayer
3. Blueprint of field markings
4. Boundary markers

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"MATHEMATICS IN SPACE"

GRADE: 10, 11, or 12
SUBJECT: ALGEBRA II OR MATH ANALYSIS

BROAD OBJECTIVE:

Mathematics has applications in many fields.

PERFORMANCE OBJECTIVE:

The principles of analytic geometry are used by aerospace engineers.

LESSON PROCEDURE:

1. Class should have recently completed a unit on conic sections.

2. Invite an Aerospace Engineer to speak to the class on the applications of analytic geometry to his work. The training necessary and the opportunities open for his field should be covered, as well as other opportunities for a career in aerospace.

3. On the day following the speaker, the class might have an open discussion on the ideas and careers presented to them.

MATERIALS AND RESOURCES:

Resource Person:

Aerospace Engineer

Films:

"Space Probes", #37305. Bureau of Teaching Materials, State Department of Education, Richmond, Virginia 23216.
"Science in Space", #15612. Bureau of Teaching Materials, State Department of Education, Richmond, Virginia 23216.
"Father of Space Age - Robert Goddard", #43808. Bureau of Teaching Materials, State Department of Education, Richmond, Virginia 23216.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"ARCHITECTURE"

GRADES: 10 - 12
SUBJECT: ALGEBRA II

BROAD OBJECTIVE:

Student awareness of mathematical abilities needed in certain specialized occupations.

PERFORMANCE OBJECTIVE:

To enable the student to recognize the mathematical background that is needed by a person in the field of architecture.

LESSON PROCEDURE:

This will not deal with one particular part of Algebra, and thus there will be no one particular unit or lesson to study. A resource person in the field of architecture will be asked to tell of his own mathematical background. He will be asked to relate some parts of his job to the parts of algebra and geometry that the students have had, and show where these are necessary in his work.

MATERIALS AND RESOURCES:

Resource Person:

Resource person in the field of architecture.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"MATHEMATICS FOR LAND SURVEYORS"

GRADE: 11 or 12
SUBJECT: TRIGONOMETRY

BROAD OBJECTIVE:

An understanding of mathematics is essential to land surveyors.

PERFORMANCE OBJECTIVE:

Surveying a piece of land in order for a plot to be drawn requires knowledge of geometry and trigonometry.

LESSON PROCEDURE:

1. Class should have completed a unit on the solutions of triangles using trigonometry.

2. Invite a Certified Land Surveyor to speak. He might discuss the training necessary, positions available, and some representative problems he can solve using trigonometry and other mathematics.

3. Class should spend the day following the visit from the surveyor in solving typical problems confronted by the surveyor.

MATERIALS AND RESOURCES:

Resource Person:

Certified Land Surveyor

Material:

Sample plots to display.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"MATHEMATICS FOR PSYCHOLOGISTS"

GRADE: 11 or 12
SUBJECT: ADVANCED ALGEBRA/TRIGONOMETRY OR MATH ANALYSIS

BROAD OBJECTIVE:

Mathematical statistics has applications necessary to psychologists.

PERFORMANCE OBJECTIVE:

The analysis of test data requires the use of mathematics.

LESSON PROCEDURE:

1. Administer a short achievement test to students, or use heights of class members.

2. Using the scores from the test, or the heights, have the students make a frequency distribution of the scores, find the mean, medians, and mode, standard deviation, etc.

3. Each student is to evaluate his score in relation to the scores of his classmates.

4. The local school psychologist will make a presentation on the use of mathematical statistics in his work, both in group and individual testing.

MATERIALS AND RESOURCES:

Short achievement test which can be administered by classroom teacher.

Resource Person:

Local school psychologist, or other psychologist from the area.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"MATHEMATICIAN"

GRADE: 12
SUBJECT: MATH ANALYSIS OR ADVANCED ALGEBRA/TRIGONOMETRY

BROAD OBJECTIVE:

Mathematicians are necessary in many fields.

PERFORMANCE OBJECTIVE:

Mathematicians may seek employment either in theoretical or applied fields, as well as in closely related areas, such as the sciences or engineering.

LESSON PROCEDURE:

1. Have each student choose a career in which a knowledge of higher mathematics is necessary. Avoid duplication by having students indicate their choice from a list supplied by the teacher.

2. Students are to do research on their selection. This should include finding out the required training for the position, what type of work is involved, and the availability of employment. Students should write to sources of career information, and interview or write to someone in the field.

3. When all reports are complete, each student should present his findings to the class.

MATERIALS AND RESOURCES:

SRA Occupational Briefs, 259 E. Erie St., Chicago, Ill. 60611.

Occupational Outlook Handbook, U. S. Department of Labor and Statistics Bulletin 1700.

Careers Inc., Career Kit, Largo, Florida.

SCIENCE

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"ELECTRICITY AND RELATED JOBS"

GRADE: 8 AND 9
SUBJECT: SCIENCE

BROAD OBJECTIVE:

To give the student experiences which will make him more aware of electricity as a major form of energy and more aware of jobs related to it's production and distribution.

PERFORMANCE OBJECTIVE:

The student will be able to explain the law of magnetism.

LESSON PROCEDURE:

1. Student will read "Magnetism as a Force", p. 182-185 in Physical Science for Progress.
2. Student will view filmstrip, "Magnetism".
3. Student will view transparency, "Magnetism and Electricity".
4. Student will view film loop, "What is Magnetism?".
5. Student will perform Experiment One, p. 84, in lab manual, "Discovery Problems in General Science".

MATERIALS AND RESOURCES:

Book:

Pella, Milton O. Physical Science for Progress. Prentice-Hall. Englewood Cliffs, New Jersey, 1970.

Filmstrip:

"Magnetism". General Science.

Transparency:

"Magnetism and Electricity". Singer.

Film Loop:

"What Is Magnetism?" ICF Study Guide.

Lab Manual:

Eckert, Theodore E. Discovery Problems in General Science. College Entrance Book Company. New York, 1971.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"ELECTRICITY AND RELATED JOBS"

GRADE: 8 AND 9
SUBJECT: SCIENCE

BROAD OBJECTIVE:

To give the student experiences which will make him more aware of electricity as a major form of energy and more aware of jobs related to it's production and distribution.

PERFORMANCE OBJECTIVE:

The student will be able to explain how a generator produces electricity.

LESSON PROCEDURE:

1. Student will read "Electricity and Magnetism", p. 367-368 in The Physical Sciences, Investigating Man's Environment.
2. Student will view filmstrip, "How Electricity Is Produced".
3. Student will view transparency, "Magnetism and Electricity".
4. Student will view film loop, "Magnetic Fields, part 2".
5. Student will perform Experiments One and Two, p. 91 in lab manual, Discovery Problems in General Science.

MATERIALS AND RESOURCES:

Book:

Fishe and Blecha. The Physical Sciences, Investigating Man's Environment. Laidlaw. River Forest, Illinois, 1971.

Filmstrip:

"How Electricity Is Produced". Singer.

Transparency:

"Magnetism and Electricity". Singer.

Film Loop:

"Magnetic Fields, part 2". ICF Study Guide.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"ELECTRICITY AND RELATED JOBS"

GRADE: 8 AND 9
SUBJECT: SCIENCE

BROAD OBJECTIVE:

To give the student experiences which will make him more aware of electricity as a major form of energy and more aware of jobs related to it's production and distribution.

PERFORMANCE OBJECTIVE:

The student will make a report on one of the many job opportunities in the city-owned utility department of the City of Radford, Virginia.

LESSON PROCEDURE:

1. Teacher furnishes a list of utility job positions.

2. Student groups select one position for research. (Duplication should be avoided if possible)

3. Student group may research by interview and use of career and occupational briefs.

4. Student group reports orally to class.

MATERIALS AND RESOURCES:

Occupational and Career Briefs:

Careers. Institute for Research. Chicago, 1971. Research numbers 120, 113, 37.

Chronicle Occupational Briefs. Chronicle Guidance Publications, Inc. Morovia, New York, 1972. Numbers 21, 58, 109, 204, 259, 318, 395.

Resource People:

Will include the city manager, electrical superintendent, the utility service billing manager and the personnel working under them.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"ELECTRICITY AND RELATED JOBS"

GRADE: 8 AND 9
SUBJECT: SCIENCE

BROAD OBJECTIVE:

To give the student experiences which will make him more aware of electricity as a major form of energy and more aware of jobs related to it's production and distribution.

PERFORMANCE OBJECTIVE:

Student will explain the relationship between magnetism and electricity by describing the effect of an electric current on a compass needle.

LESSON PROCEDURE:

1. Student will read "Electricity and Magnetism", p. 366-367 in The Physical Sciences, Investigating Man's Environment.
2. Student will view filmstrip, "Magnetism from Electricity".
3. Student will view transparency, "Magnetism and Electricity".
4. Student will view film loop, "Magnetic Fields, part 1".
5. Student will perform Experiment One, p. 87 in lab manual, Discovery Problems in General Science.

MATERIALS AND RESOURCES:

Book:

Fishe and Blecha. The Physical Sciences, Investigating Man's Environment. Laidlaw. River Forest, Illinois, 1971.

Filmstrip:

"Magnetism from Electricity". Singer.

Transparency:

"Magnetism and Electricity". Singer.

Film Loop:

"Magnetic Fields, part 1". ICF Study Guide.

Lab Manual:

Eckert, Theodore E. Discovery Problems in General Science. College Entrance Book Company. New York, 1971.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"ELECTRICITY AND RELATED JOBS"

GRADE: 8 AND 9
SUBJECT: SCIENCE

BROAD OBJECTIVE:

To give the student experiences which will make him more aware of electricity as a major form of energy and more aware of jobs related to it's production and distribution.

PERFORMANCE OBJECTIVE:

The student will explain how electricity is measured and sold.

LESSON PROCEDURE:

1. Student will read "Electrical Potential", p. 196-200 in Physical Science for Progress.
2. Student will read "Ohm's Law", p. 202-206 in Physical Science for Progress.
3. Student will view filmstrip, "Ohm's Law of Electrical Resistance".
4. Student will view transparency, "Magnetism and Electricity" (section on Ohm's Law).
5. Student will view film loop, "Ohm's Law".
6. Student will read "Electric Power", p. 211 in Physical Science for Progress.
7. Student will view filmstrip, "Electrical Work, Energy, and Power".
8. Student will view transparency, "Magnetism and Electricity" (section on Watt's Law).
9. Student will listen to a taped explanation of the electrical rate schedule. The tape will be made in an interview with the Utility Service Billing Manager of the city.
10. Student will solve problems in electrical calculations from p. 92, 93, 94 in the lab manual, Discovery Problems in General Science.

MATERIALS AND RESOURCES:

Book:

Pella, Milton O. Physical Science for Progress. Prentice-Hall. Englewood Cliffs, New Jersey, 1970.

MATERIALS AND RESOURCES: (Continued)

Filmstrips:

"Ohm's Law of Electrical Resistance". Singer.
"Electrical Work, Energy, and Power". Singer.

Transparency:

"Magnetism and Electricity". Singer.

Film Loop:

"Ohm's Law". ICF Study Guide.

Resource Person:

Utility Service Billing Manager

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"SEA FLOOR TOPOGRAPHY WITH EMPHASIS ON CAREER POSSIBILITIES"

GRADE: 9
SUBJECT: EARTH SCIENCE

BROAD OBJECTIVES:

1. To become familiar with the topographic features of the major ocean basins.

2. To become aware of occupations in the field of oceanography.

PERFORMANCE OBJECTIVES:

1. To be able to list and describe features of the sea floor.

2. To be able to read and use topographic maps.

3. To be able to construct relief models from topographic maps.

4. To be able to define and describe various jobs related to the field of oceanography.

LESSON PROCEDURE:

1. Introduce unit on sea floor topography with a film, such as "Earth Beneath the Sea" or "Oceanography - Science of the Sea".

2. Discuss features of ocean basins following text book.

3. Do activity in lab - Construction of a Topographic Profile of the Sea Floor.

4. Discuss topographic profile and how it is used to develop topographic maps.

5. Present basics of topographic maps, using the pamphlet, "Topographic Maps", put out by the U. S. Geological Survey.

6. Do lab exercise "Construction of a Bathymetric Map" from Laboratory Activities in Oceanography. Show film on Mapping.

7. Discuss how relief models can be made from topographic maps.

8. Construct models of the ocean basins with play dough.

9. Have class discussion on careers that use the techniques learned in class or are dependent on information about sea floor topography. (This can be woven into the unit or done separately)

10. Have an activity called "A Future in Marine Science". Set up learning centers around the room using Popeye comic book "Marine Science", filmstrips on Oceanography, filmstrip on

LESSON PROCEDURE: (Continued)

Marine Science, Career Education Cluster Books containing information about careers in oceanography, the tape "Oceanography as a Profession", and possibly a film such as "Challenge of the Oceans". Allow students to circulate to different areas.

11. Career Ideas:

underwater photography
submarine farming, mining
fishing industry (catching to processing)
research and development
government work
laboratories
oil companies
technical writing
weather and space research
ocean ecology
enfironmental protection
navigation
marine engineer
oceanography
map and chart making

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"INVESTIGATING WEATHER PHENOMENA"

GRADE: 9
SUBJECT: EARTH SCIENCE

BROAD OBJECTIVES:

1. To acquire an understanding of weather phenomena.

2. To become familiar with occupations in the field of meteorology.

PERFORMANCE OBJECTIVES:

1. Be able to explain how the atmosphere participates in the water cycle through evaporation, condensation, and precipitation.

2. Be able to determine the relative humidity and dew point, given the temperature and vapor pressure.

3. Compute the height to which moist air must be lifted for condensation to occur, given the temperature and vapor pressure.

4. Distinguish between and be able to identify clouds and explain how they may be formed.

5. Explain how air masses are formed and how they may be modified to become stable or unstable.

6. Describe the life cycle of a frontal cyclone and the typical weather that it produces as its potential energy is converted to kinetic energy.

7. Be able to relate local weather changes to the spatial and temporal pattern of weather movement in general.

8. Be able to discuss the occupation of a meterologist and be familiar with related careers.

LESSON PROCEDURE:

1. Discuss the water cycle in the atmosphere.

2. Do investigation 8-2, "Investigating Evaporation".

3. Discuss evaporation controls, vapor pressure, relative humidity, condensation and adiabatic process.

4. Show film "Clouds Above".

5. Discuss cloud and precipitation types, their interrelation, and rain formation. (Display Cloud Identification Chart)

LESSON PROCEDURE: (Continued)

6. Show filmstrip on Weather.

7. Do investigation 8-9, "Weather Watch".

8. Collect weather maps and forecasts from newspapers.

9. Show films, "Reading Weather Maps" and "How Weather is Forecast". Discuss career of a meteorologist.

10. Discuss air masses and the development of cyclones.

11. Show film, "Operation Hurricane".

12. Perform Investigation 8-12, "Cumulus Cloud Formation".

13. Perform Investigation 8-13, "Investigating Weather Maps".

14. Show film "Weather Scientists" and conduct a class discussion afterwards on careers in weather science.

15. Invite a meteorologist to speak to the class. Allow time for students to ask questions about his job or related jobs.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"STUDY OF THE SOLAR SYSTEM"

GRADE: 9
SUBJECT: EARTH SCIENCE

BROAD OBJECTIVES:

1. To develop the idea of the isolated and generally empty nature of the solar system.

2. To study the individual members of the solar system.

3. To understand the fundamentals of planetary motions according to the law of gravitation.

4. To present modern theories on the origin of the solar system.

5. To provide information on careers in space related fields.

PERFORMANCE OBJECTIVES:

1. To be able to describe verbally or graphically the isolation and relative emptiness of the solar system.

2. To be able to list some known physical characteristics of the various planets and give some reasons for their differences.

3. To be able to describe the general mechanics of the solar system and relate the law of gravitation to planetary motion.

4. To be able to describe the physical characteristics and dynamic properties of the minor members of the solar system.

5. To be able to contrast different theories on the origin of the solar system.

6. To be able to list and describe some careers in the field of space science.

LESSON PROCEDURE:

1. Discuss planetary motion. Do activity with figure 23-1.

2. Show film on Planetary Motion.

3. Do Investigation 23-2, "Motions and Phases of Planet X. Discuss development of knowlege of planetary motion and Kepler's laws of motion.

4. Do Investigation 23-4, "Creating a Model of the Solar System."

LESSON PROCEDURE: (Continued)

5. Discuss major differences between planets, asteroids, meteors and comets. Show film, "Asteroids, Comets and Meteorites".

6. Show filmstrip, "Solar System".

7. Discuss possibilities of life on other planets.

8. Shoe film, "Mars and Beyond".

9. Discuss theories of the origin of the Solar System.

10. Divide class into teams of 3 students. Let each student draw a space-related career out of a hat. The topic should be kept secret and researched by each team. Then the team of 3 students will take turns posing as persons in the specific career, while the rest of the class serves as a panel in a classroom version of "What's My Line". In this way, knowledge of various careers in space science will be presented to the class.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CAREERS IN EARTH SCIENCE: MINERALOGY"

GRADE: 9
SUBJECT: EARTH SCIENCE

BROAD OBJECTIVES:

1. To learn the properties of important minerals.

2. To relate the properties of minerals to the conditions under which they form.

3. To acquaint students with careers in mineralogy.

PERFORMANCE OBJECTIVES:

1. To be able to identify common minerals by their properties.

2. To be able to discuss the past environment of an area from its mineralogical make-up.

3. To be able to name careers in the field of mineralogy.

LESSON PROCEDURE:

1. Use filmstrip "Rocks and Mineralization" to introduce the properties used in mineral identification. In addition, the transparencies on Rocks and Minerals from 3-M may be used.

2. Give students Mineral Identification Keys and explain their use.

3. Spend several lab periods learning to identify common minerals in classroom.

4. Display posters of common minerals in classroom.

5. Display reference books on minerals.

6. Take a field trip to a local mineral museum or exhibit. Ask curator to speak to group about his job.

7. Ask gem cutter or jeweler to speak to class about how the properties of minerals are used in the jewelry business and about his work.

8. Discuss the formation of minerals under specific conditions using a chart of Bowen's Reaction Series.

9. Discuss the role of a geologist in interpreting the geologic history of an area from it's mineral make-up.

LESSON PROCEDURE: (Continued)

10. Show a film dealing with minerals, such as "Treasures of the Earth" which stresses conservation of valuable resources, or "Understanding Our Earth - Rocks and Minerals".

11. Discuss careers concerned with minerals. For example, have students think of the different types of jobs in the mining industry, such as: Mining engineering, Prospecting and exploration, Appraisal, Extraction - Open-pit mining, underground mining, drilling, Refinement of minerals, Marketing of minerals, Metallurgical research.

    Other related careers for discussion: Geophysicist, Petroleum Geologist, Jewelry Making and Gem Cutting, Museum Work, Metalworking, Petroleum Engineer, Petroleum Research.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CHEMICAL CHANGES"

GRADE: 11, 12
SUBJECT: CHEMISTRY

BROAD OBJECTIVE:

To develop in the student an understanding of chemical changes, and to develop an awareness of how atoms react during chemical changes and how man uses his knowledge of chemical changes.

PERFORMANCE OBJECTIVE:

1. To be able to describe four types of chemical reactions.

2. Use chemical shorthand in working with chemical formulas and balance equations.

3. Explain the behavior of electrons in a chemical change.

4. Classify various compounds into categories known as acids, bases, salts and oxides.

5. Discuss how man uses his chemical knowledge in and for society.

LESSON PROCEDURE:

1. Show the film "Chemical Changes are About Us".

2. Devise a lecture about chemical changes and present it to the class, afterwhich a work sheet involving formula writing will be handed out for the students to complete.

3. Three labs involving chemical changes will be assigned to students. These labs will include (1) production and collection of oxygen (2) titration of an acid with a base (3) mixing of solutions to form a precipitate.

4. Play the tape "Chemistry As A Profession" and conduct classroom discussion afterwards.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"NUCLEAR CHEMISTRY"

GRADE: 11 and 12
SUBJECT: CHEMISTRY

BROAD OBJECTIVES:

1. To develop an understanding of the nature, types, general properties and detection of radioactivity and to study representative uses of nuclear energy.

2. To gain an understanding of the emerging importance of nuclear chemistry in today's society and acquaint the student with careers relating to this field.

PERFORMANCE OBJECTIVES:

1. List the different types of radiation and explain the behavior of each type.

2. Explain how the various types of radiation can be detected.

3. Describe a nuclear reactor and the reactions which occur inside a reactor.

4. Diagram a decay chain.

5. Explain in detail how radioactive materials are used to treat diseases.

6. State some hazards and some benefits to health that can occur through the use of radioactive substances.

7. To be able to expound on the career opportunities in nuclear chemistry.

LESSON PROCEDURE:

1. Have a lecture which covers the basics of nuclear chemistry.

2. Show a film about Nuclear Structure.

3. Have the students construct a model of a nuclear reactor by using boxes, tubes, wires, and cans. Discuss the function of the various parts. Explain the steps in the conversion of nuclear energy to electrical energy.

4. Compare the advantages and disadvantages of nuclear energy with the energy produced by the burning of coal, oil or gas.

5. Have students construct a bulletin board display to illustrate the fission of uranium 235. Use styrofoam balls of various sizes and colors to represent nutrons and atoms.

LESSON PROCEDURE: (Continued)

6. Allow students time to visit the library to acquire information concerning careers in nuclear chemistry.

MATERIALS AND RESOURCES:

Texts:

Cotton and Lynch. Chemistry - An Investigative Approach. Houghton Mifflin, 1970.
Duel, Metcalfe and Williams. Modern Chemistry. Holt, Rinehart and Winston, Inc., 1968.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"MACHINES"

GRADE: 12
SUBJECT: PHYSICS

BROAD OBJECTIVE:

To introduce students to the power and energy saving machines and the related careers.

PERFORMANCE OBJECTIVES:

1. To be able to demonstrate the transformation of energy through the use of machines in the lab setting.

2. To list some careers which incorporate power and energy saving machines.

LESSON PROCEDURE:

1. Lecture to students about machines.

2. Use 16 mm film on "Simple Machines".

3. Have several lab periods which require the use of machines to transform energy.

4. Give students the assignment of building a model bridge. Have them organize a construction company and delegate responsibilities.

5. Ask a civil engineer from the community to speak to the class about career opportunities.

MATERIALS AND RESOURCES:

Text:

Williams, Metcalfe, Trinklein and Lefler. Modern Physics. Holt, Rinehart and Winston, Inc., 1968.

Books:

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"PHOTOGRAPHY AS RELATED TO PHYSICAL OPTICS"

GRADE: 12
SUBJECT: PHYSICS

BROAD OBJECTIVES:

1. To expose the students to the principles of physical optics and answer the question, "Why and how does the camera work?".

2. To acquaint the students with careers related to photography.

PERFORMANCE OBJECTIVES:

1. To acquire an understanding of the laws of reflection and refraction of light.

2. To define images and list the two types.

3. To be able to list the basic parts of a camera,to tell their functions and the principles upon which these parts operate.

4. To list some of the careers associated with photography.

LESSON PROCEDURE:

1. Discuss and explain the concept of physical optics.

2. Design four labs which operate on a rotating basis. Each student will complete all four labs by the end of a designated time.

   Lab 1 - Discuss and demonstrate the formation of images by use of the pinhole camera.
   Lab 2 - Exhibit types of mirrors and develop diagrams for plane and curved surfaces.
   Lab 3 - Set up apparatus to demonstrate converging and diverging lenses.
   Lab 4 - Examine a camera which has been disassembled.

3. Show films which deal with the subject of light.

4. Create learning centers which display information about cameras, developing techniques and basic movie making techniques.

5. Show filmstrip entitled "Careers in Photography".

MATERIALS AND RESOURCES:

Text:

SOCIAL STUDIES

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"MONEY AND BANKING CAREERS"

GRADE: 8
SUBJECT: HISTORY

BROAD OBJECTIVES:

1. To help students explore the various careers in banking and related areas.

2. To enhance the students understanding of the world of money and the banking institution.

PERFORMANCE OBJECTIVE:

To help the student understand the following:
- interest
- checking account
- savings account
- loans
- other banking practices

LESSON PROCEDURE:

The class will be divided into groups, covering all the areas of banking. The class will create, as much as possible, materials needed to operate a bank. Each student will research his or her area of the banking world and either orally or written relate it to the class.

Various filmstrips, speakers, and books will be used to enhance the learning experience.

MATERIALS AND RESOURCES:

Books:

Pesek, Boris P., Saving, Thomas R. The Foundations of Money and Banking. MacMillan, 1968.
Smith, Kenneth H. Money and Banking. Lerner, 1970.

Basic Text:

Hartley, William H., Vincent, William S. American Civics. Harcourt, Brace, and World, 1967.

Kits:

Modern Consumer Education. Grolier Educational Corp., 1970.
Career Kit. Largo, Florida, 1972.
Occupational Exploration Kit. Science Research Associates, Inc., 1970. #11 Bank Workers, #46 Bank Officers.

MATERIALS AND RESOURCES: (Continued)

Filmstrips:

Just A Teller. Educational Activities, Inc., Freeport, New York, 1967.
Money Management. BFA Educational Media, Santa Monica, Cal., 1968.

Speakers:

Various Occupational Specialists.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CITY GOVERNMENT"

GRADE: 8
SUBJECT: HISTORY

BROAD OBJECTIVES:

1. To foster learning in the various public service careers in city government.

2. To enhance the students knowledge of governmental operations and how their own city operates.

PERFORMANCE OBJECTIVES:

1. To help the students locate geographically the locations of city offices and buildings.

2. To help the students understand the various responsibilities and duties of city employees.

LESSON PROCEDURE:

Each student will be assigned at least one city official or department to research. The student will show on the city map the location(s) of the department. Other items of research will be included as necessary.

MATERIALS AND RESOURCES:

Books:

Andrews, Richard. City Planning. Free Press, 1971.
Hoag, Edwin. Cities and Towns. Lippincott, 1969.
Sullivan, Mary. Careers in Government. Walch, 1964.

Perceptions: The City. Educational Dimensions Corp., 1970.

Map:

City of Radford

Basic Text:

Hartley, William H.; Vincent, William S. American Civics. Harcourt, Brace and World, Inc., 1967.

MATERIALS AND RESOURCES: (Continued)

Speaker:

Various Occupations

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"SAVING MONEY"

GRADE: 8
SUBJECT: SOCIAL STUDIES

BROAD OBJECTIVE:

To orient students to the importance of and the various ways to save money.

PERFORMANCE OBJECTIVE:

The student will be able to give the advantages and disadvantages of various ways of saving money and be able to describe the jobs of one involved in these areas in terms of educational requirements, hours, advancement and salary.

LESSON PROCEDURE:

1. Class discussion on money - why it has value, the fluctuation of buying power and importance of saving.

2. List ways to invest money.

3. Free choice for individual research.

4. Paper to be written on research accompanied by list of sources of information. May be from books, filmstrips, tapes, personal interviews or any other reliable source.

5. Oral reports, skits, etc. to be presented to entire class - may be accompanied by charts, filmstrips, tapes, speakers, etc.

MATERIALS AND RESOURCES:

Text:

Hartley and Vincent. American Civics. Harcourt, Brace and World, C. 1967.

Books:

Paradis, Adrian A. The Economists Reference Book. C. 1970.
Pask and Thomas. The Foundations of Money. C. 1968.

Antique Collector

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CONSUMER AND OCCUPATIONAL EDUCATION"

GRADE: 8
SUBJECT: SOCIAL STUDIES

BROAD OBJECTIVE:

1. To orient the student with the area of consumerism.

2. To orient the student with the occupational world.

PERFORMANCE OBJECTIVE: (As A Consumer)

1. Help the student manage money.

2. Help the student understand the role of a provider.

3. Help the student understand modern buying habits.

4. Help the student understand his role in economics.

PERFORMANCE OBJECTIVE: (As A Worker)

1. Help the student manage an occupation.

2. Help the student to understand why and how to keep proper records.

3. Help the student understand profit and loss.

4. Help the student understand occupational requirements.

5. Help the student understand such things as: overhead expenses, insurance protection, and other occupational terminology.

LESSON PROCEDURE:

Each student plays a dual role of consumer and worker. Students can work together in groups of two in a business, but each one must maintain his own consumer role. Each student is to begin with an occupation of his choice which will make him self-sustaining in the class room. Students have to purchase the following before the close of the exercise: house, car, insurance on car, heat, food for all year, gas for all year, and clothes for all four seasons of the year. It is also recommended that students purchase the following: luxury item, plan a vacation, and insurance on all belongings and person.

Each student will have the following to begin the exercise: $1500 in play money, all occupational needs and products, and a house, which he must sell. The students will have a folder in which they will keep all their related material.

LESSON PROCEDURE: (Continued)

Each student should contact someone in their occupational area before the exercise begins. This will give the student insight into the requirements and responsibilities of their respective occupations.

The exercise will involve sixteen school days.

Evaluation of each student will be based upon the following: preparedness each day, records of each student, fulfillment of requirements, product displays, and money management.

MATERIALS AND RESOURCES:

Modern Consumer Education. Grolier Educational Corporation, New York, New York.

Resource People:

Resource people in various occupations.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"ADVERTISEMENT"

GRADE: 8
SUBJECT: HISTORY

BROAD OBJECTIVES:

1. To evaluate careers in advertising.

2. To enhance the students understanding of the purpose, means, and impact of advertising on the American way of life.

PERFORMANCE OBJECTIVE:

To help the student understand the following:

- why advertise
- types of advertising
- false or misleading advertising
- how to advertise

LESSON PROCEDURE:

Students will work in pairs, and they will create a product to sell to the class. Various filmstrips, speakers, and books will be used to supplement the learning activity.

MATERIALS AND RESOURCES:

Aoker, David. Consumerism. Free Press, 1971.
Amstell, I. Joel. What You Should Know About Advertising. Oceans, 1969.
Campbell, Hannah. Why Did They Name It.....? Fleet, 1964.
Packard, Vance. Hidden Persuaders. McKay, 1957.
Wood, James Playsted. This is Advertising. Crown, 1968.

Speaker:

Occupational Specialists

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"ARMED SERVICES"

GRADE: 8
SUBJECT: HISTORY

BROAD OBJECTIVES:

1. To help the student explore the various career opportunities in the armed services.

2. To help the student understand the volunteer army as opposed to the draft system.

PERFORMANCE OBJECTIVE:

To help the student understand the following:
- the new armed forces
- the old draft system
- why an armed service
- costs and sources of armed forces
- responsibilities of each citizen in regard to America's armed forces

LESSON PROCEDURE:

By the use of textbooks, filmstrips, discussion, and various speakers, the student will investigate the realm of the armed forces.

MATERIALS AND RESOURCES:

Books:

Burrowes, Thomas. United States Navy. Richards Rosen, 1965.
Calvert, James. United States Navy. McGraw, 1965.
Capron, Walter C. U. S. Coast Guard. Franklin Watts, 1965.

Occupational Exploration Kit. Science Research Associates, Inc., 1967. #161.

Pamphlets:

Various pamphlets from recruiting offices.

MATERIALS AND RESOURCES: (Continued)

Speaker:

Occupational specialists

Basic Text:

Hartley, William H.; Vincent, William S. American Civics. Harcourt, Brace and World, 1967.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"HOUSING"

GRADE: 8
SUBJECT: HISTORY

BROAD OBJECTIVES:

1. To help the student evaluate the various careers in home construction.

2. To enhance the students knowledge in the historical development of the American home.

PERFORMANCE OBJECTIVES:

1. To help the student understand how a home is built, and who is involved.

2. To help the student understand why more people are needed to build a home today.

LESSON PROCEDURE:

Students will work in groups to construct a model home from a certain period of history, in which they will relate to the class what is used in building it and why.

As each period of history is covered, the students will understand how inventions have helped the homeowner.

A building contractor will be used to enhance learning in class.

MATERIALS AND RESOURCES:

Books:

American Heritage. An American Heritage Guide to Historic Houses of America. American Heritage, 1971.
Townshend, Gilbert and Dolzell, J. Ralph. How to Plan A House. American Technical Society, 1958.

Filmstrips:

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CAREERS IN ANTHROPOLOGY"

GRADE: 9
SUBJECT: WORLD HISTORY AND/OR GEOGRAPHY

BROAD OBJECTIVES:

1. To orient students to the ways in which we have learned about pre-historic and early historic societies.

2. To explore careers in anthropology.

PERFORMANCE OBJECTIVES:

1. The student will be able to assess the contributions made by anthropologists to our knowledge concerning early man, modern primitive civilizations, and modern man.

2. The student will be able to describe the occupations of anthropologists in terms of educational requirements, methods and places of work, advancement possibilities, and approximate salaries.

LESSON PROCEDURES:

1. Class discussion relating to man and how we have obtained information about early man, his contributions to civilization, and his relationships to modern man.

2. Discussion specifically related to anthropology.

3. Free choice for individual research.

4. Oral or written reports. Oral reports may incorporate pictures, statistics, etc.

5. Filmstrips, films and other audio-visual materials.

6. Outside speakers to be invited either by instructor or students.

7. Field trips where applicable.

MATERIALS AND RESOURCES:

1. Texts:

Boak, Slesson, et. al. The History of Our World. Houghton Mifflin Company, 1964.
Jones & Murphy. Geography and World Affairs. Rand McNally, 1971.
Kohn & Drummond. The World Today. McGraw Hill, 1963.
Perry, Marvin. Man's Unfinished Journey. Houghton Mifflin Company, 1971.

MATERIALS AND RESOURCES: (Continued)

2. Books:

Brannum, Mary. When I Was 16. "Margaret Mead". Platt & Munk, 1967.
Dalton, George. Tribal and Peasant Economics. Natural History Press, 1967.
Hays, H. R. Explorers of Man. Crowell-Collier, 1971.
Mead, Margaret. Anthropologists and What They Do. Walts, 1965.
Oliver, Douglas. Invitation to Anthropology. Natural History Press, 1964.
Russell, W. M. S. Man, Nature and History. Natural History Press, 1969.
Stoddard, Hope. Famous American Women. "Margaret Mead". Thomas Y. Crowell Company, 1970.

3. Audio-Visual:

Africa: Continent in Change. "Adventures in Search of Early Man". National Geographic. (filmstrip with tape)
Ancient Times. "Adventuring into the Buried Past". National Geographic. (filmstrip with record)

4. Career Summary:

"Anthropologist". Careers, Inc., Largo, Florida, 1969.

5. Resource People:

Anthropologist

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"PROFESSIONAL OCCUPATION: HISTORIAN"

GRADE: 9
SUBJECT: WORLD HISTORY AND/OR GEOGRAPHY

BROAD OBJECTIVES:

1. To orient students to the role of the historian as a contributor to our store of information about society.

2. To explore careers related to the historian.

PERFORMANCE OBJECTIVES:

1. The students will be able to evaluate the contributions made by the historian to society and to appreciate sound, unbiased information.

2. The students will be able to describe the occupation of a historian and the related fields in terms of opportunities, educational requirements, methods of study and research, and remuneration, both tangible and intangible.

LESSON PROCEDURE:

1. Class discussion relating to history and how we have obtained this information.

2. Use of books, tapes, career summaries, films and other available materials for individual study.

3. Use of a simulated situation whereby the student may evaluate and record data in the manner of the historian.

4. Use of resource persons in the field.

MATERIALS AND RESOURCES:

1. Books:

Cantor, Norman E. and Schneider, Richard L. How to Study History. Thomas Y. Crowell Company, 1967.
Gray, Wood. Historian's Handbook: A Key to the Study and Writing of History. Houghton Mifflin Company, 1964.
Shafer, R. J. A Guide to Historical Method. Dorsey Press, 1969.
Turabian, Kate L. A Manual for Writers of Term Papers, Theses, and Dissertations. University of Chicago Press, 1967.

2. Career Summaries:

"Historian". Careers, Largo, Florida, 1972.
"Historians". SRA Occupatioan Brief, 1972.

MATERIALS AND RESOURCES: (Continued)

3. Miscellaneous:

Any materials the instructor may wish, to establish a simulated situation for evaluating historical material. This may be past or current.

4. Resource People:

Historian
Museum Curator

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CAREERS IN ARCHEOLOGY, ANTHROPOLOGY, AND GEOLOGY"

GRADE: 9
SUBJECT: WORLD HISTORY

BROAD OBJECTIVE:

1. To orient students to the ways in which we have learned about pre-historic societies.

2. To explore the careers of archeology, anthropology, and geology.

PERFORMANCE OBJECTIVE:

1. The student will be able to assess the contributions made by archeologists, anthropologists, and geologists to our knowledge concerning early man.

2. The student will be able to describe the occupations of these three scientists in terms of educational requirements, methods and places of work, advancement possibilities, and approximate salaries.

LESSON PROCEDURE:

1. Class discussion relating to the contributions of early man and how we have obtained this information from pre-historic times.

2. Discussion specifically relating to archeology, anthropology, and geology.

3. Free choice for individual research.

4. Oral or written reports. Oral reports may be accompanied by pictures, statistics, filmstrips, tapes, etc.

5. Outside speaker to be invited either by instructor or student.

6. Incorporate role playing of various professions that relate to archeology, anthropology, and geology.

MATERIALS AND RESOURCES:

Text:

Boak, Slesson, et al. The History of Our World. Houghton Mifflin Company, 1964.
Perry, Marvin. Man's Unfinished Journey. Houghton Mifflin Company, 1971.

MATERIALS AND RESOURCES: (Continued)

Books:

Baldwin, Gordon C. Race Against Time. G. P. Putnam's Sons, 1966.
Cottrell, Leonard. Digs and Diggers. World Publishing Company, 1964.
Poole, Gray and Lynn. Carbon-14 and Other Science Methods that Date the Past. McGraw-Hill Book Company, 1961.
Wheeler, Margaret. History was Buried. Hart Publishing Company, 1967.

Audio Visual:

Africa: Continent in Change. "Adventures in Search of Early Man". National Geographic (filmstrip with tape).
Ancient Times. "Adventuring Into the Buried Past". National Geographic (filmstrip with record).

Resource People:

Archeologist
Anthropologist
Geologist

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CAREERS IN GEOLOGY"

GRADE: 9
SUBJECT: WORLD HISTORY AND/OR GEOGRAPHY

BROAD OBJECTIVES:

1. To orient students to the contributions made by geologists to our knowledge of the world.

2. To explore careers related to geology.

PERFORMANCE OBJECTIVES:

1. The student will be able to evaluate the contributions made by geologists to our knowledge of the world.

2. The student will familiarize himself with the occupation of the geologist and related personnel with respect to educational requirements, methods and places of work, hours and salaries.

LESSON PROCEDURES:

1. General introduction to geology through the use of posters, etc.

2. Class discussion relating to contributions of geologists.

3. Specific discussion relating to geology (how and why).

4. Individual research with class presentations.

5. Speakers utilizing community resources.

MATERIALS AND RESOURCES:

1. Texts:

Jones & Murphy. Geography and World Affairs. Rand McNally, 1971.
Kohn & Drummond. The World Today. McGraw-Hill, 1963.

2. Books:

Fenton, Carroll Lane. Rocks and Their Stories. Doubleday, 1951.

5. Film:

Rocks that Reveal the Past. Educational Motion Pictures for Virginia's Public Schools.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"TRANSPORTATION CAREERS: TRUCKING"

GRADE: 9
SUBJECT: WORLD HISTORY AND/OR GEOGRAPHY

BROAD OBJECTIVES:

1. To acquaint the students with the importance of the trucking industry as to the major means of transporting goods in todays society.

2. To explore the many careers related to the trucking industry.

PERFORMANCE OBJECTIVES:

1. The students will learn the major road routes for trucks and why they are located where they are; relating to terrain, resources, and industries.

2. The student will be able to describe the occupations relating to the trucking industry. He will have knowledge of educational or training requirements, hours, wages, benefits and opportunities in the field.

LESSON PROCEDURES:

1. Class discussion on various means of transportation, using prints on transportation.

2. Film strip on Transportation; Horseback to Jet.

3. Use of books, tapes, film loops, career summaries, and filmstrips for individual study.

4. Role playing as a means for job descriptions for class, using any equipment they may find.

5. Resource people in field.

MATERIALS AND RESOURCES:

1. Filmstrips:

   The Automotive Mechanic. SVE, 1973. (sound)
   The Long Haul Driver. SVE, 1973. (sound)
   Transportation: Horseback to Jet. Life, 1955.

2. Prints:

   Transportation. Documentary Photo Aids.

3. Tapes:

   Transportation. Classroom World Productions, Inc.

MATERIALS AND RESOURCES: (Continued)

4. Film Loops:

Local Truck Driver. Encyclopedia Britannica Educational Corp.
Truck Mechanic and Bus Mechanic. Encyclopedia Britannica Educational Corp.

5. Career Summaries:

Power Truck Operation. SRA, 1970.
Long-Distance Truck and Bus Drivers. SRA, 1970.
Diesel Mechanic. Careers, Inc., Largo, Fla., 1973.
Mechanic, Truck and Bus. Careers, Inc., Largo, Fla., 1973.
Driver, Heavy Truck. Careers, Inc., Largo, Fla., 1973.
Automotive Brakeman. Careers, Inc., Largo, Fla., 1973.

6. Books:

Coombs, Charles I. Wheels, Wings and Water. World, 1963.
Occupational Outlook Handbook, 1972-73, "Driving Occupations". U. S. Department of Labor, 1973.
Sullivan, George. How Does It Get There. Westminister, 1973.
Tunis, Edwin. Wheels. World, 1955.

7. Films:

American Road
Transportation by Land
Trucks and Trains
Trucks in our Neighborhood

(All of the above films are available from Educational Motion Pictures for Virginia's Public Schools.)

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CAREERS IN MARINE SCIENCE"

GRADE: 9
SUBJECT: WORLD HISTORY AND/OR GEOGRAPHY

BROAD OBJECTIVES:

1. To familiarize students with the oceans and their potential use to man.

2. To acquaint the students with the varied job opportunities related to the oceans.

PERFORMANCE OBJECTIVES:

1. The student should have specific information on the various uses of the oceans such as transportation, minerals, possible water supply, food, etc.

2. The student should have summaries of the various jobs relating to marine science that would include educational requirements, work hours, wages, advancement, etc.

LESSON PROCEDURES:

1. Individual assignments using books, career summaries, and cassettes to be discussed in round table manner.

2. Introduce with the SFS on Marine Science.

3. Discussion of filmstrips.

4. Listing various uses of oceans and their importance.

5. Round table discussion with questions from the class to be answered by panel or teacher.

6. Film to be shown as culminating activity.

MATERIALS AND RESOURCES:

1. Texts:

Boak & Slesson, et. al. The History of Our World. Houghton Mifflin Company, 1964.
Jones & Murphy. Geography and World Affairs. Rand McNally, 1971.
Kohn & Drummond. The World Today. McGraw-Hill, 1963.
Perry, Marvin. Man's Unfinished Journey. Houghton Mifflin Company, 1971.

MATERIALS AND RESOURCES: (Continued)

2. Books:

Briggs, Peter. Men in the Sea. Simon & Schuster, 1968.
DeBorhegyi, Suzanne. Ships, Shoals and Amphores; The Story of Underwater Archeology. Holt, 1961.
Kovoalik, Vladmir. The Ocean World. Holiday, 1966.
Long, John. Ocean Sciences. Banta, 1964.

3. Career Summaries:

Oceanographer. Careers, Inc., 1973.
Oceanographers. Science Research Associates, 1973.

3. Cassettes:

Oceanography. Classroom World Productions, Careers Unlimited, 1970.

5. Filmstrips:

Understanding Oceanography. Society of Visual Education, Inc. (sound)
Marine Science. Career Education Cluster, Westinghouse. (sound)

6. Films:

Oceanography - Science of the Sea. Educational Motion Pictures for Virginia's Public Schools. (11 min.)

7. Resource People:

Oceanographer

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"TRANSPORTATION CAREERS: RAILROAD"

GRADE: 9
SUBJECT: WORLD HISTORY AND/OR GEOGRAPHY

BROAD OBJECTIVES:

1. To acquaint students with the importance of transportation to the capitalistic system.

2. To orient students to the importance of railroad transportation to the whole transportation system.

3. To explore the many careers related to the railroad industry.

PERFORMANCE OBJECTIVES:

1. The student will be able to follow the advances in transportation and to evaluate the importance of railroad transportation to our modern system.

2. The student will learn the opportunities available in the field of the railroad industry.

LESSON PROCEDURES:

1. Introduce the unit with the filmstrip, American Transportation: Horseback to Jet.

2. Initiate general discussion on transportation, culminating with a discussion of railroads and their importance to the individual.

3. Oral or written reports, supplemented by appropriate maps, charts, pictures, etc. Reports will be selected according to student interest.

4. Field trip, if possible.

5. Use of community resource persons.

6. Use the movie, Transportation in the Modern World, as a culminating activity.

MATERIALS AND RESOURCES:

1. Texts:

Boak, Slesson, et. al. The History of Our World. Houghton Mifflin Company, 1964.
Jones & Murphy. Geography and World Affairs. Rand McNally, 1971.
Kohn & Drummond. The World Today. McGraw-Hill, 1963.
Perry, Marvin. Man's Unfinished Journey. Houghton Mifflin Company, 1971.

MATERIALS AND RESOURCES: (Continued)

2. Filmstrips:

American Transportation: Horseback to Jet. Life, 1955.

3. Books:

American Heritage. Railroads in the Days of Steam. American Heritage, 1960.
Burt, Oliver W. The Story of American Railroads. Day, 1969.
Stover, John F. American Railroads. University of Chicago Press, 1961.
U. S. Department of Labor. Occupational Outlook Handbook. Railroads. U. S. Department of Labor, 1972-73.
Zarchy, Harry. Model Railroads. Knopf, 1955.

4. Career Summaries:

Railroad Brakeman. Careers, Inc., Largo, Florida, 1971.
Operating Railroad Workers. SRA, 1970.
Railroad Track Workers. SRA, 1970.
Railroad Dining-Car Waiters. SRA, 1972.

5. Films:

Freight Train
Freight Trains Today
Passenger Train
Railroad Builders
Trucks and Trains
Transportation in the Modern World

(All of the above films are available from Educational Motion Pictures for Virginia's Public Schools.)

6. Resource People:

Community resource persons for fields related to railroad transportation.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"ENVIRONMENTAL CAREERS: FORESTRY & OTHERS"

GRADE: 9
SUBJECT: WORLD HISTORY AND/OR GEOGRAPHY

BROAD OBJECTIVES:

1. To emphasize the importance of the conservation of our environment.

2. To acquaint the students with the jobs related to forestry and other environmental areas.

PERFORMANCE OBJECTIVES:

1. To be able to list the resources that are most endangered.

2. To be able to give possible solutions for our endangered resources.

3. To be able to summarize the duties of those involved in forestry.

LESSON PROCEDURES:

1. Use study prints on Vandalized Environment to encourage discussion.

2. Tape on forestry for class to hear.

3. Individuals may explore the occupations related to forestry and any other careers pertaining to the environment.

4. A composite of the researched occupations will be made for the class.

5. Endangered resources will be listed with possible solutions for the problem.

MATERIALS AND RESOURCES:

1. Texts:

Jones & Murphy. Geography and World Affairs. Rand McNally, 1971.
Kohn & Drummond. The World Today. McGraw-Hill, 1963.

2. Books:

Environmental Careers. Career World, November, 1973.
Floherty, John Joseph. Forest Ranger. Lippincott, 1956.
Occupational Outlook Handbook. U. S. Department of Labor, 1972-73.

MATERIALS AND RESOURCES: (Continued)

3. Films:

Forest People. Educational Motion Pictures for Virginia's Public Schools.

4. Filmstrips:

Environmental Careers. Career Cluster, Westinghouse, 1972. (sound)
Age of Electronics. Experimental Test Technicians. (sound)

5. Prints:

Vandalized Environment. Documentary Photo Aids.

6. Tapes:

Forestry. Classroom World Productions, 1972.

7. Career Summaries:

Forester. Careers, Inc., Largo, Florida.
Tree Surgeon. Careers, Inc., Largo, Florida.
Forest Technician (Aide). Careers, Inc., Largo, Florida.
Forest Technician. SRA.
Foresters. SRA.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"TRANSPORTATION CAREERS: AIRLINE"

GRADE: 9
SUBJECT: WORLD HISTORY AND/OR GEOGRAPHY

BROAD OBJECTIVES:

1. To acquaint students with the importance of transportation to our modern way of life.

2. To make students aware of the rapid changes and advances in transportation.

3. To explore the many careers related to air transportation.

PERFORMANCE OBJECTIVES:

1. The student will be able to trace the rapid advances in transportation and to assess the importance of air transportation to his own life.

2. The student will learn of the many opportunities available to him in a career in air transportation.

LESSON PROCEDURES:

1. Introduce the unit with the filmstrip, American Transportation: Horseback to Jet.

2. General class discussion on transportation advances, with the leader manipulating the discussion to arrive at the advances in air.

3. Free choice for individual research and projects.

4. Oral presentations by the students to the class. These presentations may be accompanied by maps, charts, pictures, etc.

5. Utilization of available community resource persons.

6. Role playing relating to the various job opportunities.

MATERIALS AND RESOURCES:

1. Texts:

Boak, Slesson, et. al. The History of Our World. Houghton Mifflin Company, 1964.
Jones & Murphy. Geography and World Affairs. Rand McNally, 1971.
Kohn & Drummond. The World Today. McGraw-Hill, 1963.

MATERIALS AND RESOURCES: (Continued)

1. Texts: (Continued)

Perry, Marvin. Man's Unfinished Journey. Houghton Mifflin Company, 1971.

2. Filmstrips:

The Air Age. Life, 1956.
American Transportation: Horseback to Jet. Life, 1955.
Air Lines: Stewards. Society for Visual Education, 1973. (sound)
The Airline Attendant. SVE. (with sound)
Transportation Careers. Westinghouse, 1973.

3. Film Loops:

7. Resource People:

Community resource people for any related area of air transportation.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CAREERS IN CARTOGRAPHY"

GRADE: 9
SUBJECT: WORLD HISTORY AND/OR GEOGRAPHY

BROAD OBJECTIVES:

1. To orient students to the ways we have learned about the universe and the importance of this knowledge to society.

2. To explore the careers related to cartography.

PERFORMANCE OBJECTIVES:

1. The student will be able to assess contributions made by cartographers.

2. The student will be able to read maps, understand their construction, and understand various projections.

3. The student will learn terminology and be able to use it intelligently.

4. The student will learn the educational requirements, methods and places of work, possibilities for advancement, and approximate salaries.

LESSON PROCEDURE:

1. Introductory class discussion relating to the different kinds of maps.

2. Use of filmstrips or films to reinforce discussion.

3. Discussion specifically related to cartographers and their contributions.

4. Use of outline maps for individual study.

5. Guest speaker where applicable or available.

MATERIALS AND RESOURCES:

1. Texts:

Jones & Murphy. Geography and World Affairs. Rand McNally, 1971.
Kohn & Drummond. The World Today. McGraw-Hill, 1963.

2. Books:

Tannenbaum, Beulah & Stillman, Myra. Understanding Maps. McGraw-Hill Book Company, 1973.
U. S. Department of Labor. Occupational Outlook Handbook, "Geographers". U. S. Department of Labor, Washington,

MATERIALS AND RESOURCES: (Continued)

2. Books: (Continued)

D. C., 1972-73.

3. Career Summaries:

Cartographer. Careers, Inc., Largo, Florida, 1973.
Cartographers. SRA Occupational Brief, 1970.

4. Aids:

Individual Outline Maps
Wall Maps
Atlases
Globes

5. Filmstrips:

Learning to Use Maps. Encyclopedia Britannica Educational Corporation, 1958.
Maps and Map Projections. World Geographic Series, McGraw-Hill Corporation, 1964.

6. Films:

Map Skills - Using Different Maps Together. (11 min.)
Mapping the Earth's Surface. (16 min.)
Maps - Coastal Symbols and Terms. (20 min.)
Maps - Where am I? (11 min.)
Maps Add Meaning to History. (11 min.)
Maps and Their Meaning. (15 min.)
Maps are Fun. (11 min.)
Maps in a Changing World. (11 min.)
Maps of Our Locality. (11 min.)
Maps of Our World. (11 min.)
Maps, Land, Symbols and Terms. (14 min.)

(All of the above films are available from Educational Motion Pictures for Virginia's Public Schools.)

7. Resource People:

Cartographer
Teaching Specialist in Cartography

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CAREERS IN EMPLOYEE AND LABOR ORGANIZATIONS"

GRADE: 11
SUBJECT: U. S. HISTORY

BROAD OBJECTIVES:

1. To inform students of the main purposes of employee and union associations; their operations and accomplishments.

2. To explore career opportunities in these organizations.

PERFORMANCE OBJECTIVES:

1. To be able to access the main contributions of these organizations in strengthening bargaining power with employers for better wages and working conditions.

2. To understand how these organizations operate and the extent of member participation.

3. To realize that several organizations and unions conduct apprentice training programs where the trainee may earn and learn.

LESSON PROCEDURE:

1. Class discussion.
2. Introduce filmstrip, Rise of Industrial America.
3. Individual research and study.
4. Reports, oral or written.
5. Resource speakers.
6. Filmstrip: Growth of the Labor Movement.
7. Identify occupations, requirements, wage scale.

MATERIALS AND RESOURCES:

Filmstrips:

Growth of the Labor Movement. Guidance Associates, 1968.
Rise of Industrial America. Eye Gate, 1969.

Books:

Coleman, James S. Union Democracy. ARNO, 1969.
Greenstone, J. David. Labor in American Politics. Knopf, 1969.
Paradis, A. A. Labor in Action, The Story of the American Movement. Messner, 1969.

Resource Material:

V.E.A. Virginia Education Association, Richmond, Va.
N.E.A. National Education Association, Washington D. C.

MATERIALS AND RESOURCES: (Continued)

Resource Material: (Continued)

A.F.L. - C.I.O. New River Valley Central Labor Council, Fairlawn, Virginia.

Careers, Inc., Largo, Florida. 5328 Labor Arbitrator (Conciliator) S-38 Industrial and Labor Relations Director.

SRA Occupational Brief No. 393 (Union Business Agents)

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"CAREERS IN THE AMERICAN BUSINESS SYSTEM"

GRADE: 11
SUBJECT: U. S. HISTORY

BROAD OBJECTIVES:

1. To explore the broad spectrum of the world of business in a free enterprise system.

2. To acquaint students with the many occupations now available and the implications for career opportunities.

PERFORMANCE OBJECTIVES:

1. Will be able to examine the types of business: (Production and Sales and Service) Single ownership, partnership, the corporation, the conglomerate, the consortium.

2. Student will recognize the role of the two kinds of people in a corporation: the investor and the employee.

3. To be aware of the kinds of securities offered investors and explore the stock market and recognize the vocabulary of investment.

LESSON PROCEDURE:

1. Filmstrip: Industrial Revolution in America.
2. Discussion around main street business.
3. Brochures and financial statements and reports to stock holders.
4. How to read the Stock Market Report.
5. Individual research - reports.
6. Filmstrip: The Corporation.
7. Outside speaker - or trip to Brokerage Firm.
8. Identify the job classifications, requirements, pay scales.

MATERIALS AND RESOURCES:

Book:

Sarnoff, Paul. Wall Street Careers. Julian Messner, N. Y.

Filmstrips:

The Corporation. Guidance Associates, 1969.
The Industrial Revolution in America. Guidance Associates, 1971.

Newspaper:

Stock Market Reports in most papers.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"HOW TEETH AFFECT APPEARANCE AND HEALTH"
(CAREERS IN DENISTRY AND DENTAL HYGIENE)

GRADE: 8
SUBJECT: HEALTH AND PHYSICAL EDUCATION

BROAD OBJECTIVE:

1. To help the student become conscious of the serious dental problem in our country.

2. To instill an understanding of the importance to health and appearance of taking good care of the teeth and gums.

3. To create an awareness in the student of career opportunities in the field of denistry and dental hygiene.

PERFORMANCE OBJECTIVES:

1. Each student shall be able to list at least four careers related to dentistry, the qualifications and duties of each.

2. The student shall be able to write paragraphs on the seriousness of the dental problem in our country and be able to list suggestions for improving it.

3. Each student shall name and describe three diseases of the gums.

LESSON PROCEDURE:

1. Introduce the unit with a discussion of how clean, sparkling teeth affect your appearance and health.

2. Have students read from the text the section on care of the teeth.

3. Give a demonstration of proper and improper brushing techniques.

4. Show filmstrips on dental assistants and dental lab technicians.

5. Assign reports on topics related to dental care and dental science.

6. Bring in resource persons to discuss dental problems and dental careers.

7. End unit with a written evaluation of what has been learned.

MATERIALS AND RESOURCES:

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"NUTRITION: SELF-IMPROVEMENT"

GRADE: 8 AND 9
SUBJECT: HEALTH AND PHYSICAL EDUCATION

BROAD OBJECTIVES:

1. To teach the students that nutrition can affect how you look.

2. To instill a desire in each student to make intelligent choices about foods, food fads, and sensational claims.

3. To develop an interest in careers related to the field of nutrition.

PERFORMANCE OBJECTIVES:

1. Each student shall show by a written examination that she has learned the importance of good nutrition.

2. Students will be able to list and give duties and qualifications for at least three careers in the field of nutrition.

LESSON PROCEDURE:

1. Each girl will access her goals -- just what does she hope to gain from this unit in the way of weight control.

2. A survey will be conducted of all foods eaten by the students for a three day period. Calorie charts will be available so that each girl can total her calorie intake for each of the three days. Information will be available as to how many calories should be taken in by each student in order to maintain present weight, to gain weight, or to lose weight.

3. The importance of wise food choices; the dangers of fad dieting; how nutrition can affect your appearance, self-confidence, and relationship with others; and the fact that the individual has the primary responsibility for her good nutrition will be discussed.

4. A film will be shown.

5. Dieticians, home economists, or nutritionists will be brought in to speak to the class on the importance of good nutrition and also about a career in this field.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"MENTAL HEALTH AND RELATED CAREERS"

GRADE: 9
SUBJECT: HEALTH AND PHYSICAL EDUCATION

BROAD OBJETIVES:

1. To help students see themselves as others see them.

2. To give the students an understanding of many approaches that may be used to assist with poor mental health habits.

3. To create interest in mental health careers.

PERFORMANCE OBJECTIVES:

1. Students shall be able to explain themselves in a "Me" Project* that will be turned in and checked by the teacher.

2. Each student shall demonstrate a knowledge of careers in the field of mental health and will be able to give the duties and qualifications of those careers in a written test.

LESSON PROCEDURE:

1. Students will pair off and talk for 10-15 minutes, relating their likes, dislikes, strengths, and weaknesses as well as ambitions to their partner. The partner will then predict what would be a good vocation for the student to whom she has been talking. Students change places and repeat the procedure.

2. Discussion and lecture on various aspects of mental health with emphasis on factors what affect mental health and on the necessity of being able to use maturity in dealing with life situations.

3. Show filmstrips on personality.

4. Have a school psychologist in to discuss careers in mental health and the various aspects of psychology as it relates to the student.

*5. As a culminating activity, have each student turn in a "Me" Project that will present the facts of her life and personality. The project may take any form the student desires, and creativity and originality are encouraged. A diary, scrapbook, poetry, log, or tape recording are a few suggestions that may be used.

SUBJECT: HEALTH AND PHYSICAL EDUCATION

BROAD OBJECTIVE:

To help the student develop skill in detecting and treating injuries to bones, joints, and muscles.

PERFORMANCE OBJECTIVE:

The student will be able to demonstrate a broad awareness of first aid as it applies to job roles and careers.

LESSON PROCEDURE:

1. Viewing film on fractures and first aid procedures.
2. Having students play career roles, such as, nurse, first aider, surgeon, etc.
3. Having students apply slings, ankle wraps, knee wraps, etc.
4. Inviting a local physical therpaist to meet with class to discuss first aid for springs, dislocations, etc.

MATERIALS AND RESOURCES:

Books:

American Red Cross. First Aid.
Otto, Julian, Tether. Modern Health. Holt, Rinehart, Winston, Inc., New York, 1967.

Films:

Danger is Your Companion. American Red Cross.
First Aid Now. Bureau of Mines.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"EXPLORING CAREERS IN FIRST AID"

GRADE: 10
SUBJECT: HEALTH

BROAD OBJECTIVES:

1. To learn first aid techniques.

2. To investigate careers available in this and related fields.

PERFORMANCE OBJECTIVES:

1. The student will be able to demonstrate properly the techniques of first aid.

2. The student will be able to describe some of the careers in the field.

LESSON PROCEDURE:

1. Following the discussion and demonstration of techniques of first aid, the students will practice them.

2. Artificial respiration will be discussed and techniques demonstrated.

3. Show film on artificial respiration.

4. Have the students practice giving artificial respiration.

5. Ask the local Life Saving Crew to show their equipment and to talk about qualifications.

6. Have a Red Cross Life Saving Instructor talk to the class.

MATERIALS AND RESOURCES:

Text:

First Aid. American Red Cross.

Audio Visual:

Public Service II. Acoustifone (filmstrip) Career Exploration Series.
Mouth-to-Mouth Resuscitation. Ayerst Laboratories. (film)

Resource People:

Life Saving Crew
Red Cross Life Saving Instructor

"ResuciKate" (A Doll)

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"SPORTS EVENT"

GRADE: 10
SUBJECT: HEALTH AND PHYSICAL EDUCATION

BROAD OBJECTIVE:

To make students aware of the various people involved in careers or activities related to athletics.

PERFORMANCE OBJECTIVE:

Students will be aware of the job duties for various occupations associated with a sports event.

LESSON PROCEDURE:

Announce to your class that they will produce a basketball game to be played with all the supporting personnel found at a regular interscholastic sports event. Allow students, with supervision, to choose occupations that they would like to research and portray. Some possible choices are players, coaches, referees, score keeper, announcer, clock operator, first aid (trainers), equipment manager, custodian, policeman, commercial artist and printer for programs, ticket takers, statistician, photographer, reporter, refreshment salesman, cheerleaders, assistant principal and principal. The students will then gather information about their occupation by reading career pamphlets and interviewing people who perform the jobs they will portray.

The game will be more realistic if there are spectators present so plan to invite other classes to attend.

The day of the game be sure all of the electrical equipment is set up in advance and in working order. During the event create opportunities for everyone to carry out his role: the custodian can sweep the floor between quarters, the first aid people attend to an injured player, the policeman can maintain order, the principal can be introduced at half time to make an announcement, the printer and commercial artist can distribute their programs at the door.

As a follow up activity have the reporter and photographer submit a story and pictures to the school and/or local newspapers. Discuss with the class the contributions each person makes to the total operation of a sports event.

Occupational Exploration Kit. S.R.A.

MATERIALS AND RESOURCES: (Continued)

Physical Facilities and Equipment:

Basketballs, uniforms, microphone, time clocks, whistles, clip boards, camera, tickets, dust mop

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"GUN SAFETY"

GRADE: 10
SUBJECT: HEALTH AND PHYSICAL EDUCATION

BROAD OBJECTIVE:

To help the student better understand the safe operation of rifles, shot guns, and pistols.

PERFORMANCE OBJECTIVE:

The student will be able to demonstrate a broad awareness of career opportunities associated with outdoor life.

LESSON PROCEDURE:

1. Invite a resource person (Game Warden, Policeman, F.B.I. Agent, etc.) to talk with the students.

2. Viewing of films on guns and gun safety.

3. Make a bulletin board depicting safety, careers, and hazards, associated with guns and outdoor life.

MATERIALS AND RESOURCES:

Films:

Nobody Victim. Virginia State Department of Education, Richmond, Virginia.
Safe Gun Handling. Remington Arms Company, Inc.
Teaching Gun Safety in Public Schools. Daisy/Heddon.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"MENTAL HEALTH"

GRADE: 10
SUBJECT: HEALTH AND PHYSICAL EDUCATION

BROAD OBJECTIVE:

To help the pupil develop an appreciation for the importance of proper care of the body and mechanisms which control mental and emotional aspects of life.

PERFORMANCE OBJECTIVE:

The student will be able to distribute leisure time wisely, and understand the various careers that contribute to one's mental well-being.

LESSON PROCEDURE:

1. Assigning study projects on the various aspects of maintaining a healthy nervous system and reporting to the group.

2. Making a list of the leisure time activities used by the group and discuss the range of careers associated with each activity.

3. Having pupils discuss their favorite leisure time activities and the importance of the benefits derived from them.

4. Discussing reasons why physical fitness might influence a person's state of mental health.

MATERIALS AND RESOURCES:

Books:

Otto, James H. Modern Health. Holt, Rinehart, Winston, Inc., New York, 1967.
Williams, Dorothea. Building Health. Holt, Rinehart, Winston, Inc., New York, 1967.

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"EXPLORING CAREERS IN DRIVING"

GRADE: 10
SUBJECT: DRIVER EDUCATION

BROAD OBJECTIVES:

1. To know the rules of the road.

2. To investigate the career opportunities in the field of driving.

PERFORMANCE OBJECTIVES:

1. The student will be able to list the rules of the road.

2. The student will be able to list 5 careers and qualifications of each in the field of driving.

LESSON PROCEDURE:

1. Show film Ten Little Engines.

2. Study and discuss the rules of the road.

3. Invite a judge from traffic court to discuss the rules and the consequences of breaking them.

4. Investigate the career opportunities in the field.

5. Invite an official from a trucking concern to talk with the students on career opportunities in the field.

6. Ask a representative from a professional driving school to talk on careers.

MATERIALS AND RESOURCES:

"CAREERS ASSOCIATED WITH OBTAINING A DRIVER'S LICENSE"

GRADE: 10
SUBJECT: DRIVER EDUCATION

BROAD OBJECTIVE:

1. To learn how to get a driver's license.

2. To investigate careers available in this field.

PERFORMANCE OBJECTIVES:

1. The student will be able to get his learner's permit.

2. The student will be able to describe some of the careers in the field.

LESSON PROCEDURE:

1. Show the film Your Permit to Drive.

2. Study the D.M.V. Manual.

3. Ask an examiner to talk with the class about getting a license and careers in the area.

4. Invite a representative of the Governor's Highway Safety Commission to talk to the class.

5. Ask a Highway Patrolman to talk with the class.

MATERIALS AND RESOURCES:

RADFORD CITY SCHOOLS CAREER EDUCATION PROGRAM

"EXPLORING CAREERS IN INSURANCE"

GRADE: 10
SUBJECT: DRIVER EDUCATION

BROAD OBJECTIVES:

1. To understand the types of automobile insurance and the necessity of each one.

2. To investigate the career opportunities related to this field.

PERFORMANCE OBJECTIVES:

1. The students will be able to explain the different types of automobile insurance.

2. The students will be able to describe careers in the field and qualifications needed for them.

LESSON PROCEDURE:

1. Read and discuss material in the textbook on automobile insurance.

2. Use periodic literature for up-to-date information on automobile insurance.

3. The students will investigate careers through the use of Career Briefs and Careers by Largo.

4. Invite an insurance agent to talk about insurance and careers in the field.

PUBLICATION DATE: 30JUN76

TITLE: A FOLLOW-UP STUDY OF TENNESSEE VOCATIONAL EDUCATION SENIORS, 1973-74 AND 1974-75.

PERSONAL AUTHOR: SMITH, GENEVIEVE

DESCRIPTOR: *VOCATIONAL FOLLOWUP; *VOCATIONAL EDUCATION; *OCCUPATIONAL SURVEYS; EMPLOYMENT EXPERIENCE; EDUCATIONAL STATUS COMPARISON; PROGRAM EVALUATION; TABLES (DATA)

IDENTIFIER: TENNESSEE

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 74P.

ABSTRACT: THIS REPORT SUMMARIZED RESULTS OF A FOLLOWUP SURVEY OF TENNESSEE VOCATIONAL EDUCATION SENIORS OF 1973-74 AND 1974-75. A QUESTIONNAIRE TO COLLECT INFORMATION RELATING TO EMPLOYMENT, EDUCATION, AND EVALUATION OF VOCATIONAL PROGRAMS IN THE STATE WAS MAILED TO STRATIFIED SAMPLES OF 2,086 VOCATIONAL EDUCATION SENIORS OF 1973-74 AND 5,219 OF 1974-75 WITH A TOTAL RESPONSE RATE FOR BOTH YEARS OF 13.8 PERCENT (1,846). THE DATA WERE CATEGORIZED ACCORDING TO VOCATIONAL FIELD AND ARE PRESENTED IN TABULAR FORM ACCORDING TO: CHOICE OF VOCATIONAL PROGRAM, COMPLETION OF VOCATIONAL PROGRAM, ENROLLMENT IN MORE VOCATIONAL EDUCATION, EVALUATION OF SCHOOL SERVICES, AND INFORMATION RELATING TO EMPLOYED STUDENTS. TABLES ALSO PRESENT INFORMATION ON THE EMPLOYMENT AND EDUCATIONAL STATUS OF STUDENTS ACCORDING TO THE VARIABLES OF SEX, RACE, AND REGULAR, DISADVANTAGED, OR HANDICAPPED STATUS. SOME OF THE CONCLUSIONS ARE: VOCATIONAL OFFERINGS GENERALLY MET THE DEMAND WITH A CONSIDERABLE NUMBER OF RESPONDENTS INDICATING SATISFACTION WITH VOCATIONAL PROGRAMS; A MAJORITY COMPLETED THEIR PROGRAM; EQUIPMENT AND FACILITIES WERE RATED ADEQUATE, ALTHOUGH JOB PLACEMENT WAS CONSIDERED POOR BY ONE-FOURTH; MOST ACQUIRED JOBS WITH A MAJORITY INDICATING SOME RELATIONSHIP BETWEEN THEIR VOCATIONAL TRAINING AND PRESENT JOB; AND APPROXIMATELY 33 PERCENT WERE ENROLLED IN SOME TYPE OF SCHOOL OR COLLEGE. ACKNOWLEDGMENT

The author wishes to express appreciation for the contributions made by other staff members to completing this study. Thanks are extended to Dr. Garry Bice, Director, Tennessee Research Coordinating Unit, and Frank McKenzie, Director, Tennessee Management Information System, for guidance during this project.

Gratitude is expressed to Jim Ulseth who had the responsibilities of systems analyst and to Dr. Jerry Kondwros, Research Associate, Dennis Phillips, Graduate Assistant, and Jim Howell, Research Associate, for completing the statistical tests. Appreciation is given to Ms. Ellen Tang and Ms. Pattie Hill for secretarial assistance.

INTRODUCTION

More and more states are developing a computer-based Management Information System (MIS) which collects and summarizes vocational education data about staff, students, facilities and equipment, financial accounting, and manpower demand. The MIS simplifies the collection and organization of information needed for completing local, state, and federal reports. In addition, it provides the program planner with comprehensive information about the existing educational system.

When the Tennessee Management Information System (TMIS) was first established, vocational teachers supplied all of the feedback about former students. However, to obtain more detailed information about students after they had left school, the Tennessee Research Coordinating Unit developed a follow-up component in which students themselves provided information about their status. The first student follow-up, based on the TMIS, was completed in March 1975 and provided comprehensive information about 1972-73 vocational education seniors in Tennessee.[1]

Recently, a bill, H. R. 12835, amending the Vocational Education Act of 1963, was passed in the House of Representatives.

---

[1] Robert Coker, Charlotte Wallen, and Lynn Guess. A Follow-up Study of Tennessee Vocational Education Enrollees, Twelfth Graders, 1972-73. Tennessee Research Coordinating Unit, The University of Tennessee College of Education and the Tennessee State Board for Vocational Education. March, 1975.

H. R. 12835 mandates that programs within a State which claim to impart entry-level job skills shall be evaluated according to the extent to which "program completers and leavers find employment in occupations related to their training, and are considered by their employers to be well-trained and prepared for employment."[2]

In addition, the bill states that each program shall be evaluated "according to the extent to which program completers and leavers 1) earn a decent wage, 2) progress in occupations of their choice, 3) are satisfied with their jobs, 4) are satisfied with the training they received, or 5) upgrade their skills through additional education or training."[3]

These objectives have already been met by TMIS which has continued to collect and summarize these types of information about vocational education seniors who left high school in 1973-74 and 1974-75. This report presents a summary of those results and is offered to administrators, teachers, and guidance counselors who require reliable information about the educational and employment status of vocational students who have left school. By using former students as a primary data source, educators have access to valuable information for improving existing vocational programs and establishing new programs that will meet the needs of students and community.

---

[2]Ninety-fourth Congress, 2d Session of House of Representatives. March 29, 1976.

[3]Ibid.

THE PURPOSE

The purpose of the study was to determine the status of Tennessee's vocational education seniors of 1973-74 and 1974-75 by administering a questionnaire to collect information relating to the following:

1. employment;
2. education; and
3. vocational education programs in Tennessee.

METHODOLOGY

A stratified random sampling plan was used to select 2,086 students from the 103,920 vocational education seniors of 1973-74 and 5,219 students from the 112,833 vocational education seniors of 1974-75 from the Tennessee Management Information System. A larger sample was selected for 1974-75 because the 1973-74 sample produced a smaller response than desired.

The questionnaire from the 1972-73 student follow-up questionnaire was adapted for the study (Appendix A) and included 23 questions and five sections relating to enrollment in the vocational program, evaluation of the vocational program, and the employment and educational status of students. After each initial mailing, students who had not replied were sent a second questionnaire. Results of the mailings are shown in Table 1.

Table 1

RESPONSE OF STUDENTS IN FOLLOW-UP STUDY
1973-74 AND 1974-75

Group	Mailings	No. Distributed	No. Returned	No. Usable Returns	Percentage of Return
1973-74	July 1975	2,086	226	226	10.8
seniors	August 1975	1,950	168	166	9.1
1974-75	November 1975	5,219	782	772	15.0
seniors	January 1976	4,447	699	682	15.7
	Total	13,602	1,875	1,846	13.8

After the responses from 1973-74 students declined, a random sample was selected of students who had not returned the questionnaire. These students were labeled "non-respondents" because they had not replied by mail. Telephone calls were made to collect information from the non-respondents. This same procedure was followed for the 1974-75 follow-up. The number of students contacted for information by telephone totaled 120 (1973-74) and 167 (1974-75). The interview guide and non-respondent questionnaire used for the telephone survey appear in Appendix B.

Upon completion of data collection from the respondents and non-respondents of 1973-74 and 1974-75, questionnaires were scanned, keypunching performed, and computer programming and processing initiated in preparation for data analysis.

COMPARISON OF RESPONDENTS AND NON-RESPONDENTS

To determine if the respondents were representative of seniors enrolled in vocational education programs during 1973-74 and 1974-75, comparisons were made between each group of respondents (those who had replied to the questionnaire) and each group of non-respondents (those who had not replied to the questionnaire).

In comparing respondents and non-respondents by sex, it was noted that non-respondents in both groups included more males and fewer females than the respondents. Table 2 depicts the percentage of males and females involved in the study.

Table 2

PERCENTAGE OF RESPONDENTS AND NON-RESPONDENTS BY SEX

Sex	N = 392/120* 1973 - 1974		N = 1,454/167* 1974 - 1975	
	Respondents %	Non-Respondents ** %	Respondents %	Non-Respondents ** %
Male	35.2	45.0	44.2	50.3
Female	64.8	55.0	55.8	49.7
Total	100.0	100.0	100.0	100.0

* Respondents followed by non-respondents.
** Former students contacted by telephone because they did not respond to the questionnaire.

Compared to respondents, more non-respondents were employed full- or part-time, according to Table 3. A greater percentage of respondents than non-respondents were unemployed.

Table 3

COMPARISON OF EMPLOYMENT AND EDUCATIONAL STATUS
OF RESPONDENTS AND NON-RESPONDENTS

	N = 392/120 1973 - 1974		N = 1,454/167 1974 - 1975	
	Respondents %	Non-Respondents %	Respondents %	Non-Respondents %
Employed (Full- or Part-Time)	46.9	53.3	42.8	45.5
Employed and attending school	14.8	13.3	11.5	11.4
Unemployed	23.5	22.5	21.5	18.0
Attending school/ college	14.8	10.9	24.2	25.1
Total	100.0	100.0	100.0	100.0

Table 4 shows that respondents liked their jobs very much while non-respondents liked their jobs somewhat. However, fewer non-respondents than respondents had much dislike for their jobs.

Table 4

COMPARISON OF JOB ATTITUDES OF RESPONDENTS AND NON-RESPONDENTS

	N = 242/80 1973 - 1974		N = 790/95 1974 - 1975	
	Respondents %	Non-Respondents %	Respondents %	Non-Respondents %
Like it very much	52.5	50.0	45.9	44.2
Like it somewhat	25.2	27.5	27.7	33.7
Neither like nor dislike	11.2	10.0	16.3	16.8
Dislike it somewhat	7.8	11.2	5.9	4.2
Dislike it very much	3.3	1.3	4.2	1.1
Total	100.0	100.0	100.0	100.0

Compared to non-respondents, more 1973-74 respondents had jobs for which they were trained or jobs highly related to training. Over one-half of the non-respondents in both groups held jobs only slightly related or unrelated to their training. Table 5 presents this information.

Table 5

RELATION BETWEEN VOCATIONAL TRAINING AND PRESENT JOB OF RESPONDENTS AND NON-RESPONDENTS

	N = 237/80 1973 - 1974		N = 768/95 1974 - 1975	
	Respondents %	Non-Respondents %	Respondents %	Non-Respondents %
Job same for which trained	12.7	10.0	13.2	16.9
Job highly related to training	20.7	13.8	18.2	12.6
Job only slightly related to training	24.9	25.0	26.0	12.6
Job not related to training	36.7	51.2	42.6	57.9
Total	100.0	100.0	100.0	100.0

The average number of hours per week worked by all four groups was less than 40, as shown in Table 6.

Table 6

COMPARISON OF AVERAGE WORK HOURS PER WEEK OF RESPONDENTS AND NON-RESPONDENTS EMPLOYED FULL- OR PART-TIME

	N = 234/80 1973 - 1974	N = 775/88 1974 - 1975
	Hours	Hours
Respondents	37.01	36.22
Non-Respondents	34.26	37.59

Table 7 indicates that all respondents traveled farther to work than non-respondents.

Table 7

COMPARISON OF AVERAGE COMMUTING DISTANCE (ONE-WAY) OF RESPONDENTS AND NON-RESPONDENTS

	N = 226/77 1973 - 1974	N = 705/79 1974 - 1975
	Miles	Miles
Respondents	8.55	8.49
Non-Respondents	6.35	7.77

The 1973-74 non-respondents achieved the highest average hourly wage ($2.86), according to Table 8.

Table 8

COMPARISON OF AVERAGE HOURLY WAGE RATE OF RESPONDENTS AND NON-RESPONDENTS

	N = 232/76 1973 - 1974	N = 747/78 1974 - 1975
	$	$
Respondents	2.65	2.80
Non-Respondents	2.86	2.77

To determine if respondents were representative of all 1973-74/1974-75 seniors, comparisons were made between respondents and non-respondents. A significant difference was determined on only two variables -- work hours per week and one-way commuting distance (Appendix C). Therefore, data from the four samples were

considered representative of seniors enrolled in vocational education programs during this period.

FINDINGS

Many kinds of data were collected, summarized, and analyzed in the course of this study. The information was categorized according to vocational field so that it would be more useful to program planners. Numerous tables, designed to simplify the answer-finding process, are presented in the same order as the questions in the questionnaire (Appendix A).

The number (N) of students responding to questions varies from table to table for the following reasons: 1) a number of students failed to answer questions which they should have answered, and 2) a number of students gave multiple answers to a question, thereby eliminating the response completely.

Choice of Vocational Program

A majority of vocational education students received their first choice of program. Table 9 presents this information.

According to Table 10, approximately one-third of the respondents did not enroll in their vocational program of first choice because it was not offered.

Only a small percentage of students were placed on a waiting list for a vocational program of their choice. The greatest number of students on a waiting list occurred in 1974-75 when 20.2 percent waited to enroll in Special Programs, as shown in Table 11.

Table 9

Completion of Vocational Program

As shown in Table 12, a majority of 1973-74 enrollees (316) and 1974-75 enrollees (1,377) completed vocational programs. The highest percentage of non-completers occurred in the Special Program category for 1974-75.

The majority of students terminated vocational programs before completion because they 1) changed plans, 2) got a job, or 3) for financial reasons, according to Tables 13 and 14.

Enrollment in More Vocational Education

Approximately one-half or more of the students in Health, Occupational Home Economics, and Technical Programs (1973-74) indicated a desire to enroll in more vocational education within the

next two years. Over 40 percent or more of the 1974-75 seniors in every vocational field indicated plans for more vocational education. Table 15 presents this information.

Tables 16 and 17 indicate the fields specified by students for further training. Some of the 382/1,404 respondents indicating plans to take more vocational education (Table 15) failed to specify the fields in which they intended to enroll. Table 18, ranking the fields in importance, indicates that both groups considered Office Programs as first in importance.

Evaluation of School Services

Students were asked to rate school services on a three-point scale: 1) very good, 2) average, or 3) poor. Table 19 shows how students rated vocational instruction. In 1973-74, vocational instruction was considered very good by a majority of students in seven vocational fields. By 1974-75, vocational instruction was rated as very good in all nine vocational fields.

Instruction in Technical and Agriculture Programs showed the greatest improvement during the two periods. From 1973-74 to 1974-75, the percentage of students rating vocational instruction as very good decreased in Non-Farm Agriculture, Health, Occupational Home Economics, Office, Trade 1:4 Industry, and Special Programs.

Table 19

RATING OF VOCATIONAL INSTRUCTION

	N = 374 1973-1974			N = 1,288 1974-1975		
	Very Good %	Average %	Poor %	Very Good %	Average %	Poor %
Agriculture	70.2	19.8	5.9	92.7	41.9	5.4
Non Farm Agriculture	63.6	36.4	0.0	57.0	37.1	6.0
Distributive Education	56.5	42.5	1.0	87.4	38.1	4.5
Health	73.2	24.6	1.3	63.8	32.6	3.6
Occupational Home Economics	65.4	32.0	2.6	60.4	36.0	3.6
Office	69.7	29.2	1.1	63.2	35.3	1.5
Technical	0.0	100.0	0.0	60.0	36.7	3.3
Trade & Industry	57.0	38.7	4.3	55.9	37.2	6.9
Special Programs	77.8	22.2	0.0	57.0	42.9	0.1

In rating other types of instruction, Table 20 shows that students generally considered instruction in non-vocational classes as average.

Table 20

RATING OF ALL OTHER INSTRUCTION

	N = 365 1973-1974			N = 1,346 1974-1975		
	Very Good %	Average %	Poor %	Very Good %	Average %	Poor %
Agriculture	23.5	76.5	0.0	22.9	70.0	7.1
Non Farm Agriculture	36.4	59.1	4.5	22.4	70.5	7.1
Distributive Education	34.8	62.2	3.0	30.9	65.3	3.8
Health	37.9	57.6	4.5	41.9	57.4	0.7
Occupational Home Economics	44.0	52.0	4.0	27.1	69.2	3.7
Office	28.7	69.0	2.3	28.2	68.2	3.6
Technical	50.0	50.0	0.0	57.1	42.9	0.0
Trade & Industry	28.8	63.0	8.2	27.5	67.2	5.3
Special Programs	57.1	42.9	0.0	25.7	70.5	3.8

According to Table 21, vocational shops or labs were rated as average by both groups. Technical, Non-Farm Agriculture, Health, and Occupational Home Economics facilities received very good ratings by a majority of enrollees.

Guidance and counseling services yielded average ratings by a majority of 1973-74 students in Non-Farm Agriculture, Occupational Home Economics, Office, Trade and Industry, and Special Programs.

In contrast, a majority of 1974-75 students in six vocational fields rated guidance and counseling services as very good.

Table 21

RATING OF VOCATIONAL SHOP OR LAB

	N = 354 1973-1974			N = 1,306 1974-1975		
	Very Good %	Average %	Poor %	Very Good %	Average %	Poor %
Agriculture	18.8	68.8	12.5	38.9	48.6	12.5
Non Farm Agriculture	54.5	36.4	9.1	44.9	40.8	14.3
Distributive Education	30.8	52.3	16.9	33.1	52.8	14.2
Health	48.4	45.3	6.3	53.4	38.9	7.6
Occupational Home Economics	37.5	58.3	4.2	51.4	46.7	1.9
Office	41.0	55.4	3.6	42.7	50.0	7.3
Technical	100.0	0.0	0.0	55.2	44.8	0.0
Trade & Industry	44.4	45.8	9.7	41.9	48.3	9.9
Special Programs	42.9	57.1	0.0	45.0	45.0	10.0

Distributive Education and Health students considered guidance and counseling services as very good during both school years, as shown in Table 22.

A majority of 1973-74 students in three vocational fields rated job placement as average. However, approximately one-fourth or more of the students in each vocational field considered job placement to be poor, with the exception of students in Distributive Education. Table 23 presents this information.

Information Relating to Employed Students

A majority of 1973-74 and 1974-75 students who were employed either had a job before leaving school or spent two weeks or less looking for work. Students in Occupational Home Economics appeared to have the most difficult time in finding employment since almost

40 percent of them spent over two months seeking work. Table 24 indicates the time spent by employed students in job hunting.

Sources of assistance used to get the first job are shown in Tables 25 and 26. Table 27, ranking the sources, indicates that relatives, friends, and vocational teachers were the major persons assisting students with job entry.

The majority of students in both groups had held one or two jobs since leaving school. Table 28 indicates the number of jobs held by students, according to vocational field, since leaving school. A majority of Occupational Home Economics students (66.7 and 68.3 percent) appeared to have held only one job.

The average number of hours worked per week by 1973-74 students was 37.01 (Table 5). In comparison, 1974-75 students worked an average of 36.22 hours per week. As shown in Table 29, Technical employees had the highest average, 50 hours in 1973-74 and 45.91 hours in 1974-75.

The average hourly wage of 1973-74 students was $2.65; 1974-75 students averaged $2.80 per hour (Table 8). Table 30 presents the average hourly wage according to vocational field.

On the average, 1973-74 students traveled 8.55 miles to work; 1974-75 students traveled 8.49 miles to work. The average distance students commuted, according to vocational field, is presented in Table 31. Agriculture, Non-Farm Agriculture, and Technical workers appeared to travel the farthest.

The majority of students working less than 35 hours per week indicated that enrollment in school was the reason for the shorter work week. Table 32 provides this information.

Table 24

Approximately one-third of the 1973-74/1974-75 students had jobs that were the same or highly related to the vocational training program (Table 5). This information is given by vocational field in Tables 33 and 34.

Table 35 indicates that the majority of students did not move away from where they were trained. The largest percentage of students moving away was in the Technical group.

Over 60 percent of all the respondents stated that they liked their present job very much or somewhat, according to Tables 36 and 37.

At least 25 percent or more of the 1973-74 students in seven vocational fields used training-related knowledge and skills frequently on the job. Training-related knowledge and skills were used considerably by 25 percent or more of the 1974-75 students in five vocational fields, as shown in Table 38.

STATUS OF STUDENTS

Of the 386 students (1973-74), 176 were employed full- or part-time, 93 unemployed, 59 employed and attending school or college, and 58 attending school or college. The following year, 587 of the 1,418 students were employed, 313 unemployed, 167 employed and attending school or college, and 351 attending school or college. Tables 39 and 40 present this information.

As shown in Tables 41 and 42, a majority of the students in both groups enrolled in vocational programs to upgrade skills or get a job.

Students Enrolled in School or College

Of the 149 students (1973-74) in school or college, the majority were attending four-year colleges, two-year colleges, and area vocational schools in that order. Former Health students (43) accounted for the largest part of the total.

Over three-fourths of the Office group were attending a four-year college; Distributive Education students made up the highest percentage of students (34.5 percent) in a two-year college; the greatest proportion of students (33.3 percent) in an area vocational school came from Agriculture.

Approximately 60 percent of those students in a school or college indicated some relationship between high school vocational training and their present educational program.

In the 1974-75 group attending an educational institution, 135 students of the 596 were former Office enrollees. The majority of 1974-75 students were enrolled in four-year colleges, two-year colleges, and area vocational schools in that order. A large percentage of the four-year college enrollees came from Agriculture and Non-Farm Agriculture. At least one-fourth of the students in Agriculture, Distributive Education, Health, Occupational Home Economics, Office, and Special Programs attended a two-year college. The highest percentage of area vocational school enrollees came from Non-Farm Agriculture (18.6 percent). Approximately 66 percent of those students attending an educational institution indicated a relationship between high school vocational training and their current educational program. Tables 43 and 44 present this information.

47

In responding about the relationship of the present educational program to the high school vocational course, a greater percentage of the 1973-74 students indicated that their present school program had little or no relationship to high school training. The 1974-75 students appeared to be taking courses that had a greater relationship to their high school vocational program. Table 45 contains these figures.

Unemployed Students

More of the 1973-74 unemployed students were seeking work than not seeking work. An even greater percentage of the 1974-75 unemployed students were looking for employment, according to Table 46.

Table 47 shows that the majority of unemployed students in both groups had spent more than two months looking for work. Of the 1973-74 students, Special Program enrollees appeared to have the most difficulty in finding employment. Three-fourths of the Occupational Home Economics enrollees (1974-75) had spent over two months looking for work.

Of the 185 students (1973-74) responding about their efforts to find employment, the majority used employers, friends/relatives, and newspaper ads in that order. The 1974-75 students indicated that friends/relatives, employers, and newspaper ads were used to find employment, as shown in Tables 48 and 49.

Occupational Home Economics, and Office Programs (1973-74/1974-75).

According to Table 50, whites predominated in every program except for Occupational Home Economics (1974-75) where 64.4 percent of the enrollees were blacks. Table 50 indicates the percentage of students according to sex and race.

Regular, Disadvantaged, and Handicapped Students

The highest percentage of disadvantaged students were enrolled in the 1974-75 group in Special Programs (52.4 percent). Occupational Home Economics had 45.8 percent disadvantaged students enrolled during the same school year. Handicapped students accounted for 11.9 percent of the 1974-75 enrollment in Occupational Home Economics. However, regular students yielded the highest percent-

age of enrollment in every vocational program, as shown in Table 51.

SUMMARY

The purpose of the study was to determine the status of vocational education seniors of 1973-74 and 1974-75, by administering a questionnaire to collect information relating to employment, education, and vocational education programs in Tennessee.

Through a stratefied random sampling plan, 2,086 seniors of 1973-74 and 5,219 seniors of 1974-75 were chosen from the Tennessee Management Information System. Questionnaires were mailed to these students. After replies were received, another sample was chosen from those students who had not returned the questionnaire. Telephone calls were made to this group to collect information similar to that in the questionnaire.

CONCLUSIONS

In analyzing the status of Tennessee's vocational education seniors of 1973-74 and 1974-75, the following conclusions were reached, based upon an interpretation of the data.

Vocational Education Programs in Tennessee

Because the majority of vocational students were able to enter their program of first choice, vocational offerings generally met the demand. Waiting lists were minimal. With approximately one-third of the students in each vocational field indicating a desire to enroll in more vocational education within the next two years, a considerable number of students indicated satisfaction with

Special Programs	88.9	11.1	0.0	46.0	52.4	1.6

vocational programs. Upgrading skills and getting a job were the major reasons given for taking vocational courses.

The majority of enrollees completed vocational programs. Change of occupational plans and getting a job were the main reasons offered by the small number of non-completers who terminated vocational programs. Although 1974-75 seniors did not rate vocational instruction as highly as 1973-74 seniors, vocational instruction was still considered superior to other types of instruction.

Vocational equipment and facilities, generally rated as average, were adequate as far as students were concerned. Guidance and counseling services in vocational programs increased in effectiveness during this period. Job placement was considered poor by one-fourth or more of the students in eight vocational fields (1973-74) and seven vocational fields (1974-75), indicating a need for improvement. Apparently, vocational teachers were effective in assisting students with job placement.

Employment Status of Former Students

A majority of vocational students demonstrated the ability to acquire a job before leaving school or soon after leaving school. Relatives, friends, and vocational teachers were major sources of job placement assistance.

Similar to other workers, vocational students averaged almost 40 work hours per week, were paid an average hourly wage above the minimum wage, and generally traveled about nine miles to work. Their work habits appeared to be consistent since the majority of

the employed had held only one or two jobs since entering the labor market. Those who were working less than 35 hours per week were enrolled in school or college, indicating a desire to improve their job knowledge and skills.

A majority of the employed indicated some relationship, ranging from slight to considerable, between their vocational training and present job. Knowledge and skills developed in high school vocational programs were being used by a sizeable number of workers. The employed appeared to be working near their high school training site, indicating a local demand for the type of skills taught in the community high school's vocational programs.

Considerable job satisfaction was indicated by a majority of both groups. Former Health enrollees appeared to be the most satisfied. In spite of the down trend and fluctuations in the economy from 1973-1975, the majority of vocational students managed to be employed full- or part-time, indicating their ability to compete in today's job market.

Compared to over one-half of the 1973-74 unemployed looking for work, two-thirds of the 1974-75 unemployed were seeking jobs. The major sources of employment assistance used by both groups were employers, relatives or friends, and newspaper ads.

Educational Status of Former Students

Approximately 33 percent of both groups were enrolled in some type of school or college; 12 percent of both groups were working and attending an educational institution. Four-year colleges

were the choice of the majority with two-year colleges and area vocational schools following in order of importance. Approximately two-thirds of all the former students attending school or college indicated a relationship between high school vocational training and their present educational program.

IMPLICATIONS

As a result of this study, the following implications appear evident.

1. Although females dominate vocational education enrollees, there is no evidence of their being encouraged to enroll in programs other than those which are traditionally female-oriented. Similarly, males are still enrolling only in programs which are traditionally male-oriented. Both sexes need information about the career possibilities existing for males and females in each vocational program. An intense effort should be made to introduce all students to the career benefits prevalent in existing vocational programs. Equal opportunities should be provided for exploring these programs at the junior high level so that students will have career information on which to base career decisions. Equal opportunities should also prevail at the secondary level for enrolling in vocational programs.

2. Even though the majority of enrollees received their first choice of vocational program, 10 percent or more of the enrollees had to enroll in programs of second or third choice. This points to the need for expanding vocational offerings. This need is

reaffirmed by the fact that 228 respondents indicated that the program of first choice was not offered.

3. The percentage of students completing vocational programs was high. Yet over 10 percent of the enrollees did not complete the program in six vocational fields (1973-74) and in eight vocational fields (1974-75). Distributive Education programs had the lowest percentage of non-completion, leading to the belief that cooperative work experience plays a big part in retaining enrollees. With 12 to 18 percent of the respondents indicating financial reasons for early termination of vocational programs, it appears that cooperative work experience offers a solution to at least a portion of the non-completion problem. Because approximately one-fourth of the respondents indicated job entry as the reason for terminating vocational programs, paid work experience coupled with supervised instruction is a realistic solution to reducing the number of non-completers.

4. Although a considerable number of students indicated an intent to enroll in more vocational education, a sizeable percentage responded negatively. Since continued education is an important ingredient in career advancement, students need to become aware of this fact. Apparently, many of the enrollees considered program completion as absolutely final in the sense that no more training would ever be required. Students should learn that increasing changes in technology, society, and the economy are accelerating the need for continued education, formal and informal, at area

vocational-technical schools, community and junior colleges, private business and training schools, and colleges and universities. The average worker will change jobs at least three or more times during his work life, making additional training essential.

5. With Office, Trade and Industry, Technical, and Health Programs specified as prospective training fields by a considerable number of students, it is important that these programs be made available in sufficient quantity. Since a sizeable percentage of students indicated placement on a waiting list for Trade and Industry and Health Programs, special efforts should be made to increase these offerings.

6. Vocational instruction, rated superior to other types of instruction, was still considered average by many vocational students. Over 5 percent of the respondents considered instruction poor in Agriculture, Non-Farm Agriculture, Trade and Industry, and Special Programs. To improve vocational instruction and achieve above-average ratings more frequently, an ongoing professional development program should be initiated to increase the effectiveness of vocational teachers.

7. A definite need exists to improve guidance services, considered average or below-average, by a sizeable number of students. Again, an effectively designed professional development program can be a major step toward bringing about improvement in this area. Vocational teachers and guidance personnel will both profit from an in-service program designed to build guidance and counseling skills.

8. With job placement receiving the lowest rating accorded school services, it is essential that priority attention be given to assisting students with job entry. Although vocational students demonstrated competence in entering the labor market, a major need exists for developing a program which will eliminate students' dependence upon relatives, friends, and vocational teachers for placement assistance.

9. Training programs in Technical and Occupational Home Economics need careful scrutiny since a high percentage of these students indicated that their training had no relationship to their jobs. Special Programs students also indicated frequently that their jobs had no relationship to the training received. However, since remediation in communication skills is the primary objective of this program, students might perceive little relationship between those skills and their jobs. However, without adequate communication skills, effective job performance is impossible.

10. A considerable number of students in Distributive Education, Occupational Home Economics, and Technical Programs moved to find jobs, indicating that these types of skills were not in demand locally. Improved matching of job skills with employer demand is possible by utilizing manpower information effectively when planning programs. An in-service program is needed to train administrators, teachers, and guidance personnel in using manpower data.

11. The vocational programs in which training is seldom or never used on the job should be studied so that outdated instruction and methods can be eliminated. Course content should be updated

continuously in order to meet the needs of students and employers.

12. A considerable number of students were either attending school or college or working full- or part-time and attending an educational institution. This speaks well for those vocational students who apparently understand the need for continued education and are motivated toward self-improvement.

It was interesting to note that a considerable percentage of Special Programs students were enrolled in a private school, possibly pointing to the fact that these institutions frequently give students individualized instruction. Occupational Home Economics and Office students appeared to be moving from four- to two-year colleges for additional education with the four-year college being the institution of choice for the majority of vocational students. Traditionally, the vocational student has been viewed as being unable to succeed in the four-year college. Because so many former students were enrolled in the four-year college, the traditional picture of the vocational student appears to be undergoing change. Perhaps a major difference emerging between today's vocational student and the academic student is the vocational student's job skills which ease entrance to the labor market.

13. Even though the job market was tight from 1973-75, a considerable percentage of the unemployed indicated that they were seeking work, again emphasizing the ability of the vocational student to compete for jobs. Many students had jobs when they left school. The time spent by the unemployed in seeking work decreased from 1973 to 1975, signaling the upward climb of the economy.

14. Only a small number of disadvantaged and handicapped students participated in vocational programs. Occupational Home Economics enrolled the greatest number of disadvantaged and handicapped, probably because the job skills taught are related to service occupations. Generally, service occupations are low-paying and require limited skills. The disadvantaged and handicapped can benefit greatly from vocational education which equips them with a variety of skills for entering the job market. Efforts should be made to meet the special needs of these students by providing individualized vocational instruction in other than low-paying service occupations. These groups should be afforded opportunities to develop skills in occupations other than the ones traditionally considered appropriate for individuals with various levels of disadvantagement.

If the needs of these students are to be met, in-service education stands high on the priority list. Vocational instructors require special training if they are to work effectively with the disadvantaged and handicapped, enabling them to become a productive and satisfied segment of society.

SECTION II Continued

10. What is the wage rate per hour of your present job excluding overtime? _____
Note: If you are paid weekly, bi-weekly or monthly, please divide your salary by the number of hours in your pay period.

11. How far is your place at work from your present residence? (Mark number of miles) _____

12. If you are currently working less than 35 hours per week, please mark the reason(s) for doing so.
- Cannot find full-time job ○
- Full-time work week less than 35 hours ○
- Temporary cut-back by the employer ○
- Enrolled in school or college ○
- Do not want full-time work ○
- Other (Please specify below) ○

_____

13. Which of the following statements best describes the relationship between your present job and the training program in question one? (Mark one)
- Job same for which trained ○
- Job highly related to the training ○
- Job only slightly related to the training ○
- Job not related to the training ○

14. Have you moved away from where you were trained?
- Yes ○
- No ○

15. How do you feel about your present job?
- Like it very much ○
- Like it somewhat ○
- Neither like nor dislike it ○
- Dislike it somewhat ○
- Dislike it very much ○

16. How often on your present job do you use the knowledge and skill acquired from your training?
- Frequently (use most of the time) ○
- Occasionally (use only some times) ○
- Seldom (use only rarely) ○
- Never (never use it) ○

17. What is your present status? (Mark only one)
- Employed
- Not employed
- Employed and attending school
- Attending school or college

18. Why did you enroll in a vocational program?
- To get a job
- To upgrade my job skills
- For a hobby
- For other high school credit
- Other (please specify below)

_____

IV. THIS SECTION FOR THOSE NOW ENROLLED IN SCHOOL OR COLLEGE

19. What is the type of institution in which you are presently enrolled? (Mark one)
- Vocational high school
- Public high school
- Two year junior or community college
- Public post-secondary technical institute
- Four year college or university
- Private vocational or business school
- Area vocational school
- Other

20. How related is your present educational program to the vocational course you took in high school?
- Same field
- Highly related
- Only slightly related
- Not related

V. THIS SECTION FOR THOSE NOT NOW WORKING

21. Are you looking for a job?
○ Yes ○ No

22. If "Yes" how long have you been looking?
- Less than a month
- More than one but less than two months
- More than two months

23. What have you done most recently to look for a job? (Mark all that apply)
- Checked with school placement service
- Checked with public/private emp. agency
- Checked directly with employers
- Checked with friends or relatives
- Placed or answered newspaper ads
- Other

INTERVIEW GUIDE AND
NON-RESPONDENT QUESTIONNAIRE

TELEPHONE INTERVIEW GUIDE

Follow-up of 1973-74 Secondary Students

Introduction

The following interview guide will be used in contacting non-respondents of the Secondary follow-up. By all interviewers using the same guide, the chance of biased responses will be greatly reduced.

At all times proper telephone etiquette should be observed. If for any reason a student wishes not to respond to a question or all questions, indicate this on the form, but do not force an answer from the person.

Interview

This is _____ with the Research Coordinating Unit. Several weeks ago a follow-up questionnaire was mailed to a sample of individuals who as seniors in 1973-74 were enrolled in a vocational program. Since we have not received a completed questionnaire from you, could I have a few minutes of your time to ask part of the questions that are on the questionnaire? This information will be treated as confidential, and your name will not be revealed in any reports.

Follow the questionnaire form. Name all possible responses before asking for a response.

Question 1 (a). If a person responds as being employed, move to questions under For Those Now Employed.

(b). If a person is not employed, move to questions under For Those Not Employed.

(c). If a person responds as employed and attending school, ask questions both For Those Now Employed and For Those Now Attending School.

(d). If a person responds attending school or college, move to For Those Now Attending School.

Questions under For All Persons will be asked of all persons.

TITLE: REVAMP: REVITALIZE THE VOCATIONAL AND ACADEMIC MULTIFARIOUS PROGRAM THROUGH CAREER EDUCATION. FINAL REPORT.

PERSONAL AUTHOR: MACLEOD, GEORGE H.

DESCRIPTOR: *CAREER EDUCATION; ELEMENTARY SECONDARY EDUCATION; POST SECONDARY EDUCATION; *CURRICULUM GUIDES; *CAREER AWARENESS; DEVELOPMENTAL PROGRAMS; PROGRAM DESCRIPTIONS; *LANGUAGE ARTS; *LEARNING ACTIVITIES; OCCUPATIONAL GUIDANCE; COURSE DESCRIPTIONS; CAREER EXPLORATION

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 596P.; RELATED DOCUMENT VT 103 226. A LANGUAGE ARTS CURRICULUM GUIDE FOR GRADES 7 TO 12 IS CONTAINED IN THIS ISSUE.

ABSTRACT: DESCRIBED IN THE REPORT ARE THE ACTIVITIES AND ACCOMPLISHMENTS OF A THREE-YEAR CAREER EDUCATION PROJECT FOR GRADES K-14. IN ADDITION TO THE COMPONENTS OF CAREER AWARENESS, ORIENTATION, EXPLORATION, AND PREPARATION, THE PROGRAM RECYCLING COMPONENT PROVIDED COURSE WORK AND COUNSELING SERVICES FOR ALL OUT-OF-SCHOOL YOUTH AND ADULTS IN THE COMMUNITY. APPENDED PROJECT MATERIALS CONSTITUTE THE MAJOR PORTION OF THE DOCUMENT AND INCLUDE TWO CURRICULUM GUIDES. THE CAREER AWARENESS GUIDE FOR GRADES K-6 (198 PAGES) CONTAINS LEARNING ACTIVITIES ORGANIZED AROUND THE FOLLOWING THEMES: SELF-AWARENESS, INTERPERSONAL SKILLS, DECISIONMAKING, WORK AWARENESS, MANIPULATIVE SKILLS, ECONOMIC AWARENESS, THE VALUE OF WORK, AND RELEVANCE OF EDUCATION. A SECOND SECTION OF THE GUIDE DETAILS USE OF COMMUNITY RESOURCES THROUGH FIELD TRIPS AND RESOURCE VISITORS. THE LANGUAGE ARTS CURRICULUM GUIDE FOR GRADES 7-12 (229 PAGES) PRESENTS ACTIVITIES FOR THE JUNIOR HIGH SCHOOL GROUPED UNDER SPECIFIC TOPICS. FOR EACH TOPIC, AN OVERVIEW, OBJECTIVES, RESOURCES, ACTIVITIES, AND EVALUATION METHODS ARE LISTED. COURSE DESCRIPTIONS FOR 35 HIGH SCHOOL ENGLISH COURSES PROVIDE A STATEMENT OF OBJECTIVES, MATERIALS REQUIRED, AND A COURSE OUTLINE. OTHER APPENDED MATERIALS ARE: A CAREER GUIDANCE INSTITUTE REPORT, DIRECTORY OF RESOURCES, AND A HIGH SCHOOL CAREER GUIDANCE HANDBOOK. (RG)

5.(a) The time period covered was July 1, 1973 to June 30, 1976.

5.(b) Goals and Objectives

The South Portland schools propose a developmental program in career education for grades Kindergarten through 14 with the following objectives included:

Career Awareness (Grades K-6)

1. Students will demonstrate an awareness about themselves including interests and abilities and gain a knowledge of a variety of career opportunities throughout 15 clusters.

Career Orientation (Grades 7-8)

1. Students will demonstrate insight into a diversity of career opportunities.
2. Students will be able to describe how a positive attitude toward work improves both personal job satisfaction and quality of product.
3. Students will relate interests and abilities to possible career selections.
4. Students will narrow career possibilities to three of the 15 USOE job clusters.

Career Exploration (Grade 9)

1. Students will make in-depth analysis of three job clusters of their choice.
2. Students will be involved in exploration through job shadowing.
3. Students will be administered the General Kuder Preference Record to better evaluate their interests.

Career Preparation (Grades 10-12)

1. Students new to the program will increase self-awareness, orientation, and exploration through individual or small group guidance.
2. Students will use tests such as: Kuder Preference Record - all forms, Holland's Self-Directed Search, or the Strong Vocational Interest Blank.
3. Students expected to drop out will be provided with a variety of vocational training opportunities so they may, upon leaving school, have a salable skill.
4. Students will receive placement services as a guidance function.

5. Students will be provided pre-vocational orientation courses in grade 10 in cooperative work-study, distributive education and business education so that they are ready for cooperative placement in grade 11.

Program Recycling (Grades 13 and 14)

1. All out-of-school youth and adults will be provided the opportunity to use high school guidance functions: testing, counseling, educational planning assistance, and placement.

2. All out-of-school youth and adults will be provided the opportunity for course work in adult education to complete credits for high school graduation, further vocational training or refresher courses.

3. The Assistant Director will structure the provision of these services on a regular evening basis and publicize this service through community media.

5.(c) Procedures

To meet the objectives of career education, the following procedures were utilized:

Career Awareness (Grades K-6)

1. The elementary curriculum coordinator, in collaboration with the elementary curriculum directors and REVAMP assistant director, established career awareness emphasis in all areas of the existing elementary curricula.

2. A sequential plan for developing units of studies in career awareness was completed by the elementary curriculum coordinator in conjunction with teachers in the four project schools and the elementary curriculum directors.

3. Provisions were made for the staff of the four project schools to receive in-service workshops.

Career Orientation (Grades 7-8)

1. A guidance assistant was added to each junior high staff so that each school would have two full professional counselors, a guidance assistant and a clerk.

2. In grades 7 and 8, students were involved in the orientation to a wide range of career opportunities. Emphasis was placed on the diversity of career opportunities and their relationship to school offerings with activities and experiences in all employment levels related to the 15 USOE clusters. The guidance department offered 100 hours per year of career education.

Career Exploration (Grade 9)

1. Career exploration program elements emphasized experience-centered activities. These included real or vicarious experiences in areas selected by the students.

2. To develop a more realistic secondary curriculum, one experienced, flexible South Portland junior high teacher was released from regular classroom duties to develop career education materials for infusion into the curriculum. Academic courses that would better complement vocational training areas in which the students have shown an interest were developed. In-service training was offered to all junior high school teachers.

Career Preparation (Grades 10-12)

The high school guidance department and Assistant Director complemented the career education program in the following ways.

1. Grade 10 provided a testing program using either the Kuder Preference Record - all forms, the Strong Vocational Interest Blank or Holland's Self-Directed Search. In group sessions counselors interpreted the tests.

2. Grade 11 offered follow-up of previous interests. Continuous individual and group counseling helped to develop a positive attitude toward work.

3. Grade 12 afforded, for some, detailed involvement in specific areas of interest. A major objective of the guidance department was that all students be helped in making decisions regarding post-high school plans.

Program Recycling (Grades 13-14)

The high school guidance department and Assistant Director complemented the career education program in the following ways:

1. Testing was available.

2. The implementation of this program depended much on the development of the resource center, the hub of guidance services.

3. An additional counselor at the high school was necessary to keep the student-counselor ratio a workable one. This afforded more time for the out-of-school population.

4. The guidance department enlisted the aid of vocational and business schools and colleges in the area.

5.(d) Results and Accomplishments

In reviewing career education in South Portland it was reassuring to note that no amending was required of the original project proposal.

This indicated that the needs identified at the outset were valid and realistic. All too frequently, federal grants could be and were revised to the extent that the final product in some ways did not resemble the application which had been approved in Washington.

As the three year project drew to a close, it was apparent that career education had developed a firm foothold in South Portland. The project director's plan of internal staffing assured that these changes would remain permanent. Career education staff enthusiasm and teacher response to them have been factors of success. Accomplishments resulting from career education funding in South Portland were categorized in four major project areas: system-wide management, elementary curriculum, secondary curriculum and secondary guidance.

System Wide K-12

1. The composition and functions of the Advisory Board were essential to the REVAMP director and assistant director in determining programs and acquiring business resources and contacts.

2. Though the third party evaluation process required adjustment and reassignments the first year, throughout all three years the team's support and assistance guided project successes.

3. Following teacher and school board approval, the Career Development Design, a sequential plan for grades K-12 developed by the REVAMP staff, became the official policy for career education in South Portland.

4. Each year a larger number of South Portland school personnel participated in inservice workshops such as the Career Guidance Institutes, K-6 career education workshops, secondary career/curriculum workshops, and local and regional professional conferences.

5. The combined efforts of the assistant director, curriculum coordinators, and guidance assistants enabled South Portland to accurately log system-wide staff involvement in the many facets of its career education programs.

6. The second year, pre-tests for 2nd, 5th, 8th, and 11th graders and post-tests for the same students the third year were administered to determine student needs and to compare student growth over a one year period. Other personal aptitude and interest tests were incorporated into each student's guidance program.

7. South Portland educators came to realize the importance of thorough documentation. Over the three year period they refined several forms and processes to keep accurate records of vital information.

8. Dissemination procedures included the use of South Portland educators for in system, state and New England presentations, distribution of specially selected South Portland, commercial and other school developed materials, news media presentations and publications, along with the specific Bangor contract for local, state, and university workshops and the state contract for the Language Arts Curriculum Guide, Grades 7 - 12.

9. The third year realized the completion of the content, locations, and distribution of the elementary and secondary human resource directories.

Elementary Curriculum

The elementary career education coordinator in the first two years of the program worked with four project schools. During the third year, that number was expanded to include the other eight schools in the system and the one private parochial school in the area. The elementary handbook, developed during the first year, underwent a complete revision and during the third year was prepared for publication. Activities found in the book were tested in the classroom or developed at workshops led by the coordinator.

Secondary Curriculum

The areas of mathematics, English, and social studies were selected for in-depth studies. The original process chart followed by the math coordinator served as well for the others. With the aid of teachers at workshops, the coordinator devised a sequential math program for vocational and general students. The coordinators for English in the second year of the project developed a curriculum guide for grades 7-9. In the third year the product was a Language Arts Guide for grades 7-12. Coordinators for social studies revised the curriculum, making decided changes in both junior and senior high courses. Career education emphasis in their area was placed on moral development.

Although the project did not include other academic areas, the math coordinator worked throughout the three years with all secondary teachers. Most important was her ability to demonstrate methods of infusing career education into the curriculum. She was extremely successful in proving that career education is not an isolated subject.

Guidance

The guidance department has undergone a permanent change as a result of its in-depth needs assessment. Through surveys of students, graduates and parents, counselors identified the guidance needs of students and determined the most efficient

means of meeting them. A decided shift has been made - moving from one to one counseling to the more effective small and large group guidance sessions. Counselors have attended departmental meetings in all academic areas, enabling them to work more closely with teachers. The establishment of Career Guidance Centers was responsible in part for the successes of the project. A further outcome has been the publication of a sequential career guidance handbook for parents and students.

5.(e) Evaluation

The contract for the third party evaluation during the three year span of the project was with the New England Resource Center for Occupational Education. Dr. Richard A. Gustafson acted as the chief evaluator and after the first year was assisted by Dr. Arthur O. Berry and Dr. Robert Read. With the insistence of the project director, near the close of the first year, each of the three evaluators was assigned to a specific area. Dr. Gustafson evaluated all of the project administration and the elementary component, Dr. Berry evaluated the secondary curriculum component and Dr. Read the secondary guidance component. The evaluators required South Portland to meet all the original objectives. The project director and assistant director, each of the last two years, negotiated with the evaluators the upcoming years evaluation design, detailing specific sub-objectives, determining procedures that would be used to meet the sub-objectives and establishing what criteria and data would be used for evaluation. The plan specified the years work in advance with specific interim dates when procedures would be completed and data would be submitted to the evaluators.

Although the third party evaluators always maintained the role of critically analyzing our accomplishments, it became apparent that the procedure established during the last two years of this project became a positive force with project personnel endeavoring to reach the goals ahead of schedule and then proceeding to overachieve.

5.(f) Conclusions

As the third year of the project draws to a close, the career education staff concludes:

Mr. Seekins, Superintendent, and the Board of Education continue to merit respect for fulfilling their commitment to the original proposal.

In the South Portland school system, the elementary teachers most readily received and implemented the project design.

Over the three year period, a definite change in career education philosophy has evolved at the elementary level.

Because of internal staffing, curriculum changes implemented through career education should have a more lasting effect.

Teachers at all levels were involved in the process of change; hence, the programs developed became theirs.

The charge made to coordinators and to guidance was to affect a change for vocational and general students. We find that courses and studies for these students have undergone the greatest revision.

As a result of the project, the South Portland secondary guidance department has become a career guidance department.

The project was unable to completely meet its objectives set for grades 13-14 because of lack of authority at this level.

5.(f) Recommendations

In reviewing the past three years, the REVAMP staff recognized problems and solutions concerning three levels: Career Education Office of the USOE, State Departments of Education, and local school systems. Fourteen recommendations follow.

It is recommended that the Career Education Office of the USOE:

1. Exclude grades 13-14 from projects proposals in those states having no legislative authority for public education at that level.
2. Assure that project application readers carefully check to ascertain that sufficient clerical staffing has been budgeted.
3. Schedule any three year grant on a graduated budget to account for an annual rate of inflation.
4. Provide fourth year extended funding for dissemination when a project has proven itself to be valuable and successful.
5. Require 3 and/or 5 year follow-up studies after termination of federal funding to determine the continuance of project objectives.
6. Specify guidelines of expected areas of achievement that students should accomplish.
7. Support research to develop and/or identify valid standardized tests to measure growth in career and self-awareness.
8. Determine a standard data collection system to help facilitate documentation procedures required of local school systems.

It is recommended that the State Departments of Education:

1. Receive joint dissemination funding and responsibility with a successful model, such as South Portland, to implement a state-wide career education program.
2. Become a clearing house for recommended and newly developed career education materials and information.

It is recommended that local school systems:

1. Employ a career education director of Fred Freise's caliber to provide the vital and long overdue link between business and education and to coordinate system-wide career education activities, curriculum, and resources.

2. Demand a more balanced curriculum in addressing itself equally to cognitive, affective and psychomotor domains.

3. Recognize that, though federal funding justifiably expects dissemination, the project staff should determine and maintain a reasonable schedule for this.

4. Expect that the results of career education curriculum revision become the responsibility of curriculum directors, department chairmen, and assistant chairmen with annual school board and administrative review and evaluation.

6.(a) Statement of Problem

Although the role of the public school must continue with its responsibility for the cognitive and affective development of each student so that he may fulfill his potential as a contributing member of society, the role of the public school must be expanded to broaden occupation aspirations and opportunities for the students.

Since 80% of today's youth do not continue through their educational program to receive a bachelor's degree, and since general course programs in secondary schools are not designed to equip students with employable skills, and since few of the secondary schools in the country have a truly comprehensive program, it behooves local educational agencies to examine existing programs and design curricula to better meet future career needs of all the students.

The growing drop-out rate, continuing erosion of the work ethic, disproportional youth unemployment statistics, and increasing crime rate are creating pressure for changes in the public educational system enabling better preparation for adult life.

The structure and staffing of existing guidance departments in secondary schools are well equipped for college placement of students. Pressures for college placement results on counselors together with an unfavorable counselor-pupil ratio have not allowed for adequate counseling services for the non-college bound students.

This void, in our opinion, will best be filled through career education objectives so that students may be better equipped for decision making in occupations with reference to their awareness of their own abilities and interests.

If educators are to prepare people to earn a living, programs must be expanded to reach into the community so as to better relate school activities to the "world of work". This will only be accomplished

by improving communications and cooperation not only with the various manpower agencies, such as the State Employment Agency, but also with labor organizations, business and industry.

Although it is difficult to pinpoint a few sources upon which the project was built, we will try to give a few examples of our sources. The many teachers and administrators have been formulating their suggestions from reading professional journals, attending conferences, and their experiences in dealing with students and the business community.

The following are examples of research that have determined the direction of the proposed project:

1. Initial impetus was derived from a speech at the MTA Convention in October, 1970, by Dr. Melvin Howards and from the publication "Northeastern University Laboratory School Curriculum Educational Component of the Boston Neighborhood Youth Corps", Dr. Melvin Howards, Director.

2. Further impetus was obtained through staff members attendance at the Spring 1971 meeting of the Maine Personnel and Guidance Association, the Governor's Conference on Career Education and the National Association of Secondary Principals.

3. The 1971 Maine State Plan for Vocational Education points out that while 36% of Maine secondary students are in a vocational education program, only 3/100 of 1% of secondary students enter post secondary vocational education.

4. The 3rd and 6th Annual Reports by the National Advisory Council on Vocational Education call for a basic change in education and a change in counseling and guidance services.

5. Meetings with career education exponents from other Maine career education projects, staff representatives from the State Department of Education and Cultural Services, and reports of other New England exemplary career education projects.

6. Consultant services of Alvin N. Johnson and Peter Pellenz of the New England Resource Center for Occupational Education, Newton, Massachusetts.

6.(b) Objectives

The South Portland schools propose a developmental program in career education for grades Kindergarten through 14 with the following objectives included:

<u>Career Awareness</u> (Grades K-6)

1. Students will demonstrate an awareness about themselves and a better understanding of their abilities and interests.

2. Students will demonstrate a greater awareness of the world of work and the 15 occupational clusters.

3. Students will recognize that all work is part of life and important to society.

4. Students will develop a positive attitude toward the work ethic and have respect for others.

Career Orientation and Exploration (Grades 7-9)

1. Students will demonstrate insight into a diversity of career opportunities and their relationship to school subjects.

2. Students will demonstrate awareness of their interests and abilities.

3. Students will be able to describe how a positive attitude toward work improves both personal job satisfaction and quality of product.

4. Students will relate their interests and abilities to possible career selections.

5. As the students complete the orientation segment, they will narrow their tentative career possibilities to three of the 15 USOE job clusters.

6. Students will be involved in exploration through job shadowing.

7. Students will make in-depth analysis of three job clusters of their choice.

8. Students will be administered the General Kuder Preference Record so that they may better evaluate their interests.

9. A differential guidance staff will provide and service a resource center.

Career Preparation (Grades 10-12)

1. Students new to the program will increase self-awareness, orientation, and exploration through individual or small group guidance.

2. Students will use tests such as: Kuder Preference Record - all forms, Holland's Self-Directed Search, or the Strong Vocational Interest Blank.

3. Students expected to drop out will be provided with a variety of vocational training opportunities so they may, upon leaving school, have a salable skill. (Short courses emphasizing immediate job entry skills will be created.)

4. Students will be provided pre-vocational orientation courses in grade 10 in cooperative work-study, distributive education and business education so that they are ready for cooperative placement in grade 11.

5. The placement component will be an integral function of the High School Guidance Department.

6. The High School Guidance Department will assist all students upon leaving school in all job, college and other post high school training and education.

7. The Guidance Department will serve as a clearing house with area businesses and industry for job placement.

8. The placement office in the High School will coordinate its activities with the State Employment Office.

9. The placement office will assist students with part-time and summer employment while they are full-time students with special concern for assisting students in career development.

10. A differentiated guidance staff will have developed and documented guidance services to students.

11. The math, social studies, and English academic course offerings will be developed to focus more on career development and to complement vocational courses.

Program Recycling (Grades 13 and 14)

1. All out-of-school youth and adults will be provided the opportunity to use all high school guidance functions including: testing, vocational investigation, counseling, educational planning assistance, vocational training, and placement.

2. All out-of-school youth and adults will be provided the opportunity for course work in adult education to complete credits for high school graduation, further vocational training or refresher courses, and enrichment courses.

3. The Assistant Director will structure the provision of these services on a regular evening basis and publicize this service through community media.

Using standardized instruments and checklists, the evaluators will determine whether pre-post changes regarding these objectives are statistically significant.

6.(c) Design and Procedures

Design

The overall project provided each student from K-14 developmental activities beginning with self-awareness, awareness of the world of work in K-6, orientation and exploration in grades 7-9, and preparation and placement in grades 10-12. The opportunity was extended in grades 13-14 to supplement or recycle through any of the previous procedural steps.

AWARENESS (Grades K-6)

In order to reach the objectives of career education the elementary segment of the project emphasized the following tenets:

1. Self-awareness helped the students develop a better understanding of their abilities and interests. Career motivation was provided through career education infusion in all areas of the existing elementary curricula. Students investigated career clusters and examined potential satisfactions.

2. Awareness of the world of work generated pupil motivation to obtain occupational and educational information for various careers.

3. Value of work developed a positive attitude toward all work as well as respect for others and their job contributions.

CAREER ORIENTATION AND EXPLORATION (Grades 7-9)

Students were evaluated to determine need for further development in awareness phase of the project. In grades 7 and 8 career orientation was instituted. Specific exploration component was covered in grade 9.

1. Career orientation provided an opportunity for all students to learn about a wide range of career areas with emphasis on the diversity of opportunities and relationship of school offerings to different careers. Students examined each of the 15 USOE clusters of occupations and emphasized career opportunities relating to their own interests. A differentiated guidance staff provided expanded career education services as well as useful supportive materials and resources for classroom teachers. Individual and small group counseling was utilized. Specific activities included field trips to businesses and industries, and use of various A-V and printed materials correlated for easy reference in the junior high Career Guidance Center.

2. Career exploration was placed in grade 9 so that students might be better equipped to make preliminary career decisions prior to academic and pre-vocational course selections in grade 10. Exploration focused on at least three occupational taxonomies, with both observation and hands-on experience available in business and industry, school laboratories, area vocational centers, and/or school classes. Grade 9 students continued in-depth study of specific job clusters and refined study to more specific areas within the cluster. Emphasis was placed on the continuing development of positive attitudes through individual and group counseling, field trips, outside speakers, bulletin boards and occupational educational information.

VOCATIONAL PREPARATION (Grades 10-12)

Opportunities were made for students to spend time, if needed, in the areas of awareness, orientation, and exploration. A continual effort was made through the Guidance Department to provide the services necessary for reasonable career decisions. Counselors helped students develop the academic and vocational courses of studies necessary to meet their goals. Through the differentiated staff, guidance functions were divided into professional and non-professional services so that the guidance assistant and clerk could carry out the non-professional services, leaving more time for the professional counselors to concentrate on individual and group counseling. The addition of a fourth counselor and the guidance assistant greatly increased the availability of career guidance services to each student. The Guidance Department was equipped to meet expanded career education student needs through the addition of the Career Guidance Center. The academic and vocational course offerings at the high school were redesigned to better equip students for career preparation. Two new courses were added in September of 1973 to offer pre-vocational training in cooperative work-study and distributive education. These courses were funded independently of the NEVAMP project, but provided supportive resources for NEVAMP efforts at the high school level.

POST HIGH SCHOOL (Grades 13-14)

Through an expanded Adult Education Program and NEVAMP project funds, all available high school guidance services were offered to out-of-school youth and adults during evening hours. These services included career orientation through the Career Guidance Center, career exploration on small group or individual basis, opportunities for internships, on-the-job training programs and job placement. In addition, the adult education program was expanded through local funding to offer more office skill development courses.

PROFESSIONAL STAFF DEVELOPMENT (K-6)

The elementary curriculum coordinator, in cooperation with the elementary curriculum directors and the NEVAMP Assistant Director, assisted teachers in the development of career educational materials to be integrated as part of the existing curricula, set up and organized in-service training for orientation and staff development in career education, located the areas, organized and supervised field trips, developed supplemental bulletin board and poster materials for use in all elementary schools.

PROFESSIONAL STAFF DEVELOPMENT (7-12)

The secondary curriculum coordinator, in cooperation with the guidance department and the NEVAMP Assistant Director, organized orientation and in-service training for all teachers so that they might become acquainted with career education objectives. Project

personnel helped develop materials to be useful in all subject matter areas. Since all students must take English, math and social studies, the major thrust in curriculum development was placed in these areas. Each year, one department was selected with two experienced, flexible South Portland teachers being freed from their regular classroom duties to serve as curriculum coordinators. Secondary curriculum coordinators developed career education materials and revamped curriculum to be more sensitive to preparing students with an employable skill.

The curriculum coordinators worked closely with the department chairmen and the REVAMP Assistant Director to develop course offerings. In order that career education activities could occur in the classroom prior to this comprehensive revamp, project staff disseminated career education materials generated at other career education sites, and led and coordinated career education modification of existing curriculum.

RESEARCH

The following references and sources were used in formulation of this project:

1. "Glenville Career Development Program" in Cleveland, Ohio.
2. "Maryland Career Development Project"
3. "Cobb County, Georgia Project - A Development Program of Occupational Education"
4. "New Opportunities for Work" in Lewiston, Maine
5. "Maine Career Resource Center Project" in Farmington, Maine
6. Wisconsin VTA System for Adult Education
7. New England Resource Center for Occupational Education

Procedures

In order to meet the objectives in career education, the following procedures were utilized.

CAREER AWARENESS (Grades K-6)

1. An experienced, flexible South Portland elementary teacher, with orientation to career education objectives was given a leave of absence from the classroom and became the elementary curriculum coordinator with 100% of the time devoted to this project. The elementary curriculum coordinator, in collaboration with the elementary curriculum directors and REVAMP Assistant Director, established career awareness emphasis in all areas of the existing elementary curricula. This career education infusion gave positive reinforcement to the concept of selecting careers which would bring satisfaction to the individual, develop motivation for pupils to continue career investigation, and develop a positive attitude toward the work ethic.

2. The first major emphasis was the development of the curriculum. A sequential plan of developing units of studies in career awareness appropriate to the grade level was completed by the elementary curriculum coordinator in conjunction with teachers in the four project schools and the elementary curriculum directors. The elementary curriculum coordinator worked with the assistant director to schedule program consultants, speakers, classroom demonstrators and field trips for a variety of occupations.

3. In order for the project to be effective, provisions were made for the staff of the four project schools to receive orientation to introduce the objectives, scope and sequence of the program. In-service training included review of career awareness guidelines, consideration of evaluation criteria, and study of methods and materials and present sources of information in vocational and occupational areas. The teachers determined their self-awareness and value judgment in relation to the work ethic.

CAREER ORIENTATION (Grade 7-8)

1. A project guidance assistant was added to each junior high guidance staff so that each school would have two full time professional counselors, a REVAMP guidance assistant and a clerk. With this differentiated staff, a re-defining of guidance functions - professional (eg. counseling) or non-professional (eg. receiving vocational and educational information), and utilizing both individual and group counseling, guidance services to students were markedly increased.

2. In grades 7 and 8, students were involved in the orientation to a wide range of career opportunities. Emphasis was placed on the diversity of career opportunities and their relationship to school offerings with activities and experiences in all the employment levels related to the 15 USOE clusters of occupations. The prime responsibility for the career education orientation program fell on each junior high school guidance department, utilizing small and large group instruction, AV aides and materials, various pamphlets and brochures correlated in the Career Guidance Center. The guidance department, in conjunction with the Assistant Director, organized field trips, assembly programs, community consultants and speakers from business and industry. The guidance department, in conjunction with the junior high teachers and administrators, offered 100 hours per year of career education. Each student was assisted, before making high school course selection near the end of grade 8, in completing an analysis work sheet of interests and abilities. This was the responsibility of the guidance department.

CAREER EXPLORATION (Grade 9)

1. Career exploration program elements emphasized experience-centered activities. These included real or vicarious experiences in areas selected by the students, focusing on at least three of the occupational clusters. The exploration offered experiences in business and industry, in school labs and shops, area vocational centers, and school classes. The prime responsibility for the organization of activities was that of the junior high guidance department in conjunction with the Assistant Project Director, with 100 hours per year for each student.

2. In order to develop a more realistic secondary curriculum, one experienced, flexible South Portland junior high teacher (one each year from math, English, social studies) was released from regular classroom duties to develop career education materials for infusion into the curriculum. Academic courses that would better complement vocational training areas in which students had shown an interest were developed. The coordinator, in conjunction with the high school subject career coordinator, department chairmen, and the Project Assistant Director, sought available curriculum materials to be tried with classes to determine the appropriateness of such material. The department chairman and junior and senior high school curriculum coordinators, during the course of the year, compiled course information in outline form so that direction and sample material were ready for the curriculum development workshop during the summer at the close of that school year. Selected teachers from the designated department spent eight weeks under the guidance of the department chairman to complete course guides, select and/or develop the curriculum material necessary. As with career awareness, orientation and in-service training were offered to all junior high school teachers.

CAREER PREPARATION

The high school guidance department and Assistant Director complemented the career education program in the following ways.

1. Grade 10 provided a testing program using either the Kuder Preference Record - all forms, the Strong Vocational Interest Blank or Holland's Self-Directed Search. These tests served as a method of exploration into various areas. The test was also a catalyst for involvement in areas previously unconsidered. In group session counselors interpreted the tests and discussed the meanings of the various interpretations.

   As a follow up, field trips allowed students first hand acquaintance with careers exposed in testing.

   Continuing individual and group counseling was a resource for students.

2. Grade 11 afforded follow up of previous interests to include some degree of participation in the vocations. This was in the form of going to a particular industry for a few days to get an appreciation of a specific job or by doing in-depth research in vocation or profession.

   There was a certain amount of redefining of the curriculum in order to supplement the practical experiences with meaningful academic experiences. This meant the development of mini-courses taught in clusters with a direct relation to the students' vocational interests.

   Continuous individual and group counseling was a method of helping develop a positive attitude toward the world of work. It was most important that students see dignity in all vocations and professions.

3. Grade 12 provided for some, detailed involvement in specific areas of interests. This served as a pre-apprenticeship for some vocations or it served as an actual training period which resulted in regular employment on completion of high school.

   All students were helped in making decisions regarding their post-high school plans. This was the major objective of the guidance department.

   The necessity of a flexible academic schedule was obvious if direct involvement with the world of work were to take place - the degree of flexibility had to extend to evening courses in order to allow students an opportunity to meet all graduation requirements.

4. The placement office was located in the guidance department of the high school and manned by the guidance assistant, under the supervision of the project Assistant Director.

   All guidance and project personnel actively solicited both student and business support for the placement services through letters, bulletin boards, announcements and personal contacts. Since continual personal contact was essential, the project Assistant Director utilized all staff personnel and especially Business Education Department chairman and teachers, Distributive Education and Cooperative Work-Study teachers in maintaining contact with the area businesses.

   Efforts were made in September and October of 1973 to register all interested high school students. In subsequent years, all incoming tenth graders were encouraged to register for part-time employment. The guidance assistant maintained a file of all student registrations, as well as a file of all job openings. Job opportunities were posted on bulletin boards and announced over the school intercom.

All students had been placed in positions, follow up data was gathered from the employer and employee to be used for curriculum evaluation and for future counseling purposes.

PROGRAM RECYCLING (Grades 13-14)

The high school guidance department and the Assistant Director complemented the career education program in the following ways.

1. Entry level business education skill courses were added to evening adult education curriculum under local funding.

2. As a result of the REVAMP program, counselors arranged time in the afternoon for counseling services and helped with job placement. Facilities were also made available Wednesday evenings.

3. High school guidance counselors adopted the philosophy that once students were assigned to them upon entering school, they would remain the counselors of those students whether they stayed in school or dropped out.

Many efforts were made to work with Southern Maine Vocational Technical Institute for a cooperative post-high school program. However, due to Maine's statutory limitations, authority for grades 13-14 is not part of the school system. The career education staff was at a distinct disadvantage in trying to fulfill the obligations stated in the grant requirement. Moreover, S.M.V.T.I. was hampered by budget cuts and extreme budget limitations. South Portland did make a decided effort but was unable to realize any significant results.

METHODS AND MATERIALS

Each of the three secondary schools developed a Career Guidance Center. The junior high centers expanded their existing occupational and educational materials and organized them for easy reference. The junior high centers were a function of the guidance department and were manned by the REVAMP guidance assistant, who was trained in cataloging and use of the material so counselors could be freed for more group and individual counseling. The high school Career Guidance Center was developed as a function of guidance with a wide range of occupational and educational materials catalogued for easy reference. This center also developed a placement service to act as a clearing house for all students, the state employment agency, as well as business and industry. The high school center was manned by the REVAMP guidance assistant.

Career education materials for the regular classrooms were obtained by the project staff and were organized for easy access by the teachers. REVAMP staff personnel also reproduced materials that were not available commercially. Career education materials continued to be gathered from the various career education exemplary projects in the country with the library at New England Resource Center for Occupational Education serving as the prime source.

Students not only received career education information that had been infused into the curricula, but also had opportunities for field trips, outside speakers, assembly programs, on-the-job observation and hands-on experience. High school students had a wider variety of career opportunities with flexibility in scheduling both academic courses and added job taining opportunities.

This project was designed to involve the South Portland staff in all stages of planning and development. It was our conviction that for any long range results all classroom teachers should feel they were a part of the program with opportunities to feed in their ideas and to take advantage of worthwhile in-service training. It should be noted that released time was provided with local funds so that not just the few project personnel received the advantages of visiting other projects, conferences or schools.

SCHOOLS AND LOCATION

All principals in South Portland were asked to discuss career education with their faculty after all teachers received descriptive material on career education and to indicate to the Superintendent whether their staff wished to take part in the project. All three secondary schools (2 junior highs and 1 senior high) were interested in the project. Elementary schools were selected from those that expressed an interest. Care was taken to represent a cross section of the elementary population.

Of the thirteen elementary schools, seven met the criteria needed to be designated as Title I schools under ESEA. With up-to-date statistics developed in June of 1972, all Title I schools had more than 7.8% of their students from low-income families, 9.9% of South Portland children received Aid to Dependent Children, 4.3% received free milk, 8.8% received free or reduced-price lunches, 9.4% of the families fell in low income bracket from the 1970 census, and 2% received free dental clinic services.

South Portland is a suburban community with a balance of industry and housing. Occupations span a wide range from professional to laborers. The city is almost entirely white (95%) with no ethnic group concentration.

Initial population serviced by Project REVAMP in 1973 is charted below:

Name	Grade Level	# Students Enrolled	Tea.	Counselors	Para Prof.
*Dyer School	K-6	287	13		1
Lincoln	K-6	257	14		1
Redbank	K-6	298	15		1

	10-12	1167			
		5011			
Holy Cross	K-6	163	7		1

PARTICIPANTS

Initially 67% of South Portland school students were involved. Addition of remaining elementary schools brought participation to 100%.

Although the one private school in South Portland is not located in any of the elementary school districts included in the project, all opportunities for in-service training of professional staff were extended to the teaching personnel and assistance given by the elementary curriculum coordinator to help prepare materials which the private school might desire.

In addition to the number of public school participants noted above, it is estimated that 50 out-of-school youth and adults were included in the first year of the project. Every effort was made by the existing guidance staff and project personnel to locate any interested persons in South Portland. The 50 out-of-school youth were for the most part part-time or short term students, taking advantage of only the guidance services or one academic course.

6.(d) Results and Accomplishments

Systemwide

Advisory Board

South Portland established a Career Education Advisory Board in July of 1973 to assist in developing a career education plan for grades K-14. This group proved to be the essential component needed to open and maintain channels of communication between business and education.

Meetings were held monthly for the first year of the project. Later the Board met three or four times a year when a need for their services warranted. To meet more often was not feasible.

The primary functions of the Advisory Board were as follows:

1. to be valued consultants.
2. to provide expertise as questions arose.
3. to evaluate the project.
4. to make recommendations to the staff and the Board of Education.
5. to give direction to project programs and activities.
6. to serve as contact people.

CAREER EDUCATION ADVISORY BOARD

DIRECTOR:	George H. MacLeod
ASSISTANT DIRECTOR:	Frederick E. Freise
ELEMENTARY TEACHER:	Carolyn Corcoran, Director of Curriculum
SECONDARY TEACHER:	Carl Miller, Business Education Dept. Chairman

Third Party Evaluators

During the first year of Project REVAMP, the evaluation team consisted of four people who visited once a month and evaluated the entire project. This procedure was changed for the second and third year of the project.

At the beginning of the second year, the responsibility of the evaluation team reflected the four major areas of the project. In this way, the staff worked with the same evaluator in their area and for the entire year. The team consisted of Dr. Richard Gustafson, Assessment of Management and Testing; Dr. Robert Read, Counseling and Placement; and Dr. Arthur Berry, Secondary Curriculum Component and In-Service. Dr. Gustafson had the responsibility of evaluating the Elementary Curriculum Component; Dr. Berry assisted in visiting the elementary schools.

Under the direction of the evaluators, staff members developed a plan of process objectives for the year. This outline indicated intent and procedure and facilitated the work of evaluators at each quarterly session. The assistant director worked from an overall management action chart.

Evaluators' visits were arranged each month according to their planned agenda. As a rule, the evaluators met with the director and assistant director and then with the staff. After the visit a memorandum was sent which documented the observations and findings. This helped bring everyone together and lent more support, solidarity and purpose to their efforts.

Developing a Career Development Design and a Sequential Plan for Career Education

The original framework of South Portland's Project REVAMP was AWARENESS (of self, of world of work, and of value of work), ORIENTATION, EXPLORATION, and PREPARATION. The staff soon discovered that many important goals were missing and that the design must be expanded.

Other projects were examined and over 100 goals and objectives were identified, clustered, and classified. Duplicates were eliminated and new concepts were added. An attempt was made to select goals which

involved the cognitive, affective and psychomotor domains. Finally, in the second year, the eight goals of South Portland's Career Development Design were drafted. (Appendix A)

To provide sequence for the Design, eight goals for each of the four levels were written. These 32 components of the Design determined both the scope and sequence of the career education plan for South Portland.

The next step was to use the Design as a basis for coordinating career education projects. The terms used in this process are defined below:

Goal - A phrase which indicates an educational direction.

General Objective - A general statement which describes more concisely what the intended outcome is to be.

Activity - An educational experience instigated by a teacher for the purpose of changing behavior.

Evaluation - Any method which demonstrates to the teacher that the desired behavior change has occurred.

General objectives were written by the staff. These are subject to future revisions as the concept of career education is infused. The staff and teachers developed classroom activities and teaching units which are keyed to the goals and general objectives. Activities, resources, and evaluations are also included in each unit.

A collection of sample activities appears in the elementary guide Awareness K-6 Revised 1976, the Language Arts Curriculum Guide 7-12, and in math and social studies units developed by South Portland teachers and career education curriculum coordinators.

In-Service

An overview of career education and project objectives was provided by in-service for administrators, counselors and teachers. The activities were broadly defined by the project to include field trips, conferences, workshops, seminars, and university courses. Educators were involved in experiences directly related to their subject areas.

Field Trips offered staff members a clearer understanding of the world of work. They provided information and materials that could be implemented by teachers through curriculum revisions, classroom activities and the Career Guidance Center. Field trips added to the professional growth of teachers.

Conferences involved one or more staff members who attended regional or national meetings related to their areas of interest. These afforded excellent opportunities to exchange ideas and share conference materials with South Portland teachers. In several instances, consultants were brought in to discuss topics of interest with the career education staff.

Workshops enabled teachers to become better informed about career education concepts and to relate this knowledge to classroom activities. These sessions, conducted during vacation periods, released teachers from classroom responsibilities and afforded the opportunity to share with teachers of other disciplines and grade levels.

Miscellaneous in-service activities included discussions, seminars and visits to other projects to develop ideas and improve our career education program.

The following table indicates the total involvement of administrators, counselors, and teachers in in-service activities for the three year period. All events have been thoroughly documented.

	Number	Participants Duplicated Account
Field Trips	48	202
Conferences	15	46
Workshops	45	976
Miscellaneous	19	279
Total In-Service Activities*	127	1503

*Career Guidance Institutes are not included.

Career Guidance Institute

Through the efforts of Fred Freise and the National Alliance of Businessmen, the Career Guidance Institute was established as an important in-service career education activity. The first two years were supported financially by the National Alliance of Businessmen; the third year was completely sponsored by the career education staff and the South Portland School Department.

The purpose of the Institute was to create attitudinal changes and develop insight into the world of work. The Institute was visualized as an in-service activity for educators in the South Portland schools and was designed to enhance their career education program.

A total of 130 South Portland teachers participated in the Career Guidance Institute during the three year period. The course required 60 hours of visitation/workshop time over a six month period. A total of 245 businessmen donated their time and efforts to make the Institute a learning experience for the teachers. The total involvement is shown on the chart on page 25.

Each year thorough documentation appeared in the form of C.G.I. Reports. (Appendix B) Each volume includes school and business participants, pre and post test results, and detailed accounts of visits to schools, business and industry.

Involvement

During the three years of the Career Education Project in South Portland, the primary concern of the Superintendent of Schools, the Project Director, and project personnel has been to actively involve our classroom teachers and curriculum supervisors in the development and implementation of career education in the South Portland school system.

The basic approach was to incorporate career education as an integral part of the existing program by utilizing the South Portland professional staff for development, rather than hiring outside consultants to try to superimpose their program on the South Portland school system. The existing curriculum supervisors played a major role not only in overseeing curriculum development but also in initially defining student needs and establishing short and long range goals. The value of this approach seemed to be more in the attitudinal change on the part of the professional staff as a result of having participated in the process, rather than the products that were developed.

100% of the elementary school students and over 90% of all secondary students were directly involved in at least one career education activity during the three years of the project. Since career education became an integral part of the elementary curriculum and since the classroom teacher and elementary curriculum directors were involved from the beginning in developing the program, we have had 100% participation from elementary staff personnel.

During the three years, 128 secondary teachers of 139 (92%), have been directly involved with career education as a part of their instructional program. A major inservice program, implemented by Mr. Freise, the Assistant Director, has been three Career Guidance Institutes which have involved 130 professional personnel in 60 hours inservice training time.

In order for a Career Education Project to be successful, the business community must be actively involved. As a result of our involvement with the Career Guidance Institutes, 245 business personnel from 95 different companies have donated at least two hours each in working with the 130 professional teachers. For each of the three years, 50 area businesses have each donated a day for a total of 150 man-days to establish an 8th Grade Career Fair. The business community has also donated employees' time of over 1000 days to provide job shadowing opportunities for 9th graders. Personnel Managers of the Greater Portland area have provided mock-interviewing sessions for all seniors during each of the three years, donating over 150 man-days.

With the enthusiasm of the professional staff and the willingness of the business community, we feel that South Portland has an excellent chance of maintaining and improving its career education effort.

Testing

The standardized testing utilized by South Portland at the elementary level was the Career Educator Questionnaire (CEQ) and the Self-Observation Scale (SOS). This test was administered to four project school classes and four non-project school classes, in both the second and fifth grade during the fall of 1974. The post-test was given to the same students as 3rd and 6th graders in the spring of 1976.

At the secondary level, the full battery of the Assessment of Career Development (ACD) was administered to 120 - 8th graders and 125 - 11th graders randomly selected during the fall of 1974. The post-test was administered to the same students in the 9th and 12th grade during the spring of 1976.

Evaluation interpretation of the test results was completed by Dr. Richard Gustafson, our chief third party evaluator, and is included in the third party report.

Documentation

Documentation is essential to an exemplary project and a conscientious effort was made to document all activities and events as they occurred. An Involvement Book contained all pertinent data and was recorded on a daily basis. A few of the documenting forms that were developed and used by the Career Education staff were as follows:

Activity Report Form - a list of classroom activities compiled into a summary of elementary activities by grades and description of activities.

In-Service Form - documentation of all conferences, field trips and workshops.

Dissemination Form - a record of all project visits, presentations, talks, and materials.

Project Visit Evaluation Form - an assessment by visitors to the project.

Dissemination Records Form - an up-to-date tally on all material disseminated.

Workshop Evaluation Form - an appraisal of workshops by participants.

Audio-Visual Evaluation Form - a report on audio-visual materials.

Staff Meetings Form - documentation of all staff meetings.

Teacher Involvement Chart - an account of all teacher Career Education activities and use of the Resource Rooms at the secondary level maintained by the guidance assistants in the Resource Rooms.

Weekly Work Schedules - a list of the schedules of the curriculum coordinators and high school guidance staff.

Junior and Senior High Acitivities Check List - an account of activities, projects involving career education.

Dissemination

The Assistant Director has defined dissemination as any materials which inform others about Project REVAMP or those activities which provide in-service training to parents and professionals. Audiences for dissemination have been categorized South Portland, In State, or Out of State individuals and agencies.

South Portland has maintained a completely open policy on sharing its time and talents when requests have been received.

Two sub-contracts resulting from REVAMP experience were conducted this year. After months of meetings, writing, and revisions, the secondary English coordinator produced the Language Arts Curriculum Guide Grades 7-12. 400 copies have been distributed throughout the state. With the assistance of South Portland educators, the secondary mathematics coordinator provided a series of workshops in Bangor to assist them in implementing a K-12 Career Education Model for Northern Maine. A total of 113 consultant days was provided by South Portland personnel.

Dissemination of Materials

A matrix has been developed for each of these three audience categories which lists the individuals and agencies on the vertical axis, and the various documents which the project has available for dissemination on the horizontal axis (see sample page). Each person or agency receiving a document from the South Portland project is duly recorded in the appropriate cell of the matrix.

Dissemination records can be a relatively simple process with all the necessary facts documented in the following manner:

Preparation of Materials

1.) Assign a number to every article to be disseminated.
2.) List name of article on dissemination chart.
3.) Set up a numerical file corresponding to the chart where a supply of the product to be disseminated is readily available.

Actual Dissemination

1.) Fill in dissemination form with specific data (see sample page).
2.) Record number of articles to be disseminated on chart by category.
3.) Mail or distribute material.

The Career Education Office was responsible for keeping the dissemination chart up to date with the staff feeding information to the office. Although we maintained one list of materials to be disseminated, it would now seem appropriate to have two lists — one for materials actually developed by the South Portland staff, and the other for materials produced outside the project.

The cost of disseminating materials is one of the major problems. This entails reproducing materials as well as paying postage. This can be a substantial amount if the budget has not allowed for such an expenditure. Library postage rates are far less costly when sending material to libraries or educational institutions.

Dissemination of Information

The South Portland career education staff was responsible for disseminating information through presentations, talks, visits to the project, and news media. Requests were forthcoming from schools, the university, parent-teacher clubs, service organizations, state agencies, professional groups, career education projects, the city council, school board, and business groups.

The following chart covers the period from July 1, 1973 to June 30, 1976.

	Organizations or Schools	Number of People	S.P. Staff Involved
Project REVAMP Visitors	28	74	136

Bangor - South Portland

The South Portland sub-contract with Bangor's Comprehensive Career Education Project, under the direction of Dr. Charles Ryan, added a new component to the South Portland program. The $15,002 provided supplies, travel, substitute's pay, and a replacement for the mathematics coordinator. She was kept on the project after 2 years of math revision and career education implementation to coordinate consultants and workshops. Bangor and South Portland staffs agreed to the 14 dates, topics and locations for August through June.

By working with Bangor, South Portland was able to save them much time in research and implementation. It was natural to wonder how much more could have been accomplished if another school system had been available to model for South Portland in 1973-74.

Bangor and South Portland are similar in school enrollment, business community accessibility, sociologically and economically. This certainly enhanced the success of the model strategy. The workshop strategy of theory-practicum combination was excellent. The three pronged state, university and school system approach touched all components to establish a uniform concept of career education and a process of implementation throughout the state.

Bangor was definitely not the only school system which benefited from this exchange. The staff was most generous in welcoming guests to their workshops. State Department Education personnel and surrounding community educators attended regularly. These state and university components will have a great influence throughout Maine.

All South Portland-prepared workshop materials were used for both school systems. Either the material was in existence due to previous South Portland implementation, or having devised presentations especially for Bangor, these materials were then disseminated to South Portland teachers.

South Portland, through this contract, had the means to acknowledge the hard work and professionalism of some of its many excellent teachers. Their commitment to career education was reaffirmed as a result of their participation.

The future of career education in Bangor rests in many areas. Without doubt, project teachers have experienced a growing commitment, and career education will remain an integral part of their teaching.

Vital to the success of any educational process are two factors - a united, dedicated teaching force and openly supportive administrators. Each building principal is the key to positive, comfortable feelings teachers have concerning their activities and ideas. Continued staffing, perhaps reduced in number from the original career education staff, is necessary. Bangor still needs people and time to organize and disseminate project ideas and materials. Under the direction of a career education staff, this year 33 Bangor participants will now be able to

model for the remainder of the Bangor staff. A great deal of time and organization is necessary to represent all career education elements in each subject area and at all grade levels. This is no easy chore, but it is a must in thoroughly orienting educators to the goals, objectives and implementation of career education.

Sincerest thanks and congratulations are due Dr. Ryan for devising this most creditable plan for Maine. The Bangor Board of Education is to be commended for their support of this program. Dr. Miller's organizational talent and consistent concern have been significant factors in the success of the workshops and overall project. Phil Gonyar's dedication and concern go a long way in the present and future plans for career education in Bangor.

None Thompson has been a competent, conscientious leader in Bangor. The card from her own project teachers says it perfectly, "Without you, we would never have been so infused.....or enthused!" Bangor owes her a debt of gratitude for her totally professional manner. She has been a constant source of inspiration and encouragement to the project teachers.

All in all, Bangor has had a consistently hard working team. Personally and professionally, it has been a privilege to work with them. I extend my sincerest thanks to the South Portland and the Bangor Board of Education and administrators for allowing me this opportunity.

SOUTH PORTLAND PERSONNEL CONSULTANT DAYS

PART I

Overall participation of South Portland personnel is summed up in the following charts.

A. Total South Portland Consultant Days

First Half Year		Second Half Year	
In South Portland	16	In South Portland	—
In Bangor	56	In Bangor	29 + 1 student
At University	7	At University	4
	79		33 + 1 student

Total - 112 South Portland personnel and 1 South Portland student

B. Tally of Different South Portland Personnel

First Half - 36 different South Portland staff members

4 Administrators	8 Career Education Staff	5 Counselors
12 Elementary teachers	7 Secondary teachers	

Second Half - 22 different South Portland staff members and one student

1 Administrator	4 Career Education Staff	1 Counselor
10 Elementary teachers	6 Secondary teachers	1 Student

Total - 52 different South Portland staff members

4 Administrators	8 Career Education Staff	6 Counselors
21 Elementary teachers	13 Secondary teachers	

Community Resource File

The mechanics for establishing a Community Resource File were accomplished at the elementary level with the assistance of the head librarian. Two standardized forms were developed - Resource Form and Activity Form. The librarian will be responsible for the up-dating of this file as teachers make use of parents and community members who have expressed a willingness to visit schools.

At the secondary level, a resource file was developed for teacher and student use. The booklet, entitled, SIFTED, lists people who give their time to projects and activities. (Appendix C) Their services are keyed to the title SIFTED: Shadowing, Interviewing, Field Trips, Talks, Educational Materials and Demonstrations. These booklets will be kept in the Career Guidance Center. Responsibility for continuance of the file remains with the guidance assistant.

Elementary Curriculum

At the conclusion of three years of career education under Project REVAMP, we believe that the high degree of success achieved is due to the following people.

1. Curriculum Directors
2. Principals
3. Library Staff
4. Teachers
5. Parents and Business Persons
6. Evaluation Team

Curriculum Directors

From the beginning, the administration gave full support to career education. The three elementary curriculum directors met regularly with the career education staff developing curriculum goals and units to assure a unified philosophy and a sequential development throughout the system. Without adding a new subject, career education was infused into the existing elementary curriculum. The curriculum directors played a key role in that process.

Principals

The principals were consulted regularly and were included in the decision making process whenever possible. Their commitment inspired the teachers to a high degree of involvement.

Library Staff

The elementary library staff informed themselves about career education and assisted the teachers in locating and ordering materials on self and career awareness. They prepared a list of library holdings in these fields and introduced the teachers to them at a workshop.

Teachers

The teachers are the backbone of any educational innovation, and without their cooperation, there can be no implementation. During Project REVAMP, 100% of South Portland's elementary teachers held career education activities in their classrooms. This high degree of involvement results from the strong orientation and support given the teachers. All teachers attended the two required workshops each year. Many other opportunities were provided for the teachers to participate voluntarily in curriculum development and career education courses.

Support was given to the teachers by the curriculum coordinator who had herself been a classroom teacher in the system for 9 years. A non-threatening relationship was established as the coordinator visited each school on a regular basis to consult informally with the teachers to help locate resources and to make activity suggestions. Further support and encouragement were also given by the curriculum directors and principals as they worked with the teachers.

Parents and Business Persons

Through informal contacts and the Parent Survey, the school has made use of the talents and resources of people and businesses in the area. These volunteers have enriched the educational experiences of our students.

Evaluation Team

Much credit for the success of the elementary component is due to the fine relationship between our staff and the MEDCOE evaluation

team. The evaluators often acted as consultants, giving thoughtful suggestions and offering encouragement. Being an exemplary project can be a lonely and awesome responsibility. The evaluators, John Faust and Dr. Richard Gustafson, were friendly guides.

The results and accomplishments for the elementary component of the project may be listed in the following areas:

1. Curriculum Development
2. Inservice
3. Teacher Resource
4. Documentation
5. Personal Growth
6. Dissemination
7. Testing
8. Continuation

Curriculum Development

In close cooperation with the elementary curriculum directors, a teachers' guide was written during the first year of the project. Later, a sequential plan was developed and the guide was revised to correlate with the plan. Twenty-six teachers worked in two separate semester workshops to develop materials for the guides. All teachers in the system kept records of their activities and many of these were incorporated into the guide. The curriculum directors and the school superintendent wrote the philosophy and did the final editing of the guides. Copies of the revised guide will be distributed to the teachers next fall. (Appendix D)

Inservice

During the first two years of the project, four elementary schools with 50 teachers were involved. In the third year, all twelve public schools and one parochial school were included. Every year workshops were held to meet the needs of the teachers in these schools. The workshops were on: an orientation to career education; methods for the teaching of values, decision making, psychomotor skills, and work awareness; the use of career education resource materials, video tape, and ITV; the business community; and curriculum development.

In the third year of the project, South Portland teachers led their own workshops and shared their experiences with one another. A number of teachers traveled to Bangor or welcomed Bangor teachers into their classrooms. One hundred and twelve presentations and demonstration lessons were made by South Portland elementary teachers this year. Dissemination of this kind proved to be an excellent form of inservice for the participating teachers.

Third Year Teacher Involvement in Inservice/Dissemination

October 9 Workshop Presenters	17
March 9 Workshop Precenters	40
Bangor Presenters	21
Bangor Demonstration Lessons	32
Other Maine Presenters	2
	112

Teacher Resource

The curriculum coordinator visited the teachers in the four project schools every week during the first two years of the project for the purpose of disseminating ideas, assisting with resources, photography and video tape. In the third year, all twelve schools and the parochial school were visited less frequently, but on a regular basis for three months. Although the four project schools received little support from the coordinator during the third year, they continued with a high level of activity. The new project schools amazed everyone with the speed and extent of their orientation and involvement.

A Parent Survey was conducted in all the schools to identify persons and places to be used as resources.

A Community Resource File is partly completed. This file is maintained by the library staff and is used by the classroom teacher to locate persons, field trips, and free materials. Information on the Parent Survey and the Community Resource File is in the revised guide.

Documentation

During the second and third years of the project, classroom activities were reported and documented each quarter. A summary shows that 100% of the teachers participated each year in a wide variety of activities in the three areas: self awareness, work awareness and the value of work.

Anecdotal records of comments made by teachers, students, administrators, and parents show an enthusiastic support of the program. Other documentation of teacher workshops and pupil activities has been made with video tape, 8mm film, slides, and photographs.

Personal Growth

The curriculum coordinator was a participant in Dr. Kenneth Hoyt's Ohio mini-conference, is a member of the State Planning Board for the Houston Conference, has served as a reader for state career education projects, and is a member of an evaluation team for the Berwick project. She has attended the CGI three years, taken courses in career education and elementary guidance, and has both attended and directed numerous workshops on career education.

Dissemination

Information about Project REVAMP has been disseminated in a variety of ways. Presentations have been made with other members of the staff. These have been presented to parent and civic groups, and to schools in and out of Maine. We have served as consultants to visitors from other schools. News media have carried stories of elementary activities. The original teachers' guide in its complete and abbreviated forms has been distributed to educators all over the country. In the third year of the project, the responsibility for dissemination has been assumed largely by the curriculum directors, the principals, and the teachers.

Testing

Pre and post tests were administered to project and control groups in the 2nd and 5th grades in December 1974 and to the same children in the 3rd and 6th grades in March of 1976. The work awareness test showed growth in both groups, especially in the project schools. The self awareness test showed lower scores in the post test in both groups. Informal assessments made in interviews with teachers and pupils showed an improvement in attitudes of the students, however.

Anecdotal records are kept in each pupil's permanent record folder. Pupils and teachers, together, record the child's interests, strengths, and career preferences (if any) on a "C" sheet. This ongoing record may serve as a resource to high school guidance personnel.

Continuation

We are assured that career education will continue in the years to come. Mrs. Carolyn Corcoran, Director of Curriculum, has been assigned responsibility for elementary career education. She will provide inservice training for the teachers and continue with the curriculum revisions. An aide has been hired to serve as a resource to the teachers and to assist Mrs. Corcoran. The librarians will continue to circulate resource materials in career education. They will also keep the Community Resource File, located in each library, up to date. The principals with the curriculum director will offer support to the classroom teachers. The Revised Guide, in loose-leaf form, to allow for future revisions, will be distributed to each teacher in September. It will be a tool for continued implementation. We are confident that career education will not die in South Portland. It is not in the hardware that can break down, or in personalities who will leave the system, but it is a concept in the minds of the teachers and at the core of the renewed curriculum.

On June 28, 1976, members of the South Portland School Department were participants in the National Elementary Guidance Conference held at the University of Maine at Orono.

Carolyn Corcoran, Director of Curriculum (grades 5-6) presented an overview of the philosophy and career development design. Ruth Roberts, Elementary Career Education Coordinator, presented slides depicting activities related to the eight goals of the program. Mr. Andre Hamond, Head of the Guidance Department, shared with the group the changes in the philosophy of the guidance program in South Portland and Rose Athas, a classroom teacher, talked with counselors and teachers about the activities she had used with her own class.

Dr. Kenneth Hoyt, National Director for Career Education, was presented with the revised South Portland Career Education Guide by John Seekins, Jr., Superintendent of Schools. Dr. Hoyt made the following statements: (1) listen to what these people are saying — they have no elementary guidance counselor yet they have proven that with realistic goals, instruction in achieving these goals and the cooperation of the administration and staff the necessity for an elementary guidance counselor has gone; (2) the classroom teacher with day to day concern and involvement is the needed ingredient for bringing about change in student attitude and directing the student toward future success and (3) the time has come for guidance counselors to forget the importance of their title as a status symbol and take advantage of the resource which is at their disposal, the classroom teacher. Their time could be much better spent by working with and training teachers effectively if they wish to ensure their survival.

Secondary Curriculum Coordinators - Grades 7-12

As indicated in the project design, the secondary curriculum coordinators worked closely with the department chairmen and REVAMP Director to develop course offerings. Studies of the existing South Portland secondary programs and those of other schools led to a modification of the courses of study.

Each year two teachers were released from the classroom, one from the junior high and one from the senior high to review the math, English and social studies programs. They carried out the duties assigned in the project design:

1. Assess the needs of the academic curriculum 7-12 through a survey of parents, teachers, students, business, and industry.

2. Revise the course offerings and infuse Career Education into courses after a study of resource areas, schools, vocational education areas, libraries, and colleges.

3. Seek personal growth and development by attending meetings, institutes and conferences pertaining to curriculum and Career Education.

4. Assist in planning and carrying out Career Education in-service training for secondary teachers and aid the Guidance Department in planning and scheduling demonstrations, consultants, and field trips.

5. Research and purchase upon teacher evaluation and recommendation, texts and materials to complement the established and revised courses.

South Portland Curriculum Revision Process

The culmination of these activities was a list of recommendations submitted to the South Portland Board of Education. Approval was granted after necessary modifications were made. The implementation of the various courses now becomes the responsibility of the department chairmen and associate department heads.

Mathematics 1973-76

The math department - first of three to undergo curriculum revision through Project REVAMP - deserves credit as a pioneer in career education infusion. Charged with the specific duty of reviewing the existing math program to determine its relevance for all students, the secondary coordinators were admonished about past curriculum committee pitfalls. Highest on the list was that courses for either the exceptionally gifted or slow learners seemed to have received most attention. Yet programs for the general/vocational students had unintentionally received much less time and concern. Also, coordinators were urged to make math offerings useful by consulting parents, students, and businesses as well as educators for input prior to final recommendations. The majority of changes did take place in the designated general/vocational area.

As determined in the Secondary Mathematics Curriculum Recommendations of March 1, 1974, and Secondary Mathematics Revision Follow-up of May 16, 1976, Phase II math implementations have progressed according to schedule.

With emphasis on basic math skills in grades seven and eight, continued infusion of career education concepts saw more bankers, insurance and real estate agents, credit union representatives, cash registers, social security and income tax materials in the classrooms.

Algebra I, part 1, remained successful at the ninth grade level. Enrollment at the two junior high schools for 1975-76 was 92 students. The projected enrollment for 1976-77 is 128 students. To balance the amount of material presently included in Algebra I, part 1, and Algebra I, part 2, one chapter of the part 2 text will be covered in part 1. All junior and senior high teachers involved agreed this would enhance success for the part 2 students without deterring that of part 1 students.

Consumer A and Technical Mathematics offerings for 9th and 10th graders have nearly completed a second year with three classes, 42 students, and 2 classes, 37 students, respectively at the junior highs. At the high school a total of 40 students are enrolled in two Consumer A classes and 21 students in one Technical Math class. Meetings with present and former instructors of these courses were valuable and productive. As originally intended, consumer/tech courses were designed to meet student interest as well as need. A stereotyping has arisen resulting in all male or all female class populations. Since both courses include a first half year of basic math review, followed by a half year of consumer or technical math applications, principals are being requested to block these courses back to back, intermingling the consumer and technical math students.

The first half year will be the same for all groups: basic math review, one consumer unit, and one technical unit. At the half year students will choose the final semester of consumer or technical math. Along with clinching the interest factor, it is hoped the stereotyping situation might be eliminated. The combined materials of the three consumer math teachers identified the goals and content for Consumer A, and have firmed the Consumer B course for 1976-77.

This year's Technical Algebra I students progressed with less disruption caused by the first year's misunderstanding of course difficulty. As originally indicated, Technical Algebra I is of equal difficulty to Algebra I.

The natural progression of Applied Algebra I and Technical Algebra II from Technical Math and Technical Algebra I, respectively, ran with little difficulty this year. Two classes of Applied Algebra had a total enrollment of 42 students, Technical Algebra II, 19.

At present it has been determined that all the courses will be offered next year with the exception of Technical Algebra III. The recent tabulation indicated only four students signed up for September 1976. They will have the opportunity to complete this course as independent study.

Of the 21 math teachers, grades 7-12, slated for the 1976-77 school year, over 70% have participated in at least one of the RMVAMP math workshops. Ten of the department members will have taught or be teaching one of the new courses. These concerned, conscientious and competent individuals will continue revision and involvement.

The past three years have been times of constructive self criticism and evaluation within the secondary mathematics department. Channels of communication and cooperation have opened up and flourished. The best possible education for all students comes when educators constantly review the offerings of their curriculum. Since some courses have now almost completed a second full year, meetings have come a long way from the time when course projections were identified from research and theory. Teachers are now talking from experience, and each has valuable views to contribute. South Portland draws heavily on that experience with students, to evaluate and redesign curriculum, so that it most appropriately meets the needs of all students.

The key question is: "What are we doing for students?" The answer is: "Trying to provide the best possible education to meet each student's needs, interests, and abilities." South Portland strives for good education. Therefore, curriculum evaluation and revision is a never ending process, and South Portland is fortunate to have the teachers who will meet that challenge.

During the three year revision and implementation period valuable factors in the math and overall career education program successes were the wise guidance of Dr. Arthur Berry, secondary curriculum evaluator, the inimitable aid of the PRIME Resource Center staff and the supportive backing of South Portland administrators and Board of Education.

English 1974-76

The curriculum coordinators for English were fortunate to have served on the career education staff for two years. The charge had been to affect a change in education in South Portland. Granted, interest in career education was slow in coming to many and granted, all have not yet accepted the career education philosophy. Yet, we believe changes did occur and career education did make a difference both to teachers and to students.

Before working with teachers, we began a learning process - gathering information from the math and elementary coordinators who shared all they had gained the previous year. Our project evaluator, Dr. Arthur Berry, provided a valuable lesson in creating a process chart. Research was vital to our endeavor. We found microfiche at the State Library, guides at the State Curriculum Office, professional books at college libraries, films and other materials at Prime Resource Center.

We then sought teacher involvement. We suggested that such involvement meant sharing. To accomplish our purpose, we offered the option of meetings - individual, small group or departmental. Teachers new to South Portland and those with long years of experience participated. Workshops were held during school vacations and in the summer. Teachers received $15 a day to work together to develop units to be tested in the classroom. Attendance at other workshops - Career Guidance Institutes - led to increased understanding of the relationship between school and community.

Did students benefit from the changes brought by career education? Teachers, acknowledging that others could assist in teaching, opened their classrooms. "Book Fair - A Community Resource" was a project designed to make the best use of facilities in the local area. "Lifestyles" introduced students to people following a unique way of life. Career education can be awareness of one's own talents as was demonstrated in "Self and Career Exploration". Students taught both teachers and classmates in this project. A career education course required of all ninth grade students - taught differently at each junior high - has been approved by the Board of Education. Although teachers of other disciplines have assisted in teaching this course, it was originally a recommendation of the English coordinators.

Nowhere has the change for students been more in evidence than in the phase elective course offerings at the high school. Work in this area began shortly before career education came to South Portland. Yet it was coordinators - math and English - who helped with course outlines, research, microfiche searches and community resources. The folklore and film study courses received much time, attention and support from many of the career education staff.

The guidance and English departments have worked closely together. Career Fair, the ninth grade course, Senior Day - all attest to the cooperative ventures of these two departments.

In the spring of the first year of the project, a Language Arts Curriculum Guide - Grades 7-9 was published. Later a grant was made possible through the cooperative efforts of the project director, assistant director and Dr. Charles Ryan of the University of Maine. The project title, "Integration of the Career Education Concepts into the Secondary English Curriculum", indicates the task assigned. Funding was provided for a teacher replacement who made it possible for one coordinator to be released from the classroom for a second year. Another coordinator, Sarah Lee Wright, although unable to complete her work, made a major contribution to the Language Arts Curriculum Guide - Grades 7-12. Her commitment to her work, her gift for writing and her belief in career education are reflected in the Guide. (Appendix E)

Social Studies

Two social studies teachers were released from the classroom, one from a junior high and one from the senior high, to review the social studies curriculum. Multiple goals included denoting and reinforcing present strengths, discovering and dealing with current weaknesses, and infusing career education.

The process to achieve these goals included: 1) conducting a needs assessment; 2) creating a new curriculum based on the results of the needs assessment; 3) broadening the outlook of the coordinators by attending meetings, institutes and conferences and by much personal study in order to best devise a new curriculum; and 4) providing workshops for social studies teachers to become familiar with new areas of concern such as moral reasoning and career education, and to participate in the creation of the new curriculum offerings.

The coordinators were very much concerned with developing students' skills, values and attitudes, and enlarging the repertoire of teachers by expanding teacher methodology.

A social studies skills sheet was devised that breaks down skills into various categories, tells when each of the skills should be introduced in the school system, should be reinforced, etc. The coordinators also provided all social studies teachers with practical suggestions as to how these skills can be built and reinforced.

In regards to values and attitudes, the coordinators discovered and brought to the attention of all social studies' teachers, Kohlberg's system of moral reasoning. A workshop, meetings, and much material were provided teachers by the coordinators for them to be able to utilize this approach within their classrooms in order to help students reach higher stages of moral reasoning.

Teacher methodology was a major concern of coordinators and teachers. The coordinators provided a great number of suggestions for different approaches and also ran workshops where teachers could share ideas and work together to create different methods for making their classes more interesting and valuable.

A social studies notebook was compiled by the coordinators for each member of the social studies department, grades seven through twelve. The notebook includes virtually everything of value discovered or created by the coordinators during the course of the year. This brings together in one place the fruits of this years labor and provides a basis for the continued building of a superior social studies program.

Recommendations:

1. It is recommended that the work done by the coordinator be furthered over the year by continuing the momentum created. This means the high school department chairman and the junior high associate department chairmen provide social studies' teachers with the opportunities to get together periodically for purposes of sharing ideas and problems.

2. It is recommended that people from within the system be used for curriculum study and revising because they are familiar with local needs and conditions but that they endeavor to expand their horizons as fully as possible by attending conferences, workshops, etc., that will provide further new approaches, ideas and concepts that may be applied locally.

Miscellaneous 1973-76

As soon as school started in September 1973, it was obvious that career education activities would be limited not only to the mathematics department. Interest was high with many individuals in all of the secondary departments. Though time for the coordinators was spread very thinly, every request and concern stated by any South Portland school department personnel was promptly supported and acted upon by the coordinators. For three years the coordinators' services were available to all teachers.

Materials, speaker, or field trips have been arranged for math, English, social studies, science, home economics, industrial arts, career education, art, business education, work study, distributive education, first aid, French and health classes. These experiences and resources served as a basis when the math and English coordinators worked with the assistant director to organize SIFTED. This directory will be basic to the future of career education in South Portland.

An excellent aid for all disciplines was free loan films. Many agencies distribute worthwhile films to schools. PRIME Resource Center was a treasure to work with and South Portland owes much to their dedicated staff and up-to-date facilities.

The second free loan film/filmstrip arrangement was preview of commercial materials for purchase. Evaluation forms prepared by PRIME

were superb for maintaining accurate recommendation records. Teachers were honest in their evaluations and appreciative of the convenience of testing materials, since coordinators ordered, circulated and returned materials for them. When funds were available, there was an accurate report on materials worth buying. Following this procedure, a school system has a better assurance that materials will be used.

The math coordinator worked with all three guidance assistants to devise an appropriate teacher talent survey. A great number of teachers responded positively to sharing their backgrounds and experiences in special areas should any teacher desire class presentations.

Working with the guidance assistants, the math coordinator provided workshop orientation, in the use of cameras, slide and super 8 talkie, and the video tape equipment.

The high school guidance assistant and math coordinator opened career resources to all subject areas through the Career Days programs. Each month jobs from two of the 15 USOE job clusters were highlighted. Teachers attended with classes on a volunteer basis.

Career education has prompted educators to utilize the news media to make the community aware of classroom activities. The career education staff assisted many teachers in contacting television and newspaper personnel. This has been successful in projecting a favorable image towards education.

The following chart gives an indication of time spent each month with South Portland counselors and teachers individually and in small groups for program planning. Time period is the school months January 1975 to April 1976.*

Month	Meetings	No. Different Individuals
January	45	25
February	28	25
March	30	22
April	26	18
September	23	20
October	26	15
November	10	9
December	4	7
January	7	20
February	10	6
March	14	6
April	17	20

*These figures do not include the meetings held for Bangor workshops or the countless telephone conversations.

Secondary Guidance

Prior to Project REVAMP, the South Portland guidance department delivered most of its student-centered services on a one to one basis. Neither the guidance services nor the spheres of counselor influence were well defined. Though follow-up studies were an integral part of the services, tabulations were not used to promote program revision. Entry level and immediate full and part-time job placement were not given the same emphasis as was placed on post secondary educational placement.

Curriculum revision and the gradual change to elective programs required a more thorough understanding of the various disciplines. Since a wide variety of courses were developed to meet the needs and career interests of all students the counselors identified their responsibility to attend department meetings in all subject areas. Counselors cover the subjects related to their academic backgrounds. A further result was a closer cooperative effort among parents, students, and counselor.

Needs Assessment

The guidance and counseling department of South Portland was identified as a critical component in the overall approach to career education. If counselors were to make a significant difference in the lives of students, it was essential that a needs assessment survey, based on students' needs, be taken. This was accomplished by conducting the following tests and surveys:

1. 10th grade student survey
2. College Board ATP Summary Reports
3. Assessment of Career Development Test (ACD)
4. Follow-up for South Portland Class of 1969 and 1974
5. Senior Survey Class 1975
6. Health Workshop Evaluation
7. Career Resource Room Follow-up

Results indicated 63% of our students indicated need in improving study skills, 89% need help in making career plans, 61% indicated need for help in obtaining money for education.

In order to best serve these needs, the guidance staff devised a plan of action covering self-awareness and interpersonal relationships, decision making and goal setting, career and educational planning and placement. Each of these respectively took up 31.5%, 26%, 31.5% and 10% of each counselor's time. In order to reach all students the means of delivery and percentage of time spent was: one to one 24%, small groups (6 to 12 students) 43.5% and large groups 31.5%. These figures add to 99% because 1% of counselor time is addressed to "non-people" duties. Some of the programs initiated to meet the four objectives are Career Fair, Job Shadowing, Senior Day, Career Days, workshops on social issues such as venereal disease and alcoholism, sophomore decision making unit and extended testing program.

In addition to Career Guidance Center facilities, a high school classroom has been turned over to guidance. These accommodations were primary in facilitating small and large group sessions.

Guidance Design

Project REVAMP expanded guidance services in a number of ways. It provided an additional counselor at the high school. Rather than have this individual identified as "the career education counselor", the guidance staff shared the career education responsibility for all students. Total commitment was indicated by 100% counselor participation in the Career Guidance Institutes. Guidance personnel addressed themselves to the following four areas: (1) development of the Career Guidance Centers, (2) establishment of formal placement services, (3) better use of community resources, and (4) expansion of survey and follow-up studies.

Career Guidance Centers were established in all three secondary schools. Each was staffed by a guidance assistant who oriented teachers and students to the Centers and made them aware of the materials and services provided there. The assistant also had the responsibility for maintaining current career information. Other tasks included assisting in special career education projects, publishing newsletters, arranging for speakers, organizing film festivals and creating career displays. Junior high assistants developed student organizations called K.R.O.W. Club (work spelled backwards) and J.A.W.S. Corps (Jobs, Attitudes, Work Skills).

A formal placement service for full time and part-time jobs was initiated. In the junior highs, this service was negligible because of the age factor. In order to encourage the work attitude and ethic, volunteer programs were promoted at this level. At the senior high, the job bank is an integral part of the Career Guidance Center. It is used extensively by members of the student body as well as alumni. The community is well aware of the job bank. Because job offerings called in by employers are expedited efficiently, members of the business community avail themselves of this service on a regular basis.

Students are introduced to the world of work by use of community resources: Career Fair, job shadowing, a ninth grade career education course, Senior Day, Career Days, and field trips to explore vocational options.

Career Fair

"Exploring the World of Work" has been the theme of the Career Fair designed for eighth grade students. Each year over fifty exhibitors demonstrated or simulated their skills for students and teachers during the day and for students with parents in the evening. English teachers assisted guidance in orientation and evaluation activities with students.

Job Shadowing

In the first two years of Project REVAMP, job shadowing was the joint effort of the guidance and English departments. During the third year it was incorporated into the ninth grade career education course. The project again demonstrated that the business community can assist the school in offering exploration. Shadowing at the junior high level has been a requirement. At the high school it is optional and carried out on an individual basis.

Senior Career Day

The guidance department initiated a program to involve all seniors in interviewing sessions with local professional personnel people. In English classes, counselors conducted discussions and role playing exercises on interviewing techniques. English teachers assisted students in writing resumes. Students selected for interviews representatives of business, education, Armed Services and apprenticeship programs. Each student had the best of personnel to be found in the local area.

Surveys and follow up studies identified in the needs assessment narrative above were conducted. Dr. Robert Read, the guidance evaluator, was an immense help in this area. The various questionnaires were gathered from several different student sources.

Parent Student Handbook for Career Guidance

The guidance handbook was created out of the need to interpret for parents and students the many facets of the guidance program. The sequential design indicates the scope - ranging from junior high orientation through the testing program to senior high vocational and educational options. (Appendix F) The production of the Handbook was a lengthy process. The first draft was a compilation of data submitted by all counselors. After substantial revision by the Director of Guidance and the English curriculum coordinator, the Parent Student Guidance Handbook was completed in the third year of the project.

6.(f) Conclusions

Members of the Board of Education have given their continued support to the project. The Director, in writing the original proposal, reflected those things recommended by the staff. The goals were theirs, not his. More than anyone else, the Assistant Director was responsible for the openness between the school system and the business community. Evaluators developed a good working relationship with staff members. The support of the advisory committee has been an asset; their assistance has been valuable in showing the means for the best use of business and industry.

In the approved budget for 1976-77, although the Board of Education was forced to cut $558,000, they have included an excess of $30,000

to continue career education in South Portland. Fourth year continuance provided for guidance counselor, 3 guidance assistants and an elementary teacher assistant.

When the first edition of the elementary handbook was being written, all projects were developed from classroom activities. Since that time, a gradual evolution has taken place. Philosophy became the focus and career education became truly infused.

Since all three elementary curriculum directors worked so closely with the elementary coordinator, the Career Awareness Handbook now becomes their responsibility.

Teachers in South Portland were released from classes to serve as coordinators and to infuse career education into academic subjects. All coordinators - elementary and secondary - worked in the same area. This provided support for all members and offered a greater chance for K-12 coordination. Continuity was assured because there were few personnel changes.

There has been a gradual increase in the number of teachers being involved. Rather than being offered a finished product in which they had no participation, their involvement was sought and their contributions were major. A pronounced attitudinal change has been noted in teachers who participated in the three Career Guidance Institutes.

Students have recognized that career education is important. They feel someone has an interest in them. Moreover, they have been offered career options. After three years they have said, "We hope South Portland continues the career education programs."

Changes in curriculum revision have been real, not superficial. The Board of Education will require follow-up studies of revisions made. All handbooks and guides have been produced in loose-leaf form to facilitate change.

Guidance has offered services to fit student needs which were expressed in student surveys.

Guidance services have been more clearly defined and the direction of the guidance staff has been moving more steadily toward the implementation of major program objectives. A better utilization of time has resulted.

The fact that the Career Guidance Room was established beside the offices of counselors brought students to guidance for other than crisis counseling. This increased voluntary student interest. Locating the Centers next to guidance offices made it imperative for counselors to gain greater knowledge of vocational information.

If career education is to continue to succeed there must be a cooperative effort - parents, teachers, students and the community. Open communication must continue between elementary and secondary as well as between academic departments.

6.(f) Recommendations

It is recommended that the local school system:

- retain Fred Freise as Career Education Assistant Director. A school system requires a person who will coordinate career education activities. Through his efforts, over 300 teachers and 250 business people have been brought together repeatedly for the benefit of students. His sincerity and firm belief in what he is doing have caused the business community to respond to his requests as they would to few others. In order to maintain this rapport, he should be named Career Education Assistant Director.

- provide a more realistic balance of instruction acknowledging the affective and psychomotor as well as the cognitive domain. For years education has directed its attention to the academic understanding of the child. As teachers have applied the training gained in the affective and psychomotor workshops the past three years, more students have experienced success. Results have been equally pleasing to students, parents, and teachers.

- limit the number of on-site visitation days and determine the maximum number of presentations within a designated length of time. Upon accepting federal funds, a project is justifiably bound to aid other school systems. South Portland carried out a completely open policy in this area. REVAMP staff was heavily taxed as indicated under Dissemination in 6.(d) of this report. Personnel would be protected if a policy were determined and maintained from the outset.

- charge the department chairmen and associate department heads with the responsibility of implementing the approved curriculum revisions. Each department will determine a system of record keeping to assure that all eight goals of career education are infused. This will be used in conjunction with the plan of internal and annual review and the evaluation of new and revised courses required by the Board of Education and the school administration.

It is recommended that the State Department of Education:

- assume the leadership, with the assistance of a successful project such as REVAMP, to coordinate a systematic state-wide implementation of career education. The second and third year of Project REVAMP realized a close working relationship between a local and state Department of Education. Fred Freise and George MacLeod served as members of the State Task Force for establishing a state plan for career education. Mr. MacLeod and the South Portland English coordinator for career education wrote the budget and proposal for a revised plan.

- serve as a clearing house for career education materials. Using feedback from local systems, the State Department would coordinate and disseminate current career education information. Their contacts with other states would further benefit local school systems.

It is recommended that the Career Education Office of the USOE:

- exclude in special cases the grades 13-14 requirement in career education proposals. In states where grades 13 and 14 are not a legislated component of public schools, applicants for career education funds should not be required to include these grades in their programs. There exist no authority, staff facilities or channels of communication available to create meaningful outcomes at this level.

- screen proposals for adequate budgeting of clerical assistance. Readers of projects should be concerned that applicants include sufficient clerical staffing. Within three months of the start of Project REVAMP, our error was obvious. There was no way the original clerical staff, however skilled, could have completed the work demanded by the project.

- assign increasing annual budgets to three year projects. When funds for that time period are granted, the Career Education Office should schedule an approximate cost of living increase each year. Inflation cut so drastically into expenses that some aspects of the project had to be curtailed. With federal funding at an equal level each year and the project operating at full cost the first year, inflation effected second and third year expenses and accomplishments.

- grant fourth year dissemination funds to systems which have completed worthwhile projects. South Portland has devoted much time these three years in disseminating project information. Due to travel and postal costs, this will cease. The desire to continue sharing with others is there but the means are not.

- require a 3 and/or 5 year follow-up study in systems that receive federal project money. This is no assurance that program goals would continue after funding stopped. However, this requirement would encourage accountability and responsibility for living up to project objectives.

- should determine and specify expected student outcomes as a result of career education implementation into a school system. Project schools should be given guidelines denoting anticipated growth of students in math, reading, or other basic skills.

- extend a concentrated effort to identify and distribute valid standardized tests to enable an accurate documentation of student achievement in career education areas - decision making, self

awareness and career awareness. The various instruments administered by REVAMP staff left much to be desired.

- develop guidelines for a standardized data collection system. This would save a great deal of time and talent for project staffs. From the outset of a project, educators would be able to keep complete and accurate account of information deemed useful. Duplicated records of several projects or even within a single project would be eliminated. If precise guidelines were distributed, personnel would not waste time recording areas of little or no importance. Staff would not have to guess at what is or is not expected in Washington. These would also prove useful to third party evaluators.

SOUTH PORTLAND, MAINE - CA

GOAL

	PRIMARY	INTERMEDIATE
SELF AWARENESS	Demonstrate an awareness of his own interests, skills and feelings.	Demonstrate an appreciation of his own skills, interests, feelings and values.
INTERPERSONAL SKILLS	Demonstrate cooperation in social situations.	Develop an appreciation of the differences between individuals or groups.
DECISION MAKING	Use his senses to gather data and to develop concepts.	Develop skills in making generalizations, hypothesizing and predicting.
WORK AWARENESS	Gain knowledge of workers in the home, school, and community.	Identify the personal and environmental factors which influence a worker.
MANIPULATIVE SKILLS	Develop psychomotor skills.	Improve psychomotor skills.
ECONOMIC AWARENESS	Understand that people are paid for their work and use that money to satisfy their needs and wants.	Recognize that each individual is a consumer, producer and citizen, and as such has certain rights and responsibilities.
VALUE OF WORK	Identify ways that workers are of service to the community.	Recognize that an individual can find satisfaction through his work.
RELEVANCE OF EDUCATION	Recognize that school is a place to learn.	Recognize that schooling is necessary for future careers.

[redacted]

REER DEVELOPMENT DESIGN

JUNIOR HIGH	SENIOR HIGH
Recognize that his talents, values, interests, and limitations relate to career goals.	Make goal-oriented choices related to his career requirements and future employability skills.
Develop the interpersonal skills required for work roles, recognizing that trust and respect are factors in human relations.	Demonstrate an understanding of the importance of human relationships in volunteer and part and full time work.
Develop an awareness of the results of decisions which will give him a sense of control over his future.	Identify realistic alternatives based on education, work experience and counseling and accept responsibility for career decisions.
Explore and analyze the common and unique characteristics of jobs within the 15 U.S.O.E. job clusters.	Recognize that social, environmental, and technical factors influence career trends and as a result workers must be flexible, adaptable and mobile.
Identify and use manual skills that are essential to many careers and leisure time activities.	Develop competence in use of manipulative skills required in one's future career or educational plans.
Develop an awareness of the financial and legal consumer resources as they relate to personal and family economics.	Understand and appreciate, as a worker and consumer, the complexities of the American economic system.
Understand impact of one's career on his lifestyle.	Gain insight into personal and social value of employment through simulated or real work experience.
Recognize that mental, physical and communicative skills are basic and applicable to all career fields.	Identify the relation between mastery of content knowledge and educational or vocational plans.

HISTORICAL BACKGROUND

During the 1974-75 academic school year, South Portland Public Schools and the Greater Portland Chamber of Commerce collaborated in the operation of a Career Guidance Institute under the sponsorship of The National Alliance of Businessmen and the United States Department of Labor. The purpose of the Institute was to create an interface between parents, educators, students and businessmen. Of major concern was the extent of career opportunities in the Greater Portland Area for non-college bound and disadvantaged students and career ladder potential for those gaining employment.

The Institute was also visualized as an inservice educational activity for educators in the South Portland Schools and was designed to enhance their career education program. More specifically, to expose them to the world of work, and the implications it could provide for education, the teacher, and the classroom environment.

Institute ojbectives were based on the "Dimensions of Career Education" as approved by the Career Education Advisory Committee and Institute design consisted of a refinement of procedures utilized in the 1974 Career Guidance Institute model with consideration given to recommendations published in the CGI Final Report, June 1, 1974.

Dr. Arthur Berry, Director of Vocational-Technical Education, University of Maine at Portland-Gorham, was designated as Workshop Coordinator to work with Frederick E. Freise, Assistant Director of REVAMP, who assumed directorship of the 1974-75 Career Guidance Institute.

INSTITUTE GOALS AND OBJECTIVES

General goals as presented in the specifications by The National Alliance of Businessmen were accepted as the basis for the CGI. At the conclusion of CGI, in accordance with "Dimensions of Career Education", the participants will:

1. identify values, interests, abilities, needs and other self characteristics as they relate to occupational roles. (self dimension)
2. explore occupational areas and describe opportunities, potential satisfactions, required roles of workers and other related dimensions. (occupational information dimension)
3. describe the psychological meaning of work and its value in the human experience. (psychology of work dimension)
4. describe modern work structure, and work environments, and organizational characteristics. (organizational dimension)
5. tell how the individual's role in work is tied to the well-being of the community. (social contribution dimension)
6. demonstrate planfulness in striving to achieve occupational goals and objectives. (planfulness dimension)
7. demonstrate through work-relevant behavior that one is acquiring a concept of self as a productive person in a work-centered society. (work ethics dimension)
8. describe that relationship which exists between basic skills, marketable skills, and interpersonal skills and the jobs one can reasonably aspire to in adult life. (school-work relationship dimension)

9. demonstrate possession of a reasonable degree of basic skills, knowledges, and behavioral characteristics associated with some type of work or occupational area. (occupational preparation dimension)

10. be aware of desirable work-relevant behavior, an ability to learn, adjust to, and advance in a chosen occupation. (work adjustment dimension)

OVERVIEW OF THE INSTITUTE

The Career Guidance Institute was structured on the model developed in 1974, however, scheduling was changed based on participant recommendations. Participants were divided into two groups; those individuals from elementary schools, or those with a focus towards career emphasis at the elementary school level; and those from secondary schools, or those with a focus towards career emphasis at that level.

Elementary participants met on Tuesdays while secondary met on Thursday. Two industry-visitations were held followed by a worksession.

In order to provide relevance to the Career Education program, occupational clusters, as identified by the United States Office of Education, were selected and companies within these clusters in the Greater Portland Area were contacted regarding the Institute and their willingness to become involved. In addition to the occupational clusters, consideration was also given to the curriculum materials currently in use in the South Portland Public Schools and an attempt was made to match visitations and careers to these materials. Those industries or businesses indicating a willingness to participate were provided with a list (Appendix A) of information desired from the company and a "business-industry tour" (Appendix B) information guide.

The resource material solicited (Appendix A) was compiled and placed in the career resource centers of the South Portland Public Schools for use by teachers, counselors and students. The "business-industry tour" guide (Appendix B) provided each business participant was designed to assure that the visitation would be structured and appropriate to institute objectives.

The formate of each tour-visitation was as follows: A 15 minute briefing, a 45 minute tour, and a 60 minute discussion period.

Worksessions were held following two industry-business visitations for each group of participants. Following the last visitation session, both groups of participants met jointly to compare their experiences and evaluate institute effectiveness. A feedback mechanism (Appendix C) was utilized after all visitations and worksessions and provided the Director and Coordinator with a bases for restructuring sessions to make them more relevant.

Each tour-visitation, as well as workshop session, was taped, edited and published by the Institute. The publication "Career Opportunities in Greater Portland, Maine--Visitation Notes and Info" Volume No. 2 was distributed to all Institute participants as well as guidance counselors and other interested parties in the Greater Portland area. Volume No. 1 is currently being utilized as a text and reference in a number of cooperative work-experience programs. Volume No. 2 provides them with additional resource material.

Education and its relevance to the world of work was a major institute objective. At each work session participants were asked to identify a minimum of ten terms relating to careers that they thought a student should understand, or be aware of. These words, or terms, were compiled into a master list (Appendix D) and at the final worksession each participant was asked to indicate the grade level at which it should be introduced into the curriculum. Responses on Career Terms (Appendix E) were compiled for curriculum use.

Participants were also asked at the final worksession to respond to the following question:

> "Based on your tours and worksessions, list those areas or facts that need emphasis or change in education if we are to better prepare youth for job entry."

There responses were added to those identified from the tapes (Appendix F) and presented to the participants.

Small groups reacted to the composite listing and made specific recommendations for the South Portland Public School System.

The program, on a week by week basis, was as follows:

October 10 - Worksession

a. Orientation to Project
b. Pre-test
c. Goals of Institute

EVALUATION OF THE CAREER GUIDANCE INSTITUTE

From the outset, it was planned to evaluate the Institute in a variety of ways. These include:

1. Administration of a Pre-Test and a Post-Test (Appendix C) to all participants and to analyze the results.

2. Utilization of a feedback device (Appendix C) to ascertain relevance of worksessions and achievement of institute goals.

3. An informal discussion of the strengths and weaknesses of the Career Guidance Institute by participants, business representatives, and staff at the last worksession.

4. Informal appraisal by the project staff. Some highlights of the appraisal are:

PRE-TEST AND POST-TEST:

The Pre-Test and Post-Test (Appendix H) were designed to determine achievement of Institute objectives. Responses on a 0-10 rating scale were not designed to be used for statistical comparisons but to serve as indications of general change in attitude, knowledge and understandings. The results, as shown on the "Pre-Test - Post-Test Profile" reveal a positive growth on all 19 assessment items.

PRE-POST TEST PROFILE

Career Guidance Institute - 1974-75
South Portland School System
South Portland, Maine 04106

PRE-POST TEST QUESTIONNARIE

This institute is designed to help you increase your knowledge regarding careers and career opportunities and to improve communication between educators, businessmen, and the community. Listed below are questions related to areas which will be discussed during the activities of the institute. You are being asked to complete this questionnaire in order that some evaluation of these activities may be made.

Each question or statement is followed by a ten-point rating scale. Read each question and circle the number on the scale which most nearly corresponds to your own assessment of your present degree of knowledge, understanding, skill, or attitude referred to in the question.

1. How would you rate your present degree of knowledge of business and industry in the Greater Portland area?

PRE-TEST - 10/74 POST-TEST - 3/75

0 1 2 3 4 5 6 7 8 9 10

2. Indicate the degree to which you are familiar with current employment trends in the Greater Portland area.

0 1 2 3 4 5 6 7 8 9 10

3. Indicate your knowledge of career opportunities for non-college bound students in the Greater Portland area.

0 1 2 3 4 5 6 7 8 9 10

4. Indicate your knowledge of the skills needed by business and industry in the Greater Portland area.

0 1 2 3 4 5 6 7 8 9 10

5. Indicate the degree of your present knowledge about distressed and disadvantaged areas in the Greater Portland area.

0 1 2 3 4 5 6 7 8 9 10

6. To what extent are you aware of the attitudes of the disadvantaged toward gainful employment?

0 1 2 3 4 5 6 7 8 9 10

7. To what extent are you aware of the attitude of employers toward employment of the disadvantaged?

0 1 2 3 4 5 6 7 8 9

8. To what extent is the community attuned to the needs of non-college bound student?

0 1 2 3 4 5 6 7 8 9

9. To what extent is the administration of your school system attuned to the needs of the non-college bound student?

0 1 2 3 4 5 6 7 8 9

10. Indicate the degree to which you understand the educator's role in working with non-college bound youth.

0 1 2 3 4 5 6 7 8 9

11. To what extent are the teachers in your school system committed to providing relevant education for non-college bound students?

0 1 2 3 4 5 6 7 8 9

12. How would you rate your present degree of knowledge of local training opportunities and programs for non-college bound students?

0 1 2 3 4 5 6 7 8 9

13. Indicate the degree of your present understanding of Career Education or the Career Education concept.

0 1 2 3 4 5 6 7 8 9

14. Indicate the degree to which you are familiar with the dictionary of occupationsl titles and career clusters.

0 1 2 3 4 5 6 7 8 9

15. Indicate to what extent has Career Education been introduced to the secondary classes in your school system.

0 1 2 3 4 5 6 7 8 9

16. Indicate to what extent you are familiar with Career Education programs available in the schools of Greater Portland.

0 1 2 3 4 5 6 7 8 9

17. Indicate the degree of your understanding of a realistic role for the guidance counselor in occupational or career guidance.

0 1 2 3 4 5 6 7 8 9 10

18. How would you rate the potential for a regular flow of communication between school administrators, teachers, counselors, and business and industrial personnel within the Greater Portland area?

0 1 2 3 4 5 6 7 8 9 10

19. Indicate the degree of your positive feelings about completing this questionnaire.

0 1 2 3 4 5 6 7 8 9 10

FEEDBACK EVALUATIONS:

Feedback Evaluations (Appendix C) were designed for each worksession and used to determine understanding of material presented and to solicit comments regarding the worksession, how to imporve it, and what the participants gained from the session. In all 12 worksessions were held. Participant reaction to content and instructional techniques was indicated by agreement to strong agreement on each item asked.

The comments regarding improvement of tours and worksessions were taken into consideration by the project staff and when feasible and consistent with Institute goals, were implemented.

Major items mentioned were:

More time for questions
Utilization of small groups
More contact with employees
Shorten worksession
Bring company representative to worksessions
More student participation
Focusing tours on entry level jobs
Discussion relating to attitude development
Relate tours to resource packets
More emphasis on job opportunities, advancement, etc.

A second aspect of feedback was concerned with:

What Specific New Knowledges Did You Gain From Your Tour and Worksession? A sampling of responses was:

Attitude is the most important thing that employees are looking for. (2) Business letters and English are also on the top of the list. (3) If a person is willing to work, if he is willing to learn - then the employee is willing to put in the time and the money to train him.

I was very interested the W. H. Nichols only produces two items. Also the worksheet rating the 10 job ratings proved quite interesting. A follow-up of employees opinoins would be of interest.

I'm learning how to pin down personnel managers to answer questions and not to allow them to be evasive. Maybe I'm getting to be more tenatious.

I learned about a new occupation that I never knew existed.

Attitudes play a tremendous degree on the part of the employee.

New teacher performance standards. Math is badly needed for business. Conditions on most jobs are good to excellent. Companies like to promote from within.

Vocabulary-needs for growth of Osteopathic Hospital.

There seems to be a great deal of enthusiastic employees (on the surface anyway) in most companies.

I am learning that employers and educators share similar goals and demands of young people.

Feel a better understanding of behavioral objective.

I have learned so much that it is difficult to list everything in this space. Some examples are - a better general understanding of the careers available in the Portland area.

I question whether or not we are doing an adequate job of preparing students to work together in class activities. So often in visiting we have found the importance of one worker to another in completing work successfully.

Changing materials of work - need for adaptability in students - attitudinal development emphasis - production of goods and services not known before.

Better understanding of job opportunities. More convinced that we better do a better job of basic academic skills and development of attitudes.

I found that the employers, on the tours we had been on, have little use for highly skilled or intelligent people.

What is actually needed from the school system. Problems of the high school students who step right into jobs.

Don't think I realized the extent to which students have poor attitudes in employment.

Tension in industry due to competition.

Respect for all people in all jobs.

Go to a visitation at another type of work to learn and seek to understand different hopes (or jobs) for different folks = democracy. What makes teachers think they would qualify for some of these jobs - sometimes we are not the kind of persons they would like to be like either - or turn about is fair play - Good Lord! That's a teacher!?

To be as proud to be a teacher as Chief McGouldrick is to be a member of the Fire Dept. A gun does not make a policeman a human.

More awareness of various employments.

More aware of conditions and requirements for specific areas.

I think our oral sessions give insight to things we may have forgotten and maybe weren't aware of.

Your doing a good job! The wheels are beginning to turn!!! (in my head)

Have seen a variety of skills and working tools that I had not seen before.

Being new to the area, the tours and worksessions have been a great help to know the community and the people. The tours give a great insight to what goes on behind the doors of the various areas.

Limitations in local openings and opportunities for advancement.

Specifics of weaknesses in applicants, particularly attitudionally. Was impressed with sensitivity and awareness of employers to problems of non-college bound students.

Some more facets of how inflation is affecting people, jobs, etc. More awareness of requirements for jobs.

Enjoyed the tours - more insight on what other people are doing. I consider this an opportunity to see other people at work - many of us don't realize what some of our kids folks are doing for work, or what is in store for them after school

I knew very little about careers and industrial opportunities in the Portland Area since I have lived in the area a relatively short time. I find it helps in making students aware of opportunities in their own geometric area.

I learned how actual jobs tie in with career clusters.

A better underseanding of the scope of employment opportunity.

Attitude of business toward education, Hiring procedures. What industry is looking for in future workers.

A third aspect of feedback provided for General Comments on each tour or worksession. A sampling of responses was:

I enjoyed today's session - especially filling in the

sheet on what people want most out of their jobs. Find it interesting breaking up into groups and discussing them.

We have been discussing the tours in several of my classes and the students seem very interested. Attitude in business is hard for students to understand.

Today's activities were interesting and instructive, but too long for the time provided - hence frustrating.

(Perhaps this in itself is a good lesson for teachers)

As with other visits, I continue to gain a great appreciation of teaching as a career.

Again I would ask for more conversation in relation to our tours rather than the multitude of outside information that takes up most of the class time. It seems we have many loose ends. Even though I can distinguish with the front part of the sheet as to my personal knowledge of specific questions, I still feel confused when it comes to what we should be gearing our attention to on educational implications of this course.

The people have been very cooperative and the tours have been informative and pleasant. I enjoyed the group work in the get-together wrap-up session.

There is a point of saturation - there are too many of the same operations with terminology, needs, and interests that are similar.

I am enjoying the course and the tours.

Holiday Inn was the best/most informative yet. Osteopathic Hospital was (One) doctor's views and not an overview of health occupations/education.

Very disappointing. Also I do not like being read to -- I can read the handouts myself.

These tours provide a good general education regarding that "third environment". It is not the specific information that is valuable to me so much as the background picture of the business or industry. As a teacher, I expect to be more realistic in the classroom and to make my teaching more practical.

I have enjoyed learning about industry in this area and the communication developing between industry and educators. I feel the educational system must become more career oriented and make education relevant to the everyday (work day) of most of us.

The tours were both very interesting. The tour to Neyos seemed to be the best organized. It took a few minutes to figure out how each part of the shoe operation fitted in, but both taught a lot.

I have discussed each tour with my classes. The students seem very interested in the world of work. I can see at the seventh grade level, that in the future we (society) are going to have a real problem with attitude!

The CGI has been both educational and enjoyable. I have found that much of what I have learned has been material which I can put to practical use. The people involved have been interesting, informative, and most cooperative.

The tours and work sessions are making one realize how inaffective we are at hitting the real human needs in homes and at school.

Keep up the good work!

I'm learning a great deal about the world of work. The

tours have been organized well and are interesting.

The fact that kids don't understand the basic principle of the free enterprise system bothers me a good deal.

The course is getting livelier and thus more exciting. I am glad to be involved but not at my arrival after school to this area of another school.

Very satisfied with tours and worksessions.

Attitude is very important. Am looking at the whole spectrum of careers much more seriously than before!

The negative feeling about job prospects made me wonder - why bother? As was mentioned during the work session - the poor attitudes shown by many job seekers was blamed in part on the schools. This makes me angry!

Have been able to implement more detail in a classroom. Children are becoming more aware of the world of work and can express their feeling about this also.

I am happy I took the course and am willing to learn about world of work (it is generalized that we teachers do not understand the real world). I think whoever makes this generalization forgets that some of us married someone outside the teaching profession, or that we may have worked for 2 years or more as a chemist where one worked with objects and not people.

The tours have been very interesting and most enjoyable.

There is a value to C.G.I. - parts of today's lecture on U.S.A. for example and tours to places never before visited - should be again more small group work.

Impressed with the workshop to this point.

I wish more teachers would become involved. There is so much we need to know about the community and the employers of our students (and our neighbors).

EVALUATION BY DISCUSSION

Feedback provided the Institute staff with continous input from participants. In addition, an opportunity was provided at the last worksession for specific recommendations concerning strengths and weaknesses of the Career Guidance Institute. Participants were asked to react to the following question:

"If another Career Guidance Institute were to be held, what changes, or recommendations, would you make to planners, directors or coordinators?"

Major recommendations were:

1. Visit post-secondary institutions in the local area and identify potential educational opportunities.
2. Identify and visit alternative service agencies available to students, the disadvantaged and for drop-out.
3. Utilize speakers from other learning options, ie: apprenticeship, employment security commission, in plant training.
4. Later school visitations, ie: secondary into elementary.
5. Explore careers for handicapped.
6. More parent involvement.
7. Develop alternate scheduling. Vary day of week.
8. Greater exploration of Government and public service job opportunities.
9. Involve students who are not college bound.

APPRAISAL BY THE PROJECT STAFF

The Institute staff was involved in all worksessions and tour-visitations. In doing so, the staff had an opportunity to evaluate the program as it envolved. Observations are:

1. Grouping of participants into elementary and secondary provided a basis for planning Institute experiences which could be related directly to the educational setting.
2. Participants quickly recognized and accepted the thrust of the Institute.
3. Once introduced to the business scene and into communications with the business community, enthusiasm for the project grew markedly among the majority of participants.
4. The business community was warm and courteous in their reception to participants and enthusiasm for the Institute and its goals.
5. Participants liked group activity and this area of the worksession should be expanded.
6. Consideration should be given to restructuring another Institute. Small group tours could be utilized with monthly reports to all participants individualized visitation also holds promise.

CONTRIBUTIONS AND RECOMMENDATIONS

The Career Guidance Institute was conceived as an in-service educational activity for educators in the South Portland Public Schools and was designed to enhance their exemplary Career Education Program. At the final work-session, each participant was asked to review a list of "Career Terms" which was complied during the work sessions and to indicate the grade level at which the term should be introduced into the schools curriculum. Appendix E shows how the terms were prioritized according to the following categories: primary K-2, elementary 3-6, junior high 7-9, and senior high 10-12. It is recommended that teachers utilize these to make their content and experiences more relevant to the world of work. In addition the list provides a basis for the Career Education dimension within the revised English curricular, a 1974-75 Career Ed project priority.

A major contribution can be summed up in the remarks of one participant: "I think it has made some teachers think relovancy and accountability. A realization that many students do survive without taking college courses. What steps are we taking in preparing students for the world of work?".

In addition to its contribution to the Career Education Program, specific implications for education were identified (Appendix F) and summary of recommendations made for consideration by the South Portland School Department. They are:

1. Greater emphasis in all areas on development of a positive attitude, emphasis on values, self discipline ethical behavior and acceptance of responsibilities.

2. Provide experience in development of job application and interviewing skills.

3. Provide workshops and orientation for all teachers in the area of value clarification.
4. Involvement of students in industry-tour visitations.
5. More emphasis on communication skills.
6. Development of human relation skills in individual or group courses or activities.
7. Consideration of mini-course in "How to Succeed in The World of Work".
8. Make greater use of business-industry resources and personnel in educational activities.

GENERAL CONCLUSIONS

Institute goals and objectives were met in a variety of ways:

1. Tour-visitations provided an interface of the business and educational communities.
2. The Pre-Post Test indicated growth in attitudes knowledges and understandings.
3. Volume #2 - "Career Opportunities in Greater Portland, Maine - Visitation Notes And Info" was developed for use by teachers, counselors, and students.
4. Resource materials were added to the Career Resource Centers of the South Portland Public Schools.
5. Additional business-industrial personnel were added to those willing to serve as resource persons for educational purposes.
6. Participant awareness of local business-industry and its implications for the Career Education Program were identified.
7. A listing of Career Terms was developed and prioritized for usage in the educational program.
8. Educational needs were identified and recommendations made to local school authorities.
9. The Career Guidance Institute model, developed in 1974, was refined and tested as to its effectivness as an inservice technique for educational purposes.

BUSINESS-INDUSTRY VISITATION PARTICIPANTS

In order to provide relevance to the Career Education Program, career clusters as identified by the United States Office of Education provided the basis for tour-visitations.

In selection of business-industry participants, consideration was given to the curriculum materials currently used in the South Portland Public Schools and an attempt made to match visitations and careers to these materials.

The following were visited by workshop participants. Individuals named served as contacts and resource personnel for the Institute.

TRANSPORTATION

Bureau of Waterways
Edward Langlois, Director
Portland Pipeline
Wallace McGreen, Vice President

MANUFACTURING

American Hoist and Derrick Company
John A. Baird, President
Weyerhaeuser Company
Robert Parent, General Manager
S. D. Warren Company
Russell R. Day, Director Manpower Development
Sebago Shoe Inc.
John Marshall, Vice President - General Manager
Presteel Corporation
William Moio, General Manager
Burnham & Morrill Company
William Bush, Personnel Manager
W. H. Nichols Company
Herbert Carmichael, Personnel Manager
Noyes Tire Company
John Meredith, Personnel Manager

CONSTRUCTION

Imperial Homes
James F. Maguire, President
Bluerock Industries
Robert Nunley, General Manager

HEALTH

Blue Cross and Blue Shield
Russell D. Bonney, Personnel Manager
Osteopathic Hospital
John Pecteau, Executive Director

PUBLIC SERVICE

Howard Reiche School
Richard McGarvey, Principal
South Portland Police Department
Thomas J. Carmody, Community Relations Officer
South Portland Fire Department

APPENDIX

APPENDIX A

INFORMATION DESIRED FROM EMPLOYERS

Company structure

How are job openings made known?

Who is contact person for a job inquiry?

Employment application procedures

Application form

Testing and evaluation procedures

Kinds of jobs available

Career ladders

Opportunities for advancement

Evaluation of employees

Job descriptions

Brochures on company

Company benefits

Brochures on pay rates, schedules, incentives (tuition assistance)

Human resources available to education - What will industry or business supply?

Library resource materials (training films, etc.)

Potential summer employment for teachers

Academic and skill requirements of potential employees

Weakness you see in education

Hiring and practices regarding disadvantaged

Equal opportunity plan

Annual statement

How much profit made by company?

APPENDIX B

BUSINESS-INDUSTRY TOURS
Information Guide

1. Overview of Company Operations

   a. Briefly identify the main functions of your business or industry.

   b. Briefly discuss your company's future and its potential for growth.

2. Employment Needs and Requirements - General

   a. Describe the occupations which are found in your company.

   b. What are your recruitment and employment practices.

   c. Describe the minimum job requirements, wages, educational requirements for each occupational area.

   d. Explain how your employment applications are screened and any pre-employment tests used.

   e. Relate your employment requirements to the general understandings and basic skills of a secondary school graduate. What are strengths and weaknesses of the high school graduate?

3. Employment of Economically Disadvantaged

   a. Indicate the percentage of your employees who are from minority groups. Disadvantaged?

   b. Indicate how you recruit from high schools in disadvantaged areas. Discuss any employment advantages offered to those youth.

   c. Review your employment procedures and practices. Do they contain any elements which would be difficult for disadvantaged youth to meet? References, etc.

   d. Describe the present employment outlook for youth, in particular disadvantaged.
      1) In what areas do needs exist?
      2) Part-time jobs
      3) Future employment trends

   e. Relate potential job advancement to the disadvantaged.

4. Orientation and Training of New Employees

   a. Discuss orientation procedures for new employees.

   b. Discuss on-the-job training activities.

   c. Discuss incentives and other training programs for employee up-grading.

5. Articulation Between Business-Industry and Schools

   a. Discuss specific ways a counselor or teacher can assist high school graduates and/or dropouts to gain employment with your firm.

   b. Suggest provisions and procedures for continuing a meaningful relationship between counselors and your firm.

APPENDIX C

FEEDBACK INFO
WORKSESSION

Session #7 February 11, 1975

The following statements reflect some views about the work session. Please respond to these statements by circling the response which best reflects the extent to which you agree or disagree.

I. CONTENT

1. I understand the concept of competency bases teacher education.	SA	A	U	D	SD
2. I can prepare a behavioral objective containing the three required parts.	SA	A	U	D	SD
3. The visitation to Osteopathic Hospital and Holiday Inn gave me new insights into careers and career opportunities.	SA	A	U	D	SD
4. The group discussion session clarified my understanding of career opportunities in the hospitality and health areas.	SA	A	U	D	SD
5. I am more aware of the processes, procedures, and requirements related to employment.	SA	A	U	D	SD
6. The tour and worksession provided insight into educational needs necessary for employment.	SA	A	U	D	SD
7. The orientation to Weyerhaeuser and Richie School gave me an overview of the next tour and what to look for.	SA	A	U	D	SD
8. The session was interesting enough to hold my attention.	SA	A	U	D	SD

II. INSTRUCTION

1. Group involvement provided enthusiasm for the subject.	SA	A	U	D	SD
2. The variety of approaches used provided for more participant involvement.	SA	A	U	D	SD
3. The vocabulary used was confusing.	SA	A	U	D	SD
4. Too much info was covered.	SA	A	U	D	SD

III. How could the tours or worksession have been improved?

IV. What specific new knowledges did you gain from the tours and worksession?

V. COMMENTS:

VOCABULARY

Below are listed vocabulary words identified as relating to careers. Review the list and indicate the grade (1-12) that you think would be appropriate for inclusion in the curriculum.

Composite Listing

EDUCATIONAL NEEDS

Below are listed educational needs as indentified through business-industry tours, by speakers and by participants in the Career Guidance Institute:

Typing - office skills
Apperance - clothing for job
Develop self confidence
Spelling
Confidentiality stress
Self-starter
Getting along with people
Basic math - percentages
Punching time clocks
Stress to students - need for education
Provide more actual exposure to careers
Part-time try-out experience
Teachers serve as examples
Understanding of unions
Interviewing techniques
Establish realistic career goals
Involve parents in school
Make subjects relevant to careers
Common sense
Make academic courses relevant (This doesn't mean vocational)
Course in social living
Pride in one's self
Use business and industry more
Management-employee relations
Group dynamics
Oral expression
Honesty
How to apply for a job
Read and spell well
Self discipline (shortcoming of new employees)
Decision-making skills
Know jobs and make application for specific job
Lack of discipline
Sense of responsibility
Willingness to work
Prepare youngsters to take oral exams
Attitudes
Human relation skills
Working as a team
Need skills to live in society
Absenteeism
Work habits
Part-time experiences
Reading skills
Math - basic and practical
Acceptance of responsibility
Employers' expectations
Communication skills
Obligations to employer
Trucking vocabulary
Articulation
Self confidence
Sense of humor
Role-playing roles to give actual involvement
Experience in making out job applications

APPENDIX G

GROUP PRESENTATION

Outline of Points to Cover

1. Describe purpose of company or organization

2. Describe your tour
   Where you started, areas or departments visited, and function of each.

3. Careers identified

4. Employment opportunities

5. Orientation, inhouse training, incentives

6. Educational needs of potential employees

7. Implications for education

APPENDIX H

PRE-TEST QUESTIONNAIRE

This institute is designed to help you increase your knowledge regarding careers and career opportunities and to improve communication between educators, businessmen, and the community. Listed below are questions related to areas which will be discussed during the activities of the institute. You are being asked to complete this questionnaire in order that some evaluation of these activities may be made.

Each question or statement is followed by a ten-point rating scale. Read each question and circle the number on the scale which most nearly corresponds to your own assessment of your present degree of knowledge, understanding, skill, or attitude referred to in the question.

1. How would you rate your present degree of knowledge of business and industry in the Greater Portland area?

   0 1 2 3 4 5 6 7 8 9 10

2. Indicate the degree to which you are familiar with current employment trends in the Greater Portland area.

   0 1 2 3 4 5 6 7 8 9 10

3. Indicate your knowledge of career opportunities for non-college bound students in the Greater Portland area.

   0 1 2 3 4 5 6 7 8 9 10

4. Indicate your knowledge of the skills needed by business and industry in the Greater Portland area.

   0 1 2 3 4 5 6 7 8 9 10

5. Indicate the degree of your present knowledge about distressed and disadvantaged areas in the Greater Portland area.

   0 1 2 3 4 5 6 7 8 9 10

6. To what extent are you aware of the attitudes of the disadvantaged toward gainful employment?

   0 1 2 3 4 5 6 7 8 9 10

7. To what extent are you aware of the attitude of employers toward employment of the disadvantaged?

   0 1 2 3 4 5 6 7 8 9 10

8. To what extent is the community attuned to the needs of non-college bound student?

0 1 2 3 4 5 6 7 8 9 10

9. To what extent is the administration of your school system attuned to the needs of the non-college bound student?

0 1 2 3 4 5 6 7 8 9 10

10. Indicate the degree to which you understand the educator's role in working with non-college bound youth.

0 1 2 3 4 5 6 7 8 9 10

11. To what extent are the teachers in your school system committed to providing relevant education for non-college bound students?

0 1 2 3 4 5 6 7 8 9 10

12. How would you rate your present degree of knowledge of local training opportunities and programs for non-college bound students?

0 1 2 3 4 5 6 7 8 9 10

13. Indicate the degree of your present understanding of Career Education or The Career Education concept.

0 1 2 3 4 5 6 7 8 9 10

14. Indicate the degree to which you are familiar with the dictionary of occupational titles and Career Clusters.

0 1 2 3 4 5 6 7 8 9 10

15. Indicate to what extent has Career Education been introduced to the secondary classes in your school system.

0 1 2 3 4 5 6 7 8 9 10

16. Indicate to what extent you are familiar with Career Education programs available in the schools of Greater Portland.

0 1 2 3 4 5 6 7 8 9 10

17. Indicate the degree of your understanding of a realistic role for the guidance counselor in occupational or career guidance.

0 1 2 3 4 5 6 7 8 9 10

18. How would you rate the potential for a regular flow of communication between school administrators, teachers, counselors, and business and industrial personnel within the Greater Portland area?

0 1 2 3 4 5 6 7 8 9 10

19. Indicate the degree of your positive feeling about completing this questionnaire.

This directory contains a list of career consultants, materials and agencies available to teachers and students involved in Career Education activities throughout the South Portland schools. Each name in the Index is keyed to an information card located in the Consultant Card File in each of the three secondary Career Guidance Centers.

CONTENT

The definitions of the letters S, I, F, T, E, and D appear on page 2.

The 15 career clusters designated by the United States Office of Education are found on page 3. Consultant cards are filed under these clusters. Four sample careers are listed for each job cluster.

The Index on page 4 lists the Career/Topic, cluster, last name of the consultant, and code letters for the S I F T E D activities and materials.

Names of local, state and federal organizations and agencies, which provide personnel and materials for school use, are located on page 13. Addresses and telephone numbers of these agencies are located in the back of the card file under Organizations: Local, State and Federal.

PROCESS

Step 1: To find the resource person or information needed, locate the Career/Topic in the Index. Use the S I F T E D code to identify the consultant who meets your need. Note both the name and the career cluster given.

Step 2: Use the consultant card file found in each secondary Career Guidance Center. Under the Career Cluster, locate the card for the consultant's name, title, company, address, telephone number, and S I F T E D code. Additional information and restrictions may be recorded.

DEFINITIONS OF S I F T E D

The code letters S I F T E D are used as key letters in identifying resource people in the following areas of the Career Education Program:

Shadowing - offers a personal experience in career exploration. Individually or in small groups, students spend a full or half day observing a relative, friend or concerned individual at work. Volunteer work also provides a type of shadowing experience.

Interviewing - may be of two types. In one, a career consultant would answer student questions regarding his or her field of interest. The other enables students to experience a simulated job interview.

Field Trips - provide the opportunity for classes or small groups of students to become aware of community workers and career opportunities.

Talks - are given by resource speakers in the classroom. These presentations afford students the advantage of gaining knowledge about a specialized occupation or an area of interest.

Educational Materials - include audio-visual aids as well as information available from business and industry to supplement the offerings of the school curriculum.

Demonstrations - enable students to watch or participate as a craftsman simulates a particular skill.

THE ABOVE AREAS ARE REPORTED, DISCUSSED, AND DOCUMENTED BY TEACHERS OR STUDENTS.

LIST OF THE FIFTEEN OCCUPATIONAL CAREER CLUSTERS

1. Agribusiness and Natural Resources
   - dairy farmer
   - forest ranger
   - horticulturist
   - landscaper

2. Business and Office
   - actuary
   - cashier
   - computer programmer
   - stenographer

3. Communications and Media
   - reporter
   - editor
   - radio station manager
   - telephone operator

4. Construction
   - engineer
   - architect
   - carpenter
   - electrician

5. Consumer and Homemaking
   - cook
   - interior decorator
   - consumer affairs advisor
   - waiter

6. Environmental
   - forester
   - urban planner
   - fish and game warden
   - soil conservationist

7. Fine Arts and Humanities
   - piano instructor
   - potter
   - museum curator
   - actor

8. Health
   - dentist
   - doctor
   - medical technologist
   - licensed practical nurse

9. Hospitality and Recreation
   - coach
   - hotel/motel manager
   - travel agent
   - professional athlete

10. Manufacturing
    - shipper
    - quality control engineer
    - tool and die maker
    - sheet metal worker

11. Marine Science
    - boat mechanic
    - diver
    - oceanographer
    - fisherman

12. Marketing and Distribution
    - retail merchandiser
    - food transporter
    - public relations worker
    - advertising copywriter

13. Personal Services
    - cosmetologist
    - mortician
    - pet shop owner
    - barber

14. Public Service
    - librarian
    - postman
    - teacher
    - fireman

15. Transportation
    - heavy equipment operator
    - pilot
    - bus driver
    - truck mechanic

INDEX

Some careers could be listed in more than one cluster; however, the following designations have been made to the most obvious:

CAREER/TOPIC	CAREER CLUSTER	NAME	CODE S	I	F	T	E	D
Accounting	Business & Office	Gibbons	S					
		Johnson			F			
Actuary	Business & Office	Durland				T		
		Jensen				T

The project reported herein was performed pursuant to a grant with the Office of Education, U. S. Department of Health, Education and Welfare. Contractors undertaking such projects under Government sponsorship are encouraged to express freely their professional judgment in the conduct of the project. Points of view or opinions stated do not, therefore, necessarily represent the Office of Education position or policy.

South Portland, Maine
1973-1976

AFFIRMATIVE ACTION STATEMENT

In keeping with federal and state guidelines, the South Portland School Department does not and will not discriminate on the basis of sex, race, color, religion, national origin, ancestry, age, or physical handicap, in the educational programs or activities which it operates, and is required by Title VII of the Civil Rights Act of 1964 as amended by the Equal Employment Opportunity Act of 1972 and Title IX of the Educational Amendments of 1972 and Part 86 of Title 45, Code of Federal Regulations not to discriminate in such a manner.

The requirement not to discriminate in educational programs and activities extends to employment practices in the school system and to the admission and treatment of students.

To insure non-discriminatory practices and procedures, the South Portland Board of Education, with the assistance of an Affirmative Action Committee, is developing an Affirmative Action Plan and other compliance procedures.

It has also appointed an Affirmative Action Office to coordinate its efforts to comply with and carry out its policies and responsibilities regarding non-discrimination.

Inquiries concerning the application of Title VII, Title IX and Part 86 to the School Department should be addressed to the Affirmative Action Officer, Ralph W. Egers, Jr., Curriculum Office, South Portland School Department, 130 Wescott Road, South Portland, Maine 04106, telephone 775-6501.

FOREWORD

If a difference is to be made, it is the teachers who will make it -- Again, the teachers of South Portland have stepped forward with thoughtful and constructive change. This Teachers' Guide for Career Education, Awareness Program K - 6, reflects unstinting effort by the teachers and members of the supervisory staff serving on the committee. And, it reinforces our awareness of the tremendous source of creativity and dedication that has been drawn from the entire faculty -- creativity and dedication which will continue to build better programs for South Portland youth.

To all who have worked to make this Guide a reality, and, thereby, to point to new and better ways of developing a healthy self-awareness and an appreciation for the work ethic, I express appreciation.

JOHN I. SEEKINS, JR.
Superintendent of Schools

ACKNOWLEDGEMENTS

The implementation of Career Education could only be possible with the full support and encouragement of the South Portland Board of Education and John I. Seekins, Jr., Superintendent of Schools.

Special thanks are extended to the members of the Career Education Advisory Committee for giving freely of their time in order to provide valuable assistance and practical recommendations for the three year project.

A great deal of effort and interest has been given by the Elementary Curriculum Directors. Their contribution to the overall organization and structure will ensure the implementation and infusion of Career Education into the elementary school program.

Much credit for the success of this guide belongs to the elementary principals, teachers, and librarians in South Portland who have demonstrated their enthusiasm, creativity, and adaptability in integrating career education into the elementary curriculum.

Special recognition is due those teachers who participated in the curriculum workshops and gave generously of their time and talents in the preparation of the guides, Career Education Awareness Program K - 6 and Career Education Awareness Program K - 6 Revised 1976. These people were actively involved in the preparation of the guides:

DEVELOPING A CAREER EDUCATION GUIDE

South Portland made a commitment in 1973 to develop the concept of Career Education throughout the school system.

It soon became evident, that if this concept were to be an integral part of the total elementary curriculum, some tool had to be provided as a guide for the classroom teacher.

An informal needs assessment indicated that teachers and curriculum directors felt a need for a brief statement of philosophy, some means of incorporating this concept into the existing curriculum and practical suggestions for the implementation of these findings.

The Elementary Career Education Coordinator, as the resource person, initiator, and coordinator for this project, reviewed and evaluated materials submitted from various sources; contacted resource persons; and encouraged teachers to try some of the activities and procedures which had proven successful in other situations.

During the school year 1973-74 a workshop was conducted with 15 teachers representing the various grade levels, the elementary curriculum directors, and the career education coordinator. They participated in the development of a philosophy, completed a review of curriculum areas where the concept of career education could be infused, and compiled activities which could provide a means of implementation. The final editing was done by the administration and curriculum directors.

The guide was distributed to all teachers to study, to use, and to evaluate. It then became apparent that if continued growth and development of career education as a concept were to be assured, revisions had to be made.

During the school year of 1974-75, the Career Education Staff expanded the three original goals to eight. A career development design for K - 12 which, hopefully, would help to ensure the realization of these suggested goals was recommended to the supervisory staff.

A second assessment was made during this period of time. A workshop conducted by the Career Education Coordinator was held in the spring. The eleven teachers participating in this workshop were charged with the responsibility of making revisions in Parts II, III, and IV of the guide.

As a result of the workshop three major changes in the guide evolved: (1) all activities were designed to relate to and nurture a better understanding of the eight goals; (2) a process for collecting, recording, and retrieving

information regarding community resources was formulated by the elementary librarian, and (3) an index keyed to subject areas was developed.

The revised materials were again edited and the new handbooks were distributed to classroom teachers for another round of study, use, and evaluation - the process of developing the concept thus becoming the program.

PART I - OVERVIEW

Career Education: Philosophy

Career Education in South Portland

CAREER EDUCATION: PHILOSOPHY

We believe:

That the concept, Career Education, because of its concern with self awareness, the world of work and the value of work, can be a catalyst for the South Portland Schools as they endeavor to develop effective, happy and well-adjusted citizens now and in the future.

Our elementary students should then have:

the opportunity to honestly examine and discuss their own characteristics as they gradually develop realistic goals for daily living and future well-being;

the opportunity to observe, discuss and explore the varied types of work opportunities offered in the immediate area;

the opportunity to grow in an understanding and appreciation of each person's contribution as a worker in the school or the community.

The teachers should:

provide a classroom atmosphere which is comfortable, stimulating and conducive to the growth of interpersonal communication;

provide many opportunities for exposure to the varied forms of employment found in the community;

provide opportunities for students to develop a respect for the basic skills as steppingstones in their chosen careers.

The curriculum should:

be sufficiently flexible to allow for the infusion of career education goals.

The community should:

be supportive and actively involved in helping students become aware of skills and attitudes which lead to productivity in the world of work.

CAREER EDUCATION IN SOUTH PORTLAND

Elementary

The elementary component of career education is awareness. From kindergarten through grade six students become involved in activities designed to help them become aware of themselves as individuals, develop an awareness of the world of work, and gain an appreciation for the value of work.

Self awareness is developed through many discussions devoted to helping students become aware of their interests, skills, feelings, and values. Activities are designed to help students put their findings into practice. School experiences offer many opportunities to develop tolerance, cooperation, and the means for handling such emotions as fear and anger. Through practice in the use of the decision making process, the students learn the need for commitment; they also learn that sometimes they must live with the unpleasant results of a decision.

The scope of awareness broadens from the self to include workers in the home, school, and community. Participation in field trips, mini-trips, classroom visitations, and interviews helps students learn about working conditions, tools needed in various trades, and the economic realities facing the producer and the consumer.

Since school is the child's world of work, it is here that he acquires attitudes about the value of work and the relevance of education. The inner satisfaction of completing a task well and the feeling of pride in accomplishment are factors constantly emphasized by the teacher. The value of work is also stressed by many of the workers interviewed. Class discussions help the student to identify and assess the contributions made by workers to society and the personal satisfaction gained.

Career Education for the elementary child is, in part, a knowledge of the world of work and workers, but of more importance, it provides for an understanding of one's self and one's values as a basis for future career planning.

Secondary

Grades seven through twelve progress from simple awareness techniques to programs and activities which sequentially provide an orientation to, exploration of and preparation for the world of work.

At the secondary level, the responsibility for implementing the career education concept lies with the guidance personnel and a nucleus of classroom teachers.

Resource centers in each junior high and senior high school provide information about careers to all students. Specific orientation to the center is given to all seventh grade students.

Eighth grade students add to their involvement by becoming exposed to over fifty different workers at a career fair held each spring.

Ninth grade students are required to take a basic course in career education. Self-awareness, career awareness and a shadowing experience receive major emphasis at this level.

Seniors are offered a semester elective in career preparation. Career testing, counseling, and job placement are services which are also made available to them. A simulated job interview with a business representative is the culminating activity which helps to bring the total program into focus.

All teachers at elementary and secondary levels have an opportunity to participate in the Career Guidance Institute. This course gives the teacher a chance to become more knowledgeable about employees and their specific responsibilities in the world of work.

Teacher teams have done a good deal of research in the areas of mathematics, English and social studies. As a result of the research and involvement in the above mentioned activities, curriculum changes have been implemented in an endeavor to make school more relevant to students in meeting their career needs.

Dropouts and graduates are encouraged to use the resource room and the services of the guidance staff for career counseling or as a placement service.

Community

The school is actively seeking the cooperation of the community in the implementation of career education. Information about the concept is disseminated to the community through the media, and at civic and parent-teacher meetings. The Career Guidance Institute, a career education course, is offered annually to school administrators, parents, business personnel, students and teachers. A free exchange of ideas from these groups is encouraged.

An advisory board, also composed of a cross section of education and community representatives, makes recommendations which help to shape educational policies.

Parents and business persons serve frequently as resources to the classroom teacher. Classes visit local industries and interview and shadow workers or have the opportunity to listen to visiting business personnel at their schools. Parents give their services as volunteer aides by teaching mini-courses in crafts, demonstrating skills, or chaperoning and chauffeuring groups on field trips. This assistance from the parents and the business community is invaluable to the school system.

PART II - SEQUENTIAL PLAN K - 6

The Career Development Design

Objectives, Activities, and Evaluative Techniques

Selected Lesson Plans

PART II - SEQUENTIAL PLAN K-6

This section presents activities to assist classroom teachers in meeting the career development needs of elementary students. The list is not intended to be an outline of a prescribed course of study. Instead, it is expected that the teacher will adopt or adapt the suggestions presented to serve the needs of the class.

The activities are classified according to the eight goals and the general objectives of the career development design, and according to primary or intermediate levels. They offer a variety of teaching methods and are correlated with all school subjects and with the textbooks used in the South Portland system. Each has been keyed to an index topic to help the teacher infuse the activity within the established curriculum. Resource materials and textbook references are frequently included in the description of the activity. Suggestions for evaluating the activities appear at the conclusion of each section of the sequential plan.

Several selected lesson plans appear at the end of this section. These detailed units offer several activities around a single theme. Generally, they include multiple objectives, evaluations, resources, and subject correlations. All the activities described in this guide have been successfully used by South Portland teachers.

The Career Development Design

From the three areas of awareness - self, world of work, and the value of work - have evolved the eight goals of South Portland's Career Development Design. Each of these goals is directed toward the needs of the pupil at the primary, intermediate, junior high and senior high school levels. The following sequential design provides a guide for the classroom teacher in selecting career education activities.

SOUTH PORTLAND, MAINE - CAREER DEVELOPMENT DESIGN

I. SELF AWARENESS

	The students will:
Primary	demonstrate an awareness of their own interests, skills, and feelings.
Intermediate	demonstrate an appreciation of their own skills, interests, feelings and values.
Junior High	recognize that their talents, values, interests, and limitations relate to career goals.
Senior High	make goal-oriented choices related to their career requirements and future employability skills.

II. INTERPERSONAL SKILLS

	The students will:
Primary	demonstrate cooperation in social situations.
Intermediate	develop an appreciation of the differences between individuals or groups.
Junior High	develop the interpersonal skills required for work roles, recognizing that trust and respect are factors in human relations.
Senior High	demonstrate an understanding of the importance of human relationships in volunteer and part and full time work.

III. DECISION MAKING

The students will:

Primary	use their senses to gather data and to develop concepts.
Intermediate	develop skills in making generalizations, hypothesizing and predicting.
Junior High	develop an awareness of the results of decisions which will give them a sense of control over their future.
Senior High	identify realistic alternatives based on education, work experience, and counseling and accept responsibility for career decisions.

IV. WORK AWARENESS

The students will:

Primary	gain knowledge of workers in the home, school, and community.
Intermediate	identify the personal and environmental factors which influence a worker.
Junior High	explore and analyze the common and unique characteristics of jobs within the 15 U.S.O.E. job clusters.
Senior High	recognize that social, environmental, and technical factors influence career trends and as a result workers must be flexible, adaptable and mobile.

V. MANIPULATIVE SKILLS

The students will:

Primary	develop psychomotor skills.
Intermediate	improve psychomotor skills.
Junior High	identify and use manual skills that are essential to many careers and leisure time activities.
Senior High	develop competence in the use of manipulative skills required in one's future career or educational plans.

VI. ECONOMIC AWARENESS

The students will:

Primary	understand that people are paid for their work and use that money to satisfy their needs and wants.
Intermediate	recognize that each individual is a consumer, producer and citizen, and as such has certain rights and responsibilities.
Junior High	develop an awareness of the financial and legal consumer resources as they relate to personal and family economics.
Senior High	understand and appreciate, as a worker and consumer, the complexities of the American economic system.

VII. VALUE OF WORK

The students will:

Primary	identify ways that workers are of service to the community.
Intermediate	recognize that individuals can find satisfaction through their work.
Junior High	understand the impact of career on lifestyle.
Senior High	gain insight into personal and social value of employment through simulated or real work experience.

VIII. RELEVANCE OF EDUCATION

The students will:

Primary	recognize that school is a place to learn.
Intermediate	recognize that schooling is necessary for future careers.
Junior High	recognize that mental, physical and communicative skills are basic and applicable to all career fields.
Senior High	identify the relationship between mastery of content knowledge and educational or vocational plans.

GOAL I - SELF AWARENESS

PRIMARY THE STUDENTS WILL DEMONSTRATE AN AWARENESS OF THEIR OWN INTERESTS, SKILLS, AND FEELINGS.

INTERMEDIATE THE STUDENTS WILL DEMONSTRATE AN APPRECIATE OF THEIR OWN SKILLS, INTERESTS, FEELINGS, AND VALUES.

OBJECTIVES

PRIMARY/INTERMEDIATE

Interests: The students will:

identify their interests or develop new interests.

associate their personal interests with future careers.

Skills: The students will demonstrate an awareness and appreciation of:

their ability to care for many of their physical needs.

their ability to act responsibly in social situations.

their ability to use their minds.

their physical and aesthetic skills.

their ability as workers.

Feelings: The students will:

identify a variety of feelings.

recognize some factors which influence feelings, and will identify alternate methods of handling negative feelings.

develop some positive attitudes about themselves.

Values: The students will identify some values which are important to them.

GOAL I - SELF AWARENESS ACTIVITIES

PRIMARY/INTERMEDIATE

OBJECTIVE: THE STUDENTS WILL IDENTIFY THEIR INTERESTS OR DEVELOP NEW INTERESTS.

ACTIVITIES

This is My Bag

Have the children cut out and paste on the outside of a paper bag, pictures or handwritten labels which represent their own interests. They may put inside the bag anything they do not wish to share. At a later date children may wish to share the contents, but they should not feel compelled to do so.

[Decision Making]

Hands Up

Have the children make an outline of their hands and fill it with drawings of things they like to do. [Decision Making]

Pet Unit

Allow those who have pets to bring them to class one at a time and tell how they care for the pet. Make a bulletin board with snapshots of the children with their pets. Visit a pet shop or veterinarian listed in the Community Resource File.

[Pet Care]

Hobby Show

Have the children display their hobbies on their desks. Let them tell the class how they started, what skills and knowledge are required, and how they feel about the hobby. Let the class vote for the three best displays. Invite other classes to view the show. [Oral Expression]

Taped Interviews

Have the children interview one another with a tape recorder. They will ask, "What do you like to do best of all?"

[Interviewing]

Me Collage

After locating and mounting pictures in a collage of personal interests, have the children share the self portraits in small groups. [Oral Expression]

ACTIVITIES

Interest Shield

Have the students decorate coats of arms to identify their personal interests and values. See Values Clarification by Simon, Howe & Kirschenbaum, Strategy No. 47. [Values]

Acrostic

Using the letters of the student's first name, let him/her name some personal interests. Use the dictionary and thesaurus to improve vocabulary skills.

Example: M A T H E M A T I C S

I L L U S T R A T I O N S

C O L L E C T I O N S

H A N D B A L L

A I R P L A N E M O D E L S

E X E R C I S E

L I S T E N I N G T O R E C O R D S

[Vocabulary]

Leisure Time Unit

Discuss, "Does it matter how I use my leisure time?" List options and discuss those which require special training, cost money, may be done alone or with others. Invite parents or others to share their leisure time interests. Keep a journal for a week on "How I Spend My Leisure Time." Write about "A Leisure Time Activity I Enjoy." [Leisure Time]

Project Choice

List a variety of projects which students may select: i.e. make a suitable home for an insect, an ant farm, a collection of insects, or a notebook on insects. Students will select, complete and share their projects. Discuss what has been learned about one's own interests. [Decision Making]

SELF AWARENESS

PRIMARY/INTERMEDIATE
INTERESTS

OBJECTIVE: THE STUDENTS WILL ASSOCIATE THEIR PERSONAL INTERESTS WITH FUTURE CAREERS.

ACTIVITIES

Careers We Are Thinking About

Make a chart of job preferences of the class members. Have the students explain how their personal interests influence the job they selected. [Work Awareness]

Science Careers

Survey the science text and identify 7 careers. Rank order the list according to personal preference. Write a paragraph giving the reasons for the choice. [Work Awareness]

Career Scrapbook

Have the children select a career they are interested in and make a scrapbook about it. Each picture must be labeled with a complete sentence. [Sentence Construction]

Career Comparisons

Have the children compare a career of their choice with their parents' careers. [Work Awareness]

OBJECTIVE: THE STUDENTS WILL DEMONSTRATE AN AWARENESS AND APPRECIATION OF THEIR ABILITY TO CARE FOR MANY OF THEIR PHYSICAL NEEDS.

ACTIVITIES

Blindfold Game

Blindfold a child and have him/her dependent upon a partner for five minutes. Switch roles and then discuss the use, care and safety of the eyes. [Eyes]

Footwear Display

Display a collection of children's footwear. Discuss the importance of proper fitting footwear and the selection of suitable footwear. [Feet]

Nutrition Unit

Following a discussion and research on nutrition, make posters and have a tasting party. Eat in a restaurant and order a nutritious meal, or plan a meal to be served in a restaurant, or plan and prepare a meal to be served in the classroom. [Nutrition]

Dress Code

After a discussion on grooming, have the class prepare a class dress code. Show the film "Posture Habits," PRIME MP-58. [Grooming]

SELF AWARENESS

PRIMARY/INTERMEDIATE SKILLS

OBJECTIVE: THE STUDENTS WILL DEMONSTRATE AN AWARENESS AND APPRECIATION OF THEIR ABILITY TO ACT RESPONSIBLY IN SOCIAL SITUATIONS.

ACTIVITIES

Safety Chart

List safety rules on a chart in preparation for a field trip. Write a chart story for each safety rule. [Safety]

Telephone Reminder

Following a discussion of emergency use of the telephone, make a card bearing all emergency numbers to place near the telephone. Borrow Telezonia, a working model of the telephone from the telephone company or PRIME resource center. [Telephone]

Safety Court

Have the students give tickets and try cases of classmates who disobey safety rules. [Safety]

OBJECTIVE: THE STUDENTS WILL DEMONSTRATE AN AWARENESS AND APPRECIATION OF THEIR ABILITY TO USE THEIR MINDS.

ACTIVITIES

Magic Circle

Following a discussion of American Indians and how they used an inquiring mind to get food, shelter, and clothing, ask the students to tell about a time when they were able to solve a problem by using an inquiring mind. [Indians]

Peer Teaching

Ask a student to review a chapter and prepare a worksheet to present to the class. Or, have the class prepare a math activity, story or puppet show to present to younger children. [Work Awareness]

SELF AWARENESS

PRIMARY/INTERMEDIATE SKILLS

OBJECTIVE: THE STUDENTS WILL DEMONSTRATE AN AWARENESS AND APPRECIATION OF THEIR PHYSICAL AND AESTHETIC SKILLS.

ACTIVITIES

Simon Says
Touch various parts of the body when asked to do so by the leader. [Sensorimotor]

Physical Fitness Exercises
Keep individual record sheets of physical skills such as galloping, skipping, hopping, etc. Let the children help record their accomplishments. See Daily Sensorimotor Training Activities, Education Activities, Inc. [Physical Education]

Bicycle Rodeo
Give a bicycle demonstration for another class. [Bicycle Safety]

Creative Dance
Allow students to move freely within a certain space, with or without music. [Dance]

Dramatization
Have the children plan and present a play about dental health. [Teeth]

OBJECTIVE: THE STUDENTS WILL DEMONSTRATE AN AWARENESS AND APPRECIATION OF THEIR ABILITY AS WORKERS.

ACTIVITIES

Work Chart
Following a discussion about helping at home and at school, make a picture chart of "Things I Do To Help." [Responsibility]

Seasonal Careers
After a discussion on ways we can earn money and jobs we are qualified to perform, make a bulletin board of seasonal careers to show the way fourth graders can earn money during the different seasons. [Seasons]

OBJECTIVE: THE STUDENTS WILL IDENTIFY A VARIETY OF FEELINGS.

ACTIVITIES

Puzzle

Make a crossword puzzle using the feeling words below: angry, bored, brave, jealousy, lonely, love, sad, shy.

Answer Block:

Across

1. love
2. brave
3. jealousy
7. shy

Down

1. lonely
4. bored
5. sad
6. angry

ACROSS

1. Parents ____ their children.
2. When you dive off a high board, you are ____.
3. To envy someone is to show _____.
7. When you are afraid to speak, you are ____.

DOWN

1. If you have no friends, you are ____.
4. If you have nothing to do, you may be ____.
5. Not happy
6. Mad.

[Vocabulary]

Magic Circle

Follow the techniques for a magic circle outlined in the Human Development Program. Discuss topics such as, "I feel good when I'm ____," "The first time I did ____, I was a little scared," "I feel angry when ____," "I am proud that ____."

[Oral expression]

Drawings

Make a picture of a place where you feel happy...something you enjoy doing with a friend...a time you felt lonely. [Art]

ACTIVITIES

Time Line

Have the students make a pictorial time line of their lives. Use snapshots or drawings to indicate the highlights.

[Autobiography]

Past, Present & Future

Have the children describe the kind of person they would like to be when they grow up. Include physical, mental, and social traits. Have the students make a tryptic illustrating how they looked as a baby, at the present, and how they will look ten years from now. Add behavior characteristics for each age.

[Growth]

Autobiographical Sketch

Have the students pantomime or write one or more of the following topics: "A Frightening Experience," "My Favorite Activity," "Something I Do Well."

[Autobiography]

Video Tape

Have the students prepare, tape, view, and evaluate one or more of the following: physical education routine, musical selection, dramatic presentation, discussion or debate.

[Self Expression]

SELF AWARENESS

PRIMARY/INTERMEDIATE
FEELINGS

OBJECTIVE: THE STUDENTS WILL RECOGNIZE SOME FACTORS WHICH INFLUENCE FEELINGS AND WILL IDENTIFY ALTERNATE METHODS OF HANDLING NEGATIVE FEELINGS.

ACTIVITIES

Full Length Mirror

Have the children look into the mirror and evaluate their personal grooming of the hair, face, teeth, and dress.
[Grooming]

Who Are You?

Show the filmstrip, "Who Do You Think You Are?" by Guidance Associates. Repeat the question, "Who are you?" Have the students give different answers each time as they identify themselves in a variety of roles. [Oral Expression]

Simulation

Eat on the floor, Japanese style, during snack time. Later, let the students choose to eat on the floor or at their desks. Discuss how our culture influences our customs. [Japan]

Discussion

Compare the passing from childhood into adulthood in the Inca society and our own. [Inca]

Magic Circle

Read "The Boy Called Booie" from Enchanted Gates. Have students recall a time when they did something they really didn't want to do and it turned out for the best. [Reading]

Rank Ordering

Make a list of math units and activities done in class and have the students rank order them by difficulty. Discuss feelings about the math units. [Math]

OBJECTIVE: THE STUDENTS WILL DEVELOP SOME POSITIVE ATTITUDES ABOUT THEMSELVES.

ACTIVITIES

What's So Special About You?

Each week a different child has his name and address posted on the bulletin board. He wears a crown, may carry the toy mouse, and displays on the bulletin board any items of importance to him. When he can recite his name, address, telephone number and birthday, take his picture with a Poloroid camera and display it on the bulletin board.

You're In the Limelight Today

Outline a flannelboard with miniature Christmas lights and put the children's names in the limelight. They are privileged to do special errands, bring a visitor or pet to school, and to have some private time alone with the teacher that day.

Student of the Week

Provide a sweatshirt labeled "Student of the Week" to be worn by a class member. On Monday when he is out of the room, have the others write positive statements about him. When he returns to the room, he is given the statements to keep in his notebook for reference on a blue day. Everyone has an opportunity to be student of the week.

Yellow Pages Ads

Have students write an ad to sell their talents as they might appear in the yellow pages. Offer extra credit to anyone whose talent is called upon by a classmate.

SELF AWARENESS INTERMEDIATE VALUES

OBJECTIVES: THE STUDENTS WILL IDENTIFY SOME VALUES WHICH ARE IMPORTANT TO THEM.

ACTIVITIES

Word of the Week

Post, discuss, and reinforce a word with value overtones, i.e. justice, discipline, concern, trust. [Justice]

Posters on Maine

Following a discussion on what you like about Maine, and why others might like to live here, have the children make posters on "What I Like About Maine." [Maine]

Letter To A Legislator

Have the children write to a state or federal legislator about a concern. [Letter Writing]

Lifestyle Comparison

Write a paragraph to complete the following thought: "Of the six families we've studied, I'd most like to be part of the _____ family because ..." Correlate with People in America, Unit I. [Cultures]

Opinion Game

Mark a continuum on the blackboard: Strongly Agree - Agree - Undecided - Disagree - Strongly Disagree. Raise questions and allow students to position themselves for the answers. Sample question: "How do you feel about girls playing the Little League?" See Houghton Mifflin Game Box, Career Insights and Self Awareness, "Interests Continuum." [Decision Making]

GOAL I SELF AWARENESS EVALUATIVE TECHNIQUES

PRIMARY/INTERMEDIATE

Interests

1. Display pictures representing ten interests such as playing outdoors, watching TV, helping mother or father, caring for a pet, making things, etc. Give the children each three tokens with their names, and let them indicate their interests.

2. Prepare a list of activities and have the child check each: "Very Interesting, Interesting, or Not Interesting."

3. Have each student match a list of personal interests to career requirements. i.e. spelling - secretary; outdoors - forester.

4. Have each student write a paragraph on "Why I Would Make a Good _____."

Skills

5. Keep individual charts showing performance of each child's responsibilities: Appropriate Dress, Brushed Teeth, Clean Hands, etc.

6. Have the students role play behavior in emergency situations. Students should demonstrate responsible behavior.

7. Administer a multiple choice test on alternate behaviors in a crisis situation.

8. Present an unfinished story to the class. Let each student offer a solution to the problem. Have the students evaluate the contributions of each member by a discussion of the merits of each choice.

9. With the physical education director, prepare individual charts of physical skills appropriate for the children. Have the pupils keep records of their achievements.

10. Hold a class arts festival. Let each pupil make a contribution in drama, dance, sculpture, art or music.

11. Have the class prepare a check list of the qualities of a good worker, then each pupil will evaluate his own performance of a school task, a home task, a paying job, and a volunteer project on a scale of 1 - 5.

Feelings

12. After reading a story aloud, have the students identify the feelings of the characters in the story.

13. Show a picture of people expressing emotions. Have the pupil explain why these people may feel the way they do. Accept reasonable responses.

14. Present the students with a hypothetical situation in which a child has been unfairly treated by a parent, teacher or peer. Ask them to identify the feeling, determine its cause, propose, and rank order three rational behavioral responses.

15. In an individual conference, or in paragraph form, have the children share some ways they feel they have improved this year.

Values

16. Have the students trace around their hands and write one value on each finger that is important to them. Example: fair play.

GOAL II INTERPERSONAL SKILLS

PRIMARY THE STUDENTS WILL DEMONSTRATE COOPERATION IN SOCIAL SITUATIONS.

INTERMEDIATE THE STUDENTS WILL DEVELOP AN APPRECIATION OF THE DIFFERENCES BETWEEN INDIVIDUALS OR GROUPS.

OBJECTIVES

PRIMARY: The students will identify their roles as members of a group at home, at school, or in the community, and will demonstrate a respect for the rights and feelings of others in those groups.

INTERMEDIATE: The students will demonstrate an appreciation of the rights and contributions of other individuals or groups.

The students will develop skills in social reasoning and interaction.

GOAL II INTERPERSONAL SKILLS ACTIVITIES

PRIMARY

OBJECTIVE: THE STUDENTS WILL IDENTIFY THEIR ROLES AS MEMBERS OF A GROUP AT HOME, AT SCHOOL, OR IN THE COMMUNITY, AND WILL DEMONSTRATE A RESPECT FOR THE RIGHTS AND FEELINGS OF OTHERS IN THOSE GROUPS.

ACTIVITIES

Family Unit

Have the children draw pictures of their families. Discuss the role of each member and the likenesses and differences between families. Show the film "Families Are Different and Alike," PRIME MP-1139. [Home]

Ground Rules

Discuss problems in the classroom and on the playground. Make a chart of rules together. Make posters to illustrate the school rules which the group has agreed upon. [Safety]

Friendship Bulletin Board

Select a number of attractive pictures of friends interacting. Discuss the pictures and list the qualities of a friend. Have the children write about "What Things We Look For In a Friend." Put the stories and the pictures on the board. See Focus On Self Development, SRA, photoboards. [Friendship]

Puppetry

Role play good and bad behavior while being a guest in a friend's house. Dramatize a situation in which an individual refuses to cooperate. See Alphatime, Miss "O". [Cooperation]

What About Gum?

Use a discussion and chart story to present the problems associated with gum in school, on the playground, and in a public place. See Alphatime, picture card #8. [Manners]

Everround

Present a make-believe community with a different culture to gain a new frame of reference. See The Communities We Build, T.M. page 53. [Tolerance]

ACTIVITIES

Group Activities

Before orienting the children to the overall project, discuss some of the advantages and problems of group work. Cooperatively agree on rules for the group and make certain the students understand their roles and responsibilities to the total group.

Safety Posters: Allow four children to work in each group to plan and prepare a safety poster. [Safety]

Communication Workers: Divide into groups to prepare a dramatization, written report, bulletin board, or classroom display in the field of communication. [Communication]

Measuring: Work in teams and measure the room, hall, wall, locker area, bulletin board, etc. [Measurement]

Games: Play games which require partners, such as Tic-Tac-Toe. The loser congratulates the winner. [Sportsmanship]

Neighborhood Litter Patrol: Have the group plan and carry out a program of litter control. [Environment]

OBJECTIVE: THE STUDENTS WILL DEMONSTRATE AN APPRECIATION OF THE RIGHTS AND CONTRIBUTIONS OF OTHER INDIVIDUALS OR GROUPS.

ACTIVITIES

We Are All In the 4th Grade, But We Are All Different

Prepare a silhouette of each student. On another sheet, have students write their interests and skills, and share them. Discuss individual differences, then display the silhouettes and personality sketches. [Self Awareness]

Peer Teaching

Assign certain students to assist others in arithmetic or reading. Discuss acceptance of individual differences. [Tolerance]

Handicapped

Invite a deaf or blind person to visit the class. Read biographies of Helen Keller or Louis Braille. Blindfold half the class and let the other half lead them around. Discuss the difficulties of the handicapped. [Empathy]

Speaker From Israel

Contact the local synagogue or the foreign student advisor at the local university or high school. Or check the Community Resource File in the library for the name of a person familiar with this foreign country. [Israel]

Cultural Data Chart

Have groups of students list the differences and similarities between the Incas and the Mundurucu. Compare the family life, work, education and values. See "Latin America," People in Change, T.M., p. 38. [Cultures]

Language Tree

Make a tree depicting national groups as the roots and derived words as the fruit. See "Language in Early America" in Language and How To Use It, Grade IV. [Cultures]

Discussion

"How would the world be diminished if it contained only people like me?" See People in America, T.M., p. 37. [Cultures]

OBJECTIVE: THE STUDENTS WILL DEVELOP SKILLS IN SOCIAL REASONING AND INTERACTION.

ACTIVITIES

Personal Profiles

Have the students fill out forms describing their favorite foods, sports, animals, subjects, TV shows, and their spare time activities. Share the results in small groups. Discuss "How important are our differences?" "How well can you predict how another will answer?" Graph the data. [Self Awareness]

Discussion

After reading a story such as "Miles of Smiles" from Magic Word, discuss the difference between laughing at someone and with someone. Tell about a time you tried to make someone feel comfortable about a joke. [Tolerance]

Spaceship Game

Use the Coca Cola Spaceship Game or discuss "What restrictions are imposed on a closed environment such as a spaceship or a raft like the Kon Tiki?" [Environment]

Group Dynamics

Divide the class into two groups. Let one group observe as the other group deals with the problem. The group must agree on how to spend $2.00. After ten minutes, or when agreement is reached, the observers will discuss the interactions they observed. [Money]

Hot Issues

Following a ten minute discussion on a controversial issue such as prayers in schools, busing, taxes, women in sports, have the class analyze the way the group interacted as they sought a solution. [Current Events]

ACTIVITIES

Group Planning

Discuss with the group the advantages and disadvantages of group planning. Help the group identify the problem and determine options. Allow the group to work on a specific project together and to assess their ability to work together.

Collage: Select pictures which show interpersonal relationships and make a collage. See Bread and Butterflies Guide, page 64. [Decision Making]

Service Project: Following a discussion of the needs of individuals in institutions, have the students prepare Christmas stockings, Easter baskets, books, cards or make friendly visits or sing carols at nursing homes. [Empathy]

Fund Raising: Have the class take responsibility for a booth at the school fair, make crafts, cook food or raise plants to sell. [Money]

Do-It-Yourself-Custodian: Make arrangements with the janitor not to clean the room for a week. Have the pupils develop a plan to keep the room clean. [Responsibility]

GOAL II INTERPERSONAL SKILLS EVALUATIVE TECHNIQUES

PRIMARY

1. Have the students make drawings of positive and negative behavior in a variety of social situations.

2. Have the students recall three school rules which have made the school a happier place to learn.

3. With a partner, let the student pantomime something a friend would do and something a friend would not do.

4. Have the pupils list three ways they cooperate with others at home.

5. Have the students use check lists to evaluate their ability to work cooperatively:

	YES	NO	SOMETIMES
I take turns and share materials.	___	___	___
I do my own part on time.	___	___	___
I am helpful to others without being bossy.	___	___	___

6. Keep anecdotal records of the students' behavior during a group project. Identify cooperative, obstructive, and neutral behavior. Repeat the evaluation in several months and compare the results.

INTERMEDIATE

1. Have the students identify three things they admire in a classmate.

2. Ask the students to identify three groups or cultures different from their own, and list at least one contribution made by each.

3. Prepare a check list to evaluate the student's ability to interact with others. The evaluation may be completed by the student, a peer or the teacher.

Listens to others and is willing to compromise	1 2 3 4 5
Accepts responsibility for the overall project	1 2 3 4 5
Is helpful to others in the group	1 2 3 4 5

4. Have the class analyze an interpersonal problem and offer possible solutions. Note those children who are able to take the perspective of all parties. Suggested resource: "First Things: A Strategy for Teaching Social Reasoning," filmstrip series by Guidance Associates.

5. Have students role play a typical day in the life of a person of a different culture. Note their ability to identify with a person of a different background.

GOAL III DECISION MAKING

PRIMARY THE STUDENTS WILL USE THEIR SENSES TO GATHER DATA AND TO DEVELOP CONCEPTS.

INTERMEDIATE THE STUDENTS WILL DEVELOP SKILLS IN MAKING GENERALIZATIONS, HYPOTHESIZING AND PREDICTING.

OBJECTIVES

PRIMARY: The students will develop skills in observation, identification and classification of a variety of tangible and intangible objects.

The students will demonstrate their ability to identify simple cause and effect relationships.

As the students make simple decisions, they will develop an awareness that decisions involve choices based upon individual interests and values, and that decisions often require a commitment.

INTERMEDIATE: The students will develop a beginning skill in the use of the following decision making process:

1. Identify the problem. Recognize that a problem does exist and state clearly just what the problem is.

2. Gather data. Review all known information about the problem, and locate new information. Organize the information for the purpose of making generalizations.

3. Evaluate the data. Analyze and assess the information, and identify the alternatives.

4. Plan a course of action. Recognizing that the decision is tentative, select an alternative and plan a course of action.

5. Reassess and evaluate. After implementing the course of action, determine whether there is a need to do further study or to change the conclusions.

As the students use the above process, they should:

Begin to develop an awareness of their autonomy as decision makers.

Recognize that decision making may be subjective, since the individual's interests, culture and values influence the choice of alternatives.

Begin to recognize the effect their decisions have on others, their responsibility for the consequences of their decisions, and their ability to change a course of action through reassessment.

GOAL III DECISION MAKING ACTIVITIES

PRIMARY

OBJECTIVE: THE STUDENTS WILL DEVELOP SKILLS IN OBSERVATION, IDENTIFICATION, AND CLASSIFICATION OF A VARIETY OF TANGIBLE AND INTANGIBLE OBJECTS.

ACTIVITIES

Button Sorting

Distribute buttons of various shapes, sizes, and colors, and allow the children to classify them. Correlate with Alpha-time, Mr. B. [Attributes]

Construction Materials Exhibit

Have the children contribute to a classroom display of various kinds of wood, rock, and minerals used in the construction of a house. [Construction]

Picture Study

Study pictures of workers in a supermarket and in a factory. Discuss which workers provide goods and which provide a service. [Work Awareness]

Job Classification

Have the children assist in the preparation of flash cards which name familiar careers. Arrange the cards in families: transportation, food, health, business, etc. [Work Awareness]

ACTIVITIES

Problem Writing

Each child will make up one problem which requires addition or subtraction to solve. Let each pupil read the problem aloud and have the class decide which process must be used. [Math]

Measurement Attribute Game

Distribute pictures of products and have the children classify those which could be purchased by the pound, ounce, inch, yard, quart or bushel. [Measurement]

Birthday Graphs

When the children have learned their birthday month, make a class picture graph as follows. Let each child draw a 6" figure of himself. Use a Smiley stamp for the head to assure uniform size. List the months on a chart. Let the children paste their images next to their birthday months. Later, cut paper strips in various lengths to make a bar graph by matching the strips to the number of children listed for each month.

Other graphs may include line graphs for daily temperatures at 9:00 A.M. and 1:00 P.M., or visual records of hair and eye color, or the distance each child can jump. [Graphs]

OBJECTIVE: THE STUDENTS WILL DEMONSTRATE THEIR ABILITY TO IDENTIFY SIMPLE CAUSE AND EFFECT RELATIONSHIPS.

ACTIVITIES

Filmstrip

View and discuss the problem presented in the filmstrip "You Promised" from First Things by Guidance Associates. Help the children to determine the cause and effect relationship. [Reasoning]

Experiment

Fill a glass jar with water, place it in a paper bag, then put it in the freezer. The ice will expand and break the jar. Repeat the experiment as often as necessary until the children can express the concept: water expands as it freezes. Use this activity as enrichment with "Five Thousand Cannon Balls" from Better Than Gold. [Water]

Cook Macaroni

Observe and taste the difference in macaroni before and after cooking. Correlate with Alphatime, Mr. M. [Cooking]

Neighborhood Walk

Look for signs of people, plants, and animals getting ready for seasonal changes. Arrange data on an experience chart in three categories: people, animals, and plants. [Seasons]

Paper Doll

Prepare a life size paper doll with a variety of outfits. Have the children select the appropriate dress for various types of weather. [Weather]

Safety Posters

Following a discussion of swimming safety rules, make posters illustrating safe and unsafe conditions. Correlate with "The Boy Who Couldn't Swim" from Shining Bridges. [Safety]

OBJECTIVE: AS THE STUDENTS MAKE SIMPLE DECISIONS, THEY WILL DEVELOP AN AWARENESS THAT DECISIONS INVOLVE CHOICES BASED UPON INDIVIDUAL INTERESTS AND VALUES, AND THAT DECISIONS OFTEN REQUIRE A COMMITMENT.

ACTIVITIES

Unfinished Story

Present a moral dilemma such as that found in "The Stolen Picture" in More Than Words. Have the children make up endings to the story and share their ideas with the group. [Reasoning]

Choose A Pet

Draw pictures of different animals a child would choose at the pet shop. Have him explain his choice to the class. [Animals]

Needs and Wants Chart

Prepare a display of various items or pictures representing needs and wants such as: fruit, candy, clothing, housing, motor boats, water, washing machines. Ask students to identify each and tell which are most essential. [Needs & Wants]

Room Bank

Have the children set a goal such as a class trip or party. Discuss the money needed and the necessity for saving. The teacher will keep a room bank with a security box and homemade passbooks. Students are encouraged to earn their own money with which they make deposits. [Banking]

OBJECTIVE: THE STUDENTS WILL DEVELOP A BEGINNING SKILL IN THE USE OF THE DECISION MAKING PROCESS.

ACTIVITIES

Magic Circle

"Have you ever wanted two items and only had money for one? How did you decide which you would buy?" Following the sharing of experiences, present the five steps in the decision making process listed in page [Money]

Alternate Routes

Have groups plan a thirty day tour of the United States by plane, rail, bus or car. Design travel brochures with cost and advantages of each tour. Refer to steps in the decision making process throughout the activity. [United States]

Menu Planning

Following a presentation of rules of nutrition, have the students plan and prepare a well balanced meal. They may collect money, purchase the food, prepare and serve the meal. Have the group consciously use the decision making process in planning the menu and putting on the meal. [Nutrition]

First Aid Flash Cards

Prepare a set of cards which give a description of a situation with the condition of the victim. On the back give three alternative courses of action. Have students use their knowledge of first aid and the decision making process to select the best solution. Let students explain how they used each step of the process to reach a decision. [First Aid]

OBJECTIVE: Step 1. IDENTIFY THE PROBLEM. RECOGNIZE THAT A PROBLEM DOES EXIST AND STATE CLEARLY JUST WHAT THE PROBLEM IS.

ACTIVITIES

Room Election

Present the situation: help is needed to keep the classroom operating smoothly. Have students define the problem and reach a solution such as a room election. Let the students list necessary workers and the qualities needed for each position. Let them decide how the workers will be chosen. Suggested workers: line leader, board washer, messenger, desk monitor, song leader, bulletin board chairman, hospitality chairman, room librarian.

Review the decision making process used and stress the importance of identifying the problem as a starting point.

[Community Living]

Playground Observers

Ask the class, "Do people ever act against their wishes because they don't know how to make a decision?" Have the students observe children from other classes playing in groups. Assign each student the task of finding one situation in which one group member is pressured to do what the rest wish him to do. Share observations and then discuss how a person can gain autonomy through decision making. [Interpersonal Skills]

Mushrooming Problems

Prepare a bulletin board showing a field of mushrooms. Have the children label each stem as an environmental problem. On the cap they will indicate the agencies or people responsible for the solutions. [Environment]

OBJECTIVE: Step 2. GATHER DATA. REVIEW ALL KNOWN INFORMATION ABOUT THE PROBLEM, AND LOCATE NEW INFORMATION. ORGANIZE THE INFORMATION FOR THE PURPOSE OF MAKING GENERALIZATIONS.

ACTIVITIES

Classified Directory

Make a classified guide of goods and services found in the neighborhood. Let students decide upon the classification base. Recall that gathering and analyzing data is an important phase of the decision making process. [Alphabet]

Classification

Following a study of the characteristics of living things, have the students classify an assortment of pictures: living, non-living; plants, animals; vertebrates, invertebrates, etc. Discuss with the students their ability to make generalizations from a list of facts. [Plants & Animals]

Debate

Resolved: The mountains of Maine should be set aside as areas to remain forever wild with limited public access given.

Review the decision making process and recall the importance of gathering and assessing data before making a decision. [Environment]

Fact or Fancy?

Have the students write original stories, read them aloud, and ask members of the class to decide "Could this be true?" Emphasize the importance of assessing the data in the decision making process. [Creative Writing]

OBJECTIVE: Step 3. EVALUATE THE DATA. ANALYZE AND ASSESS THE INFORMATION AND IDENTIFY THE ALTERNATIVES.

ACTIVITIES

Opinions or Facts?

Raise a question such as: "What characteristics make a good leader?" "Which country has the best government?" "Which state is the best to live in?" After soliciting opinions, apply the decision making process. Point out that step 3 involves individual values and interests; therefore, not all will agree. [Government]

A.V. Evaluation

Evaluate a film on predetermined criteria.

	Poor	Fair	Good	Excellent
Photography	P	F	G	E
Content	P	F	G	E
Interest	P	F	G	E
Music	P	F	G	E

Compare the evaluations and note that evaluation of data is often subjective. [Photography]

Then or Now?

Identify six common occupations which existed in Maine 200 years ago. Have the students research one career at a time at learning stations. Use a chart such as that below to organize the information. Ask the students in which period they would rather work and why. Discuss the impact of one's values as well as knowledge of a subject that influences a decision.

	THEN		NOW	
	Pro	Con	Pro	Con
Farming				
Fishing				
Lumbering				
Homemaking				
Military Life				
Manufacturing				

[History]

OBJECTIVE: Step 4. PLAN A COURSE OF ACTION. RECOGNIZING THAT THE DECISION IS TENTATIVE, SELECT AN ALTERNATIVE AND PLAN A COURSE OF ACTION.

ACTIVITIES

Poster Contest

Have the class make posters on bicycle safety for the lower grades. Use decision making skills to plan the context, select the winners and arrange the display. [Safety]

Merchandising

Have the students work in groups to create an effective desk top display of a product. This activity may be correlated with the story "Southpaw" from High Roads. Before the activity, list the 5 steps of the decision making process for the groups to follow. Challenge the students to use the process in their activity. [Business]

Editorials

Have the students identify a problem and write a reform article about it. These sample topics may be used: "Girls Should Be Allowed to Play on the Boys' Team," "All Bottles Should Be Nonreturnable," "Schools Should Be Required to Have Swimming Programs for All Students," "Schools Should Have Hot Lunches Available for All Students." Have the students use the decision making process as they prepare the article. The editorial should include a course of action to be pursued by the individual or the group. [Newspapers]

Task Completion

When the class is familiar with the decision making process, assign the students a simple task such as making a picture of a room full of fire hazards. Then have each explain the thought process he experienced, following the 5 steps of decision making. [Safety]

OBJECTIVE: Step 5. REASSESS AND EVALUATE. AFTER IMPLEMENTING THE COURSE OF ACTION, DETERMINE WHETHER THERE IS A NEED TO DO FURTHER STUDY OR TO CHANGE THE CONCLUSIONS.

ACTIVITIES

Unfinished Story

Read the beginning of a story to the class. Include the characters, setting and a dramatic problem. Have the students write logical endings in the light of the information given in the introduction. Read the endings aloud and let each student reassess his own ending. [Creative Writing]

Career Judgments

Assign science careers at random to the students. Ask them to guess whether or not they are suited to these careers. Have the students research the field and then reassess the original hypothesis. [Work Awareness]

Estimating

Ask the students to quickly estimate a page of examples without doing them. Discuss reasonable short cut methods. Try different techniques and evaluate them. [Math]

Budget Writing

Have the students develop a personal weekly budget using items such as specific standards and figures, i.e.,

school lunch	$1.25
savings	.25
recreation	1.00
school supplies	.25
club dues	.25

Encourage the students to live within a budget for two weeks and then evaluate it, making necessary changes. [Money]

GOAL III DECISION MAKING EVALUATIVE TECHNIQUES

PRIMARY

1. Have the children list 25 different objects in the classroom and classify them in different ways. They may arrange them according to size, color, use, or composition.

2. Present the pupils with a specific situation and have them evaluate the situation, then role play or illustrate the effect.

riding a bicycle carelessly	- causes accidents
not coming directly home	- causes punishment
being selfish with a new toy	- causes loneliness
doing your share at home	- causes happiness
using tools carelessly	- causes accidents
changing of seasons	- causes change of outer wear

3. Give a multiple choice test to measure the pupil's understanding of simple cause and effect relationships.

   A. If farmers do not plant seeds this spring, then
      1. they will need a tractor
      2. their crops will not grow
      3. there will be no rain all summer

   B. Because people started using machines 100 years ago to make things, they discovered
      1. they should eat the four basic foods each day
      2. they could move goods faster by boat than by horses
      3. they could make more products in less time with machines

4. In a magic circle, ask, "If I gave you all 1/2 hour of free time right now to spend as you wish, do you think everyone in the class would decide to do the same thing? Why, or why not?" In the discussion, note each child's understanding that a decision involves choices based upon a person's interests and values.

5. Discuss Mark's problem with the children and indicate on a scale of 1 - 5 the pupil's position on commitment to a promise.

   "Mark promised his mother that he would help at home by doing the dishes all week. The second day he did not do the dishes for one of the following reasons. Was he doing the right thing to break his promise?"

   a. The house burned down.
   b. His mother asked him to go to his grandmother's on an errand instead of doing the dishes.
   c. Someone else in the family offered to do the dishes for him.
   d. His friend came over to visit.
   e. He had some homework to do.
   f. His favorite TV program all week was on.
   g. He felt like watching TV instead of doing the dishes.
   h. He didn't want to do them anymore.

INTERMEDIATE

1. Select 10 study prints which indicate that a problem exists. Have the students write a one-sentence description of the problem pictured. Examples of pictures: children arguing or teasing, litter, a careless act, etc.

2. Have each student prepare a report on how a natural resource is made into a product. Information should be organized in sequence such as, the product and how it is obtained, transportation to a factory, and the manufacturing process.

3. Have each student prepare a chart on the various kinds of transportation, and list the advantages and disadvantages of each.

4. Have each small group determine the average number of books per student in the group. Note those who are able to organize for action.

5. Ask each child to tell about a time when he, or someone else, did what he thought was best and it turned out wrong. Then, have him tell what could have been done differently to make it turn out right.

GOAL IV WORK AWARENESS

PRIMARY THE STUDENTS WILL GAIN KNOWLEDGE OF WORKERS IN THE HOME, SCHOOL, AND COMMUNITY.

INTERMEDIATE THE STUDENTS WILL IDENTIFY THE PERSONAL AND ENVIRONMENTAL FACTORS WHICH INFLUENCE A WORKER.

OBJECTIVES

PRIMARY: The students will identify a number of workers in the home, school and community.

The students will recognize that many careers are related.

The students will list three or more responsibilities of a number of workers.

INTERMEDIATE: The students will continue to identify, classify, and gain information about many careers.

The students will identify a number of personal and environmental factors associated with a variety of careers.

GOAL IV WORK AWARENESS ACTIVITIES

PRIMARY

OBJECTIVE: THE STUDENTS WILL IDENTIFY A NUMBER OF WORKERS IN THE HOME, SCHOOL, AND COMMUNITY.

ACTIVITIES

Parents' Careers

Have the children interview their parents and then dictate stories about their jobs. Attach each story to the child's drawing of the parent at work. If a parent is not working, let the child find out about a previous career or a career goal of that parent or another significant adult in his life. [Family]

Our Mothers' Jobs

Have the children assist in the making of a classroom chart on careers such as the one below:

OUR MOTHERS' JOBS				
Name	Job	Uniform?	Tools?	Duties

[Family]

Our School Workers

Display labeled snapshots of every school employee who serves the children in the building. Display the pictures in the school lobby. [School]

School Tour

After listing the workers in the school, make a tour of the building and talk with the employees. Review the jobs with a chart story or bulletin board picturing the workers. [School]

Neighborhood Workers

Make a map of the neighborhood. Use the map to locate and identify the workers in the area. Or, let the children paint the exterior of an old refrigerator carton on four sides - North, East, South, and West - picturing the places of business found in the neighborhood. [Community]

ACTIVITIES

Hat Display

Have each child bring a hat to class and tell about the worker who uses it. [Community]

Career Flash Cards

Let the pupils help prepare a set of 4x12 cards with job titles. Pass the cards to the children secretly and let them pantomime the careers for the class to guess. Tape or pin a card to a pupil's back and let the child ask 20 questions to discover the career. Cards may also be used for vocabulary practice. [Vocabulary]

"I See" Career Game

To introduce a variety of careers, play this guessing game. "I see." "Whom do you see?" "I see someone writing a book. Who is he/she?" Answer: author. [Vocabulary]

Business District

Take a walking trip to the downtown area. Visit five or six small stores. Let the children talk with the workers and learn what they do. Follow up activities may include listing the workers, drawing pictures, writing a chart story, and using toy telephones to role play the workers offering goods and services. [Community]

Bus Tour

Hire a bus and tour the metropolitan area. Identify the residential, business, and industrial areas. Let the bus serve as the classroom as the class learns about the community. [Community]

OBJECTIVE: THE STUDENTS WILL RECOGNIZE THAT MANY CAREERS ARE RELATED.

ACTIVITIES

Workers' List

Following a field trip to the supermarket, make a list of all the workers observed. [Supermarket]

Bulletin Board

When studying a topic such as Animals, display pictures of workers in that field. [Animals]

Diorama

Following a visit to the dentist's office, let the children prepare shoebox dioramas to illustrate the workers they saw. [Dentist]

Research

While studying a unit on Community Helpers, take the children to the library and help them gather information on their careers. Work with the school librarian in advance to make certain there are sufficient materials available. [Library Skills]

ACTIVITIES

Pantomime

Identify a number of careers in the construction industry and let the children pantomime a worker for the class to guess the identity. Examples: carpenter, plumber, mason, earth mover, architect, electrician, etc. [Construction]

Movie Making

Have the children draw a series of pictures depicting workers involved with the raising, transporting, processing, and distributing of food. Paste the pictures in a strip to make a "movie." Share the movie with another class. [Food]

Dramatization

Have the children plan and present a costumed play on hospital workers. Each child represents a different hospital worker. [Health]

Puppet Show

Use paper bag puppets to dramatize the work and lifestyle of people who work underground. Correlate the activity with the story "Holes! Holes! Holes!" in Through Happy Hours. [Community Helpers]

OBJECTIVE: THE STUDENTS WILL LIST THREE OR MORE RESPONSIBILITIES OF A NUMBER OF WORKERS.

ACTIVITIES

Career I.D.

Have the students print their surnames in large letters on construction paper. Then decorate the letters and background with drawings related to a chosen career. [Self Awareness]

What's Your Bag?

Have the children think of a career, find pictures relating to it, paste the pictures on a small bag, and wear it as a hat. Let the classmates guess the career. [Self Awareness]

Collage

Have the children help locate pictures of professional athletes. Prepare a collage for the bulletin board. Discuss the skills and training required of a professional athlete. [Athletics]

Tool Exhibit

Have the children contribute to a classroom display of carpenter's tools. Write chart stories about each tool and its use. Invite a carpenter, handyman, or the school janitor to demonstrate some of the tools. Let the children practice fashioning model tools from clay. [Construction]

ACTIVITIES

Field Trips

Visit a place of business associated with the needs and interests of the class. Interview the workers to determine their responsibilities and the training required for their work. Consult the Community Resource File for places to visit. [Community]

Resource Persons

Invite workers to class and have them describe their work and answer questions about their responsibilities. Use parents, friends, other teachers, or consult the Community Resource File. [Community]

Farm Mural

After listing the tasks of a farmer, make a mural showing the things that must be done on the farm each day and each season. [Farm]

Community Helpers Unit

To reinforce learnings about any community helper, let the children dramatize the role of the worker. They may make and wear a hat or use Puppet Playmates by Instructo. See the wide selection of materials on community helpers in the library. [Community]

OBJECTIVE: THE STUDENTS WILL CONTINUE TO IDENTIFY, CLASSIFY, AND GAIN INFORMATION ABOUT MANY CAREERS.

ACTIVITIES

Recording

When the class goes on a field trip, provide the students with a booklet in which they can make notes. Indicate the letters of the alphabet on one page, and have the students list all the careers they observe while traveling. [Alphabet]

Model City

Have the children build a model city from cardboard boxes or toys brought from home. Make and position labeled images of the workers in the city. Use the images as finger puppets and role play each worker's task. [Community]

A - Z Careers

Have the children locate newspaper articles about workers. Paste them by job titles in alphabetical order. Keep hunting for "Q" and "Z." Read What Will I Be From A to Z by National Dairy Council. [Alphabet]

Rebus

Have the children prepare a rebus for a career name and allow classmates to guess it. Motivate with the Career Flash Card Rebus by CFI. [Rebus]

Career Match Game

Cut out pictures of 25-30 workers and mount them on cards. Have the children look up and write a description of one worker on another card. Include both obvious and little known information. When the student reads the description, the class will attempt to match it to the picture. [Reporting]

Yellow Pages

Refer to the yellow pages in the telephone directory to find a list of careers in the area. Have the students find five new occupations and look them up in the dictionary. [Dictionary]

ACTIVITIES

Flow Chart

Diagram the progress of a food item such as wheat, from production to a farm, its transportation to the mill, the processing and manufacture of a product, and its final distribution to the consumer. [Food]

Wall Chart

Make a diagram of government careers at local, state, or federal levels. [Government]

List

With the students, prepare a list of careers related to agriculture. [Farm]

Discussion

Discuss "Which careers other than a forest ranger allow a person to work in the wilderness?" Use the Dictionary of Occupational Titles for suggestions. [Environment]

Mini Trips

Plan a series of mini trips around a related career such as education. Let some students visit the school board, others visit the superintendent, others visit the high school principal or college president. The class will then prepare a combined report on the workers in education. [School]

Class Career Booklet

Have the class prepare a list of workers in a hospital and research the responsibilities and requirements for employment for each worker. The reports may be compiled in a class booklet with illustrations. [Health]

ACTIVITIES

Career Notebook

Have each student select a career and collect pictures about the career for a notebook. Each picture must have a caption written with at least one complete sentence.

[Creative Writing]

Learning Station

Set up a career station in the classroom. Change the assignments weekly. Have the students research careers related to the content subjects or view filmstrips on work from the library. [Reporting]

Bulletin Board Collage

Combine pictures and items used by a gardener: tools, seeds, plants, peat moss, fertilizer, soil, etc. [Plants]

Law Unit

Have a lawyer come and speak to the class. Then, arrange for the class to visit court. [Law]

Interview/Report

Following a discussion of interview techniques, have each student prepare and conduct an interview with a worker. Have the students photograph and tape record the interview and then prepare a presentation for the class. [Interviewing]

What's My Line?

Have each student secretly research a career. When prepared, the student sits before the class and is questioned about the work. The class is given three minutes to identify the line.

[Research]

OBJECTIVE: THE STUDENTS WILL IDENTIFY A NUMBER OF PERSONAL AND ENVIRONMENTAL FACTORS ASSOCIATED WITH A VARIETY OF CAREERS.

ACTIVITIES

Haiku

Have the students capture the essence and feeling of a particular career in Haiku verse. [Poetry]

Shadowing

Arrange for the students to shadow different school workers. Have them observe or assist the secretary, janitor, librarian, kindergarten, music, art, or physical education teacher for part of a day. Let the students share their feelings about the work observed. [School]

Resource Persons

Invite parents to speak about their work, and explain how every job requires a particular temperament and aptitude. [Self Awareness]

Discussing Aptitudes

After reading "What's Going On Here?" from Open Highways, discuss the responsibilities, and the physical and mental conditioning required of a professional athlete. [Self Awareness]

ACTIVITIES

Guest Speaker

Invite a personnel manager or employer to speak to the class and answer the following questions: How important is attitude in any job? How important is team work? What do you do if you do not like your job? [Self Awareness]

Group Discussions

Have the students discuss what difference it makes whether people are on time at their work...whether they do their best...whether they have good health...whether they get along well with other people. [Value of Work]

Changing Careers

Invite persons who have had two or more careers to speak to the class and discuss their reasons for making a career change. [Decision Making]

Movin' On

Discuss the reasons people move. Have the students name some careers in which they would expect to move several times, and name others which require permanence. Correlate the discussion with "Making A Start" from Magic Word. [Decision Making]

ACTIVITIES

A Cowboy's Lifestyle

Have the class compare the lifestyle of a cowboy with that of their fathers'. Discuss the environmental factors that influence careers. Are there cowboys in Maine? Correlate this discussion with the reading of "The Prairie Fire" from High Roads. [Lifestyle]

Historic Tour

Visit local sites of industries of long ago. Discuss ways the environment influenced the economy. [History]

Discussion

Identify the work done by each of the three families in Mexico City studied in "Latin America," People in Change. Have the students explain how the environment influenced both job opportunities and lifestyle. [Latin America]

Data Chart

Have the class prepare a data chart to compare the occupations of the six families studied in Unit I of People in America with their environment and lifestyle.

FAMILY	WORK	ENVIRONMENT	LIFESTYLE
Wheeler			
Knight			
Torres			
Swenson			
Iule			
Wong			

[United States]

GOAL IV WORK AWARENESS EVALUATIVE TECHNIQUES

PRIMARY

1. Have the children draw pictures of their parents, or other significant adults in their lives, at work.

2. Have the children match sketches of school workers with their job titles.

3. Have the children assist in compiling a class list of community careers.

4. Each third grader will be able to list twenty different careers without assistance in fifteen minutes.

5. Given a group of careers, the child will be able to identify one which is not closely related to the others.

   Example: Nurse...Doctor...Waiter...X-Ray Technician...Pharmacist

   Farmer...Dairyman...Grocer...Truck Driver...Secretary

6. Have each child draw a picture of a worker and tell the class three responsibilities of the worker.

7. Have the children match ten careers with ten definitions of workers they have studied.

8. Have each child write a paragraph describing three responsibilities of a particular worker, such as a telephone lineman.

INTERMEDIATE

1. In five minutes, the student will list 25 different careers.

2. Given a scrambled list of 16 careers from 4 career families, the student will classify the careers.

   Example:

sculptor	carpenter	secretary	cashier
musician	plumber	file clerk	produce manager
artist	electrician	typist	meat cutter
silversmith	mason	office manager	shelf stocker

3. The student will prepare a written report on a career. He will include the responsibilities, working conditions, training and aptitudes required, and list the advantages and disadvantages as he sees them.

4. Given 4 geographic locations the student will match a variety of career options with the particular geographic locations.

   Example:

urban	rural	woodlands	mountains
manufacturing	farming	forestry	mining
transportation	ranching	game warden	recreation

5. The students will use the continua below to position the following workers, thus demonstrating their understanding of the personal and environmental factors associated with certain careers.

TEACHER FOOTBALL PLAYER COWBOY FACTORY WORKER

GOAL V MANIPULATIVE SKILLS

PRIMARY THE STUDENTS WILL DEVELOP THEIR PSYCHOMOTOR SKILLS.

INTERMEDIATE THE STUDENTS WILL IMPROVE THEIR PSYCHOMOTOR SKILLS.

OBJECTIVES

PRIMARY: The students will develop their psychomotor skills through participation in the following areas: cooking, crafts, gardening, physical education, sewing, and woodworking.

INTERMEDIATE: The students will improve their psychomotor skills through participation in the following areas: cooking, crafts, gardening, photography, physical education, sewing, and woodworking.

GOAL V MANIPULATIVE SKILLS ACTIVITIES

PRIMARY

OBJECTIVE: THE STUDENTS WILL DEVELOP THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN COOKING.

ACTIVITIES

Open-faced Sandwiches

Cut fancy shapes of bread with a cookie cutter. Spread with soft cheese, and decorate with raisins, olives, radish, green pepper, or carrot slivers. [Cooking]

Jello Party

Prepare a gelatin dessert or an instant pudding. The children will measure, stir, and pour the liquid. [Cooking]

Applesauce

Cut, pare, and cube two apples. Soak the apples in a salt water solution for 1/2 hour. Place the apples, 1/4 cup of water and 1 tablespoon of lemon juice and 2 tablespoons of sugar in a blender. Blend at high speed. This will serve 4 or 5. Under supervision, the children will use a paring knife. [Food]

Make a Meal

Correlate with Alphatime, Mr. M. Prepare muffins with margarine, macaroni with meat sauce, marshmallows, and M & M's. The children will stir and measure the ingredients, set the table, and share the meal. [Alphatime]

Doll Salad

Have the children make a salad such as the one shown below.

[Nutrition]

OBJECTIVE: THE STUDENTS WILL DEVELOP THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN CRAFTS.

ACTIVITIES

Potato Printing

Carve the letter "V" in a potato to make a stamp. Dip the potato stamp in poster paint and make a design. The children will use a knife under supervision. Correlate with Alphatime, Mr. V. [Crafts]

Model Building

Make a model farm using paper mache or clay animals, Lincoln Logs, and an Erector Set. Correlate with "Farm Life" unit in Science for Work and Play. [Farm]

Landforms Collection

Have the children locate, cut, mount and label pictures of landforms and water bodies. [Landforms]

Origami

Fold and cut paper to make a star, pig, dog, or crow. Correlate with "Paper Magic" from More Than Words. [Reading]

Glider Contest

Have the students construct and fly a model glider. Correlate with "The Wright Brothers" in More Than Gold. [Aviation]

MANIPULATIVE SKILLS PRIMARY

OBJECTIVE: THE STUDENTS WILL DEVELOP THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN GARDENING.

ACTIVITIES

Terrariums

Gather moss and small berry plants and evergreens from the woods in the early fall. Place the plants in a terrarium partially filled with charcoal, gravel, and soil. Cover with plastic or glass. Remove the cover an hour each day for air circulation. [Plants]

Cuttings

In February or March, take cuttings of geraniums, Christmas cactus, begonias, etc., and dip the growing end into a rooting powder. Put the cuttings in moist vermiculite or clean soil for 2-3 weeks. Cover lightly with a plastic and keep away from bright light. Transplant into individual pots when the roots develop. [Plants]

Seedlings

Provide the children with Jiffy Wafers in 1 cup plastic containers. Add water and watch the Jiffy Pot grow. With a pencil, punch a hole in the top and plant a marigold seed. When the seedling is mature (about 2 1/2") the plant and pot may be planted outdoors. [Plants]

Root Growth

Put a few bean seeds in a plastic tumbler lined with damp paper toweling. Keep the container out of the light. Observe the development of the root system. [Plants]

OBJECTIVE: THE STUDENTS WILL DEVELOP THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN PHYSICAL EDUCATION.

ACTIVITIES

Duck, Duck, Goose

The children squat in a circle. "It" walks around the outside of the circle tapping the children's heads and saying, "Duck, duck, goose." When the child says "Goose," the one who is tapped chases "It" around the circle and tries to tag "It" before "It" reaches "Goose's" empty place in the circle.

[Physical Education]

Magic Carpet

Place carpet squares in scatter formation on the floor. Each child moves from square to square as the music plays. Remove one square and stop the music. Each child must locate and sit on a square. Variations: Have the children jump, hop, skip, pass a bean bag around their bodies as they move.

[Physical Education]

Rope Activities

Provide each child with a rope 6' - 8' in length. Lay the rope on the floor and walk on it as if it were a tight rope, forward, backward, eyes closed. Jump over the rope; hop from side to side; straddle the rope, jump into the air, spin and land straddling the rope; make several little circles and put a body part in each circle. Double the rope and swing it in a large figure 8.

[Physical Education]

Routine

Create a routine to music and have the children practice and perform it. The routine may involve bouncing, throwing, catching, dribbling balls, or bean bag tricks, calisthenics, or rope jumping.

[Physical Education]

OBJECTIVE: THE STUDENTS WILL DEVELOP THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN SEWING.

ACTIVITIES

String Macaroni

Color macaroni and spaghetti pieces with food coloring and make necklaces and bracelets. [Crafts]

Sewing Cards

Make a numbered outline on oaktag or light cardboard. Have the children stitch with yarn to complete the picture. [Crafts]

Sew on a Button

Provide the children with threaded needles, cloth, and buttons. Have them practice sewing the buttons on the cloth. [Crafts]

Stitching a Fish

Cut two outlines of a fish about 14" long. Stuff the layers with crumpled paper. Have the children stitch with darning needles and yarn around the edge, and then paint the fish. [Crafts]

Burlap Sampler

Have the children draw a scene on a 9x12" piece of burlap. Use colored yarn to fill in the design. [Crafts]

Egg Carton Waste Basket

Use a whip stitch or a series of knots to join 6 colorful egg cartons in an upright hexagon. Glue the base to a paper plate. [Crafts]

MANIPULATIVE SKILLS PRIMARY

OBJECTIVE: THE STUDENTS WILL DEVELOP THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN WOODWORKING.

ACTIVITIES

Tool Kit

Introduce the children to woodworking tools. Demonstrate their proper use. Let each child practice using the hammer, vise, saw, file, plane, and screwdriver. [Woodworking]

Field Trip

Visit the industrial arts department at the junior high school. Under the direction of the teacher there, have the junior high students help the primary children in making a simple object such as a toast lifter. [Woodworking]

Wood Sculpture

Collect small wood scraps from a local industry, carpenter, or the industrial arts department. Sand, then glue, the scraps of wood together to create a design or a toy boat, train or car. [Woodworking]

Bird House

Follow a pattern, use hand tools, and build a bird house. [Woodworking]

MANIPULATIVE SKILLS INTERMEDIATE

OBJECTIVE: THE STUDENTS WILL IMPROVE THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN COOKING.

ACTIVITIES

Prepare Breakfast

Use committees to plan the menu, solicit utensils, price the foods and make a cost estimate, shop, set up the cooking and eating areas, prepare and cook the food, and clean up. Correlate with math, health, safety, or social studies.

[Nutrition]

Recipe Conversion

Have the students use a set of metric measuring utensils and convert the following recipe for Waldorf Salad.

2 cups of cut up apples
1/2 cup pineapple bits
1/4 cup raisins
1/4 cup walnuts
1/8 cup salad dressing [Metrics]

Math Magic

At a learning station have each group use fractional measures to prepare 1/2 a recipe for gelatin dessert. [Fractions]

Maine Recipes

Have groups prepare different recipes using Maine agricultural products. Suggested items are potatoes, eggs, chicken, fish, and clams. [Maine]

Ice Cream Production

Visit an ice cream plant. Then, make ice cream in the classroom. Compare the two techniques used in making ice cream.

[Manufacturing]

MANIPULATIVE SKILLS INTERMEDIATE

OBJECTIVE: THE STUDENTS WILL IMPROVE THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN CRAFTS.

ACTIVITIES

Caterpillar Bug

Use an egg carton, pipe cleaner, and scraps of construction paper to make a caterpillar. Correlate with the science unit on Insects. [Insects]

American Crafts

Review Unit I, People in America, and prepare an exhibit of the crafts mentioned as being pleasurable to each family. [United States]

Paper Weaving

Make place mats from paper strips. Correlate with "Latin America" from People in Change. [Latin America]

Paper Mache

Make hand puppets, life sized animals, or giant objects, such as a tooth and toothbrush. [Crafts]

Nature Craft

Gather grasses, clay, wood, rocks, and moss. Fashion decorative objects, such as paper weights or arrangements. [Plants]

Crafts Fair

Invite several craftsmen or artists to demonstrate their crafts. Let members of the class observe and try their hands at a new skill. [Crafts]

MANIPULATIVE SKILLS INTERMEDIATE

OBJECTIVE: THE STUDENTS WILL IMPROVE THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN GARDENING.

ACTIVITIES

Experiment

Select 12 healthy, matched bean plants. Add the recommended dosage of fertilizer to 6 test plants and omit the fertilizer from the 6 control plants. Make observations and keep records. [Decision Making]

Landscaping Project

Have the class plan a project to beautify the school or community. Students may plant a tree, spring bulbs, or annuals, such as petunias or marigolds. [Plants]

Green Thumb Corner

If there is no school greenhouse, select a sunny location where gardening materials may be stored. Let students start seedlings, make cuttings, and raise plants for gifts, plant sales or outdoor plantings. [Plants]

Garden Show

Hold a school garden show in cooperation with the local garden club. Have sections for horticulture (plants, seedlings and specimens) and for artistic design (flower arrangements). [Plants]

OBJECTIVE: THE STUDENTS WILL IMPROVE THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN PHOTOGRAPHY.

ACTIVITIES

Slide Story

Use an instamatic camera to make a set of slides which will tell the story of workers in the community. [Work Awareness]

Movies

Let the students plan and film a dramatic sequence with a super 8 movie camera. [Reading]

Photograms

A photogram is made by placing any object on a sheet of photographic paper and exposing the paper to light. To make a photogram, follow these steps:

1. In total darkness, place an object on a sheet of photographic printing paper such as Kodabromide or Polycontrast.
2. Expose the paper to the light for a few seconds.
3. Place the exposed paper in a standard developer such as D-72 or Dektol diluted 1:2 with water, for about 1 1/2 minutes.
4. Transfer the paper to a stop bath, a weak acid solution.
5. Place the paper in a fix or hypo solution for about 5 minutes.
6. Wash the photogram in running water for one hour.
7. Dry the photogram in a blotter roll or heated drum dryer. [Photography]

Film Processing

Equip a lightproof closet as a dark room. Use a resource person to work with a small group to process black and white prints. [Photography]

Animation

Have the group decide on a theme they want to develop, such as colonial living, Maine, Australia, or How A Plant Grows. Prepare a background, scaled characters, and props such as waves, billows of smoke, splashes, etc. When all is ready, introduce the camera and the tripod. Explain how to focus, line up the shot, press the cable release on/off for a few frames. Others may move the characters slightly. Then, the camera cable release is again pressed briefly. They may make a title card for the beginning and signs reading "The End." [Photography]

MANIPULATIVE SKILLS INTERMEDIATE

OBJECTIVE: THE STUDENTS WILL IMPROVE THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN PHYSICAL EDUCATION.

ACTIVITIES

Shipwreck

The students spread out in scatter formation. Four directions are identified as port, starboard, bow, and stern. A captain is chosen who gives the orders. On command, the group must face in the correct direction. Other commands: "Boom coming over" - lie on the floor; "All hands on deck" - place hands in a designated circle on the floor; "Freeze" - remain still; and "Man overboard" - get a partner and hold hands.

[Physical Education]

Jokari

Purchase or make a Jokari paddle-ball game. Attach a 3 inch rubber ball to a brick with a 20 foot elastic.

Two players stand on the same side of the brick and take turns hitting the ball into space. The ball may bounce once on either side of the brick. [Physical Education]

Field Day

Two weeks before the event, divide all 4th, 5th, and 6th graders into equally matched teams of 20 persons. Appoint a captain for each team; post a list of events for the Field Day; let the teams decide who will represent them in each event. No one person may enter more than 8 or less than 5 events. Eight, six, or four points are awarded for 1st, 2nd, or 3rd place in each event.

Individual Events Boys/Girls	Team Events
600 yard run (boys)	Tug of war
400 yard run (girls)	Pyramid building
Softball throw	Water bucket brigade
50 yard dash	Water balloon over/under relay
Broad jump	Grease ball relay
High jump	Transport man on a mat
Hurdle	200 yard relay
Pony ride	Circle toss relay

[Physical Education]

MANIPULATIVE SKILLS **INTERMEDIATE**

OBJECTIVE: THE STUDENTS WILL IMPROVE THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN SEWING.

ACTIVITIES

Patchwork Quilt

Have each student design blocks of uniform size on paper. Make cardboard templets for each piece of the design. Add 1/4" to the size of each design piece. Trace the templets onto the fabric. Cut and stitch the pieces together, folding under 1/4". The students may embroider or mark their names on their squares. Have a committee join all the squares, and then pin a filler and backing to the front. Have a parent machine stitch around three sides; turn, so the right side is out, and slip-stitch the final seam. Use yarn to tack the front to the back with square knots. See Quilting and Patchwork, a Sunset Book, for further directions. [Pioneers]

Weaving: A Belt on a Drinking Straw Loom

Use 5 half straws - each threaded with a heavy cord on a string about 5" longer than the finished belt should be. At the top of each cord, make a knot and cut a slit in the top side of each straw; catch the knotted cord in the slit. (Tape the knot to the straw for added security!) Hold the 5 straws with the cords hanging down; tie the weaving yarn onto the end of the middle straw and weave down over the top in a figure eight motion - back and forth.

As the straw fills up, push some of the weaving down onto the cords. Continue weaving until the belt is as long as you wish. Knot the cords at the bottom. Pull off the straws and knot the top. [Indians]

MANIPULATIVE SKILLS

INTERMEDIATE

OBJECTIVE: THE STUDENTS WILL IMPROVE THEIR PSYCHOMOTOR SKILLS THROUGH PARTICIPATION IN WOODWORKING.

ACTIVITIES

Plaques

Outline a simple figure on a scrap of 1" board. Hold the board in a vise. With the coping saw, surform tool, file, and sandpaper, fashion the shape. Keep the back side flat and mount the finished figure on a piece of plywood with glue. The plaque may be finished with varnish, oil, wax, shoe polish, or linseed oil.

[Woodworking]

Wood Stamping

Make "punches" out of large nails called spikes. Cut the sharp end off with a hacksaw and file a simple design on the blunt end. Draw a design on a piece of wood. Use the punch to stamp texture in the design. The stamping is done by hitting the spike with short, sharp blows in a regular way to cover the space evenly. Rub finished piece with stain, letting it darken in the stamped areas.

[Woodworking]

Jewelry

Plan a small, delicate design. Cut out the piece with a coping saw. Shape it gently with rasps and files. For hollow spaces, remove the blade from the coping saw, insert it through a drilled hole, and saw out the inside space. Sand, finish, and add pin or earring backings. For pendants, drill a hole and hang on cord or rawhide.

[Woodworking]

3-D Sculpture

Have each student plan a simple shape to fashion from wood. Put the wood in a vise and saw off as much waste as possible. Round with a surform file. Make sure the grain runs with the thin sections. Smooth the sculpture with files and sandpaper. Finish as desired.

[Woodworking]

GOAL V MANIPULATIVE SKILLS EVALUATIVE TECHNIQUES

PRIMARY

1. Have each child demonstrate the correct use of a variety of cooking utensils such as a knife, fork, grater, measuring spoon and cup.

2. During the regular art lessons, evaluate the pupils' fine motor skills as satisfactory or unsatisfactory in the use of scissors, paste, crayons, paint, and other craft materials.

3. Prepare a check list of fine and gross motor achievements. Let the pupil assist in self evaluation.

   ___ Pours liquids and dry ingredients without spilling them

   ___ Follows a line in cutting paper with scissors

   ___ Digs a hole of appropriate size to plant a seedling or a tree

   ___ Threads a needle

   ___ Joins two pieces of material with a running stitch

   ___ Smooths a piece of wood with sandpaper

4. Use a checklist of specific psychomotor skills such as those listed on the Psychomotor Mastery Record Card from the Maine State Department of Education and Cultural Services. Keep records of each pupil's mastery of skills in Balance, Spatial Relationships, Identification of Body Parts, Manipulation, Locomotor Movements, Eye/Hand/Foot Coordination, Agility, Strength, etc.

INTERMEDIATE

1. Evaluate the students' ability to demonstrate fine motor skills as they prepare a recipe. They should measure with accuracy, handle the ingredients comfortably, and use all utensils properly.

2. Following any craft lesson presented, such as painting, modeling, paper mache, or weaving, evaluate each student's coordination skill as follows:

   Unsatisfactory - needs further practice or maturation

   Satisfactory - demonstrates reasonable performance

   Outstanding - shows a high degree of fine motor coordination

3. Prepare individual charts on physical education skills for each student. Let the students keep records of their own progress.

   Name _____

SKILL	April 15	May 1	May 15	May 30
Broad Jump				
Ball Throw				
50 yd. Dash				
1/4 Mile Run				

GOAL VI ECONOMIC AWARENESS

PRIMARY THE STUDENTS WILL UNDERSTAND THAT PEOPLE ARE PAID FOR THEIR WORK AND USE THAT MONEY TO SATISFY THEIR NEEDS AND WANTS.

INTERMEDIATE THE STUDENTS WILL RECOGNIZE THAT EACH INDIVIDUAL IS A CONSUMER, PRODUCER, AND CITIZEN, AND AS SUCH HAS CERTAIN RIGHTS AND RESPONSIBILITIES.

OBJECTIVES

PRIMARY: The students will understand that people are paid for their work and use that money to satisfy their needs and wants.

INTERMEDIATE: The students will recall that occupation and salary are related.

The students will recall that specialization creates an interdependent society.

The students will recall that all citizens have the responsibility for the success of the American economic system.

OBJECTIVE: THE STUDENTS WILL UNDERSTAND THAT PEOPLE ARE PAID FOR THEIR WORK AND USE THAT MONEY TO SATISFY THEIR NEEDS AND WANTS.

ACTIVITIES

Main Street Walking Tour

Have the children visit five or six stores in a small business district. In the classroom list the workers observed. Tell the children these workers are paid wages. Ask, "What might these workers buy from each other's stores?" With play money role play the receiving of salary and the purchase of goods. [Money]

Food Distribution Center

Have the class tour a wholesale food distributor's warehouse. Observe where the goods are received, stored and dispatched. In class, discuss the number of times a product changes ownership from the field to the table. [Food]

Play Store

Set up a store with pictures, models, and clean used packages and cans. Classify items as produce, meat, dairy products, and staples. Price all items. Borrow a cash register and use play money to make purchases and make change. [Food]

Apple Sale

Have the class visit an apple orchard, pick and purchase a bushel of apples. At school, have the children polish and sell the apples and figure their profit. [Food]

OBJECTIVE: THE STUDENTS WILL RECALL THAT OCCUPATION AND SALARY ARE RELATED.

ACTIVITIES

Treasure Hunt

Have the class prepare a list of careers and guess the annual salary or hourly wage of each. Then let them use the Occupational Outlook Handbook to locate the actual salary.

[Work Awareness]

Work I Can Do

Following a class discussion, have each child fill in the chart below.

Work:	How can you earn money? (paper sales, recycling bottles, entertainment, crafts, house and garden chores)
Restrictions:	Are there problems or restrictions? (time, transportation, equipment)
Feelings:	How do you feel while working?
Use:	How will you use the money you earn?

Chart:

Work	Restrictions
Feelings	Use

This lesson may be correlated with People in America T.M., p. 27 and the ITV program "Treasure Hunt" from Bread and Butterflies.

[Self Awareness]

OBJECTIVE: THE STUDENTS WILL RECALL THAT SPECIALIZATION CREATES AN INTER-DEPENDENT SOCIETY.

ACTIVITIES

Industrial Revolution Murals

Have the children make two murals: one depicting the colonial family unit which was a self sufficient unit; the other a community with shops and factories. [History]

Follow the Dollar

Pass a dollar bill from one to another around the class asking each student to tell where he got the dollar and how he spent it, i.e., first person gets it as change, spends it at MacDonalds; second person, counter girl, receives it as pay, spends it at K-Mart; third person, manager of K-Mart, pays for some toys ordered; fourth person, toy distributor, pays for parts needed in manufacturing toys, etc.

Waterfront Tours

Have the children take a series of mini trips to the waterfront to learn about the economic life in one part of the city. [Industry]

OBJECTIVE: THE STUDENTS WILL RECALL THAT ALL CITIZENS HAVE THE RESPONSIBILITY FOR THE SUCCESS OF THE AMERICAN ECONOMIC SYSTEM.

ACTIVITIES

School Store

Under adult supervision, let the students buy and sell school supplies or snacks in the school store. [Salesmanship]

School Fair

Let the class participate in the parents' school fair or plan their own. They may make and sell crafts, food, and operate recreation booths. [Salesmanship]

Assembly Line

Let the students select a product and organize a business to mass produce it. Stocks may be sold to raise money to purchase materials and inspectors should control the quality of each item. The price can be determined by making a cost analysis. Items may include greeting cards, paper weights, or wall hangings. [Industry]

Consumer Task

Have a group of students buy the materials needed for a class project. Discuss the money available, the quantity and quality of the item desired. [Decision Making]

Shopping Spree

Provide the class with a number of catalogues or newspaper ads. Working in groups, plan how to use $100.00 to buy clothing for a family of four. Let the groups compare their results. [Money]

ECONOMIC AWARENESS EVALUATIVE TECHNIQUES

PRIMARY

Prepare a simple quiz such as the following to test the child's understanding of the relation of work and money.

1. Y N Do you think a storekeeper is lucky because everything in the store is free?

2. Y N If it cost 2¢ a glass to make Kool Aid, will you earn any money if you sell it for 2¢ a glass?

3. Y N Do you think teachers get paid to teach school?

4. Y N Do you think firemen get paid every week whether or not there are any fires?

5. Y N Do you think people should buy what they want first, and later on get the things they need?

6. Y N Do you think most people today work to earn money and then use that money to buy things they need or want?

INTERMEDIATE

1. Arrange the following careers according to salary from highest to lowest.

Truck Driver	Leaf Raker
School Teacher	Janitor
Shoe Salesman	Nurse
Airplane Mechanic	Insurance Salesman

2. Have each student prepare a poster advertising a service he can offer and stating a reasonable hourly wage.

3. Have the students write a paragraph describing how their lives would change if their families were economically independent. The narratives should show understanding that they would have to make all their own supplies for food, shelter, and clothing.

4. Have the student trace in reverse the travels of a loaf of bread from the table to the field.

5. Have the students describe how they would apply the decision making process to the purchase of a new pair of roller skates.

6. If a merchant makes Italian Sandwiches and doesn't use good meat, what can the consumer do? Students should indicate that they can complain to the merchant, stop patronizing him, or report him to the local Board of Health or consumer agency.

GOAL VII VALUE OF WORK

PRIMARY THE STUDENTS WILL IDENTIFY WAYS THAT WORKERS ARE OF SERVICE TO THE COMMUNITY.

INTERMEDIATE THE STUDENTS WILL RECOGNIZE THAT INDIVIDUALS CAN FIND SATISFACTION THROUGH THEIR WORK.

OBJECTIVES

PRIMARY: The students will recall a number of workers and the ways they serve the community.

INTERMEDIATE: The students will recall the contributions made to society by a variety of workers.

The students will recall a variety of satisfactions they and others have gained through work.

OBJECTIVE: THE STUDENTS WILL RECALL A NUMBER OF WORKERS AND THE WAYS THEY SERVE THE COMMUNITY.

ACTIVITIES

Mural

Have the children plan and make a mural showing safety helpers at work. These include a policeman, crossing guide, parent, teacher, fireman, patrol boy, etc. [Safety]

Data Chart

Have children identify their parents' careers and list ways these careers contribute to society and the rewards the parent receives from the work.

Example:

Mr. Smith - Carpenter	
Helps others	Helps himself
Makes useful things	Earns money
	Enjoys his work

Product Display

At Thanksgiving time, make a classroom display of food products. Express appreciation for the workers who helped produce, package, and distribute our food. [Food]

ACTIVITIES

Table Top Model

Use Instructo's Community Helpers at Work Kit, Scholastic's finger puppets, or make models of community helpers to prepare a display of workers who provide services. Discuss each worker, then let the children use the figures to recall and recite about each worker's contribution to the community.

[Community Helpers]

"Live Wires" Bulletin Board

Display pictures of electrical products and the workers who make and service them. Discuss the difference between workers who deal with products and those who provide services. Discuss the importance of both kinds of workers. [Electricity]

Homemaker Filmstrip

Discuss the responsibilities of the parent who stays at home and cares for the needs of the family. Make a series of drawings of the homemaker from morning to night. Fasten them together and present a "filmstrip" to the class. [Family]

OBJECTIVE: THE STUDENTS WILL RECALL THE CONTRIBUTIONS MADE TO SOCIETY BY A VARIETY OF WORKERS.

ACTIVITIES

Environmental Unit

(1) Invite an environmentalist to speak to the class about pollution control or conservation.
(2) Visit a sewage treatment plant, conservation site or recycling plant.
(3) Make a bulletin board of articles on current environmental improvements.
(4) Play problem solving games such as "Ranger Rick Pollution Game" or the Coca Cola Ecology games.
(5) Present an assembly program with student created ecology flags, poems, and songs to emphasize concern for the environment. Each child will represent a worker who is concerned about the environment and tell how he aids conservation. [Environment]

Workers in the News

Have the students read any daily newspaper to locate articles that tell something someone did for society. Summarize information on a data chart.

Worker	Contribution
Lawyer	Defends people's rights

Then have the students write a paragraph on ways workers are of service to society. [Newspapers]

Field Trip

Visit a symphony concert, art museum, or theater. Discuss the contributions made by workers in the fine arts. [Art]

ACTIVITIES

Social Studies Discussion

When studying a different culture, discuss how the workers such as the tribesmen and women of the Mundurucu, People in Change, Latin America, Sequence 1, benefit the entire society.
[Cultures]

Film

Observe a film on aviation and discuss the contributions of air line workers. See PRIME catalog: MP850 "Gate 73" and MP923 "Airplanes: A First Film." [Aviation]

Interview and Follow Up

When talking with any worker on a field trip or a class visitor, have the children ask, "What are the contributions of your business to the community?" In follow up discussions have the children recall these contributions in lists, prose, or an art form. [Work Awareness]

Great Moments in Medicine

Make posters depicting the contributions of health heroes.
[Health]

VALUE OF WORK INTERMEDIATE

OBJECTIVE: THE STUDENTS WILL RECALL A VARIETY OF SATISFACTIONS THEY AND OTHERS HAVE GAINED THROUGH WORK.

ACTIVITIES

Slide Report

Have the students work in pairs to interview and photograph a worker in all phases of his occupation. Have them ask the worker about his personal satisfactions and rewards in the job. Culminate the in-depth study with a slide presentation. [Work Awareness]

Values Circle

With the students prepare a list of rewards gained through work: money, prestige, approval, security, service to others, etc. On the blackboard or flannel board, make a circle with pie wedges for each reward. Let each student reproduce the circle to show the work values which appeal to him, or use the game "Life Goals" from Career Insights And Self Awareness, Houghton Mifflin.

[Self Awareness]

Guest Speaker

Invite a candy striper or other volunteer worker to explain his work and the satisfactions gained. [Values]

ACTIVITIES

Rank Ordering

Provide the students with a list of 20 workers and let them rank order the careers from high to low in prestige. This activity may follow a discussion of the story "A Pocketful of Pride" in Open Highways. [Work Awareness]

Evaluating a Project

After the completion of a class service project, discuss the personal satisfactions gained: praise, better looking school, happier people, efficient methods, working together, accomplishing a goal, etc. [School]

First Aid

Have scouts, or others who have had training in first aid, teach methods to the class. [First Aid]

Secret Buddy

Each pupil is assigned a secret buddy for a week. Every day the student will do something to help the buddy and keep a secret diary of attempts to be helpful. [Creative Writing]

VALUE OF WORK EVALUATIVE TECHNIQUES

PRIMARY

1. Ask the child to pantomime a community helper and show one thing (s)he does to help us.

2. Have the children draw a picture of a worker in their family, at school, and in the community and explain how each worker helps us.

3. Take a neighborhood walk and note those children who are able to recognize the contributions made to the area by workers, i.e., city workers made sidewalks, telephone workers brought in lines, manufacturers made cars, etc.

4. Present the children with a series of pictures of workers previously discussed and ask them to recall the contributions of each helper.

INTERMEDIATE

1. Prepare a matching test of careers and their social contributions.

   a. Health inspector - provides entertainment for people

   b. Musician - provides service for machinery

   c. Mechanic - ensures safe conditions in restaurants

2. Have the students create a play or story about what would happen if all the people in a particular career stopped working. The teacher will note the pupils' understanding of the contributions of the workers.

3. Have the student recall three satisfactions, other than money, which one may gain through work.

4. Have the students discuss or write about personal satisfactions they have received as a result of working.

GOAL VIII RELEVANCE OF EDUCATION

PRIMARY THE STUDENTS WILL RECOGNIZE THAT SCHOOL IS A PLACE TO LEARN.

INTERMEDIATE THE STUDENTS WILL RECOGNIZE THAT SCHOOLING IS NECESSARY FOR FUTURE CAREERS.

OBJECTIVES

PRIMARY: The students will recognize that school is a place to learn.

INTERMEDIATE. The students will demonstrate a positive attitude toward schooling.

The students will demonstrate that what they have learned in school is of practical use to them.

The students will associate specific school subjects with specific careers.

The students will recall the specific educational requirements of a variety of careers.

GOAL VIII RELEVANCE OF EDUCATION ACTIVITIES

PRIMARY

OBJECTIVE: THE STUDENTS WILL RECOGNIZE THAT SCHOOL IS A PLACE TO LEARN.

ACTIVITIES

School Tour

Make a tour of the school and visit all the workers in the building. Talk with teachers and others about their responsibilities. After the tour, discuss the importance of the workers and how they all help children to learn. Make a bulletin board on "Workers Who Help Us Learn." [School]

Rules Chart

Discuss the need for rules for the classroom, hall, basement, and playground. Involve children in making the rules. Use pictures and symbols to make a permanent room chart. [Decision Making]

Motivation for Learning

Before presenting a new unit, prepare a bulletin board with pictures indicating some areas to be taught. Have the children develop questions on things they would like to learn in the unit. [School]

ACTIVITIES

Review for Reinforcement

Before the children leave for home, take time to talk about the things they learned that day in school. Role play the child's answer to the parent's question, "What did you learn in school today?" [School]

What If?

Let the children imagine the consequences if there were no schools. [School]

Applied Learning

While on a field trip to the supermarket, have a treasure hunt for numbers, colors, shapes, familiar letters, and words. Examples: 9 Lives cat food, 7 Up soda, 3 Diamonds tuna, etc. [Food]

Achievement Badge

When the children are able to count to 200, they are allowed to wear badges stating, "I can count to 200." These they may keep and wear all week. [Math]

OBJECTIVE: THE STUDENTS WILL DEMONSTRATE A POSITIVE ATTITUDE TOWARD SCHOOLING.

ACTIVITIES

Task Groups

Divide into groups of 6 - 8 pupils to discuss "How will we use what we are learning in school?" Let a representative from each group list on the board 5 skills or learnings which the group has decided will be useful. [Oral Expression]

River Time Line

Illustrate the appearance of Maine's rivers from the 1600's to the 1900's on a pictorial time line. Recall that education is part of the solution to pollution. Discuss the importance of educating everyone to save Maine's rivers. [Environment]

High School Visit

Arrange a field trip to the business, science, or other department of the high school. Have the secondary teachers present interesting aspects of their departments. [Values]

Education: For What Purpose?

In class discussion, distinquish between the methods and purposes of education in a free society and a colonial society. Have students write a paragraph on "The Purpose of Education in a Free Society." Correlate the activity with Activity #35, T.H., "Latin America" from People In Change. [Latin America]

OBJECTIVE: THE STUDENTS WILL DEMONSTRATE THAT WHAT THEY HAVE LEARNED IN SCHOOL IS OF PRACTICAL USE TO THEM.

ACTIVITIES

Check-Out Cashier

Have students select items from a classroom model supermarket and total the sales at the check-out using arithmetic. Let another student check his work with a calculator. A cash register, available from Distributive Education, Reynolds School, may be used. [Money]

Measurement

Have students work in pairs to measure items in the classroom such as books, desks, floors, and windows using both English and metric units. [Measurement]

Percentage Practicum

Have the students locate and display on a bulletin board newspaper ads using per cent. [Math]

Discussion

How would our daily lives be affected if there were no math concepts in society? [Math]

ACTIVITIES

Magic Circle

"What task can you perform now for which you had to have some training?" "How do you feel about that achievement?"

[Self Awareness]

Book Production

Pair each sixth grade student with a kindergarten child. Have each sixth grader interview the child and then write a book for and about that child. The book will be illustrated and laminated, then read aloud and presented to the child.

[Creative Writing]

Proofreading

Give the students a paragraph containing numerous errors to proofread, correct, and rewrite. Discuss the work of a proofreader.

[Newspaper]

Science Fair

Have the students select a project which requires the preparation of a science model or demonstration. In addition, have them use research materials to supplement the display. Discuss the value of knowing how to use research skills to gain information.

[Research]

OBJECTIVE: THE STUDENTS WILL ASSOCIATE SPECIFIC SCHOOL SUBJECTS WITH SPECIFIC CAREERS.

ACTIVITIES

Career Tree

Plant a young sapling in a bucket in the classroom. Designate each branch as a major school subject. Give the pupils paper leaves on which they write their parents' careers. Have the students staple the leaves to the branches which are most essential to the career. [Work Awareness]

Rank Ordering

Select ten careers at random. Discuss how much each worker would depend upon his ability to read. Rank order the careers according to their dependency on reading skills. [Reading]

Today's Writers

Have some students prepare a bulletin board of ten or more workers whose jobs require writing skills. [Creative Writing]

ACTIVITIES

Creative Dramatics

Following a lesson on the distinction between formal and informal language, have groups dramatize a baseball game with formal language and also a job interview using informal language and slang. Then discuss careers which require the use of formal language.

[Oral Expression]

Field Trip

When studying measures, have the class visit a construction site, machine shop, or fabric store to observe workers using measurement.

[Measurement]

Millions of Marvelous Mathematicians

Have the students search through occupational charts, newspapers, and the telephone directory to make a never-ending list of people who use math in their work.

[Math]

HOME MAKERS...

PLUMBERS...

CARPENTERS...

...CASHIERS

...TEACHERS

...ENGINEERS

...STORE KEEPERS

Discussion

Ask the class, "How would the material we learn in science be useful to an engineer (environmental worker, medical worker, physicist, teacher, businessman, housewife)?"

[Work Awareness]

OBJECTIVE: THE STUDENTS WILL RECALL THE SPECIFIC EDUCATIONAL REQUIREMENTS OF A VARIETY OF CAREERS.

ACTIVITIES

Interview

When a guest speaker makes a presentation about the world of work, have the children be prepared to ask questions about the educational requirements of the job, i.e., "What training was required before you could begin your work?" "Have you had further on-the-job training?" [Work Awareness]

Field Trip Follow-Up

Following a field trip, make a data chart listing the careers observed and the educational requirements for each. Arrange the data to show workers without a high school diploma, high school graduates, high school plus two years, high school plus four years or more. [Work Awareness]

Bulletin Board

Prepare a bulletin board picturing workers concerned with the environment. Under each picture indicate the educational requirement. [Environment]

Time Line

Plot significant medical discoveries from 1400 to the present time. Discuss the scholarly discipline needed for medical research. [Health]

RELEVANCE OF EDUCATION EVALUATIVE TECHNIQUES

PRIMARY

1. At the end of the week have the children recall three things they learned during the week.

2. At Thanksgiving time, make a class list of reasons we are thankful for our school. Note those children who recall that school is a place to learn.

3. Have the class build a miniature community. Ask them why (or why not) a school should be included.

4. Use puppets to dramatize Pinocchio or some character who runs away from school. Have a child convince the puppet to return to school.

INTERMEDIATE

1. Administer a pre-test and post-test to measure the development of a positive attitude of students over a period of time.

   Sample items:

	Strongly Agree	Agree	Undecided	Disagree	Strongly Disagree
A. School will help me get a job some day.	SA	A	U	D	SD
B. I learn useful things in school.	SA	A	U	D	SD
C. If I had a choice, I would attend school anyway.	SA	A	U	D	SD
D. I expect to graduate from high school.	SA	A	U	D	SD
E. All people should attend school until they are at least 16 years old.	SA	A	U	D	SD

2. Have the students divide a piece of drawing paper in eight sections and make eight illustrations of things they are able to do today that they could not have done if they had never been to school.

3. Present the students with a series of pictures of workers and let them guess which school subjects the workers enjoyed when they were students. Evaluate the pupils' ability to justify their answers by relating a school subject to a career need.

4. Have the students recall four careers discussed in class and rank order them according to their educational requirements.

OFFICER FRIENDLY

1 2 3 4 5 6 7 8

OVERVIEW: Through a variety of activities, the children become aware of their responsibility for their own safety. They also gain an awareness of the work of a policeman.

INSTRUCTIONAL OBJECTIVES:

Self Awareness: The students will demonstrate an awareness and appreciation of their ability to care for many of their physical needs.

Interpersonal Skills: The students will identify their roles as members of the community and will demonstrate a respect for the rights and feelings of others.

Decision Making: The students will demonstrate their ability to identify simple cause and effect relationships.

Work Awareness: The students will list three or more responsibilities of a policeman.

Value of Work: The students will recall a number of ways a policeman serves the community.

"People I Don't Know," Study Prints by BFA
"Playmate Puppets," Figures by Instructo

Resource People

School/Police Liaison Officer
A policewoman

SUBJECT HEADING: 352.2 POLICE
363.2 POLICE

ACTIVITIES:

1. Invite the School/Police Liaison Officer to the classroom to discuss safety procedures and the policeman as a friend and helper.

2. Teach "Officer Friendly's Safety Song" and use the Officer Friendly Work Book.

3. Write a thank you note to Officer Friendly and tell him what was learned during his visit. Have the children dictate the letter and sign their names.

4. Use the "Model of an Intersection" and role play a variety of situations for pedestrians and bicycle riders.

5. Let the children practice dialing their home telephone numbers on toy telephones and have them state their full name and address.

6. Use study prints to discuss the role of the police officer and safety procedures.

7. Show filmstrips and movies on the work of a policeman and on safety.

8. Read books about policemen.

9. Have the children list the various kinds of work a policeman does. Then make a class mural depicting the duties of a police officer.

10. Discuss the option of a police career for girls. Invite a policewoman to speak.

11. Role play the work of detectives as described in Alpha Time, Lesson I for Mr. V, T.M. 153-154. Use "Puppet Playmates" by Instructo or policemen's hats when dramatizing the work of a policeman.

12. Visit the local police station to learn more about the work of a policeman.

EVALUATION:

1. Have the children repeat their names, addresses, and telephone numbers.

2. With the assistance of the school crossing guides and safety patrols, observe and evaluate the child's ability to demonstrate obedience to the school safety rules and to use proper pedestrian procedures.

3. Have the children use model cars and toy pedestrians to demonstrate what happens when people obey safety rules.

4. Show the children pictures of a police officer at work. Let them talk about what the policeman is doing.

5. Have the children make pictures which show how the policeman helps us.

OFFICER FRIENDLY'S SAFETY SONG*

Chorus: Stop, Look and Listen
Before you cross the street
Use your eyes and use your ears
And then you use your feet.

Verse I: The Policeman dressed in blue
Is a friend to me and you
Busy streets he helps us cross
And takes us home when we are lost.

Chorus: Stop, Look and Listen
Before you cross the street
Use your eyes and use your ears
And then you use your feet.

Verse II: I look to the left
I look to the right
But I won't cross the street
Until I see the green light.

Chorus: Stop, Look and Listen
Before you cross the street
Use your eyes and use your ears
And then you use your feet.

Tune: "Puff, The Magic Dragon"

OUR PARENTS' OCCUPATIONS

1 2 3 4 5 6 7 8

OVERVIEW: The children will learn about the work of members of their families.

INSTRUCTIONAL OBJECTIVES: Self Awareness: The students will demonstrate a sense of pride in their parents' work.

Interpersonal Skills: The students will identify the work roles of all members in their families.

Decision Making: The students will develop skills in identification and classification.

Work Awareness: The students will gain knowledge of workers in the home and community.

Value of Work: The students will recall the ways workers in their families serve the community.

RESOURCES: Books

- At the ..., Children's Press
- Come to Work With Us, Children's Press
- I Know A ..., Putnam
- I Want To Be A ..., Children's Press
- Look! Read! and Learn at the ..., Melmont Press

Resource People

- Parents

SUBJECT HEADING: 301.3 COMMUNITY LIFE
331.7 OCCUPATIONS

ACTIVITIES:

1. Gathering Data: Ask the children if they know where their parents work. (Identify the activity of homemaker and volunteer as work.) Make a class list of the workers. Have the children interview the adult workers in their families and report the information to the class. Let them ask about duties at work, if the job is dangerous, and whether they use special tools or uniforms.

2. Data Chart: Classify the information in a class list in any number of ways: mothers/fathers; outdoors/indoors; uniforms/no uniforms; goods/services; moves from place to place/works in one place; etc.

3. Value of Work Discussion: How does each parent worker help the community? Emphasize that all jobs help others in some way.

4. Self Awareness Discussion: How is the work divided in your home? What is your responsibility?

5. Bulletin Board: Have the children dictate stories about a family worker and make drawings of the worker. Post the drawings and stories on the bulletin board.

6. Display: Prepare a classroom display with hats, models, tools, and symbols of the parents' work. Use the models to role play each career.

7. Independent Reading: With the assistance of the librarian prepare a display of books on the careers represented in the class. Allow the children time to read the books.

8. Classroom Visit: Invite a parent to demonstrate a skill or to wear a uniform and discuss a career.

9. Mini Trips: Arrange for 5 or 6 parents to take carloads of children to their places of business. Each group will report to the class on their mini trip.

10. Filmstrips: Show two or three filmstrips on careers discussed in the unit.

EVALUATION:

1. Have the children tell how their parents' jobs are useful.

2. Having defined work as a constructive activity, let the children draw a family portrait showing each member of the family involved in work.

3. Provide the children with pictures of ten workers to be classified: workers who help people or animals - workers who make things.

4. Let the student recall five careers represented by families of his classmates.

5. Provide a hat (model or picture) for each career discussed in the unit. Let each child wear a hat and tell how the worker represented serves his community.

Suzanne Stacy
Lincoln School

HATS FOR WORKERS

1 2 3 4 5 6 7 8

OVERVIEW: Hats are used to introduce a unit on workers in the community.

INSTRUCTIONAL OBJECTIVES: Decision Making: The students will use their senses to gather data and develop concepts.

Work Awareness: The students will gain knowledge of workers in the community.

Manipulative Skills: The students will develop their psychomotor skills through participation in crafts.

Value of Work: The students will identify ways that workers are of service to the community.

SUBJECT HEADING: 301.3 COMMUNITY LIFE
331.7 OCCUPATIONS

ACTIVITIES:

1. Hats! Have the children collect occupational hats from parents, relatives, and friends.

   a. Oral report - When the pupils bring in a new hat, they explain the career to the class.

   b. Pantomime - While wearing a hat, a pupil dramatizes the work of the career the hat represents.

   c. Chart story - The class helps write a chart story about each career introduced.

   d. Display - For three weeks the hats are collected for a classroom exhibit.

2. Bulletin Board: Have the children find pictures of workers and make a giant collage. See how many workers they can name.

3. Model City: The children bring in toy cars, buildings, trains, and planes to build a miniature community. Each child identifies a job within the community and role plays that worker.

4. Research: Each child selects a different career from a teacher-prepared list. The librarian assists the children in locating books on the workers. The children read the books to learn about career.

5. Story Writing: Each child writes a few sentences about a particular career. He may illustrate his story.

6. Diorama: The children will prepare shoe box scenes of workers on the job. Help the children make effective use of craft materials.

7. Culminating Activity: The children wear the hats or uniforms of their selected occupations. On their desks they display a diorama, a book, a story, and the picture about the careers. Parents or other classes are invited to see the classroom exhibits.

EVALUATION:

1. Following the activities with hats, ask the children what they have learned about workers. Evaluate their ability to make generalizations - there are many workers in the world; many workers wear hats; some workers do not wear hats.

2. Prepare a list of careers discussed in the unit and one sentence descriptions of each job. Divide the class into two groups as for a spelling bee. Read a definition and let the children name the worker.

3. Evaluate the diorama on the basis of the student's ability to use craft materials as well as his understanding of the chosen career.

4. Have the students write or tell about one or more things a worker does to help the community.

Dora L. Small School

CITY TOUR

1 2 3 4 5 6 7 8

OVERVIEW: This bus trip enriches a social studies unit on the city. It introduces the children to three major areas - downtown, industrial, and residential - while acquainting them with certain historic landmarks and demolition and construction sites. Children also observe the interdependency of workers in society.

INSTRUCTIONAL OBJECTIVES: Self Awareness: The students will identify their interests and develop new interests.

Interpersonal Skills: The students will demonstrate cooperation in social situations.

Decision Making: The students will use their senses to gather data and to develop concepts.

Value of Work: The students will identify ways that workers are of service to the community.

RESOURCES: Films/Filmstrips/Slides

"Portland, Beautiful Town by the Sea," PRIME, MP 865
"Portland City Tour"

Map of the Greater Portland Area

SUBJECT HEADING: 917.419 PORTLAND

ACTIVITIES:

1. Imaginary Community Map: Have the class make a large wall map of an imaginary community showing the major areas: a railroad, highways, and a waterfront for shipping. Identify and discuss occupations in the community.

2. Dioramas: Have the children work in committees to prepare scenes of the downtown, business, and residential areas.

3. Film: View the film "Portland, Beautiful Town by the Sea." Discuss how the location of a city influences the way its residents earn a living.

4. Orientation to the City Tour: Hold a class discussion on the following topics:
   a. Points of interest to be seen
   b. Identification of the major areas: downtown, residential, and industrial
   c. Workers likely to be seen in each area
   d. Deportment on the tour

5. Bus Tour: Charter a bus and tour sections of Portland and South Portland. See "The Portland City Tour" for an itinerary.

6. Follow Up: Following the city tour use the following activities.

   a. Make posters showing workers observed in each of the three areas; or add three workers to each of the dioramas made earlier.
   b. View the slide set, "Portland City Tour."
   c. Review the film, "Portland, Beautiful Town By the Sea."
   d. Make a bulletin board summarizing things learned on the tour.
   e. Chart the tour route on a wall map of the Greater Portland Area.

EVALUATION:

1. Have the children write an evaluation of the tour and describe what was of interest to them.

2. Ask the children to recall and list the regulations which were necessary to make the trip successful.

3. Have the children plan and make a mural which includes the highlights of the city tour.

4. Have each student recall three workers observed on the tour and explain the contributions each makes to the community.

Rosemary Rankin
Donna McIntyre
Helena M. Dyer School

THE PORTLAND CITY TOUR

LOCATION	POINTS OF INTEREST
South Portland Industrial Park	John Deere Company, Hannaford Brothers, industrial and residential areas adjacent to each other
Veterans' Bridge	Tank farm, Bancroft Martin, railroad tracks, Fore River, peninsula
Western Promenade	Residential area, new apartments, old houses, doctors' offices, hospital
Congress Street	Fire station, Longfellow Statue, High and Congress Streets, Canal Bank, new and old sites, Longfellow House, Casco Bank, First Parish Church, WGAN, newspaper office, City Hall
	County jail, county court house, old post office
Exchange Street	Brick sidewalks, new craft shops
	Old warehouses, urban renewal
Commercial Street	Prince of Fundy, railroad tracks, docks, Union Wharf, Maine State Pier, Port Authority, Casco Bay Lines, fishing boats
Eastern Promenade	Residential contrasts: public housing, high rise apartments, single multiple dwellings
	Harbow view: Calendar Islands of Casco Bay, Spring Point Light, commercial traffic
	Historical Sites: Fort Gorges, harbor entrance, USS Portland, cannon from battleship Maine
Baxter Boulevard	Baxter School for the Deaf, Burnham and Morrill Canning Factory
Deering Oaks Park	Recreation sites, gardens, site of Indian massacre in the 1690's, Federal Post Office, Interstate Route 295
Outer Congress Street	Tate House
Western Avenue	Airport, Maine Mall, industrial park

HISTORICAL TOUR OF SOUTH PORTLAND

1 2 3 4 5 6 7 8

OVERVIEW: A visit to historical sites in South Portland.

INSTRUCTIONAL OBJECTIVES:

Interpersonal Skills: The student will demonstrate an awareness of the interdependence of individuals and groups within a community.

Decision Making: The student will compare workers of long ago with workers of today.

Decision Making: The student will describe how the environment has influenced the lifestyle of South Portland's residents.

Work Awareness: The student will identify South Portland's places of economic significance in the past and the present.

Value of Work: The student will demonstrate an understanding of the contributions of workers long ago to growth of South Portland.

SUBJECT HEADING: 917.419 SOUTH PORTLAND

ACTIVITY: The following tour may be too long for fourth graders. Teachers should select only those sites which will be of significance to the class or make the tour in two separate trips.

TOUR

1. South Portland Library - Boulder with plaque in commemoration of Admiral Peary.

2. Mill Creek - site of old tidewater mill. The mill was built on a dam which held back the flowage of Mill Creek, as well as the tidal waters of Portland Harbor. In 1738, a combination grist and saw mill was operating successfully. After the Civil War, it was operated for a short time as a wooden spool manufacturing plant, then reconverted to a grist mill. In 1892, the mill was completely destroyed by fire. There is a plaque on the bridge crossing Mill Creek to designate the location of the site.

The land in the cove to the left belongs to the Nature Conservancy and will always remain as it is now.

3. Knightville - named for Thomas Knight, a prominent master shipwright, who lived and worked here. Prior to the middle of the 1800's, the land at the end of the bridge lay vacant until Mr. Knight built his house and set up his shipyard here. By 1850, a prosperous little settlement of over twenty buildings, including a school and church, a steam saw-mill, a chain cable factory, and the prosperous Knight shipyard had sprung up.

4. South Portland - Portland Bridge - Transportation over the Fore River was by ferry until 1823 when the first bridge was built linking Portland to South Portland (then called Cape Elizabeth). This first bridge was a flat wooden drawbridge built on pilings, and operated as a toll bridge - typical charges were two cents for people on foot; six cents for horse and rider. In later years, the approach to the bridge on the Portland side became so crisscrossed with railroad tracks, it became known as the "gridiron of death." This bridge was replaced by the present bridge known as the $1,000,000 Bridge in 1916.

5. Crossing the bridge - Central Maine Power Company plant - former site of the Portland Dry Dock Company, where large vessels were floated into one of two basins and then the water was pumped out and the repairs could be made on the ships.

6. Crossing the bridge - point of land to the left is Turner's Island - once the scene of Penobscot Indian summer encampment during the 1800's. Turner's Island was also the center of flour, shoe, and harness manufacturers, and the busy depot of the Portland, Saco, and Portsmouth Railroad which ran over a trestle across the Fore River to Portland.

7. York Street to Commercial - Commercial Street is all filled land. The waters of the harbor once lapped at the foot of Fore Street and York Streets. In 1852, Commercial Street was constructed along the frontal tidewaters and across the wharves. The new street was soon lined with warehouses, stores, and wharves. Here, at the corner of Maple and Commercial Streets, the "great fire of 1866" had its start when a boy carelessly threw a lighted fire cracker into a boatbuilder's yard. The fire spread rapidly and left the city a charred ghost town.

8. West Commercial Street was the flourishing center of the lumber trade, with wharves covered with the products of the mills in the north of Maine, brought down by rail for shipment. The stations for the Boston and Maine Railroad and the Eastern Railroad were located here. Here also were the wharves where lay the steamers of the International Steamship Company, whose vessels made frequent and regular excursions to Nova Scotia and Canada.

9. Veterans' Bridge to South Portland Maine Mall exit - Veterans' Bridge replaces the former Vaughn's Bridge which was the first bridge to span the Fore River in 1800. Built of cobwork cribs filled with rock and sunk to serve as piers, the bridge considerably shortened the trip to Portland from South Portland and points south. The bridge was operated as a toll bridge and did a considerable business transporting all manner of man and beast.

10. Boys Training School - 1853 - This was the first school in the state of Maine established for the education of juvenile delinquents.

11. Long Creek - In 1678, a peace treaty with the Indians, lasting for ten years, was signed under the "Smoking Tree" on the bank of Long Creek. A saw mill was constructed at Long Creek in 1681, and in 1686 a ferry permit was granted for transportation over Fore River, from the southern side of Long Creek to the opposite point on Portland's side, a little below Veterans' Bridge. In 1745, Indian attacks were made at Long Creek, and two men were scalped and killed. 1760's saw the flourishing business of manufacturing salt on General Samuel Waldo's farm at Long Creek. Much of the salt was shipped from Waldo's wharf at Long Creek Point. The area around Long Creek was primarily a farming region and settled enough to warrant the creation of a district headquarters for a moving grammar school in 1771.

12. Long Creek Cemetery - a pre-revolutionary war burying ground located in the rear of the National Guard property, which may be visited any week day by requesting entrance through the office of Sgt. Farrell in Room 1, National Guard Building. The earliest stone is dated 1757, and the last recorded was 1843. The cemetery contains twelve known graves, many of them bearing the name of Skillin. One man buried here was responsible for securing the mill privileges on Long Creek and also served in Samuel Waldo's regiment before the revolution.

13. Clarks Pond - Former site of an ice house which has been destroyed by fire.

14. Westbrook Street - at one time a part of the "Post Road" which was established to insure mail service to the area weekly from Boston. The road was lined with markers, at one mile intervals, called milestones. These markers were large granite blocks, placed by the order of George Washington at the time the Colonial Post Service was established. One of these old milestones, bearing the inscription B. 122, denoting it was 122 miles from Boston, is located at the entrance to Larry Rowe's Golf Course.

15. Nearby at 143 Westbrook, is the site of the famed tavern of stagecoach days, Broad's Tavern, the most up-to-date inn and dining place east of Boston. It was famous as Maine's first and most successful night spot, and catered to General Lafayette and President James Monroe. One of its most original attractions was the Bar Room Tree - a platform with railings and steps leading into it, located within the branches of a large elm tree outside the front of the tavern.

16. Main Street - This area was formerly called Skunk Hill, and in the gay nineties was the site of the Portland Country Club golf course.

17. Rigby - 1893 - Rigby Park, a former famous oval racing track, was considered by many to be the fastest track east of the Mississippi. The track is still plainly visible from the air.

18. Cash Corner - formerly Lousy Lane. Calvary Cemetery contains the unmarked grave of twelve Irish destitute passengers who were drowned at the wreck of the "Bohemian" off Cape Elizabeth in 1864.

19. Ligonia - The area was first known as the site of the Cape Trotting Park, a harness racing track. The area was then purchased by the government and became a training camp in the Civil War days, known as Camp Berry. After the Civil War, the area became the property of the Portland Rolling Mills, manufacturers of iron products, who converted the barracks into company housing for their workers. Adjacent to this property was that of the Portland Kerosene Works, producers of kerosene and similar products.

20. Lower Main Street - site of former Vaughn's Bridge in the section known as Ligonia.

21. Broadway and Evans Street - Barberry Creek - In 1682, a grist mill was established on Barberry Creek, and in 1782, a saw mill was in operation. In the 1850's a small but prosperous brickyard was operated in the vicinity. With the coming of the railroad, the Portland, Saco, and Portsmouth Railroad established a depot at Barberry Creek, and in turn, the first Post Office in South Portland was established at the depot, much to the citizens relief, as they formerly had to travel to Portland for mail service.

22. Broadway near Elm Street - War memorial

23. Mill Creek Park - not so long ago, the city dump, it is now a public park enjoyed by those who work and live in the area.

24. Harriet Street, High Street, Pine Street, Front Street to Centerboard Yacht Club - original site of Ferry Village, whose boundaries included the shoreline from Knightville to Spring Point. Travelers to the region came by way of the Old King's Highway, following the shore from the mouth of the Spurwink River, Cape Elizabeth, to Purpoodock (Spring Point).

In late 1600's, irregular ferry service existed, the first ferry being a hand-driven boat, running at irregular intervals from Fort Preble Point to the point across Fore River known as Clay Cove, now obliterated, but in the vicinity of the Canadian National Railway property. Since it was difficult to call across the Fore River or to signal for service in fog when a traveler wanted to be ferried to the opposite side, the first official ferryman was appointed in 1719 and the town voted to maintain a landing at the foot of Sawyer Street. The toll was set at three cents. Until the middle of the 1800's the ferry operated as a town controlled franchise, using an oar or sail driven boat.

In 1847, the state granted a charter to the Portland and Cape Elizabeth Ferry Company, whose first vessel was a double-ended side wheel, steam operated ferry named Elizabeth. The following years brought dissatisfaction with service, rates, and schedules, giving rise to the establishment of a second ferry company, The People's Ferry Company, 1865, made up of a coalition of forces banded together by disgust at the ferry service. The advent of the trolley line, and the declining population of Ferry Village spelled the end of ferry service and by 1912 both companies were out of business. Ferry service was resumed for a brief period during World War II, to help relieve the traffic situation created by the full swing operations of the shipyards.

25. High and Front Street - area during the 1800's, an unbroken line of shipyards from Ferry Village to Turner's Island. The shipyards constructed a small number of clipper ships, but evolved to the building of a ship known as the "Downeaster," a square rigged, three masted vessel, adapted to a small crew and capable of handling large cargoes anywhere in the world. The area also saw the establishment of a Marine Railway, for the repair and rebuilding of large vessels. The men who worked in these shipyards were generally skilled craftsmen and much of the work was done by hand.

26. Bug Light - 1852 saw the completion of a breakwater extending a quarter of a mile in length from Standford's Point out along Standford's Ledge, for the purpose of protecting the shipping in the harbor from the heavy swells of the open ocean. A white wooden lighthouse with an octagonal tower of 23 feet was constructed at the end of the breakwater in 1855. This original wooden tower was removed to Little Diamond Island in 1875 and was replaced by an iron tower slightly larger in size, with a wooden building for the lighthouse keeper. Bug Light has been incorporated into the official seal of South Portland, and is the hallmark of the city. The breakwater has been filled in and the property now belongs to the General Electric Company.

27. Cushing's Point - home of Ezekiel Cushing - one of the most prominent merchants in the area, engaged in West Indies trade, and involved in coastal whaling.

28. Shipyard area - experienced a mild boom in World War I and a decided boom in World War II. The shipyards have played a promiment role in the maritime development of the nation. In World War I, the yards were developed by the Cumberland Shipyard, and by the New England Shipbuilding Yards in World War II. The area produced 274 cargo vessels during World War II and gave employment to thousands of men and women in the area. It was during this period that the waterfront of South Portland acquired an entirely new face as many buildings were razed or moved to make space for the shipyards.

29. Fort Road - Spring Point Light - Built in 1897 to replace buoy marker. The breakwater was added about 25 years later. It was from Spring Point that Purpoodock citizens watched in horror the approach of Captain Henry Mowatt of the British Royal Navy, who relentlessly bombarded Portland with ammunition from five vessels for nine hours on a summer's day in 1775, leaving the town in ashes.

30. SMVTI - area known as Purpoodock Point, Spring Point, later Preble Point - first settlement in South Portland in 1703, destroyed by Indian attack which resulted in the killing of 25 settlers and the capture of 8. The area again became a wilderness until 1716 when the first house was built at Purpoodock. A log meeting house was constructed in 1722, which was used both as a garrison and a church. A burying ground was established near the meeting house. This is now known as Thrasher Cemetery and is located near the old dining hall of SMVTI. From 1724-1756 the area experienced sporadic troubles with the Indians. Then came a time of peace, and the settlement flourished. In 1774, following the news of the Battle of Lexington, the town of Purpoodock began patroling the coast on the lookout for British ships. Four minutemen were stationed each night on sentry duty on the coast between Spring Point and the ferry landing.

In 1776, earnest preparations for war culminated in the construction of Fort Hancock, on the site of SMVTI, which was manned and armed for service in the Revolutionary War.

In 1808, a new brick and granite fort was constructed upon the site of Fort Hancock. The new fort was named Fort Preble, after Commodore Edward Preble, and constructed for the purpose of seacoast defense. The fort became a formidable military establishment during the Civil War. It was reactivated for service during World War I and II.

Willard Beach - Simonton's Cove - scene of William Simonton's flourishing West Indies trade, maintaining a large wharf and warehouses, dealing in cargoes of rum and molasses, lumber and spices. The cove was thronged with vessels and gave employment to many in the area. The West Indies trade was annihilated during the Revolution. Later it was replaced by the fishing industry. Simonton's Cove had one of the most active fishing fleets at the Cape, and during the late 1800's was known as Gurry Cove - gurry meaning fish refuse. The fish houses on the point were built around 1884 and a flourishing trade in cod fish was maintained here.

In 1896, the trolley company, the Portland Street Railroad Company, built an elaborate casino, housing a bowling alley, dance hall, and steam organ, at Willard Beach and the beach became a resort area. The casino was destroyed by fire two years after it was built, but the trolley line continued to bring bathers to the beach, and people built summer cottages nearby.

Portland Head Light - commissioned by President George Washington and erected in 1790, Portland Head Light was the first lighthouse to be built on the coast of Maine, and the thirteenth on the Atlantic seaboard. Constructed of rubble-stone laid up in lime, the original height was 97 feet, and used 16 whale oil lamps for its beacon. The tower has undergone several renovations and now towers 101 feet above sea level. In the 1860's, the U. S. government erected its first fog bell here at Portland Head Light. This first fog warning was a 1500 pound cast iron bell hung 60 feet above sea level, which was struck with a wooden clapper every 30 seconds in foggy weather.

31. Cottage Road - Congregational Church - In 1733, the second parish of Falmouth was established and a new meeting house, replacing the log meeting house at Purpoodock Point, was constructed in what is now Mt. Pleasant Cemetery, in the vicinity of Cottage Road and Pine Street. The new building closely resembled a large barn with box pews, and served not only as a place of worship but also as a town meeting place for more than 100 years. In 1835, it was torn down and replaced by a new structure, equally plain, but boasting a bell-tower and a spire. In 1891, the building was moved across the street to its present site, and that building is incorporated into the present church.

Soldiers and Sailors Monument - honoring the men who participated in the Civil War, erected in 1876.

Mt. Pleasant Cemetery - oldest known burial in cemetery was that of Colonel Cushing's wife who died in 1742.

32. Sawyer Street to Ocean Street - road was once part of the ancient Spurwink thoroughfare which led from old Ferry Village to the outside world. One-storied farm cottages were built all along this road and formed a little village which boasted its own church, a Quaker meeting house, that stood within the Bayview cemetery grounds. Also known as Town House Corner. First municipal building built in 1837, destroyed by fire; second built in 1874.

33. Ocean Street to Highland Avenue - Highland Avenue once called Barren Hill Road and Brewery Road from Ocean Street to Cottage Road. Site of a brewery established for the manufacture of ale in 1857. An old and popular tavern stood on the site of the Frank I. Brown School, and served as a meeting place for teamsters with farm produce, and herdsmen driving their cattle over the roads to the markets in Boston.

EVALUATION:

1. Imagine you are the only resident in South Portland. Write a paragraph to describe where you would live and how you would spend a single day.

   Share your stories in your group. With the group, make a list of the five businesses or institutions you would miss the most.

2. Make a chart to show how environmental factors have influenced the growth of industries observed on the tour.

3. List three or more business sites of Old South Portland.

4. List three businesses you saw on the tour which employ over twenty-five people.

5. Make a bulletin board of student drawings of "Workers In South Portland Then and Now."

6. Role play a family living during a particular period of South Portland's history when the residents may have wished to leave the area. Examples may include Indian attacks at Purpoodock, a burned out mill, Captain Henry Mowatt's bombardment of Portland in 1775, hardships due to cold, illness, lack of communication, or transportation across the river.

SOUTH PORTLAND HISTORICAL TOUR MAP

HISTORICAL BACKGROUND OF SOUTH PORTLAND

Settlements

The first permanent settlers to the area, once inhabited by Indian tribes of the once powerful Abenaki nation, were Richard Tucker and George Cleaves. Traveling from England, they established themselves on the Neck, now Portland, in 1632. In 1658, the region now occupied by Portland, South Portland, Cape Elizabeth, Westbrook, and Falmouth was incorporated into the State of Massachusetts and named Falmouth.

The earliest settlements in South Portland were at Purpoodock Point (SMVTI property) and Long Creek. These settlers did not enjoy much peace and quiet because of the threatening troubles with the Indians during the French and Indian Wars. With the coming of peace, the settlements grew and prospered. Cape Elizabeth, which included South Portland, was established as a district separate from Portland in 1765.

It was not until 1895 that South Portland was separated as a town from Cape Elizabeth. The partition was due largely to a dispute over the introduction of Sebago Lake water to the city, causing increased taxation. In 1898, South Portland received its official city charter from the state.

Economy

The region attracted the adventurous men who first came for the excellent fishing and fur trading opportunities in the area. With the coming of the first settlers, farming and fishing were the main modes of employment. As the settlements grew, the people became more dependent on one another for needed goods and services, which resulted in varied employment.

The lumber industry formed the wellspring of prosperity, employing many men in the harvesting, processing, and shipping of the forest products. The trade in lumber supported the West Indies trade -- resulting in the importation of sugar, molasses, and rum.

The maritime trade flourished and during the War of 1812 privateering became profitable. During the 1840's shipbuilding came to be a very significant part of the economy of South Portland, and many shipyards were in full operation building and repairing vessels. Many talents were employed in this industry as most of the work was done by hand. Lobstering and fishing continued to be an important means of earning a living, and with the growing sophistication of the people, various artisans found employment in their fields. An interesting sidelight of silversmithing was the employment of workers fashioning not only articles of beauty for the table, but enjoying a lively business in the crafting of knee, shoe, and sleeve buttons for clothing.

Growth and prosperity of the city gave rise to the establishment of stores and service industries, and the excellent harbor waters continued to attract new business and to afford num erous economic opportunities for the people who chose to live here.

Leisure and Recreation

The people in former times had little time for leisure and in the beginning, their recreation was necessarily tied to their way of life and work. The first settlers found amusement and relaxation within the home. Roads were nothing but narrow paths crisscrossing the woods, wolves were abundant, a prize of 40 shillings to anyone who shot a wolf, and homes were scattered and isolated.

Church and town meetings provided occasions for meeting friends. Much merriment was present in spinning and quilting bees, barn raising and harvest times. As free time increased, clubs and social parties were formed usually meeting at a local tavern, sleighing parties organized in winter, fishing and bathing in the summer and visiting the islands were all popular forms of recreation.

Theatrical entertainments were wholly unknown here before the revolution. It wasn't until late in the 1800's that the theater played an important part of the recreational scene when Free Street in Portland became known as the Great White Way. Until that time there was a steady stream of itinerant performers, jugglers, minstrels, and such. Weekly lectures were also well attended.

With the advent of the trolley line, many people spent their Sundays enjoying life at the trolley parks where swimming, bowling, and meeting friends provided diversion.

Education

Education did not receive much attention until the late quarter of the 19th century, when the town voted to establish its own public high school. Prior to 1765, students desiring formal education were sent to Portland to attend school, boarding in with friends or relatives in Portland. In 1765, the first grammar school was established in South Portland, and four school districts were apportioned in 1771, but there was only one teacher appointed, who necessarily had to share his time between the districts and resulted in a moving grammar school. By 1875, there were fourteen school districts within the town, but schools were still inadequate. With the opening of the high school, overcrowded conditions in the district schools were alleviated, and program expansion and improvement at the grammar school level shot ahead, until today one of South Portland's greatest prides is its excellent school system.

SIGNIFICANT DATES IN THE HISTORY OF SOUTH PORTLAND

West Indies Trade

1670— Property deeded at Purpoodock and Long Creek

Settlers at Purpoodock flee from Indians (1676)

1680— Sawmill at Long Creek & Gristmill at Barberry Creek built

Settlements at Purpoodock, Spurwink, Stroudwater & The Neck

1690— Indians capture Fort Loyal (Portland); whole area becomes wasteland

1700—

Indians destroyed first permanent settlement in South Portland at Purpoodock (1703)

1710—

Settlers return to Purpoodock

1720— First official ferryman appointed at foot of Sawyer Street; also Irish immigrants winter here - up Fore River

Gristmill at Mill Creek established

1730—

Second Parish of Falmouth established - new Meeting House

1740—

Indian attack at Long Creek

1750—

Salt manufactured at Long Creek

1760—

Incorporation of district of Cape Elizabeth; first grammar school in South Portland

1770—

Burning of Falmouth; Fort Hancock built at Purpoodock

1780— Post roads established

1790— Establishment of Portland Head Light

Maritime Trade

1800— Vaughn's Bridge built

Rise of Shipbuilding and Lumber Industries

1810— Fort Preble

1820— Maine Statehood

Portland Bridge

1830—

First municipal building in South Portland

1840— Railroad

CAREER AWARENESS
1 2 3 4 5 6 7 8

OVERVIEW: During a four week unit, the students will practice language arts skills, learn about a variety of careers, and strengthen their own self concepts.

INSTRUCTIONAL OBJECTIVES: Self Awareness: The students will demonstrate an appreciation of their own interests and skills.

Work Awareness: The students will identify, classify, and gain information about many careers.

Value of Work: The students will recall the contributions of a variety of workers to society.

Relevance of Education: The students will recognize that schooling is necessary for future careers.

RESOURCES: Encyclopedias, especially Our Wonderful World, Zim, 1971

SUBJECT HEADING: 301.3 COMMUNITY LIFE
331.7 OCCUPATIONS

ACTIVITIES:

1. Introduction: There are over 20,000 careers. How many could you list? What careers would you like to know more about? What would you like to know about a job? Where can we locate information about jobs?

2. Help Wanted: Cut out, underline, and discuss newspaper ads. Classify the jobs according to the amount of education, skill, training, and experience required.

3. Library Visit: Have the class visit the elementary library and locate the reference section. Let the students practice locating articles on careers in the encyclopedias.

4. Note Taking: Have the pupils select a career to research. Decide what information they must locate. Have them make notes in their own words on these topics. Note the use of capitals for each topic.
   - Name of the job
   - Responsibilities and duties
   - Salary
   - Educational Requirements
   - Skills and aptitudes
   - Personal benefits
   - Environmental restrictions

5. Career File Box: Have the pupils prepare one card for each career researched. They record only the basic information. The cards are arranged alphabetically in the classroom file.

6. Career Bulletin Board: Display 8 or 10 pictures of interesting occupations. Label the exhibit "Decision, Decision, Decisions." Discuss career options and individual interests and goals.

7. Poetry: Discuss career options and have the students write a poem entitled "What I Could Be."

8. Interviews: Discuss techniques for interviewing a person. Have the class list suitable questions to ask a worker about his job. Have the students practice interviewing one another in class. One student may pretend to be from another plant and is eager to learn about Earthling's careers. The stranger may also be interviewed. Each student decides on a worker to interview, makes an appointment, and retrieves the information. A tape recorder may be used or the worker may visit the class for a public interview. Information is shared with the class and added to the Career File. Thank you notes are written to the people interviewed.

EVALUATION: 1. Have the students write an evaluation of the four week unit and answer the following questions:

a. What have you learned about using reference materials and taking notes?

b. What have you learned about the World of Work?

c. What have you learned about your own career interests?

2. Reproduce an encyclopedia article about a career and have the students condense the information on a file card under these topics:

Job
Responsibilities
Restrictions
Benefits

Lola Delano
Helena H. Dyer School

ECONOMICS EXPERIMENT
1 2 3 4 5 6 7 8

OVERVIEW: A simulated economic system within the classroom provides opportunities for individual decision making and interpersonal relationships.

INSTRUCTIONAL OBJECTIVES:

Self Awareness: The students will demonstrate an awareness and appreciation of their ability as workers.

Interpersonal Skills: The students will develop skills in social reasoning and interaction.

Decision Making: The students will develop a beginning skill in the use of the decision making process.

Economic Awareness: The students will understand that people are paid for their work and use that money to satisfy their needs and wants.

Economic Awareness: The student will recall that specialization creates an interdependent society.

Economic Awareness: The student will recall that all citizens have the responsibility for the success of the American economic system.

Relevance of Education: The students will demonstrate a positive attitude toward schooling.

RESOURCES: W. Harmon Wilson and Romas W. Warnke, Life on Paradise Island, Scott Foresman & Company, 1970

Pink Pebbles Game

SUBJECT HEADING: 330. ECONOMICS

ACTIVITIES:

1. Background: Before starting the Economics Experiment, read portions of Life On Paradise Island and relate the economic concepts of the story to every day life through questions such as these: Where does your allowance come from? How do your parents get their money? What responsibilities do workers have in spending their earned money?

2. Introduction: Explain the procedures of the Economics Experiment. One 45 minute period a week, for 6-10 weeks, the class will pretend it is a community with its own economic base. The pupils will try to earn as much money as they can. The students will want to start by choosing a name for their town.

3. Job Applications: Prepare a list of 25 or so classroom jobs with a brief job description for each task. Distribute job application forms to each student (Figure A). Stress neatness and accuracy. Students may apply for more than one job. Applications are screened by the teacher and pupils are awarded their assignments. They are told why their application was accepted or rejected.

4. Pay: Volunteers design a one dollar, five dollar, ten dollar, and twenty dollar bill (Figure B). The best designs are chosen by the class, and reproduced for class use. If he has done his job, each worker receives $30 pay once a week.

5. Classroom Setting: The room is divided into square meters which represent city lots. A map of the room representing the city is drawn and each lot is numbered (Figure C). The map is distributed to the students so that they may choose the lot upon which they will build their homes (desks).

6. Cost Description:

	Buy	Rent/1 month	Weekly
Desk - Home	$75	$15	
Furniture - Chair	$15		
Necessities - Books			$5
Utilities		$ 7	
Space - Lot	$50		
Taxes/Services			$5

The above cost description is posted where all may see it. The teacher keeps records of payments. Later, certain "business persons" may keep the records.

7. Services For Sale: Each student makes a poster selling a service he is willing to sell. For a price, he will clean a desk, make a drawing, or teach a skill.

8. Currency Exchange: When a piece of money passes through a person's hands, it is initialled on the back. At the end of the week, the class discovers how many transactions may be involved with a single piece of money.

9. New Business Ventures: When the economy has been established, the teacher may put the pencil sharpener up for sale. The highest bidder gains control of the sharpener and charges a fee for its use. A drinking fountain or right-of-way may be bought and sold by a person or company (group of bidders). Students are encouraged to use their ingenuity to earn dollars.

10. Discussion: In what ways is our economic experiment similar to the economy of the real world?

EVALUATION:

1. Have the students write in their notebooks an evaluation of the work they did each day and decide whether or not they earned their pay.

2. The teacher keeps anecdotal records of the students' ability to cooperate with their peers during the classroom experiment.

3. Have the students write on the topic: If our class were to repeat the Economic Experiment, I would do the following things differently.

4. Have the students create a cartoon strip in which an explanation of our economic system is given to YUGO, a boy from another planet. YUGO was provided at birth with a pack containing all the necessities of life. The cartoon strip should explain how an American family takes care of its needs and wants. Some words that might be used are salary, job, job applications, necessities.

5. Have the students use creative dramatics to present a social situation in which each person assumes a specialized work role. Evaluate the pupil's ability to demonstrate the interdependence of the workers.

6. Review the importance of the cooperation of all individuals to make the Economics Experiment work in the classroom. Discuss the responsibilities of all Americans to make the national economic system work.

7. Give the students a pre-test and post-test to measure their attitude toward school. Have them indicate their feelings on a scale of 1 to 10.

PART III - COMMUNITY RESOURCES

Locating Community Resources

Field Trips

Resource Visitors

PART III - COMMUNITY RESOURCES

Involving resource persons in the school has many advantages. Stimulating speakers and trips to exciting places in the community enliven the curriculum, make education relevant, and expand the horizons of children. When parents make classroom presentations, a personal satisfaction comes both to the parent and the child. Members of the community welcome the opportunity to cooperate in the education of children. As they help in the schools, they grow in their respect for, and understanding of, education.

Many persons other than the classroom teacher can bring new learning experiences to boys and girls in the schools. These volunteers may be parents, other teachers, high school and university students, civic groups, or the business community. They may serve as guides for field trips to business sites, visit the school and give a talk, demonstrate a skill, show a film, or occasionally they may serve as consultants for a school project. The involvement of resource people from the community enhances the educational process as it brings the outside world into the lives of the students.

LOCATING COMMUNITY RESOURCES

Three methods of locating community resources are available to teachers.

Personal Contact

First, a teacher may call upon members of the family, personal friends, neighbors, acquaintances, and retired teachers. The oil delivery man, the city health inspector, or the shoe salesman all may have information to share regarding their work, hobby, or travel experiences. Generally, the most satisfactory resource persons are those whom the teacher knows personally.

Parent Survey

Another successful method of locating resources within the community is to conduct a Parent Survey. A letter is sent to every parent explaining the school's interest in identifying resources and a form is included requesting information on the parents' work, interests, and skills (Figures 1 & 2). The completed forms are returned to the classroom teacher to be used as an initial resource list. Later, a master list for the school is compiled in alphabetical order (Figure 3).

Community Resource File

To provide more specific assistance to the classroom teacher, a Community Resource File may be developed. The file consists of cards which contain information about field trips, speakers, or free materials which may be ordered (Figure 4). The cards are arranged alphabetically by subject headings, such as animals, coal, dairying, fish, etc. Each elementary school library in South Portland has a file.

Keeping the Community Resource File up-to-date is the responsibility of the librarians and the classroom teachers. Deletions are made by the librarians on the basis of information received from the teachers. Should a teacher discover that a speaker has moved away from the area, that a field trip is unsuitable, or that some materials have been withdrawn, the librarian is notified and the card is withdrawn.

Additions to the file may be made at any time. Teachers are invited to share names of resources they have discovered and used successfully through personal contact or from the Parent Survey. With the librarians, the teacher records the necessary information on a data sheet (Figure 5). The librarians type the new card and duplicate it for each school library.

SOUTH PORTLAND SCHOOL DEPARTMENT

September 20, 1976

To: All Parents

From: Albert R. Morton, Assistant Superintendent

Re: Parent Survey

In an effort to encourage members of the community to share in the education of children, we are asking parents who are interested in volunteering at school to fill out the form on the reverse side. If you have a hobby or skill, have traveled widely, or are willing to share information about your career, please return the completed form to the classroom teacher by October 1. Your help is appreciated.

FIELD TRIPS

Years ago most children observed their parents at their careers because work was done in the home. Now that more parents are employed outside the home, it is necessary to take today's children into the community to see their parents and other adults at work.

There are some concepts that are better taught outside the classroom where children use their senses to learn through direct observation. For these reasons, the use of field trips is advocated to develop an awareness of the world of work.

SETTING OBJECTIVES

A field trip should be a learning experience, not merely a class excursion. Generally, it is unwise to combine classes; the size of the group should remain small. As with any other educational activity, it must be well organized and have specific objectives. The trip is expected to correlate with the curriculum and/or the goals and objectives of the Career Development Design. Sample objectives for a field trip are offered below:

1. After this field trip the student will be able to identify 10 careers in agriculture.

2. The student will have some knowledge of the necessary skills and preparation for these careers.

3. The student will demonstrate an understanding of the interdependence of workers in society.

4. The student will describe his own feelings about the careers he observed.

PRE-VISIT

Before the trip, the teacher and/or a committee of pupils should visit the site and talk with the guide. This provides an opportunity to learn about the workers, acquire necessary background information, and anticipate any organizational problems. After seeing and hearing about the points of interest, discuss with the guide the objectives of the visit and how much the children can be expected to comprehend. Without the pre-visit, the tour may become a dialogue between the adults and the guide with the children as uninterested by-standers.

PROCEDURES

Prior to the field trip, the following arrangements should be made:

1. Consult with the building principal and/or the curriculum director regarding the trip.

2. Obtain clearance from the Assistant Superintendent of Schools. Use the Request for Educational Field Trip Form (Figure 6).

3. Have the parents sign Field Trip Permission Slips (Figure 7).

4. Notify any special teachers that the class will be out of the building that day.

5. Enlist one reliable chaperone for each 4 or 5 children making the trip.

6. Arrange for transportation to and from the site.

The problem of transportation may be solved in a number of ways. Children can walk to nearby sites. For longer trips, it may be necessary to charter a bus. Call Greater Portland Transportation (774-0351) and ask for Mr. Forsythe,

or Brunswick Transportation (799-8528) and ask for Mr. Harding. These men arrange the charters. Local tours for a half day cost about $35.00; the cost to Augusta is about $100.00. Since there are no funds for school field trips, the cost must come from the pupils, parent groups, or special fund raising projects.

The school bus is available at no charge for short trips in the Greater Portland area. Pick-up times must be arranged around the drivers' schedules. The building principal may call Mrs. Luther in the Maintenance Office (799-0536) to make arrangements.

If parents are asked to drive, the principal and the classroom teacher should be satisfied that each is a responsible driver and carries adequate insurance. It is preferred that a form be sent home requesting a declaration of coverage, but a verbal confirmation may be acceptable. The South Portland Schools have no extended insurance coverage for teachers and volunteers who drive their own cars on school events except in cases where negligence is proven.

CLASS PREPARATION AND PLANNING

Prior to the field trip, the teacher should first review what the class already knows about the topic and then provide the class with any background information necessary for orientation.

Next, the teacher and the pupils together should set clear purposes for the trip and plan related activities such as the following:

1. Prepare a list of questions to ask the guide; such as information about the workers' jobs, their necessary skills, and the working conditions.

2. List the workers the class expects to see.

3. Research the topic in the school library.

4. Prepare a list of rules on safety and behavior during the trip.

5. Decorate a classroom bulletin board on the topic.

6. At the site, record a list of the workers seen.

7. Take pictures of the workers.

8. Interview the workers with a cassette recorder.

THE FIELD TRIP

If the class is being transported by bus, the children may play a work awareness game en route. Give the children booklets with the letters of the alphabet inside. Have them record, in alphabetical order, the names of all the workers they see on the way. Other pages in the booklet may be used for taking notes, or may contain the questions to be asked of the guide.

When the parents are driving small groups, ask them to assume responsibility for the learning experiences as well as the safety of the students. On location, they should interact with the children to keep them alert to the environment.

At the site, move in small groups whenever possible. If several guides are available, have the groups go in separate directions since there will be fewer distractions.

Use a tape recorder, camera, and personal notes to record the visit.

FOLLOW UP AND EVALUATION

Often it is advantageous to conduct a field trip at the introduction to a unit because so many classroom activities grow out of the visit. Following a trip in early May, a kindergarten teacher exclaimed, "I have enough different ideas to provide activities until the end of school!" Following, are a few suggestions for follow up activities:

1. In class discussion, recall the pupils' observations of the workers, their duties, working conditions, training, and skills.

2. Have the pupils evaluate the trip: "Did we learn what we wanted to learn?" "What else would we like to learn?"

3. Write stories and poems about the workers.

4. Sing songs about the workers.

5. Make drawings of the workers observed.

6. Use dramatizations and role playing to express feelings about these careers.

7. Write thank you notes to the company. Include drawings, booklets, or a collage.

SOME REMINDERS

Members of the business community are most generous with their time and service to the schools. Keeping this in mind, always be on time, respect the restrictions the industry has placed on the visit, and keep the children under control. Always send notes of appreciation from the children and the teacher. They are warmly appreciated and serve as an excellent form of public relations.

MINI TRIPS

Mini trips are field trips for small groups. They have proved to be extremely successful in places where large groups cannot be accommodated, or where there is a problem seeing and hearing the guide. The procedure for a mini trip is similar to that of any field trip except that approval is cleared through the building principal rather than the assistant to the superintendent. The children must have signed permission slips and the parent driver should be a responsible, mature person with adequate insurance coverage.

As with any field trip, mini trips must be carefully planned. The teacher makes certain that the supervising adult and the children have a clear understanding of the purpose of the visit. A few children may leave the classroom, but the entire class is involved in planning the trip. They all help prepare the questions to be asked and send the mini trip participants as the eyes and ears of the whole group. Upon their return, the small group shares its experiences and information with all.

In planning a curriculum unit, teachers may arrange for several related mini trips so that each child may be a visitor/reporter as well as a listener. In this manner, a series of mini trips to transportation centers, health centers, or food processing and distribution centers can enrich a unit through a different form of individualized learning and group sharing.

SCOPE AND SEQUENCE

No attempt has been made to firmly assign specific field trips to specific grade levels in this curriculum plan. Teachers should select trips which meet the objectives of their classes. Occasionally, the same trip may be taken by different grades, but for different reasons. To avoid unnecessary repetition, the teacher should check with the building principal and other teachers in the school before planning the trip.

A complete file of field trip locations with addresses and telephone numbers is in each of the elementary libraries. Whenever possible, several resources are offered for a topic. Teachers are requested to use discretion and judgment so that a few industries will not be overburdened with requests. Field trips listed in three forms - alphabetically, by topics, and by clusters - appear in the appendix of this guide.

On page 152 is a list of field trips arranged by grade level; Field Trip Information Guides appear on pages 153 to 172. The grade level on the list and the Field Trip Information Guides indicate the time when the trip is most frequently taken.

Office of the

Superintendent of Schools

South Portland, Maine

REQUEST FOR EDUCATIONAL FIELD TRIP APPROVAL Date _____

Field trips are worthwhile only when they complement the work or project of a class, are planned well in advance, and are appropriate for the grade involved. Parental approval will be obtained prior to taking the trip after receiving approval from the Superintendent's Office.

Trip planned or _____

Place to be visited _____

Date of trip _____ Grade(s) involved _____

Number of chaperones including teacher(s) _____

Transportation to be used _____

School _____ Teacher _____

REQUEST FOR EDUCATIONAL FIELD TRIP APPROVAL FORM

Figure 6

School _____ Date _____

Dear _____:

An educational field trip is being planned for the pupils of grade(s) _____ on _____.

The pupils will walk, be transported by _____ from the school to _____: will leave the school at _____ and return to the school at approximately _____. Arrangements for noon lunch are (not) being made. There will be _____ chaperones in addition to _____ teacher(s).

Each pupil is requested to contribute _____ as his share of the trip's expense.

Please indicate below your approval for your child to participate in this experience by signing and returning this form to the school.

Parent's signature _____ Teacher _____

FIELD TRIP INFORMATION GUIDE
THE SUPERMARKET

PLACE:

Gold Star IGA Market, 242 Maine Mall, South Portland
Mr. Paul Lessard, Manager Telephone 772-5711
Mr. Chris Jager, Assistant Manager

Legion Square Market, 101 Ocean Street, South Portland
Mr. Thomas Smaha, Manager Telephone 799-6613

Martin's Shop & Save, 50 Cottage Road, South Portland
Mr. Tom Catterson, Manager Telephone 799-7359

Shaw's Markets (all stores) Telephone 773-0211
Mill Creek Store, 50 Market Street, South Portland
Mr. Lawrence Brady, Manager Telephone 799-8149

Mall Plaza Store, 220 Paine Road, South Portland
Mr. Mark Binette, Manager Telephone 775-6395

SITES: Dry and cold storage; delicatessen, meat cutting, office, produce packaging, stocking the shelves, cashier

GENERAL INFORMATION: Some of the managers give the children hats to wear and display posters for the classroom. They have also given a box with a sample of each kind of fruit and vegetable to be used in the classroom for study.

SUBJECT HEADINGS:
301.3 COMMUNITY HELPERS
331.7 OCCUPATIONS
641.3 FOOD
658.87 SUPERMARKETS, GROCERIES, GROCERY TRADE

WORKERS:

Manager	Office Clerks	Maintenance Men
Assistant Manager	Meat Cutters	Rubbish Removal Men
Meat Manager	Stock Clerks	Bakery Workers
Produce Manager	Bundle Boys	Delicatessen Workers
Parking Lot Manager	Cashiers	
Check-out Manager		

ACTIVITIES:

1. Buy apples and make applesauce.
2. Buy items for resale at school.
3. Buy items and cook a meal.
4. Make a market in the classroom: classify the items, count play money, practice salesmanship and public relations, arrange attractive displays, discuss supply and demand, and role play distribution of food supplies.
5. Collect food ads.
6. Look up "grocers" in the yellow pages.
7. Write an experience chart about the trip.
8. Visit an open air market.
9. Make drawings of the visit.
10. Write a thank you letter on chart paper and have the children sign their names.

FIELD TRIP INFORMATION GUIDE
CUMBERLAND COUNTY FAIR

PLACE: Cumberland Farmers Club Fairgrounds
West Cumberland, Maine

TELEPHONE: Stanley J. Hall, South Windham, Maine 892-4655
Ask for general information and a copy of the Fair Booklet.

RESTRICTIONS: It is preferred that school groups attend the fair early in the week.

SITES:

1. Exhibition Hall: grains, vegetables, fruit, needlework, bread, pastry, dairy products, canned goods, snapshots and paintings, crafts and hobbies, plants and flowers, demonstrations.

2. 4-H Exhibition Hall: camping, child care, clothing, conservation, crafts, electricity, entomology, flower gardening, food preservation, food and nutrition, field crops, forestry, garden, health, home improvement, home grounds beautification, horse care, knitting and crocheting, photography, poultry, recreation, science, woodworking, club exhibits.

3. Livestock: weighing, judging, and showing

4. Contests: horse, ox, and steer pulling

5. Midway: opens at 1:00 P.M.

6. Farm machinery

RESOURCES:

Filmstrips
"To A Farm" 631 SSP26
"Visiting the Farm" 631 SSP27
"The County Fair" (borrowed from Henley)

Instructo-Teaching Guide
"At the Farm" #1150 (5 big charts)

Teaching Pictures
"A Trip to the Farm" (12 pictures and resource papers)

SUBJECT HEADING: 631 FARMING

ACTIVITIES: Before the Trip

1. List behavior rules on a chart. Use puppets to dramatize appropriate behavior on the bus and at the fair.

2. Discuss the work of a farmer and his family. Invite a farmer to the classroom. Discuss the role of the 4-H in the social life of the farm family.

3. Discuss different kinds of fairs or shows and the purpose of each (dog show, flower show, science fair).

4. Discuss the purpose of an agricultural fair. Describe the places and events (listed above) that the children will see.

5. Have each child bring an apple to class. Practice classifying, exhibiting, and judging the apples.

At the Fair

6. Talk with exhibitors to find out how animals are cared for and what makes an animal a winner.

7. In the exhibit halls, select a favorite exhibit.

8. Observe machinery demonstration.

9. Take pictures to bring back to class.

After the Fair

10. List words that describe things seen at the fair.

11. Make an experience chart story of the trip and have children illustrate it.

12. Cut out pictures and make a mural showing "Our Trip To The Fair."

13. Make a class exhibition hall and let the children exhibit things they are proud of.

14. Make a bulletin board on the life of a farmer.

Helena H. Dyer School

FIELD TRIP INFORMATION GUIDE
RIGBY RAILROAD YARD

PLACE: Rigby Railroad Yard, South Portland, Maine

TELEPHONE: Mr. Brad Peters, Public Relations
Maine Central Railroad Company
Portland, Maine 04102

Telephone 773-4711, Ext. 342

RESTRICTIONS: Not over 25 in a group.

Do not promise the children a ride in the locomotive.

Write thank you notes c/o Mr. Brad Peters.

SITES: 1. Ride on a locomotive.

2. Tour of the engine house.

GENERAL INFORMATION: A train is a series of cars connected.

A locomotive is a single engine. There are two types: road locomotive and switching locomotive. Locomotives are powered by electricity which is generated by diesel fuel. They have air brakes. Locomotives weigh 100 tons and vary in horsepower from 600 - 6,000 HP. When extra power is needed, they add extra locomotives. The cost of a locomotive is approximately $250,000.

Turntable - turns the train around.

Switches - located in the tracks and change direction of locomotive.

Switch Stands - located beside the track and indicate the direction of the switch; green - straight ahead; yellow - turn.

Yard Area - area where trains are switched to their destinations.

Section Men - (gandy dancers) clean the tracks.

Car shop area - area where men work on boxcars.

Engine House - building where locomotives are serviced.

Washout Section - part of the engine house where locomotives are parked after or before inspection.

RESOURCES: Write to the Association of American Railroads for teaching materials:

Association of American Railroads
Public Relations Department
1920 L Street, N.W.
Washington, D.C. 20036

Resource Person
Mr. Brad Peters, Public Relations Director
Maine Central Railroad Company
222 St. John Street
Portland, Maine 04102

Mr. Peters has a slide set and will visit the classroom. He also has a limited number of teacher's manuals, transparencies, and photographs available, free of charge.

SUBJECT HEADING: 380.5 RAILROADS

WORKERS: Foreman - directs the entire engine house

Road Hustler - moves locomotives around the yard

Engineer - drives trains with road locomotives to their destination (not really an engine house worker)

Electrician - maintains electrical portions of the locomotive

Machinist - does the mechanical work on the locomotive

Air Brakeman - maintains air brakes

Machine Operator - makes parts

Laborer - assists machinist, but does not use tools

Welder - welds parts

Crane Operator - moves heavy equipment

Store Keeper - supplies parts to workers as needed

ACTIVITIES:

1. Make a chart story on "Our Trip to Rigby Railroad."

2. List the workers observed at the yard.

3. Wear occupational hats and role play the careers observed.
4. Set up a model train in the classroom.
5. Write original poems and stories about trains.
6. Make a bulletin board of train pictures.
7. Write thank you notes to Mr. Peters.

Helena H. Dyer School

FIELD TRIP INFORMATION GUIDE
SOUTHWORTH PLANETARIUM

PLACE: Southworth Planetarium
University of Maine at Portland-Gorham
96 Falmouth Street
Portland, Maine 04103

George H. Ayers, Director
William Lowry, Lecturer

TELEPHONE: 773-2981, Ext. 422, call between 8:45 a.m. and noon, Monday through Friday (Ms. Jackie Boyer, Secretary).

RESTRICTIONS: Elementary children of all ages are welcomed. Schedule visits for forenoon. It is preferred that two classes come together so that the hall may be filled. The capacity is 62.

SITES: Planetarium

GENERAL INFORMATION: The Southworth Planetarium is located on the Portland Campus of the University of Maine at Portland-Gorham, one floor below ground level in the two-story wing of the Science Building (96 Falmouth Street). Parking is available in the large lot adjacent to the Science Building.

The Planetarium is a Spitz Model A-4. The projector is engineered to duplicate the appearance of the sky at any time of any year and from any location on the earth. Astronomical events lasting thousands of years can easily be compressed into a few short minutes of viewing time. This "Introduction to the Sky" is designed to be flexible in order to meet the needs of as wide an age, experience, and interest range as possible.

The Southworth Planetarium sends out astronomy programs on request. The program will emphasize the changes in the heavens during the month in which it is presented, and will point out the objects and events of interest in the sky.

Ask the lecturer to discuss related careers.

RESOURCES: Books
<u>The How and Why Wonder Book of Stars</u>
<u>Let's Go To A Planetarium</u>

SUBJECT HEADING: 523. ASTRONOMY

VOCABULARY:

Astronomer	Eclipse	Mural	Revolve
Aurora Borealis	Electron	Northern Lights	Rotate
Axis	Galaxy	Orrery	Satellite
Comet	Gravity	Planet	Shooting Star
Constellation	Meteorite	Projector	Solar System
Crater	Milky Way		Telescope

ACTIVITIES:

1. Discuss the Southworth Planetarium in detail so it will remain vivid in everyone's memory.

2. Act out an imaginary trip into space.

3. Name the planets in their order, starting with the one closest to the sun. This sentence may help: My Very Easy-going Mother Just Set Up Nine Pies.

4. Draw star patterns, creating imaginary persons, animals, or things.

5. Observe the moon; research moon exploration; study the effect of the moon on tides.

6. Using papier mache, make models of the planets, stars, sun, and moon; using cardboard and lenses, construct a telescope.

7. Write a story about "The Day the Sun Stopped Shining."

8. Make a sundial and use it to tell time on sunny days.

9. Make a space booklet; collect poems, pictures, and stories relating to space.

10. Using a flashlight and a globe of the earth, demonstrate the cause of day, night, spring, summer, fall, and winter.

11. Use a shoebox, thread, and aluminum foil balls to make a shadow box of the planets.

12. Make a bulletin board illustrating the sky at night. Label the North Star, the Big Dipper, the Little Dipper, other constellations, the Milky Way, planets, comets, and the moon.

13. Discuss a solar eclipse, a lunar eclipse, partial eclipse, and total eclipse.

14. Make an experience chart.

15. Write a thank you note.

16. Discuss astronomy as a career or leisure time activity.

17. Discuss the relationship of astronomy and astrology.

Sheila Gagnon
Thornton Heights School

FIELD TRIP INFORMATION GUIDE
PORTLAND HEAD LIGHT

PLACE: United States Coast Guard
Portland Head Light Station
Cape Elizabeth, Maine

TELEPHONE: 788-2661, Bosun Mate Allen

RESTRICTIONS: Must go in fair weather.

Children must be above grade two to go upstairs to the light.

SITES: Lighthouse - A climb of 87 steps to the light provides a magnificent view, but is a little frightening.

Engine Room - air compressors for the foghorns
Remote control switches to operate the navigational buoys
Back-up generators

Exhibit - Navigational equipment

GENERAL INFORMATION: An historical brochure is distributed.

The light was commissioned by George Washington.

The guide will assist in the identification of buoys, ships, and wildlife in the vicinity and offer navigation information.

This trip may be combined with a visit to the Coast Guard base in South Portland or a visit to Two Lights State Park.

SUBJECT HEADINGS:

359.97	U. S. COAST GUARD
528	NAVIGATION, NAUTICAL ALMANACS
623.8 to 623.89	NAUTICAL ENGINEERING AND SEAMANSHIP
623.894 3	LIGHTHOUSES
623.894 4	SIGNALS AND SIGNALING
917.419 1	PORTLAND
974.191	PORTLAND - HISTORY

Field Trip Grade 4

ACTIVITIES:

1. Written report on the history of Portland Head.

2. Write an original dramatization of the commissioning of the lighthouse.

3. Make a mural showing Maine's coastal industries and Portland Head Light.

4. Make a career notebook showing "Careers in the Coast Guard" or "Careers in the Armed Forces" or "Careers on the Sea."

5. Write thank you notes to the guide at Portland Head Light.

Marjorie Schofield
Redbank School

FIELD TRIP INFORMATION GUIDE
AMERICAN JOURNAL

PLACE: American Journal
820 Main Street
Westbrook, Maine 04092

TELEPHONE: Mr. Harry Foote, Editor
Tel. 854-2577 (Mrs. Hawkes, Office Manager)

RESTRICTIONS: Not over 20 students.

The facilities are limited and the process only involves composition with cold type, but the staff gives a thorough explanation of their business.

SITES: Offices; Composing room

GENERAL INFORMATION: Reporters investigate assignments given by the editor, take calls from people, and attend meetings at City Hall, etc. They write and type the stories for the editor to check.

Advertising is the chief source of income to the paper. A salesman sells space in the paper.

Headline Machine uses a "cold type" or photographic process to prepare headlines in various sizes.

Composition - Typed stories and cold type headlines are pasted on the make up page. The headliner machine makes a photograph of type (cold type) in a variety of sizes. Spaces where pictures will appear are blacked in.

Pictures are photographed and a "screen" is made which changes the picture to a pattern of dots. The screen is then waxed into place on the layout.

Off-set Type Production - The layout is photographed with a huge camera. A large negative of the page is used to expose an aluminum sheet. With acid and strong light, the layout is transferred onto the aluminum which is then put on a rotary press.

Circulation is the number of papers distributed at each printing. The American Journal has a circulation of 5,000.

Addressograph is the machine used to address the subscriber's copies.

RESOURCES: "Newspapers in the Classroom" - a teaching unit available from Mr. Fred Perkins, State Department of Education, Augusta, Maine 04330.

SUBJECT HEADINGS: 070 NEWSPAPERS
070.3 JOURNALISM

ACTIVITIES:

1. Produce a classroom newspaper. Practice writing news and sports stories, features, editorials, and cartoons. Sell advertising space and subscriptions.

2. Invite a photographer and reporter to visit the classroom.

3. Have each child subscribe for two weeks to the local newspaper at the low school rates.

4. Write a thank you note to the American Journal and enclose a copy of the class newspaper.

Marjorie Dube
Redbank School

FIELD TRIP INFORMATION GUIDE
FORESTRY

PLACE: Portland Water District Property
Standish, Maine

TELEPHONE: Mr. William Jackson or Mr. Dave Clement, Foresters
S. D. Warren Company
89 Cumberland Street
Westbrook, Maine 04092
Telephone 856-6311, Ext. 384

RESTRICTIONS: The foresters are not available to lead field trips to the sites listed below. They will consult with teachers and speak to the group a few minutes on location. The children may not enter the woods during hunting season.

SITES: Forester, Tree Farm, Natural Stand, Plantations (thinned and unthinned), Site of Natural Regeneration, Lumbering Operation

GENERAL INFORMATION: The Portland Water District owns land in the Sebago Lake Basin. Management of the land is under the supervision of S. D. Warren foresters.

The field trip to the Sebago Lake Basin Region may be combined with a visit to the Sebago Lake Pumping Station. For arrangements, call Portland Water District, 225 Douglas Street, Portland, tel. 774-5961, Mr. Mooney, Director.

Foresters encourage good land management for multiple use: recreation, logging, and conservation. They serve as advisors to private land owners such as S. D. Warren. They mark trees, assist in arranging contracts with private loggers.

A Tree Farm is any piece of property which is under land management and has had at least one cutting. Tree farming is a long range investment. It takes 50 years for a tree to mature in this climate.

There are 450 tree farmers in a 70 mile radius of S. D. Warren. One land owner became a tree farmer when the foresters arranged for the sale of $4,500 worth of trees. In addition, the logging operation improved the looks of the property and provided an excess of fireplace wood.

Most harvesting is done from a Natural Stand as opposed to a Plantation. Planting trees in plantations is not generally practiced. Harvesting is done in the winter to protect the undergrowth. The forester, using a paint gun, marks the tree at eye level and at ground level too, that stumps may be

checked later. A mature tree is 20 inches in diameter at 4 feet above the ground. After marking, the forester records the measurement on a card for further reference. Three 16 foot logs equal 400 board feet, or $16.00 from a single 20 foot tree, at the rate of $40 per 1,000 board feet.

Thinning allows the trees to grow larger and helps control disease. Plantations are thinned when trees are 25 years old and about 6 inches in diameter.

Pruning produces good lumber without knots.

Wolf Trees are trees which grow in a plantation by accident and rob light from other trees.

Apple trees in a plantation are always preserved.

Bore Samples are 1/8 inch cores removed from trees which show the age and growth pattern of the tree.

Logging Site - the Yard is the area where tree lengths are sorted according to use:

Best lumber - sleds, toboggans, Ethan Allen Furniture
Low grade lumber - women's heels, palettes, crates
Tops, knots, redrot - pulp

Wheel Skidder is the basic machine for logging.

Slash is brush from tree tops. It is left out of sight in the woods.

Loggers are hard workers. There is a need for good loggers. There are three schools in Maine. Some women are in training. Loggers are paid by the cord or thousand board feet. Five 12 foot trees equal a cord.

RESOURCES: Books/Publications

"Materials to Help Teach Forest Conservation" - resource list available from Forest Service, U. S. Department of Agriculture, Washington, D.C. 20250.

"Pulpwood Pete Kit" - available from Great Northern Paper Company, Millinockett, Maine 04462, tel. 1-723-5131.

"Teachers' Kit and Guide to Conservation" - available from Walter R. Gooley, Jr., Supervisor of Information and Education, Bureau of Forestry, Department of Conservation, Augusta, Maine 04330.

"Trees Are For People" - available from American Forest Institute, Lester D'Costa, RFD #1, Etna, Maine 04430.

Films/Slides

"Forestry Tour with S. D. Warren Foresters and South Portland Teachers" - November 1973

"Paper Forest: Logging and Paper Manufacturing, A Billion Dollar Industry in America" - available from Russell Day, Industrial Relation Education, S. D. Warren Company, 89 Cumberland Street, Westbrook, Maine 04092, tel. 856-6311, Ext. 388.

SUBJECT HEADINGS:

581.526 4	TREES
634.9	FORESTS AND FORESTRY
634.98	FOREST PRODUCTS
674	LUMBER AND LUMBERING
681.767 6	PAPER MAKING AND TRADE

ACTIVITIES:

1. Make a bulletin board of conservation careers. Use "Definition of Careers in Conservation" included in this unit as a resource.
2. Make a diorama of forested land under proper management, a tree plantation, and an area with no management.
3. Prepare an exhibit of forest products.
4. Make a display of wood samples, leaves, and cones.
5. Plant a tree on the school property.
6. Provide each student with a young seedling to plant at home.
7. Make paper from a pulp solution.
8. Invite a speaker from a local paper plant to speak on paper production.
9. Visit the pumping station to learn how water reaches our homes from the lake.
10. Discuss how careers in three fields are interrelated: water supply, forestry, and paper making.
11. Write thank you notes to the guide.

Edward Newell
Redbank School

DEFINITIONS OF CAREERS IN CONSERVATION *

Forest Ecologist: Conducts research in environmental factors affecting forests. Carries out studies to determine what conditions account for prevalence of different varieties of trees. Studies classification, life history, light and soil requirements, and resistance to disease and insects of different species. Investigates adaptability of different species to new environmental conditions, such as changes in soil type, climate, and altitude.

Forest Engineer: Lays out and oversees construction, installation, and use of structures, equipment, and road or rail systems, and performs other engineering duties concerned with removal of logs from timber area.

Forester: Manages and develops forest lands and their resources for economic and recreational purposes. Plans and directs projects in forestation and reforestation. Maps forest areas, estimates standing timber and future growth, and manages timber sales. Plans cutting programs. Conducts research in methods of cutting and removing timber with minimum waste and damage. Directs suppression of forest fires. Plans campsites and recreation centers, assists in planning and carrying out projects for control of floods, soil erosion, tree diseases, and insect pests in forests.

Forester Aid: Works alone or as member of crew to inventory, protect, and reforest timber lands performing many combinations of duties.

Forest Fire Fighter: Suppresses forest fires working alone or as member of crew: fells trees, digs trenches, and extinguishes flames and embers to suppress fire, using ax, chainsaw, shovel, and hand or engine-driven pumps.

Hydrologist (Geophysicist): Studies distribution, disposition, and development of waters of land areas, including form and intensity of precipitation and modes of return to ocean and atmosphere. Maps and charts water flow and dispostion of sediment. Measures changes in water volume due to evaporation and melting of snow. Studies storm occurrences and nature and movement of glaciers.

Fisheries Technician: Aids Fish Culturist in managing a fish hatchery, cultivating fish to restock streams and ponds; feeds and sorts fish; transfers and distributes fish to ponds and streams.

Oceanographic Lab Technician: Assists in a variety of chemical and physical tests and analysis such as tide and current studies, water analysis for dissolved gases and minerals, wave studies, etc. Maintains cleanliness and orderliness in lab ashore and afloat, keeps inventory of lab stock, calibrates and operates measuring and surveying instruments used in oceanography, etc.

* Source: Dictionary of Occupational Titles

Hydrographic Survey Technicians: Assumes responsibilities of operating standard surveying instruments including bottom grabs, sextants, theodolites, various tape measuring instruments, depth recorders, wire drags, and assorted kinds of required navigational equipment. Must read charts and assist the cartographer. Assists with data acquisition, processing, and in many instances, interpret and analyze original data.

Water Pollution Technician: Works with scientists in their determination of the extent of pollution in bays and estuaries, rivers and lakes, and is involved with research concerning control and abatement of industrial and other pollutants.

Park Ranger: Enforces laws, regulations, and policies in State or national park; registers vehicles and visitors, collects fees and issues parking and use permits. Provides information pertaining to park use, safety requirements, and points of interest. Directs or participates in first aid and rescue activities. May supervise workers engaged in construction and maintenance of park facilities and enforce standards of cleanliness and sanitation. Trains and supervises park workers.

Game Warden: Patrols assigned area to prevent game law violations, investigates reports of damage to crops and property by wildlife, and compiles biological data; travels through area by car, boat, airplane, horse, and on foot. Serves warrants, makes arrests, and prepares and presents evidence in court.

County Agricultural Agent for CES: Instructs and advises farmers concerning agricultural problems and informs commercial and community organizations of available services to promote extension program; collects, analyzes and evaluates agricultural data; plans and develops techniques, and advises farmers to assist in solving problems, such as crop rotation and soil erosion. Lectures and prepares articles concerning subjects such as farm management and soil conservation.

Range Conservationists: Conducts research in range problems to provide sustained production of forage, livestock, and wildlife; studies range lands to determine best grazing seasons and number and kind of livestock that can be most profitably grazed. Plans and directs construction and maintenance of range improvements, such as fencing, corrals, reservoirs for stock watering, and structures for soil-erosion control.

Soil Conservationists: Plans and develops coordinated practices for soil-erosion control, moisture conservation, and sound land use; conducts surveys and investigations on erosion and on preventative measures needed. Plans soil management practices, such as crop rotation, strip cropping; contour plowing, and reforestation as related to soil and water conservation.

Irrigation Specialist: Supervises and coordinates activities of workers engaged in irrigating crops; inspects area irrigated to insure adequate soaking and prevent waste of water. Opens head gate to permit entry of water into main ditches. Signals worker to start water flow; directs workers in cleaning and repairing ditches; keeps workers' time records.

Geologist: Studies composition, structure, and history of earth's crust; examines rocks, minerals, and fossil remains to identify and determine sequence of processes affecting development of earth. Applies knowledge of chemistry, physics, biology, and math to explain these phenomena and to help locate min eral and petroleum deposits and underground water resources. Studies ocean bottom. Applies geological knowledge to engineering problems encountered in construction projects, such as dams, tunnels, and large buildings.

Engineer: A term applied to persons who possess educational qualifications, work experience, and legal certification where required as established by engineering schools, employers and licensing authorities, for employment in various fields of engineering. Engineers typically function in one or more activities, such as research, development, design, production, consultation, administration and management, teaching, technical writing, or technical sales and service.

Cartographers: (Map Draftsman) (Photogrammetrist) Draws maps of cities, counties, states, and other areas showing location and identity of roads, communities, commercial, or industrial structures and installations, political boundaries, and other features.

Home Economist: Develops, interprets and applies principles of homemaking to promote health and welfare of individuals and families. Engages in research in government, private industry and colleges and universities to explore family relations or child development, develop new products for home, discover facts on food or nutrition, and test serviceability of new materials.

Rural and Urban Zoning and Planning Specialists: Develops comprehensive plans and programs for utilization of land and physical facilities of cities, counties and metropolitan areas; compiles and analyzes data on economic, social, and physical factors affecting land use, and prepares or requisitions graphic and narrative reports on data. Works with city and government officials to control and guide community development.

RESOURCE VISITORS

There are times when taking a field trip can be like moving the mountain to Mohammed. Instead, why not invite a resource person into the classroom? The school is designed for teaching and many presentations can be made better in the convenience of the school rather than on location. Classroom visits provide a change and they offer the students opportunities to learn about the real world through direct contact with members of the community.

Preparation

Before inviting a resource person into the classroom, the teacher should examine the curriculum and determine how a classroom visitor can best serve its objectives.

After selecting a guest presenter, the teacher should contact him/her to discuss the classroom visit. The teacher will need to learn background information about the speaker and the nature of the presentation. The guest, in turn, should be advised about the class and its understanding of the topic, the objectives of the visit, and the role of the speaker. Questions which have been prepared by the students may be given to the visitor at this time.

Attention should be given to the details of the visit. The date, allotted time, and directions to the school building and classroom should be made clear. The speaker's needs for a projector, table, maps, water source, etc. should be

determined. Following the interview, confirmation of all details discussed should be sent, in writing, to the speaker.

Pupil Planning

Whenever possible, the students should be allowed to share in planning for a classroom visitor. They may assist in the selection of the speaker, help in the preparation of questions, welcome and introduce the speaker when she/he arrives, and express thanks after the presentation. Student involvement in the planning of follow-up activities is most beneficial.

Interviewing

Interest in the people who visit the classroom or are visited in the world of work provides a meaningful opportunity to learn the techniques of interviewing which are a part of the language program.

The teacher can help the children to distinguish between questions about the work and questions about the worker. The first deals with information and facts; the latter, with attitudes and feelings. Below are some sample questions which may be used in an interview:

About the Work

1. What is the name of your job?

2. What kind of work do you do? What tools do you need? What might you do in a typical day? Is the work dangerous? Monotonous?

3. What hours do you work? How many hours a week? What does your working place look like?

4. What kind of education is necessary for this kind of work? Is there on-the-job training? Do you get more raises with formal education?

5. About how much money can someone earn at this kind of work? Is salary paid monthly or are there hourly wages? Are there any commissions or tips? Is there a chance of getting a lot of money all at once, or losing money quickly? Are there any fringe benefits and vacations?

About the Worker

1. As you see it, what are the advantages and disadvantages of your job?

2. Is there anything about your job that gives you a great deal of satisfaction and pride?

3. How do you occupy your self during your free time?

4. If you had your choice of jobs, what would you choose to do?

5. How did you get involved in your present occupation?

6. Would you recommend this kind of work for your children?

7. What was your opinion of this kind of work before you got into it?

Follow-Up

The type of activities which follow a classroom presentation will depend upon the nature of the visit. Some follow-up activities might include these:

1. Visit the site.

2. Prepare a bulletin board or display.

3. Write an experience chart.

4. Research related careers.

5. Dramatize related situations.

6. View films and filmstrips on related topics.

7. Practice any skills demonstrated.

The most important follow-up activity is an expression of appreciation from the teacher and the children.

Names, addresses, and telephone numbers of resource persons are catalogued in the elementary school libraries under appropriate subject headings as indicated in the list below.

ANIMAL LIFE	FISHING	POLICE
BANKING	FOOD	POND LIFE
BEES	FORESTRY	PORTLAND, CITY OF
BLIND	GREECE	POST OFFICE
BRAZIL	GREEN HOUSE	POTTERY
BUSINESS EDUCATION	HEALTH	PUBLIC HEALTH NURSING
CAREER EDUCATION	HOTEL MANAGEMENT	RECREATION
COMMUNICATIONS	INDIANS	SAFETY
COMPUTER	JOURNALISM	SELF AWARENESS
CONSTRUCTION	LAW ENFORCEMENT	SENIOR CITIZENS
DAIRY	LUMBERING	SEWAGE TREATMENT
DAIRY FARMING	MATH	SILVERSMITH
DEAF	MEDICINE	TEETH
ECOLOGY	MONEY	TELEPHONE COMPANY
ELECTRICITY	NAVIGATION	TELEVISION
ENVIRONMENTAL CONTROL	NEWSPAPER	TRANSPORTATION
FARMING	OCEANOGRAPHY	U.S.A. REGIONS
FINE ARTS	OUTDOOR LIVING	U.S. COAST GUARD
FIRE SAFETY	PAPER MANUFACTURING	WATERFRONT

Editor and English Curriculum Coordinator

South Portland, Maine
1975-1976

The project reported herein was performed pursuant to a grant with the Office of Education, U. S. Department of Health, Education and Welfare, through the Maine Research Coordinating Unit. Contractors undertaking such projects under Government sponsorship are encouraged to express freely their professional judgment in the conduct of the project. Points of view or opinions stated do not, therefore, necessarily represent official Maine Research Coordinating Unit and/or the Office of Education position or policy.

AFFIRMATIVE ACTION STATEMENT

In keeping with federal and state guidelines, the South Portland School Department does not and will not discriminate on the basis of sex, race, color, religion, national origin, ancestry, age, or physical handicap, in the educational programs or activities which it operates, and is required by Title VII of the Civil Rights Act of 1964 as amended by the Equal Employment Opportunity Act of 1972 and Title IX of the Educational Amendments of 1972 and Part 86 of Title 45, Code of Federal Regulations not to discriminate in such a manner.

The requirement not to discriminate in educational programs and activities extends to employment practices in the school system and to the admission and treatment of students.

To insure non-discriminatory practices and procedures, the South Portland Board of Education, with the assistance of an Affirmative Action Committee, is developing an Affirmative Action Plan and other compliance procedures.

It has also appointed an Affirmative Action Officer to coordinate its efforts to comply with and carry out its policies and responsivilities regarding non-discrimination.

Inquiries concerning the application of Title VII, Title IX and Part 86 to the School Department should be addressed to the Affirmative Action Officer, Ralph W. Egers, Jr., Curriculum Office, South Portland School Department, 130 Wescott Road, South Portland, Maine 04106, Telephone 775-6501.

October 14, 1975

FOREWORD

How can one adequately express appreciation to a group of people who have diligently researched, worked closely with coworkers to gather concerns and beliefs, spent much time with parent groups, actively involved community resource people and representatives of institutions of higher learning, and last but of most importance sought input from the student body to provide the impetus for developing new concepts which should prove valuable to both students and community.

Mary Cruise, in writing of Sarah Lee Wright, says in a few beautifully chosen words what makes an endeavor such as this a reality.

JOHN T. SELKINS, JR.
Superintendent of Schools

SARAH LEE WRIGHT

We remember Sarah Lee for her love of family and friends. We recall her great faith, her courage, her dignity. We think of her talent for teaching and her commitment -- her total commitment to her work. We remember the standards she asked of her students -- never more than she asked of herself. We recall her gift and great love for writing. We remember her willingness to take a stand when she believed strongly.

We think of her subtle humor and her ability to laugh -- often at herself. We think often of those things in which she found beauty -- the sea, flowers, animals, travel. We recall her impatience with those who forget "life is to be lived." We think of her marvelous blend of Southern charm and "New England conscience." We remember her "Right to Read" speech -- we cannot forget it. We remember that she wrote for this guide.

We remember.

PREFACE

This curriculum guide is composed of a series of language arts skills, activities and course outlines for grades seven through twelve. It is intended to be an instructional tool both for the experienced teacher and the teacher new to our schools. The design provides a definite sequence to our English program, yet it is flexible enough to allow for teacher creativity.

Teachers produced this guide. All of the activities and the course outlines have been tested in the classroom. We trust that the combination of sound research and practical application has resulted in a realistic guide.

Where appropriate, career education activities have been suggested. We believe that students should have the opportunity to explore their personal values and to consider the alternatives offered in different careers.

The guide was designed to fit the needs of our students. The scope of the guide recognizes the varying abilities of students as well as their diverse interests and goals.

Mary Cruise
Sarah Lee Wright
James Dunn, Chairman
English Department
South Portland High School

CURRICULUM REVISION PROCESS
South Portland English Department

The process of curriculum revision of the South Portland school system - Project REVAMP - began in the 1973-74 school year with focus upon the secondary mathematics department. This three-year program of revision includes also the English and social studies departments, one year being spent for special emphasis upon each. Infusion of career education into the curricula of these major departments will expand into other areas as well. The following account describes the process of curriculum revision in the secondary English department of South Portland.

Selection of staff was the first step. Curriculum coordinators were chosen by the administration from the secondary faculty, one teacher from the junior high and one from the high school. These teachers, released for the year from classroom teaching, worked under the supervision of a director of career education (assistant superintendent of schools) and an assistant director of career education. The teachers selected as curriculum coordinators are experienced classroom teachers with some knowledge of this city's education system, the character of the community itself, and an avowed interest in meeting the needs of students regarding education and career.

The staff's first major task early in September was the setting of objectives for the entire year. In general these included a thorough review of the present curriculum, visits to various schools in and out of the South Portland system, the study of curriculum and career education materials, contacting parents and students, working with teachers, development of the year's career education program (workshops, acquisition of new materials, development of new courses). Each coordinator composed a process chart setting forth monthly objectives for the school year. This calendar served as a guide for the major activities of the staff, and was amended continually. Although we experienced some real frustration trying to plan an entire year's program at the very beginning of the year, before we actually knew where we were going, we found that, once outlined, our work for each month was more easily determined and more efficiently accomplished. The process chart also provides a step-by-step account of our year's work.

During the first weeks, a great many hours were spent in reading, studying, and ordering various materials to increase our own background of knowledge and understanding of the concept of career education, its successes and failures elsewhere in the country. We found an overwhelming amount of literature, some very helpful and some very confusing. Our pursuit of information continued throughout the year. Resources included curriculum guides from other schools and from other states, abstracts, microfiche, and other ERIC materials, professional texts and journals, films and filmstrips, periodicals (Career Education News, Career Education Digest, newsletters) and publications of the National Council of Teachers of English.

Needs assessment was the most time-consuming project of the entire year. We now realize that this process could have been done more easily and finished earlier had we spent less time in search of an instrument already devised and

tested, and created our own - which eventually we had to do. We studied the Right to Read assessment instrument, visited the State Library in Augusta and the University of Maine Portland-Gorham Curriculum Library in search of further assessment materials, explored through ERIC, and spent much time trying to discover what others had done before us. Finally we followed the advice of our own elementary coordinator: never mind what others have done. Write your own.

Our needs assessment involved four areas of research: South Portland teachers, parents, students, and the community. Meetings with teachers were held at the junior and senior high schools, individual interviews with every teacher were conducted by the curriculum coordinators, and a fifty-item questionnaire was prepared and distributed to every secondary teacher. The purpose of all this survey of teachers was to ascertain what is actually being taught and how, what skills are needed, what duplication exists, and what gaps in the curriculum need to be filled. Teachers received the questionnaire October 1 and were asked to complete it by October 15. They were not required to sign their names, but department chairmen were asked to collect every form so that the survey would represent the entire English department. Answers were tabulated and comments compiled, and the results were stenciled and distributed to the teachers October 31. Much helpful information was acquired in this survey and used in many ways throughout the year. For example, teachers expressed opinions regarding the kinds of meetings they preferred, the extent of their interest in communicating with teachers at levels above and below their own, and topics to be explored in workshops.

Evening meetings with parents were scheduled at the junior and senior high schools. These meetings were attended by the Career Education staff and English department chairman, superintendent, and principals. A slide presentation showing some of South Portland's career education activities was offered at the junior high schools, and at all meetings free discussion of the curriculum and its needs was encouraged. Parents had received notices of these meetings, and student volunteers helped with telephoning. Attendance was much smaller than we hoped, but those parents who attended participated with interest and offered some helpful ideas. In addition to these specially planned parent meetings, career education personnel were available in the Career Resource Center of each school at the annual Open House for parents.

Student opinion was sought through questionnaires, classroom discussions, and guidance groups. Senior surveys administered by the guidance department and five-year surveys of graduates gave us some indication of student needs and opinions. The questionnaires were given to representative classes at each level, tabulated by the teachers, and the results stenciled and distributed to secondary teachers.

Our most practical and interesting information came from the South Portland community. A number of local employers, representative of the fifteen job clusters, were interviewed by the two secondary curriculum coordinators. We found the most effective way to conduct these interviews was to have one interviewer engaged in discussion with the employer while the other took notes. We used a prepared outline of topics, a copy of which was given to each employer interviewed. This employer survey form gave direction to the interview and helped us to obtain the particular information we wanted. Without exception, the business people we interviewed were cooperative, courteous, even eager to talk about ways in which education and business can work together for the good

of students and community alike. This same interest and spirit of cooperation was evidenced by our Advisory Board, a group representing education, parents, civic groups, labor, and business.

Local publishing houses provided useful information both through examination of their catalogs and educational materials and through tours showing job and career possibilities for students. Many commercial publications provided information and resources. Materials from exhibits and workshops of state and regional conventions further expanded our resource library.

In addition to the individual interviews scheduled by the curriculum coordinators, visits were made to local business firms participating in the Career Guidance Institute sponsored by the South Portland schools. These weekly visits were made after school, over a period of twenty weeks, by interested teachers, students, and parents.

The curriculum coordinators also visited a number of schools outside the South Portland system. We collected curriculum guides, interviewed teachers, visited classes, examined textbooks, and made comparisons. Detailed reports of all visits were written by the curriculum coordinators and copies distributed to English teachers, principals, and interested administrative staff.

Another interesting community contact was the University. We found that college instructors are as poorly informed as to secondary curricula, practices, and objectives as are secondary teachers regarding the college program. Teachers at both levels expressed interest in exchange visits to classes and any other possible communication that might improve the sequential element of education. We found a universal criticism -- from elementary, to junior high, to senior high, to college: there is mutual ignorance regarding other levels, there is needless duplication and repetition, there is a need for a more effective, truly sequential educational system.

Visits to regional vocational schools provided further information. Again, we found that secondary teachers, in the main, knew very little about the opportunities and programs offered by vocational institutions, whose faculties are very eager to be visited and to improve communication with the comprehensive schools who send their pupils for part-time work/study.

We recommend contacting any other department, organization, or staff that might be simultaneously assessing needs. Often this information can be shared, to the benefit of both. For example, our assessment of curriculum needs was aided by surveys administered to various classes and to special groups by the guidance departments of our schools. Also, South Portland became involved last year with the Right to Read program, and the curriculum coordinators attended meetings and helped in tailoring the Right to Read needs assessment instrument, many of whose concerns were ours also.

In December a summary of the most obvious educational needs of the English program of South Portland's secondary schools was completed. Other recommendations would be added later. The preliminary recommendations were presented to the School Board on January 6 and approved at that time.

Actual revision of the curriculum was not delayed until the needs assessment was completed. Obvious needs became apparent long before December, and we began working on our sequential program, reviewing and ordering materials from many sources, commercial and professional, field testing whenever possible the classroom activities and units that seemed appropriate, viewing films, studying microfiche and curriculum guides from many states.

Individual and group meetings were held all during the fall, with administration, teachers, principals, career education staff, and guidance counselors participating. Records were kept of all meetings.

Inservice workshops were held in November, December, February, and June. Objectives of the workshops included curriculum revision, infusion of career education into the curriculum, and teacher communication. Notices were sent well in advance of each workshop. Workshop activities included speakers, visits to Prime Resource Center, viewing of films, filmstrips, and microfiche, examination of materials assembled by the curriculum coordinators, discussion groups, slide presentation of career education in South Portland (this proved to be one of the most valuable and informative activities offered) and -- perhaps the best feature -- time for teachers to plan and write, either individually or with partners, a unit or course description for use in the classroom.

Culmination of the year's work was two-fold. (I) Recommendations for improvement of the English department were presented to and approved by the School Board in March. (II) The working draft of our first sequential plan for curriculum revision was published and distributed to secondary English teachers, to be used as guidelines, classroom tested, and implemented with activity packages. Implementation, evaluation, and further amendment will lead to publication of the curriculum guide in the spring of 1976.

CURRICULUM REVISION PROCESS
South Portland English Department

GRADE SEVEN - PHASES 1-2-3

Reading and Literature	Writing	Language: Grammar and Usage	Speaking, Listening	Career Education
Decoding skills: sounds syllables root words suffixes, prefixes Comprehension: Reading to find main idea to select details to answer questions Rate: Key words Phrasing (thought units) SQ3R (Survey, Question, Read, Restate, Review) Appreciation: reading for pleasure understanding plot Library Orientation Group/Individual Directed Reading Study of make-up of books	Practice in form of preparing papers Personal writing: sketches journals Paragraph main idea supportive sentences Writing for English and content area subjects: definitions brief essay answers summaries Writing after viewing films, filmstrips Letter writing	Subject - Verb Direct Object End Punctuation Capitalization Simple Sentence By putting together its component parts, the student may better understand the concept of a sentence. Sentence building with adjectives Vocabulary: sight vocabulary word study from reading selections context clues Spelling: Basic Lists Student writing Dictionary Usage Word Study Dialects	Oral Reading Choral reading Pantomime Practice: asking and answering questions giving and taking directions Reporting: hobbies interests references other areas Listening to write from dictation Listening to enjoy Recognizing the importance of courtesy, responsibility, participation in listening situations Role Playing and Improvisation	Guidance Program: Study habits and attitudes Orientation to Career Resource Center Investigation of job clusters Research of careers English: Tourism in Maine Newspaper Unit Newspaper Careers

CAREER DEVELOPMENT DESIGN

GOALS

	PRIMARY	INTERMEDIATE
SELF AWARENESS	Demonstrate an awareness of his own interests, skills and feelings.	Demonstrate an appreciation of his own skills, interests, feelings and values.
INTERPERSONAL SKILLS	Demonstrate cooperation in social situations.	Develop an appreciation of the differences between individuals or groups.
DECISION MAKING	Use his senses to gather data and to develop concepts.	Develop skills in making generalizations, hypothesizing and predicting.
WORK AWARENESS	Gain knowledge of workers in the home, school, and community.	Identify the personal and environmental factors which influence a worker.
MANIPULATIVE SKILLS	Develop psychomotor skills.	Improve psychomotor skills.
ECONOMIC AWARENESS	Understand that people are paid for their work and use that money to satisfy their needs and wants.	Recognize that each individual is a consumer, producer and citizen, and as such has certain rights and responsibilities.
VALUE OF WORK	Identify ways that workers are of service to the community.	Recognize that an individual can find satisfaction through his work.
RELEVANCE OF EDUCATION	Recognize that school is a place to learn.	Recognize that schooling is necessary for future careers.

CAREER DEVELOPMENT DESIGN

GOALS

JUNIOR HIGH	SENIOR HIGH
Recognize that his talents, values, interests, and limitations relate to career goals.	Make goal-oriented choices related to his career requirements and future employability skills.
Develop the interpersonal skills required for work roles, recognizing that trust and respect are factors in human relations.	Demonstrate an understanding of the importance of human relationships in volunteer and part and full time work.
Develop an awareness of the results of decisions which will give him a sense of control over his future.	Identify realistic alternatives based on education, work experience and counseling and accept responsibility for career decisions.
Explore and analyze the common and unique characteristics of jobs within the 15 U.S.O.E. job clusters.	Recognize that social, environmental, and technical factors influence career trends and as a result workers must be flexible, adaptable and mobile.
Identify and use manual skills that are essential to many careers and leisure time activities.	Develop competence in use of manipulative skills required in one's future career or educational plans.
Develop an awareness of the financial and legal consumer resources as they relate to personal and family economics.	Understand and appreciate, as a worker and consumer, the complexities of the American economic system.
Understand impact of one's career on his lifestyle.	Gain insight into personal and social value of employment through simulated or real work experience.
Recognize that mental, physical and communicative skills are basic and applicable to all career fields.	Identify the relation between mastery of content knowledge and educational or vocational plans.

LANGUAGE ARTS IN THE JUNIOR HIGH SCHOOL

Our syllabus consists of a program of five components each having its own particular characteristics:

READING AND LITERATURE, which

recognizes that learning to improve reading skills is a continuous process.

gives attention to the need for study skills.

adjusts to all levels of ability.

affords the opportunity for students to learn truths about people.

prizes the old but recognizes that much of the contemporary is good.

provides for the reading of all types of literature: poetry, drama, biography, fiction and non-fiction.

uses audio-visual materials which Bruner terms "devices for vicarious experiences."

WRITING, which

offers frequent practice in "practical" writing but encourages personal writing.

stresses the value of writing as related to other aspects of the English program.

emphasizes the process of writing.

provides for experiences in descriptive and narrative writing.

recognizes that audiences other than the teacher be offered the student.

stresses the mechanics of legible handwriting.

LANGUAGE, which

distinguishes between grammar and usage.

supports the research that the study of formal, analytical grammar begin at grade seven.

encourages the inductive method of teaching grammar.

builds an interest in words.

SPEAKING AND LISTENING, which

acknowledges the fact that the "spoken" language is the language.

provides the opportunity for students to learn and practice both speaking and listening skills.

affords the opportunity for student interaction.

CAREER EDUCATION, which

recognizes that a career is a way of life.

encourages an awareness of self and of interpersonal relations.

provides for wide range of student abilities and interests.

strengthens the work ethic.

emphasizes an awareness of values.

We believe with Einstein that "it is essential that the student acquire an understanding of and a lively feeling for values. He must acquire a vivid sense of the beautiful and the morally good. Otherwise he - with his specialized knowledge - more closely resembles a well trained dog than a harmoniously developed person."

SUGGESTED ACTIVITIES FOR GRADE SEVEN

READING

A student gets a certain number of miles on a map of the United States for each type of book he reads. An index card is passed in listing the characters, plot, favorite incident and people for whom the book is recommended. A test grade of A is received for each trip across the country.

After reading a story in class, students write questions to stump a panel of "experts" who volunteer to field questions in front of the class.

When a student has read a short story, he selects an activity from a card file of suggested topics. This may be a research topic from the career resource room or a book from the library based on the material read.

VOCABULARY

When doing vocabulary in reading, the students submit their own vocabulary lists, without definitions. They should learn their individual words and the list can be handed back as a vocabulary portion of a class test over content.

WRITING

Have the students write letters to one another and have them actually put them in the mail. Evaluations can be made when the letters are received. The person who gets the letter should bring it in for discussion, perhaps by the writer and the reader in pairs. Of course, if someone moves, the opportunity for corresponding should be seized immediately.

Each student has a folded piece of construction paper, kept in class and decorated as he pleases. Several times a week, a suggested topic is written on the board. Students may write on that topic or one of their own choice. The teacher spot reads the journals and makes personal comments pertaining to the subject matter, but not to spelling or grammar. This project helps one to get to know his students.

Write autobiographies in a series of weekly installments (describe your first memory, your parents, your thoughts toward grammar school years). These are proofread but not graded. Ultimately they are edited as one piece of writing by the author.

Keep track of editorials and cartoons in the newspaper. They can be used both for reading and grammar work and are obviously topical enough. Have students follow one comic strip for a week and write about it. They could describe characters or the source of humor. With a good editorial, a clearly stated viewpoint can be examined for its argument or persuasiveness. These can be reproduced to resemble their appearance in the paper.

Publish as much as possible what students write.

Take actual paragraphs the students have written and type three of them - a good one, a fair one and a poor one. Students read them aloud and have the class rate them as good, fair or poor. Then the class takes a vote and notes how the majority rated the writing. The teacher then offers opinions about the grading.

Give students the first line of a potential story and have them consider possibilities in groups. Once enough stories have been told, have them composed on paper.

SAMPLE STORY SHEET

Consider these as the first line of a story:

1. Walking carefully across the ice, Bill heard frightening sounds as he reached the middle of the pond.
2. All alone, I looked for the bus, but it had left.
3. As he opened the door, an alarm bell began to clang.

Now, a good story answers all of a reader's questions. Thus, before you write, THINK.

Ask yourself:

Where could this be happening?
Who could be in this story?
When might this be happening?
What kind of day is it?
What time of day is it?

Are you going to have a surprise ending?

If any of these thoughts leads you to ideas not listed here, feel free to write on them.

GROUP ACTIVITIES

Students form groups of two or three and make lists of spelling words using newspapers, magazines, textbooks. Later in the week, they write the words in sentences and take a pretest and a test, again in groups.

Teams are formed, usually boys against the girls and two people in front of the class shake a cube and draw a card as each player is up. The card has a word on it and the cube tells whether to use the word as a noun, verb or adjective.

Students write everyday situations on index cards. At the end of a class, a group of three might act out a situation for the class. Students are encouraged to think spontaneously.

Students write two characters, two settings and two situations. They then get together with another person and combine the items, eliminating or adding, to create a story or play.

Students discuss the problems of the elderly and plans to alleviate the problems. This also makes a good theme topic if the student selects one problem and suggests one solution for it.

MYTHOLOGY

Create a god or goddess needed in the 20th century as a god of machines. Explain the need.

Create a story telling about what one of the ancient gods or goddesses would be doing today.

Write a myth to explain a natural phenomenon. For example, if we didn't have science, how might we explain snow or thunder?

FOLKLORE

Write your own tall tale.

Research proverbs, riddles and superstitions to tell the class. Interview parents and especially grandparents for superstitions.

Pantomime a folk hero by showing what he was famous for, e.g. Paul Bunyan and his swinging axe. The class must guess which folk hero is being described.

TREASURE ISLAND

Resource: Lighthouses of Casco Bay, Peter D. Bachelder

Activity: Write reports on local shipwrecks. Additional background information may be found through interviews or newspaper accounts.

CALL OF THE WILD

Resources: Filmstrips - Jack London: A Life of Adventure

Activities: Write a realistic story about something you have done or some place you have been just as London wrote about things he had seen or done.

Call of the Wild is, in many parts, seen through Buck's eyes. Pretend you are someone or something else and tell about one of your experiences.

TOM SAWYER

Resources: "Mark Twain's Life" - filmstrip and cassette
"Mark Twain Tonight" - recording
"Age of Mark Twain"
"Two Portraits" from Roughing It

Activities: Library research projects: slavery, superstitions, Hannibal
Writing projects: a modern Tom Sawyer
compare with "My Side of the Mountain"-an adventure
after listening to the stories of Bill Cosby, a modern day Mark Twain, write several paragraphs about what you did as a child.

SOUNDER

Resources: Filmstrips on prejudice
Recordings of poetry of the blacks
Library books on black literature

Activities: Students are responsible for project using library research materials.
Students read poems in class and hear recordings of black poetry.
Students write about their own prejudices.

Sue Fagan
Craig Furbush
Chris Wieting
Memorial Junior High School

Grade Seven

THE TRIAL

A. Objectives:

The student will use the basics of debate and of courtroom procedure.

The student will distinguish between facts and persuasive arguments.

The student will read for specific facts and for an understanding of characters in literature.

The student will recognize that an author's theme may be interpreted in many ways.

B. Activities:

1. Students read a novel, short story or poem which involves a crime.
   Examples: Tom Sawyer
   Call of the Wild
   Treasure Island
   Myths and Legends
   "The Highwayman"
   "A Figure of Speech"

2. Students reread the work taking various parts as witnesses, judges, lawyers.

3. Lawyer and witnesses write speeches and rebuttal for courtroom trial, citing evidence and offering examples to sustain arguments.

4. Students hold trial in class. This may be performed in costume before another class or it may be videotaped.

5. Jury members make a decision based on the testimony. Judge pronounces sentence.

6. Class debates the validity of the decision. Discussion follows as to how the addition or deletion of certain facts altered the case.

7. Students suggest other endings both for discussion and as possible theme topics.

Gary Hill
Memorial Junior High School

Grade Seven

LANGUAGE ARTS ACTIVITIES

A. Long before "Scope" began to use the brief mysteries in its magazine each week, I have used the ones contained in an old Scholastic book called "Minute Mysteries" both for their mystery value and as a way of checking whatever we happen to be studying. There is always a vocabulary exercise based on words in the story or words I have substituted. The stories may be rewritten to be used for paragraphing, direct quotations, capitals, spelling, synonyms, finding the use of the word in that particular story and, of course, solving the mystery. Once you get started, there are many variations.

B. For reluctant readers, I select jokes in which two people are conversing with each other and write each person's dialogue on a card. The first to speak is numbered 1, the second 2. When I have enough for a class, all of the 1's are passed out, then all of the 2's. Someone with a 1 stands and reads his part of the joke; the one with the corresponding 2 must recognize it and read his part until the joke has been told. Most kids (any age) love jokes.

C. Tricky parts of grammar are more fun if the rules are made into rhymes.

"You can make most nouns plural
Without a scowl or a frown -
The rule is simply this, my friends,
Just add s to the noun,
Unless it ends in a buzzing sound
From an sh, x, or z -
If it does, make another syllable
By adding es, you see."

D. Probably not too many teachers are familiar with a hobby known as refunding. This consists of searching stores, newspapers, magazines, and various products for forms offering money, free products, or gifts for the correct qualifiers. Then the requirements must be mailed in, and in due time the mail brings the reward. I have used this with small groups that dislike reading and writing. In order to benefit, they must read directions, follow them correctly, and address a letter correctly. Sometimes the refund is in the form of a check, so they learn to handle that correctly. Once they have been introduced to this, they no longer consider newspapers and magazines their enemies, but are constantly looking for new forms.

Mary Walton
Mahoney Junior High School

Grade Seven

ACTIVITIES TO ACCOMPANY AN ANTHOLOGY WHICH FEATURES STORIES OF COLONIAL TIMES

A. Create a mural or a model of a colonial village. Student ingenuity will determine the use of materials: paper-mache, clay, pipe cleaner figures, popsicle sticks or dolls dressed in authentic costumes. This may be a project which involves an entire class or small groups.

B. Demonstrate candle making, weaving, knitting or any other craft familiar to students. Such projects may lead to a Hobby or Craft Show.

C. Write a theme imagining yourself involved in an occupation known only to this time period. Before writing, the student will need much library research.

D. Devise a bulletin board display. Pictures, cards and souvenirs of family trips to historical areas may be mounted. Visits to Philadelphia, Plymouth, Sturbridge or Williamsburg will provide excellent historical background.

PROJECTS TO BE USED IN THE TEACHING OF THE WITCH OF BLACKBIRD POND

I. Objective: To enable students to have a better understanding of certain aspects of the colonial period.

Activity: Research library resources on the subject of witchcraft.

II. Objective: To improve the writing skills of students and encourage their use of imagination.

Activity: Picture Kit and Nat ten years after the book has ended. Write about their lives and plans at that period.

Write about Barbados as described to you by Kit, a neighbor. The student must research the area to write effectively about it.

Evaluation: For these types of reports, the student receives one grade for factual information and another for the technical aspect of the work.

THE ALPHABET STORY COMPOSITION

Students may work alone or in pairs on this project. They are to write a story beginning each sentence with a successive letter of the alphabet. The class votes on the best story and paperback books, school stationery or pens are awarded the winning pair of writers.

SPELLING

Give students words from their spelling lessons written on cards. Have the students go to the front of the room and arrange themselves alphabetically on the basis of words assigned. Without looking at the word again, they must be able to spell it correctly before sitting down. Later these cards may be used for review.

Have students keep a notebook of misspelled words. Every two weeks, two students will work together retesting each other on the words missed in the previous lessons.

Keep a "Spill and Spell" game available for students to use when they have completed their work and only a few minutes of class time remain.

BULLETIN BOARD PROJECT

This project may be used successfully with any novel. Students design book covers using a character or scene from the story. Original sketches or drawings depict their impressions of central figures and events. Dramatic lines from the story add to the effectiveness of the display.

REVIEW BASEBALL

Students write ten questions and answers over the story or novel. These are to be used in the game.

The class is divided into two teams. The scoring is similar to baseball - three outs to a team.

Team A	Team B
first base	first base
second base	second base
third base	third base
runs	runs

Each team must put a player on each base before runs are accumulated. This process continues until three outs are made. Then the other team is up to bat.

WHAT'S INSIDE YOUR HEAD?

The teacher makes a silhouette of each student's head by using the overhead projector. This casts a shadow of his head on a piece of paper which is secured to the blackboard. Next each student fills his head with his likes and dislikes

in the form of a collage. If the student has not included his hopes for the future (his career plans), he should be asked to include these. If he is unable to find a picture, a word will do.

After the heads are tacked to the bulletin board, the student explains his plans to the class. Following this, a work sheet on career planning is provided as each student does mini-researching in the career research room. Sharing of information is done informally.

FROM PAINTING TO WORDS TO PAINTING

Aims: To help students:

understand the value of preparing clear and organized writing.

decide which details are important enough to be included in writing.

recognize that specific information is essential to his description or explanation.

arrange details in logical sequence.

Procedure: Present to the class a painting unfamiliar to the group. It may be an original created by the art teacher.

Have the class write a description of what they see in the painting.

Give the papers to the art teacher who will have a class paint what they find in the description.

Combine the class writing the description and the class painting from that description.

Discuss the need for accuracy in writing descriptions.

Pamela Beal
Mahoney Junior High School

NEWSPAPER UNIT

* 1 2 3 4 5 6 7 8

OVERVIEW: This project was created as a means of incorporating all phases of language arts. Students too often see grammar, writing and speech in isolation. This activity provided the opportunity for them to apply their basic skills in these areas to the study of the newspaper.

OBJECTIVES:

1. Self Awareness: The student will recognize that his interests relate to career goals.
2. Interpersonal Skills: The student will develop the interpersonal skills required for work roles.
3. Decision Making: The student will use the decision making process to determine the work roles for the project.
4. Manipulative Skills: The student will use the manual skills essential to a newspaper career.
5. Relevance of Education: The student will recognize that communicative skills are basic to a career field.

RESOURCES: Local newspapers

Newspaper guides, published workbooks or teacher-prepared guide sheets

Mimeograph/carbon/printing facilities

Art supplies/paper

Novel, short story or poem of sufficient depth

ACTIVITIES: Read newspapers to identify parts, style and mechanics.

Skim a previously read novel, short story or poem and sketch facts and point of view.

Study the differences between journalism and creative writing.

Divide the class into newspaper staff. Assign work roles to match student skills and capabilities.

Write articles, columns or news features. Many may be based on school activities, sports, projects.

* ALL CIRCLED NUMERALS IN THIS AND SUBSEQUENT UNITS REFER TO THE GOALS OF THE CAREER DEVELOPMENT DESIGN.

Prepare copy to be typed, mimeographed and assembled.

Distribute product to class and other interested groups.

EVALUATION: Rate student performances in assigned work roles.

Evaluate participation in group situations.

List advantages and disadvantages of the roles of newspaper workers as evidenced by the project.

Prepare graph-type copy sheet providing self-correcting method for spelling and mechanics.

Grade students on the quality of articles written, including sports columns, editorials, features, cartoons.

Cite instances of the value of specific school subjects to the success of the project.

Gary Hill
Memorial Junior High School

Grade Seven

NEWSPAPER CAREERS - AN INTERDISCIPLINARY STUDY

1 2 3 4 5 6 7 8

OVERVIEW: The original concept for this study was found in Career Education Resource Guide. The recommendations offered there have been expanded to become this unit. The project provides an opportunity for an English teacher to emphasize the value of reading, writing and speaking skills. It affords the teacher of mathematics the practical applications of math principles.

OBJECTIVES:

1. Interpersonal Skills: The student will demonstrate respect for others in group activities.

2. Work Awareness: The student will identify factors which determine career choices.

3. Economic Awareness: The student will develop an awareness of community resources.

RESOURCES: Newspaper reporter

Career Education Resource Guide. Bottoms, Evans, Hoyt, Willers, eds. General Learning Corporation

Newspapers from several states

"Newspaper" - Prime film

ACTIVITIES: Secure the names and addresses of several newspapers published in various parts of the country.

Write to the editors requesting issues of papers for class project.

Have local newspaper reporter visit class for interview.

Visit a newspaper plant and report to class.

Assign features of newspaper for small group study: editorials, letters to the editor, columns: political, social, sports, advice, financial.

Specify individual assignments:

Distinguish between local, national and international issues.

Read letters to the editor to identify local problems and concerns.

Read school news.

List sports unknown in local area.

Look for local or Maine news in out-of-state papers.

Seek features you would recommend be printed in local paper.

Watch a television program and write an evaluation of it. Compare it to newspaper review of same program.

Find rates of advertising in local paper and determine costs of various ads.

Compare wages, cost of living, housing as evidenced by classified ads.

Use stock report on financial page to follow $10,000 investment over a period of several months.

Use sales ads quoting per cent discounts to determine costs of items advertised.

Study the effectiveness of photography in the papers surveyed.

Seek news articles concerning people and their work.

Survey classified ads to distinguish workers: professional, skilled, semi-skilled, unskilled.

Note workers whose jobs are determined by locality.

Make a chart of major industries in various areas indicated by news features and classified ads.

Seek news items concerning young people.

List geographic factors that influence career choices.

Prepare lists of careers found in other papers that are not in evidence in local area.

Indicate on a map of the United States the geographic areas included in the study.

Compare forms of entertainment, social and community news found in feature articles as well as in advertisements.

Look for different styles of reporting the weather.

EVALUATION:
1. Each group will prepare graphic studies of careers identified through the project.
2. Each group will be responsible for its findings.
3. Each group will design bulletin board displays of local, national, international news.
4. Each group will give a report of stocks - gains or losses.

Mary Cruise
Theodora Sotiriou

TOURISM IN MAINE

1 2 3 4 5 6 7 8

OVERVIEW: Tourism in Maine had its origin in a unit developed during a summer workshop devoted to individualized instruction. A modified version of that unit was the basis of this classroom activity.

The project began with the general theme of leisure living. Later this was narrowed to leisure in Maine. Finally the focus became leisure in South Portland, an area of varied recreational facilities. Obviously, the project could be adapted to many localities.

Ideally this could become an interdisciplinary project - an English teacher working with a geography teacher. Maine history would provide an excellent background for the study. Another possibility is that a mathematics teacher could use the financial computations for a vacation or trip as a class activity.

OBJECTIVES:

1. Decision Making: The student will identify the steps in the decision making process.

2. Economic Awareness: The student will develop an appreciation of consumer resources.

3. Value of Work: The student will gain insight into the relationship between one's work and lifestyle.

4. Relevance of Education: The student will recognize that skills acquired in class situations are basic to career fields.

RESOURCES: Resource people:

Earle Angell - former historian for City of South Portland
Representative of Maine Publicity Bureau
Community members

Resource materials:

"Historical Tour of South Portland" - Rosemarie Flaherty
"Leisureland USA") Eastman-Kodak films
"Acadia National Park") Eastman-Kodak films
"The Bounding Maine") Prime films
"Maine Parks") Prime films
Maps of Maine
Travel folders from Maine Publicity Bureau
Slides of South Portland

ACTIVITIES:

1. View films on leisure and recreation.

2. Write an interpretation of the term Leisure.

3. Describe a vacation, a trip or a place visited which made a lasting impression.

4. Interview a representative from Maine Publicity Bureau.

5. Discuss sources of information with school librarian.

6. Plan a five day vacation within the state.

7. Select an ideal vacation. Example:
   You live in Houlton and you choose to surf in York.
   You live in Kittery and your choice is a hunting trip in Machias.

8. Plan a five day leisure vacation within the state. Outline route on state map.

9. Prepare an itinerary of the trip.

10. Itemize all expenses involved in vacation.

11. Keep a diary of activities.

12. Invite city historian to speak to the class about South Portland.

13. Investigate recreational facilities in local area.

14. Write promotional ads or design posters promoting local community.

15. Discuss advantages of living in South Portland and in Maine.

EVALUATION:

1. Students will be presented a simulated problem dealing with travel and asked to describe the factors involved in making a decision.

2. Students will submit a log with specifics of finances of the vacation.

3. Student will keep a diary in which he records the workers who made trip possible.

4. Students will submit reports offering positive feelings for community and state.

FOLLOW-UP: This unit could be an introduction to the Self Exploration project found in grade eight.

Bill Thombs
Mahoney Junior High School

Grade Eight

Communications

SELF EXPLORATION OF INTERESTS,
HOBBIES, OR OCCUPATIONS
1 2 3 4 5 6 7 8

OVERVIEW: Many students often have unlimited resources in areas relevant to their world outside the classroom. It would seem possible that all students must have some direct contact with a "hands-on" experience that could be shared with others.

It is my assumption that there is much knowledge that may be gleaned from individual students. Therefore, it is favorable for us as educators to recognize this fact and make use of this resource in our classrooms. Thus I asked my students to select an interest, a hobby, or an occupation that was close to them. Each student was given the responsibility of researching and presenting his topic to a peer group.

I have enclosed samples of subject areas and actual projects which were worked on by students. I have attempted to go into detail on one of them. There was a boy in one of my classes who was interested in fishing and fishing boats. He is currently employed as a hand on a fishing boat out of South Portland. He proceeded to do some research with help from the Mahoney and South Portland Public Libraries. He then drew a full scale drawing of a typical fishing vessel to be found in this area. An interview was also used to gain information and lay the groundwork for a class field trip to visit his place of employment. Because this was a small group, the captain consented to take the entire group on a brief excursion in the harbor. Filming, slide taking, and taping were used to add meaning to this experience. A written evaluation and summary of this report was followed by a general class discussion. These materials were available for student perusal in the career resource room.

OBJECTIVES:

1. Self Awareness: The student will recognize the need for self discipline and respect for others.

2. Interpersonal Skills: The student will gain insight into the many careers in his community and his relationship to them.

3. Work Awareness: The student will learn many occupations have their origins within individual hobbies.

4. Manipulative Skills: The student will share with the class his knowledge of a particular hobby or leisure time activity.

5. Relevance of Education: The student will make effective use of research and communication skills.

RESOURCES: Local libraries: South Portland - Mahoney - Memorial

Values Clarification - Simon

On the Rocks - Student publication, South Portland High School

Map of Old Port Exchange area in Portland

An itinerary outlining route

Foxfire film

Sample subject area and project possibilities

Fishing Boats	Speech Therapy	Secretaries - Office Workers
Candlemaking	Shrimp Fishing	Firearms-Ammunition
Leatherwork	Coaching Football	History of South Portland
Cats and Animals	Lobstering	Coast Guard
Backpacking and Hiking	Motorcycles	Police Work
Model Rocketry	Skiing	Model Trains
Hawaii	Horseback Riding	Automobiles
Woodworking	Water Pollution	Travel - trip taken by family
Refinishing Furniture	Italian Cooking	
Post Office	Comedy - Theater	

ACTIVITIES:

A. All students participate in following:
   1. Interview a personnel director from local bank who offered her services to help students prepare for their own interviews.
   2. Preview Foxfire film.
   3. Assist in filming or taking slides and taping.
   4. Prepare presentation for members of class. Video tape program might be made of the presentation to be offered to other classes.

B. Students choose one activity:
   1. Contact outside resource people.
   2. Introduce community resource people to the group.
   3. Lay groundwork for field trip. This includes permission slips, personal contacts, and organization.
   4. Write thank you notes to resource people.

EVALUATION:

1. Use peer evaluation to judge the nature of student participation.
2. Write a paragraph as to how students' particular abilities apply to the jobs researched.
3. List jobs that are an outgrowth of hobbies.
4. List personal, social and financial conditions necessary to carry out leisure time activities.
5. Write summary of report. Exchange with other students and proofread.
6. Write diary of field trip and interviews.
7. Evaluate films and slides presented by student members.
8. Complete evaluation sheets on individual reports.

Bill Thombs
Mahoney Junior High

BOOK FAIR - A COMMUNITY RESOURCE

1 2 3 4 5 6 7 8

OVERVIEW: The project was the joint effort of an English teacher and the school librarian. Students were offered the opportunity to conduct the Book Fair which was held during American Education Week to permit parents to participate in purchase of books. Since the art department was involved in designing posters, this became an interdisciplinary project.

OBJECTIVES: The student will become aware of his strengths and weaknesses in a work-related situation.

The student will display his ability to cooperate with others in a group project.

The student will determine procedures for work roles in retail and wholesale buying.

The student will gain knowledge of workers in his own community.

The student will develop an awareness of consumer resources.

The student will recognize those skills basic to careers.

ACTIVITIES: Vote on proposal to hold Book Fair.

Discuss with teacher moral issues involved in book selection.

Discuss books of interest and general appeal.

Survey friends regarding their choices of books.

Invite representatives of wholesale paperback company to speak to the class.

Investigate discount and margin of profit.

Bring to class slips from parents granting permission for field trip.

Visit book company and select books, judging the number of each needed. Cars provided by teacher, librarian and public library staff.

Publicize Fair with posters in each classroom.

Assign work roles for sale. Arrange individual book stands on U-shaped tables. Prepare display of books in alphabetical order.

Conduct book sale throughout school day from 8:00 to 3:00 p.m. Request that students pay for books at time of purchase. Continue sale in the evening for parents at Open House.

EVALUATION:

1. Observe responses to teacher-led discussions.

2. Present problems of censorship and have students make value judgments.

3. Compose list of questions to be used in interview.

4. Compile list of desirable books.

5. Write an ad or design a poster publicizing the Fair.

6. Award prizes of free books for best entries in the Poster Contest.

7. Evaluate on tally sheet the success of work roles: selling, cashering, tallying, supervising.

8. Rate student organization, procedure and conduct throughout the project.

FOLLOW-UP: A Book Exchange will take place in the spring. Students will bring to class books they no longer want. They will receive a number of other student books comparable to those offered.

INDIAN LIFESTYLES

The Only Good Indian Is A Dead Indian - Right?

1 2 3 4 5 6 7 8

OVERVIEW: Until the fifteenth century, the people of North America and the people of Europe lived without knowledge of each other's existence. In North America there were many nations, sharing a rich culture that had grown up over thousands of years. Though it was varied in detail from place to place, it was based on the reverent identification with nature, a sense of the oneness of things - the sun, the earth, man, plants, and animals. Dances, art, religious rituals, and way of life were all centered in this mystical understanding of the world.

In Europe, another rich culture had developed around different values: ownership of property, commerce, town life and its social institutions. The old nature religions had long since been replaced by Christianity, which was held to be the only path to salvation to all mankind.

Then, in 1492, Christopher Columbus discovered a vast land and strange, dark people on "the other side of the world." His fellow Europeans realized that the New World was a reservoir of enormous wealth, and they began to cross the ocean to acquire it. With them, of course, they took their religion, value system, and customs. Our history books tell what happened when the European and Indian cultures met and clashed.

Recently, however, many Indians have complained that our history books tell it only from the white man's point of view - and, what is worse, tell it wrong. This unit concentrates on the Indian point of view and presents facts not to be found in most history text books.

OBJECTIVES:

1. Interpersonal Skills: The student in group work will share responsibility for the success or failure of the group.

2. Decision Making: The student will compare the history of the Indian as presented in history texts and in the materials required as reading in the unit.

3. Work Awareness: The student will develop an awareness of how people in any society have an effect upon others.

4. Value of Work: The student will identify the social and environmental factors that influence working conditions.

5. Relevance of Education: The student will demonstrate skills in information gathering and communication.

ACTIVITIES: 1. Read materials assigned and view films.

2. Research one or more tribes from one of the five major areas: Woodland, Plains, Southwest, Northwest Coast, California-Intermountain. The report will include: geographical region and its effect on lifestyle, religion and customs, dress, manner of earning a living.

3. Prepare an oral presentation which may be accompanied by visual aids.

4. Write a report on specific Indian leaders, tribes, or historical events.

5. Write letters to obtain information on current Indian problems.

6. Interview resource people in the community who are authorities on Indian lore.

7. Demonstrate to class such crafts as bead work, pottery, weaving, sand painting.

8. Share research findings with class members.

9. Conduct group discussions based on information gained from research.

EVALUATION:

1. Tally student participation in group work using guidelines previously established by teacher and class.

2. Evaluate Indian problems comparing and contrasting the Indian point of view with that of the government.

3. Identify six characteristics of Indian lifestyles that conflict with those of white men.

4. List the social and environmental factors that aid or hinder the Indian in his quest for an adequate living for his family.

5. Complete written report following guide sheet provided focusing on Indian's attempt to reconcile his heritage and the white man's world he lives in.

6. Relate conflicts between the Indians and settlers to contemporary problems.

7. Discuss Indians' ideals, concerns, religious and moral beliefs and their training of children. Compare them with those of the white man.

U.S.S.R. PROJECT

OVERVIEW: South Portland in 1975 became a site for the Right to Read Process. A component of the Process is the U.S.S.R. Program which recommends a class period of uninterrupted sustained silent reading. This seemed a worthwhile project for a diversified eighth grade class which met in the Reading Center.

OBJECTIVES:

1. The student will investigate the resources of the library.
2. The student will select books pertaining to his particular interest and ability.
3. The student will read with sustained interest during class session.
4. The student will choose method of reporting on reading.

ACTIVITIES:

1. Select three books - fiction or non-fiction - from the library.
2. Read independently one day each week for a full class period.
3. Choose from the following alternatives a method of reporting on reading:
   a. Demonstrate oral communications with class report.
   b. Write about responses to reading.
   c. Prepare a tape for the class or teacher.
   d. Report on reading in a teacher conference.
   e. Dramatize a scene from one of the stories.
   f. Construct a diorama with accompanying oral or written presentation.

Independent Project:

As an incentive for students to complete the reading of the three required books, they were offered the opportunity of taking candid photographs. Any person or scene within the school area could be "snapped." Support for the project was provided by a fellow teacher who agreed to develop the film. It was then determined by a vote of the group that another eighth grade division would choose the winning photograph and that an inexpensive prize would belong to the lucky amateur photographer.

Phyllis Small
Memorial Junior High School

HISTORY OF OUR SCHOOLS

1 2 3 4 5 6 7 8

OVERVIEW: Members of the community, particularly those for whom local schools have been named, seem worthy of student research. Such individuals have made sufficient contributions to the area as to be so honored. Students conducting research on the lives and careers of these individuals would recognize the value of their heritage.

OBJECTIVES:

1. Interpersonal Skills: The student will in group work practice communication skills required for work roles.

2. Decision Making: The student will, as a member of the group, determine the individual and school to be researched.

3. Work Awareness: The student will identify the factors which influenced the community members researched.

4. Manipulative Skills: The student will use manual skills essential to many careers.

5. Value of Work: The student will investigate the contributions made by prominent members to the community.

6. Relevance of Education: The student will consult community members on essential background for his project.

RESOURCES:

Resource people
Local television or newspaper reporter
Community members

Research locations
School, South Portland and Portland Public libraries
Maine Historical Society
Gannett Newspaper library
South Portland City Hall

Publications
"The 19th Century Meets the Media: A Slide-Tape Research Project" from English Journal

South Portland High School Yearbooks

Films and Slide Presentations
Foxfire)
Effective Writing: Research Skills) available from Prime Resource Center
Religion - High School sociology class production
The Nearings - Mahoney Junior High production

Equipment
Tape recorder and tapes
Camera for slides

ACTIVITIES:

1. Read publications and view films listed.
2. Determine name for project.
3. Visit research locations for materials providing historical background.
4. Write to "We Hear" for use of photographs and news articles.
5. Prepare practice interviews with video tape.
6. Interview news or television reporter in class.
7. Interview members of community acquainted with person whose life is being researched.
8. Present scenes from lives of individual researched drawing on the authentic dress and music of the time.
9. Prepare written, as well as slide, presentation based on findings.

EVALUATION:

1. Rotate student leadership roles in group situations.
2. List in sequence the skills required for decision making process.
3. Write an essay on financial and social conditions which determined the life style of individual studied.
4. Record amount of student participation in work related experiences.
5. Name four specific contributions made by individual whose life has been researched.
6. Faculty, parent, and peer evaluation of written reports and slide presentation.

Theodora Sotiriou

Grade Eight

GROUP CONTRACT

The Group Contract is an approach to reading which provides an opportunity for students to have free selection of books. At the same time, the project fosters student cooperation and responsibility. It offers a variety of related activities many of which promote oral presentations.

Students are given a choice of the book they wish to read. Then they are placed in groups with four or five others who have chosen to read the same book. The group contracts for a grade. All members must agree.

Requirements of Contract

Complete 11 of 12 activities A
Complete 9 of 12 activities B
Complete 7 of 12 activities C

The teacher will accept no contract for a grade lower than C.

SAMPLE OF CONTRACT AND ACTIVITIES

I, _____, agree to fulfill the requirements necessary to achieve a grade of ___ in connection with a study of the book _____. I understand that I am subject to penalty for failure to meet the requirements as stated.

1. Draw and illustrate an explanatory map.
2. Write a two-page (250-300) essay explaining the form of courage depicted.
3. Create an essay test of twenty thought questions.
4. Prepare a bulletin board demonstration.
5. Achieve a minimum score of 90 on an objective examination.
6. Prepare an adequate author-biographical sketch using and citing at least three sources.
7. Compose a dialogue between two characters in the book.
8. Act out one scene in the novel.
9. Assemble a composite of at least 10 poems suitable for reading with the novel and relate each briefly to the novel.
10. Present an audio-visual lesson with explanation.
11. Write a resume, brief but complete, of the book retaining divisions of the book.
12. Comprise a list of at least 50 vocabulary words with their meanings.

Beverly Theriault
Mahoney Junior High School

REVOLUTIONARY LIFESTYLES

1 2 3 4 5 6 7 8

OVERVIEW: The history of the American Revolution is more than a series of events. In this unit, students will explore the daily life of the Revolutionary Americans--their work, their customs, their arts and crafts. Against this examination of lifestyles, the pre-revolutionary events of Boston will be presented.

The unit will be presented as an inter-disciplinary effort of English and Social Studies classes in the eighth grade. The main focus of the English class will be upon daily life in Boston as presented in Johnny Tremain by Esther Forbes. The Social Studies class will deal with the historical events of the era.

OBJECTIVES:

1. Self Awareness: The student will compare his lifestyle and values with those of young people living in Boston during the Revolution.

2. Work Awareness: The student will study the early apprentice system. He will identify the roles of adult workers to recognize their contributions to the growth of America.

3. Value of Work: The student will learn through research of the lives and careers of prominent historical figures of the Revolutionary period.

RESOURCES:

Johnny Tremain - Forbes
The Free and the Brave - Graff
An Album of Colonial America - Ingraham
Everyday Life in Colonial America - Wright
Life in Colonial America - Speare
Patriot's Choice: Story of John Hancock - Wagner
John Adams and American Revolution - Bowen
Give Me Liberty - Folsom
Heroes of the American Revolution - Davis
Sam Adams, Son of Liberty - Alderman
Poems of American History - Stevenson
Paul Revere and World He Lived In - Forbes
Turncoats, Traitors and Heroes - Bakeless

Audio-Visual Materials:

The American Revolution: Part I
Causes of the Revolutionary War
Colonial Living with Paul Revere (12 prints)
Colonial Living (6 filmstrips with cassettes)
The Making of a Nation (recording)

ACTIVITIES:

1. Students will read the novel, Johnny Tremain.

2. Students will note the attitude of the characters toward work and the effect it had on the story.

3. Students will study some of the ways artisans earned a living in Boston. They will consider whether any of these same occupations are in existence today. They will discuss the changes that have taken place in the conditions of work, in the job itself, and in the amount accomplished since colonial days. Choices: coopers, weavers, soap-boilers, leather-dressers, sailmakers, shipwrights, printers, clockmakers.

4. Students will research an occupation practiced during the Revolution. Possible choices:

silversmith	plumbers	glass blower
apothecary	chandler	hornsmith
cooper	housewright	baker
printer	sawyers	hatter
fish mongers	joiner	wainwright
whaler	miller	bookbinder
merchant	tanner	pewterer
gunsmith	currier	coppersmith
tinkering	fuller	cabinetmaker
medicine	itinerant	blacksmith
weaver	cat whipper	cutler
tailor	barber	tobacconist
potters	wigmaker	braziers
papermakers	shipwright	ironmaker

5. Students will prepare an oral presentation and demonstration of these Revolutionary crafts and occupations.

6. Students will read from assigned list of library texts of the lives of famous men of the Revolution:

John Hancock	John Adams	Major Pitcairn
Paul Revere	Billy (Wm. Dawes)	General Gage
Joseph Warren	James Otis	Josiah Quincy
Sam Adams	Dr. Ben Church	Colonel Smith

7. Students will use the resources of the library to learn of customs, religions, schools, and the apprentice system of the 18th century.

8. Students will select one activity from the following:

   a. Prepare a bulletin board contrasting colonial signboards and modern forms of advertising.

   b. Produce articles for class newspaper, similar in form to "Boston Observer." Features will include those of an historical and social nature.

   c. Present a class program featuring Revolutionary - <u>Speeches</u>: Patrick Henry's "Speech Before the Virginia House of Burgesses, March 23, 1775."
      Thomas Paine's "The Crisis, December 19, 1776"

"A Minuteman's Pledge"
"Washington Accepts the Command" June 16, 1775
"The Declaration of Independence" (first part)

Poems: "Paul Revere's Ride" - Henry Wadsworth Longfellow
"Concord Hymn" - Ralph Waldo Emerson
"A Ballad of the Boston Tea Party" - Oliver Wendell Holmes
"The Eve of Bunker Hill" - Clinton Scollard
"Nathan Hale: A Ballad of the American Revolution" - author unknown

Song: "Yankee Doodle" (see An American Revolutionary War Reader)

EVALUATION:

1. Discuss the novel and take an objective test.

2. Complete one sheet listing aspects of student's lifestyle and another for that of young person in early Boston.

3. Cite five items they had not previously known about the occupations researched.

4. Apply or relate knowledge of historical figures gained from reading the novel to the information found in history and reference texts.

Evaluate individual projects: bulletin board, class newspaper, lass program, or class demonstration.

GROUP STRATEGY FOR CLASS PROJECTS

Your Group_____ Your Name_____ Date_____

Directions: Who, in your group, is most likely to take the role described? Write the person's name in the space.

A person might fill several different roles. More than one person can be named for a specific role. You may put your own name in for a specific role if you think you best fit that specific role.

It is acceptable to leave a space blank if you do not think anyone comes close to the description.

As you see it, who in the group is most likely to:

1. Take initiative, get things started, suggest ideas? _____
2. Passively wait for others to take the lead? _____
3. Keep his feelings to himself, unexpressed? _____
4. Express feelings most openly and freely? _____
5. Interrupt others when they are speaking? _____
6. Wait patiently for others to finish before he speaks? _____
7. Seem wrapped in own world and not very responsive to others? _____
8. Help you when in trouble, even at some sacrifice to self? _____
9. Seem to have the most invested in the group, seem most committed? _____
10. To be listened to when he speaks? _____
11. Contribute the best ideas? _____
12. Tend to argue, disagree or try to convince others? _____
13. Tend to smokescreen? _____
14. Seem to be aware of group processes, point out what is happening and suggest better procedures? _____
15. To be the one you would miss the least? _____
16. To be the one you would want as a close friend? _____
17. Tend to dominate? _____

18. To be least noticeable? _____

19. Tend to throw roadblocks into the process? _____

20. Seem to accept you as you are? _____

21. Seem to want to change you? _____

22. To be the one you most accept as he is now? _____

23. To be the one you would like to see change? _____

24. Seem to have changed most during the time with the group toward being more honest, open, concerned for others and more helpful to the group and members? _____

25. Seem to have changed least during the time with the group in a positive direction, or might have even become less open, honest, etc.? _____

Mahoney Junior High School

Grade Eight

A CHECK BOOK APPROACH TO READING

An individualized approach to reaching a small group of eighth grade students is the use of a check book of reading activities. Each student is responsible for completing eight pages of varied reading activities. Working at his own pace the student proceeds from one assigned reading task to another. When he has completed his reading, the teacher corrects, grades and initials his check and he advances to the next step in the process. In addition, each student has his own folder and all assignments are kept for reference. Because the class number is small, students are able to work individually. In adapting to a larger class, a teacher might encourage students to complete the reading tasks in group work.

Resources for Reading Tasks:

1. RAS/READING ATTAINMENT SYSTEM is a series of high interest/low level graded selections from which students chose their own reading.

2. SHORT STORIES are taken from "You and Your World" and "Know Your World." Students read and answer questions from four stories.

3. BE A BETTER READER has numerous stories, activities and skill building exercises arranged by disciplines: social studies, math, English.

4. POWER BUILDER is a component of the SRA Reading Lab. Reading selections develop comprehension and word structure.

5. RADIO READING LAB features recorded true life stories with a dramatic climax. Students are required to listen to two of these stories on cassettes and do vocabulary and comprehension exercises.

6. BASIC READING SKILLS, for high school use, is a workbook which stresses different reading skills and is helpful to students wishing to improve their reading.

7. READING FOR UNDERSTANDING are exercise cards found in SRA kits. After reading a selection, the student chooses his answer from conclusions suggested.

8. READERS DIGEST SKILL BUILDERS stories measure critical reading, understanding and word study.

Descriptions of Resources have been included to indicate the types of reading activities required of students. Obviously the possibilities for varying the tasks are limitless - bound only by time to research and create new check book projects.

Memorial Junior High School

AN ALTERNATIVE TO BOOK REPORTS

1 2 3 4 5 6 7 8

OVERVIEW: This is a suggested approach to an individualized reading program with the long-range objective being the facilitation of the presentation of the formal book report. The program is designed for the eighth grade student, phases II and III. Time allotted would be one, perhaps two, specified class period(s) a week with outside continuation encouraged.

OBJECTIVES:

1. Self Awareness: The student will demonstrate his ability to succeed.

2. Decision Making: The student will select from among several choices those books of interest to him.

3. Manipulative Skills: The student will use basic mechanical and study skills in a non-structured format.

4. Relevance of Education: The student will demonstrate awareness of the values component of career education concepts.

RESOURCES: A listing of books with a copy for each student involved in the program and one to the library.

A double file box open to the students and containing a consideration card* and an activity card** for each book.

A notebook containing brief objective check-tests and a key for the teacher's use.

* Each consideration card will contain a brief description of the book; type of literature; designation: boy, girl; level of readability computed from the Fry Readability Formula; and a designation of the dominant themes in the book - so that the same file may be used by teachers developing particular units in literature. The reverse side of this card will point out for the student's use some of the important concepts of the book and indirectly provide suggestions for essay subjects.

** Each activity card will encourage students to use and reinforce a specific oral or writing skill and to relate a specific book to his total environment. (Samples of both cards are included.)

ACTIVITIES: Select and read a book from classroom library.

Read the consideration pertaining to the book.

Discuss with teacher any problems in reading process or writing content.

Take an objective test on the book.

Select and perform one activity from activity card.

EVALUATION: 1. Receive a passing grade of 80% on an objective test over book choice.

2. Prepare a display, research a career from within the context of the story and present findings orally to the class.

3. Write a subjective essay dealing with values from consideration card.

Sample of Consideration Card

Julie of the Wolves
Jean Craighead George

Fiction B/G 6

This is the story of a young Eskimo girl who becomes lost in the wilds of Alaska and survives with the wolves who help to teach her the value of her life.

Survival Values Regional

(On reverse side)

Consider:
1. We must learn to rely on ourselves in order to survive.
2. Places we haven't been often seem more appealing than where we are until we learn more about them.
3. At some point in life, everyone must choose what type of life he/she must lead.
4. Animals show their intelligence and devotion in ways much more amazing than man.

Sample of Activity Card

Julie of the Wolves
Jean Craighead George

1. Prepare a bulletin board display using pictures or sketches of the wolves with appropriate sentences from the story.
2. Write to the State Department of Natural Resources requesting information on regulations governing hunting and trapping in this state. Report orally on your findings.
3. You and three friends are going on a four-day hiking trip on Mount Katahdin. List and demonstrate for the class the kinds of equipment and supplies you must take.
4. Prepare a display of the traditional clothing of the Eskimo.

Beverly Theriault
Mahoney Junior High School

LIFESTYLES

Helen and Scott Nearing
Living the Good Life
1 2 3 4 5 6 7 8

OVERVIEW: On their 140 acre farm overlooking the sea in Harborside, Maine, Helen and Scott Nearing, ages 71 and 91 respectively, have cleared the land, built stone walls and buildings, raised 80% of their food, dug a pond by hand, and found a cash crop - blueberries. During the Depression, they left what he called "cityism" to seek a homesteading existence in Stratton, Vermont. The Maple Sugar Book and Living the Good Life attest to the success of their venture. The land boom in Vermont in 1951 threatened their way of life and caused them to search for a new wilderness area. This they found on Cape Rosier in Maine. Young people have visited the Nearings by the hundreds. Helen Nearing writes that many were intrigued by their way of living but only a few were prepared to go and do likewise. Most of them said, "It's a nice place you've got here - but you work too hard." She adds that they failed to recognize the fact that it was the hard work that made and kept the place "nice."

OBJECTIVES:

1. Self Awareness: The student will witness the self discipline required in being one's own master.

2. Interpersonal Skills: The student will learn that lifestyles new to him may be worthy of respect even though he may not choose to emulate them.

3. Manipulative Skills: The student will use manual skills essential to many careers.

4. Value of Work: The student will study the impact of one's career on his lifestyle.

5. Relevance of Education: The student will learn interviewing or reporting techniques and the value of research.

RESOURCES: A reprint of the article "Maine's Complete Conservationist" from Downeast Magazine

The Maple Sugar Book and Living the Good Life written by the Nearings

Stone Book - Flagg

Maine Pilgrimage - Richard Saltonstall, Jr.

Maine maps to study route to Harborside

Field trip itinerary

Salt - student magazine, Kennebunk High School

Foxfire - film from PRIME Resource Center

Tape recorder and tapes

Movie Camera

ACTIVITIES:

1. Read, view, and discuss in class the materials listed above.
2. Engage in classroom presentation with local television personality experienced in interviewing.
3. Prepare questions for Nearing interviews.
4. Tape and photograph the field trip to Harborside.
5. Share knowledge and observation of the Nearings' lifestyle in class discussions.
6. Prepare written accounts of the varied aspects of the Nearings.
7. Design stationery and issue invitations to parents and school officials.
8. Prepare poster, slide and movie presentation for parents and school officials.
9. Write letters of appreciation.

EVALUATION:

1. Give an example of another self employed worker and identify five specific ways he must be self disciplined.
2. Discuss the lifestyle of a New York policeman, country doctor, and shoe factory worker. Prepare a defense for the advantages of each.
3. Successfully use one or more of the following pieces of equipment: tape recorder, camera, movie camera, slide or movie projector, or prepare a poster, stationery or artistic portrayal of the Nearing visit.
4. Identify eight characteristics of the Nearings' lifestyle and match these characteristics to the values which prompted them.
5. List three specific educational skills which added meaning to the Nearing Unit.

Leon Rowe, Librarian
Terry Sotiriou, Curriculum Coordinator

A PROPOSAL FOR A COMPREHENSIVE SYLLABUS
FOR THREE HISTORICAL NOVELS

DESIGN OF THE STUDY

The procedure that will be used will simply be a brief discussion of each novel, concerning its value and general use in the classroom. After each discussion there will be a bibliography of books and audio visual aids that hopefully will make the teaching of each book more effective.

The sources of data for the finding of enrichment materials for each novel will be included in the bibliography at the end of the paper. Also all references for the section concerned with related literature will be included in the final bibliography.

Patricia Emery
Mahoney Junior High School

PRESENTATION

Kidnapped

The significance of this book in literary terms as well as historical was stated quite well in a textbook that was consulted. It was stated that perhaps the greatest of the adventure stories in the late 1800's were Treasure Island and Kidnapped by Stevenson. Kidnapped has a Jacobite background and retells the thrilling adventures of David Balfour after he attempts to claim his inheritance.[1]

However, it is more significant than just a tale of adventure. The adventure is the background for the conflict of two distinct characters, David Balfour and Alan Breck. Both are politically as well as morally different, and this conflict cannot be fully realized by students until they know why Alan is as he is and why David is the person he is. And this difference can best be explained by the historical events that have made these characters what they are. And so the period of English history from time of James I (late 1600's to mid 1700's) should be discussed.

The following terms, people, or events must be taught, mainly as events, people, or ideas that affected other people's attitudes and beliefs.

1. James I
2. Charles I
3. Cromwell
4. Commonwealth Period
5. Charles II
6. James II
7. Queen Anne
8. Jacobite
9. Entail
10. Primogenture
11. Battle of Culloden
12. Bonnie Prince Charlie
13. Clan
14. Campbells
15. Scottish dialect
16. Whig

Perhaps the list could be more extensive, but if students can grasp the ideas suggested by this list, they can really begin to understand that the climax of Kidnapped is not entirely what happens externally to Alan and David, but what happens internally which is due mainly to their respective backgrounds.

An example from the book to illustrate the need for historical knowledge is very well brought out in chapter nine.[2] It is in this chapter that Alan Breck and David Balfour meet and the contrast in age, character, background, and moral attitude is keenly observed. Because of lack of some knowledge of just what the difference, students begin to lose interest in this book at this point. I speak from experience.

How does one present such historical knowledge to students in order to make chapter nine more meaningful? A lecture on the list previously mentioned is possible. It doesn't sound as deadly dull as implied. Here the teacher is the key factor

[1]Allec Ellis, A History of Children's Literature to 1900. (Oxford: Pergamon Press, 1973) p. 123.

[2]Robert Louis Stevenson, Kidnapped (New York: The New American Library, 1959) pp. 62-82.

to success. The manner of presentation must be dynamic. Another approach is a library assignment (individually) to students whereby they are responsible for finding out such information needed from the list. Reserved books will facilitate their work. Class reports to share the acquired information would serve to aid the whole. At 8th grade level this library work must be structured and a suggested bibliography for Kidnapped is enclosed to enable teachers to do something of this kind. Audio visual materials are not so readily available for junior high for the historical aspects of this book, but those that are relevant and, in some cases, available are listed.

Bibliography for Kidnapped

A. Material Suggested for Source Readings

1. Bowle, John. The English Experience. New York: G. P. Putnam's Sons, 1971. (esp. pp. 294-364)

2. Buchanan, Freda M. The Land and People of Scotland. New York: J. B. Lippincott Co., 1958. (esp. pp. 47-52)

3. Porter, Jane and Nora A. Smith, eds. The Scottish Chiefs. New York: Charles Scribner's Sons, 1956.

4. Shultlesworth, Dorothy E. The Tower of London. New York: Hastings House, Publishers, 1970. (esp. pp. 67-80)

5. Street, Alicia. The Land and People of England. New York: J. B. Lippincott Co., 1969. (esp. pp. 105-114)

6. Trease, Geoffrey. Seven Kings of England. _____: Vanguard, 1955.

7. Trease, Geoffrey. Seven Queens of England. _____: Vanguard, 1953.

8. Unstead, R. J. The Story of Britain. New York: Thomas Nelson Inc., 1970. (esp. pp. 204-244)

9. Wedgewood, Cicely Veronica. A Coffin for King Charles: The Trial and Execution of Charles I. New York: Macmillan 1964. (certain parts could be assigned)

B. Suggested Historical Fiction

1. Beatty, John and Patricia. Campion Towers. New York: Macmillan, 1965. (a fictional book during the time of Cromwell)

2. Clarke, Mary Stetson. Piper to the Clan. _____: Viking, 1970.

3. Picard, Barbara Leonie. The Young Pretenders. _____: Criterion, 1966. (a fictional book with the background of the Jacobite Rebellion)

4. _____. The Royal Dirk. _____: Morrow, 1966. (centers around the escape of Bonnie Prince Charlie)

This is only a suggested bibliography. The historical fiction section of it is short due to the difficulty of finding junior high novels with a Kidnapped background. This is a beginning and with more time this historical fiction list could be expanded. Also it should be mentioned that the place of publication for some of these books was not listed in the references consulted.

Audio Visual Materials for Kidnapped

A. Films

1. BF-38 United Kingdom of Great Britain (16mm) 22 min. (color) (available through Prime)

2. Public Television
   a. a production on the Battle of Culloden
   b. a production of Sir Walter Scott's "The Fortunes of Nigel" (background of King James I)

B. Tape

1. Available at Mahoney Junior High with good readings from Kidnapped

Johnny Tremain

Using the same source as for Kidnapped, I found a brief description of what the book Johnny Tremain tries and certainly succeeds in conveying to the reader. It was stated that in this historical novel arrogance is confounded and infirmity is overcome and besides portraying this Esther Forbes, as well shows "a different view of the American War of Independence from that learned in the average American textbook."[3]

This book, of course, has more written into it by means of an introduction, a map, and even guide questions at the end for each chapter to aid the teacher in his or her work. But still the historical events of which Johnny Tremain is a part are sometimes difficult to make interesting to the students. Perhaps because this book has history relatively familiar to the students turns them off. So here perhaps an introductory lecture on the times and people involved is not a good starting point. Sometimes a film tends to motivate the students first, and then a discussion, lecture, source readings may be in order.

Most students enjoy reading about the fictional characters in this book, but by the time they reach chapter six, "Salt-Water Tea," they become somewhat turned off. Here historical events really begin to affect Johnny as well as the other fictional characters.[4] The development of Johnny's character begins to be affected by the Boston Tea Party, the closing of the Boston Port, and the establishment of military rule in Boston. Students must learn the significance of these events as

[3]Ellis, op. cit., p. 230.

[4]Esther Forbes, Johnny Tremain (Boston: Houghton Mifflin Co., 1960) pp. 104-128.

well as learn something about the non-fictional characters involved. Then the events, the novel, the characters should certainly and hopefully hold the students' interest. A suggested bibliography of books and films follow.

Bibliography for Johnny Tremain

A. Material suggested for Source Readings

1. Beach, Stewart. Samuel Adams: The Fateful Years. _____: Dodd, 1965.

2. Earle, Alice Morse. Child Life in Colonial Days. New York: The MacMillan Company, 1927. (esp. pp. 1-403)

3. Hall-Quest, Olga. Guardians of Liberty: Sam Adams and John Hancock. _____: Dutton, 1963.

4. Langdon, William Chauncy. Every Day Things in American Life. New York: Charles Scribner's Sons, 1937. (esp. pp. 1-334)

5. _____. America's Historylands. _____: National Geographic Society, 1962. (esp. pp. 177-205)

B. Suggested Historical Fiction

1. Fast, Howard. April Morning. New York: Crown Publishers, Inc., 1961.

*2. Thane, Elywth. Dawn's Early Light. New York: Duell, Sloan, and Pearce, 1943.

*3. Williams, Ben Ames. Come Spring. Boston: Houghton Mifflin Co., 1940.

*Both are available in paperbacks.

In order to make the historical fiction list longer, more time and research is obviously needed. Also the list of books for source readings is small, partly due to time, but also due to the fact that such enrichment readings should come from sources other than the basic textbooks used.

Audio-Visual Materials for Johnny Tremain

A. Films (all available at Prime in Portland)

1. MP-364 Revolutionary Period to 1783

2. MP-642 Boston Tea Party

3. MP-806 Colonial America in the 1760's

4. MP-807 Prelude to Revolution

5. MP-808 Lexington, Concord, and Independence

6. MP-811 The American Revolution: Part I-The Cause of Liberty

7. MP-812 The American Revolution Part II-The Impossible War

Across Five Aprils

In this book written by Irene Hunt, the students read a book rich in Civil War background. This novel is well written and has been noted for its merit. In 1965 Across Five Aprils received the Rollet Award and was runner-up for the Newberry Medal.[5] The story is based on the Creighton family who live in Illinois. The story opens just as the Civil War is about to begin. The key figure is Jethro Creighton who is too young to go to fight, but who begins to grow into manhood as the events of the time force him to. It is really in Chapter Two that the questions of the Civil War, the North vs. the South, the problems and attitudes of its characters are made known.[6] It is in this chapter that students, in this particular book, begin to lose interest as a result. In Chapter Two, a cousin from Kentucky comes to visit the Creighton family, and discussion and opinions of the Civil War, the rights of the North and South, and the reasons for certain attitudes are brought forth. Here history must come in, for it helps to shape the characters of the novel, and its knowledge will help students understand the characters more fully.

In comparison with Johnny Tremain, perhaps a list of terms, people, events, or places may be needed in an introductory lecture. Again, the teacher is the key factor to success of the lecture method. It seems that most students know more about the Revolutionary period in American History than they do about the Civil War period by the time they reach the eighth grade. This conclusion is only a result of my experience and observation. There follows a suggested list that hopefully will help with the comprehension of the background of Across Five Aprils.

1. Rebel
2. Confederates
3. Battle of Bull Run
4. South
5. North
6. Abolitionist
7. Yankee
8. Union
9. Army of the Potomac
10. Robert E. Lee
11. George B. McClellan
12. Ulysses S. Grant
13. William T. Sherman
14. Ambrose E. Burnside
15. Secession
16. Gettysburg
17. Sherman's March
18. Reconstruction
19. Andersonville and Camp Douglas
20. Thirteenth Amendment

Again this list only implies the knowledge needed to aid understanding of the Civil War period. Sometimes a lecture is a good way to begin. Then as with the other novels, library work, source readings, class reports, and audio-visual materials tend to bring the historical background alive. A recommended list of books and audio-visual material is now included.

[5]Martha E. Ward and Dorothy A. Marquardt, Authors of Books for Young People (New Jersey: The Scare Crow Press, Inc., 1967) p. 152.

[6]Irene Hunt, Across Five Aprils (New York: Grosset and Dunlap, 1965) pp. 27-36.

Bibliography for Across Five Aprils

A. Material suggested for Source Readings

1. Commanger, Henry Steele. America's Robert E. Lee. Boston: Houghton Mifflin Company, 1951.

2. Horgan, Paul. Citizen of New Salem. New York: Farra, Straus and Gudahy, 1961. (about Abraham Lincoln)

3. Langdon, W.C. Every Day Things in American Life (1776-1876). New York: Charles Scribner, 1941. (esp. pp. 1-382)

4. Phelan, Mary Kay. Mr. Lincoln Speaks at Gettysburg. New York: W. W. Norton and Company, 1966. (esp. pp. 15-133)

5. William, Harry T. Lincoln and His Generals. New York: Grosset and Dunlap, 1952.

6. _____. America's Historylands. _____: National Geographic Society, 1962. (esp. pp. 392-467)

B. Suggested Historical Fiction

1. Kane, Harnett. The Lady of Arlington. New York: Doubleday and Company, Inc., 1954.

2. Nolan, Jeannette C. Yankee Spy - E. VanLew. New York: Julian Messner, 1970.

3. Stone, Irving. Love Is Eternal. New York: Doubleday and Company, Inc., 1955.

4. Thane, Elywth. Yankee Stranger. Chicago: Consolidated Book Company, 1944.

This list could be expanded as I have suggested with the lists for Kidnapped and Johnny Tremain.

Audio-Visual Materials for Across Five Aprils

A. Films (all available at Prime in Portland)

1. MP-196 Civil War 1863-1865 Gettysburg to Appomattox

2. MP-381 Civil War - Its Background and Causes

3. MP-745 The Jackson Years: Toward Civil War

4. MP-771 Grant vs. Lee (Original Version)

5. MP-818 Chickamauga

SUMMARY and CONCLUSIONS

The summary can only include what has been stressed all through this paper. Books with historical background can be taught effectively, only if the teacher is positive about the book, prepared in the historical background of the book, and aware of necessary materials to make history interesting and meaningful to the students. Again this hypothesis only appears to be true. It hasn't been proved.

In order to reach any really valid conclusions, a research design of some type discussed in this course will have to be set-up. Here method A versus method B could be carried forth into some type of experimental design whereby all the variables that would affect result might be controlled, in a complete or incomplete way. I feel quite sure that method A would produce some difference from that of method B, but this conclusion could only result from a very carefully planned research design.

I hope this paper will only help teachers become aware of the materials that can be found and used in teaching Kidnapped, Johnny Tremain, and Across Five Aprils. It is also hoped that the materials listed after the discussion of each book can be evaluated, through use, rejected if necessary, and expanded through continued research.

JUNIOR HIGH SCHOOL CAREER FAIR

The evaluation sheet made out by 8th grade students at Memorial Junior High and Mahoney Junior High School following the WORLD OF WORK CAREER FAIR indicated that the morning of April 10, 1974, in Memorial's large gymnasium was a success.

How the Project Began: The Career Education Assistant Director, Mr. Fred Freise, laid the groundwork for the Fair. He personally invited local professionals within the 15 job clusters to participate in the Fair. The type of people who agreed to become involved for the 5 1/2 hour Fair were as follows: doctor, four interns, lawyer, college admissions director, engineer, veterinarian, fashion model, dentist, dental hygienist, executive secretary, banker, airline stewardess, disc jockey, hair stylist, Junior Achievement executive, factory public relations people, armed services recruiters (4), hotel manager, insurance man, and from the local Southern Maine Vocational Technical Institute - department heads in water waste control, electricity, oceanography, building trades, drafting, fire technology, law enforcement, small engines, automotive mechanic, plant and soil technology, surveying, sheet metal, welding, practical nursing, and machine tool.

The selection of people for the Fair was made very carefully. There was something at the Fair for every 8th grader in South Portland -- those who planned to go to a 4 year college, those who would attend a junior college, vocational technical institute and those who planned to join the world of work fresh out of secondary school. Hobbies and manufacturing were also thought of and a good group of hobbyists were also invited to display their works along with a representative from Junior Achievement.

A total commitment by all people within the South Portland system was necessary for the success of such a venture. This was displayed in many ways.

Guidance counselors oversaw the whole Fair. They encouraged participation and involvement by teachers in their classes and pupils in guidance classes. They planned a thorough detailed program booklet, name tags, had pupils make posters, and decorate the building and gym. They made sure exhibitors were all prepared, provided coffee for exhibitors and were general hosts at the Fair.

Principals ironed out problems with gym classes and bus scheduling. They coordinated the whole project with the counselors, made suggestions, encouraged all teachers to sell the Fair to their pupils.

Teachers recommended friends as exhibitors, edited the evaluation sheets, and had pupils discuss the Fair in classes.

Careful planning as to where each exhibition would be placed in the gym was essential -- the professionals were clustered together, four crafts tables were placed in a block in which pottery, woodcarving, leather and ceramics were on exhibit.

In another area of the gym, a prominent public relations executive agreed to video tape a mock job interview stressing such phases as work experience, outstanding activities, job goals, school activities, grades in school, personal

data, references, highlights -- achievements in your life. The tape would be given to the counselors to play back in guidance classes for all pupils to observe.

Many exhibitors brought along tape recorders, filmstrips and movies. Pamphlets and brochures were free and available from many. But, of course, the most impressive careers on exhibit were those in which simulation was involved:

Dental Technicians showed the cleaning compound used in cleaning teeth. Some pupils volunteered to have their teeth cleaned.

The hair stylist (Mansfield Beauty Academy of Maine) had students volunteering to have their hair thinned, shaped, cut, trimmed (boys as well as girls) and some girls were given instruction on facial makeup, eye shadowing, mascara, etc.

The Culinary Arts instructor and two of his top seniors showed pupils the art of cake decorating. The 8th graders seemed fascinated with what a tube of icing could create -- rose petals, buds, leaves, etc.

Preparing students for the big day was essential. Guidance counselors, career specialists, South Portland Career Education director and assistants, principals and teachers were all helpful -- giving suggestions and helping in the planning. Guidance classes were used (2 or 3 periods) prior to the Fair to motivate the pupils. Each of the city's two junior high schools would be allowed two hours in the gymnasium. A series of seven evaluation questions were given to each pupil in English class.

1. List the 3 exhibitors you like the most.
2. Which one did you like the best and why?
3. What did you learn from this Career Fair?
4. Would you recommend the Fair another year?
5. How do you think you will benefit from this experience in the future?
6. If you were in charge of this Career Fair, what changes would you suggest to improve the program?

The week before the Fair parents of all 8th graders were invited to attend an evening session. This gave parents (and pupils again) a chance to meet and talk with all the exhibitors.

English teachers agreed to discuss the morning's activities and complete the evaluation sheets for the counselors. Comments on the evaluation sheet done by pupils, teachers, exhibitors and parents indicated 99.5% felt it should be repeated next year.

At the close of the Fair the exhibitors were invited to stay for lunch which was served by the 8th grade volunteers, after which Mr. Freise conducted an open discussion and wrap up.

Some of the recommendations by exhibitors, pupils, teachers and parents regarding the Fair were as follows:

More time needed by pupils.
"Quiet rooms" to be made available for private consultations.

Perhaps the best way to sum up the Fair is to list several comments made by pupils on their evaluation sheets:

"I saw some things that I never knew before."

"I saw something that I might be interested in."

"I now have a better knowledge of the work I would like to do."

"It opened up other job possibilities for me."

"I learned more about the work different people do."

"I will be able to think about the careers and what I will have to have to become one of these people."

"I learned a lot about what I didn't know."

To sum it up in the words of an 8th grade teacher who attended the Fair: "I felt the Career Fair was both informative and interesting. From the appearance of the pupils, they also felt that way. It was a highly successful undertaking."

ORAL READING WITH A PRODUCT

1 2 3 4 5 6 7 8

OVERVIEW: The South Portland career education project has acquired many audio-visual materials for all disciplines. Several of the filmstrips and slide sets have only a written script. Therefore, the teacher must follow the printed script, listen to the tape/record and advance the pictures simultaneously. Student prepared tapes would be a decided advantage and convenience over these scripts. This unit is designed to provide the speech students with useful oral reading practice while producing the much needed audio tapes to permanently accompany these materials.

OBJECTIVES:

1. Interpersonal Skills: The student will work effectively within a group.

2. Decision Making: The student will demonstrate skills in perception, information gathering and decision making.

3. Work Awareness: The student will demonstrate a responsible attitude toward work.

4. Manipulative Skills: The student will operate the audio-visual equipment necessary to complete the assigned task.

5. Relevance of Education: The student will use communication skills effectively.

RESOURCES:

Dictionaries
Tape recorders and blank tapes
Slide and filmstrip projectors
Commercially taped interviews and scripts
Filmstrip/cassettes - school librarian has samples
Filmstrip and slide sets with scripts to be taped

ACTIVITIES:

1. Students will as a class listen to commercially prepared three minute audio-tape interviews to discern intonation, enunciation, musical background, and other components. They will also in groups view filmstrips with accompanying cassettes for ideas in their taping.

2. Students will in groups be given a filmstrip or slides with script and will practice reading the scripts to themselves, then to one another. Dictionaries must be used to determine correct pronunciation of all questionable words.

3. Students will select appropriate musical background for their script and devise a signal to indicate that the filmstrip/slide must be advanced. They must divide the script so that each member of the group reads equal amounts on the tape.

EVALUATION: 1. Each group will submit a log of activities and list the responsibilities, duties and attitudes of each member within that group. This log will include techniques, ideas, and notes gathered from previewing commercially prepared tapes and filmstrip/cassettes.

2. Each group will be given this evaluation design prior to their taping. The teacher will use this form to evaluate the tape of each group. The group grade will be the grade of each individual within that group and in the term average will have the same weight as a test.

Evaluation Design

Your tape will be rated in the following areas on a scale of 1 to 5, five being the best. This will be averaged as a quiz grade.

	1	2	3	4	5
1. Mechanical clarity of tape	—	—	—	—	—
2. Enunciation	—	—	—	—	—
3. Pronunciation	—	—	—	—	—
4. Effectiveness of music	—	—	—	—	—
5. Timing	—	—	—	—	—
6. Effectiveness of advance signal	—	—	—	—	—
7. Group cooperation and conduct	—	—	—	—	—
8. Equal distribution of work load per student	—	—	—	—	—

The following point-grade scale will be used:

Points	Grade
40	100
39	98
38	95
37	93
36	90
35	88
34	85
33	83 etc.

James Dunn

A SHORT STORY UNIT

This short story unit has the following goals:

1. To acquaint students with basic terminology (theme, setting, character, point of view) through class discussion of stories read in common.

2. To give students the opportunity to read many short stories following their individual interests.

3. To have students react to stories in some creative fashion other than analyzing or writing about them.

4. To have students get experience in arranging and working in small groups using the analysis of a short story as the focal point.

"The Frill" by Pearl Buck and "Quality" by John Galsworthy are two short stories admirably suited for ninth grade students. Both stories are simple enough to be understood by a majority of students, yet both contain rich ideas and interesting characters for discussion. Both stories are studies of men of ideals, men who are caught up in social systems which "defeat" them. Both stories raise important questions about dignity and how it is achieved and success and how it is defined.

The main character in "The Frill" is a hard working, thoroughly decent, and compassionate Chinese tailor. The story is about his attempts to please a female bigot for whom he is making a dress. Red-faced, portly Mrs. Lowe, the prototype ugly American, likes to "manage" people. Her friend, Mrs. Newman, is a whining sycophant who agrees with Mrs. Lowe that all Chinese are disreputable schemers, have low morals, and smoke opium. In order to save a few dollars and also to demonstrate her superior handling ability, Mrs. Lowe says, "Watch me," and proceeds to debase and unman the poor tailor.

The character of the tailor is in direct contrast with Mrs. Lowe. He is poor, but he takes on the support of his dead nephew's wife and three children. The tailor and his wife live amidst reeking squalor, but the tailor achieves his dignity through hard work and respect and compassion for others. He eases the death of the nephew by telling him, "You're not to worry. Rest your heart. I have work .... We shall do very well." The tailor works through the night to make a frill for Mrs. Lowe's dress. He does a professional job. Instead of thanking him Mrs. Lowe grudgingly pays him five dollars. The tailor hopes to get more work so that he might buy a casket for the nephew, but Mrs. Lowe curtly dismisses him. The next day Mrs. Lowe shows off her new dress to pathetic Mrs. Newman at a garden party. Mrs. Newman observes that the frill has been nicely constructed. "Yes it is nice, isn't it? ... And so cheap! ... It's as I said -- you simply have to be firm with these native tailors."

What makes Mrs. Lowe's treatment of the tailor so chilling is that she seems to be totally unaware of the harm she has done. The story carries little hope of repentance or remorse. Mrs. Lowe, in fact, is rather proud of her ability to manipulate the tailor. The tailor's lot is not a happy one nor does there seem to be much of a chance for improvement. "The Frill," then, provides readers with some disturbing insights on man's relations with his fellow man.

"Quality" is a story about Mr. Gessler, a shoemaker. Gessler is a craftsman. He believes in making quality boots and thinks advertising is immoral. Even though he makes boots for the Royal Family, Gessler does not advertise this fact. Gessler's devotion to his work is such that he eventually starves to death, a victim of firms that mass produce boots and drive him out of business.

Gessler is a victim who does not deserve his fate. He has committed no offense other than being unwilling to adapt himself to a system he does not believe in. To Gessler bootmaking is an art. When his customer, the narrator of the story, showed up at his shop wearing a pair of boots made by a big firm, he said, "Dose are nod by boods." Normally a mild mannered, soft spoken man Gessler said, "Dose big virms 'ave no self respect. Drash!" Gessler realizes the implications of mass production and he is bitter.

The story rolls relentlessly toward Gessler's death. Each time the man comes to the shop he finds conditions worse than in his previous visit. Gessler's physical appearance is steadily deteriorating. Ironically, Gessler's craftsmanship is a direct cause of his own death. His well-constructed boots refuse to wear out. Gessler knew not of planned obsolescence. Finally, he dies. At his final visit to the shop the narrator finds a new shoemaker, a bright, cheery young man who announces, "We make for some very good people." Gessler's epitaph is "He made good boots."

The story raises serious questions about the side effects of progress. Is it progress when individuals such as Gessler are crushed in the progress? Does the craftsman have a place in an industrial society? Do ideals make sense when one's commitment to them requires the sacrifice of life itself? The story doesn't answer these questions; it poses them for the reader to wrestle with.

The following are typical questions used with students to initiate discussion of "The Frill."

1. Find a quote by Mrs. Lowe which indicates some facet of her character. Discuss what the quote reveals about her. (Students might choose pg. 322 "My dear, the only way to manage these native tailors is to be firm!" Pg. 323 "Watch me, now." Pg. 325 "Boy, look see tailor -- see he no take something." Pg. 332 "My dear, with all this frill the dress cost only five dollars to be made -- that's less than two dollars at home!")

2. In what ways are Mrs. Lowe's physical characteristics reflective of her personality? (Her fat, red-faced carcass is indicative of her self indulgent, spoiled, and greedy personality.)

3. The story takes place in two settings. What are they? Is each appropriate for the action that takes place in it? Why? (Mrs. Lowe's life of teas, garden parties, and conversations with zeros like Mrs. Newman are what one expects of a shallow person. Conversely, the grinding poverty of the tailor's home serves to highlight his ability to spiritually rise above his situation. He achieves dignity despite adversity.)

4. Was the tailor a failure or a success in life? (Hopefully a discussion of what success and failure really are will ensue. Students might discuss the dignity and value of all work. Important questions in any age, but especially in ours, I think.)

5. Is Mrs. Lowe a believable person? Why or why not? Have you ever met anyone like her? What motivates people to act as Mrs. Lowe acts? (Questions such as these, although speculative, often lead to interesting discussions of what prejudice is and examples that students have encountered.)

The following are typical questions used with students to initiate discussions of "Quality."

1. Characterize Mr. Gessler. Cite words or actions which prove your contentions. (Most students see Gessler as a man of ideals, and one who refuses to compromise them. His starvation proves this. He is a craftsman, a person devoted to doing a job well. Occasionally some students will characterize Gessler as a foolish person. They see his refusal to advertise nonsense. Students will then take sides arguing the point. Great stuff.)

2. Explain Mr. Gessler's bitterness on pg. 526. What does "Dey get id all" mean? (Gessler, usually unobstructive, reacts to a system which has no place for him. The injustice of the situation rankles him when little else does.)

3. What is the difference between "the young man with an English face" and Mr. Gessler? (The new shoemaker has no concept of Gessler's ideal. Making shoes is his job, a way to make money, but any idea of craftsmanship is foreign to him. The fact that he succeeds Gessler makes Gessler's death all the more ironic.)

4. State the theme of the story. (For example, men of ideals often pay a very high price for refusing to compromise them. Or, the injustice of a social system which has no place for a man of ideals. Or, people want quantity not quality in the goods they purchase. Such answers lead to a discussion of the advantages and disadvantages of life in an industrial society. It is important that students realize that somebody pays for progress and that progress does not necessarily mean a better life for all.)

5. What is planned obsolescence? Give examples. What would Mr. Gessler say about such action? Do you see any good in such a policy? (Discussions of this idea are usually a hit or a resounding flop. Some classes do not react to such an idea; others dig right in.)

Usually one class period for discussion of each story is sufficient. The third class period is an ideal opportunity to tie the stories together, to get the students to think, and to do some composition work. An in-class theme is appropriate. The students are allowed to use their books; they must, however, be finished at the end of the period.

Directions: Write a unified essay on one of these three questions. Support your opinions with evidence from the text.

1. Both the Chinese tailor and Mr. Gessler are dignified men. What evidence in the stories is there to support this statement?

2. Both the tailor and Mr. Gessler are victims of social forces, victims of fate. How did each cope with the circumstances of his life? Is either or both a failure?

3. Mrs. Newman in "The Frill" and the "young man with an English face" in "Quality" are minor characters. What function does each serve in the stories?

After discussing and writing about short stories as a class I like to set the class loose for group and individual work. The following project, which defines specific requirements and sets time limits for their accomplishment, achieves this goal very nicely. The project allows students to gain experience in arranging their own work schedules, and it provides an opportunity for some creative work. While held responsible for minimum requirements, students are urged to do more.

SHORT STORY PROJECT

During the next three weeks you will be working individually on a short story project. There is a minimum amount of work required of everyone, but you are encouraged to do more.

Choose your three activities (explained below) very carefully. Select ones which you can do well. There is no sense, for example, in choosing to do a drawing or a painting if you have no artistic talent.

MINIMUM REQUIREMENTS:

1. From Short Stories by Schweikert read a story which we haven't discussed in class. Make up two essay questions and then answer them.

2. Read four short stories in Great Tales of Action and Adventure and for each explain why it is or is not a "great tale."

3. Make a collage representing one character in a short story.

4. Read as many short stories as possible and write a brief (no more than three or four sentences) reaction to each. In your reaction try to deal with a theme or an important idea contained in the story.

SOURCES: Short Stories by Schweiker, Great Tales of Action and Adventure, and any of the short story books shelved in the library.

ACTIVITIES:

1. Imagine you are one of the characters in a story and write a diary about your thoughts and feelings and events in your life.

2. Write a letter to a character in a story, giving him advice. For example, you might suggest to Mrs. Lowe that in the future she should treat Chinese with less prejudice and explain why.

3. Form a panel and conduct a discussion about a story.

4. After determining the theme of a particular story, attempt to prove that it is a valid or invalid way of viewing the world.

For example, if the theme of "Quality" is that people with ideals must sometimes pay a cruel price for maintaining them, cite evidence from your knowledge of the world that proves this theme true or false.

5. Explain which character you are most similar to.

6. Illustrate a story with photographs -- taken by you or clipped from magazines -- or with a drawing or painting by you.

7. Spend a day being a character that you particularly enjoyed or disliked. Notice how people react to your new personality and how you yourself react. Describe this experience.

8. Devise your own activity, subject to the teacher's approval.

NOTES:

1. We will see three movies.
   "My Old Man" by Ernest Hemingway
   "Bartelby" by Herman Melville
   "Occurrence at Owl Creek Bridge" by Ambrose Bierce

2. For each activity identify the title and author of the story you are working with.

3. Each student has a folder for his work.

4. Organize your time; plan ahead. Pass in requirements according to the the time schedule or earlier if you wish.

Grade Nine

TEAM TEACHING - READING AND RESEARCH

Reading teacher Librarian English teacher

Recognizing the reading difficulties of his ninth grade class, an English teacher sought the assistance of the director of the reading center. Survey tests indicated the varying degrees of reading problems within the group. The reading teacher then outlined a course of study to be adapted to student needs.

Throughout the project the students met with both teachers twice weekly in the reading center. This enabled them to have the advantage of using facilities and materials available there. The Language Master, Tachistoscope, and overhead projector with transparencies provided a variety of learning experiences. The reading teacher began a program of study with special emphasis on the mechanics of reading: recognizing words and meanings, grasping sentence meaning, spelling.

When the students demonstrated progress in these areas, they advanced to a study of comprehension skills as background and preparation for high school. Focus of this study centered on finding the main idea, summarizing, outlining, and skimming. For practical purposes, students were assigned topics for research. After having chosen a topic of interest, they wrote a series of questions they hoped to have answered. From these questions they drew their outline.

Interest in the research grew to the degree that the librarian joined the group. He showed students the procedure for writing notes from an encyclopedia in their own style rather than copying from the text. Moreover, he instructed students in the skills necessary for using the card catalog and the Readers' Guide. He also proved to be an invaluable resource person for locating texts and materials for individual reports.

The final student product was the research report complete with title, outline, body, and bibliography. This was no small accomplishment for a group who had had initial reading problems. They responded to the interest of the teachers and librarian and did well because high standards were expected of them. Visitors to the class and others reading the student reports attested to the quality of the research and writing done by the students.

A team teaching situation such as this involving three instructors will be as successful as the cooperation of the participants warrants. The fact that the English teacher continued the activities after the sessions in the reading center indicated his commitment. The research information offered by the librarian added a new dimension. The project provided a learning experience for both students and teachers.

Marian Ridgeway
Mahoney Junior High School

Ninth Grade

SHAKESPEARE FESTIVAL

Activities to be used with any of Shakespeare's plays:

Research the settings of Shakespeare's dramas with the aid of special maps of the locales.

Print in the English of Shakespeare's time a handbill or poster advertising one of the plays.

Sketch famous characters for bulletin board displays.

Create sketches and models of the Globe Theater.

Research the history of furniture of the period.

Study the importance of music to the Elizabethan actor who often was required to sing and dance.

Dress dolls representing Shakespeare's characters in Elizabethan costumes.

Make use of slides, filmstrips and recordings dealing with Shakespeare's life and times.

Show filmstrips on Globe Theater.

Present a modern skit rewritten in Shakespearean language.

Keep a list of archaic words or expressions.

Show changes in usage and word meaning which have occurred through the years.

Keep a list of mythical references found in the plays.

Find examples of Shakespeare's use of dramatic irony.

Provide for an exercise in writing blank verse.

List rhyme tags used to end scenes.

Note the playwright's use of similes.

Collect and display Old English recipes.

Grade Nine

James Dunn

POETRY UNIT

The purpose of this project is to help students appreciate poetry by writing poetry.

Students are presented individual forms of poetry spread out over a period of weeks. A suggested procedure would be to show examples of the form, to read and discuss them, and finally to explain the "rules" for writing the form, e.g. the rhyme scheme of a limerick. Let the students write and share the results.

To give focus to the project have each student keep all of his work in a folder. His final task will be to select his best work and arrange it in a small anthology of his own poetry. Encourage students to use their artistic talents in illustrating their booklets. An alternative to this procedure would be a class anthology. Set up an editorial board and an arts department within the class. Discuss the ground rules for selecting poems. Students might decide to put only the "best" poems in the anthology or they might decide to include at least one poem from each person in the class.

Participation in this project will help students understand:

1. That one of poetry's features is its great compression, its ability to say much with few words.

2. That rhyme is used to emphasize and support meaning. It is not merely an artistic appendage.

3. That many ideas cannot be approached directly and that poetry can help us deal with the mysterious beauties and tragedies of our lives.

4. That poetry is not confined to any particular subject.

5. That the best poets are sensitive, feeling people who constantly seek ways to know themselves and the world they live in.

Suggested Activities:

A. "Warming up" exercises - from <u>English Through Poetry Writing</u>, Brian Powell

Compose specific vivid phrases for
1. a terrifying sight with an alarming sound
2. an expensive automobile

Make a list of sound words, arranged in order of intensity dealing with:
1. animal noises (begin with "squeak")
2. explosives (begin with "pop")

Give examples of:
quiet words, slow words, quick words

Write a line to suggest
a horseman riding, a child asleep

Describe as precisely as you can:
the smell of an old attic
the feel of a dog's nose

Using images wherever possible, discuss:
the taste of chocolate ice cream
the color blue

Complete the following:
as bitter as
with sharp blue eyes like

B. The Limerick

Show examples:

There was a young man of Derizes
Whose ears were of different sizes
The one that was small
Was of no use at all
But the other won several prizes

Present a sample limerick without the last line and have students supply one. Example:

They've buried a salesman named Phipps
He married on one of his trips
A widow named Block
Then died of the shock
- - - - - - - -
Original ending (When he found there were five little chips)

Give rules for writing limericks:
Lines 1, 2, 5 rhyme as do 3 and 4
Line 1 tells who and where from
Line 2 describes or tells a peculiarity
Lines 3 and 4 build up this peculiarity
Line 5 rounds off the limerick with an unexpected twist

Write a limerick.

C. Haiku

This is a Japanese form of poetry which sketches in three lines a mood, a moment of truth, a reality.

Characteristics:
1. uses common language
2. contains some reference to nature
3. refers to a particular event
4. presents the event as happening now
5. conveys an emotion by describing the circumstances that aroused it
6. requires that writer be objective, impersonal
7. creates a camera-like action

Form: 17 syllables in three lines
line one - 5
line two - 7
line three - 5

Sample:

Sandpipers chased by sea
Turned and chased
The sea back again.

D. "The Me Nobody Knows"

The Broadway musical of this title was based on a collection of the writings of school children. The original cast album of the show should be used as resource material for class discussion. The introductory poem was written by a boy aged 15.

"I have felt lonely, forgotten or even left out, set apart from the rest of the world. I never wanted out. If anything I wanted in."

After hearing the recording, students discuss the poetry and then are encouraged to write their own.

STUDENT WRITING
Memorial Junior High School

In the black of the night
The roaring of the sea
Breaks the silent night.

There once was a girl named Milly
Who thought baseball was silly
She was ugly and fat
But a terror at bat
Now she's a Philadelphia Phillie.

Why do birds fly
and not I?
Why are flowers free
and not me?
I want to be.

Window panes and rain
Lone and silent friends content
With viewing gray clouds.

Hawk
Graceful, swift
Swooping, hunting, looming.
Jets circling for a landing
Predator

An old can
Being kicked around
And stepped on
Rebels
And cuts someone's foot.

STUDENT WRITING
Memorial Junior High School

Eight o'clock already!
The alarm clock chimes repeatedly
Tom rolls over
And dreamily clicks the button
Steadily running water
In the bathroom
Makes the bedroom walls quiver
The room is chilly
Forcing us to dress quickly.
Breakfast is crammed down
As a honk is heard from outside.
"Take your umbrellas!"
Mom yelled from upstairs.
But we see not a cloud
And the sun is brightly shining
Beckoning us out.
Giddily we run out to the bus
Drunk with sunshine and freedom.
And forgetting the umbrellas.

A ringing bell interrupts my daydream...
Running out of the school
I separate from the others and wait for Tom.
When he arrives we start for the bus.
The rain sneaks up on us without warning.
Joining hands we begin to run
And reach the stop only to see the bus disappear
Around the corner.
The walk home is long
And the rain falls against us unceasingly
But the door is just ahead-
Locked.
We bang and the door is opened by mother.
She throws up her hands in shock
But soon recovers
And points her long, slender finger toward the stairs.
And Tom and I begin our long climb.

STUDENT WRITING
Memorial Junior High School

You are gone.
I stand here, surrounded by others in mourning,
yet very much alone.
In trying to find reasons for your death, I have become lost
in a maze.
I am ready to climb the walls that enclose me--
keeping me from understanding the world about me.
My being is filled with emptiness.
I am watching all the shattered people about me,
Wanting to offer a word of condolence--
But there is nothing to be said.
I cannot accept this myself.
I feel that I shall never understand why you are gone;
I pray that I shall be cleansed of my pain and anger
at your loss.
I find comfort in believing that wherever you are,
you are well.
Still, this is not enough.
I must understand if I hope to live with your loss
and find courage to face tomorrow.

Solitary mourner
Stands at the flower strewn grave
With a tear-stained face.

Only as a passing stranger have I known you,
But as a friend I mourn your death.
Like those who know you well, I'm going to miss you,
And weep as I wonder where you are and if I'll ever see you.
I pray for you now, and ever will I remember you,
we all shall.
We shall treasure our precious and few memories of you,
And think of the good wrought by you on this earth that
no longer is your home.
We shall not lose our love for you, or our longing to
have you in our midst once again.
I pray I will see you again one day,
in death.

CONSUMER EDUCATION IN THE ENGLISH CLASS

1 2 3 4 5 6 7 8

OVERVIEW: Advertising is one of the most effective modern methods of communication. Much advertising involves a sophisticated use of language, music, and psychology. A study of such reveals the "Madison Avenue Approach."

Consumer deception takes many forms as advertising creates a particular kind of world. The language of advertising plays a role in "what makes for the good life." Motivational analysts are hired by advertising agencies to study human behavior that they may more "effectively manipulate our choices." Analysis of advertising practices may aid the student to become more discerning in questioning the honesty of such claims and have a better understanding of what Vance Packard calls "marketing eight hidden needs."

OBJECTIVES:

1. Decision Making: The student will develop skill in discerning truth in advertising.

2. Work Awareness: The student will examine role of workers in the community.

3. Manipulative Skills: The student will use manual skills essential to many careers.

4. Economic Awareness: The student will investigate consumer resources.

5. Relevance of Education: The student will recognize the communicative skills basic to career fields.

RESOURCES:

Consumer Advertising, Proctor and Gamble Educational Services

I Can, State Department of Educational and Cultural Services, Augusta

Packard, Vance. The Hidden Persuaders

Randall, Robert. Consumer Purchasing

Schrank, Jeffrey. Persuasion Box

Scholastic Scope

"Why Are American Consumers Angry?" April 5, 1971, pp. 4-11
"Scope Visits an Ad Agency" February 7, 1974, pp. 4-12
Tab Creative Unit - Values/Advertising

Those Were the Good Old Days: Advertising 1880-1930

ACTIVITIES:

1. Read assigned materials.

2. Listen to ads taped from popular television programs and attempt to identify commercials whose brand names have been erased. Recall suggests the impact of such advertising.

3. Read of the effectiveness of the Maine Consumer Fraud Division in combating fraudulent practices involving: a drug store chain, a mobile home manufacturer, door-to-door salesman, correspondence school editors.

4. List products or brand names found in homes but not advertised on television.

5. Engage in group activities involving Nader Raiders, researchers, copywriters. Project is to be found in Values/Advertising Unit.

6. Visit a company such as Donnelly Advertising to see in action: artists, photographers, and creative writers.

7. Invent a name for a product and write a slogan for it creating a magazine ad using words, pictures, color.

8. Discuss the part advertising played in causing you to buy something you did not need.

EVALUATION: 1. List facts found in ads recognizing that truth may be distorted by omission.

2. Compare early aspects of advertising to newer styles.

3. Identify three of following types of appeal to be found in advertising and collect for bulletin board display ads demonstrating these appeals: Unfinished Claim, Humble Approach, Weasel Words, Vague Claims, Statistics, Happy Family, Snob, Ecology/Public Service, Symbols.

4. Prepare a comparative advertising survey based on ads from two or three different types of magazines.

5. List work of advertising employees witnessed on field trip.

6. Compare tapes of television commercials presented in other areas of the country to those viewed in their own locality.

7. Write radio commercials. Since there is no visual dimension, there will be greater awareness of the power of words. Music and sound effects may be added.

8. Prepare a script for a commercial or create an advertising transparency which the class will evaluate.

INTRODUCTION TO CAREERS
Memorial Junior High School

Course Objectives	Course Activities	Resources
Unit I Where Am I Going?		
The student will become familiar with the goals and content of this course.	1. Take a pretest over values and attitudes. 2. Discuss objectives and goals. 3. Discuss course product and evaluation.	Introductory films and filmstrips Vocational Development Inventory Sheet Career Education Program, J.H. III
The student will gain information about his interests and aptitudes as related to a career choice.	1. Take a series of tests. 2. Make a profile. 3. Discuss options and deciding intelligently.	Self Directed Search Scope, "Jobs In Your Future, pp. 12-15 Deciding, pp. 21-43 Temperament Check List Sheet Argus Posters: "Winners or Losers" "Big and Little Talkers" "Feelings and Thoughts"
The student will become aware of the purpose of the Job Shadowing activity.	1. Review past shadowing experience. 2. Discuss apprentice and volunteer work as pre-career experience.	Slides or movies on previous Job Shadowing experiences Review comments of past participants Guidance personnel
The student will select a career or careers to be explored.	1. Review lists of businesses which have participated in the past. 2. Add and update the list with new alternatives. 3. Select career matched to profile of each student.	Lists of businesses Telephone directory Guidance personnel Career Resource Center Deciding, pp. 33-45
The student will identify the kinds of information needed to research a career.	Discuss: salary, skills and training, working conditions, demand, job security, related careers, prestige, pressure, authority, responsibility.	Learning Discussion Skills Through Games "Finding the Right One"-Prime "After High School-What?" - Prime "Choosing Your Career" S.V.E.

Course Objectives	Course Activities	Resources
The student will identify the sources of information on careers.	List resource people and create file cards for Career Resource Center. Research: SRA, DOT Occupational Outlook, films, filmstrips, library.	Career Resource Center "Choosing Your Career" S.V.E. Newspapers State Employment Bureau C.G.I. Report
The student will demonstrate his understanding of the kind of product he will prepare.	Discuss methods of presenting the above data: notebook, slides and tapes, films, charts, bulletin boards, dramatization, card file, role playing, debates.	Career Resource Center (displays and bulletin boards) Guest speakers from advertising firms Company films and filmstrips Prepared tapes
Unit II How Do I Get There?		
The student will complete a research project which will demonstrate his understanding of his career choice and/or shadowing experience.	Independent activities: 1. Keep fact-notebook a. career-general b. specific company 2. Do pre-shadow interview, product analysis, market research. 3. Study interrelatedness of company with others.	Career Resource Center Guidance personnel Specific companies DOT SRA Work Kit C.G.I. Report
How Do I Find a Job? The student will list resources for job location.	Consult relatives and friends. Interview speakers from various agencies. Visit employment agencies. Follow-up want ads by visits to companies.	Newspapers Speakers Scope, "Jobs" pp. 52-53 "Tips for the Young Adult" "Finding a Job Opening" SVE
How Do I Get a Job? The student will demonstrate his skill in applying for a job.	Fill out job applications and Social Security card forms. Write resume. Role play interviews. Tape interviews. Interview guest speakers.	Scope, "Jobs" pp. 54-56 "The Job Interview" S.V.E. "Your Job-Applying for It" - Prime C.G.I. Report
How Do I Keep a Job? The student will identify the appropriate inter-personal skills which build success in a job.	Discuss: More people lose jobs because they can't get along with others than for any other reason. Show filmstrip on group interaction.	"Your Job-Fitting In"-Prime "Your Job-Good Work Habits"-Prime "Your Job-You and Your Boss" Scope, "Jobs" pp. 66-69 "Your First Months on the Job"-S.V.E.

Course Objectives	Course Activities	Resources
	Interview a business person on office practices and procedure. Role play telephone manners or "how to lose customers." Show posters and films on grooming.	"Prepackaged Personalities" "Telezonia" - Prime "How to Lose Your Best Customer Without Really Trying"
What Conditions of Employment Should I Know About?		
The student will become aware of state labor laws. The student will become aware of laws and benefits of Social Security. The student will become aware of professional and labor organizations. The student will become aware of the job experiences of his peers and the jobs available in the community.	Study various documents. Role play test cases concerning labor or Social Security laws. Interview guest speakers from bureaus. Discuss relationship of part time jobs and volunteer work to careers.	Scope, "Jobs" pp. 76-79 "Your Job-Getting Ahead"-Prime Guest speakers
When and How Do I Change Jobs?		
The student will study career development as an on-going process that involves continued examination of goals.	Interview speakers who have changed jobs. Conduct interviews with unemployed workers. Examine related work fields. Survey job changes of faculty and parents to determine frequency and pattern. Study future job development possibilities.	People in the community Historical patterns (American history) Future speculations (Science fiction) "Pulling up Roots" - Argus poster
The student will examine present and future educational goals as they relate to future careers.	List school subjects in order of importance to careers. Set realistic goals for entry level and post-entry level education. Examine relation of education to lifestyles.	

Course Objectives	Course Activities	Resources
Unit III **What Will My Life Be Like?**		
The student will identify some of the financial, sociological, personal and environmental factors which are dictated by one's career. Every student will obtain a Social Security card by the end of the course.	Plan a budget Figure income tax, social security and hazards. Discuss: differences between wants and needs, job risks, social and personal demands of the job, advantages and disadvantages of large and small companies, staying in Maine or moving and how frequently, recession, sex stereotyping.	"Sears Monthly Finance Plan" "Credit Counseling Centers" Scope Visuals TV 2463 "Getting Applications Right" "If I Had a Million"-Argus "Manage Your Money"-Prime Hazard cards "The Struggle for Women's Rights" - Prime "Women in the World of Work"-Prime
The student will identify those leisure time activities which are or could be satisfying to him.	Survey current trends of leisure activities and collect data on cost, time and availability. Demonstrate current hobbies and activities. Survey leisure time activities in terms of relaxation value.	Magazines Senior Citizen Groups Speakers Films Catalogues
Unit IV **Where Do I Stand?**		
The student will identify the ideas learned during the course and present them to the class. The student will establish positive directions for the future and demonstrate a critical attitude toward his goals.	Seek out part-time or volunteer work related to a future career. Use test data to set up High School course of study.	Post tests: V.D.I. Career Education Program "Where Am I Going? - Another Look" J.M. 351

Grade Nine

SELF AND CAREER EXPLORATION
Mahoney Junior High School

Objectives	Activities	Resources
Introductory Unit Who Am I?		
The student will become familiar with the goals and content of the course.	Take pretest. Discuss goals and objectives of the course.	Pretest Course outline
The student will develop an interest and career profile.	Take personality and career test. Discuss options and choose from alternatives. Evaluate self on basis of responses on worksheet. Check partner's rating on same testing. [Note] Throughout the course, the student will seek a speaker or film to expand his interest in the study of career choice.	Self-Directed Search "Choosing Your Career" SVE Worksheets: "My Occupation" "Education and Training" Optional Materials: "Vocational Development Inventory" "Temperament Check List" "Personality Rating Sheet"
The student will identify those leisure time activities which are or could be satisfying to him.	Complete inventory sheet revealing use of leisure time. Demonstrate current hobbies. Discuss current trends of leisure time activities and prepare data on cost and time. [Note] Participate in Mahoney Hobby and Crafts Show.	"How I Use My Leisure Time" Senior citizens' groups Community resource members
Unit I Where Am I Going?		
The student will examine present and future educational goals as they bear on future careers.	List school subjects. Examine relationship of education to life style. Set realistic goals for entry level and post-entry level education. Discuss relationships of part-time jobs and volunteer work to careers.	"My Life Style" Let's Explore Your Career pp. 25-28 Scope, "Jobs in Your Future" pp. 76-79

Objectives	Activities	Resources
The student will identify the kinds of information needed to research a career.	Discuss: salary, skills, training, working conditions, demand, job security, related careers, prestige, pressure, authority, responsibility. [Note] Each student will participate in Job Shadowing at some time during the course. Job Shadowing is described in detail on pages 91-92 of the guide.	Choice of films: "Finding the Right One"-Prime "After High School, What?" Prime
The student will identify the sources of information on careers.	Investigate: SRA, DOT, Occupational Outlook Invite speaker from State Employment Bureau Optional Activities: Add career consultant cards to file in Resource Center. Attend Career Guidance Institute.	"Scavenger Hunt Project" in Career Resource Center Career Guidance Institute Report
The student will demonstrate his understanding of the kinds of product he will prepare.	Study alternative methods of presenting reports: notebooks, slides and tapes, films, charts, bulletin boards, card file, debates, role playing, dramatizations. [Note] Throughout the course students will be asked to update bulletin board displays.	Career Resource Center or Class Displays and Bulletin Boards
Unit II. <u>How Do I Get There?</u>		
The student will complete a research project which will demonstrate his understanding of his career choice.	Prepare responses based on physical and geographical aspects of job. Make job description cards for career researched.	"Career Worksheet"
The student will list resources for local employment opportunities.	Identify sources of job opportunities: family, friends, public and private employment agencies, guidance counselors, placement offices	Speakers from agencies <u>Scope</u>,"Jobs in Your Future" pp. 52-60 "Tips for Young Adults" S.V.E. "Finding a Job Opening" S.V.E.

Objectives	Activities	Resources
The student will become aware of job experiences of his peers and of jobs available in the community.		"Your Job - Applying For It" Prime
The student will demonstrate his skill in applying for a job.	Fill out application forms and social security card forms. Interview speaker from social security agency. Discuss with speaker: What is social security? Write a resume. Role play interviews.	Company applications Social Security films: "4 e.g." "After the Applause" "The Job Interview" - Prime
The student will identify the appropriate interpersonal skills which build success in a job.	Discuss: "More people lose jobs because they can't get along with others than for any other reason." View film on group interaction. Role play telephone manners.	Argus Posters and Sheets: "Big and Little Talkers" "Winners or Losers" "Your Job-Fitting In"-Prime "Your Job-Good Work Habits" Prime "Your Job-You and Your Boss" Prime Scope, "Jobs in Your Future" pp. 66-69 "Your First Months on the Job" S.V.E. "How to Lose Your Best Customer Without Really Trying"
The student will study career development as an on-going process that involves continual examination of goals.	Survey parents and faculty to determine frequency and pattern of job changes. Interview people who have changed jobs as well as unemployed workers.	Resource people: Community members Family and faculty Argus Poster: "Pulling Up Roots"
Unit III. What Will My Life Be Like?		
The student will identify some of the financial, sociological, personal and environmental factors which are dictated by one's career.	Plan a budget. Figure income tax and social security. Discuss differences between wants and needs. Question job risks and the social and personal demands of a job. Discuss sex stereotypes.	"Manage Your Money" - Prime "Sears Monthly Finance Plan" "Struggle for Women's Rights" Prime "Women in the World of Work" Prime

Objectives	Activities	Resources
	Consider advantages and disadvantages of large and small companies. Consider question of staying in Maine or moving to another locality.	
Unit IV. Where Do I Stand?		
The student will identify the ideas learned during the course and present them to the class.	Seek part time or volunteer work related to a future career.	Post Test "Vocational Development Inventory" "Where Am I Going? Another Look"
The student will establish positive directions for the future and demonstrate a critical attitude toward his goals.	Use test data to set up high school course of study.	
Unit V. Values	THE VALUES COMPONENT OF THE COURSE IS TAUGHT BY GUIDANCE COUNSELORS FOR A THREE WEEK PERIOD.	
Part One The student will know the names of his classmates and some facts about many of them.	Lesson: Getting Acquainted Permit students to arrange themselves in alphabetical order without any assistance from the teacher. This reveals leaders, followers, organizers. Interview other students and prepare fact sheets. Sit in semi-circle. One at a time, students go to the board, write their names, an interest, like or dislike, an extra-curricular activity. Conduct question session. Each student answers a question about himself.	Development of Classroom Workshop in Oral Communication Learning Discussion Skills Through Games, Skill 1, p. 19 Learning, Problem 5, p. 64
Part Two The student will develop skills in listening, participating, and in demonstrating respect for the opinion of others.	Lesson: Interacting Interview five people - parent, counselor, teacher, pastor, another teen, to determine similarities and differences in their solution to the same problem. Who ultimately must decide?	Learning Discussion Skills Through Games, Skill 3, p. 23 Learning Discussion, Skill 6, p. 36

Objectives	Activities	Resources
	Student is given an essential piece of information which is a clue to a murder mystery. The game which follows forces the group to organize for problem solving. Assign a question or an issue for discussion. Two students are appointed to discuss both sides of the question. Later, three students summarize the differences. Students presenting the argument judge the most accurate summary.	
Part Three The student will identify group roles and identify his role in a number of groups.	Lesson: Group Roles Discuss role as member of the family group. Consider role as member of the school community. Recognize need to learn new roles in a discussion group. Study dangers of seeing people as stereotypes. Invite community workers who don't fit sex career stereotypes - female mechanics, male nurses.	Planning Your School Life "Family Relationships" Unit 2 Getting Along with Your Parents Making Value Judgments, Chapter 3 - "Is there a generation gap in my family?" Making Value Judgments, Chapter 4 - "What is my role at school?" Planning Your School Life "You and Your School" Unit 3 Making Sense of Our Lives "In Crowd" Poster and Sheet Learning Discussion Skills Through Games, Skill 9, p. 41 Making Value Judgments, p. 113
Part Four The student will identify and share his interests with his classmates.	Lesson: My Interests List occupations one rejects as a means of revealing interests. Review chart of interest areas. Assume responsibility for contributing to group discussions on interests. Discuss opportunities to develop new interests. Compare current interests with those of two years ago and identify reasons accounting for change.	Let's Explore Your Career pp. 5,6,7,8 Learning Discussion Skills Through Games, Skill 4, p. 31 You, Today and Tomorrow Chapter 5

Objectives	Activities	Resources
Part Five The student will use interviewing techniques, charts and other methods to discover his skills.	Lesson: My Skills Interview previous elementary teachers or favorite junior high teachers to learn their judgment of student's strengths. Complete ability charts to match activities and abilities.	You, Today and Tomorrow Chapter 3 Let's Explore Your Career "My Self Ability Summary" pp. 22, 23, 24
Part Six The student will be able to find and discuss his feelings.	Lesson: My Feelings Discuss the question: "Does self-respect require continued feedback from others?" Complete activity which distinguishes between feelings and thoughts.	Making Sense of Our Lives Sheet "Feelings and Thoughts"
Part Seven The student will discover and be able to state his values.	Lesson: My Values Recognize that making decisions involves those things one values. Then consider personal values. Study the ways that abilities, values, and interests may work together. Consider, "What if they conflict?" Consider three sources of values: religion, family, society. Study and identify present American values. Change values to clearly stated objectives.	Deciding "Values Unit" p. 10 Deciding, p. 11 You, Today and Tomorrow p. 57 Making Value Judgments Chapter 1 Deciding, p. 15 Deciding, pp. 17 & 18
Part Eight The student will identify and share his interests, skills, feelings, and values with his classmates.	Lesson: Combined Self Awareness Discuss: "Who has influenced who you are today - family, travel, sports?" "Whom do you go to for advice?" "With whom do you share successes?" Write: journal entries autobiographies personal rating inventory	Sheets: Journals Autobiographies Personal Inventory Making Sense of Our Lives "What Kind of Talker Are You?"

Objectives	Activities	Resources
Part Nine	Lesson: Expanding the Imagination	
The student will improve his skill in using his imagination creatively.	Make a collage of pictures that represent student's personality. Make a collage of pictures showing likes and dislikes. Use technique to rid self of unwanted traits, habits, qualities. Learn to become a "self scientist" by questioning issues important in one's life.	"Magic Can" "I Urge Telegram"
Part Ten	Lesson: Decision Making Skills	
The student will be able to list the kinds of information required in good decision making. The student will be able to list alternatives. The student will be able to describe common decision making strategies.	Identify alternatives in decision making. Play "Options" - a computer game. Consider acceptable and unacceptable alternatives. Evaluate possible sources of information in making a decision. Consider the role of values in risk taking and choose from probabilities. Complete exercises in the four strategies: wish, escape, safe, combination.	All activities from Deciding pp. 21 and 22 pp. 23, 24, 25 p. 26 p. 29 pp. 35-40 pp. 41 - 45

PROJECT: JOB SHADOWING

The Problem

Mahoney Junior High School has been involved in a three-year, federally funded project in Career Education called Project REVAMP. What seemed to be the most difficult part of the project was "Hands-On," an experiment involving ninth graders. The objective of this experiment was to familiarize all ninth grade students with the realities of various career fields.

After much thought and many discarded ideas, we devised a very simple plan which we called Project: Job Shadowing. Under this plan, each student spent one complete day with a parent, friend, or relative, shadowing him as he spent a day on the job. If the hours were 4 P.M. to midnight, that was the shift the student observed. Because of the age of the students and insurance regulations, we stressed that they must observe the work and not participate in the work.

Our ninth grade English teachers team-taught the six week unit in our Career Resource Center. We also had the services of a full-time guidance secretary available to us.

The Plan

Week 1: We introduced the six week Career Education unit and discussed jobs the students had already had and were familiar with. A letter to parents and a permission form were distributed and explained. Various shadowing possibilities and alternatives were discussed.

Week 2: Parents' reactions to the job shadowing idea were discussed, and any problems regarding the implementation of the shadowing experiences were resolved. With the assistance of the English teachers, the fifteen occupational clusters were reviewed, and attitude and conduct "on the job" were discussed. A diary for the job shadowing experience was distributed. The purpose of this diary was to introduce work-related concepts such as fringe benefits, union affiliation, and working conditions, and to provide for feedback from the job shadowing experience.

Week 3: Students spent one complete day (or more if the situation required it) on the job.

Week 4: Students shared their experiences with their English classes, using their diary notes, and they completed evaluations of the project.

Weeks 5 and 6: Counselors, using the experience of shadowing as a springboard, encouraged students to relate their day on the job to their own plans for a high school program of studies and future educational goals. Faculty, parents, and other participants were asked to evaluate the project.

Results

The job shadowing project has been implemented twice with over 80% of the ninth grade students participating on both occasions. Our students observed all shifts and under all conditions. One flew to New York City with Air New England.

Others went all over the states of Maine, New Hampshire, and Massachusetts. Many firms and individuals offered to have several students shadow. Three boys stayed right in our own building, shadowing the school painters. The list of businesses and industries represented ranged from a sole proprietor retail store to large corporations such as New England Telephone and Fairchild Semiconductor. One student shadowed a crossing guard; another followed a union leader, traveling around the state, holding meetings, and inspecting sites. One of the most popular job shadowing experiences was with the South Portland Police.

As an additional bonus, this project cut across traditional sexist occupational lines. Many girls went to work with their fathers and many boys with their mothers. One girl spent one day with both of her parents because they both wanted "equal time."

The excitement and enthusiasm generated in the school was contagious, and during the follow-up class periods, many lively accounts of job shadowing were shared.

This unit also served to introduce the ninth graders to methods of researching jobs in the Career Resource Center and to the guidance assistant. Her responsibility was to coordinate and record parental responses, prepare lists of students excused from school each day, and send out thank you letters to all teachers, parents, and others who cooperated in the project.

Evaluation

We felt that we had 200 ambassadors of good will going into our community. The 80% responses far exceeded our expectations. In addition, this project was easy to organize and reproduce. In manpower hours, having students make their own contacts was efficient and imaginative. They often came up with original ideas and contacts.

Negative evaluations were primarily directed toward the fact that we generally suggested that students shadow their own parents. Often the students were already familiar with their parents' work or were not interested in their parents' jobs.

The positive evaluations were many, from the closer bond felt between parent and child to a far stronger understanding of the work world. Most students wanted to repeat the project - shadowing a job related to their own interests or to compare two jobs.

Mahoney Junior High School

PHILOSOPHY

The English Department at South Portland High School has two major goals:

1. to equip students with the basic skills of reading, writing, and speaking so that they will become effective members in our society.

2. to help students develop a greater sense of who they are and what their potential is.

We want our students to be critical thinkers, sensitive human beings, and articulate speakers. We want our students to develop a respect for and a facility with the English language, the unifying force in our curriculum.

To accomplish these goals the English Department offers six skill courses for sophomores and a phase elective program for the juniors and seniors. In their sophomore year students culminate a four-year (grades 7-10) sequence of skills and activities in reading, writing, language, speaking and listening, and career exploration and values. Sophomores do not elect their courses. Junior high guidance counselors place sophomores in appropriate skill courses.

Juniors and seniors select their courses based on their future needs and interests. Guidance counselors and English teachers counsel students before they select courses. All students must take one of the five American Literature courses, and all students are strongly advised to take a writing course.

The rationale for our curriculum is:

1. The English Department believes that students must take responsibility for their education. Students should have proper counseling, but they should also have the opportunity to make choices. Electives require an educational commitment from the student.

2. The English Department's role is to offer a balanced program, one which meets the needs of all students. We know that all students need certain communication skills. We also know that students who are interested in their work tend to perform better than those who are not. We have provided both of these factors, skills and interest, in our program.

3. Courses are phased, not the students. The inherent flexibility of an elective system allows a student to avoid the constrictions of a tracking system. Where appropriate we have encouraged heterogeneous grouping.

All courses carry a phase designation(s) indicating the level of difficulty.

Phase 1 - a course created for those students who have difficulty with basic English skills.

Phase 2 - a course created for students who need to improve and refine basic English skills but at a slower pace than in higher phased courses.

Phase 3 - a course created for students who have a command of basic English skills and who would like to advance beyond these skills at a moderate pace.

Phase 4 - a course created for students who have a good command of basic English skills and who learn rapidly.

Phase 5 - a course created for students who have an excellent command of basic English skills and who are looking for a stimulating academic experience conducted at an advanced pace.

THESE MEMBERS OF THE HIGH SCHOOL ENGLISH DEPARTMENT WROTE THE FOLLOWING COURSE OUTLINES.

Sarah Lee Wright

GUIDELINES FOR COURSE SELECTIONS

All English courses will be a semester in length. Each course has a phase designation(s) to indicate its difficulty. Students will choose their English courses with the help of their guidance counselors. Students should realize that weekly composition work will be a part of all literature courses.

The following guidelines will govern student choices:

1. Students must pass eight semesters of English to graduate. Successful completion of ninth grade English gives a student credit for two of these semesters. Also, a student must carry an English course each semester in grades 10-12.

2. Sophomores have a set program and are not eligible to elect courses. They will be placed in appropriate sophomore skill and literature courses by their guidance counselors.

3. A sophomore who fails Basic English Skills, Communication Skills, or Essential English Skills must retake the course.

4. All students must elect one of the five American Literature courses.

5. All students are strongly advised to take a writing course.

6. It is recommended that students preparing for college elect their courses from the following list. If they are interested in other courses, they should consider taking them as second courses.

American Literature (4,5)	World Literature (3-5)
Man in Society (3-5)	Poetry and the Short Story (4,5)
Composition (3-5)	Bible as Literature and Mythology (4,5)
Creative Writing (4,5)	The Hero and the Anti-Hero in English and American Literature (5)
Selected British Authors (3-5)	
Play Reading and the Theater (3-5)	

7. Students who have failed ninth grade English will not have to retake this specific course in high school. Successful completion of a sophomore skills course will compensate for this failure and students in this category will be able to meet the requirements for eight semesters of English by electing other English courses.

8. If a student wants to take two English courses, he should be allowed to do so only after all students have been signed up for one course. Openings in scheduled courses may then be filled by students who want a second course.

HIGH SCHOOL COURSE LISTING

600 BASIC ENGLISH SKILLS (1, 2)

COURSE DESCRIPTION

This course is designed to acquaint the student with the basic English skills needed by those who will be pursuing a vocational career. Part one of the course will emphasize the grammatical skills required for effective written and oral communication. Part two will concentrate on specific applications of these skills. Typical activities will be writing letters, filling out forms, making résumés, and presenting short speeches.

OBJECTIVES

The student will:

1. familiarize himself with the types and styles of language, including occupational and social.

2. develop a facility for using appropriate language when he speaks or writes.

3. improve the mechanics of writing - emphasis on the complete sentence.

4. improve vocabulary - especially that of occupations, applications, etc.

5. experience writing and making revisions.

6. explore necessary qualities for success in the business world (punctuality, dependability, etc.).

7. improve reading and study skills.

MATERIALS

English on the Job (main text), Drop Out, The Hobbit, Impressions in Asphalt, and Open Ended Stories

Films: "Joh Hunting, Where to Begin" - 98GU
"Preparing for an Interview" - 87GU
"Your Personality" - 28HE

OUTLINE

During the semester the following areas will be covered:

A. Grammar and Usage (Units refer to English on the Job)
   1. the right verb (Unit 2: teach/learn, borrow/lend, etc.)
   2. the incomplete sentence (Unit 4)
   3. the run-on sentence (Unit 5)
   4. double negatives (Unit 7)
   5. punctuation (Unit 10)

B. Writing
1. Discuss topic sentence, concluding sentence, use of examples, and illustrations. Write short paragraphs.
2. Practice answering a job ad from one chosen in the newspaper.
3. Write "how-to" composition and give a demonstration.
4. Write letter of application.
5. Write other types of letters: friendly, request, order, claim.
6. Write paragraphs in relation to literature assignments.

C. Vocabulary development
[Note: Page notations refer to Improving Reading in Every Class]
1. Incorporation of technical vocabulary (other subject areas, career, etc.), pp. 297-304.
2. Teaching of basic prefixes and suffixes, pp. 38-40.
3. Review of structural analysis (inflectional endings - -ed, -ing, -ly, -est; compound words, roots), pp. 20-23, 78-84.
4. Students keep own vocabulary notebook, pp. 64-69.
5. Spelling to be incorporated; review basic rules.
6. Awareness of multiple meanings of words.
7. Antonyms, homonyms, synonyms.
8. Use of context clues, pp. 23-36.

D. Study skills
1. Following directions - oral and written, pp. 353-359, 363-373.
2. Specific goals set for reading assignments, pp. 91-107.
3. A method of retaining information to be taught (SQ3R, PQRST, or other), pp. 115-128.
4. Teach use of graphs, charts, maps, illustrations.
5. Teach use of parts of book - index, table of contents, glossary, etc. Inventory of own textbooks used in other subjects.
6. Review use of the dictionary, pp. 61-63.
   a. alphabetization skills
   b. guide words
   c. symbols; pronunciation key
   d. selection of appropriate meaning
   e. syllabication
   f. abbreviation

E. Career Skills
1. Inventory student interests.
2. Discuss skills students have to offer.
3. Discuss types of careers available.
4. Hear speakers from the armed services.
5. Familiarize selves with Career Resource Room facilities.
6. Introduce personal data sheets and complete.
7. Start selection of a career by using the Career Resource Center. Introduce students to the career profile. Choose two careers which will be used throughout the semester in reference to applications, interviews, etc.
8. Discuss dropping out (speaker from Guidance).
9. Discuss interviews - language, appearance, attitude.
10. Discuss obligation of employer, employee.

601 COMMUNICATION SKILLS (3)

COURSE DESCRIPTION

This course will focus on the skills needed for effective communication. Materials that will be covered include a review of basic English grammar and composition skills. Students will engage in a variety of speaking, writing, and reading activities. There will also be units on how to use a library and how to take part in meaningful discussions.

OBJECTIVES

The student will:

1. gain a working and practical knowledge of his language.

2. become aware of the sequence of grammar, spelling and mechanics.

3. become familiar with the library and learn how to utilize both the library and the Career Resource Center.

4. write short, meaningful paragraphs that use details in support of or in place of generalizations.

MATERIALS

Texts to be used:

English in Action 3
Guide to Modern English
American English Today

Outside reading:

Bridges at Toko-Ri	Lively Lady
On the Beach	The Boy Who Invented the Bubble Gun
To Kill a Mockingbird	This Stranger, My Son

Each class should read three novels.

OUTLINE

I. Grammar

During the semester the class will cover the following grammatical areas:

a. Review the parts of speech.
b. Review the parts of a sentence.
c. Review the irregular verbs.
d. Teach verbals.
e. Review subject and verb agreement.

f. Review pronoun cases.
g. Review fragment and run-on sentences using compositions as examples.
h. Review capitalization and possession.
i. Review punctuation.
j. Review improving sentence techniques.
k. Review clauses and complex sentence.
l. Teach parallelism.

II. Writing

During the semester the class will cover the following writing exercises:

a. Study steps in paragraph development leading to a three paragraph theme.
b. Practice observational writing (from picture, object, etc.).
c. Start writing log (recording misspelled words and grammatical errors).
d. Write directions on how to do something. This may be followed with oral demonstrations.
e. Write a paragraph on two moods illustrated from a literature assignment.
f. Write a paragraph on exaggeration, humor or conflict.
g. Study expository writing.
h. Recognize literary analysis.
i. Learn the basic principles of outlining.

III. Vocabulary

Page references to text: Improving Reading in Every Class

a. Review suffixes and prefixes, pp. 38-40.
b. Study different types of context clues, pp. 23-36.
c. Note multiple meanings of words, pp. 64-69.
d. Select the best meaning for a word in a given context, pp. 80-83.
e. Review structural analysis (inflectional endings - -ed, -ing, -ly, -est; compound words, roots) pp. 78-84.

IV. Research and Career Project

a. Arrange for orientation to library facilities.
b. Review major reference tools: encyclopedias, Readers' Guide, Who's Who, consumer reports.
c. Investigate career or college of choice using materials available in Career Resource Center.
d. Prepare data sheets.
e. Write letters of application: job, school, credit.
f. Prepare samples of five types of letters.
g. Explore career opportunities.
h. View career films which will be available periodically from the Guidance Department.
i. Discuss those films which stress success on the job and value judgments.

602 ESSENTIAL ENGLISH SKILLS (4, 5)

COURSE DESCRIPTION

The purpose of this course is to help students achieve clarity in oral and written communication and to develop skills for meaningful, effective, personal expression. Students will study formal English grammar in depth, as well as the essentials of good usage. Vocabulary study will be extensive through workbook assignments. There will be opportunity for oral and written expression based on assigned reading and personal experience.

OBJECTIVES

The student will:

1. study and apply principles of English grammar and good usage.
2. build vocabulary skills with emphasis on prefixes and roots.
3. gain experience in use of the library and career resource center.
4. gain experience in writing.
5. develop oral expression.

TEXTS

Guide to Modern English - Grade Ten
Harbrace Vocabulary Workshop

Suggested Supplementary Material:

Julius Caesar	The Lively Lady
Silas Marner	Literature of Mystery
A Bell for Adano	On the Beach

Students will be assigned reading from this list. These books will serve as a basis for class discussion and for written work.

OUTLINE

I. Grammar and Usage

a. Review parts of speech and parts of the sentence.
b. Study objective complement.
c. Review verbs and subject-verb agreement.
d. Review verbals.
e. Study verbal noun.
f. Review pronouns.
g. Review prepositional phrases, clauses and kinds of sentences.
h. Review plurals, possessives and capitals.
i. Review punctuation.
j. Correct faulty sentences.

II. Vocabulary

a. Study Chapter One in Vocabulary Workshop.
b. Memorize prefixes and do related exercises.
   Vocabulary Workshop - Chapter Three
   Improving Reading in Every Class - pp. 38-40
c. Memorize Greek and Latin roots and do related exercises.
   Vocabulary Workshop - Chapter Four
   Improving Reading in Every Class - pp. 44-56

Note: All further page designations refer to Improving Reading in Every Class.

d. Review use of context clues, pp. 23-36.
e. Increase emphasis on structural analysis, pp. 39-41.
f. Choose best meaning for a word in a given context, pp. 80-83.

III. Writing

a. Write paragraphs developing the topic sentence.
b. Write action paragraphs.
c. Practice descriptive writing based on pictures presented to the class.
d. Write original compositions based on assigned readings.
e. Write a paragraph using three kinds of clauses and four kinds of sentences.
f. Work on various methods of paragraph development as discussed in the text.
g. Learn the basic forms of a business letter.
h. Keep individual logs containing grammatical and spelling errors from students' own work.
i. Rewrite corrected themes.

IV. Oral Work

a. Present oral book report.
b. Discuss assigned reading.
c. Give an oral demonstration of a process.
d. Present a speech to inform or to persuade.

V. Study and Research Skills

Text: Improving Reading in Every Class

a. Emphasize need for locational skills, p. 242.
b. Use major reference tools: Readers' Guide, encyclopedias, vertical file, consumer reports, atlas, concordance, Who's Who, specialty reference materials, pp. 243-260.
c. Study library classification systems, card catalog, pp. 244. Encourage familiarity with school library and South Portland Public Library.
d. Learn skimming techniques, pp. 197-199.
e. Identify the location and contents of different parts of reference materials: table of contents, index, glossary, special aids, p. 256.
f. Practice note taking - from written and oral material, p. 266.

g. Prepare evaluation of data - critical reading, p. 264.
   1. recognition of suitable sources
   2. distinction between relevant and irrelevant statements
   3. introduction to logical thinking; inductive and deductive reasoning
   4. recognition of propaganda techniques
h. Organize and summarize, p. 272.
   1. outline
   2. compare
   3. cause and effect
i. Follow directions, pp. 363-373.
j. Utilize special aids (maps, graphs, charts, illustrations, political cartoons).
k. Proofread, pp. 274-381.

Career Education Project

A. Investigate one career using the materials in the Career Resource Center.

B. Write a research paper on this career.

C. View films on careers shown in Room 209.

605 EXPERIENCES IN LITERATURE (1, 2)

COURSE DESCRIPTION

This course is designed to introduce students to various types of literature, to help students improve their reading skills, and to show students that reading can be a pleasurable experience. Students will read a variety of short stories, novels and plays. Whenever possible, students will be given the opportunity to read materials of their own choice. This course will also emphasize vocabulary work, group discussions, and oral reports.

OBJECTIVES

The student will:

1. familiarize himself with various types of literature.
2. develop vocabulary by reading and taking words from context.
3. trace themes in literature and relate situations to students' lives.
4. experience writing on literary subjects.
5. correct mechanical errors and drill on those errors taken from context of students' compositions and logs.
6. explore values and decision making.

MATERIALS

Plays to Enjoy
Literature of Mystery
Light in the Forest
Count Me Gone
This Stranger, My Son
Death Be Not Proud
Silas Marner
Drop Out
People to Remember
Open Ended Stories
The Fallen Angel
Take 12 Action Plays
Stories in Verse
Haystacks Don't Have Any Needles
Introduction to Poetry

Films: A Rock in the Road (Prime 589)
An Occurrence at Owl Creek Bridge (Prime 462)
Dr. Heidegger's Experiment (Prime 360AB)
Aggression - Assertion (Prime 831)
The Crowd (Prime 485)

OUTLINE

I. Topic: The Novel

Text: Silas Marner

A. Stress man's inhumanity through:

1. Silas's being ostrasized from Lantern Yard
2. Silas's not being accepted in Raveloe

B. Causes for man's acceptance through:

1. Silas's love for Eppie
2. Changes occurring in his life style

C. Life style and result (Golden Rule) through:

1. Dunstan's life style/result
2. Godfrey's attempt to cover up his first marriage
3. Childless marriage
4. Silas's golden years

D. Greed of man - Dunstan, Godfrey, and Silas - moments in their lives.

E. Film: A Rock in the Road - greed and retaliation

1. Composition - describe one personal example
2. Composition - comparison to Silas Marner

F. Essay test - stress subject and verb agreement

Text: Light in the Forest

A. Emphasize culture and customs

1. Traditions of the Indians
2. Traditions of the whites

B. Prejudice

1. Why True Son was not accepted by his Indian family
2. Why John Butler was not accepted by his white neighbors

C. "Man Without a Country" idea

1. What was the cause?
2. Was he to blame?
3. What would become of him?
4. Opinion essay question - stress capitalization

Supplemental: Plays to Enjoy

A. In the Fog

1. Give historical background of Civil War.
2. Composition - could this have happened? Why?

II. Topic: Mystery, Detective, and Suspense

Text: Literature of Mystery

A. Arsenic and Old Lace

1. What makes people laugh?
   a. Were the aunts comediennes?
   b. Why was Mortimer laughable in his distressed times?
   c. Retaliation of the aunts

2. Mental illness vs. sanity
   a. Why Teddy was considered mentally ill and not the aunts
   b. Jonathan's brutality
   c. Mortimer's assumption of his mental instability

3. What causes this to be considered a mystery?

4. Composition - describe the aunts' lives in Happydale

B. Short stories

1. The Dream
2. The Grave Grass Quivers
3. Two Bottles of Relish
4. Taste
5. How Mr. Hogan Robbed a Bank
6. Dr. Heidegger's Experiment (Plays to Enjoy) (film Prime 360AL)

Discuss what elements are necessary for a mystery. For each story list, in complete sentences, what elements made the mysterious content.

C. Film: An Occurrence at Owl Creek Bridge

Write a mystery which could have taken place before the time of this film and which will end with the hanging of this man.

Supplemental: Same as for Novel, plus Rebecca

III. Topic: Poetry

A. Have students collect three poems which they enjoy - possibly from Stories in Verse, Haystacks Don't Have Any Needles, or assorted poems from library.

B. Share with others and discuss why that particular poetry is enjoyable.

C. Do the opposite with one poem - why do they detest it?

D. Stress song lyrics as poetry.

E. Write a poem on favorite pastime.

IV. Topic: Biographical Novels and Short Stories

Texts: This Stranger My Son, Death Be Not Proud, People to Remember, Modern Biographies, Current Biographies, assorted library books on entertainers and athletes rm. 217, 215.

A. Have students choose one biographical novel or famous person

1. Research the life of this person.
2. Learn his formula for success.
3. Read about training he had to get before he could perform his service for society.
4. Write a brief biography on this person (paraphrasing).

Corrections will stress the complete sentence.

V. Topic: Theatre Arts

A. Take 12 Action Plays

1. Read plays and answer questions.
2. Discuss problems with which teenagers are faced.
3. Suggest solutions; share all possible methods of solving problems and making decisions.
4. Use Open Ended Stories for subject of essay.

B. Plays to Enjoy

1. Choose 3 plays.
2. Answer questions.
3. Compare problems faced by main characters in the plays.
4. Discuss the alternatives each could have considered.

C. Discuss the form of a play and how it differs from a short story.

D. Take one page of any play; transform dialogue into traditional prose.

VI. Topic: Short Stories

Texts: The Fallen Angel; same as above with Take 12 Action Plays

PROCEDURES

1. Vocabulary will be taught from context of literature.

2. View Career Films as they are offered. Discuss value judgments and decision making.

3. Simple connotation and good usage as they arise in class.

4. Spelling and grammatical errors will be recorded on student logs and teacher will give drills periodically in class.

Note: Page notations refer to Improving Reading in Every Class by Ellen Lamar Thomas and H. Alan Robinson.

5. Literature will be read and discussed for setting clues, character, and plot/conflict. Assignments should be prefaced with goal setting (student to know what he is reading to find), pp. 91-107.

6. Explore career opportunities in Career Resource Center and stress work habits, attitudes, punctuality, and dependability.

7. There will be emphasis on wide independent reading, pp. 19-20.

8. There will be oral reading of plays and other literature assignments.

9. Comprehension will be checked on three levels: literal, interpretive, and applied. Have students develop their own questions after reading. Have them learn to include interpretive and applied questions as well as literal, pp. 89-184.

606 INTRODUCTION TO LITERATURE (3)

COURSE DESCRIPTION

The purpose of this course is to equip students with the basic critical skills needed to read literature intelligently. Students will read novels, poems, short stories, plays, and biographies. Although works will be read in common, students will also have the opportunity to select literature of their own choice.

OBJECTIVES

The student will:

1. learn different literary genres.
2. study literature with more depth of comprehension.
3. develop a more critical attitude toward all reading.
4. learn to analyze literature in terms of character development, style, and plot.
5. stress "why" characters act as they do instead of what they do in literature.
6. develop vocabulary by reading and by emphasizing connotations.
7. trace themes in literature and see how they help in developing standards of ethics and morality.
8. learn to write different types of letters and notes.
9. review selected grammatical rules in order to correct writing errors (as recorded in writing logs).

MATERIALS

Books to be read:

April Morning	Bell for Adano
Tale of Two Cities	Silas Marner
Lively Lady	Short Stories for Our Times
Literature of Mystery	Twice Fifteen
Impressions in Asphalt	This Stranger, My Son
Three Plays of Individualism	Stories in Verse
Death Be Not Proud	

Supplementary Reading List:

Light in the Forest	Reflections on a Gift of Watermelon Pickle
Three Narrative Poems	Haystacks Don't Have Needles

OUTLINE

I. Time: 1 - 5 weeks

Topic: Read and discuss historical novel:

Tale of Two Cities or
Silas Marner or
Lively Lady or

April Morning or
Bell for Adano

A. Stress man's inhumanity to man.
B. Stress customs of the times.
C. Show film strips of era, author, and/or novel.
D. Have students write a newspaper dealing with the times.
E. Have students write or describe a scene from a particular point of view.
F. Have students write or describe changes in a particular character.
G. Stress parent-child relationships, feelings of loneliness in growing up and growing older, and maturity.
H. Discuss how teenagers feel today about their parents, war, and being the head of a household. What are some of the problems they face, and how do they differ from Adam's problems?
I. Interview two friends and record their reactions to these problems.

Supplemental - Light in the Forest

II. Time: Weeks 6 - 11

Topic: Mystery, Detective, and Suspense

Literature of Mystery or
Hound of the Baskervilles

A. Read Rebecca - outside assignment with periodic discussions.
   1. Have students write mini-mysteries.
   2. Have students solve each others' mini-mysteries.
B. "Arsenic and Old Lace" - read aloud in class.
   1. Stress humor and what makes people laugh.
C. Short stories - trace the elements of mystery in each story.

III. Time: Weeks 12 & 13

Topic: Short Story Unit

A. Read: Impressions in Asphalt or
Short Stories for Our Times or
Twice Fifteen
B. Stress city life and prejudice.
C. Examine different types of prejudice.
D. Have students do an outside report or project on prejudice.
E. Make a notebook of events that happen in a large city in two week period and compare them with the events in Portland during the same time period.
F. Interview people in the community to get their feelings about prejudice or life in a large city.

IV. Time: Week 14

Topic: Poetry

Texts: Stories in Verse
Introductions to Poetry

Supplementary Texts: Reflections on a Gift of Watermelon Pickle
Haystacks Don't Have Needles

A. Read poetry from assigned texts.
B. Stress different forms of poetry found in everyday life.
C. Make a pictorial poem.
D. Listen to popular songs for lyrical poetry.
E. Have students write poems.
F. Find examples of imagery and figures of speech.

Supplemental - Three Narrative Poems

V. Time: Weeks 15 & 16

Topic: Drama

A. Read: Three Plays of American Individualism or
Plays to Enjoy or
"Arsenic and Old Lace"
B. Have students review television plays or movies at home and write reviews of them.

VI. Time: Weeks 17 & 18

Topic: Biography

A. Read: Death Be Not Proud or
Four Complete Biographies or
book of own choice from the library
B. Discuss the boy's will to live.
C. Discuss hope and survival.
D. Make a collage of human emotion.
E. Write an autobiography or a biography of a friend.

PROCEDURES

1. Vocabulary may be taken from context of literature assignments or from Vocabulary Workshop 10.

2. Spelling - mechanical errors and words misspelled in compositions will be recorded in a writing log by students and will be periodically covered in class.

Reading Skills from Improving Reading in Every Class

3. Comprehension - emphasis on applied and interpretive levels, pp. 89-189.

4. Reading rate - adjust to material to be used, pp. 187-230.

5. Increase of overall speed of reading.

6. Techniques for approaching reading, comprehending various literary genres to be covered.

7. Technique for surveying a book, pp. 129-150.

607 EXPLORING LITERATURE (4, 5)

COURSE DESCRIPTION

The purpose of this course is to create an interest in literature and to give students experience in reading and understanding the various areas of poetry, short stories, classical and contemporary novel, biography, and modern and Shakespearean plays. There will be class discussions, written compositions, and vocabulary building based on these readings.

OBJECTIVES

The student will:

1. analyze poetry.
2. recognize techniques of short story.
3. examine a classical and a modern novel.
4. read a biography.
5. read a modern play.
6. study one Shakespearean play.
7. recognize the value of context clues in vocabulary building.
8. gain more experience in writing.
9. gain experience in oral expression, class discussion and individual reports.

MATERIALS

Text: Harbrace Vocabulary Workshop

Suggested Readings:

Three Narrative Poems
Idylls of the King
Short Stories for Our Times
A Tale of Two Cities
The Pearl
The Moon Is Down
Macbeth
Julius Caesar
Silas Marner
A Bell for Adano
On the Beach
The King's Henchman
The Lively Lady
Literature of Mystery (Arsenic and Old Lace, Rebecca)

Audio-Visual Aids:

Recording of Ancient Mariner or Sohrab and Rustum
Filmstrips on King Arthur

Filmstrips on Tale of Two Cities
Movie - Macbeth
Filmstrips on the Elizabethan Theater

OUTLINE

The books mentioned in this outline are suggested. Others from the suggested list may be substituted as long as they are appropriate for the category outlined.

I. Poetry

a. Read The Ancient Mariner or Sohrab and Rustum.
b. Listen to recording of the poem being studied.
c. Show filmstrip on King Arthur.
d. Read portions of The Idylls of the King.
e. Discuss the theme of The Idylls of the King.
f. Write a composition characterizing one of the Knights of the Round Table as a real person.
g. Learn to recognize figures of speech and poetric imagery.
h. Prepare exercises devoted to figurative language in Vocabulary Workshop.

II. Biography and Short Story

a. Choose a biography from the library and report on it orally.
b. Read selected short stories.
c. Each student read and present orally one short story not assigned to the class.
d. Students write a short story.

III. Classical - Historical Novel

a. Read A Tale of Two Cities.
b. Work on teacher-prepared vocabulary sheets.
c. Discuss Dickens as an humanitarian and a sentimentalist.
d. Write one composition characterizing Carton in England and another in France.
e. Show film on French Revolution.

IV. Modern Novel

a. Read The Moon is Down or The Pearl.
b. Discuss the characterization, plot, and symbolism.
c. Write a short epilogue to either book.

V. Shakespearean Play

a. Read Macbeth critically.
b. Discuss plot and character development.
c. Show Macbeth movie.
d. Write on character strengths and weaknesses in Macbeth.
e. Show filmstrip on Elizabethan Theater.

VI. Modern Play

a. Read aloud Emperor Jones.

PROCEDURES

Text: Improving Reading In Every Class

1. Continue vocabulary development.

2. Improve comprehension - emphasize applied and interpretive levels, pp. 89-189.

3. Vary reading rates, adjusting to material to be used, pp. 187-203.

4. Increase overall speed of reading, pp. 187-189.

5. Survey techniques for approaching reading, comprehending various literary genres to be covered, p. 203.

6. Study techniques for surveying a book, pp. 129-150.

7. Discuss theme, mood, tone, use of setting, plot conflicts and characterization as presented in each work.

8. Paraphrase certain philosophical passages as they appear in assigned work.

9. View films dealing with moral issues as they become available. Discuss and make certain moral judgments.

10. Continue memorization of Greek and Latin roots. A recommended procedure is to have students responsible for two or three a day.

610 AMERICAN LITERATURE (4, 5)

COURSE DESCRIPTION

This course will familiarize the student with the major works of American literature from the Colonial Period to the Twentieth Century. The student will study the significant contributions of writers viewed not only against the historical background of their time but also in terms of other works which deal with the same ideas: freedom, self-reliance, individualism, romanticism, disillusionment and hope. The class will read and analyze the prose and poetry of such powerful spokesmen as Hawthorne, Emerson, Thoreau, Whitman, Twain, Steinbeck, and Baldwin.

OBJECTIVES

The student will:

1. become aware of his literary heritage and develop a further appreciation for the culture of which he is a part.

2. study American literature as it reflects its historical period and the major philosophical movements of the era.

3. evaluate the important aspects of American character as revealed in literature.

4. develop a concern for what the author has to say and how he says it.

5. improve his ability to analyze literature and communicate his impressions effectively and correctly.

6. discuss freely and arrive independently at his own conclusions.

OUTLINE

Week I - The American Dream

1620	Mayflower Compact	Bradford
1776	Declaration of Independence	Jefferson
1961	Inaugural Address	Kennedy
1962	Nobel Prize Speech	Faulkner
1963	Message to the Grass Roots	Malcolm X
1967	I Have A Dream	King

There are many facets to the American Dream. How does each "dream" change its emphasis and still restate recurring ideas? Can the American Dream come true?

Week II - A New Country

"The land was ours before we were the land's." -- Robert Frost

The early settlers recorded their experiences, their reactions, and their hopes.

Areas of Settlement and Their Literature

Virginia - Byrd
Jamestown - Smith
Plymouth - Bradford

How did our ancestors accept the challenge of the new frontier?

Weeks III - V - The Puritan Attitude

Pious and rigid idealists were determined to establish God's kingdom in the wilderness.

Roger Williams
Edward Taylor
Jonathan Edwards
Ann Bradstreet
Cotton Mather

The Crucible - Miller
The Scarlet Letter - Hawthorne
Young Goodman Brown - Hawthorne
Poems by Robinson and Lowell

What were the Puritan's religious beliefs? Why are the Puritans so criticized and yet so vital a force in American literature? What characteristics of the Pilgrims have come to be considered typical of modern Americans?

Cotton Mather reflects the Puritan concern with witchcraft and Satan; Ann Bradstreet humanizes the Puritan; Jonathan Edwards exemplifies the stern mien, pessimistic outlook, and the disciplined life demanded by the harsh doctrine of the Puritan society.

Week VI - The Independent Spirit

Political Writers of the Revolution

Franklin
Henry
Jefferson
Paine

Even at the beginning there was a conflict between ideals and realities. What were the major problems of the new nation? Is the pen "mightier than the sword"?

Week VII - 19th Century Romanticism

Early Men of Letters

Irving
Cooper
Bryant
Poe
Hawthorne
Melville

This period marks the beginning of a national literature. What are the ways in which these writers exemplify the Romantic Movement?

Weeks VIII - X - American Rennaissance

Idealism Transcendentalism Individualism

A. A Different Drummer

Emerson Whitman
Crane Dickinson
Thoreau Vonnegut

What obligations and dangers accompany individualism? Does individualism ever become selfishness?

The Protestant religion of the early settlers stressed the principle that each human being is directly responsible to God for his own behavior and his own salvation. Thus, individualism is a dominant characteristic of the early American. The individual's responsibility to himself extended to his responsibility for society and government.

B. New England Brahmins

Longfellow)
Holmes) The Cambridge Poets
Lowell)

Weeks XI - XIII - Realism

The dreams of Americans did not always match the reality of their lives. The realistic writer records the details of ordinary life as it is actually lived.

<u>The Advancing Frontier</u>
Dana James
Parkman Twain, <u>Huckleberry Finn</u>
Rolvaag

Week XIV - War Between the States

Webster Lee
Lincoln Crane, <u>Red Badge of Courage</u>

Week XV - Local Color

Harte Crane
Twain Cather, Willa
Jewett Wharton, Edith - <u>Ethan Frome</u>
Garland

After the war there was a decided interest in literature of particular areas or "local color."

Weeks XVI - XVIII

Poetry	Modern Drama	Modern Novel
Robert Frost Edgar Lee Masters Elinor Wylie Carl Sandburg Edna St. Vincent Millay	Our Town	(If time permits)

What are the characteristics implied in the term modern? How differently do modern writers treat subject matter? How are techniques and language different?

611 MAN IN SOCIETY (4, 5)

COURSE DESCRIPTION

This course will focus on the social and moral problems facing the individual and mankind today. From selected readings in American literature, the student will develop a greater awareness and understanding of problems of personal identity, social concern, and conflicting values rising from man's relentless search for the "American Dream" in yesterday's, today's, and tomorrow's world. Special emphasis will be placed on recurring or parallel themes. The course will include such authors as Carson McCullers, Thornton Wilder, Arthur Miller, Scott Fitzgerald, John Steinbeck, Gordon Parks, and Ernest Hemingway.

OBJECTIVES

The student will:

1. increase his enjoyment, understanding, and appreciation of literature.

2. evaluate the forces affecting man's behavior.

3. recognize the worth and dignity of the individual in society.

4. recognize the universality of human experience.

5. present and defend his point of view and consider possible solutions to problems in today's society.

6. improve his ability to analyze literature and to communicate his ideas effectively and correctly.

OUTLINE OF SUGGESTED READING

I. THEME: Man's need to belong - alienation

A. Materials: A Separate Peace, Of Mice and Men, Ethan Frome, Heart is a Lonely Hunter, Bridge of San Luis Rey

B. Related Reading: Beyond the Horizon, My Shadow Ran Fast, Poems of Edward A. Robinson, Spoon River Anthology

C. Filmstrips: "Search for Self Love", "Themes in Literature", "Developing Values", "Reflection of Myself - Adolescent Experience"

D. Related Activity: Role Playing

II. THEME: Social Protest - Man's inhumanity to man - standing up for one's beliefs

A. Materials: The Ox-Bow Incident
Grapes of Wrath

B. Related Reading:
The Learning Tree
Invisible Man
Manchild in Promised Land
Go Tell It On the Mountain
The Jungle
Death at an Early Age
Intruder in the Dust

C. Filmstrips:
"Odyssey of Richard Wright"
"Steinbeck's World"
"Grapes of Wrath and the 1930's"
"Understanding Prejudice"
"Themes in Literature: Courage"

D. Related Activity: Outside speakers

III. THEME: Search for the "American Dream"

A. Materials: The Great Gatsby
The Glass Menagerie
All My Sons
American Dream in Literature

B. Related Reading: The Assistant
Five Smooth Stones
Death of a Salesman

C. Related Activity: Individual reports

IV. THEME: Man's survival in our changing world - Man's need to adjust to rapid change

A. Materials: Alas, Babylon
Future Shock

B. Related Reading: Seven Days in May
Walden II
Failsafe
Farenheit 451

C. Filmstrips: "Hiroshima and Nagasaki"
"Redesigning Man"(Use with Future Shock)

D. Related Activity: Panel discussion

Note: Modern American Poetry is available for use throughout the course.

612 FRONTIERS IN AMERICAN LITERATURE (2, 3)

COURSE DESCRIPTION

This full semester course is designed to acquaint the student with the literature of America, beginning with the settlement of the West and continuing through the period of the Depression. These writings, by numerous authors, will be presented in such a way that the student will be able to associate the literature with the events and people studied in American history. Emphasis on the short story will be combined with the study of other types of literature including: lyric poetry, the essay, drama and non-fiction writings of the early West.

OBJECTIVES

The student will:

1. relate his knowledge of American history events found in the literature of the periods studied.

2. acquire an understanding of and an appreciation for the figurative and literal meanings of the narrative.

3. develop the ability to discuss literature in terms of: plot, climax, theme, realism, characterization and author's style.

4. improve his ability to evaluate the character and personality of individuals studied.

5. acquire an awareness of his own heritage and an appreciation for the early American frontier.

6. develop a confidence in his ability for discussion within a peer group.

7. improve his vocabulary and his writing ability.

OUTLINE

I. Time: Six Weeks

Text: Heroes of the American West. Martha R. Pappas - Charles Scribner's Sons

Topics:

A. An introduction to the history of nineteenth-century West.

B. A study of the realistic accounts of frontiersman to recognize the challenges met by pioneers.
   1. Trappers and Traders

2. Emigrants and Settlers
3. Miners
4. Outlaws and Lawmen
5. Cattlemen, Boomers, Sooners

II. Time: Six Weeks

Text: America, The Melting Pot. Patricia Mintz - Charles Scribner's Sons

Topics:

A. An introduction to the varied ethnic groups which contributed to the growth of this country.

B. A study of the way in which literature reflects a period of life in America - basically, the short story, essays and speeches.
1. That Promised Land
2. My Brother's Keeper
3. The Path of the Soul

III. Time: Six Weeks

Text: The Bitter Years. Max Bogart - Charles Scribner's Sons

A. An introduction to the American scene of the Depression years.

B. A study of poetry, drama, short story and essays as literary forms.

ACTIVITIES

Students will:

1. keep notebooks on all material read and discussed.
2. participate in class discussions.
3. have weekly tests on reading selections.
4. have periodic tests on material prepared outside the classroom but not discussed or explained in class.
5. view related films selected by the teacher. Suggested: "The Great Immigration," "The Early West," "The Great Crash" - all available from Prime.
6. keep a vocabulary list taken from the readings - periodic testing on this list.

OUTSIDE ASSIGNMENTS

I. Heroes of the American West

A. Student's choice from "Composition Suggestions" or "Related Research" found at the end of each one of the five sections. One assignment will be due from each of the five.

B. Alternate: Read a novel or biography from this same period and submit a written report.

II. America, the Melting Pot

A. Report on one's own heritage - the actual tracing of one's family tree. Guideline booklet will be supplied by teacher.

B. Alternate: Read and report on the biography of an immigrant who became a success in America.

III. The Bitter Years

A. Use one of the themes of the class text as a basis for composition.

B. Alternate: Submit a report on a novel such as The Grapes of Wrath.

613 YOUTH IN CONFLICT IN AMERICAN LITERATURE (1 - 3)

COURSE DESCRIPTION

This course is designed to explore through American Literature some of the conflicts faced by youth. Although there will be some readings concerned with yesterday's youth and tomorrow's youth, the emphasis will be placed on conflicts faced by today's youth. For example, many books have been written that deal with the struggle between young people and adults. Several readings will be selected in this area. Students will be expected to read books assigned by the instructor, but there will be several opportunities for students to make their own choices.

OBJECTIVES

The student will:

1. learn of the variety of books in the bookstores and libraries which present young people as the main characters.

2. read high interest literature that stimulates enjoyment in reading.

3. explore the universal conflicts of Man vs. Man and Man vs. Himself that are found in American Literature.

4. see that literature offers many conflicts that can be related to our own experiences.

5. examine problems of young people from several different time periods of our American history.

6. compare the experiences of these young people to the experiences of young people today and the student himself.

7. present through discussion his own point of view concerning the conflicts being studied.

8. express his views through assigned compositions or student initiated projects.

9. study some of the writing techniques used by the author.

10. study local color (speech, dress, customs and habits of the character in the books).

OUTLINE

I. A Day No Pigs Would Die

Projects:

Vermont - Maps, History, Industry, People (Ethan Allen, Abner Doubleday, Calvin Coolidge, etc.)

Shakers - Paper concerning a specific part of the Shaker culture: furniture, law, history, etc.

Posters - A poster that would be your jacket for the book. A poster depicting what you feel represents the book. (Check book jackets in bookstore to get ideas of how this is done. Pick out interesting jackets from your own books and show them to students.)

Activities:

1. Film "Robert Frost"
2. Film concerning Shakers - Literature from Shaker Village - slides of Shaker Village.
3. Slides of Vermont
4. Films "Occurrence At Owl Creek Bridge"
   "Dr. Heideggar's Experiment"
5. Several poems dealing with death -
   "Death Be Not Proud" - John Donne;
   "The Man He Killed" - Thomas Hardy;
   "Resume" - Dorothy Parker
6. Composition - First person accounts of the condemned man in film, "Occurrence At Owl Creek Bridge."

Question Sheet:

1. Which part did you enjoy most and why?
2. Discuss examples of local color, descriptive writing.
3. Write a humorous composition or a descriptive composition.
4. What are some of the themes of this book?

II. <u>Bless the Beasts and the Children</u>

Activities:

1. Pass out question sheets that students can work on as they are reading the book.
2. Study the themes and conflicts of the book.
   a. man vs. nature
   b. man vs. man (youth vs. adult; youth vs. youth)
   c. title
   d. similarities between camp and school
3. Filmstrips concerning man and his destruction of species of animals.
4. Local color; descriptive writing

Projects:

1. Composition - My experience at camp
   Cruelty to animals
   Cruelty of Youth; Cruelty of Adults
   Times I have shown violence
   Any other topic relevant to the book

2. Collage depicting the book and its themes
3. Book Jacket Poster
4. Figurative Language; poem and picture

Activities:

1. Films - "The Lottery"
   "Eye of the Storm"
2. Composition - creating a mood of the outcast.
   Use slides and photographs

III. Blowfish Live In The Sea

Activities:

1. Study details to create mood. Use chapters 3 and 4 as basics for discussion.
2. Film - "My Old Man"
3. Filmstrips - "Can A Parent Be Human?"
   "Ivan and His Father"
   "I Owe You Nothing"
   The above can be used to promote discussion and composition concerning the Parent/Child Conflict. They also lend themselves very well to role playing.
4. Composition - Writing Description and Dialogue - Use the slides from Eye Openers, and passages from Blowfish Live in the Sea.

Projects:

These may be done for extra credit. Each student at this point has an idea of different projects that may be completed.

IV. No Promises In The Wind

Activities:

1. Filmstrips - "The Other America"
   "Rural Maine"
   "The Great Deprersion"
   Use the above to bring the idea of hard times closer to home.
2. Film - "Edgar Allan Poe"
3. Poem -"Annabelle Lee"
4. Literary Cavalcade - "First Love"

The above were used to develop the theme of love that was contained in No Promises In The Wind.

Projects:

1. Report on the Depression.
2. Art project concerning the Depression.
3. First person journal entry by one person other than Josh, one page.

4. Poem concerning a part of the book. For example, a descriptive poem of one scene from the book.
5. Oral report concerning time period or content of the book.

V. <u>Ten Short Stories</u>

A. "Flowers for Algernon"

Activities:

1. Plot
2. Point of View
3. Apply the above to the short story.

B. "So Much Unfairness of Things"

Activities:

1. Plot
2. Point of View
3. Character
4. Apply the above to the short story.

C. "Backward Boy," "Denton's Daughter," "Hoods I Have Known"

Activities:

1. Plot
2. Point of View
3. Character
4. Apply the above to the short stories.

D. "Planet of Condemned" and "Test"

Activities:

1. Plot
2. Point of View
3. Character
4. Apply the above to the short stories.

NOTE: Students also read at least one novel of their own choice on the theme of Youth in Conflict.

614 LITERATURE OF AMERICAN MINORITIES (2 - 4)

COURSE DESCRIPTION

The most obvious reason for teaching minority literature is to provide the student with a more complete and balanced view of American literature and history. This course is designed to explore writings by and about members of American minorities including Blacks, Indians, Chicanos, and Jews. The class will consider stereotyping and other problems that individual minority members must face.

OBJECTIVES

The student will:

1. increase his sensitivity to members of minority groups by gaining an awareness of obstacles those living in a sub-culture must overcome.

2. recognize his own stereotyping and see how this belittling practice springs from ignorance.

3. become aware of the formative role that cultural heritage plays in acquiring values.

4. recognize and appreciate the ways in which heritage affects literary forms.

5. recognize that Black literature should not be taught as propaganda but for its historical and literary excellence.

OUTLINE

A. Text: Afro-American Authors

Time: 6 - 8 weeks

Written Activities:

1. Written composition on Claude McKay's "If We Must Die."
2. Written composition on Richard Wright's "The Man Who Went to Chicago."
3. A written character sketch on Sterling Brow's "Southern Cop."

Oral Activities:

1. An oral report on one of the more contemporary authors, such as Cleaver, King or Baldwin.

Outside Reading Activities:

1. Student may choose among the following texts:
   Ossie by Guffy
   Nigger by Gregory
   Daddy Was a Number One Runner by Meriweather
   Two in a Back Room by Chisolm

B. Text: Asian - American Authors

Time: 4 - 6 weeks

Written Activities:

1. Follow primarily the same format as outlined for Afro-American authors.
2. Daily discussion questions at the end of each selection written out and brought to class for discussion.

Oral Activities:

1. An oral report based on one of the readings in the anthology.
2. Daily class participation.
3. Periodically breaking classes down into discussion groups, five to six students to a group.

C. Text: Indian - American Authors

Time: 4 - 6 weeks

Written Activities:

1. Composition exercises taken from the Multi-Ethnic Literature text that acts as an instructor's guide for the three anthologies.
2. A weekly essay test based on weekly readings and class discussion.
3. Daily discussion questions written out at the end of each selection.

Oral Activities:

1. Daily class participation.
2. Group discussions.
3. One oral report based on a particular reading in the anthology.

PROCEDURES

1. Class discussion groups formed to exchange ideas as well as to analyze different authors' writing styles and concepts.

2. Weekly vocabulary list issued to students based on the literary terms used in the various texts.

3. Filmstrips and movies from Prime Resource Center and from our audio visual room.

4. One oral report for each anthology.

5. Bi-weekly compositions done as outside assignments for research, analysis, and learning to take a stand on argumentative issues.

6. Additional readings of the following books:
   - Nigger
   - Ossie
   - Daddy Was a Number One Runner
   - Two In a Back Room
   - The Chosen

   The student has a choice of any one of the five mentioned.

7. Whenever possible use outside speakers.

620 WRITING WORKSHOP (1, 2)

COURSE DESCRIPTION

Basic writing skills (the clear sentence, the coherent paragraph) will be stressed in this course. Emphasis will be on vocational and technical writing: forms, résumés, career oriented reports, vocabulary of various occupations, business letters, summaries, and outlines. This course is recommended for vocational students. Daily short writings will be required, some of which will provide opportunities for expression of the student's personal interests and opinions.

OBJECTIVES

The student will:

1. develop a writing voice.
2. understand that spelling, punctuation, and correct usage are aids to clear communication.
3. learn to critically analyze and rewrite his work.
4. learn to support generalizations and/or opinions with specific details.
5. understand that all writing has a point to it.
6. learn that all good writing has a beginning, a middle, and an end.

MATERIALS

Composition Through Literature
What Does It All Mean?
English Workshop - Grade 11
Scope/Reading 4

OUTLINE

I. Topic: Journal

A. Students will write in a journal in class every day. Journals will be checked but not graded. Suggestions for entries are listed under PROCEDURES.

II. Topic: Writing Assignments

A. Career writing skills

1. Job applications
2. Résumé/personal data sheets
3. Business letters
4. Career oriented reports

B. What Does It All Mean?

1. Do one unit each week. Each unit has a specific focus (writing for a specific audience, selection of details, satire).

III. Topic: Career Search

A. All students will do a career research paper. They will search for materials on a particular career in the Resource Center. They will make an oral and written presentation of their findings.

B. Students will fill out an application form appropriate to their career selection. They will also write a business letter answering an ad for a job in their career field. They will submit a résumé with this letter.

PROCEDURES

1. Suggested class schedule:

Monday - Prewrite activities. Use films, selections from Scope, or discuss ideas from a unit in What Does It All Mean? Focus is on generating ideas.

Tuesday - Writing assignment in class.

Wednesday - Evaluation. Use small groups to discuss individual papers; show selected papers on overhead projector; individual conferences with the instructor. Stress publication and sharing of student writing.

Thursday - Skill Work. Use handbook in Composition Through Literature and exercises in English Workshop; work on vocabulary, spelling and punctuation.

Friday - Revision and Rewriting. Students should consider the following questions:

a. What is unnecessary?
b. Is it true, sincere?
c. Does it say exactly what I want to say?
d. Is there a main point?
e. What about mechanics?

2. Rationale for course.

"The trouble with bad student writing is the trouble with all bad writing. It is not serious, and it does not tell the truth."

This course treats individual writing problems. The instructor will adapt class activities to meet the needs of the students. The rationale for this course is that ideas must precede writing. Students should not write "writing." The instructor will devote much time to prewriting activities.

3. Each student has a writing folder.

4. Grades are based on final products, not on drafts.

5. Suggestions for journal entries:

   Why do we laugh?

   What is sick humor? Examples?

   What is improper humor?

   Write a response to a song, movie, book.

   React to a word: war, peace, love, truth, fear, loneliness.

   Can man survive? Can he prevail?

   Life on other planets?

   Problems our society has not solved.

   What kind of future do you want?

   What does it mean to be mature, wise, happy, gifted, cruel?

   Who are your favorite people?

   Your strengths, weaknesses?

   What terrifies you?

   Why do we have myths?

   What are your favorite myths?

   A subject about which you hold a strong opinion.

   Closely observe an object. Describe its essential qualities.

   What is beautiful? Ugly?

   What surprises, fascinates you?

6. Problems with mechanics and usage should be dealt with on an individual basis except when the entire class is having difficulty with a particular skill.

621 COMPOSITION (3 - 5)

COURSE DESCRIPTION

This course is for students who want to improve their writing skills. The course will focus on expository writing and will include instruction in how to write the analytical essay and the research paper. Major goals are for each student to find a writing voice and develop a clear, concise prose style. Students will work in small groups and time will be provided for frequent individual conferences with the instructor. In addition to frequent writing activities, students will read, discuss, and analyze short stories and poems. These stories and poems will serve as sources of ideas for student writing and as models of good writing. Students who plan to attend college should elect this course. If possible, they should do so in their junior year.

OBJECTIVES

The student will:

1. develop a clear, direct prose style.
2. learn that good writing has a point to it.
3. develop the art of revision and rewriting.
4. use details to support generalizations.
5. use transitional devices.
6. learn the mechanics of writing the research paper.

MATERIALS

Advanced Composition: A Book of Models for Writing - Warriner, et al.
American Composition and Rhetoric - Davidson
Contemporary Composition - Peterson
Developing Writing Skills - West
Fundamentals of the Research Paper - Leahy
Guide to Modern English - Corbin and Smith
The Lively Art of Writing - Payne
Writing: Unit-Lessons in Composition - Brown, et al.

OUTLINE

I. The writing process: prewrite, write, and rewrite

A. Introduce students to the idea that writing is a process. Emphasize the value of thinking/brainstorming before writing.

B. Teach students to narrow down their topics. (Write more and more about less and less.)

C. Stress the value of close observation. The good writer is the perceptive and sensitive observer.

D. Show examples of professional writers' revisions. Explain that professional writers often write many versions of their work.

E. Make sure that all students know basic outlining skills.

II. The paragraph

A. Review the basic elements of the paragraph. Stress the topic sentence.

B. Insist on the use of concrete and specific details.

C. Underline the necessity for unity and coherence.

D. Do exercises on diction. Show how diction affects tone.

E. Show various ways to end a paragraph.

III. The essay

A. Introduce students to the various types of essays: expository, personal, and critical.

B. Explain the use of a thesis statement or controlling idea.

C. Show various transitional devices.

D. Teach the techniques of answering essay questions.

IV. The research paper

A. Lead students step by step through the writing of a research paper.

B. Thoroughly discuss the use of sources. Explain that a source must receive credit for his ideas as well as his words.

C. Stress the technical aspects, especially footnoting and bibliography.

V. The journal

A. Each student will keep a journal and make weekly entries.

B. This journal will be read by the instructor but not corrected.

PROCEDURES

1. Each student has a writing folder in which he keeps all his work.

2. Students' work is published whenever possible; via reading aloud, ditto masters, overhead slides.

3. Students must learn to criticize their own writing. Students will work in small groups and will also have frequent individual conferences with the instructor. The class is essentially a workshop.

4. Each assignment has a definite focus, e.g. use of concrete details or transitional devices.

5. Final products, not drafts, will be graded.

6. The instructor should devote much time to prewrite activities. Students write well only when they care about or are interested in their subjects. Whenever possible students should be encouraged to produce their own subjects.

7. Teachers should set up an individualized program to deal with mechanical and usage errors. We have available both Individualized English and the Plain English Handbook.

8. Teachers who have taught this course have found the assignments and projects in End-of-Year Examinations in English for College Bound Students Grades 9-12 and 12,000 English Students and Their Teachers to be particularly helpful.

9. A portion of class time should be devoted to vocabulary development.

622 CREATIVE WRITING (4, 5)

COURSE DESCRIPTION

This course is designed for the serious student writer. Students who want to write prose and poetry and who are willing to subject their work to the teacher and the class for evaluation should elect this course. Deadlines are critical and standards will be enforced. Regular attendance is mandatory since many assignments do not lend themselves to "make-up." There will be daily writing experiences. Students will share their work with their classmates and will have frequent conferences with the instructor.

OBJECTIVES

The student will:

1. observe critically and perceptively.
2. learn the process of prewrite, write, and rewrite.
3. experience the high moments and low moments of writing. "You can't write only when the mood moves you. You must force yourself to write every day."
4. write each day without too much threat of criticism.
5. gain more confidence in his writing by observing the writing of his peers.
6. become aware of his own style at this period of time.
7. appreciate the permanence of his writing - value of something permanent in a disposable world.
8. appreciate the personal value of a journal.
9. through research, become acquainted with a professional writer.

COURSE CONTENT

Materials

1. Eye Openers: A Program in Writing/Awareness
2. Films
3. Filmstrips
4. Slides
5. Photographs
6. Paintings
7. Records
8. Overhead transparencies
9. Tape recordings

Projects - will count as thirty-five percent of course grade

1. Anthology of poetry, essays, short stories, plays or combinations
2. Journal
3. Individual choice approved by teacher
4. Research paper covering any writer of the student's choice

OUTLINE

Weeks 1 - 10

1. Study of the narrative and descriptive paragraph in addition to the writing of dialogue.

2. Study of short stories written for magazines in preparation for the writing of two short short stories by the student. (1000-2000 words)

3. The composition of a short short story followed by classroom reading and evaluation.

4. Preparation and mailing of manuscript to a selected magazine editor.

Weeks 11 - 16

1. Films - "The Essence of Being Human," "Robert Frost," "Edgar Allen Poe," "Autumn Frost Country," "The Crowd"

2. Filmstrips - "Stopping By the Woods of Mr. Frost," "How a Poem is Made," "The Poetry of a Nation," "The Private World of Emily Dickinson," "That Strange Mr. Poe," "The Red Balloon," "Glass," "The Romantic Period," "Reflections of Myself," "Leaf," "Pompeii - Once There Was A City," "00193," "Of Holes and Corks"

3. Structured poetry - review meter and rhyme

4. Free verse - show students different types of free verse by various authors. Emphasize imagery, figures of speech, and symbolism.

5. Poetry booklet to be composed for a particular person.

6. For publication in class - frequent selections of poems written by the students.

Weeks 17 - 19

A booklet of students' writings will be prepared by the class. They will select what is to be included in the booklet and construct the booklet themselves.

PROCEDURES

1. Each student will have a writing folder containing his work.

2. Individual conferences will be scheduled whenever possible.

3. The classroom will be a laboratory. Students should be writing in class.

4. Out-of-class writing will be devoted to the completion of the research paper and the project.

5. Students will be required to adhere to deadlines.

6. Students' works will be entered in contests whenever possible.

7. Some class time will be spent reading and analyzing both professional and student writing. A flexible model of analysis will be constructed for the class. An example might be:

   A. Vocabulary
      1. What are the words?
      2. Did the author choose his words wisely?

   B. Sentence Structure
      Note:
      1. variety and length of sentences
      2. patterns
      3. use of transitional devices
      4. sentence conciseness
      5. placement of modifiers

   C. Tone
      1. What is the tone? How did the author achieve it?
      2. What is the relationship between tone and diction?

623 FILM STUDY AND PRODUCTION (1 - 3)

COURSE DESCRIPTION

In this course students will learn the techniques of film-making. They will view and discuss films, read and write reviews. The course is intended to develop discriminating viewers. As a major project students will write a script, shoot and edit their own film.

OBJECTIVES

The student will:

1. recognize the importance of film and understand it as a medium of communication.
2. evaluate a film logically and objectively.
3. understand the process of film production.
4. identify both the technical and dramatic elements of given films.
5. present both written and oral evaluations of films.
6. learn to edit films.
7. make a super-8 film.
8. learn to identify the step by step processes of super-8 production.

OUTLINE

I. Time: Week 1

Topic: Introduction to Film

A. Films to be viewed:
   1. "Photography - How It Works" - Kodak
   2. "Basic Film Terms" - UNH

B. Learn basic film terms.

II. Time: Week 2

Topic: Film Techniques and Appreciation

A. Films to be viewed:
   1. "Basic Movie Making" - Kodak
   2. "Movies Move People" - Kodak
   3. "The Story Behind Film" - Kodak
   4. "A" - UNH
   5. "Omega" - UNH
   5. "Time Out of War" - UNH

B. Discuss techniques used.

III. Time: Week 3

Topic: Creating Moods

A. Films to be used:
1. "Moods of Surfing" - PRIME
2. "Turned On" - PRIME
3. "Leaf" - PRIME
4. Miscellaneous films from PRIME
5. "Worth How Many Words" - Kodak
6. "How Winning Teenage Movies Are Made" - Kodak

B. Discuss techniques used.

C. How does one create moods?

IV. Time: Week 4

Topic: Great Themes in Literature

A. Films to be used:
1. "The Lottery" - PRIME
2. "The Secret Sharer" - PRIME
3. "Conscience in Conflict" - UMO
4. "Authority and Rebellion" - UMO

B. Evaluate films.

C. Discuss common themes found in films.

D. Relate films to books students have read.

V. Time: Week 5

Topic: Documentaries

A. Films to be used:
1. "Gate 73" - PRIME
2. "End of One" - PRIME
3. "Sheep, Sheep, Sheep" - PRIME
4. "Glass" - PRIME
5. "Nanook of the North" - PRIME

B. Evaluate films.

C. How does a documentary differ from other types of film?

VI. Time: Week 6

Topic: Film As Art

A. Films to be used:
   1. "The Art of the Impossible" - UMO
   2. "Pas de Deux" - PRIME
   3. "Dream of Wild Horses"- PRIME
   4. "The Interview" - UMO
   5. "Autumn (Frost Country)" - PRIME
   6. "Bolero" - PRIME

B. Discuss films.

VII. Time: Week 7

Topic: Man's Inhumanity to Man

A. Films to be used:
   1. "An Occurrence at Owl Creek Bridge" - PRIME
   2. "Chickamanga" - PRIME
   3. "The Lady or the Tiger" - PRIME
   4. "Mockingbird" - UNH
   5. "The Hand" - UNH

B. Evaluate films according to techniques used.

C. Discuss lessons to be learned.

VIII. Time: Weeks 8 and 9

Topic: Values

A. Films to be used:
   1. "When Parents Grow Old" - UMO
   2. "Trouble With the Law" - UMO
   3. "Clown" - PRIME
   4. "My Country Right or Wrong" - UMO
   5. "The Wall" - PRIME
   6. "Red Balloon" - PRIME
   7. "Number 00173" - PRIME
   8. "Toys" - UNH
   9. "Eye of the Storm" - PRIME
   10. "Foxfire" - PRIME

B. Evaluate films.

IX. Time: Week 10

Topic: Vocational Information

A. Films to be used:
   1. "Decisions, Decisions" (Career Resource)
   2. "Women in the World of Work" - PRIME
   3. "It's Up to You" - PRIME
   4. "Brand Names and Labeling Games" - PRIME
   5. "Chemical Feast" - PRIME

6. "What Shall I Be" - PRIME
7. "Your Job Applying For It" - PRIME
8. Miscellaneous films from PRIME

B. Discuss films.

X. Time: Week 11

Topic: Social Comment/Human Relations

A. Films to be used:
1. "The Doodle Film" - UMO
2. "Man From Aran" - PRIME
3. "Geronimo Jones" - UMO

B. Discuss films.

XI. Time: Weeks 12 and 13

Topic: Animation

A. Films to be used:
1. "Hew Hop" - PRIME
2. "Collage" - PRIME
3. "Clay" - PRIME
4. "Masque of Red Death" - PRIME
5. "The Great Toy Robbery" - UNH
6. "Hangman" - PRIME
7. "Blaze Glory" - Pyramid Films - $15.00
8. "String Bean" - PRIME

B. Discuss films.

C. What purpose does animation serve?

D. Discuss types of animation.

E. Review use of camera, lighting, and filming.

F. Discuss how to make an animated film.

XII. Time: Weeks 14, 15, and 16

Topic: Make An Animated Film

XIII. Time: Week 17

Topic: Work with Film

A. Films to be used:
1. "How to Make a Movie Without a Camera" - UNH
2. "Sparrow" - PRIME
3. Terry Sotiriou's films

B. Discuss techniques used.

C. Paint, draw, and scratch on film.

D. Edit films.

E. Pick sound tracks for films.

F. Edit animated films.

G. Assign Exploring the Film - Chapter 14 (pp. 165-177)

XIV. Time: Week 18

Topic: Film Festival and Evaluation

A. Films to be used:
   1. Students' animated films.
   2. Students' painted films.
   3. Homemade movies.
   4. Films from PRIME

B. Discuss and evaluate films.

C. Discuss current trends in film making.

D. Discuss current films.

E. Review techniques learned during the course.

F. Get student reactions.

G. Discuss television films.

TEXT: Exploring the Film, Kuhns and Stanley

625 FUNDAMENTALS OF BUSINESS ENGLISH (1 - 3)

COURSE DESCRIPTION

This course covers the basic technical skills needed for competent business communications -- spelling, punctuation, functional grammar, capitalization, sentence sense, clarity and style -- along with extensive work on business-related vocabularies. Class procedure will include proofreading and writing, small group presentations, lectures, field trips, and guest lectures. This course, or an exemption test, is required before entrance to EFFECTIVE BUSINESS COMMUNICATIONS.

OBJECTIVES

The student will:

1. learn to write clear, concise, complete, courteous, and correct business communications.

2. become familiar with office etiquette, ethics, and common practices.

3. learn business-related vocabularies.

OUTLINE

I. Preparing to build skill in business communications. (5 days)

A. The power of speaking and writing. Pp. 2-7 in text: Business English In Communication.

B. The qualities of business communications, pp. 8-15 in text.

C. Proofreading and proofreader's marks.

D. Test over sections 1 & 2.

II. Using the language of business communications. (6 weeks)

A. Nouns -- words that name persons, places and things, pp. 16-27 (6 days)

1. Kinds of nouns
2. Capitalizing
3. Plurals
4. Possessives
5. Proofreading for noun errors
6. Test Section 3 - nouns

B. Pronouns -- words that take the place of nouns, pp. 28-36 (3 days)

1. Kinds of pronouns
2. Person, gender and case of pronouns - agreement
3. Proofreading

C. Verbs -- words that show action, pp. 37-54 (8 days)

1. Diagnostic Test in Verbs (supplemental exercise)
2. Kinds of verbs
3. Principal parts, voice, and mood
4. Tense of verbs
5. Irregular verbs
6. Spelling of some irregular verbs - the doubling rule
7. Verbals
8. All verbs synthesis and proofreading
9. Test

D. Agreement of nouns, pronouns, and verbs, pp. 55-63 in test (4-5 days)

1. Agreement of subject and predicate
2. Agreement of pronouns and their antecedents
3. Synthesis of agreement and proofreading
4. Test

E. Adjectives and adverbs, words that describe, pp. 64-73 in text (1 week)

1. Comparison of adjectives, absolute adjectives
2. Adverbs - comparison and formation
3. Using adjectives and adverbs correctly

F. Prepositions and conjunctions (1 week)

1. Prepositions required by certain words
2. Conjunctions and conjunctive adverbs
3. Parallel Construction
4. Synthesis, correction and proofreading
5. Quiz

G. Spelling and speech checkup, sections 1-8. (2-3 days)

H. General Review of sections 3-8 (Unit Two in the book) using supplemental exercises followed by a test.

III. Controlling ideas by using punctuation. (3 weeks)

A. The period

B. The question mark and exclamation point

C. Expressing numbers pp. 91-93.

D. Using the comma, pp. 95-104 in text.

E. Using the dash, semicolon, colon, pp. 105-112 in text.

F. Other punctuation marks

1. Quotation marks
2. Parenthesis
3. Ellipses
4. Virgules
5. Brackets

G. Order and spacing of punctuation marks

H. Review of all punctuation marks

I. Test

IV. Homonyms and Similar Words (1 1/2 - 2 weeks)

A. Homonyms

B. Similar words

C. Compound words

D. Test on homonyms and similar words or daily quizzes

V. Expressing Ideas correctly, pp. 151-161 in text (2 weeks)

A. Clauses and phrases

1. Clauses
2. Phrases
3. Dangling Elements

B. Writing effective sentences and paragraphs, pp. 161-178 in text.

1. Unity
2. Coherence
3. Emphasis
4. Paragraphs
5. Euphony and positive language
6. Worn-out expression and redundancies
7. Synthesis and application
8. Test

VI. Word Division

VII. Comprehensive test of writing and proofing skill covering all material to page 180 in the book. Emphasis is on application of skills learned. (2-3 days review with supplemental sheets)

VIII. Speaking and listening (2 weeks)

A. Your voice and speech, pp. 384-392 in text

1. Phonation

a. Pitch
b. Intensity
c. Duration
d. Quality

2. Articulation
   a. Vowels
   b. Consonants
   c. The letter "r"
   d. Tongue twisters
3. Record voices and evaluate with speech rating sheet.

B. Learning how to listen, pp. 393-402 in text

1. The importance of listening
2. Listening to obtain information
3. Listening to solve problems
   a. Defining the problem
   b. Explore and analyze
   c. Concluding and evaluation
4. Listening to persuade or to dissuade
   a. How to win an argument
   b. Skill Builders 39-C
   c. How to use logic (supplemental)
5. Using the "Tele-trainer"

IX. Business Vocabulary (2 weeks). All lists are supplemental.

A. General business and office terminology

B. Insurance terms

C. Credit and banking terms

D. Basic medical terms (roots)

E. Civil Service and business forms

KEY Progress Quiz - exercises in the text, numbered the same as sections.

Activity - Exercises from the workbook which have been thermofaxed and are clearly marked in the files.

Supplemental Exercises - Drills, practices, etc., which have been typed and duplicated and are stored in the file chronologically along with the Activities.

Tests - Tests are stored in the files chronologically by unit.

626 EFFECTIVE BUSINESS COMMUNICATIONS (2 - 4)

COURSE DESCRIPTION

Emphasis in the course is on the "how-to's" of business writing and speech. Important units are: (1) Business Letters (Resumes and Letters of Application, Sales and Promotion Series, Credit and Collection, and Adjustment and Complaint); (2) Speaking, Listening, Telephoning, Interviewing, and Conversation; (3) Ethical responsibilities of the business writer -- both employer and employee.

The course method includes lectures, discussions, field trips, guest speakers, oral reports, group presentations, and a great deal of writing and analysis of writing. Successful completion of FUNDAMENTALS OF BUSINESS ENGLISH (or an adequate grade on the exemption test) is required before taking this course. Also required is typing ability.

OBJECTIVES

The student will:

1. learn to write clear, concise, complete, courteous, and correct business communications.
2. become familiar with office etiquette, ethics, and common practices.
3. learn business-related vocabularies.

OUTLINE

I. Preparing to write business leters, pp. 182-208 in text (1 week)

A. Parts and styles of letters

B. The tone of the business letter, pp. 209-218 in text

II. Everyday business letters, pp. 220-228

A. Personal business letters (4 days)

1. Invitations
2. Reservations
3. Obtaining speakers and congratulations
4. Quiz

B. Letters that seek or supply information, pp. 229-237 in text (4 days)

1. Inquiries and requests
2. Answering inquiries and requests
3. Supplemental writing assignment

C. Letters involved with ordering goods, pp. 238-246 (4 days)

1. Order letters
2. Test over sections B and C (pp. 229-246)

D. During on-the-job training, those students in school will go with business classes to the O.P. Room for team teaching of letters and techniques.

III. Sales Letters, pp. 248-272 in text (3 weeks)

A. Planning and writing the sales letter

1. Planning

a. The sales steps
b. The right appeal
c. Propaganda and sales techniques
d. Supplemental exercises
e. Skill Builders 24-A. p. 259

2. Writing the sales letter

a. Skill Builders 24-B, 24-C, 24-D, 24-E
b. Activity 22
c. The newspaper

B. Sales letter systems and methods

1. Sales series
2. Business-Promotion letters
3. Form letters

C. Test over sales letters

IV. Employment letters, pp. 273-294 (5 weeks). This leads up to and culminates in Senior Career Day.

A. The letter of application

1. Types of application letters
2. Parts of application letters
3. Planning the letter of application
4. Skill Builders 26-A, p. 286

B. The Data Sheet

C. Other Employment Letters

1. Thank you and follow-up letters
2. Accepting or declining a position
3. Letters of resignation
4. Reference letters

D. The interview and applications

1. Video-tape interviews
2. Supplemental applications

V. Credit and collection letters, pp. 295-319 in text (2 1/2 weeks)

A. Writing letters about credit

1. The bases and types of credit
2. Extending and refusing credit

B. Collection letters

1. The collection series
2. Other collection methods

VI. Adjustment letters, pp. 320-336 (1 1/2 weeks)

A. Direct vs. persuasive adjustment requests

B. Handling adjustment letters

VII. Other written communications, pp. 337-361, 370-381 in text (2 weeks)

A. Memoranda and telegrams

B. Business reports

C. Your responsibilities as a business writer

PROCEDURE

A letter will be typed once a week in business class on days when time tests are given. Teachers in the Business Department will grade carbons of these letters for technique.

627 READING WORKSHOP (1, 2)

COURSE DESCRIPTION

Basic reading skills will be emphasized in this course. The course will focus on study skills needed in other subject areas, increasing your reading vocabulary, and reading for pleasure. There will be daily short reading assignments with comprehension checks, as well as outside reading of the students' choice.

OBJECTIVES

The student will:

1. further develop his reading vocabulary.
2. improve his comprehension.
3. become familiar with basic study techniques.
4. learn to critically analyze material.
5. enjoy independent, functional, and recreational reading.

MATERIALS

SRA Reading Lab IIIa
SRA Reading for Understanding
Reading for Meaning
How to Read Your Newspaper
Reading Comprehension Workshop
Learning Words in Context
Reading Skills for Young Adults
Skills in Reading 1 and 2
Tactics in Reading III
The Reading Line
Tactics B in Reading
Portland Press Herald

Suggested teacher source materials:

Teaching Reading to the Untaught by Michael P. O'Donnell
Improving Reading in Every Class by Ellen L. Thomas and H. Alan Robinson
Diagnostic and Remedial Reading for Classroom and Clinic by Robert M. Wilson

PROCEDURES

1. Suggested class schedule: Weeks I and II

   A. Testing to determine each student's individual reading levels (independent, instructional, and frustration), including rate of reading, comprehension abilities, and recognition of isolated words.

B. Inventory of Study Skills to be given to each student.

C. Introduction of independent reading and attendant record-keeping materials.

D. Determination of program for each student; materials to be used, goals, skills to be stressed. This is to be done with student through individual conferences. Each student's assessment of own needs to be considered as well as teacher evaluation.

2. General class schedule:

Monday - Individual or small group work on study skills and vocabulary development.

Tuesday - Class use of newspaper.

Wednesday - Individual or small group work on study skills and vocabulary development.

Thursday - Individual work on speed and/or comprehension.

Friday - Independent reading; teacher/student conferences.

As far as possible, each student will work individually, on his own program for improvement at his own rate, under teacher guidance. Frequent evaluations of individual progress and program are to be made throughout the course with the assistance of the student.

3. Suggested Activities

A. Folder - Each student is to keep a folder in which he records his and his teacher's assessment, his program, his progress, a record of books read and activities followed. This folder is also to include a list of his own spelling and vocabulary words.

B. Newspaper - editorials and news items: fact vs. opinion
study skills - sequence
headlines: vocabulary development
scanning for facts
consumer problems

C. Textbooks in other content areas - how to read material (PQRST)
use of table of contents, index, glossary
special aids
technical vocabulary
how to read and use charts, graphs, maps, and illustrations

D. Assorted texts (drivers' manual, medical guide, consumer reports, cookbooks, train and bus schedules, appliance manuals, phone book)
use of charts, diagrams, graphs
rate of reading
following directions
evaluating data

E. Library - tools in library to be used in content areas
use of card catalog
alphabetizing
wise choice of books for pleasure reading

4. Other Suggestions

A. Vocabulary development:

Incorporate spelling instruction with writing activities
Learn words in contextual settings
Learn by experience
Instruction and practice in use of context clues

B. Comprehension

Emphasize specific skills: organization, determining main idea, important details, generalizations, drawing conclusions
Vary types of questions asked - literal, interpretive, applied

C. Reading Rate

Help students to evaluate materials to determine appropriate reading rate
Provide wide variety of materials
Work against time if comprehension rate permits

630 PLAY PRODUCTION (1 - 5)

COURSE DESCRIPTION

This course is designed for those who want to learn all aspects of staging a play and like to learn by doing. Each class will select and produce a one-act play of its own. In the process everyone will learn the fundamentals of acting, directing, set-design and construction, costuming, make-up, and sound effects. Each student will select one area to specialize in and actually do for the play. Several field trips are planned. Course method is primarily discussion and actual group work.

OBJECTIVES

The student will:

1. gain a working knowledge of all aspects of live theatre--both artistic and technical--by having the class select and produce a play.

2. develop expertise in one or two specific areas of the theatre by research, plan and performance of that aspect in the production.

3. in the course of the semester, develop a spirit of teamwork and an appreciation and respect for others' talents; if not, the production will fail, which is an educational experience also.

4. become familiar with play production on the amateur level as an introduction to the world of the performing arts and career possibilities within this multi-faceted field.

5. practice oral communication of ideas and opinions in clear, tactful, and logical terms.

6. learn about his personal assets and liabilities through the interdependence of play production.

OUTLINE

Students will be expected to read one play a week outside of class and report on file cards and/or orally. Each file card should contain: title, author, number of acts, number of characters of each gender, setting (time, place, etc.) and number of set changes, a three-sentence plot synopsis, and a recommendation as to the play's appropriateness for production in the high school.

I. Why put on a play? (2 days)

A. Read and discuss pages 1-9 in text, Play Production in the High School.

B. Record: "The Cocktail Party"

II. Acting (4 weeks) - All presentations should be taped. The student himself and others in the class should write brief evaluations.

A. The voice, pp. 63-72 in text.

1. Being heard
   a. Breathing exercises
   b. Breath control and projection
2. Being understood
   a. Tongue twisters
   b. Ogden Nash poems
   c. Enunciation and dialect

B. The body

1. Analyze individual habits and gestures from presentations which have been videotaped.
2. Read and discuss 72-74 in text.

C. Stage Orientation, pp. 75-84 in text.

1. Learn terminology and chart, p. 33.
   a. #7, p. 91
   b. Visit a theatre or stage at Mahoney
2. Crosses, exits, entrances
   a. #8, p. 91
   b. #9, p. 91
3. Balance
4. Field trip to Mahoney or Thaxter Theatre.

D. Building a Character, pp. 84-90 in text.

1. #4, p. 91
2. #11, p. 91
3. Class trip to a play or movie; analyze the acting.

E. Student-memorized acting presentations.

III. Stagecraft, pp. 93-167 in text (4 weeks)

A. The Stage

1. Traditional Proscenium
2. Arena Staging
   a. #1, p. 170
3. The Thrust stage
4. Read pp. 25-30

B. Scenery

1. Read 99-171
   a. #3, p. 170
   b. #6, p. 170
   c. Make a model set for one of the plays read outside of class.
   d. #18, 19, p. 171

IV. Production

At this point no syllabus can accurately predict or outline what is to be done. That will depend on the group of students involved and the available resources. With the exception of the last three weeks, the rest of the semester will be spent in production of a play. It seems that it best serves the purpose of this course outline if methods of control and organization are listed, rather than an outline - since play production requires simultaneous work with many facets of theatre.

1. The director (teacher) should select the play - not the students. He can best evaluate the talents and skills of the class.

2. Non-acting people should be immediately organized into small groups to cover technical areas. Each group should elect a "leader."

3. Daily individual or group files should be kept so the progress in every area is easily checked.

4. Weekly meetings of "leaders" should be held to coordinate efforts.

5. Production deadlines should be clear to everyone by the beginning of the second week of rehearsal.

6. No prompter should be used.

7. Regular student self-evaluations are useful in keeping all students working.

8. Acting people not immediately needed on stage should be told to report to a technical group to help them.

9. An assistant to the director is useful for taking notes, checking blocking, etc.

10. If there is a large group, parts can be doubled with each student performing half the performances.

11. Elaborate lighting or set shows should be avoided in cramped areas.

V. Post-rehearsal analysis (1 week)

If things work out as hoped, the class will be able to present a play for other classes, or even the school. If the group wants, the play could be entered in the One-Act Play Festival in the spring. In order for this course to work as it should, the cooperation of some of the other departments will be necessary.

VI. Storytelling

The last three weeks can be utilized for this fascinating field. It requires different skills than acting and shows different versatilities.

A. What is storytelling?

1. History
2. Contemporary sources
3. The professional storyteller

B. Student stories

1. Each student should research, learn and present a story.
2. Filmstrip, illustrations or props can be used to good advantage.
3. The best storytellers and films can go to the elementary schools for presentations.

READING LIST

Aeschylus	Agamemnon
	Seven Against Thebes
Sophocles	Oedipus Rex
	Oedipus at Colonus
	Antigone
	Electra
Euripedes	Medea (Jeffers Translation)
	The Trojan Women
	Orestes
	Electra
Aristophanes	The Birds
	The Clouds
	The Frogs
Machiavelli	Mandragola
Moliere	Any play, but particularly:
	The Miser
	Tartuffe
	The Imaginary Invalid
Anonymous	Everyman
	The Second Shepards' Play
	The Castle of Perseverance
	Abraham and Isaac
	Johan Johan
Shakespeare	Any play
Jonson	Everyman in His Humour
	The Knight of the Burning Pestle
	The Alchemist
	Volpone
	Bartholomew Fair
Corneille	Le Cid
	The Death of Pompey
Racine	Phedre
	Britannicus
	Esther
Sheridan	Any play, but particularly:
	A School for Scandal
	The Critic
	The Rivals

Schiller	Maria Stuart
Voltaire	Irene
Beaumarchais	The Barber of Seville
	The Marriage of Figaro
Picard	The Merry Widow
Boucicault	The Corsican Brothers
	The Octoroon
Pinero	Any play
Wilde	Any play
Ibsen	Any play
Gorki	The Lower Depths
Synge	Any play
Odetts	Any play
Tolstoi	Any play
Gogol	Any play
O'Neill	Any play
Miller	Any play
Brecht	Any play
Fry	Any play
Bolt	A Man for All Seasons
Beckett	Any play
Artaud	The Marat/Sade
Wilder	Any play
Saroyon	Any play
Marlowe	Any play, but particularly:
	Doctor Faustus
Webster	White Devil
	The Duchess of Malfi
Calderon	Life is Sweet
Cervantes	Numancia
Lope de Vega	The Sheepfold (fuenteovejuna)
Beaumont & Fletcher	Any play
Addison & Steele	Any play
Congreve	Any play
Gay	The Beggar's Opera
Goldsmith	She Stoops to Conquer

Goethe	Wilhelm Meister
	Wallenstein
	Wilhelm Tell
Maeterlinck	Pelleas et Melisande
Goldoni	Servant of Two Masters
	La Locandiera
Hugo	Hernani
	Ruy Blas
Taylor	Our American Cousin
Devereux	Henry of Navarre
Lewis	The Bells
Shaw	Any play
Strindberg	The Father
	Miss Julie
	The Dance of Death
Lermontov	Maskerad
Turgeniev	A Month in the Country
Pirandello	Any play
O'Casey	Any play
Williams	Any play
Giraudoux	Any play
Anouilh	Ring Around the Moon (trans. C. Fry)
Ionesco	Any play
Albee	Any play
Garcia	Any play
MacLeish	Any play, but particularly:
	J. B.
Hellman	Any play

631 DOUBLESPEAK (3 - 5)

COURSE DESCRIPTION

This course offers practice in critical reading, straight thinking, and clear writing. The student, through study of the Public Doublespeak in our society, will learn to examine deceptive advertising, slanted reporting, propaganda and other forms of Doublespeak, using the newspaper, magazines, and films for research and group study. There will be much reading and discussion. Any student who reads well, whether or not he intends to go on to college or technical school, may elect this course. Writing assignments will stress simplicity and clarity of expression of student's thought.

OBJECTIVES

The student will:

1. discern basic persuasive elements that influence people to follow certain leaders and to adopt certain courses of action.

2. discriminate between types of persuasion which affect one's (or society's) best interest and those that serve special interests.

3. find and analyze examples of various types of propaganda in media, books, and daily experiences.

4. given goal and techniques, design an honest advertising or propaganda message.

OUTLINE

Three Weeks Introduction (Text)	Define truth; factors leading to confusion; terminology; differing viewpoints in the media.
Other sources: magazines, newspapers, TV, radio, books	Explore all areas of doublespeak in our language. 1. Use examples from diplomacy, politics, education, journalism, television, religion, advertising, everyday conversation, courting, and family life. 2. Discuss significance of doublespeak in each area. 3. Examine positive as well as negative aspects of propaganda. 4. Explore the purposes of doublespeakers. 5. Analyze words; suggest alternates and their change in meaning (connotation, denotation, euphemism, hyperbole, etc.).

6. Discuss effect of doublespeak on us as children, adolescents, adults. (Do children misunderstand adult words? For example: James Agee's A Death In The Family.)

Two Weeks Chapter I (Text)	Define arguments; signpost words; assertions (devoting classroom time to activities presented in this guide and in the text).
	Students will examine list of suggested term projects with intent to choose one to develop as oral report - through research, evidence gathering, analyzing, evaluating, and concluding. After oral presentation to the class at the end of the semester, the final paper will be turned in for a composition grade.
	Early choice of topic will allow time for research and preparation.
Two Weeks Chapter II (Text)	Present evidence; objective evidence; subjective evidence; tests of evidence (devoting classroom time to activities presented in this guide and in the text).
Two Weeks (Chapter III	Discuss reasoning; degrees of logical proof; inductive reasoning by analogy and its tests; causal reasoning and its tests (devoting classroom time to activities presented in this guide and in the text).
Two Weeks Chapter IV	Discuss deductive reasoning; syllogisms; dilemmas (devoting classroom time to activities presented in this guide and in the text).
Two Weeks Chapter V	Study the fallacies - definitions, examples, and refutations (devoting classroom time to activities presented in this guide and in the text).
Five Weeks Research, library, periodicals, interviews, etc.	Students do independent study in preparation for their term projects; teacher functions as research guide, directs their efforts, and helps them find material. (Projects may be chosen from suggested list or at student's will, subject to teacher's approval.)
	Vocabulary: generalization, deductive, inductive, argument, assertion, evidence, propaganda, opinion, fact, inference, controversy, analogy, literal, figurative, connotation, denotation, hyperbole, euphemism, conclusion, causal, alleged, relevant, cause and effect, syllogism, hypothesis, dilemma, refutation, Non Sequitur, fallacy, oversimplification, logic, apriorism.
	Review all chapters. Test if desired.
	Students present oral reports on their term projects. Display finished compositions.

632 SPEECH (1 - 5)

COURSE DESCRIPTION

The development of effective speaking and listening habits is the main goal of this course. The student will find opportunities to develop confidence and improve oral skills in everyday speaking situations: educational, social, civic, and vocational.

OBJECTIVES

The student will:

1. develop confidence in organizing material from an outline and from notes.
2. gain skill in presenting that material in a variety of situations for several audiences.
3. improve his techniques in participating in group discussions, informal and formal speeches.
4. acquire confidence in speaking in public.
5. learn the need for listening more carefully and intelligently.

OUTLINE

I. Topic: Speech in school situations

A. Informal speeches
B. Oral reading
C. Discussions
   1. panel
   2. group
D. Formal reports

Activities:

1. Ask students to talk about themselves. This may take the form of a speech about past experiences or future plans.
2. Have students prepare oral readings after listening to selections of recordings of famous speakers.
3. Divide the class into groups for discussions. After each student has offered a specific segment of the discussion, the group should correlate the information.
4. Require students to outline formal speeches using reference materials.
5. Have students present three to five minute reports to the class.
6. Ask students to use audio and visual aids for an informative report.

7. Require students to offer book reviews containing critical analysis.
8. Have students present dramatic skits or scenes from plays.
9. Tape student reports and presentations.
10. Evaluate tapes using student and teacher devised rating scale.

II. Topic: Speech in civic situations

A. Formal introductions and presentations of awards
B. Announcements
C. Political speeches
D. Parliamentary procedure

Activities:

1. Have students prepare formal introductions of speakers and class visitors.
2. Provide opportunities for students to present awards at school functions and assemblies.
3. Assign preparation of nomination speeches for class offices.
4. Listen to famous political speeches. Evaluate effectiveness of speaking techniques.
5. Have student give oral analysis of a particular aspect of a political campaign.
6. Conduct meetings practicing basic rules of parliamentary procedure.
7. Attend community and civic meetings to evaluate process of parliamentary procedure and to learn the value of public discussions.

III. Speech in vocational situations

A. Telephoning
B. Interviewing
C. Reporting

Activities:

1. Have students give and follow oral directions that would apply to job situations.
2. Require students to practice effective techniques of telephone communication: requesting materials, making appointments, arranging for class speakers.
3. List habits that hinder listening. Suggest corrective measures.
4. Role play situations involving oral communication with the public.
5. Present an original speech selling a product.
6. Prepare mock interviews applying for jobs.
7. Present persuasive speech using statistics.
8. Write pertinent questions to be used when interviewing people on the job.
9. Apply for work through personal interviews.
10. Video tape class interviews.
11. Evaluate effectiveness of video presentations.

633 PLAY READING AND THE THEATER (3 - 5)

COURSE DESCRIPTION

Aristotle called drama "imitated human action." In print, drama is the literary form most closely allied with human experience itself. If you wept at a performance of Love Story or shuddered at the demonical influences in the Exorcist, you were enjoying play acting. Play reading and the study of the theater are equally enjoyable. Plays, as we know them, cover a period of about 2500 years and present an endless procession of characters and scenes that bring excitement into our lives. Flexibility in the drama course will permit students to concentrate upon their own specific interests and to plan and participate in group projects connected with the theater.

OBJECTIVES

The student will:

1. gain understanding of the drama as a literary form.
2. develop skill to read the drama with understanding, imagination, and enthusiasm.
3. become familiar with the terminology of drama and the stage so that he can use it properly and fluently.
4. become acquainted with the various types of drama.
5. acquire some knowledge of the history, background, and development of drama.
6. develop by means of reading drama his ability to make critical analysis of human motives and actions, and gain insight into human experience, both of his contemporaries and of the adult world.
7. share through open discussion in class his ideas and opinions.
8. formulate ideas and opinions and express them both orally and in writing with clarity, coherence, and correctness.
9. enlarge his vocabulary and his ability to use words in the proper context.
10. learn the importance of syntax, diction, and style; and become aware that good writing is a discipline.

OUTLINE

With the list of plays available for the course, the teacher will be able to formulate his own program and design his own units. It would seem that a semester course could reasonably include five to eight plays. The study of a Greek tragedy or a Shakespearean drama will consume more time than the reading of a modern play. In any event, the teacher should use discretion in determining

the amount of sustained reading his class can absorb. If pupil interest lags, the unit should be interrupted, and continued when the teacher deems the time propitious. Whenever audio-visual materials are available and relevant, they may be used to change the pace and stimulate interest.

There follow three suggested approaches to the course:

CHRONOLOGICAL:

Oedipus Rex or Antigone
Everyman
Dr. Faustus
One of Shakespeare's dramas
Discussion of Restoration Drama (research by the pupils in groups and selected readings from She Stoops to Conquer by Goldsmith or The Rivals by Philip B. Sheridan)
Cyrano de Bergerac
An Enemy of the People
A twentieth-century modern play

GENERIC:

Greek Tragedy: Oedipus or Antigone
Morality Play: Everyman
Elizabethan Drama: Julius Caesar, Macbeth, Hamlet (choose one)
Tragi-comedy: The Merchant of Venice
Modern Tragedy: The Emperor Jones or Street Scene
Comedy: Life With Father or Arsenic and Old Lace
Drama of Social Criticism: Enemy of the People, R.U.R., High Tor (the latter contains elements, too, of melodrama and farce)

THEMATIC:

MORAL PRINCIPLE
Antigone
Julius Caesar
The Cherry Orchard
Enemy of the People
Yellow Jack
One Third of a Nation
The Emperor Jones
The Winslow Boy

POWER - GREED - DESIRE
Dr. Faustus
Macbeth
Elizabeth the Queen
The Emperor Jones
Enemy of the People

MATERIALISM
Macbeth
An Enemy of the People

R.U.R.
Golden Boy
High Tor (a notation previously listed)

CLASS CONSCIOUSNESS - RACE PREJUDICE - FREEDOM OF CONSCIENCE
Loyalties
The Admirable Crichton
Antigone
The Crucible
A Man for All Seasons
Murder in the Cathedral

HISTORY - BIOGRAPHY
A Man for All Seasons
Elizabeth the Queen
The Barretts of Wimpole Street
Abe Lincoln in Illinois
The Magnificent Yankee

Texts and Plays

SIX COMPLETE WORLD PLAYS and A HISTORY OF WORLD DRAMA
Marcus Konick, Globe Book Company

Antigone, Sophocles
Everyman (medieval Morality Play) Anonymous
Cyrano de Bergerac, Edmond Rostand
An Enemy of the People, Henrik Ibsen
The Cherry Orchard, Anton Chekhov
Caesar and Cleopatra, George Bernard Shaw

DRAMA IN OUR TIME
M. M. Nagelberg, Harcourt, Brace and Company

Watch on the Rhine, Lillian Hellman
Our Town, Thornton Wilder
R. U. R., Karel Capek
Abe Lincoln in Illinois, Robert E. Sherwood
Yellow Jack, Sidney Howard and Paul de Kruif
One Third of a Nation, Arthur Arent

DRAMA IN OUR TIME

Dramatic Passages from
Winterset by Maxwell Anderson
Jacobowsky and the Colonel by Franz Werfel
Oklahoma! by Oscar Hammerstein II (Lyricist)
The Front Page by Ben Hecht and Charles MacArthur

FAVORITE MODERN PLAYS
Felix Sper, Globe Book Company

The Winslow Boy, Terence Rattigan
The Admirable Crichton, James M. Barrie

Life with Father, Howard Lindsay and Russel Crouse
The Barretts of Wimpole Street, Rudolf Besier
Loyalties, John Galsworthy

Idiot's Delight, Robert E. Sherwood
Street Scene, Elmer L. Rice
The Time of Your Life, William Saroyan

NOBLE'S COMPARATIVE CLASSICS
H. E. Harding (ed.), Noble & Noble, Publishers, Inc.

Julius Caesar, William Shakespeare
Elizabeth the Queen, Maxwell Anderson

Macbeth, William Shakespeare
The Emperor Jones, Eugene O'Neill

Oedipus Rex, Sophocles

The Tragical History of Doctor Faustus, Christopher Marlowe

The Merchant of Venice, William Shakespeare

Hamlet, William Shakespeare

Richard II, William Shakespeare

Murder in the Cathedral, T. S. Eliot

A Man for All Seasons, Robert Bolt

The Crucible, Arthur Miller

Arsenic and Old Lace, Joseph Kesselring

634 CAREER PREPARATION (1 - 5)
English/Guidance

COURSE DESCRIPTION

This course is jointly sponsored by the English and Guidance departments. A wide variety of experiences will be explored by students with speakers from the community, teachers of other departments, and much guided discussion in the vital areas of life, career, and society.

Students will learn "survival" skills for job or college entry, including interviewing, telephoning techniques, listening skills, and the writing of applications, résumés, and letters. This course will emphasize social relationships, decision making, career preparation and values.

OBJECTIVES

The student will:

1. identify his own interests as they relate to a career choice.
2. be aware of job opportunities in the Greater Portland area.
3. demonstrate his ability to gather and assess information about a career of his choice.
4. be aware of his responsibility for making career decisions.
5. be aware of volunteer service projects in the area.
6. develop an awareness of financial and consumer resources.

OUTLINE

I. Orientation

A. Become acquainted with the objectives of the course: content, methods, assignments, and evaluation.

B. Make a needs assessment checklist to determine student objectives.

C. Take a series of career preference tests and discuss results in small groups:

Kuder Preference Test	Job O
Self-Directed Search	Occuscan

D. View films or filmstrips which give an overview of the job clusters.

II. Exploration of the World of Work

A. Visit Career Resource Room for orientation by Mrs. Blanche Mack.

640 THE HERO AND ANTI-HERO IN ENGLISH AND AMERICAN LITERATURE (5)

COURSE DESCRIPTION

This course will replace the Advanced Placement program. It will stress the analysis of the ethical, spiritual, and physical challenges confronting the protaganists in a wide range of dramas, short stories, novels, and poems.

The course is designed for the exceptional student of English. He must be intellectually mature, capable of accepting constructive criticism, and sincerely interested in the mechanics and literature of the English language. Each student is required to participate effectively in discussions, to write thoughtfully and maturely about literary matters, and to involve himself in independent research projects.

The fundamental purpose of the course is to teach the student how to analyze works of literature and how to express himself about them.

OBJECTIVES

The student will:

1. learn to read, analyze, and intelligently criticize significant works of literature.

2. learn to deal with the type of writing assignments, research projects, and discussion seminars which characterize the college experience.

3. develop an academic vocabulary and a mastery of grammatical, syntactical, and usage skills.

OUTLINE

I. Time: Four weeks

Text: Hero and Anti-Hero, Roger B. Rollin, McGraw-Hill Company

Topics:

A. Identification and analysis of heroes and anti-heroes in plays, poems, and short stories
   1. The Super Man
   2. The Supreme Man
   3. The Leader
   4. The Common Man Hero
   5. The Lowly Man Hero
B. The metaphor of the quest or vital mission
   1. The Quest for Honor and Glory
   2. The Quest for Victory
   3. The Quest for Social Order
   4. The Quest for Love

Audiovisual Materials:

1. Carousel filmstrips and records
   Two lessons, Hero and Anti-Hero
2. Resource Center 16mm movie, "Bartleby the Scrivener"

Suggested Activities:

1. In-class essays
2. Lectures
3. Class discussions
4. Oral interpretations

II. Time: Five weeks

Texts:
1. The Lord of the Flies - Golding
2. The Old Man and the Sea - Hemingway
3. Of Mice and Men - Steinbeck
4. Animal Farm - Orwell
5. 1984 - Orwell

Topics:

1. The Lord of the Flies
   Emphasize that symbolic structure of the novel underscores the author's theory that all defects in society can be traced back to the fundamental defects in human nature.
2. The Old Man and the Sea
   Emphasize the constant theme of man vs. nature. Analyze the character of Santiago as symbolizing everything admirable in human nature.
3. Of Mice and Men
   Explore the novel in terms of the concept of the "Lowly Man Hero."
4. Animal Farm
   Emphasize satire and symbolism of totalitarian philosophies and autocratic rulers.
5. 1984
   Explore the concept of Anti-Utopia and the Anti-Utopian novel.

Audiovisual Materials:

1. Filmstrips (South Portland High School Library)
   a. "George Orwell, Animal Farm and 1984"
   b. "Steinbeck's America"
   c. "Ernest Hemingway"
   d. Resource Center, 16mm movie
      "The Novel: What it is and what it does"

Suggested Activities:

1. Essay tests
2. Lectures
3. Class discussions
4. Outside reading
5. Oral reports

III. Time: One week

Text: Seven Novellas, Dillenbeck and Schweitzer, Charles Scribner's Sons

Topics:

1. The Short Happy Life of Francis Macomber
2. May Day
3. The Old Maid
4. Youth
5. The Party at Jack's

Brief written paragraph each day in which student classifies the protagonist of each novella in terms of his heroic or anti-heroic qualities in relation to the story's thematic nature.

Suggested Activities:

1. Utilization of discussion questions
2. Essay: comparison and contrast

IV. Time: Eight weeks

Texts: Oedipus Rex - Sophocles
Hamlet - Shakespeare
Six Complete World Plays - Konick, Globe Book Company

Topics:

1. Greek tragedy and its effect on modern drama
2. Tragic heroes: compare Oedipus and Hamlet in terms of heroic qualities and concepts revealed in course reading selections

Audiovisual Materials:

1. Resource Center: Four 16mm films
   a. "The Age of Elizabeth"
   b. "What Happens in Hamlet"
   c. "The Poisoned Kingdom"
   d. "The Readiness is All"
2. Resource Center: Four 16mm films
   a. "The Age of Sophocles"
   b. "The Character of Oedipus"
   c. "Man and God"
   d. "The Recovery of Oedipus"

Suggested Activities:

1. Oral readings
2. Discussions
3. Dramatizations

V. Time: Two weeks

Text: Stories From Six Authors, Buckler, McGraw Hill

Topics:

A. Identification and analysis of heroes and anti-heroes in each short story

1. The conflict between generations is a theme explored by different means in each selection in the anthology.

Audiovisual Materials:

1. Resource Center: 16mm movies
   a. "My Old Man" - Hemingway
   b. "The Lady or the Tiger" - Stockton
   c. "The Lottery" - Shirley Jackson
   d. "Occurrence at Owl Creek Bridge" - Ambrose Bierce

Suggested Activities:

1. Written interpretations
2. Discussions
3. Essays
4. Composition of short-short story by pupils

641 THE BIBLE AS LITERATURE AND MYTHOLOGY (4, 5)

COURSE DESCRIPTION

The first half of this course gives the student an opportunity to study the Bible, a major influence on man's thoughts for centuries, and to gain some understanding of conditions in Biblical times and the purposes that lie behind these writings. Special attention will be given to the variety of literary forms, the development of characters, and the influence of the Bible on present day literature.

During the second half of this course students will study classical mythology, one culture's attempt to explain the mysteries of life. Myths are pleasurable to read and a knowledge of them is a key to understanding the literature of the Western world.

I. THE BIBLE AS LITERATURE

OBJECTIVES

The student will:

1. recognize the Bible as good literature in all forms.
2. review the conditions giving rise to the writings.
3. compare and contrast the writings with more familiar literature.
4. become aware of familiar references and quotations.
5. recognize the biblical theme in music and art.
6. increase his appreciation of why the Bible is a best seller; it is contemporary as well as ancient.
7. read independently sections of the Bible not required in this course.

OUTLINE

Students will read the original Bible versions of stories and comments by other authors. They will write commentaries and essays related to their reading. Some assignments will deal with archaeological discoveries and historical material that must be researched. Oral reports will be assigned.

MATERIALS

Basic text: King James Version of Bible
On Teaching the Bible as Literature - Ackerman
The Bible as Literature - Cappe
Selected records and readings

Week I - Background on the Old Testament

Using Ackerman's text for background material, by outline, lecture and assigned reading, the history of the Israelite nation is traced from early Mesopotamian culture to David and the emergence of Kingship. The geographical location is surveyed by maps or pictures.

Week II - A Survey of Israel's Literature from Oral Traditions to Printed Bibles

Comparison is made of Yahweh and Elohist writers in early accounts.

The epic accounts of Abraham, Cain and Abel, Noah, the Tower of Babel by the above writers are read.

Development of translations from the Hebrew-Aramaic-Latin-English-newest and revised editions are examined.

Readings from students' own Bibles and oral readings for comparisons will be assigned.

Week III - Origins of Man

Stories of creation from the Bible are compared with those from other cultures. Discussion will follow oral readings. Writing assignments might include "Loss of Innocence" based on Garden of Eden or other literature, or an original legend.

Week IV - Patriarchal Legends

Included are stories of Abraham, Sodom and Gomorrah, Isaac, Jacob-Esau conflict.

Using Ackerman for background and Capp's text for condensed stories, students will read from their own Bibles.

The themes here are basic to other literature - family saga, pioneer spirit, conflict between brothers, the fall of dissolute society. Discussions and writing will be based on these.

Week V - The Story of Joseph

Character development is traced from childhood to maturity, the rivalry in the family; Joseph's rise to power, the emphasis on dreams, his importance to Pharoahs, his unique position for power. Readings will be assigned from the Bible and Capps' condensed text.

Possible writing topics: Most Dramatic Incident
Dramatization of any section

Week VI - Moses-A National Leader

Review of Moses' entire life includes his destiny, the Exodus, the Commandments. Much material here lends itself to comparison with other literature,

pictures, music ("Let My People Go"). Themes of freedom, national leadership could be discussion topics or subjects for writing.

Week VII - The Prophets

A survey of prophetic literature, a special type, will include:

Prophetic discourse of Moses
Symbolic prophecy of Jeremiah
Vision prophecy of Daniel

The background giving rise to these men and the results. Readings will be assigned from the Bible, Ackerman, and Capps.

Week VIII - Lyric Poetry

The song; the ode - the elegy - dramatic lyric and others are studied. Oral readings and comparison to other literature will be included.

Week IX - The Story of Ruth

A complete story will be studied (time permitting).

Week X - The Book of Job

Emphasis on beauty of language, development of characters and main theme - man's undeserved suffering.

II. MYTHOLOGY

OBJECTIVES

The student will:

1. have the opportunity to read myths for enjoyment.

2. define "myth" and its relevance to man's development.

3. become acquainted with myths of the Greeks, Romans, and Norsemen and the allusions to these in our literature.

4. recognize the influence myths have had on art and music.

5. explore the imaginative ideas and emotions behind all myths from Homer's day to the present.

OUTLINE

The student will read regularly assigned myths, both familiar and unfamiliar, dealing with the mysteries of the universe. The "hero" theme will be reviewed as well as gifts of prophecy, poetic justice, devotion to good, remorse, bravery both mental and physical. Mythological references in literature, magazines, newspapers, advertisements will be sought by students. Oral and written reports will be assigned. Creative activities - original poems, original myths, short plays will be recommended.

MATERIALS

Mythology - Hamilton
Classical Myths That Live Today - Sabin
Golden Bough - Frazier
Metamorphoses - Ovid
Myths to Live By - Joseph Campbell
Selected records - audio visual materials

Week XI - Introduction to Mythology

The meaning of myths, their importance to the ancients and to us is discussed. The stories of creation in several cultures are compared with creation stories in the Bible. The Greek and Roman myths show emphasis on man's image, the human qualities in their gods.

Major and minor gods, their battle for control, are included.

Week XII - The Gods and Their Importance to People

All gods were worshiped in a special way. Emphasis is on two - answering people's needs:

Ceres - her special province - festivals - symbols - story of Demaphoon - the life cycle of agriculture.
Bacchus - of the vineyards - his unusual birth - life - death. His followers - festivals - Resurrection of life.

Week XIII - Creation of the World

Chaos - Erebus give way to Earth.
The first creatures, monsters, Titans appear.

Cronus' attempt to control.
Zeus survives - his importance is recognized.

The Prometheus-Epimetheus-Pandora myths offer a source of explanations for man's courage, daring, gifts to mankind, evils and problems.

The Flood stories, Pyrrha and Deucalion, reasons for man's survival, the stone people, are discussed.

Week XIV - Myths of Flowers - Lovers - Adventure

Included are:

Prometheus and Io
Europa (Oedipus)
Adonis
Narcissus
Cupid Psyche
Pyramus Thisbe
Others similar

Week XV - Myths of Heroes

Included are:

Jason - Bellerophon - Daedalus
Perseus - Theseus - Hercules - Lesser gods

Their stories - symbols - significance of bravery or cowardice. Metamorphoses for further study.

Week XVI - The Trojan War

Reasons and preparation for the war are examined. From the Iliad, Aeneas' account of the fall of Troy is read. The Disasters, Heroes and the Fall of Troy are studied. Scientific research on original Troy is an interesting project.

Weeks XVII - XVIII

The Odyssey and Ulysses' Adventures

The hero theme, his failings and good qualities are explored. The voyage is traced, and Ulysses' arrival at home.

The Aeneid - Aeneas' Destiny

Comparison is made of adventures of Aeneas and Ulysses. The emphasis is on Augustan era and glorification of Augustan line.

The Greek Tragedies

A review of famous plays (surface only) indicates the pessimism of characters for life in general. The importance of the Greeks in molding thought is stressed.

A review - summary - emphasizes the ideas expressed in reading myths.

645 INDIVIDUALIZED READINGS OF FICTION (1 - 3)

COURSE DESCRIPTION

The major goal of this course will be to show how reading can be a pleasurable experience for people of all reading abilities. Students will select their own reading material. Each book that is read will be evaluated by the student. Evaluations will include one of the following: teacher-student discussion, written reports, or creative projects suggested by the student or the teacher. Also, each student will keep a journal which will include his impressions of the books he has read.

OBJECTIVES

The student will:

1. increase his appetite for leisure time reading.
2. see some of the differences between the enjoyment of reading and the enjoyment of television and movies.
3. have an opportunity to discuss his book with the teacher or with the teacher and the class.
4. present his reactions to what he reads through various writing assignments.
5. explore the various elements of fiction that provide the reader with another level of enjoyment in reading.

MATERIALS

To Kill A Mockingbird - Harper Lee

There will be a classroom library of materials. Students are free to make their selections from this collection or any other source, such as school library, city library, or bookstores. The class will also have the opportunity to select books from a book club that will offer monthly selections.

OUTLINE

1. The following are the basic assignments for each book selected by the student. These assignments will be flexible according to the book and the particular time period during the semester.

   A. Student-teacher conference

   B. Project
      1. poster
      2. collage, montage
      3. book jacket
      4. composition
      5. tape recording - oral report
      6. oral-visual report
      7. student's choice

C. Journal - to be kept throughout semester. Entries will record what is read.

2. During the eighteen-week period, several lecture periods will be set aside to introduce to the student terms that may be used to analyze a piece of fiction. Five terms will be used by the student to describe the book that he has read: plot, character, setting, point of view, and theme.

3. To Kill A Mockingbird will be used by all class members to study the above terms.

4. With the exception of point of view, at any time during the semester extra credit may be received by reading a book and completing any one of the assignments worked on during the semester.

5. Weeks 1 & 2 - Choose a book and complete the three basic assignments.

Weeks 3 & 4 - Choose a book and complete a journal. In addition, there will be either a student-teacher conference or project.

Weeks 4 & 5 - View films "Hangman" and "Chemical Feast" to initiate discussion of theme. Choose a book and complete a journal. In addition, write a brief paragraph concerning the theme of the book.

Weeks 6, 7, 8 - Study To Kill A Mockingbird and its themes.

Weeks 9, 10, 11 - Teacher lecture [Plot]. Choose a book and complete one of the basic assignments. Write a paragraph concerning the theme of the book and a paragraph concerning the plot of the book.

Weeks 12, 13, 14 - Teacher lecture [Character]. Choose a book and complete a journal. Write paragraphs concerning theme, plot and character.

Weeks 15, 16, 17 - Teacher lecture [Point of View]. Choose a book and complete one of the three basic assignments in addition to writing paragraphs concerning theme, plot, character, and point of view.

Weeks 18 & 19 - Choose something other than a piece of fiction. Assignment will depend upon the genre.

646 CONTEMPORARY LITERATURE (2, 3)

COURSE DESCRIPTION

This course is designed to give students a vivid sense of modern times through poems, plays, short stories, and novels. A key question that students will try to answer is how does man survive and keep his identity in the face of automation, war, government, and the environment. CONTEMPORARY LITERATURE will make the student more aware of man's conflict with himself and others in the 20th century. Students will be expected to trace the development of these themes and to express their reactions in writing, discussions, and creative forms.

OBJECTIVES

The student will:

1. realize the boundless variety of literature available to him.

2. read, read, read.
   Discover pleasure as well as knowledge in reading. Form the habit of reading for fun.

3. broaden understanding of his own life through broader reading.

4. establish some evaluative standards for judging his own choices.

5. examine survival themes in literature (in face of war, change, automation, government, and environment).

6. examine identity of self and others in conflict with man and nature.

7. write one essay whose topic will come from objective 3, 5, or 6 above.

OUTLINE

A. Student Choice

Immediate emphasis early in this course is to be the easy, vast accessibility of books on countless subjects of interest to students, their freedom to choose, and development of their ability to choose well.

I. On the first day, the teacher will circulate among students various popular reading lists (N.C.T.E., Scholastic Magazine, Clifton Fadiman's list, Dartmouth, Fader's Hooked on Books, various publishers' catalogs). Have students check books that appear on more than one list, star those they have read, start a personal book list of those read and those they are tempted to read. Soon students realize how narrow their reading has been. This is a good eye opener for worldly seniors who think they know everything! (Teacher's attitude, however, should always be positive, encouraging.)

II. Have 15 - 20 new, colorful books from school library, any paperbacks, on teacher's desk, and another pile of older, worn ones, some classics. Let students browse. Then teacher give mini-view of each book, just enough to whet the appetite. Read a short passage. Let students jot down notes. At end of day, send books back to library. Students must check out books from library.

III. Miniviewing should be done two or three times during a semester. It is a good way for a teacher to keep his own reading up to date, and this is necessary for communication with teen-agers.

IV. Have students help with judging best sellers or any questionable book. Try to avoid teacher censorship. Be honest. Encourage open discussion. But be willing to take a stand and defend it, and encourage student to do likewise. (Defense must include more than "It's good because I like it!")

B. Variety of Reading Required

Reading, rather than activities about reading, is the core of this course.

I. During the semester, every student should read ten selections chosen from among these different categories: fiction or non-fiction, novel, play, or poetry:

* 1 - 3 classics
1 Shakespearean play
1 history, sociology, or anthropology
1 religion or theology
1 biography or autobiography
1 medicine, psychology, science, or science fiction
1 book about Americana (any plot which could occur only in America)
1 adventure or foreign-setting book
1 about Maine or New England, or by a Maine writer
1 free choice

C. Reporting Methods

Book reports will be done in a variety of ways. Always emphasize the importance of the reading, not the reporting.

I. Each student will keep cumulative book cards on which he will record every book read either in class or outside.

II. Reporting may be done by personal conference, before or after school, or during study periods.

III. Oral reports may be given individually, by committee, dramatization, or panel discussion.

* Classics are included primarily as criteria for judgment.

IV. Form of written reports may be essay, brief card reports, or multi-level sentence reports (brief outline).

V. One formal paper will be required.

D. Student Contracts

There is no required reading list. Student choice and student evaluation with teacher guidance will be central elements of the course.

I. Current literature will be stressed, but the reading of one or more classics is encouraged to give background for some measure of judgment. For example, comparison of a modern and a classic novel on the same basic human theme (i.e. man against man) is an interesting method of pointing out the unchanging elements in human nature.

II. Student and teacher will set due dates, but the grade is not docked if reading is not finished on time. The student signs a statement of reading: "I have read all of Lord Jim." or "I have read all but 30 pages . . ." etc. He is aware of commitment through his reading contract, but may adjust his time during the semester.

E. Reading Activities

I. Two or three class periods each week will be spent in reading.

II. Students will schedule their own reporting dates, ten per semester, using a variety of methods.

III. Several short selections will be assigned for study by the entire class, as models for acquaintance with different genres. These will include essay, novelette, short story, and short drama. All other reading will be individually chosen by students.

IV. By mid-semester, class will discuss and agree upon certain criteria by which to evaluate their reading preferences. Students will record criteria in a card file or notebook, and record their evaluations of all books read this semester.

V. One major assignment will be the student's choice of a real-life problem--personal or vicarious--to grapple with in his reading. Having learned to "browse" intelligently through publishers' catalogs and library facilities, he should be able to identify a survival question, a conflict of values, or a contemporary problem pertinent to his own life which an author has set forth realistically in literature. The student will read one or more selections on his chosen theme and share what he has learned--about life, self, or others--in any of a variety of ways: creative writing, video talk, debate with a fellow student, panel discussion, informal talk, or class discussion which he will moderate.

647 POETRY AND THE SHORT STORY (4, 5)

COURSE DESCRIPTION

This course is designed to improve students' skills in reading and appreciating poetry and short stories. Students will learn critical terminology to use as an effective tool in analyzing these two genres. Readings will cover a variety of authors. As major projects students will unite a short, short story and poetry.

OBJECTIVES

The student will:

1. become acquainted with various types of the short story.
2. learn the terminology of the short story.
3. consider characteristics of the short story.
4. illustrate an understanding of the genre by writing a short short story.
5. express orally and in a written essay his reaction to a given short story.
6. identify and describe various elements of poetry.
7. prepare short prose illustrating imagery and sound effects.
8. become familiar with the style and content of a number of published poets through selected readings.
9. identify the close relationship between poetry and music by listening to selected recordings and reading published ballads.
10. create poems and responses to poems.

OUTLINE

THE SHORT STORY

Time: Weeks 1-9

Texts: A Study of the Short Story
Stories from Six Authors

Topics: Introduction to the short story as a popular literary form.
Critical reading of short stories.
Reading for enjoyment.

ACTIVITIES

1. Involve class in group discussion of short stories and why they are entertaining to many people.

2. Use questions for discussion and suggested interpretations in text.

3. Have pupils bring a short story to class. Recognize flexibility of lengths of short stories.

4. Classify sample stories as: mystery, detective, terror, humor, character analysis, incident, surprise.

5. To grasp the concept of a narrative, have individual students relate orally true incidents they have experienced. Identify introductions, situations, incidents, problems, endings, and any other elements of the short story.

6. Discuss how the length of a short story might affect a writer's approach to the narrative.

7. Given various aspects of narrative - plot, characterization, and conflict - discuss possible ways that authors might handle them within the framework of the short story. Recognize restraints placed upon the short story writer.

8. In group discussions with the teacher as a guide, suggest situations in which the following terms are used or illustrated. Explain the meaning of each term used.

   Terms: Plot, character, setting, protagonist, antagonist, hero, anti-hero, point of view, action, crisis, climax, accident, struggle, complication, outcome, theme, ending, moral, suspense, irony, foreshadowing, flashback, and fate.

9. Through student art work, drawings, magazine collages, or posters, graphically portray the terms of the short story. (Teacher guidance should provide accuracy to the illustrations.) Graphics can be reproduced on transparencies for showing on the overhead projector or reproduced as a series of posters, given identifying labels, and mounted in the classroom.

10. In class discussion, consider the central problem developed in the plot of a short story.

11. In oral report or written essay, express your reaction to the ideas and events developed in a given short story.

12. Compare styles of two short stories by different writers, who treat the same theme.

13. Write a short short story, showing your understanding of the ingredients of the genre.

OUTLINE

POETRY

Texts: Sound and Sense
A Study of Poetry
Contemporary American Poetry

Topics: Introduction to poetry as a type of literature.
Communication of experience.
Expression of feelings, ideals, values.

Week 10

Sound and Sense, Chapters 1-3
Poetry and Experience; Reading the Poem; Denotation and Connotation

ACTIVITIES

1. Promote informal discussion of poetry within pupils' experience (children's verse, popular songs, advertising slogans, etc.). Encourage free expression of likes and dislikes. Guide discussion to acknowledge that enjoyment of anything - sports, music, studies - increases with experience and knowledge. Spark class interest in learning more about poetry.

2. Read aloud a favorite poem. Choose one that is easy to understand and has popular appeal. Ask pupils' favorites.

3. Share nursery rhymes. Play recordings of popular songs. Have pupils quote any poems or lines they remember from past experience. Why do they remember them? What is obvious about their rhythm, rhyme, subject matter, form? Try to create a general attitude of interest.

4. Ask pupils to keep notebooks for this course, in which to record ideas, definitions, poems, etc.

Week 11

Sound and Sense, Chapter 4 - Imagery
Definition of imagery; importance to poetry; the five senses; sensual appeal in poetry

A Study of Poetry
"Something Told the Wild Geese" - page 16
"Elegy Written in a Country Churchyard" - page 60
"Bread and Music" - page 104
"I Am He that Walks with the Tender and Growing Night" - page 8
"There Was a Child Went Forth" - page 32

Haiku as an imagist form
Read samples of haiku. Discuss precise form. Assign original haiku describing a simple image or pair of images. Stress precision of form and necessity of being explicit and simple.

Weeks 12 - 13

Sound and Sense, Chapters 5 - 8
Figurative Language (metaphor, simile, personification, apostrophe, metonymy, symbol, allegory, paradox, over-statement, understatement, irony); Allusion; Sample poems from Chapters 5-8.

A Study of Poetry
Metaphor: "Prair'e" - page 114
"Small Song" - page 19
Simile: "An Old Woman" - page 45
"Buick" - page 186
Personification: "The Cloud" - page 21
"Tired With All These" - page 101
"Now Came Still Evening On" - page 20
"Fog" - page 191
Apostrophe: "Blow, Blow, Thou Winter Wind" - page 155
"I Am He That Walks With the Tender and Growing Night"-page 8
Metonymy (Synecdoche): "We read Whitman" instead of
"We read the poems of Whitman"
Symbol: Definition; Sample poems from Sound and Sense, Chapter 6; colors as symbols; animals as symbols
Paradox and Irony: Definitions; kinds; sample poems from Sound and Sense, Chapter 7
Allusion: Definition; sample poems from Sound and Sense, Chapter 8
A Study of Poetry: "Silence" - page 117
"Now Came Still Evening On" - page 20
"Bring Me My Spear" - page 73

ACTIVITIES

1. Keep a list of figurative expressions found in songs, slogans, slang, advertising, and other everyday sources.

2. Plan poetry readings with musical background, live or recorded.

3. Write original poems. Plan days for reading any original student verse.

4. Write a paper (500 words, or length assigned by teacher) discussing a particular poet's use of one aspect of poetry we have examined so far: Imagery, Symbol, Irony, Paradox, Figures of Speech, etc. Define terms carefully and examine five or more poems of the poet you have chosen. Check with teacher for approval of poet and subject. (This paper may be assigned as culminating activity at end of semester.)

Week 14

Sound and Sense, Chapters 9-11
Meaning and Idea; Total meaning; Prose meaning
Tone: Attitude, emotional coloring
Musical Devices: Repetition and variety; alliteration; assonance; consonance; kinds of rhyme

Week 15

Sound and Sense, Chapters 12-14
Rhythm and Meter: Difference between prose and verse; kinds of feet; scansion; blank verse; free verse
Sound and Meaning: Onomatopoeia; euphony; cacophony
[Note: Avoid over-emphasis on technicalities in these chapters. Rather than rote memorization, stress understanding and recognition of terms, awareness of rhythm and sound in poetry.]

ACTIVITIES

1. Read aloud selected poems from Sound and Sense.

2. Try a choral reading of one or more poems (i.e. "The Barrel Organ").

3. Read orally various kinds of verse, noting differences: blank, free, rhymed. Choose poems from the three texts or from other sources.

4. Have pupils select from South Portland High School Library recordings of poetry readings and play them privately before choos ing records to share with the class. Include recordings of old and modern ballads.

5. Invite Miss Madeline Perazzi of the Music Department to talk to the class and perhaps to present a choral group. (Preplan with her the kind of songs/poetry to be presented. Stress the close relationship of music and poetry, elements in common.)

6. Ask pupils to write an original poem. Pay particular attention to images, rhythm, and sound effects. Read poems aloud, pointing out any effective lines or language.
   Pattern: Continuous form; stanza form; fixed form; limerick; sonnet; Sample poems from Sound and Sense, Chapter 14.

Weeks 16 - 18

Contemporary American Poetry (pp. 1, 73, 139)
Sound and Sense, Chapter 15-16, Traditionalists and Experimenters
Differences between the traditional and the New Poetry; Representative poets.
Traditionalists: Robinson, Millay, Frost, Wylie
Experimenters with Form: Lindsay, Masters, Sandburg, Jeffers, Lowell, H. D., Williams
Experimenters with Language: Pound, MacLeish, Moore, Cummings, Stevens, Auden, Wilbur, Nash

ACTIVITIES

1. Read and discuss in class one assigned poem by each of the traditionalists. Discuss similarities and differences in these poems.

2. Discuss individual characteristics of traditionalist poets.

3. Play Millay's own recording of "Renascence," with the class following the lines (page 30). Discuss the poem, using the text questions as focus.

4. What is the "New Poetry"?

5. Have pupils read aloud one of Vachel Lindsay's poems (i.e. "Daniel," page 75; "Two Old Crows," page 78; "The Santa-Fe Trail," page 80).

6. Assign sample poems from the form experimentalists, to be studied at home, read aloud, and discussed in class.

7. Read "Patterns," page 114, and discuss the form, its effect; and the differences from traditional form.

8. Read samples of the language experimentalist poems. (i.e. "The Unknown Citizen," page 185; verses by Ogden Nash, pp. 202-203.)

9. Write an essay expressing response to one of the poems (assigned or freely chosen) from any read by the class this semester.

Sound and Sense, Chapter 15, Judging a Poem

A. Read "God's Will for You and Me" - page 205 and "Pied Beauty" page 205.

1. Note similarities of the two poems.

2. Note the differences.

3. If you were judging A - B, how would the poems rank? Why?

PROCEDURES FOR SEMESTER COURSE

1. Promote daily class discussions.

2. Have students keep notebooks.

3. Use records of poetry readings.

4. Test occasionally on a short story or poem that has not been discussed in class.

5. Attend poetry reading whenever possible at local colleges and universities.

6. Ask any "poets-in-residence" or "experts" to speak to the class.

7. Play records of popular songwriters, paying particular attention to the lyrics.

8. During first nine weeks each student will write a short story. He will also give an oral evaluation of a short story of his choice.

9. During the second nine weeks each student will write original poetry.

EVALUATION

The student should be able to explain a poem in some depth, with attention to meaning, form, and sound.

648 LITERATURE OF THE AMERICAN WORLD OF SPORTS (1 - 3)

COURSE DESCRIPTION

By reading sports selections from various facets of the American sporting world, the student will gain an insight into the impact of professional and amateur sports on American society and the factors in athletic competition which reflect the values of our society. Students will be expected to do outside reading to enrich their knowledge of the significance of sports. Films and speakers will be utilized as supplementary factors at various intervals for the duration of the course.

OBJECTIVES

The student will:

1. develop an understanding of the history of sports in American society.

2. gain insights into the psychology of competition and how it influences all segments of society.

3. examine the factors in athletic competition and how they reflect the attitudes and values in American society.

4. gain an appreciation for the work, sacrifice, and dedication that are prime factors in athletic success.

5. develop insights into athletics as a career.

6. appreciate the role of sports in aiding ethnic minorities to gain personal recognition.

7. study the mechanics of various sports and gain insight into their appeal to spectators and participants.

8. examine and analyze dominant sports personalities in terms of values, ethics, and charisma.

9. understand the unique anxieties, pressures, and emotions which confront the athlete.

10. develop a desire to participate in sports during leisure time.

OUTLINE

I. Time: one week - Introduction to Basketball

Topics: (Whenever feasible mimeographed sheets in each topic area will be distributed.)

1. History of the game
2. Rules and format
3. Fundamental skills
4. The appeal of the game
5. Careers in professional basketball

Audiovisual Materials

Bill Russell's Red Check training films: basketball techniques demonstrated by professional stars

II. Time: one week

Text: They Call Me Coach: John Wooden

Topics:

1. Translating a personal philosophy of life into a successful coaching philosophy
2. Sacrifice and work as the foundation of success
3. Pressures: what they are and how to deal with them
4. Wooden's "Pyramid of Success"

Audiovisual Materials

1. 16mm film: "Basketball Highlights of 1949"
2. 16mm film: "Basketball Highlights of 1971"

Suggested activities:

1. Class discussion
2. Objective test

III. Time: two weeks

Text: Go Up for Glory: Bill Russell

Topics:

1. Racial prejudice in athletics
2. Opportunities in sports for minority groups
3. Financial aspects of the professional athlete
4. Anxiety and fear in professional athletics
5. Specialized problems of coaches and players

Activities:

1. Oral reports
   a. Why I admire a particular athlete
   b. Why I don't admire a particular athlete
2. Short essay quizzes

IV. Time: one week - Introduction to Boxing

Topics: (Printed materials for each topic area will be distributed.)

1. History of the sport
2. Format and rules
3. Fundamental skills
4. Discussion of sport's appeal
5. Career potential

V. Time: two weeks

Text: In This Corner: Peter Heller
Autobiographical essays based on recordings of interviews with famous former boxing champions.

Topics:

1. Socio-economic background of boxers
2. Physical and attitudinal qualities of boxers
3. Boxing: actually a sport?
4. Dangers in boxing
5. Boxing and crime
6. State and federal regulation of boxing
7. Should there be a program of interscholastic boxing?

Audiovisual Materials:

8mm movie: Film highlights of famous fights

Activity:

1. Possible fieldtrip to Portland Exposition Building to see Portland-based World Boxing League team in action.
2. Speaker: Manager, referee, judge, or professional boxer

VI. Time: one week - Introduction to Football

Topics:

1. History of the game
2. Format and rules
3. Fundamental skills
4. Discussion of game's appeal
5. Career potential

VII. Time: two weeks

Text: Paper Lion: George Plimpton

Topics:

Insight into the world of the professional athlete through actual participation in games and practices.

Audiovisual Materials:

16mm films: South Portland football games
College highlights

Activities:

1. Class discussions
2. Speakers (coaches, players, officials)
3. Objective quizzes

VIII. Time: three weeks - Thematic Unit

Text: Winners Never Quit: Phil Pepe

Topics:

All stories are about famous athletes who overcame personal hardships to achieve success.

Audiovisual Materials:

16mm films: PGA and U. S. Open Golf tournament highlights

IX. Time: five weeks

Text: Anthology of Sports Literature: Brady and Hall

Topics:

1. Sports as a microcosm of life
2. Sports as escape from reality
3. Social issues in sports
4. Heroes and villains
5. Famous writers who began careers as sports writers

Audiovisual Materials:

Miscellaneous filmstrips, records, and 16mm movies

Activities:

1. Outside reading
2. Book reports
3. Speakers
4. Essay tests and quizzes

X. Supplementary sources will be Sports Illustrated magazine and the sports page of the Portland Press Herald.

Supplementary texts: Incredible Athletic Feats: Jim Benagh
Sports Shorts: Mac Davis

649 SELECTED BRITISH AUTHORS (3 - 5)

COURSE DESCRIPTION

In this course students will examine the writings of influential British poets, playwrights, and novelists including Chaucer, Shakespeare, Milton, Pope, Hardy, and Orwell. Students will consider the effects these writers have had on the course of literature while discussing the values portrayed in their works. The course will be taught chronologically with emphasis on the historical background of each literary period.

OBJECTIVES

The student will:

1. sample a variety of British authors and examine values expressed in their literary works, thus using literature to aid in the formation of student values.

2. further develop critical reading skills such as recognizing tone and understanding figures of speech.

3. discover ways in which a knowledge of literature contributes to an understanding of the major human concerns of an historical period.

4. acquire practice in research and writing.

5. improve oral communication skills.

OUTLINE

The materials for this course have been selected after considering not only the above objectives but also the availability of texts already owned by South Portland. As a result, this course will be essentially a rapid survey rather than an in-depth examination of selected authors.

The basic text will be Adventures in English Literature (see list of materials) supplemented with one play of Shakespeare, Hardy's Return of the Native and Orwell's Animal Farm. The text offers much latitude in selection of material as there is much more literature than can be read in one semester. The text includes excellent reading and composition guides which accompany the literature. The following outline requires concentrated effort and would need to be edited for a class that lacks the ability to learn rapidly.

Period of Literature	Material To Be Included*	Additional Activities Suggested*	Time Allotted
I. Anglo-Saxon	Lecture on historical aspects of the period	Film strip: High School Library	1 week

* Pages refer to Adventures in English Literature unless otherwise noted.

Period of Literature	Material To Be Included	Additional Activities Suggested	Time Allotted
	pp. 28-38 Beowulf pp. 39-46	"Anglo-Saxon, Celt, Norman"	
II. Medieval	Lecture on historical aspects of the period pp. 50-59 English and Scottish Ballads, pp. 49-65 Chaucer, pp. 68-83 "The Nun's Priest's Tale", pp. 86-93	Read any other Canterbury Tale of student's choice Write synopsis of tale in class	1 1/2 week
III. Elizabethan	Hamlet in text or separate edition Lecture on historical aspects of period pp. 101-127 Hamlet-separate text	16mm Films Prime Resource Center "The Age of Elizabeth" "What Happens in Hamlet" "The Poisoned Kingdom" "The Readiness is All"	4 1/2 weeks
IV. 17th Century	Lecture on history pp. 210-217	Milton, pp. 224-225 Read aloud and discuss selection from Paradise Lost	1/2 week
V. 18th Century	Lecture on history pp. 260-279	Read and discuss Pope's Rape of the Lock pp. 270-279	1 1/2 weeks
VI. Romantic (19th Century)	Lecture on history pp. 348-445	Read aloud and discuss selections by Byron, Shelley, Keats Filmstrips: High School Library "The Romantic Age"	2 weeks
VII. Victorian	Lecture on historical aspects of period pp. 450-461	Read: Return of the Native 16mm Films Prime Resource Center "Charles Dickens" "Great Expectations"	4 weeks
VIII. The Modern Era (20th Century)	Lecture on history pp. 552-558 Short story-select from text Pygmalion, pp. 714-769 Animal Farm-Orwell separate edition		3 weeks

Objective type tests on historical background and literary selections are available in special test booklet accompanying Adventures in English Literature.

650 FOLKLORE (1 - 5)

COURSE DESCRIPTION

This course is for the student who wishes to learn the origin of traditional beliefs, legends, sayings, and customs of our region here in the Northeast. The course will increase the student's awareness of the conventional myths of our culture through pursuing projects in whatever related topics interest him and by sharing these findings with the rest of the class. By delving into a disappearing part of our American culture, this course also is designed to tap some of the latent talent and energies of our high school students. A major project, to be done cooperatively with the art and printing departments, will be a publication for which students will conduct and tape interviews, write stories and articles, take photographs, and lay out the magazine.

OBJECTIVES

The student will:

1. learn to take pride in one's heritage.
2. recognize the value of folklore as literature.
3. search for materials and information about local traditions.
4. organize, produce and publish a magazine dealing with local customs and folklore.
5. learn English skills necessary in writing magazine articles.
6. learn to interview people and learn to recognize vital information.
7. learn photographic techniques and film development.

TEXTS

American Folklore - Dorson

American Folklore - Poulakis

You and Aunt Arey - Wood

The Crucible - Miller

INDEX

Week 1:	The Beginnings of Folklore Interviewing Techniques
Week 2:	Use of the Camera Review interview techniques
Week 3:	Telephone Contact and Interviews
Weeks 4 and 5:	Transcribing Writing Rough Drafts
Week 6:	Final Copies and Paste-ups
Week 7:	Indian Folklore Typing
Weeks 8 and 9:	Paste-up of Magazine Layout of Magazine
Week 10:	Superstition and Tales of the Supernatural
Week 11:	Black Folklore
Weeks 12 and 13:	New England and Maine Folklore
Week 14:	Children's Folklore Collate Magazine
Week 15:	Folk Medicine Sell Magazine
Week 16:	Heroes
Week 17:	Present and/or Future Folklore
Week 18:	Evaluation and Over-all View

OUTLINE

I. Time: Week 1

Topic: The Beginnings of Folklore and Interviewing Techniques

A. Questions to be resolved.
   1. What is folklore?
   2. How did folklore begin?
   3. What purpose did it serve?
   4. Why have the stories been preserved?
   5. What have you gained from studying this unit?

B. Read You and Aunt Arey.

C. Discuss interviewing techniques.

D. Show movie Foxfire.

II. Time: Week 2

Topic: Use of the Camera
   1. Developing techniques
   2. How to take a picture

Review interviewing techniques
   1. Bring in guest speaker (check with newspaper).
   2. Develop interviewing techniques.
   3. Develop interview instrument.
   4. Show them how to use tape recorders.
   5. Have each student interview another person, record the interview, and transcribe it.
   6. Teach transcribing.

III. Time: Week 3

Topic: Telephone contact and interviews

IV. Time: Weeks 4 and 5

Topic: Transcribing and rough drafts

V. Time: Week 6

Topic: Final Copies and Layout Techniques

VI. Time: Week 7

Topic: Indian Folklore
   Do individual reports.
   Show movie "The Indians."
   Read and discuss American Folklore, pp. 47-60.

VII. Time: Weeks 8 and 9

Topic: Paste-up Magazine

VIII. Time: Week 10

Topic: Superstition and Tales of the Supernatural
Discuss Salem Witchcraft trials.
Read The Crucible.
Bring in examples of superstition.

IX. Time: Week 11

Topic: Black Folklore

A. Questions to be resolved:
1. How has segregation influenced the South?
2. How does Southern folklore differ from that of New England or other parts of the country?
3. What characteristics make Black folklore unique?
4. How has Black folklore changed over the years?
5. What dominant motive do you find in Black folklore today?

X. Time: Weeks 12 and 13

Topic: New England and Maine Folklore
1. Play "Bert and I" record.
2. Discuss Maine humor.
3. Discuss sea traditions.
4. Discuss lumbering.
5. Show Paul Bunyan movie.
6. Compose a list of Maine sayings and slang.
7. Write a travel brochure of Maine.
8. Show films of Maine.

XI. Time: Week 14

Topic: Children's Folklore
1. Discuss jumprope jingles.
2. Discuss nursery rhymes.
3. Make a booklet of rhymes and jingles.

Collate magazine.

XII. Time: Week 15

Topic: Folk Medicine
1. List methods of medicine.
2. Discuss validity.

Sell Magazines
1. Publicize magazine.
2. Distribute magazines.

XIII. Time: Week 16

Topic: Heroes

1. Make a list of past and present heroes.
2. Contrast legend and fact.
3. Write paragraph about a real hero and the myths surrounding him.

XIV. Time: Week 17

Topic: Present and/or Future Folklore

1. Discuss values.
2. Discuss heritage.
3. Trace your family tree.
4. Discuss advertising.
5. Make a list of present day folklore.

XV. Time: Week 18

Topic: Evaluation and Overall View of the Course

A. Questions to be resolved:
1. What have you learned of your heritage?
2. What have you gained from this course?
3. How has the magazine helped you?
4. What have you learned from publishing the magazine?

B. Activities
1. Review the course.
2. Collect semester projects.
3. Discuss what folklore means to each of us.
4. Develop a dominating motive in American folklore.
5. Discuss conclusions to be drawn about America as reflected in its folklore.
6. Discuss any problems with the magazine and general reaction to the publication.
7. List any problems and how they might be overcome.

PROJECTS:

Collect jump rope jingles and jingles from other children's games and taunts. Use as many different sources as possible.

Collect tales or superstitions from Canada. Discuss how they reflect the different culture in which immigrants were born - also Indian and Shaker Village.

Collect examples of modern superstitions. Investigate the origins of these superstitions and the purpose they serve.

Collect religious tales and jokes not included in the Bible. Classify them in your essay and discuss possible reasons why these tales evolved and what purpose they serve.

Collect children's songs and tell what purpose they serve.

Collect square dance calls. Trace the origins of square dancing from the slaves to today's square dance clubs popular throughout the nation.

Collect folklore of Maine. Investigate why these stories began and what purpose they served. How do they reflect attitudes of Maine?

PROCEDURES

1. Every student is expected to get involved in all aspects of the magazine organization and production.

2. Every student is expected to do a major project on some aspect of folklore to be passed in at the end of the course.

3. Part of the grade will be determined by the acceptance of assignments, by the following through of assignments, and by the completion of assignments.

652 A STRANGER IN THE CITY (1, 2)

COURSE DESCRIPTION

This course is designed to expose students to the problems teenagers face in a large city. The conflicts include crime, race and nationality, poverty and family, and general survival and adjustment. Students will be expected to select and read stories from these categories, be familiar with the problems involved, and suggest solutions for each situation -- either in discussion or in written form. Work will be done in small groups and on an individual basis.

OBJECTIVES

The student will:

1. encounter some aspects of teenage city life, which may be unknown to him.

2. learn new vocabulary (taken from context).

3. participate in discussions in order to consider each others' solutions to a conflict.

4. examine values in problem-solving/decision making.

5. improve writing skills via original short stories of conflict.

6. emphasize the complete sentence in all written materials.

7. improve reading comprehension.

OUTLINE

The course should be taught on a modified individualized basis. The students will select stories and/or novels from a predetermined list for each of the four categories listed. They will read a story, write answers to questions on each story, discuss solutions and problems with partners, groups, and/or teacher, correct grammatical errors, and continue to the next story. After reading a specified number of stories (which should depend on the reading ability of the students), the students do a project -- a poster, play, short story, collage, etc., dealing with that particular category. The project should express the student's or students' interpretation and solution of the conflict.

On completing a unit, the student is responsible for all spelling words, vocabulary, and grammatical errors that he made and corrected. If the errors are repeated in future units, extra exercises and drill should be given by the teacher (either individually or in groups). This activity is class work.

Outside assignments will include reading at least one novel (selected from the school library) which should supplement the required novels and the "city" short short stories.

REQUIRED READING: Up the Down Staircase
The Boy Who Could Make Himself Disappear
Street Scene

Selected short stories from the following books:

Against All Odds
Breaking Loose
Cities
Challenges
Conflict
Crosscurrents
Dreamers of Dreams
Encounters
Forces
Impressions In Asphalt
In Others' Eyes
I've Got A Name
Me, Myself and I
Playing It Cool
Tomorrow Won't Wait
Twice Fifteen
What's Happening
With It

CRIME:

Me, Myself, and I	"First Offense"
	"American Dilemma"
Against All Odds	"Jim the Scratch"
	"A Good Little Feature"
	"Word of Honor"
	"Tell-Tale Heart"
Conflict	"The Sniper"
	"The Ransom of Red Chief"
Cities	"The Town Where No One Got Off"
	"North Town"
Encounters	"The Parsley Garden"
	"Thank-You M'am"
	"I Heard A Knock on the Door"

Impressions in Asphalt	"Sucker"
	"Hyman Kaplan Samaritan"
	"Getting Quick Rich"
	"Antaeus"
	"Dino"
With It	"Trapped"
	"Charlie Among the Birds"
Twice Fifteen	"What Ever Became of Agnes Mason"

Musical Selections:

Records:

Simon and Garfunkel - "The Boxer"
"Sounds of Silence"
"Bridge Over Troubled Waters"
Peter, Paul & Mary - "Blowing in the Wind"

"The Cities: People and Their Problems" filmstrip/record - #26H

653 SCIENCE FICTION AND HORROR STORIES (1 - 3)

COURSE DESCRIPTION

This course is designed for students to read and enjoy popular works by men like H. G. Wells, Isaac Asimov, and Edgar Allan Poe. Two anthologies, one for science fiction and one for horror, will be offered as well as some novels. The study of both genres will relate their various themes--such as the occult, the effects of advanced technology, and escapism--back to the individual and his place in society.

OBJECTIVES

The student will:

1. consider and evaluate popular contemporary themes, such as the occult and technology.

2. evaluate how the different times (past, present, future) shape our lives today.

3. discuss what our place in today's and the future's technocracy is.

OUTLINE

1. 4 - 6 Weeks - Fantasy: Shapes of Things Unknown (Scott Foresman) is an anthology of stories grouped into five units, each of which examines a different theme from the world of fantasy - discrepancies between appearance and reality, the power of evil, encounters with the inhuman, preternatural powers and weaknesses, and the occult.

   Possible discussion: Is reality the opposite of fantasy, or is reality the result of worked-out fantasies? Have you any hope of your fantasies coming true? Explain.

2. 2 Weeks - Devils and Demons (Rod Serling) is a collection of fourteen "fantastic" stories of the supernatural and science fiction written by master storytellers of the past and present.

   Possible project: Many poems are based on "fantasy" or "science fiction." Look through a number of contemporary poetry anthologies and prepare a study of science fiction and fantasy elements in modern poetry. Particularly helpful might be the world of W. H. Auden, Dick Allen, James Dickey, and D. M. Thomas.

3. 1 - 2 Weeks - 50 Great Horror Stories (ed. J[illegible] Canning) is a powerful collection of tales of witches, vampires, werewolves, vengeful spirits, and sudden victims. All of the stories "have in common the fact that they are either true, have been recorded in contemporary documents as fact, or have become such a prevailing folk myth as to suggest some evidence of actual occurrence."

Possible project: Write your own horror stories. Utilize elements of the horror story, such as juxtaposing the ordinary with weird and using traditionally "horrible" settings.

4. 1 Week - Twilight-Zone (Rod Serling) is a short collection of science fiction and horror stories, and is therefore a good one to use to move onto the more orthodox science fiction genre.

   Possible project: Elements of science fiction and fantasy are increasingly present in the work of many writers not normally considered as working in the genre. Do a study of such elements in the stories and novels of noted mainstream writers such as Richard Brautigan, Doris Lessing, Donald Barthelme, Norman Mailer, John Updike, Thomas Pyncheon, Bernard Malamud, Joyce Carol Oates. Will mainstream and science-fiction approaches to literature ultimately merge? Have they merged already?

5. 6 Weeks - Science Fact/Fiction (Scott Foresman) is an anthology of science fiction stories that focus on what might be counter-balanced with factual articles on what is. This combination explores all three objectives of this course.

   Possible discussion and project:
   1. Many, if not most, of Jules Verne's imaginative creations are now reality: the submarine, underwater diving suits, the ability to synthesize food from raw ocean material. Can Verne's stories still be called "science fiction," or are they fantasy? What current visions do you think will become reality?
   2. If you could control the future of the world, what new inventions would you allow? What new or old inventions would you ban?

6. 3 - 4 Weeks - Brave New World (Aldous Huxley) is a futuristic novel which satirizes Western civilization by describing the condition in which it might find itself some 600 years from our time. The novel takes contemporary cultural trends to shocking and fantastic extremes. The student evaluates these extremes in terms of the three objectives stated in this course.

   Possible discussion:
   1. Name writers other than Lucian and Jonathan Swift who have used science fiction as a vehicle for satire. In each case, does the author have a realistic and objective view of human nature? Explain. Should science fiction teach moral lessons?
   2. Is change progress? Are progress and/or change necessarily good? Give specific instances in which it might be better if progress actually meant moving backward.

7. 3 - 4 Weeks - 1984 (George Orwell) is both a satire of totalitarian barbarism and a warning about man's dehumanization. Objective three in this course is especially relevant to this novel.

   Possible projects:
   1. The year is 1984. Time has passed normally and you are

now an adult. Describe a typical week of your life, including recreation as well as work. Include thoughts of transportation, education, dress, music, ecology, crime and food. What will be your attitude concerning the people around you? What kind of occupation might you have that does not exist today? Or, if the occupation exists, how will it have changed? Are you looking forward to the year 1984?

2. Read a history of Communist China and compare its society, under Chairman Mao, to the society described in Orwell's 1984. Or do the same with Stalinist Russia.

8. 3 Weeks - Sirens of Titan (Kurt Vonnegut) is a contemporary work that is more than "just" a science fiction novel; it is also a prophetic vision that audaciously attempts to provide answers dealing with Life, and is therefore oftentimes philosophical in nature.

Possible projects and discussion:

1. Look closely at some of the pictures of Earth taken from the moon, or telescopic pictures of the galaxies. How do these photographs affect your perspective? Prepare a paper on how the feelings of immensity or smallness might be affecting and continuing to affect the collective mind of the human race.
2. Do you think escape is necessary? What kinds of situations or thoughts cause an escapist reaction in you? What means of escape do you usually use (television, reading, music)? When does escape become harmful?

AUDIO VISUAL MATERIALS

A. "Jules Verne to Ray Bradbury": a three-part science fiction sound/slide set

B. "George Orwell" filmstrip set

C. "Wells: Time Machine/War of the Worlds": record R 861

D. "Around the World in 80 Days": record 837 b

E. "Poe Stories: The Black Cat and The Masque of the Red Death" (record)

F. "That Strange Mr. Poe" filmstrip

G. "Dr. Jekyll and Mr. Hyde" filmstrip

FINAL NOTE

It is difficult to classify contemporary science fiction, just as it is to do it for any contemporary problem. It is impossible to plan the future, but science fiction can help us ask the right questions about it, since it helps us look "inward" as well as "outward."

654 WORLD LITERATURE (3 - 5)

COURSE DESCRIPTION

Main objectives of this course are for students to understand a foreign place, its culture, and its values from a particular individual's (the author's) point of view and to appreciate literature from other countries as well as their own. Students will explore the themes of man's destiny and his ability to control it, the relationship between generations, the effect that wealth or the lack of it has on people, and man's place in society and the world. A desired objective is to have the students apply these concepts to themselves. Literature from England, France, Germany, Russia, Greece, and South Africa will be read. As a major project each student will write an expository paper dealing with his choice of book and topic.

OBJECTIVES

The student will:

1. explore with an author the culture and values of some foreign place.

2. sample literature of countries not his own and recognize some of their specific contributions.

3. experience various great themes of world literature.

4. complete written and oral projects pertinent to the literature read.

OUTLINE

I. Western Literature: Themes and Writers, an excellent anthology beginning with Greek times and going up to modern times, is the basic text used in the course. The book is concept oriented. "This book contains five vital themes: Conflict of Wills, Choice and Consequence, Know Thyself, The Foibles of Man, and Critics of Society. Each theme begins with one of the five major works contained in this book: Antigone, Macbeth, The Secret Sharer, The Metamorphosis, and An Enemy of the People. The major work in each unit frames the basic question which will be the concern of all of the selections within the unit. Each of these works crystallizes a major human dilemma which has been the focus for many of history's most influential writers. Each is long enough and rich enough to permit the reader to discover and assess the dominant concern of each unit."

Furthermore, each major theme is amplified with supplementary themes and selections of prose, poetry, and art. In this way, "the interaction of the graphic and literary arts broadens the teaching of literature into the teaching of the humanities. The exploration of each theme is effectively aided by the vision of major artists and sculptors of the Western world."

Methods:

1. Galleries (interaction of graphic and literary)

2. Study notes, which are divided into four major sections, are designed to produce a greater understanding of the reading selections and the themes which they illustrate.

3. Unit teaching attempts to move the student progressively toward a full understanding of the theme while at the same time treating the unit as a single whole work in itself.

4. Reading supplementary literature

5. Evaluation and testing

6. Guest speakers and audio visual material when appropriate.

II. Conflict of Wills: Father and Sons (Ivan Turgenev) is a nineteenth-century Russian novel which deals with the freedom of the serfs just before their emancipation, and the universal conflict and differences that exist between generations.

Weeks 1 - 4:

Suggested projects:

1. Think of a real-life clash between two strong-willed persons and discuss the reasons for the conflict and the reasons why the individuals took the positions they did.

2. Propose a situation in which two strong-willed persons clash; then ask each student to write his own resolution to the conflict. Discuss as class afterward.

3. Discuss the conflict of wills on a personal, community, or international level.

4. Other concepts: Nihilism and its application today.

III. Conflict of Wills, Choice and Consequence, and the Effect of Wealth or the Lack of it on people: Cry, The Beloved Country (Alan Paton) is a twentieth-century novel which deals with South Africa's racial problems as dramatized by the interactions of a white and black family. More than this, it transcends to the level of man's universal humanity/inhumanity to man.

Weeks 5 - 9:

Suggested projects:

1. Undertake the projects listed under Fathers and Sons.

2. Ask the students to discuss - orally or in writing - an important choice they had to make and the consequences of their decision. Consider: what happened that they could not foresee, how the consequences have changed them, the role that fate or chance played, and their motives for making the choice they did.

3. List a number of pairs of alternative choices on the board and have students speculate on how the choice of one or the other alternative could lead to radically different consequences.

4. Relate the novel's characters' financial problems to those of today.

5. Consider decision-making skills, values strategies. Work with guidance counselor on suitable classroom activities.

6. Deal with the novel from a sociological point of view:
   a. South Africa today
   b. the apartheid system

IV. Choice and Consequence, The Foibles of Man: The Stranger (Albert Camus) is a short existential novel about a man who commits a seemingly senseless murder, which becomes a turning point in his life. The reader considers concepts like loss of identity and desensitization by society.

Weeks 10 - 12:

Suggested projects:

1. Employ numbers 2 and 3 under Cry, The Beloved Country.

2. Discuss the meaning of the word foibles. Write the phrase The Foibles of Man on the board and ask students to write on their own papers whatever comes to their minds when they think of the phrase. After ten or fifteen minutes, collect the papers and read and discuss some of the more interesting ones.

3. Ask students to make up two lists (or to write two themes). In the first list, ask them to list (or describe) some of the foibles they have seen in the world. In the second, they should list (or describe) some of their own foibles. Which list was easier to do and why?

V. Know Thyself, The Effect of Wealth or the Lack of it on People: The Good Earth (Pearl Buck) takes place in Northern China in the early twentieth century. It is a novel written in an almost pastoral style which describes the cycle of birth, marriage, and death in a Chinese peasant family.

Weeks 13 - 15

Suggested projects:

1. Employ 4 under Cry, the Beloved Country.

2. Discuss the effect of materialism, at the expense of spiritual or inner development, on human beings.

3. Ask students to write autobiographies discussing who they are, how they know who they are, and perhaps also the advantages and disadvantages of self-knowledge. These need not be polished themes if done to motivate the novel, and it might be interesting to hold these essays until later to revise in the light of what they have learned about "knowing yourself."

4. If it seems advisable that students not be as personal as 2 above, they might simply write on the advantages and disadvantages of possessing self-knowledge. Or the topic can be narrowed somewhat by asking for an essay on merely one side or the other. For example, discuss this topic: If one is a very limited person, it is better not to seek self-knowledge.

5. Ask students to project themselves into an unfamiliar situation, a situation in which a great deal of responsibility is thrust upon them. Perhaps discuss how one's degree of self-knowledge affects one's ability to perform in unfamiliar situations.

AUDIO VISUAL MATERIALS

1. Kafka: Tom Klise filmstrips (with record)

2. Camus: Tom Klise filmstrips (with record)

3. Tales of Kafka: record from Listening Library, 1975.

4. Fathers and Sons: a filmstrip from Listening Library, 1975.

5. Appropriate selections from filmstrip set, Kenneth Clarke's Civilization.

6. Many filmstrips on South Africa in the library.

660 INDEPENDENT STUDY IN ENGLISH (1 - 5)

COURSE DESCRIPTION

An opportunity for independent study will be offered to a linited number of students, subject to approval by the English Department Chairman and Principal. The student who elects this course will work under the supervision of an assigned advisor. Phased credit will be determined by the Department Chairman and Principal.

OBJECTIVES

The students will:

1. develop self direction and responsibility for their own learning.

2. have an opportunity to study subject matter not covered in other English courses.

3. learn research and organizational skills.

OUTLINE

Students' proposals to do independent study should state exactly what they want to do. Ordinarily, students should propose a project which will not duplicate the work in a regular course. Both the students and advisors will carefully review proposals and set up the requirements for completion.

Because of the nature of independent study, there is no suggested outline. Students are, however, expected to do at least as much work as they would do in one of the other elective courses carrying a like phase number. While the burden is on students to carry out the details of their proposals, teachers should check students' progress frequently.

SENIOR CAREER DAY

All of us have had the experience of submitting to an interview. The session may have been relaxed and casual or it may have been tense and a harrowing experience. The Guidance Department at South Portland High School, in its continued commitment to the value and need of Career Education, initiated a program which would involve all Seniors in a real life situation, so as to enable all 321 members of the class to experience an interviewing session with a local professional personnel person.

The overall objective was to have the students involved in the interviewing process. As sub-goals, we wanted these young people:

a. To formulate their thinking prior to the interview experience.
b. To have them look at themselves and consider what their values are in terms of past and present choices they have made in all phases of their lives.
c. To think through their goals - whether the sought-after job would be for security, happiness, or advancement.
d. To have the opportunity to have their interview evaluated by a professional interviewer.
e. To discuss with them the social aspects of an interview - e.g. a feeling of ease rather than tension.
f. To receive constructive criticism from the interviewers so as to assist them in future interviews.

The entire process, which culminated in Senior Career Day, took up eight class periods. The senior English teachers were most cooperative and were involved in the planning of this activity. A detailed plan was worked out between the Guidance and English Departments as well as detailed information sheets, which were exchanged as the process evolved.

The four guidance counselors and guidance assistant found themselves before separate English classes on the Monday morning following April vacation armed with a "Values Clarification Packet." In this packet were included materials which the student would use in the two days of exercises with the counselors. On the first day, two of Sidney Simon's strategies were used - "Twenty Loves" and "Coat of Arms." On the second day, life priorities were listed and rated, a forced-decision exercise was used, a career awareness form was filled out by each student, and a "use of leisure time" form was developed.

In the last session with the counselors, each student selected three representatives by whom he/she would like to be interviewed. The interviewers were representative of business, education, Armed Services, Employment Security Commission and Apprenticeship Programs. Each student was assured that he/she would receive one of the three choices. It was also pointed out that all seniors would experience at least two interviewing sessions of 12 minutes each. (In reality, many had three interviews.) It was made clear to the students that no employers were coming here with job offers, that this was to be purely an experience in

interviewing. It was also stated that if by chance a student impressed an employer favorably that any forthcoming future job offer would be up to the employer.

The English teachers returned to their role on the third day and spent the time briefing and discussing with their students the interviewing process, the selling of oneself, the "how to" of seeking employment. Also, they began formal instruction in the writing of a resume. These were written by the student in his/her own handwriting.

On the following Monday, all senior English classes met in the group guidance room where a counselor showed them a professionally prepared video-tape on the "do's and don'ts" of interviewing. A discussion and role playing exercises made this a meaningful session.

While the teachers were conducting the above in-class program, the Guidance personnel was involved in the monumental task of juggling 321 students with 46 interviewers. We strove to give each student at least one interview of his/her choice. Two or three classes were scheduled during five regular school periods, with an average of 65-70 students per period. By a series of cross-checking methods, we finalized our schedules of interviews, preparing a master sheet for each interviewer and an individual schedule card for each interviewee.

The interview assignments were given to the students on the day prior to the interviews. The method of scheduling was explained and final questions were answered. Where possible, a few changes were made at that time so that the majority of the students were quite content with their interview assignments.

Physical arrangements involved volunteers from many areas. The students from Office Practice did much of the preliminary typing and collating of materials and filled the senior placement folders. The card tables were borrowed from a neighboring school; the chairs were brought in by our maintenance crew; and the Key Club members had the job of setting up the tables and chairs according to a floor plan.

May 7 dawned as another vital spring day and the activity within the school's gymnasium was just as vibrant as the day. By 8:30 A.M. the interviewers had made their appearance and were enjoying coffee and donuts which had been prepared by the Home Economics students. At this time, Mr. Freise, the Assistant Director of Career Education for South Portland, briefed the business people. The gym was set up to provide 46 interviewing stations with numbers corresponding to the appointment cards which each student had.

The interview sessions were divided into five 45 minute sessions. As each student entered the area, he/she was given a placement folder which was filled with information ranging from "Interviewing Techniques" to "How to Spend Your First Pay Check." A waiting area was provided for those students who were not being interviewed at the time. All counselors were on duty to ensure that every student met his appointment, that time was called after 12 minutes, and, in case of an absent student, that a student was available to take the place of any absentee. Extra resumes were kept on a table in alphabetical order so that students could quickly have one in hand for unscheduled interviews.

The activity began promptly and ended four hours later. A break of twenty minutes allowed the interviewers to enjoy an attractive buffet, again provided by the Home Economics students. The Key Clubbers were on the scene to remove and return the borrowed chairs and tables as soon as the activity ended. Within a half hour, the gym had been restored to its original condition.

Coverage was provided by a local TV station as well as two local newspapers. This coverage was most positive, with the introductory statement that "South Portland does it again" opening the local 6:00 P.M. news report.

Immediately following the student involvement, on-the-spot rap sessions were conducted with the personnel people. Mr. Freise led the discussion and gathered input from the participants. The following day, a follow-up form was distributed to all senior students. The results of the follow-up indicated overwhelming support in all the phases of the lead-up and interviewing exercises, with recommendations to continue the program for future classes.

This was the most positive activity for the Career Education program to date. The huge success of this activity is attributed to superior cooperation. Our local business and educational community, which was contacted by Mr. Freise, was most generous with time and efforts. Back up people for possible cancellations were available and filled in as needed. The school administration was helpful in helping us coordinate classes to permit students the time to participate. The gym instructors relinquished the gym for the day and made alternate plans for their classes. The faculty and students made this one of the most exciting programs of the year. Key words are "cooperation," "coordination" and "involvement."

In conclusion, many fine things emerged from this process. The goal of promoting a meaningful, real life situation and providing the necessary preparation for the activity was achieved with much success. Many students and interviewers made promising contacts, and, as a result, some students received offers for both permanent and summer employment. As a result of Senior Career Day, most seniors are less apprehensive about approaching interviews for real job openings. They understand themselves and their goals a little better, because they were provided the opportunity to think about them. They will approach an interview knowing that "butterflies" are a natural part of facing a strange situation, but secure in knowing that personnel people are especially trained to put a person at ease and that, if one comes to an interview prepared, there is nothing to fear.

Points of view or opinions stated do not, therefore, necessarily represent official Office of Education position or policy.

FOREWORD

I'm confident I join with parents and students in expressing appreciation to the Guidance Department for this excellent Handbook. Much useful information is provided for the benefit of both the students and parents - and, significantly, I think, the Handbook brings to the forefront the need for students and parents to communicate with each other as well as with the school.

In the South Portland Schools we encourage and expect students to maintain a balanced program of work and play. With the support of the home and community we think we can develop worthiness and dignity in work and wholesomeness and fairness in play. We can, we think, build new bridges between the school and the world of work - and of life.

The school counselors and teaching staff are here to serve you - and they hope to work with both the parents and the students.

John Seekins

JOHN SEEKINS
Superintendent of Schools

AFFIRMATIVE ACTION STATEMENT

In keeping with federal and state guidelines, the South Portland School Department does not and will not discriminate on the basis of sex, race, color, religion, national origin, ancestry, age, or physical handicap, in the educational programs or activities which it operates, and is required by Title VII of the Civil Rights Act of 1964 as amended by the Equal Employment Opportunity Act of 1972 and Title IX of the Educational Amendments of 1972 and Part 86 of Title 45, Code of Federal Regulations not to discriminate in such manner.

The requirement not to discriminate in educational programs and activities extends to employment practices in the school system and to the admission and treatment of students.

To insure non-discriminatory practices and procedures, the South Portland Board of Education, with the assistance of an Affirmative Action Committee is developing an Affirmative Action Plan and other compliance procedures.

It has also appointed an Affirmative Action Office to coordinate its efforts to comply with and carry out its policies and responsibilities regarding non-discrimination.

Inquiries concerning the application of Title VII, Title IX and Part 86 to the School Department should be addressed to the Affirmative Action Officer Ralph W. Egers, Jr., Curriculum Office, South Portland School Department, 130 Wescott Road, South Portland, Maine 04106. Telephone 7[illegible]6501.

DEAR PARENTS AND STUDENTS -

The contents of this publication are recommended for your careful review since there is something for everyone in this handbook. It takes much effort and careful planning to organize programs which take into account the wide range of individual differences in the school population of South Portland. The guidance department is making every effort to recognize the diverse needs of all students.

It seems to me that the purpose of guidance is to provide a set of problem-solving skills and attitudes which will permit you to face new situations as they arise. Education is sometimes interpreted as developing the basic skills of reading, writing, and arithmetic. Guidance adds another important dimension to this experience - that of responsible behavior, dependability, and goal setting. Equally important is developing an awareness of possible work goals as well as taking the time to explore them.

The program of guidance services begins in grade seven. Those services dealing with emotional and behavioral disorders in the elementary grades are provided by the school nurses.

This career guidance handbook is directed to students as well as to parents. It is intended to be a useful tool, which will be read, re-read and referred to many times as your education progresses.

Members of the guidance staff are available to students each day from 7:30 to 4:00 throughout the school year. During summer vacation, a member of the staff is available from 8:00 to 12:00 and 1:00 to 3:00.

GUIDANCE SERVICES IN THE JUNIOR HIGH

Among other new experiences in junior high, you will be assigned guidance counselors for the first time. You should know the distinction between the terms guidance and counseling. Guidance refers to the giving of information. Counseling is a close working relationship between individuals and groups where self acceptance and development are explored and analyzed.

In order that you may benefit from the school guidance and counseling service, your parents are encouraged to call the guidance office at any time regarding concerns they may have. Counselors will arrange individual conferences between your parents and any members of the school personnel they wish to meet. Counselors will be present at these conferences, make recommendations, and do a follow-up. If family problems exist, counselors may suggest the services of community agencies and clinics. For those of you who have school adjustment difficulties, medical or psychological problems, recommendations will be made by your guidance counselor to those people concerned. Your parents will, of course, be notified when a referral to an agency is being considered. A unified approach involving your parents, you, and the agency should result in answers to your problem. At all times throughout your school years, close cooperation between you, your counselor, and your parents is encouraged.

Case conferences are encouraged by administrators and teachers.

At Memorial, parents of seventh graders and of students new to the school are invited to meet with the principal and counselors at informal coffee sessions in the morning. These meet-

ings, which begin in the fall, make it possible for your parents to discuss current programs at the school, tour the facilities, and see classes in session.

Another activity at Memorial involving counselors is the weekly team meeting with teachers to discuss student progress and problems. Purpose of the session is to find methods of improving instruction and to seek remedies for problems. Following these meetings, counselors may talk with you or your parents.

You should know that information for your permanent record card begins to be compiled in grade seven. Only factual data - date of birth, parents' names, grades, attendance, and school activities - are placed in this file. Your permanent record card is retained at the high school.

Counselors and guidance assistants will encourage you to participate in volunteer programs. You might assist in a project within the school similar to the "Jaws Corps" at Memorial. If you are willing to learn and eager to communicate, you may be involved in many areas: contacting guest speakers, operating video tape and audio-visual equipment, helping others research career information. A very different project has been designed to give you volunteer work experience in the community. With parental permission, you would make a commitment to work in an area of your interest. This practical experience provides an opportunity for personal growth, self confidence, and the development of individual responsibility.

ORIENTATION TO JUNIOR HIGH SCHOOL

Sixth grade orientation begins in May with visits by the counselors to each sixth grade class. Students receive a letter welcoming them to junior high. Later a letter is sent to parents inviting them to Parents' Night. This orientation, at Mahoney, provides the opportunity for parents to meet counselors and ask questions regarding the school, the curriculum and the guidance department. Counselors from Memorial offer a slide presentation of the school facilities and classroom activities in evening sessions at each elementary school.

At Mahoney in May each sixth grade student goes through an entire daily schedule from homeroom period in the morning to the close of school in the afternoon. Seventh grade students are assigned as "buddies" to accompany them during the day. This program permits the students to meet their future teachers, become familiar with school facilities, experience changing classes, and to be introduced to the cafeteria program.

GRADE SEVEN

Before the opening of school, you and your parents are encouraged to call your guidance counselor if there are questions. Transfer students will be tested the week before school opens.

You will have an orientation program before school begins at which time you will meet the principal, assistant principal, teachers, and guidance counselors. You will follow a mini-schedule of a regular school day and receive homeroom and division assignments.

During the first weeks of school, you will review, with your counselor, the school handbook and also the career guidance handbook. This will help you learn about school procedures and regulations. Counselors will discuss the value of good study habits and adjustments to junior high. They will always make themselves available to you in the event you might have any questions. The school calendar will show that the school year is divided into four terms of nine or ten week periods.

Later you will be introduced to the Career Education program. Counselors and assistants in the Career Guidance Center will show you slides of the many phases of the program. You will study the fifteen job clusters of the United States Office of Education. All job or career opportunities are included in these clusters. You will indicate on a survey five careers which interest you. People engaged in these occupations will be invited to talk with you.

Your parents will receive a deficiency report at each ranking term if you are not doing well. They should receive it in time to encour-

age you to improve your grades before the end of the term. If you should later get failing grades, there will be a conference with your counselor and your parents may be urged to be present.

In early spring, you will take the STANFORD ACHIEVEMENT TEST (see Appendix A for list of tests) which determines the level of achievement in word study and in math. Later in the spring, the results of these tests will be explained and interpreted for you. If you have mathematical ability, you may be considered for the accelerated math program. Your placement in this program is based on teacher recommendation and you may be invited to take Algebra I in eighth grade. Parental approval is necessary.

You will spend time with counselors in late spring discussing specific subjects required in grade eight. You will be taking courses new to you, such as Home Economics and Industrial Arts.

In individual meetings with counselors and also in group sessions, you will have the opportunity to see in which direction you want to go. Whether you follow an academic or vocational course, you will find help in determining your strengths and weaknesses.

GRADE EIGHT

After having had a good spring orientation, it is hoped you will be prepared for eighth grade. This year you will be expected to assume more responsibilities - social as well as academic.

In grade eight, you will take the DIFFERENTIAL APTITUDE TEST. This is a standardized test given to determine your aptitude in areas of language usage, verbal reasoning, space relations, numerical ability, mechanical reasoning, clerical speed and accuracy, and abstract reasoning. Counselors will study your scores, discuss the results with you and make recommendations to you and your parents. These scores are presented in two major categories: verbal reasoning and numerical ability. Results are given in percentiles; the percentile is based on 100 - 50 being considered an average score. If, for example, your score fell in the 60th percentile, this would mean that of 100 students, you would be expected to do better than 60 of them or that 40 did better than you. It is important for you to remember that any test is only an indication of what you can do as a student.

In the Career Guidance Center, you will find information on careers, schools, colleges, scholarships, the armed services and student job ideas. During study halls and before and after school, you will be able to do research for class projects, to see career films, and to hear guest speakers. Guidance assistants will help you find any materials you may be looking for.

You will fill out cards on which you indicate courses you wish to take the following

year.(See Appendix B) By signing the card, your parents or guardian indicates approval of your course of study. Parents will be urged to talk with counselors if there are questions about your program. This course of study card must be returned to your counselor.

In order that you may have firsthand career exploration, both Mahoney and Memorial will cooperate in holding a Career Fair in the Memorial gymnasium. You will be given the opportunity to talk with representatives from businesses, schools and organizations in the area. Simulations, demonstrations, and films are also used to depict careers in as realistic a way as possible. Exhibitors will hold an evening session for your parents.

As in grade seven, deficiency reports will be sent home. These will indicate subject areas in which you may be having difficulty. This affords the opportunity for your parents to call your counselor.

In the spring you will be part of individual or group sessions. At this time your counselors will explain the quarter courses which provide the opportunity for exploring areas of interest not offered in the regular curriculum.

GRADE NINE

You should be aware that in ninth grade you are accumulating points toward high school. In choosing the proper course, you should know that 17 Carnegie units (85 points in the South Portland system) are required for graduation. Discussions with your parents and counselor can lead to intelligent decision making about your subjects.

Among other quarter courses available to you is one designed for self exploration and introduction to career opportunities. In the values component of the course, you will determine your objectives, seek information about them, and learn to evaluate that which is important to you at this particular time of your life. Job shadowing is a major phase of the course. This will permit you to choose a person whose job interests you and to follow him or her throughout a day at work. In this way you will be able to experience the responsibilities, interests, problems and successes dealing with that field of work.

Various tests are available to you through the guidance office. These will identify reading, math, and verbal abilities. A career interest inventory will reveal an awareness of career preferences. If you are taking biology, you will be encouraged to take the COLLEGE ENTRANCE EXAMINATION BOARD BIOLOGY ACHIEVEMENT TEST.

With course of study cards, you will follow the same procedure used in grade eight. Again your parent or guardian will be asked to sign the card and discuss questions, and resolve problems with your counselor. Your parents will be invited to visit school in the evening to talk

with counselors about the high school course of study.

Later in the year a similar invitation to the high school will be issued. You and your parents may meet the guidance counselors and the faculty advisors of various school extra-curricular activities such as Key Club, Leo Club, sports, Junior Achievement, yearbook. High school students serve as tour guides in the building for the orientation.

GUIDANCE AND COUNSELING SERVICES IN THE HIGH SCHOOL

At South Portland a needs assessment survey was taken in 1975-76. This was based on your needs expressed in a series of student surveys. Instruments used were the Sophomore Survey, Assessment of Career Development Test, Guidance Center Orientation Questionnaire, Senior Career Day Evaluation, Alumni Follow-up Questionnaire, and other workshop evaluations.

Results of the survey indicated a need for activities dealing with self awareness and for interpersonal relationships. It is essential that you have a concern and a responsibility for others. "More people lose jobs because they can't get along with others than for any other reason."

Counselors lead group discussions in activities dealing with values and attitudes. To most young people a value refers to something which you consider "important". You will be encouraged to identify and develop your values. While doing this, you will clarify some of the things essential in your career choice and life style.

Resource people in the community are invited to the school to discuss social problems. Students in great numbers have taken advantage of the opportunity to view films and talk with counselors as well as professionals from the social service agencies in the local area.

Further, the survey indicated student need for career and educational planning. The location for such information is the Career Guidance Center where materials are collected and catalo-

gued for teacher and student use. You may use the Center on an individual basis when you have free time and desire career information. Also available is an expanding audio-visual section of filmstrips, films, and cassettes, all dealing with various careers.

In order that you may be aware of career opportunities in the Greater Portland area, you will be invited to attend sessions of the Career Guidance Institute. These workshops enable you to visit places of business and industry in the local community. Tours of the facilities of these companies, schools, and factories offer an insight into their internal operations. Moreover, you are offered the opportunity to talk freely with directors, owners and managers regarding career and educational possibilities.

Regularly scheduled Career Days are held throughout the school year. One career cluster, such as health or communications, is featured. Your teachers will be invited to bring classes to the group counseling room so that you may learn of job choices and training programs. You are also encouraged to use your study halls to attend these programs. A variety of methods is employed to present the highlighted careers: films borrowed from various sources, filmstrips/cassettes with follow-up discussions, video tapes of interviews between students and members of the community, and live speakers who give background information on local job options.

Placement is another aspect of student need revealed in the survey. A Job Bank is maintained in the Career Guidance Center for the purpose of helping you find part-time employment during the school year and full time employment for summer.

A listing of full time jobs is available after graduation or upon termination of formal education.

You may obtain Social Security applications from the Guidance Center.

Whether your goal is vocational school, the four year college, the military or immediate job entry, alternatives are presented, discussed, and investigated. College and military representatives visit the school to talk with interested students. In addition, you may visit regional vocational schools to learn of programs open to you. Undergraduate students at the Univsity of Maine conduct campus tours for those seeking an orientation to college life.

Each counselor works with the attendance officer and a personal contact is made with each dropout or potential dropout. The counselor tries to arrange an individual conference before the student leaves school to learn the reasons for leaving and to give the student helpful information. Every effort is made to help the student remain in school. The counselor tries to contact parents either by a home visit or by telephone. The dropout is encouraged to complete his/her education by attending adult education programs or by taking the State Equivalency Test (the GED). We wish to establish an open door policy so that the dropout will feel that the school is always willing to serve him. He/she is urged to use the Career Guidance Center Wednesday nights during the school year for counseling and for career, vocational and job information.

Utilization of community resources is designed to increase awareness of both educators

and employers to improve career possibilities for all students and to make education more realistic for developing individual talents and pursuing career choices. A human resource list of faculty and business people from various service organizations has been established to assist you in career planning and development.

During your high school career you may be asked to help counselors by filling out various surveys and questionnaires. You must realize that these documents are very helpful to counselors and to the school system because the findings are used to up-date guidance services and make them more meaningful for you. Counselors often send you follow-up questionnaires so that you will have the opportunity to let them know how your high school education is helping you and how it could have been more valuable.

Please bear in mind that guidance services are available to members of the community who are no longer in school. These services include counseling, job placement, and assistance in searching college and vocational school materials.

You should recognize your counselor as a helping person. If you feel your rights have been violated, you should feel free to go to your counselor and discuss the situation. Your relationship with your counselor is to be built on a base of mutual trust, confidentiality, and understanding. You are urged to take advantage of what can become a very meaningful experience.

GRADE TEN

On the day preceding the opening of school, there will be an informal orientation during which time you may pick up class schedules and find your assigned homeroom. Guides will be available to assist you.

Group sessions are planned early in the school year. These will enable you to talk with others in your class and with counselors regarding school adjustment. You will be excused from study halls to take part in these sessions. The career guidance handbook will be available so that you may investigate what to expect in guidance services during your high school years.

With other members of your English class, you will have an orientation to the Career Guidance Center. The guidance assistant will prepare a sheet offering information about the Center, its facilities and materials. During the session, you will do a self evaluation and take a career search test. You will also be asked to complete a survey evaluating the guidance services offered in the junior high. In addition, you will begin a career interest inventory which will be maintained throughout your high school years.

The ARMED SERVICES VOCATIONAL APTITUDE BATTERY TESTS (ASVAB) is given during your tenth grade year. A letter is sent to your parents explaining its purpose and seeking their permission for you to take it. Since it reveals your strengths and weaknesses in different vocational areas, it can be of benefit to you.

For those of you having academic difficulty, deficiency reports will be sent home. This is an

attempt on the part of the guidance department to inform your parents should you be failing.

A general invitation will be issued to all sophomores interested in participating in the Hugh O'Brien Scholarship. This identifies an outstanding member of the sophomore class.

Vocational options will be presented to you. You will have the chance to explore vocational programs and visit the Portland Regional Vocational Center. Among the South Portland programs which you may investigate are distributive education, work experience, and the business work study. Making you aware of the availability of training is a valuable guidance service.

In preparing your program of study for the junior year, you will receive group counseling to help you make intelligent decisions. For the first time you will be concerned with phasing of courses.

Phase 1 is for those who have difficulty with basic skills in the subject area.

Phase 2 is for those who need to refine the basic skills at a slower pace.

Phase 3 is for those who would like to advance beyond the basic skills at a moderate pace.

Phase 4 is for those who learn rapidly and have a good command of basic skills.

Phase 5 is for those who have an excellent command of basic skills and are looking for a stimulating academic experience at an advanced pace.

In making selections for English courses, you will have the assistance of teachers and counselors. In social studies, you will be responsible for making your own phase designations.

Group sessions in the decision-making process will be led by counselors. You will be excused from study halls to meet with a small group of students who follow an organized approach to the process. The components of decision-making are values and information about alternatives and strategy. You will practice using decision-making concepts and skills. Objectives of this program are to help you realize that you do make decisions affecting your life and to recognize that decision-making is a personal matter; the "correct" decision is correct only for you.

As always, you will have the opportunity to make appointments to see your counselor individually for whatever reason you may have - be it personal, social, or academic.

GRADE ELEVEN

Goal setting is a program designed by counselors which will help you establish short and long term goals. Working in groups, while reviewing career opportunities, you will learn the relationship between your values and the career and life style you choose.

Having been introduced to vocational options in grade ten, you may wish to consider the following programs in planning your course of study.

1. Cooperative Distributive Education is a laboratory course dealing with sales and the distribution of products and services. A special phase of the program provides for work experience under the supervision of trained personnel. Classroom instruction is related to job requirements and to your individual needs.

2. Cooperative Trade and Industrial is designed to help you learn and develop an employable skill. You will receive instruction in academic subjects and in specific occupational areas. Emphasis is placed on individual assignments. The course is a cooperative arrangement involving you, your parents, employers and school.

3. Cooperative Office Occupations is a work study course permitting on the job training for secretaries. At the same time you would be enrolled in the Office Machines course which complements this training with practice in use of business machines. You will have experience working in the local business community under supervisory personnel.

4. In addition to these two-year courses, you should consider other programs available at Portland Regional Vocational Center. Among the variety of options you may want to examine are automotive, carpentry, graphic arts, electronics, health occupations, and horticulture.

This year you will be participating in more standardized testing which again will indicate your strengths and weaknesses. Counselors using a team approach will provide an orientation to the PRELIMINARY SCHOLASTIC APTITUDE/NATIONAL MERIT QUALIFYING TEST. Given in the early fall to any junior electing to take it, the test is offered for a fee of $2.75, at this writing. All participating in this test will be competing for National Merit Recognition. This test which measures your verbal and mathematical skills is an excellent one for any student thinking about college. Study guides to assist you in preparing for the test are available in the Career Guidance Center.

Group orientation to the College Entrance Examination Boards will be available to you during the year. The SCHOLASTIC APTITUDE TEST is available November through June. The cost at this writing is $7.25. You will be encouraged to take this program during the spring. Aptitude measures verbal and mathematical skills. The ACHIEVEMENT TEST PROGRAM measures knowledge gained in specific areas: English, mathematics, social studies, and foreign languages. Your choice of college will determine the specific achievement test required of you. The cost of the Achievement Test(s) is $11.00 - whether you decide to take one test or the maximum of three at one sitting.

Registration forms for the CEEB Tests are available in the guidance office.

Individual counseling will continue to be available to you as an ongoing service of the department.

In the spring of your junior year, you will be invited to make up your course of study for your last year in high school. (See Appendix C) The importance of your course selections cannot be over emphasized. You have made a commitment which must be evaluated every year as you get closer and closer to graduation. Am I taking the right courses? Will I be able to meet the requirements of my tentative career choice? Will I be satisfied with myself? Am I doing the very best I can? These and other questions can only be answered by you. If you have carefully evaluated your abilities, seriously thought out your future options, and done your very best, you should be ready to plan your final year with confidence and anticipation.

GRADE TWELVE

One of the first requests made of you during your senior year will be the completion of post-secondary plan cards. These will require a commitment concerning your goals. Responses indicate your interest in pursuing further education, employment, or military service. Beginning in September, there will be visits from representatives of post-secondary institutions. This will be an ongoing procedure throughout the year. You will be invited to attend any sessions pertaining to the interests you checked on the plan cards.

Letters to your parents inviting them to Open House will be sent in the fall. Later they will be urged to attend Senior Parents' Night. At this evening session, they will become familiar with programs and services available to you in your final year at South Portland High. Many parents may wish to discuss financial aid and scholarship awards. (See Appendix D - E - F for specific information.)

After each ranking period, personal letters will be mailed to your parents if there are serious questions about your graduation status. Often recommendations for correcting or improving the conditions are suggested by your counselor. You are reminded that to earn a high school diploma, you must pass 8 semesters of English, 1 year of American History, and 3 years of physical education. All other courses are elected, based on your career interest - be it vocational, college or immediate job entry.

In group sessions you will review the testing program available to seniors. For those who have not taken the Scholastic Aptitude and Ach-

ievement Tests of the College Entrance Examination Board (CEEB), the opportunity to do so will be provided during the year. It is suggested that these tests be taken early in grade twelve.

A transcript, which is your record of subjects taken and grades earned from grades nine through twelve, will be sent to institutions of higher learning to which you have applied. Your counselors spend many hours filling out the necessary forms and writing letters of recommendation. Much time and thought are required for these to be done in a professional manner. You should know that these transcripts are not released without permission. You or your parents will be requested to sign a release form.

Counselors will explain the ADVANCED PLACEMENT TESTING PROGRAM to make you more aware of the opportunity it affords you. You are not required to take part in the program even though you may be taking the Advance Placement courses. AP TESTS are given in the spring by the Educational Testing Service. If you score high enough - a 3 or higher on a scale of 1 to 5 - you may get college credit from those colleges or universities participating in the program. The advantages of getting credits before college entrance are a financial saving and a chance to pursue advanced courses in a selected field. Cost is $32 for each examination and the fee may be reduced as determined by government guidelines.

On follow-up surveys, students have indicated that Senior Career Day was one of the most beneficial events of their school life.

You will be interviewed by personnel managers and business representatives from the community. This is not to be considered a job placement day. The major objective of this exercise is to make you aware of the interviewing process. You will learn of the types of jobs in the area and the qualifications necessary to obtain them. English teachers and counselors involve students in interviewing techniques, resumé writing, and values clarification activities. Grooming and proper dress are also discussed in the career orientation workshop.

The guidance department has initiated a service which responds to a great student need - that of college survival. In the past, students have been academically well prepared to pursue further education. The problem has been one of social adjustment and the need to meet diverse situations in the community of post-secondary training. To assist you in selecting the right school and in learning to work and live with others, counselors will arrange special workshops. They will assist you in filling out applications and exploring the ways of seeking financial aid. Students presently in college join the guidance staff and involve you in discussions dealing with social adjustment, campus living, and use of leisure time.

At the end of the year, you will have a final session with counselors to evaluate your high school experience, including curriculum, guidance, clubs, organizations, and career education.

Your association with guidance counselors does not necessarily end when you leave the high school setting. The staff will be ready to assist you in any way possible. After leaving

school, you could be of continued service to South Portland by sharing with us information about your career and life style.

APPENDIX D

LOCAL SCHOLARSHIPS AND AWARDS

A general scholarship application may be obtained in the guidance office for any of the following local scholarships. Since new awards may be added each year and others may be eliminated, we suggest that you pay particular attention to scholarship notices sent periodically to seniors by the guidance office.

The ALTRUA CLUB offers a $200 scholarship to a girl who plans short term or vocational training. The recipient must exhibit citizenship and have an earnest desire for further education.

LEILA BROUGHTON AWARD of $100 is presented to a graduate who has shown integrity, industry, courtesy. The recipient need not be a high ranking student nor is it a requirement that he/she plan to attend a post-secondary school.

PHYLLIS DAVIDSON FRENCH AWARD is given to the highest ranking student in French IV who plans to attend a 4 year degree college.

EAGLES ASSOCIATED AWARD of $100 is presented to a student who has shown citizenship and scholarship and has made a contribution to the school.

STEWART P. MORRILL POST AMERICAN LEGION AUXILIARY awards a $50 scholarship to a qualified senior girl who is a good school citizen in need of scholarship aid. Preference is given to the daughter of a veteran.

STEWART P. MORRILL POST AMERICAN LEGION offers a scholarship of $150 to a qualified senior.

Preference is given to the son or daughter of a veteran.

RANDALL AND MC ALLISTER OIL COMPANY presents a scholarship of $500 to a senior student who has been involved in school and community activities. The recipient must be enrolled in an accredited college.

EDWARD C. REYNOLDS FUND is a financial award made to the highest ranking senior going on to college.

The PARENTS AND TEACHERS OF DORA L. SMALL SCHOOL award two $100 scholarships, one to a girl and one to a boy. The students must have attended Small School and have been accepted in a post-secondary school.

SOUTH PORTLAND HIGH SCHOOL KEY CLUB offers a $200 scholarship to a senior boy who has been in the honor assembly for two years and has been accepted in an accredited school of higher education. The student's scholastic record, financial need, and school and community involvement will be considered.

SOUTH PORTLAND HIGH SCHOOL KEYETTE CLUB provides a scholarship of $100 to a senior girl who has made outstanding contributions to the school.

SOUTH PORTLAND KIWANIS CLUB presents a $200 and a $100 scholarship to two students who need financial assistance and who plan to attend a post-secondary school or college.

The SOUTH PORTLAND-CAPE ELIZABETH ROTARY CLUB awards two scholarships. One award of $300 is

given to a student pursuing a full-time course at SMVTI. The second scholarship of $250 is presented to a student planning a full-time course of study in the field of medical-dental services. These would include dental hygienist, X-ray technician, registered nurse or licensed practical nurse.

The SOUTH PORTLAND TEACHERS' ASSOCIATION presents a scholarship to a senior who has been accepted in any post-secondary educational program.

SOUTH PORTLAND POST 832 V.F.W. awards a scholarship of $500 to a deserving senior. First consideration is given to the son or daughter of a V.F.W. member. Then the child of any veteran is considered. The recipient must have been accepted in an accredited post-secondary school. The student's scholastic record will be reviewed, and school and community involvement will be taken into consideration.

A FACULTY-ALUMNI SCHOLARSHIP is being established. As soon as the fund is large enough to yield a significant amount of interest, a scholarship will be awarded.

APPENDIX E

REGIONAL AND STATE SCHOLARSHIPS

Listed are several scholarships which you may wish to consider. Information and applications are in the guidance office. You should see your counselor for further information.

AMERICAN LEGION AND AUXILIARY offer several scholarships to high school seniors who are in the upper half of the class scholastically, who show financial need and have been admitted to an accredited college or vocational school. The JOHN G. STOVER AWARD consists of two $300 scholarships, one to a girl and another to a boy in the State of Maine. The JAMES V. DAY AWARD is a scholarship of $300. The CHILDREN AND YOUTH SCHOLARSHIPS offer seven $300 awards, one in each of Maine's Seven Regional Districts. Only one scholarship may be awarded to any one individual.

ASSOCIATED GENERAL CONTRACTORS OF MAINE award two $500 scholarships to students planning to enroll in a two-year construction-oriented course at the University of Maine or at one of the Vocational Technical Institutes of Maine. Applicants are selected on the basis of financial need and academic standing.

CHARLES A. BISHOP JR. MEMORIAL SCHOLARSHIP offers grants to competitive high school swimmers.

The PORTLAND BOYS' CLUB ALUMNI ASSOCIATION presents two scholarships to any senior boys who are going on to college or vocational school. One is for $300 and the other is a $100 award. The only stipulation is that the

boy have been a member of the Boys' Club for at least two years.

BUSINESS AND PROFESSIONAL WOMEN'S CLUB OF PORTLAND awards a $200 scholarship to a senior girl deserving assistance in continuing her education in a business or professional career.

CUMBERLAND COUNTY VOITURE 1003,40 and 8, American Legion presents a scholarship to a senior applying to a Nursing School or Nursing Aide School.

DATA PROCESSING MANAGEMENT ASSOCIATION awards a $400 scholarship and a runner-up award of $100 to a senior planning to attend a two year college, business and/or data processing school. Applicants must compose an essay of not less than 1000 words on the topic "Why I Feel Data Processing Would Be a Rewarding Career".

ELKS NATIONAL FOUNDATION SCHOLARSHIP LEADERSHIP PROGRAM presents four "Most Valuable Student" awards ranging from $700 to $3000 each.

KENNETH JORDAN HIGGINS MEMORIAL TRUST SCHOLARSHIPS are available to any senior who has been accepted in an accredited post-secondary vocational school, college or university. The student must demonstrate financial need. Six one-year scholarships in amounts up to $750 will be awarded to residents of the Greater Portland area.

MAINE STATE EMPLOYMENT ASSOCIATION offers two scholarships in this district of the State. Applications will be considered <u>only</u> from sons and daughters of MSEA who are entering post-high school educational or vocational programs.

One scholarship for $500 and another for $250 will be awarded.

MAINE STATE RETIRED TEACHERS ASSOCIATION SCHOLARSHIPS are given to four high school seniors who plan to study for the teaching profession and intend to teach in Maine for at least two years after graduating from college. Each scholarship is for $300 and will be paid to the college at the end of the first semester. The recipient must be in the upper quarter of the class.

NEW ENGLAND DISTRICT OF KIWANIS INTERNATIONAL offers 27 one year scholarships of $500 each to students throughout New England. The award is based on financial need and a student's overall school record.

PORTLAND BRANCH N.A.A.C.P. SCHOLARSHIP FUND has financial aid available for black students who are interested in further education after graduation from high school.

PORTLAND SECTION OF THE NATIONAL COUNCIL OF JEWISH WOMEN awards scholarships to Jewish senior high school students from the Greater Portland area who are planning to continue their education in a college or vocational school.

WOMEN OF ROTARY, Portland, present a $300 scholarship to a senior girl planning to attend college or a vocational training school. This scholarship is based primarily on need, but achievement and school activity are a consideration.

In addition to the scholarships listed, we recommend that you read Feingold's Scholarships, Fellowships and Loans and the College Blue Book's Scholarships, Fellowships, Grants and Loans which you will find on the financial aid shelf of the Career Guidance Center.

APPENDIX F

FINANCIAL AID FOR POST-SECONDARY TRAINING

Financial aid is based on financial need. This need is determined by financial information included on the Parents' Confidential Statement (PCS). Counselors will gladly assist your parents in filling out these forms which should be filed as soon as application to your college or vocational school is made. The PCS is mailed directly to Princeton, New Jersey, where the need for financial aid is assessed. For example, PCS determines that you and your parents can afford $1500 per year to finance your higher education. If the cost is $2500, your need is $1000. If the cost is $5000, your need would be $3500. Should the school accept you it may meet your financial need. The findings of the PCS are forwarded directly to the institution to which you are applying. The guidance office never receives the results.

Once financial aid has been determined, you must apply to the school of your choice for their own financial aid application. The main sources of financial aid are

1. grants
2. student loans
3. work study
4. Basic Educational Opportunity Grant (BEOG)

A grant is an outright gift. A loan is to be repaid and work study is a program through which a student works on campus or in the community in a non-profit setting and gets paid directly. A financial aid package is usually made up of a combination of the sources mentioned.

These packages are offered to the student directly from the college or vocational school. PCS and BEOG forms are available in the guidance office.

VOCATIONAL ENGLISH

Introduction

The materials in this series of lessons has been developed at Gateway Technical Institute for use in English as a Second Language classes under a special project funded by the State Board. Its objective is to provide the students with an overview of vocational diploma programs available in the institution so that as they become proficient in the use of English they are also increasing their knowledge of training opportunities available to them.

An effort has been made to introduce to different groups of students, programs in which they could be successful with varying degrees of English skill, with those programs requiring the least skill being introduced at Level I. In some instances, notably Health and Food Preparation, there are opportunities for a wide range of proficiency. These units were prepared on all three levels.

It is expected that teachers will supplement these units through discussion, films or film strips, related materials, resource speakers visits to the different labs, and industrial tours. In some instances, the work samples available through the Gateway Testing Center can be used as a "hands on" experience in the unit.

Within each unit is a structural English lesson ranging in Level I from verb usage, contractions, etc., to the use of adverbs and adjectives in Level III. Teachers will supplement the unit by using the vocabulary list for sentence writing and conversation practice.

VOCATIONAL ENGLISH

Level I

Safety
"Sit, Set", "There are, they're", Irregular verbs

Welding
"Ing" ending, past tense, negatives, sentences to questions

Maintenance
Past tense, future tense, nouns to verbs, commands to requests, sentences to questions

General Factory
Contractions, past tense

Machine Operator
"Their, there", "an", contractions

Food Preparation
Plurals, negatives, pronouns, abbreviations, sentences to questions

Nursing Assistant
Plurals, negatives, sentences to questions

Agriculture
Abbreviations, plurals, homonyms, verb tenses

Industrial Related

Because Gateway Technical Institute is in the center of a vast industrial area that is growing rapidly, specific programs are available for those who want to work in the manufacturing or production processes so abundantly available.

An awareness of good safety practices is needed in all types of industrial jobs for the protection of self and others. These concepts can be understood if presented early in ESL classes.

Many ESL students have a very limited knowledge of the variety of industrial jobs available and of the skills each requires. The four included at Level I, Welding, Maintenance, General Factory, and Machine Operation, have both training and employment opportunities for those with limited ability in English.

The units should be supplemented with visits to the labs, observation of the classroom and industrial tours. Representatives of the Urban League, industrial teachers from Gateway, or persons from industry could be invited to visit the class and discuss the types of jobs and training opportunities.

SAFETY

Student Objective: The student will be able to understand and identify words and general rules related to safety in the home and on the job.

Vocabulary:

smoke	safety
beware	fire
caution	hot
enter	protective
keep out	
run	
walk	

Dialogue:

Supervisor: We feel that safety is important on this job.
Worker: Do you have special rules that I need to follow?
Supervisor: Yes, we do. You will see them posted in all work areas.
Worker: Is there a special area for smoking?
Supervisor: Smoking is only allowed in the lounge area. There are also work areas where you must wear protective glasses.
Worker: Yes, I have noticed that.
Supervisor: We are proud of our safety record. I hope you will be proud of it also.

Grammatical Focus No. 1

Sit and set: Sit usually means to rest, to be in an upright or sitting position. (Principle parts or tenses: sit, sat, have sat, is sitting.) Set means to put or to place something. (Principle parts or tenses: set, set, have set, is setting.)

Exercise 1: Underline the correct form of set or sit in each sentence.

1. He (sit, set) the gasoline away from the fire.
2. If you (sit, set) on the damp ground, you may catch a cold.
3. Passengers (sitting, setting) with their seat belts fastened were not hurt in the accident.
4. The boxes have been (set, sat) out of the aisles for safety.
5. She is (sitting, setting) the light with the frayed wire on the table

to be fixed.

6. He (sat, set) in the sun too long and is sunburned.
7. The telephone numbers for the doctor and fire department are (sitting, setting) near the telephone.
8. In what row were you (setting, sitting)?
9. He just (sat, set) and said nothing.
10. She remembered to (set, sit) the pans on the range with the handles away from the area where they could be bumped.

Grammatical Focus No. 2

Proper use of <u>there are</u> and <u>they're</u> (they are)
Examples: They're careful to keep out of the dangerous area.
There are many safety rules.

Exercises: State whether "there are" or "they are" (they're) should be used in each sentence.

1. _____ many caution signs.
2. _____ fixing the broken stove.
3. _____ cleaning up the fire hazards.
4. _____ too many old papers near the furnace.
5. _____ fixing the frayed wires.
6. _____ many "caution" areas to beware of.
7. _____ too many hazards in that house.
8. _____ clearning the building of all fire hazards.
9. _____ to keep out of that area.
10. _____ in a no smoking area.

Grammatical Focus No. 3

Irregular verbs: Irregular verbs do <u>not</u> form their past and past participle by adding -d or -ed to the present form. They form the past and past participle by changing the vowel, adding -en, or by making no change at all. Examples are given below:

<u>Present</u>	<u>Past</u>	<u>Past Participle</u>
swim	swam	have swum
write	wrote	have written
hit	hit	have hit

Exercise 1: Place the correct form of the verb in each sentence. The forms of the verbs are given below.

Present	Past	Past Participle
do	did	have done
drink	drank	have drunk
freeze	froze	have frozen
get	got	have got or gotten
forget	forgot	have forgot or forgotten
go	went	have gone
run	ran	have run
see	saw	have seen
set	set	have set
sit	sat	have sat
take	took	have taken
wear	wore	have worn

1. I must be careful not to (ran) _____ in the building.
2. I will often (freeze) _____ my leftovers from dinner.
3. I have (set) _____ the gasoline can far away from the furnace..
4. He (see) _____ the sign "Do Not walk in the areas marked 'DANGER'."
5. He has (take) _____ the matches away from his baby many times.
6. She has (wear) _____ flame-proof clothing to work.
7. He (do) _____ remember to smoke only in the smoker's room.
8-9. Remember that when you (go) _____ into that area you must (wear) _____ protective glasses.
10. He has (take) _____ his protective gloves with him to work on the machine.

Exercise 2: Read each sentence, correcting the verb tense when necessary.

1. I will set the hot greasy pan off the stove.
2. I have get special shoes with extra protection to wear while I work.
3. He sit by the rubbish fire to make sure it did not spread to the grass.
4. He had forgotten how to use the fire extinguisher.
5. The child had drank some of the cleaner and was taken to the hospital.
6. He left his rings at home wo that his finger would not catch in the machine.
7. I have saw many caution signs.
8. She had did her best to keep the children out of the area marked "Beware."
9. He has seen many safety violations.
10. She begin to clean up the gasoline-soaked rags and burn them.

1. correct
2. _____
3. _____
4. _____
5. _____

6. _____
7. _____
8. _____
9. _____
10. _____

Situations:

A. Discuss hazards you would find in the house and how to remedy them.
B. Make a list of all the fire hazards in your home.
C. What are some rules of safety in a factory?

Reading:

Safety is very important. It is important in your work and in your home. You must know the hazards and dangers so that you will not be hurt. Check your home for hazards and take time to remedy them.

WELDING CAREER

Student Objective: The student will be able to understand and identify some of the functions, tools, and parts of a welder.

Vocabulary:

ampere	polarity	to draw	to weld
arc voltage	gas torch	to fuse	to transform
spot welding	arc torch	to weave	to bond
transformer	arc angle	to pass	to install

Dialogue:

Juan (a welder): Do you know what it means to fuse or pass in welding?
Chico (a student): No, I don't, what are these two things?
Juan: Let's take one step at a time: to pass is to make one single stroke over the object with your torch.
Chico: What is the second step?
Juan: To fuse means to bond two edges with the torch.
Chico: Are these welding steps always done with a torch?
Juan: Yes, there other steps, but these two are the most important.

Grammatical Focus No. 1:

Exercise 1: Add ing to the following verbs. On verbs that end with e, drop the e and ing. Example: hold - holding

1. inspect _____
2. draw _____
3. fuse _____
4. install _____
5. pass _____
6. weld _____
7. transform _____
8. bond _____
9. repair _____

Exercise 2: Change to past tense. Example: hold - held

1. draw _____
2. fuse _____
3. install _____
5. pass _____
6. weld _____
7. transofrm _____

8. bond _____
9. inspect _____
10. repair _____

Exercise 3: Use the correct verb form from the above words in the sentence.

1. Chico (fuse) _____ the two pieces of metal.
2. Juan is (install) _____ new welding equipment.
3. Juan (bond) _____ the two metal plates.
4. Juan and Chico are (weld)_____ with gas torches.
5& 6. Juan and Chico (repair) _____ the machinery by (pass) _____ the torch over the crack.
7. (draw) _____ the blueprints for the welders is a separate job.
8. Juan and Chicho (work) _____ w th arc or acetylene torches.
9. Chico (inspect) _____ the weld for bead size.
10. Aluminum and stainless steel are hard-to-weld materials and do not (repair) _____ easily.

Exercise 4: Find the meaning to match the verb.

_____ inspect	1. change
_____ repair	2. go over
_____ draw	3. form figures and designs
_____ pass	4. job
_____ weld	5. out of the way
_____ transform	6. put in place
_____ work	7. fuse
_____ install	8. fix
	9. play
	10. look over

Grammatical Focus No. 2: Adding the word <u>not</u> to change a sentence from positive to negative.
Example: I can work. I cannot work.

Exercise 1: Change the following sentences to negative form by adding <u>not</u>.

1. The teacher is in.
2. The welding torches have arrived.
3. The transformers are here.
4. I can arc weld very well.
5. He can weld very well.
6. The man can repair the pipes.
7. Chico will grind off the extra weld.
8. The welders will work today because the blueprints arrived.
9. Juan will fill in the hole by welding.
10. Chico will construct the new machine.

1.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Exercise 2: Changing sentences to questions. Example: The welder needs a torch. Does the welder need a torch? Change the following sentences to questions.

1. Blueprint reading is necessary for welders.
2. The good welder uses safety precautions.
3. Welders need to work accurately.
4. The battery acid is dangerous.
5. Welding is very specialized.
6. The welder's torch was hooked up to the gas tanks.
7. Safety is very important in welding.
8. Goggles and an apron are needed in welding to protect your eyes and clothes.
9. The welder needs very particular training.

1.

2.

3.

4.

5.

6.

7.

8.

9.

Situation:

A. Call a technical school or a welding company and tell them you are interested in becoming a welder. Ask what training you need for the job.

B. Visit a welding class and talk to a welder about the duties and responsibilities.

C. Visit a welding class and look at the textbooks and tools used in the class.

Reading:

The job of a welder can be very interesting but also very specialized. Welders construct and repair equipment, machinery, and parts by welding metal parts together according to layouts and blueprints. The two most common types of welding are arc and acetylene.

The demand for welders is expected to increase because of the wider use of welding processes. Repair and maintenance work in the metalworking industries will require more welders.

MAINTENANCE

Student Objective: The student will be able to understand and identify the functions and duties of a maintenance worker.

Vocabulary:

buff -- verb
clean -- verb and adjective and adverb
carpet -- noun and verb
dust -- noun and verb
mop -- noun and verb
vacuum -- adjective and verb
polish -- noun and verb
wax -- noun and verb

maintenance
experience
supervisor
broom
hall
floor
furniture

Dialogue - Different uses of the same word:

Elena: I would like a job in the maintenance area.
Job Counselor: Do you know how to clean a floor?
Elena: Yes, my work is very neat and clean.
Job Counselor: Have you ever done carpeting?
Elena: No, I do not know how to work with wood.
Job Counselor: No, you misunderstood me. I asked you about "carpeting", not "carpentry."
Elena: Oh! Yes, I have used a vacuum cleaner when I worked in an office building. But I worked mostly on mopping the halls and dusting.
Job Counselor: Then you are familiar with using a mop and removing dust. Did you empty wastebaskets also?
Elena: Yes, and my supervisor taught me how to wax floors as well.
Job Counselor: You must know about using polish and wax too?
Elena: I really didn't polish furniture too much and we only waxed floors about every six months. I also know how to operate a floor buffer to make them shine.
Job Counselor: Since you have had experience at vacuumming, mopping, dusting, waxing, and buffing, I would think that many employers would be interested in hiring an experienced maintenance worker like yourself. Let's see what openings are available.

Grammatical Focus No. 1
Using various tenses of the same verb.

Examples: A maintenance worker is cleaning the bathrooms.
A maintenance worker cleaned the bathrooms
A maintenance worker will clean the bathrooms.

She is vacuuming the carpet.
She vacuumed the carpet.
She will vacuum the carpet.

Maria is washing, waxing, and buffing the floor.
Maria washed, waxed, and buffed the floor.
Maria will wash, wax, and buff the floor.

Is she dusting and polishing the furniture?
Has she dusted and polished the furniture?
Will she dust and polish the furniture?

Exercise #1: Change the following sentences to use past tense verb forms.

1. Juanita is polishing the table tops.
2. The supervisor will mop Rosa's floor for her.
3. Maria will vacuum her own carpet the same way.
4. Is Romero washing the windows with the right detergent?
5. Who will clean the windows in that office?

1.

2.

3.

4.

5.

Exercise #2: Change the following sentences to use the future tense verb form.

1. Maria is dusting all the clocks today.
2. He plans to sweep the stage after break time.
3. Has she finished buffing the brown tile room.
4. Is Carlos using clear soap on the windows?
5. The maintenance woman just waxed the cafeteria floor.

1.

2.

3.

4.

5.

Grammatical Focus No. 2

Exercise 1: Change the underlined word from a noun to a verb usage.

1. Use the vacuum cleaner in the halls.
2. The dust on the desks should be removed.
3. Wax will put a nice shine on that floor.
4. Is that the right polish for that furniture?
5. My supervisor installed the carpeting on these floors himself.
6. Would you please work with a mop on these floors?

1.

2.

3.

4.

5.

6.

Exercise 2: Change the following commands to requests.

1. Empty these wastebaskets before you leave.
2. Give me a hand in moving my ladder!
3. Don't make so much noise while cleaning the library.
4. Don't take your coffee break until we finish the halls and stairways.
5. Pick up your feet when I vacuum near your chair.
6. Since I will leave early, you buff my 2 floors for me.

1. Please empty these wastebaskets before you leave.

2.

3.

4.

5.

6.

Exercise 3: Make a sentence which asks a question using the following terms.

1. wash, wax
2. dust, polish
3. vacuum, carpet
4. mop, buff

1.

2.

3.

4.

Survey Questions:

1. What is the title of a boss on a maintenance job?
   a) chief, b) supervisor, c) conductor, d) steward, e) trainee

2. What do you clean with a vacuum cleaner?
   a) desks, b) ceilings, c) toilets, d) carpets, e) wastebaskets

3. A disinfectant soap is used in cleaning: a) bathrooms, b) parking ramps, c) ceiling lights, d) closets, e) sidewalks

4. The usual length of a lunch break is a) 5 minutes, b) 30 minutes, c) 2 hours d) once per week

5. Which of the following would <u>not</u> be used to remove dust?
   a) mop, b) rag, c) rake, d) broom, e) vacuum

BEST COPY AVAILABLE

GENERAL FACTORY

Student Objective: The student is able to identify many of the words and tools used in the factory.

Vocabulary:

time card	day work	steward	hammer
time clock	piece work	screwdriver	pliers
punch in	foreman	time study	chisel
punch out	straight time	relief man	ratchet
punch press	time and one half	wash-up time	file
box wrench	open end wrench	gang press	break
ripping bar	torque wrench		

Dialogue:

Enrique: I like to work in this factory; there's a lot opportunity to work overtime, and get paid time and one half.

Jose: I know, and then I make extra money on piece work too because I am fast on the job I have now.

Enrique: There is another way to make more too--the second and third shift pay more.

Jose: I would rather stay on day work because I like the foreman and the others I work with.

Enrique: We better punch in on the time clock, it's getting late.

Grammatical Focus No. 1

there is - there's there are - there're

1. There is a time clock There's a time clock.
2. There are many types of time clocks. There're many types of time clocks.

Exercise 1: Change the following sentences using the contracted form.

1. There is a time clock. 1.

2. There are time cards. 2.

3. There is a foreman. 3.

4. There are three gang presses. 4.

5. There is a relief man. 5.

6. There is my steward. 6.

7. There are the opened wrenches. 7.

8. There are the ratchets. 8.

9. There is a time study man. 9.

10. There is a new break time. 10.

Grammatical Focus No. 2

Exercise 2: Change the following verbs to past tense.

1. I need a new time card. 1.

2. We punch in at 7:00 a.m. 2.

3. The work pays straight time. 3.

4. I need a steward. 4.

5. He wants to be the foreman. 5.

6. The job is piece work. 6.

7. They all want day work. 7.

8. The relief man needs help. 8.

9. The punch press is broken. 9.

10. We want a break. 10.

Situation:

A. Visit a factory and ask to see a time clock. Ask to meet a foreman and steward.
B. Compare the various types of presses and wrenches.
C. Tell a friend or relative about your visit.

MACHINE OPERATOR

Student Objective: The student will be able to understand and identify the various tools and duties of a machine operator.

Vocabulary:

		Types of screws
vice	micrometer	Allan
clamp	screws	one-half inch
wrench	circular measure	Phillips
measure scale	angular measure	square
		hex

Dialogue between Charlie, a student, and Jorge, a machine operator:

Charlie: What are the most important objects and tools used by an operator?
Jorge: There are many objects and tools that are important, but two necessary ones are the scale of measure and the micrometer.
Charlie: Could you explain them?
Jorge: Yes, the scale of measure is a system that measures all the objects used by a machine operator.
Charlie: How about a micrometer?
Jorge: A micrometer is an instrument that is used as a ruler but measures much more accurately.

Grammatical Focus No. 1

Their and there. Their shows ownership (their tools).
There shows location (over there).

Exercise 1:

1. The man was using _____ Phillips screwdriver.
2. Machine operators know about _____ many tools.
3. _____ is the scale that is used to measure objects.
4. A clamp was used to fasten the pipe over _____.
5. _____ vice was used to steady the objects.
6. & 7. _____ micrometer is a more accurate measure than _____ ruler.
8. _____ was a square screw and an Allan wrench on the work bench.
9. _____ are training programs available to learn machine operation.
10. The angular measure was used to measure _____ machine parts.

Grammatical Focus No. 2

Use an before a word beginning with a vowel.
Example: The boy ate an apple.

Exercise 2: Fill the blank with a or an. The boy ate a peach.

1. He used ___ micrometer for more accurate measure.
2. __ angular measure was needed for the operator.
3. __ vice was used to steady the object.
4. __ student was seen in the machine shop.
5. The shop needed __ operator for the job.
6. __Allan wrench is very important to machine operators.
7. The operator needed __ hex screw.
8. It called for __ circular measure.
9. __ teacher with good qualifications is needed in a machine course.
10. The welder used __ gas torch on the job.

Grammatical Focus No. 3

Exercise 3: Change the contractions to words.
Example: The man didn't need the tool. The man did not need the tool.

1. He can't measure without a micrometer.
2. He won't be able to use the hex screws on the job.
3. The teacher didn't have the necessary tools.
4. It's the first time for the machine class.
5. He didn't use the Allan wrench in this case.
6. Isn't that a clamp on the pipe?
7. You're the only machine operator in the factory.
8. You've been the only person to go to the training.
9. The vice wasn't tight enough.
10. Hasn't he found the Phillips screws yet?

1. He cannot measure without a micrometer.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Situation:

A. Call a technical school or a machine shop and tell them you are interested in becoming a machine operator. Ask what training you need either before or actually on the job.
B. Look and find out what the duties of a machine operator are.
C. Visit a technical school or machine shop and find out what facilities are used and what the duties of a machine operator are.

Reading:

The job of a machine operator is a real challenge. You should visit a machine shop before you decide if you would like that type of work. Find out what the job pays, and how long the training period is before you decide on a career as a machine operator.

Hospitality Programs

Food service jobs, part of the hospitality industry, are booming. Greater numbers of people are traveling and dining out. With increases in population, urban development, and more money available for trips and meals away from home, the spiral continues upward.

Individuals with limited skills in English are employable in the hospitality industry. Training in proper kitchen procedures, sanitation, and working with the public are available at various levels in the food service program at Gateway Technical Institute

This unit should be supplemented by visiting the food service labs on the Racine campus. Teachers in the program could be invited to talk to the class.

FOOD PREPARATION
Salad Girl or Salad Boy

Student Objectives: The student will be able to understand and utilize the vocabulary and functional sentence patterns necessary in working as a salad girl.

Vocabulary:

beat	creamy	vegetables
cube	crisp	dressing
slice	wilted	portion
chop	dried	mold
garnish	tasty	recipe
flute	appetizing	menu
blend	discolored	hygiene
shred	sanitary	peelers
dissolve	fresh	weights
grate	tossed	measures

Dialogue:

Maria: I need a job
Restaurant Manager: What kind of job do you want?
Maria: Perhaps I could work in the kitchen.
R.M.: Have you worked in a restaurant before?
Maria: No, but I would like to learn.
R.M.: There is an opening for someone to work in the kitchen making salads.
Maria: Oh, I would like to do that.
R.M.: Be here tomorrow morning at 9 o'clock.
Maria: Thank you very much.

Grammatical Focus No. 1
Exercise 1: Make the following sentences plural.
Example: this - these that - those

1. This is an orange.	1. These are oranges.
2. This is an apple.	2.
3. This is a pineapple.	3.
4. This is a cherry.	4.
5. This is a pear.	5.
1. That is a lemon.	1.
2. That is a peach.	2.

3. That is a strawberry. 3.
4. That is an avocado. 4.
5. That is a banana. 5.

Exercise 2: Make the following sentences negative.

1. The floor is dirty.
2. The lettuce is wilted.
3. The carrots are crisp.
4. The salad dressing is creamy.
5. The tomatoes are discolored.
6. The refrigerator is cold.
7. The salad is tasty.
8. The kitchen is big.
9. The measuring cups are in the drawer.
10. The cutting board is on the table.

1.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Grammatical Focus No. 2
Exercise 1: Change the following sentences from I to he or she.
Example: I look she looks, he looks
I talk she talks, he talks
I laugh she laughs, he laughs

BEST COPY AVAILABLE

1. I peel the oranges.	1. She peels the oranges.
2. I flute the cucumbers.	2.
3. I slice the tomatoes.	3.
4. I chill the melon.	4.
5. I shred the cabbage.	5.

1. I dice the apples	1. He dices the apples.
2. I mold the gelatin.	2.
3. I wash the utensils.	3.
4. I wrap the lettuce.	4.
5. I store the vegetables.	5.

Exercise 2: Abbreviations. Fill in the blanks with the correct abbreviation.

1. cup	c
2. teaspoon	____
3. gallon	____
4. tablespoon	____
5. pint	____
6. quart	____
7. ounce	____
8. pound	____

Exercise 3: Change the following sentences to questions. Present continuous tense.

1. Rosie is wearing a hairnet.
2. She is grating the carrots.
3. They are washing the lettuce now.
4. Maria and Rosie are blending the ingredients.
5. He is making a waldorf salad.

1. Is Rosie wearing a hairnet?

2.

3.

4.

5.

Lesson Theme:

Maria works in a restaurant.
It is a big restaurant.
She works as a salad girl.
Maria prepares salads in the kitchen.
The kitchen must be very clean.
Maria wears a uniform.
She likes her job.

Discussion questions:

1. Where does Maria work?
2. Is the restaurant big?
3. What does Maria prepare?
4. Must the kitchen be clean?
5. What does Maria wear?
6. Does she like her job?

Situation:

A. Talk to someone who works in food preparation. Ask questions about the duties.

B. Visit a place where food is prepared such as a restaurant, cafeteria, hospital, school, hotel, or lunch counter. Explain your interest to the manager.

C. Go to the nearest state employment office and learn what jobs are available in your area.

Structures that may be helpful in the situation:
I am interested in...
What jobs are available for me?
Is training...
How long...
May I visit...
I would like to work...

Reading:

Salad preparation is an art that can be learned. There are many kinds of salads. Some salads are made from fruit. Other salads are made from vegetables. There are also gelatin salads. Salads add zest to a meal. Learn all you can about this job.

Suggested other job possibilities at Level 1: dishwashing, potwasher, busboy, kitchen worker

Health Programs

The allied health programs all earn a diploma at Gateway and are oriented toward assistance in patient care in the dental or medical office or laboratory, in the operating theater, or on the hospital ward.

The nursing assistant is a six-week diploma program for the person who is stable, healthy, able to adjust and work under supervision to perform a variety of routine tasks.

The students could visit the nursing labs and tour the hospital. Nursing faculty can be used as resource speakers.

HEALTH CAREERS
NURSING ASSISTANT

Student Objectives: The student will be able to understand and identify the functions and duties of a nursing assistant.

Vocabulary:

health	hygiene	medical
hospital	disease	
patient	physician	
operation	pulse	
temperature	thermometer	

Dialogue:

Myrna: Will you help me with this patient, please?
(Nurse)
Ana: What would you like me to do?
(Nursing Assistant)
Myrna: She needs to have her temperature and pulse taken and recorded.

Ana: I will get the thermometer.

Myrna: Write the temperature down on the chart.

Ana: Why is this patient in the hospital?

Myrna: She is having an operation in the morning.

Grammatical Focus No. 1
Changing singular nouns to plural nouns.
Example: Singular - patient Plural - patients

Exercise 1: Change the nouns to plural form by adding s.

1. Help me with the patient.
2. Operations are performed by a physician.
3. We will change the bed.
4. Write the temperature on the chart.
5. She dropped the thermometer.
6. Will you call the nurse?
7. The nurse helps the doctor.

8. Washing your hands helps to prevent disease.
9. Sick patients require good medicine.
10. The hospital must be clean.

1. Help me with the patients.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Grammatical Focus No. 2
Adding the word not to change a sentence from positive to negative.
Example: I can help. I cannot help.

Exercise 2: Change the following sentences to negative form by adding the word not.

1. The doctor is in.

2. The patient can talk.

3. The nurse will help you.

4. I am a nursing assistant.

5. The patient does have a temperature.

6. The patient's pulse should be recorded.

7. You may make the bed now.

8. I do want you to have the operation.
9. The hospital could help the patient.
10. The physicians have diagnosed the disease.

1.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Grammatical Focus No. 3 - Review Exercise
Change sentences to questions.
Example: The nursing assistant needs white shoes.
Does the nursing assistant need white shoes?

Exercise 1: Change the following sentences to questions.

1. The doctor is in.
2. The patient is very sick.
3. The hospital is always clean.
4. The patient has a temperature.
5. The patient needs an operation.
6. The medicine tastes good.
7. This thermometer is broken.
8. The patient's chart is missing.
9. This bed needs changing.
10. The patient is getting well.

1. Is the doctor in?

2.

3.

4.

5.

6.

7.

8.

9.

10.

BEST COPY AVAILABLE

Situation:

A. Call a hospital employment office and tell them you are interested in becoming a nursing assistant. Ask what training you need for the job.

B. Visit a hospital employment office and ask them what duties are required of a nursing assistant.

C. Visit a hospital and ask for a tour of the facilities to see if you would like to work there.

Structures that may be useful in the situation:

Is training required to become a...
How long...
Do I need...
I would like to work...
There are many interesting jobs in...

Reading:

There are many different kinds of jobs available in a hospital. You should visit a hospital before you decide if you would like that kind of work. Ask some nursing assistants how they like the work. Find out how long the training program is, and how much the job pays before you decide on a career as a nursing assistant.

Agri-Business

Agri-business is a combination of enterprises, made up of business and agricultural interests, created by increased technology and distribution methods. New concepts, government controls, and greater numbers of people to serve, all indicate greater involvement for the grower, producer or processor, and greater need for more education, information, and training.

Horticulture is the science or art of cultivating plants, especially garden plants. It is the cultivation of a garden or orchard, the art of growing fruits and ornamental plants, and the improvement of the landscape.

Floriculture is the cultivation of ornamental flowering plants.

Gateway operates a greenhouse for purposes of instruction in this program. This unit should include a tour of that facility and some discussion with the faculty concerning types of employment available. Many of our ESL students have an interest in this type of activity and practical experience.

AGRICULTURE

Student Objective: To become familiar with general agriculture terms and to gain a general knowledge of farming and farm duties.

Vocabulary:

fertilizer	to plant
farm	to harvest
tractor	to pick
cash crop	to sow
season	to plow
vegetables	to cultivate
dairy farm	to milk
fruits	to raise
fields	ripe
market	
chores	
truck farm	
seed	
soil	
grain	
livestock	

Dialogue:

Juan: I think the tomatoes are ripe enough to pick today.
Bill: Yes, I was out in the field yesterday and they seemed to be ready to harvest.
Juan: How many bushels do you think we should be able to market?
Bill: I'm not sure, but it should be a good crop.
Juan: The new fertilizer we used this year must have helped.
Bill: Yes, I'm sure it did. All the gruits and vegetables seem to be doing well this year. We've had good weather too.
Juan: Well, I'll finish my chores and then we can start picking.
Bill: I'll drive the tractor and wagon out to the field.
Juan: We will be able to start our truck farm stand tomorrow!

Grammatical Focus No. 1
Exercise 1: Many English words are abbreviated (made shorter). This is especially true with words used in measurement. Match the following words with their abbreviation. Abbreviations are always followed by a period.

_____ 1. bushel	a. oz.
_____ 2. peck	b. in.
_____ 3. pint	c. yd.
_____ 4. quart	d. cu.
_____ 5. pound	e. sq.
_____ 6. ounce	f. lb.
_____ 7. mile	g. ft.
_____ 8. gallon	h. gal.
_____ 9. rod	i. pt.
_____ 10. square	j. pk.
_____ 11. cubic	k. rd.
_____ 12. foot	l. mi.
_____ 13. yard	m. bl.
_____ 14. inch	n. qt.

Grammatical Focus No. 2

Forming plurals:

1. The most common way to form the plural of nouns is to add the letter s to the singular form.
2. To form the plural of a noun ending in ch, sh, x, s, add es.
3. To form the plural of a noun ending in a consonant and a y, change the y to i and add es.
4. To form the plural of a noun ending in a vowel and y, you usually add s without changing the y.
5. Words ending in o after a consonant often add es to form the plural.
6. Some words are the same in both singular and plural.

Examples: girl--girls church--churches monkey--monkeys, dairy--dairies deer--deer

Exercise 1: Write the plural for the following words:

1. potato _____

2. strawberry _____

3. crop _____

4. peach _____

5. lettuce _____

6. tomato _____

7. cherry _____

8. cabbage _____

9. apple _____

10. pepper _____

Grammatical Focus No. 3
Homonyms are words that sound alike but are spelled differently and have different meanings.

Exercise 3: Choose the correct word for the following sentences.

1. A (beet, beat) is a reddish vegetable that grows underground.
2. (Beets, beats) grow underground also.
3. The apple trees will (bare, bear) fruit this year.
4. I saw a (bear, bare) in the woods last week.
5. I will (buy, by) three dozen eggs from the farmer.
6. He drove (buy, by) the field with his tractor.
7. The weather was (fare, fair).
8. The bus (fair, fare) was 50¢.
9. Since the (son, sun) was shining, we decided to harvest the crops.
10. His oldest (son, sun) helps him at harvest time.
11. Our crops need lots of (rein, rain).
12. The horse's (rein, rain) was too tight.
13. (Weather, whether) is very important to the farmer.
14. He wasn't sure (whether, weather) or not the fields were dry enought to plant.
15. He wanted to (sew, sow) three fields by noon.
16. It is cheaper to (sew, sow) your own clothes.
17. The farmer is always up before the morning (dew, do) dries.
18. (Do, Dew) you really want to be a farmer?

Grammatical Focus No. 4
Verb tenses

1. Use grow when you are talking about the present--what is happening right now.
2. Use grew when you are talking about the past tense--something which has already taken place.

3. Use grown only with a helping verb--was, were, have, has, or had.

Exercise 4: Put the correct word--grow, grew, or grown in the following sentences.

1. Sun and rain help weed to _____.

2. We will have to plow tomorrow because the weeds have _____ so tall.
3. Some vegetables _____ very tall while others _____ only a few inches tall.
4. Last year we _____ as many as seven fields of corn.

5. We have _____ as many as seven fields of corn.

6. Our neighbors _____ an excellent crop of potatoes this year.

7. I like to _____ vegetables and fruits.

8. He _____ tomatoes better than he _____ beets.

Situation:

Visit an area farm. Find out the crops they produce. Inquire whether or not they employ farm laborers or hired hands. Find out whether the help would work primarily in the fields or would need knowledge of machinery or how to care for farm animals. Determine if you need previous experience and if the work is temporary or permanent.

Structures which may be helpful:

Do you employ...
Is experience necessary...
Do you have to know how to operate machinery...

Reading:

Farming is one of man's oldest and most important activities. Today farming has become very specialized. Farmers who deal with dairy cattle are called dairy farmers. They grow crops such as corn and oats to feed to their cows. They sell the milk to companies who supply our cities with dairy products such as milk, butter, cheese, and other dairy products. Dairy farmers might also raise chickens, pigs, and other small animals for additional income or for their own use.

Another type of farming is livestock farming. Here the farmer raises steers, and possibly other animals. He feeds them for a season and then sells them to a slaughter house company which provides the cities with meat.

Another familiar type of farming is truck farming. Here the farmer grows crops to sell, such as potatoes, and other fruits and vegetables. These crops are called cash crops. Truck farms often hire farm laborers during harvest time. Dairy farmers often hire one or two "hired hands" to help with the chores.

Farmers need to be in good health and to be able to use good judgment in planning work. Some mechanical ability is helpful. It is important to enjoy working outdoors in all kinds of weather, and to be will ing to work long hours seven days a week.

Farming offers work for the farm laborers, hired hands, farm managers, as well as owning one's own farm. Training is available through technical schools, but the best training available is actual work on a farm.

TITLE: VOCATIONAL ENGLISH: LEVEL II.

DESCRIPTOR: *CURRICULUM GUIDES; VOCATIONAL EDUCATION; *ENGLISH (SECOND LANGUAGE); *CAREER EDUCATION; OCCUPATIONAL INFORMATION

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 52P.; RELATED DOCUMENTS VT 103 227 THROUGH VT 103 229 IN THIS ISSUE.

ABSTRACT: THIS CURRICULUM GUIDE IS DESIGNED FOR USE IN CLASSES OF ENGLISH AS A SECOND LANGUAGE. IT PROVIDES STUDENTS WITH INFORMATION ABOUT VARIOUS OCCUPATIONS AS WELL AS THE OPPORTUNITY TO BECOME MORE PROFICIENT IN ENGLISH. THE GUIDE WAS DEVELOPED AS AN EFFORT TO INTRODUCE STUDENTS TO VOCATIONAL PROGRAMS IN WHICH THEY COULD BE SUCCESSFUL WITH VARYING DEGREES OF ENGLISH SKILL. IT IS ONE OF A SERIES OF THREE, WITH THE PROGRAMS WHICH REQUIRE THE LEAST SKILL IN ENGLISH INTRODUCED AT LEVEL I. THE LEVEL II GUIDE CONSISTS OF LESSONS ON AUTO MECHANICS, UPHOLSTERY AND AUTO TRIM, AUTO BODY, SMALL ENGINE REPAIR, BLUEPRINT READING, FOOD PREPARATION, GENERAL OFFICE, KEYPUNCH OPERATOR, AND WARD CLERK. EACH LESSON CONTAINS STUDENT OBJECTIVE, VOCABULARY LIST, DIALOGUE, AND GRAMMATICAL RULES AND EXERCISES. (NJ)

VOCATIONAL ENGLISH

Introduction

The materials in this series of lessons has been developed at Gateway Technical Institute for use in English as a Second Language classes under a special project funded by the State Board. Its objective is to provide the students with an overview of vocational diploma programs available in the institution so that as they become proficient in the use of English they are also increasing their knowledge of training opportunities available to them.

An effort has been made to introduce to different groups of students, programs in which they could be successful with varying degrees of English skill, with those programs requiring the least skill being introduced at Level I. In some instances, notably Health and Food Preparation, there are opportunities for a wide range of proficiency. These units were prepared on all three levels.

It is expected that teachers will supplement these units through discussion, films or film strips, related materials, resource speakers visits to the different labs, and industrial tours. In some instances, the work samples available through the Gateway Testing Center can be used as a "hands on" experience in the unit.

Within each unit is a structural English lesson ranging in Level I from verb usage, contractions, etc., to the use of adverbs and adjectives in Level III. Teachers will supplement the unit by using the vocabulary list for sentence writing and conversation practice.

VOCATIONAL ENGLISH

Level II

Auto Mechanics
Plurals, positive to negative

Upholstery & Auto Trim
Homophones, who/whom, incomplete sentences, double comparisons, verb usage

Auto Body
Homonyms, word usage, nouns

Small Engine Repairman
Plurals, positive & negative, sentences to questions

Blueprint Reading
Subject/predicate, pronouns, verb usage

Food Preparation
Future and past tense, contractions, prepositions

General Office
Plural, forming negatives, sentences to questions

Keypunch Operator
Plurals, sentences to questions

Ward Clerk
Negative contractions, verb contractions

Industrial Related

Because Gateway Technical Institute is in the center of a vast industrial area that is growing rapidly, specific programs are available for those who want to work in the manufacturing or production processes so abundantly available.

An awareness of good safety practices is needed in all types of industrial jobs for the protection of self and others. These concepts can be understood if presented early in ESL classes.

Many ESL students have a very limited knowledge of the variety of industrial jobs available and of the skills each requires.

The units should be supplemented with visits to the labs, observation of the classroom and industrial tours. Representatives of the Urban League, industrial teachers from Gateway, or persons from industry could be invited to visit the class and discuss the types of jobs and training opportunities.

Auto Mechanic: Basic skills in auto tune-up, brake adjustment, wheel balancing, lubrication, and general auto servicing.

The home and the automobile today reflect a freer, more affluent society, and home and car owners decorate as they wish. Period furniture, luxurious fabrics, and bright new interiors in our cars, all reflect the way we live. Craftsmanship is called for in fitting out the car and the home as well. The diploma program at Gateway Technical Institute, described below, supplies it:

Upholstery & Auto trim: Moving from the simple to the more complex task, the student learns how to handle tools, equipment, and supplies: spring tying, stuffing, ordering and cutting material; cushion construction, tufting, channel back; woodworking, repair and restyling of frames; finishing and refinishing wood surfaces. The upholsterer is employed in custom upholstery shops, furniture factories, auto manufacturing, auto and body trim shops and furniture shops.

Auto body: The process of shaping metal is a vital part of the way we live today, and Gateway Technical Institute offers three different career education choices in metal shaping. Graduates in all three areas are always in demand. Audo body offers all phases of repair to damaged cars, including metal straightening, smoothing, grinding, sanding, and fill-in. Concealment of flaws, painting, and replacements of body components and trim are stressed.

Small Engine Repair: Techniques and methods for repairing equipment such as lawn mowers, snow blowers, gasoline engines. Much "hands on" instruction in a lab setting.

Blueprint Reading: Skill development necessary for many industrial jobs.

AUTO MECHANICS

Student Objective: The student will be able to understand some of the duties and training necessary in becoming an auto mechanic.

Vocabulary:

customer	ingition	defective
tune-up	exhaust system	
service writer	department	
solenoid	spark plug	
warranty		

Dialogue:
Manuel and Juan: Manuel is the service writer and must write up all work orders. Juan is the mechanic and will be doing most of the repair work.

Manuel: Juan, on your way to work tomorrow, will you bring in the blue 1974 Ford that belongs to Carlos? I want you to recheck the ignition timing. The car's engine does not stop when you shut the ignition switch off.
Juan: Did he call you this morning?
Manuel: No. Yesterday is when he called. Why?
Juan: Well, last week while you were on vacation, we gave his engine a tune-up, and I told him that we would have to replace the idle solenoid because it is defective. We didn't have the part in stock, so we ordered it from the Chicago warehouse.
Manuel: When will the part come in?
Juan: I believe the parts department has the solenoid in stock now.
Manuel: Will you pick up the car tomorrow?
Juan: Yes.
Manuel: I will call Carlos and tell him that you will pick up the car and reassure him that the work will be done under warranty.
Juan: The car also needs exhaust system work and at least one wiper blade.
Manuel: I will tell him about those problems when I call.

Grammatical Focus No. 1

Exercise 1: Change the noun forms from singular to plural by adding s.
Example: (singular) Ford (plural) Fords

1. I want to recheck the car.
2. Will you pick up the automobile?

3. We will check the timing of the engine.
4. There will be no charge to the customer.
5. We will change the part under warranty.
6. Does Carlos want the spark plug replaced?
7. There is a problem with the tire on Carlos' car.
8. The car will need a quart of oil when we reset the idle speed.
9. The car needs the muffler replaced.
10. The owner will pay for the wiper blade.

1.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Grammatical Focus No. 2

Exercise 1: Adding the word not will change a sentence from positive to negative and the statement is related to the dialogue.
Example: (positive) I can get the car. (negative) I cannot get the car.

1. He did call this morning.
2. The car can be turned off.
3. The car does idle all right?
4. Manuel is the mechanic.
5. The work will be done today.
6. The car does run too slow.
7. The solenoid is all right.

8. The car is fixed in the shop.
9. Carlos is the service writer.
10. Juan has the parts.

1. He did not call this morning.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Grammatical Focus No. 3 Review Exercise
Changing the sentences to questions.
Example: (statement) The 1974 Ford is blue. (question) Is the 1974 Ford blue?

Exercise 3: These statements pertain to the dialogue.

1. Juan will bring in the blue Ford tomorrow.
2. The ignition timing is to be checked.
3. The car ignition will not turn off.
4. Carlos did call in today.
5. Manuel was on vacation last week.
6. The solenoid is defective.
7. The part was ordered from the warehouse.
8. The part is in stock now.
9. We will pick up the car tomorrow.
10. The work is to be done under warranty.

1. Will Juan bring in the blue Ford tomorrow?

2.

3.

4.

5.

6.

7.

8.

9.

10.

Situation:

A. Call an automobile dealer and tell them you are interested in becoming an auto mechanic.
B. Then visit and discuss with the dealer what training you would need and ask him questions about the education and experience you need for the three basic levels in a service garage.

Structures that may be useful in the conversation with the dealer:
What type of training is needed for...
How long is the training program?
Where may I obtain the training for...
What tools will I need to work as...
The job salary and benefits are...

Reading:

Before you decide on becoming a mechanic, ask several employed mechanics about how they like the work. Ask them about their training and how much they may expect to earn.

UPHOLSTERY AND AUTO TRIM

Student Objectives: The student will become familiar with some of the vocabulary and duties of an upholsterer.

Vocabulary:

upholstery	ply foam	re-tying	merry
springs	homophones	tack	
webbing	injuries	sew	
filling	association	refinish	
cushion stuffer	argument	suspect	
cotton	dragon	suffer	
sisal	lawn	upholster	
fabric	materials	tangle	
frame	contact	upholstery (work)	
power stapler	repair	measurement	
heat gun	fix	favorite	

Dialogue:
Alfredo contacts Cheo's Upholstery to have his wife's favorite chair repaired.

Cheo: Hey man! What's happening?
Alfredo: Well, I'm trying to get some help fixing my old lady's messed up chair.
Cheo: Let's see what the problem is. Yes, it does look as though it will need some upholstery work.
Alfredo: Dig it, but like I don't want to stick a lot of bread into this thing.
Cheo: OK, but you're going to have to have some body work done which will include re-tying these springs and applying new webbing. It will also need some more filling with this cushion stuffer, here. Then, I'll have to add some sisal and cotton to the arms and tack the fabric where it has come undone. The frame needs refinishing but you might want to do that yourself.
Alfredo: Yeh, and maybe I ought to do the whole job myself and save a bundle.
Cheo: That's up to you, although I think you'll need a power stapler, a heat gun, a cushion stuffer, and a few measurement items. You'll also need filling material, ply foam, and wood finishing materials.
Alfredo: Forget it man, I can't get that stuff together. All right, how much will it cost to get it fixed up?
Cheo: I'd say about ten to fifteen dollars if you can do the refinishing.

Alfredo: OK, I'll pay you, but this looks like something I could do with a little training.

Cheo: Right on! And you can get it at Voc. Tech., in their Upholstery and Auto Trim training program.

Grammatical Focus No. 1

Homophones: Homophones present spelling problems because they sound alike but have different meanings and different spellings.

Exercise 1: Select the correct spelling for the homophones used in the following sentences.

Example: (to, two, too) Manual was __too__ low on his bid __to__ refinish that chair for __two__ dollars.

1. Can Cheo fix the _____ and the seat on that wheelchair before he goes on _____. (break, brake)
2. That does not _____ the fact that the groom did not show up at the _____. (alter, altar)
3. Of _____ you'll have to use a fabric which is less _____. (coarse, course)
4. _____ no use to use the sisal for _____ filling. (its, it's)
5. The _____ in the pencil _____ the police to suspect the secretary. (led, lead)
6. One _____ suffered _____ injuries from the cave-in. (miner, minor)
7. _____ going to count _____ money over _____ by the telephone booth. (their, there, they're)
8. Juan _____ that information on the _____ president of the association. (past, passed)
9. It is _____ to see why the _____ never got off the ground.
10. There won't be a moment's _____ until they have a _____ of the action. (piece, peace)

Exercise 2: Make sentences using the homphones listed below.

Example: a) Your: That power stapler will go on your next bill.
b) You're: You're much too tired to operate the heat gun safely.

1. (who's, whose)

2. (made, maid)

3. (know, no)

4. (waist, waste)

5. (mail, male)

6. (blew, blue)

7. (hour, our)

8. (knot, not)

9. (sea, see)

10. (due, dew, do)

Exercise 3: Make another sentence using a homophone for the underlined word in each sentence.

Example: a) The <u>deer</u> got tangled in the webbing of the lawn chair.
b) That rocker is very <u>dear</u> to me.

1. There is a picture of a <u>knight</u> and a dragon on Pedro's cushion.

2. Don't you think they had a <u>merry</u> time?

3. He became very angry after he <u>read</u> the bill.

4. Your ply foam order will <u>be</u> in tomorrow.

5. If tacking it up will not work, I'll try to <u>sew</u> it.

6. Alfredo never had <u>won</u> an argument with before today.

7. Armando will need <u>four</u> more springs in that cushion.

8. Lana has not given us the right size staples for this stapler.

9. Did you see where Ramon drove the stakes into the ground?

10. Your aunt will be expecting her sofa upholstered by Tuesday.

Grammatical Focus No. 2
Who/whom
"Who" refers to the nominative case and applies to the subject of the verb.
"Whom" refers to the objective case and applies to the object of the verb.

Exercise 4: Place the correct usage (who or whom) in the blank for the following sentences.
Example: Since I did not know to whom the heat gun belonged, I did not use it.

1. No one has figured out to _____ Miguel had talked regarding the power stapler.
2. _____ was that former employee _____ was allergic to the sisal?
3. Jesus was one of the men _____ didn't think the chair could be refinished.
4. Many upholsters _____ are on strike would rather be working.
5. Everyone _____ is interested in enrolling in the Upholstery and Auto Trim course should see me now.
6. Cheo couldn't begin the stuffing until he knew _____ was going to pay for it.
7. The customer _____ will be here at noon should be charged for those two brown chairs.
8. Sell it to the first person _____ wants to buy it.
9. _____ did you say had borrowed the power stapler?
10. It was Rivera _____ had asked you for _____ you had recovered those cushions.

Grammatical Focus No. 3
Dangling modifiers
A phrase or clause which does not clearly and sensibly modify a word in the sentence is a dangling modifier.

Exercise 5: Indicate which of the following sentences are correct (+) and which have a dangling modifier (-).
Example: While tacking the fabric on the arm, one of the spindles dropped off the back. (-)

1. If you wish to learn upholstery, vocational school can give you the training. ( )

2. Hopelessly confused by the problem, Alfredo asked Cheo for some help. ( )
3. Since Maria had only two choices, the decision was much easier. ( )
4. To remove the paint quickly, varnish remover will work well. ( )
5. Failing to receive the fabric on time, our contract with the State was canceled. ( )
6. After having to re-do Jose's work for the third time this week, he was fired. ( )
7. When stuffing with sisal, a cushion stuffer cannot be used. ( )
8. Just after lunch break, I began to have problems. ( )
9. For being 14 years old, this fabric is in good shape. ( )
10. Trying to keep the colors matching, Cheo had to recover all the cushions. ( )

Grammatical Focus No. 4
Double comparison
A double comparison is one which the degree if formed incorrectly by both adding -er or -est and using more or most.

Exercise 6: When necessary, write the correct form of the incorrect modifiers, eliminating double comparisons. Do not change those sentences which are correct.
Example: Carlos' tacking is more straighter than mine. ~~more~~ straighter

1. This is the most loveliest fabric of the group. _____

2. The chair rocks more worse than before. _____

3. When he gets angry, him hammering becomes more loud. _____

4. Pablo is the more faster stapler of the two. _____

5. The customer was least disturbed by the charges. _____

6. We were not sure which of the two filling materials would be more better to use. _____

7. Franco makes more fewer mistakes than anyone. _____

8. Jose was most best at refinishing. _____

9. Which one of the three chairs is more heavy? _____

10. Repairing the tears is the most costlier of the work needed to be done.

_____

Grammatical Focus No. 7
Irregular Verb Usage

Exercise 1: Write the correct verb usage in the blank for the following sentences.
Example: write I had <u>written</u> up the charges before I knew who he was.

1. give Yesterday Cheo _____ me more work to do.

2. break The arm on the left side is _____.

3. begin The stuffing suddenly _____ to fall out.

4. go Had he _____ to lunch before you reached him?

5. shrink When I cleaned the fabric, it _____.

6. freeze The fact that the stuffing had _____ shouldn't have made any difference

7. do Have you _____ that type of sewing before?

8. buy Juanita _____ the stain for the frame the same day.

9. burst Just as I finished tacking this side, the other _____ open!

10. know Alfredo should have _____ it would take longer than that just to complete the upholstery work.

AUTO BODY

Student Objective: The student will be able to understand all phases of repair on damaged cars, including metal straightening, smoothing, grinding, sanding, and fill-in. Concealment of flaws, painting, and replacement of body parts and trim are stressed.

Vocabulary:

dent	metal	ding
chrome	component	braze
fender	belt line	iron
paint	abrasive	bump
ripples	burp gun	weld
equipment	finish	shrink
windlace	replace	
turret	trim	

Dialogue:

Potential employer: O.K. Jose, I'll give you a chance to show me what you know about auto body repair.
Jose: What would you like me to do?
Potential employer: I'll have my foreman assign you on a smashed deck lid.
Foreman: Jose, all auto body tools are located on the east wall and all mechanical tools are on the west wall.
Jose: Where is the car?
Foreman: Out in the lot and it's a 1972 red Chevy. I want you to remove and replace the deck lid and treat damages. Also, check for initial point of impact.

Grammatical Focus No. 1:
Exercise 1: Meanings of three words that all sound the same (homonyms)
to - toward (infinitive preceding a verb)
too - also
two - the number 2
Example: Are you going <u>to</u> the shop?
Yes, I would like you to go <u>too</u>.
Now there are <u>two</u> of us going.

Fill in the following sentences with the correct word from above.

1. There are _____ dents in the right fender.

2. Does it need a paint job _____?

3. Do you have _____ use a burp gun?

4. The ripples were ironed out _____.

5.-6. It's _____ expensive _____paint all of the car again.

7. This truck has _____ have new chrome.

8. The trim has _____ separate parts.

9. The windlace is part of the roof _____.

10. Hammers are used _____ pound out dents.

Exercise 2: These words can be used as nouns, verbs, and adjectives: paint, dent, trim, iron, bump
Use the word in the correct form and identify whether it is a noun, verb, or adjective.
Example: The ironed (iron) section was being painted. adjective

1. The _____(dent) was filled and sanded. _____

2. Ripples on the fender had been _____(iron). _____

3. _____ (paint) had spilled on the chrome. _____

4. Cars are commonly _____(bump) in the fender. _____

5. The fender was _____(dent) by the truck. _____

6. The _____ (paint) door was not the right shade. _____

7. Jose _____(iron) the ripples. _____

8. The _____ (trim) was covered before the car was painted. _____

9. He _____(dent) the door when he opened it. _____

10. The auto body repairman _____ (trim) the chrome. _____

Grammatical Focus #2:
Exercise 1: The following are parts of a car that may need repair if your career is in auto body. Place the correct name identifying that part of the car. grill roof bumper fender door windshield trunk hood wheel side panel

1.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Situation:

A. Call potential employers, Chevrolet-Cadillac Inc., Buick-Opel Co., Lincoln Mercury Inc., etc.

B. Note the agency's duty requirements.

C. Visit the agency's shop and take a tour of the facilities to see if you would like to work there.

Structures that may be useful in the situation:

Do I have to supply my own tools to become...
Is training required to become a ...
How long...
I would like to work...

Reading:

Auto body is a never-ending job. Its demand for good auto body men is good. Pay rates vary according to auto brand names. Visit the agency you are interested in and decide if you would like that kind of work. Find out if there is additional training provided by the company or on-the-job training. Finally, ask how much the job pays before you decide on a career as an auto body man.

SMALL ENGINE REPAIRMAN

Student Objective: As part of his training, the worker will be able to identify the proper part using the Tecumseh parts manual and state why it is important to have the engine type and serial number.

Vocabulary:

Tecumseh	piston
governor	air shroud
linkage	cylinder

Dialogue:
Between Calixto and Jose: Calixto is the trainee needing a governor spring for the Tecumseh engine he is repairing. Jose is the shop owner with many years of experience.

Calixto: Jose! I wonder is you could help me find the governor spring for the Tecumseh model LAV 30 which I am repairing.

Jose: Calixto, did you look the part up in the quick reference manual, or in the parts manual?

Calixto: No.

Jose: The Tecumseh carburetors use some unusual linkages and springs and it is important to have the correct one or the engine will not run smoothly when changing speeds.

Calixto: Well, I can say that from looking at the spark plug, the engine's governor spring has been missing for several weeks because the engine shows heat damage and excessive wear. Maybe, Jose, you should measure the cylinder and piston for wear.

Jose: That is a good idea. If the engine shows heat damage, we will need to look up the parts from the engine service manual by using the specific engine type number and then measure the parts for wear.

Calixto: Are not all the parts for a Tecumseh LAV 30 the same?

Jose: No. There are over 100 different carburetion and linkage spring combinations used on the LAV 30 and quite a few different head gaskets.

Calixto: Where is the type number stamped?

Jose: Usually on the air shroud.

Calixto: Are the internal engine parts all the same on a Tecumseh LAV 30?

Jose: No. On the ones used by Sears, the timing gears are different and so are some of the carburetors and valves. So we will have to look up the part by number before we can measure the part for wear.

Grammatical Focus No. 1

Exercise 1: Changing the singular to plural by adding an s to the underlined word. Example: (singular) engine (plural) engines

1. I want to find the correct governor spring.
2. We need the correct model number.
3. Did you check the cylinder for wear?
4. Did you check the head bolt?
5. We will need the Tecumseh service manual.
6. We will need to look up the part in the service manual.
7. Will you measure the piston for wear?
8. We need to replace the gasket.
9. Replace the gasket set on the carburetor.
10. Remove the spark plug.

1. I want to find the correct governor springs.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Grammatical Focus No. 2

Exercise 2: Change a positive statement to a negative statement by adding the word not to the sentence. Example: (positive) All of the Tecumseh LAV 30 use the same governor springs. (negative) Not all of the Tecumseh LAV 30 use the same governor springs.

Note: The statements are true, but when you change them to negative statements, they will become incorrect.

1. I can find the governor spring.
2. I can find the model number.
3. I did look in the quick reference manual for a part number.
4. We need to measure the cylinder for wear.
5. There is heat damage to the engine.
6. The number is stamped on the air shroud.
7. The governor assembly is complete.
8. Jose can help Calixto find the governor parts.
9. Calixto can find the part by himself.
10. The head gasket must be replaced.

1. I can<u>not</u> find the governor spring.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Grammatical Focus No. 3

Exercise 3: Change the sentence to a question.
Example: Statement: The Tecumseh engine is a good engine.
Question: Is the Tecumseh engine a good engine?

1. The engine needs repair.
2. The cylinder shows wear.
3. The governor spring is missing.
4. Look the part up in the manual.
5. The cylinder head is loose.
6. The linkages and springs are unusual on Tecumseh engines.
7. Calixto will measure the engine's cylinder for wear.
8. The Tecumseh LAV 30 parts are all the same.

9. The number is on the air shroud.
10. The Sears gaskets are all the same.

1. Does the engine need repair?

2.

3.

4.

5.

6.

7.

8.

9.

10.

Situation:

A. Check with any small engine shop owner and discuss with him what kind of problems are associated with small engine work.
B. Visit a shop and check with an employee about working conditions and what type of training is needed.

Structures that may be useful in the conversation with the employer or employee of a small engine service shop.

What type of training is required in...
How long does the training take...
What tools do I need to...
I would like to work as...
What advancements are there...

Reading:

There are limited kinds of jobs available in the area of small engine repair but there are thousands of industries which use small engines on their production equipment and these engines need periodic servicing and repair. If you check the newspaper you may find job openings with large firms in the area of maintenance or mechanical repair. There are several engine manufacturer schools as well as educational institutions that offer training and programs in the service and repair of small engines.

BLUEPRINT READING

Student Objective: The student will be able to understand the meaning and function of a blueprint. He will also gain some familiarity with the terminology used in blueprinting.

Vocabulary:

drawing	to measure
scale	to assemble
dimension	to construct
ruler	to build
print	to draw
layout	to read
lines	to show
elevations	exact
architect	accurate
draftsman	
measurement	
inch	
foot	
plan	

Dialogue:

Ellen: That is a very strange picture you are drawing.
Pedro: It's not really a picture. It's a blueprint.
Ellen: A blueprint?
Pedro: Yes. Blueprints show exactly how something is constructed.
Ellen: You mean like a house.
Pedro: A house, a machine, or a tool are all made from blueprints.
Ellen: I think I saw a carpenter use one of these.
Pedro: Many different people use blueprints. Without them it would be almost impossible to build buildings or assemble machines.
Ellen: Blueprints look very hard to make.
Pedro: They are not difficult once you have the training required to become a draftsman or architect.

Grammatical Focus No. 1
Subject/predicate
There are two basic parts in every sentence. They are called subjects and predicates. Subjects name the things we are talking about. Predicates tell what we have to say about them. If either the subject or the predicate is left out, then we do not have a sentence.

Example: The architect showed the blueprint to the carpenter.
subject: architect predicate: showed

Exercise 1: In the following sentences underline the subject once and the predicate twice.

1. The architect showed the blueprint to the carpenter.
2. The scale for the building was one inch for every ten feet.
3. The blueprint for the machine required 42 pages
4. The measurements for the new church were not accurate.
5. The engineer inspected the new bolts to see that they were the correct dimensions.
6. It took the draftsman 8 hours to finish drawing the blueprint.
7. When grease was spilled, the blueprint has to be redrawn.
8. Special measuring instruments are used to draw blueprints.
9. The blueprint elevation revealed the side of the house from top to bottom.
10. The thought of designing the new hospital excited the architect.

Grammatical Focus No. 2
Pronouns
The pronoun is a word that takes the place of a noun. Example: The workers assembled the machine. Workers and machine are nouns. Pronouns can be substituted for these nouns. Example: They assembled it. They is a pronoun which takes the place of workers and it is a pronoun that takes the place of machine.

Exercise 2: In the following sentences substitute the underlined nouns with pronouns. A list of pronouns are as follows: I, me, he, she, her, him, you, we, us, they, them.

1. Bill turned on the light above the drafting table.

2. The architect showed the blueprint to the carpenter.

3. The machine could not be assembled because the blueprints were missing.

4. The foreman could see the whole layout of the first floor by looking at the blueprint.

5. The new machinist had trouble reading the blueprint.

6. Fifty copies of the new blueprint were printed.

7. A scale model of the new bank was assembled by Jim.

8. Blueprints are also referred to as plans.

9. The light was turned on over the drafting tables.

Grammatical Focus No. 3
Verb tense: draw, drew, drawn

1. Use draw when you are talking about the present--what is happening right now.
2. Use drew when you are talking about the past tense--something which has already taken place.
3. Use drawn only with a helping verb such as was, were, has, had, or have.

Exercise 3: Put the correct word: draw, drew, drawn in the following sentences.

1. The draftsman _____ the blueprint.

2. I will _____ a layout.

3. The foreman asked if the blueprint was _____.

4. How can she _____ without her pens?

5. The building was _____ to the correct dimensions.

6. _____ up the plans by tomorrow!

7. Can Howard _____ as well as Julie?

8. He _____ the bushing to full scale.

9. I wish I could _____ blueprints like an architect.

10. He could not read the blueprint he had _____.

Situation:

Stop at a construction site and ask to see the blueprints. Explain that you are a student and would like to observe how a blueprint is used.

Visit a drafting class at a technical institute. Become familiar with the tools and instruments used by a draftsman.

Reading:

Blueprints play a very important role in constructing or assembling a building or machine. In fact, without them it would be almost impossible. A blueprint is like a map which shows the carpenter or machinist exactly what materials should be used and where to put them.

The draftsman or architect play a key role in society. We are all dependent upon their skill. They take an idea and are able to draw it exactly, each curve, line, and figure must be accurate to the inch or less.

Training is required to become a good draftsman or architect. It is a most challenging and rewarding profession.

Hospitality Programs

Food service jobs, part of the hospitality industry, are booming. Greater numbers of people are traveling and dining out. With increases in population, urban development, and more money available for trips and meals away from home, the spiral continues upward.

Individuals with limited skills in English are employable in the hospitality industry. Training in proper kitchen procedures, sanitation, and working with the public are available at various levels in the food service program at Gateway Technical Institute

This unit should be supplemented by visiting the food service labs on the Racine campus. Teachers in the program could be invited to talk to the class.

FOOD PREPARATION
Waitress or Waiter

Student Objectives: The student will become familiar with some of the duties of a waitress as well as the vocabulary and sentence structure needed for comprehension.

Vocabulary:

stack	continental	entree
clear	ala carte	gourmet
prepare	courteous	garnishes
order	efficient	sauces
replace	spotless	liqueur
reset	elaborate	cocktails
dine	prime	appetizers
substitute	choice	finger bowls
		banquet
		gratuities
		beverages
		relish tray
		goblets
		china
		chef

Dialogue:

Irma: Jose has lost his job. Now I must look for work to earn money.
Maria: Would you like to be a waitress?
Irma: I don't know. Is that a good job?
Maria: Yes, I think so. Waitresses can earn tips too.
Irma: Is there anything available where you work?
Maria: One of the girls there just got married and moved away.
Irma: Tomorrow morning I will apply for her job.
Maria: I will tell the manager that you are coming and that you are a good worker.

Grammatical Focus No. 1
Exercise 1: Change the following sentences to future time.
Examples: I go - I will go I take - I will take I see - I will see

1. I take a bath every morning.
2. I comb my hair neatly.
3. I walk to work.
4. I come to work on time.
5. I keep my work station clean.
6. I smile at the customers.

7. I give them menus.
8. I set the table.
9. I am courteous at all times
10. I take orders and give them to the chef.

1. I will take a bath every morning.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Exercise 2: Use contractions for the following:
Examples: do not - don't are not - aren't is not - isn't he is - he's
that is - that's

1. I will	1. _____	6. will not	6. _____
2. she is	2. _____	7. did not	7. _____
3. I am	3. _____	8. they are	8. _____
4. what is	4. _____	9. were not	9. _____
5. does not	5. _____	10. cannot	10. _____

Grammatical Focus No. 2
Exercise 1: Prepositions. Fill in the blanks with the correct preposition.
Use one of the following: in, on, to, from, by, at, for

1. She always eats _____ the restaurant.
2. Don't sit _____ that chair.
3. He explained everything _____ me.
4. Irma writes all the new words _____ her notebook.

5. They get us _____ eight o'clock in the morning.
6. I had only a sandwich ____ lunch.
7. He comes to work _____ bus.
8. She set the soup ____the table.
9. Do you take sugar _____ your coffee.
10. What would you like _____ dinner.
11. I took the dessert _____ the tray.
12. There is a message _____ you.

Exercise 2: Past tense. Give positive and negative answers to the questions.
Follow the example: Did you serve the food?
Yes, I served the food.
No, I didn't serve the food.

1. Did you wash your hands?

2. Did you wipe off the chairs?

3. Did you serve the appetizers first?

4. Did you bring the dessert?

5. Did you clear the table?

6. Did you replenish the water as needed?

7. Did you provide ice teaspoons?

8. Did you replace dropped items with clean ones?

9. Did you present the check face down?

Exercise 3: Opposites: up-down day-night big-small in-out
Give opposites for each of the following words.

1. hot
2. on
3. late
4. lose
5. often
6. heavy
7. high
8. thick
9. absent
10. sick
11. top
12. food
13. full
14. knife
15. arrive
16. useful
17. future
18. sharp
19. sweet
20. warm

Lesson theme:

Irma got a job as a waitress at the restaurant. Her friend, Maria, told her about the opening. Irma's duties include taking orders and bringing food to the customers. It is important for her to set the table correctly. Irma is popular and receives many tips.

Discussion questions:

1. What kind of job did Irma get?
2. Who told her about the opening?
3. What are Irm'as duties?
4. Is Irma popular?
5. What does Irma receive?

Situation:

A. Eat in a restaurant and judge the waitress' performance. Note her different duties.
B. Explain to a friend or relative why you think you would be a good waitress.
C. Practice being a waitress at home with your family or friends.

Strucures that may be useful in the situation:

She didn't...
She should have...
I'm going to...
Is it necessary to...
May I suggest...
Would you care to...
May I bring you...
Will there be anything else?

BEST COPY AVAILABLE

Reading

Before you decide to be a waitress, ask yourself these questions:

Do I like to work with people?
Is my appearance neat and clean?
Will I remember to be courteous at all times?
Can I follow instructions?

Good service is the same the world over. A good waitress is never out of work. She can use the knowledge of her profession as a career, as a part-time occupation, or at home. This knowledge, along with dependability, and honesty, will make her a valuable, successful, and trusted employee.

Suggested other job possibilities at Level 2:

short order cook
cook's helper
baker's helper
kitchen worker

Secretarial & Office

All data and accounting systems are involved with the keeping of records. The computer works with a score of other office machines to process data. Fast and capable, the computer handles vast amounts of information, and carries out complex orders. At Gateway Technical Institute, there is a study of computers in the Accounting program as well as in Data Processing.

Account Clerk: The student learns to perform the duties essential to record keeping in any business, through the practical application of basic bookkeeping and accounting skills.

Data Processing Machine Operator: The student learns to operate the equipment that feeds information into the computer, and equipment used to recover information from the computer.

GENERAL OFFICE

Student Objectives: The student will be able to understand and identify the functions, duties, and terms of a general office worker.

Vocabulary:

supervisor	invoice	pleasant
employer	telephone	courteous
office	filing cabinet	neat
receptionist	folder	numerical
calculator	employee	alphabetized
typewriter	mail	punctual
desk	envelope	accurate
bookkeeper	conference	willing
copy	delivery	
	address	

Dialogue:

Employer: Will you open the mail, please?
File clerk: Yes, sir. Would you like me to deliver it?
Employer: Then will you do the filing?
File clerk: I will put the letters in the proper file folders.
Employer: Will you file the invoices for the day?
File clerk: I already have them alphabetized.
Employer: Here are some figures to be added.
File clerk: May I use the calculator?

Grammatical Focus No. 1

Exercise 1: Change the nouns to plural form by adding s.
Example: singular-letter plural-letters

1. Open this letter.
2. This letter requires an answer.
3. Will you file this invoice.
4. She used a paper clip.
5. The supervisor is in a conference.
6. Here is an envelope.
7. There is one desk in the office.

8. Type the letter neatly.
9. Please copy this notice for the bulletin board.
10. The visitor can wait in this office.

1. Open all the _____.

2. All these letters require _____.

3. Will you file these _____.

4. She used all the paper _____.

5. All the supervisors are in _____.

6. Here are two _____

7. There are six _____ in the office.

8. Type all the _____ neatly.

9. Please copy these _____ for the bulletin board.

10. Both _____ can wait in this office.

Grammatical Focus No. 2

Exercise 2: Change the following sentences to negative form by adding the word not in the correct place.

Example: Please file these. Please do not file these.

1. The supervisor is in the office.
2. The file drawer is open.
3. Your desk is very neat.
4. The telephone is ringing.
5. On this job I have many duties.
6. The employee is late.
7. This invoice has been paid.
8. Today you can use the calculator and the typewriter.
9. The receptionist is answering the telephone.
10. There are many letters to be answered.

1.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Grammatical Focus No. 3

Exercise 3: Change the following sentences to questions.
Example: Your filing should be done accurately.
Should your filing be done accurately?

1. The supervisor is in the office.
2. You should greet visitors pleasantly.
3. The mail is ready to be sorted.
4. The conference will begin today.
5. The address on this envelope is correct.
6. We need more supplies.
7. The letter is not in the file.
8. The typewriter needs cleaning.
9. The stapler is empty.
10. The invoices are up-to-date.

1. Is the supervisor in the office?

2.

3.

4.

5.

Review:

1. If an office worker opens the in-coming, she opens the _____.
   (a) mail (b) calculator (c) stapler

2. A receptionist should answer a telephone pleasantly and promptly.
   True or false? _____

3. It is important to _____ papers in the proper place so they do not get lost. (a) hold (b) file (c) place aside

4. To total figures, use a _____.
   (a) calculator (b) telephone (c) typewriter (d) invoice

5. Place the following in the proper alphabetical order for filing:
   Wrapping Machinery Co. _____
   General Motors _____
   Ford Motor Company _____
   American Motors _____
   S.C. Johnson & Son, Inc. _____

6. It is important to keep filing accurate and up-to-date.
   True or false? _____

7. _____ is most important to your personal appearance.
   (a) a new dress (b) employee (c) neatness (d) fingernail polish

8. Essential office supplies include (check 3)

   ___ paper clips ___ coffee cup
   ___ clock ___ stapler
   ___ eraser ___ handkerchief

9. It is easier to work if your _____ is orderly and neat.
   (Pick work from vocabulary)

10. A _____ is someone who greets callers and salesmen.
    (a) bookkeeper (b) receptionist (c) file clerk

6.

7.

8.

9.

10.

Situation:

A. Visit some community service offices, such as the Urban League, Spanish Center, CAP, etc., and ask what the duties of a clerk are.
B. Visit a small company and the employment office of a large industry to find out what the duties of a clerk would be expected to be done.
C. Visit the State Employment Office to see office workers on the job.
D. Tour any companies in your vicinity where tours are offered.

Structure that may be useful in the situation:

What skills are necessary to handle the job?
Is any experience necessary...
How to improve the job skills you have...
Where to improve the skills you have...
Visit office equipment stores to see new types of equipment available.

Reading:

There are many different duties in some general office jobs while others may require doing a few things over and over. Talk to people you know who work in offices and ask about their duties. Practice skills you have and keep improving because there may be chances to be promoted from general office work to other interesting jobs in the same office which have a higher salary. Read the want ads of your local newspaper every day to see what the requirements are for different companies and situations.

OFFICE

Our increase in business has created an immediate opening for experienced general office assistant for all around duties including receptionist, telephone, good typing, basic record keeping and others.

Salary commensurate with ability, excellent working conditions and all fringe benefits.

Apply in person 8-4 daily.

AIDE INC.

KEYPUNCH OPERATOR

Student Objective: The student will be able to understand the Operators' requirements and the function of the Keypunch machine.

Vocabulary:

keypunch	card stacker
card	card hopper
program card	print
alphabetic punch	column
numeric punch	automatic
data processing	manual
machine accounting	operator
keyboard	computer
verifier	

Dialogue:

Supervisor:	Can you keypunch these payroll cards?
Keypunch Operator:	What would you like punched in them?
Supervisor:	Punch the clock number, the data and the hours they worked in the columns shown.
Keypunch Operator:	What color cards do you want them punched in?
Supervisor:	Punch them on white cards, we use the blue cards for vacation pay and the yellow cards for deductions

Grammatical Focus No. 1
Changing singular nouns to plural nouns.

Example: (singular) card (plural) cards

Exercise 1: Change the nouns to plural form by adding s or es. (Add <u>es</u> to words ending in <u>x</u>, <u>ch</u>, <u>sh</u>, <u>s</u>, or <u>z</u>.)

1. Do not bend the <u>card</u>.
2. A program card is used to control the <u>keypunch</u>.
3. Which <u>column</u> should be punched?
4. The <u>operator</u> should work where there is good lighting.
5. She punched the <u>number</u> wrong.
6. Do not leave the work on top of the <u>table</u>.
7. Store the <u>program card</u> away carefully.

8. Keep the keyboard clean.
9. The cards will be run through the computer.
10. Information will be punched from the invoice.

1. Do not bend the cards.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Grammatical Focus No. 2
Changing sentences to questions.

Example: There are 80 column in this card.
Are there 80 columns in this card?

Exercise 1: Change sentences to questions.

1. The keypunch machine is used for punching holes in cards.
2. The program card tells the keypunch machine what you want it to do.
3. The program card is wrapped around the drum.
4. Blank cards are put into the card hopper.
5. The cards can be fed into the machine one at a time.
6. Both alphabetic and numeric information can be punched on the same card.
7. The punched cards will be used in machine accounting.
8. Some examples of punched card accounting are telephone bills, gas & electric bills and government checks.
9. Different colored cards are sometimes used for different jobs.
10. When a card is punched incorrectly there is no way to correct it on that card.

1. Is the keypunch machine used for punching holes in cards?

2.

3.

4.

5.

6.

7.

8.

9.

10.

Situation:

A. Call the employment office of any firm that has a Data Processing Dept. and tell them you are interested in becoming a keypunch operator. Ask what training you need for the job.
B. Visit the employment office and ask them what qualifications are required of their keypunch operators.
C. Visit an office and ask for a tour of their Data Processing facilities to see if you would like to work there.

Structures that may be useful in the situation:

Is training required to become a...
How much...
How good of a typist do I have to be...
How important is speed...

This is what a blank card looks like.

This is what a punched program card might look like. Different codes are punched in for different jobs.

Here are the combination of punches required to give you a letter. By merely typing the letter, you will get the combination of holes.

The letters *A* through *I* combine a punch in the 12 zone with one of the digits 1 through 9. The next nine letters—*J* through *R*—use the 11 zone. The letters *S* through *Z* combine a digit (2 through 9) with the 0 zone.

Here are the punches for each letter:

	A	B	C	D	E	F	G	H	I
ZONE	12	12	12	12	12	12	12	12	12
DIGIT	1	2	3	4	5	6	7	8	9

	J	K	L	M	N	O	P	Q	R
ZONE	11	11	11	11	11	11	11	11	11
DIGIT	1	2	3	4	5	6	7	8	9

		S	T	U	V	W	X	Y	Z
ZONE		0	0	0	0	0	0	0	0
DIGIT		2	3	4	5	6	7	8	9

Reading:

The keypunch machine, which has a keyboard similar to that of a typewriter, is used to put data, or information, onto cards in the form of punched holes. These cards are later fed into a computer to perform automatically the various operations essential to record keeping.

The machine is easy to operate. Automatic duplicating and skipping are obtained by setting up a program card. A card is punched and mounted on a program drum, which is inserted in the machine. Blank cards are put into the card hopper and can be fed manually or automatically into the machine to be punched.

There are 80 columns in a card. Each column has 12 punching positions: one each for digits 1 to 9, and one each for the zones 0, 11, and 12. The 11-zone punch is sometimes referred to as X. The digits are recorded by punching a single hole in the corresponding digit or zero position of the desired column.

A letter is a combination of one zone punch and one digit punch in the desired column. A special character is one, two, or three holes in the desired column.

When a card is through being punched, it passes through the punch station and is fed into the card stacker.

Health Programs

The allied health programs all earn a diploma at Gateway and are oriented toward assistance in patient care in the dental or medical office or laboratory, in the operating theater, or on the hospital ward.

The nursing assistant is a six-week diploma program for the person who is stable, healthy, able to adjust and work under supervision to perform a variety of routine tasks.

The students could visit the nursing labs and tour the hospital. Nursing faculty can be used as resource speakers.

HEALTH CAREERS
WARD CLERK

Job Description: Ward clerks prepare records on patients in hospitals and nursing homes, transcribe doctors' orders, answer telephones, relay messages, and record information regarding patients' medical progress.

Student Objectives: The student will be familiar with the terminology required to carry on the duties of a ward clerk.

Vocabulary:

records	clerical
charts	sympathetic
temperature	medical
physician	surgical
receptionist	clinical
surgery	
pulse	transcribe
medication	require
requisition	
diet	
obstetrics	
pediatrics	

Dialogue:

Mrs. Lewis: We have a new patient in Room 303.
Maria: Would you like me to fill out her information sheet?
Mrs. Lewis: Yes. I am busy passing out medications.
Maria: Who is her doctor?
Mrs. Lewis: Dr. Jones. He'll see her in the morning.
Maria: I'll have the chart ready for him when he comes in.
Mrs. Lewis: Thank you, Maria.

Grammatical Focus No. 1
Many negative verb forms can be shortened to contractions. Most are changed by taking out the o in not and replacing it with an apostrophe. A few exceptions change spelling: example: will not - won't

Example: cannot - can't do not - don't

Exercise 1: Change the following verbs and negatives to contractions.

1. The patient does not want surgery.
2. A ward clerk cannot do clinical work.
3. The patient must not go off her diet.
4. The doctor will not give her any medication.
5. Podiatrics should not care for adults.
6. The nurse is not sympathetic.
7. We could not take his temperature.
8. The records have not arrive.
9. A doctor would not do clerical work.
10. Do not disturb the patient.

1.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Grammatical Focus No. 2
The form of it's always means it is, or it has. It's is a contraction of it is, or it has, and always used an apostrophe.
Example: It is going to rain. It's going to rain.
It has rained all day. It's rained all day.

Exercise 2: In the following sentences, change it is, and it has, to it's.

1. It is a good job.
2. It has advanced in pay.
3. Do you think it is difficult work?
4. It is very hard work.
5. It is too hard for me.
6. It has become more detailed.
7. It is an interesting occupation.
8. It is rewarding to help people.

9. It is necessary to be in good health.
10. It has been fun working with children in pediatrics.

1.

2.

3.

9.

10.

Situation:

A. Visit a school that teaches the course for Ward Clerk. Talk to a counselor about the subjects required to receive a diploma.
B. Visit a hospital employment office. Talk to the Employment Counselor about the duties required of a Ward Clerk.

Structures that may be useful in the situation:
I would like...
Could you tell me...
It's a job I...
I don't know...
Would I work with...
Would I need...
I think I would like...

Reading:

Do you like to work with people? Before you decide on a career as a ward clerk, ask yourself if you like working with people. You will be spending a lot of time talking with patients, getting information from them for their hospital records, talking with doctors and nurses. You might be working in pediatrics with children, or in obstetrics with new mothers. A ward clerk should be able to get along with all kinds of people in many

different situations. People who are ill are not often easy to get along with, and you must have a lot of patience and understanding.

TITLE: VOCATIONAL ENGLISH: LEVEL III.

DESCRIPTOR: *CURRICULUM GUIDES; *VOCATIONAL EDUCATION; *ENGLISH (SECOND LANGUAGE); *CAREER EDUCATION; OCCUPATIONAL INFORMATION

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 40P.; RELATED DOCUMENTS VT 103 227 THROUGH VT 103 229 IN THIS ISSUE.

ABSTRACT: THIS CURRICULUM GUIDE IS DESIGNED FOR USE IN CLASSES OF ENGLISH AS A SECOND LANGUAGE. IT PROVIDES STUDENTS WITH INFORMATION ABOUT VARIOUS OCCUPATIONS AS WELL AS THE OPPORTUNITY TO BECOME MORE PROFICIENT IN ENGLISH. THE GUIDE WAS DEVELOPED AS AN EFFORT TO INTRODUCE STUDENTS TO VOCATIONAL PROGRAMS IN WHICH THEY COULD BE SUCCESSFUL WITH VARYING DEGREES OF ENGLISH SKILL. IT IS ONE OF A SERIES OF THREE, WITH THE PROGRAMS WHICH REQUIRE THE LEAST SKILL IN ENGLISH INTRODUCED AT LEVEL I. THE LEVEL III GUIDE CONSISTS OF LESSONS IN MECHANICAL DRAFTING, ELECTRONIC SERVICING, CLERK TYPIST, ACCOUNT CLERK, DATA PROCESSING, PRACTICAL NURSING, AND FOOD PREPARATION. EACH LESSON CONTAINS A STUDENT OBJECTIVE, VOCABULARY LIST, DIALOGUE, AND GRAMMATICAL RULES AND EXERCISES. (NJ)

VOCATIONAL ENGLISH

Introduction

The materials in this series of lessons has been developed at Gateway Technical Institute for use in English as a Second Language classes under a special project funded by the State Board. Its objective is to provide the students with an overview of vocational diploma programs available in the institution so that as they become proficient in the use of English they are also increasing their knowledge of training opportunities available to them.

An effort has been made to introduce to different groups of students, programs in which they could be successful with varying degrees of English skill, with those programs requiring the least skill being introduced at Level I. In some instances, notably Health and Food Preparation, there are opportunities for a wide range of proficiency. These units were prepared on all three levels.

It is expected that teachers will supplement these units through discussion, films or film strips, related materials, resource speakers visits to the different labs, and industrial tours. In some instances, the work samples available through the Gateway Testing Center can be used as a "hands on" experience in the unit.

Within each unit is a structural English lesson ranging in Level I from verb usage, contractions, etc., to the use of adverbs and adjectives in Level III. Teachers will supplement the unit by using the vocabulary list for sentence writing and conversation practice.

Within each unit is a structural English lesson ranging in Level I from verb usage, contractions, etc., to the use of adverbs and adjectives in Level III. Teachers will supplement the unit by using the vocabulary list for sentence writing and conversation practice.

VOCATIONAL ENGLISH

Level III

Mechanical Drafting
Singular & plural nouns, positive to negative, sentences to questions

Electronic Servicing
"Can" and "may", adjectives and adverbs, verb usage

Clerk Typist
Punctuation

Account Clerk
Verb usage

Data Processing
Synonyms, root words

Practical Nursing
Past tense, negative contractions

Food Preparation
Vocabulary, statements to questions, pronunciation, verb usage

Industrial Related

Because Gateway Technical Institute is in the center of a vast industrial area that is growing rapidly, specific programs are available for those who want to work in the manufacturing or production processes so abundantly available.

An awareness of good safety practices is needed in all types of industrial jobs for the protection of self and others. These concepts can be understood if presented early in ESL classes.

Many ESL students have a very limited knowledge of the variety of industrial jobs available and of the skills each requires. The four included at Level I, Welding, Maintenance, General Factory, and Machine Operation, have both training and employment opportunities for those with limited ability in English.

The units should be supplemented with visits to the labs, observation of the classroom and industrial tours. Representatives of the Urban League, industrial teachers from Gateway, or persons from industry could be invited to visit the class and discuss the types of jobs and training opportunities.

MECHANICAL DRAFTING

Student Objective: The student will be able to understand and identify the functions and duties of a mechanical draftsman.

Vocabulary:

detailer	design engineering department	sales engineer
draftsman	instrument	specifications
designer	blueprint	tracing
checker	product engineer	preliminary drawing
dimension line	project engineer	

Dialogue:

Sales Engineer:	I have a preliminary drawing and specifications of a machine to be designed.
Product Engineer:	Fine. I will look at your drawing and specifications and assign them to a project engineer.
Product Engineer:	I have a new project for you to start work on right away.
Project Engineer:	We will begin work on the new project right away.
Project Engineer:	We must begin work on this project immediately and each of you (draftsman, designer, detailer) will be involved in working on this project.
Designer:	I will draw the whole machine complete with all its parts.
Draftsman:	Then I will draw the mechanisms of the machine which, when put together, will make up the whole machine.
Detailer:	I will then draw detail drawings of the many individual parts so the draftsman can assemble them together to make his mechanisms.

Grammatical Focus #1
Changing singular nouns to plural nouns.
Example: Singular - blueprint; plural - blueprints

Exercise 1: Change the nouns to plural form by adding s, and drop the preceding "a" if necessary.

1. We will make a <u>blueprint</u>.
1.
2. Sales engineers will make a preliminary <u>drawing</u>.
2.
3. A checker checks the <u>drawing</u> made by the <u>draftsman</u>.
3.

4. The project incorporates the specification.
4.
5. A designer will draw the part.
5.
6. The detailer will make a detailed drawing of a machine part.
6.
7. A detailer and designer use a drafting instrument.
7.
8. A machine will be represented by a drawing of all the parts.
8.
9. A dimension line (is/are) drawn on the tracing paper.

10. An erasure should be made on the drawing.
10.

Grammatical Focus #2
Adding the word not to change a sentence from positive to negative.
Example: I can help. I cannot help
Exercise 2 . Change the following sentences to negative form by adding the word not.

1. There is a shading on the drawing.
1.
2. All dimensions are done freehand.
2.
3. Some lines on the drawing are heavier than others.
3.
4. The checker looks over all the drawings of the project.
4.
5. Blueprints are sent to other people.
5.
6. The detailer sits at the drafting board when drawing detailed parts.
6.
7. The designer must always be neat and orderly about his drawing work.
7.
8. Drawings are always made complete as possible.
8.
9. The detailer always uses a pencil when drawing.
9.
10. The checker checks a set of blueprints of the drawing project.
10.

BEST COPY AVAILABLE

Grammatical Focus #3
Changing sentences to questions.
Example: The project engineer oversees the project. Does the project engineer oversee the project?

Exercise 3: Change the following sentences to questions.

1. The draftsman uses a pen when inking.
1.
2. The designer helps the draftsman and detailer.
2.
3. Mistakes should be held to a minimum on a drawing.
3.
4. The sales engineer discusses his work with the customer.
4.
5. The product engineer checks the project of the project engineer.
5.
6. Much time is required to complete a project.
6.
7. Preliminary drawings are made by the sales engineer.
7.
8. The drafting personnel draw on tracing paper.
8.
9. Mathematics are a part of mechanical drafting.
9.
10. The draftsman has his own set of drawing tools and instruments.
10.

Matching Statements
Directions: Place the correct letter to the left of the numbered column.

_____1. Detailer	a. checks the drawing for errors
_____2. Checker	b. makes preliminary drawing to meet customer's needs
_____3. Designer	c. makes small detail drawings
_____4. Draftsman	d. assigns projects to project engineer
_____5. Sales Engineer	e. draws machine mechanisms
_____6. Product Engineer	f. draws whole machine parts
_____7. Project Engineer	g. oversees the whole project

Situation:

A. Make an appointment for an interview for a detailer or draftsman's job in the design engineering department.

B. Visit an engineering deparment and ask what is required in job entry skills and knowledge.

C. Visit with draftsmen and engineers to find out if you would like their kind of work.

Structures that may be useful in the situation:

What training is required to become a....
How long....
What part of the country must I live in to be a ....
What related occupations could I enter with training in....
What physical requirements must I have to be a....
How good must I be in math to be a....

Reading:

There are many different kinds of drafting jobs available depending upon the type of industry. There are also many related occupations if one chooses not to become a draftsman. Visits to different types of industry should be made. Thought should be given to where most drafting jobs are, pay, work hours, and how one may progress on the job.

ELECTRONICS SERVICING

Student Objective: The student will become familiar with some of the terms and duties required in electronic servicing.

Vocabulary:

amperage	graphite	analyzing
antenna	impedance	grounding
blueprint reading	lineation	rectify
characteristics	oscilloscope	servicing
chassis	receivers	soldered
circuit continuity	resistance	traced
current	schematic	troubleshooting
density	signal generator	itemized
diagram	specifications	defective
electronic servicing	technical manual	audio
focus	transformer	video
fuses	tubes	intact
voltmeter	voltage	frustrated

Dialogue:
Romero picks up his repaired TV set and discusses his bill.

Romero: Hey, man! You can't be serious charging me $32.34 to fix my busted TV.

Julio: Well, I'm afraid the service charges are correct; but, as you can see, the bill is itemized.

Romero: Yeh, but this stuff doesn't mean anything to me. I think you're ripping me off!

Julio: O.K. Let me explain each item. First, I checked all the tubes and found three which were defective. The replacement costs were $7.35 and that's listed under "parts." The "labor" charge was for the 2-1/2 hours I spent "troubleshooting" and checking out circuit continuity. In analyzing the wiring diagram with the voltmeter, I found that everything was intact. However, in running a video test on the oscilloscope, I did find that some adjustments were needed for proper density, lineation, and focus.

Romero: Wow! This still sounds Greek to me. You mean I could have replaced those three tubes and made the adjustments to fix the thing myself?

Julio: No, because for one thing you don't have the necessary equipment and for another, it was another test which indicated the reason for the picture rolling. Using a signal generator, I traced a loose

wire which was grounding on the chassis. Then I just soldered it back into place and that seemed to rectify things.

Romero: O.K. Here's your bread, but it sure sounds like you've got a good job. I'll bet you need a college degree.

Julio: No you don't. You're talking about a technical skill which can be learned at Voc. Tech.

Romero: Dynamite! What's the name of the course?

Julio: My training was in the "Electronic Servicing" program, but I did take some tutoring in Blueprint Reading at one of the Adult Learning Centers and that made it much easier when I signed up for school.

Romero: O.K. I'm going to contact a counselor and get trucking!

Grammatical Focus No. 1

For proper usage of "can" and "may": "Can" refers to ability. "May" refers to possibility (usually based upon permission or probability).

Exercise 1: Give the correct usage in the blank.

1. _____ I please have the specifications for the oscilloscope?
2. _____ you hand me the schematic diagram?
3. I know that I _____ check the lineation first.
4. If there is no more to do, _____ I go home?
5. You _____ use the soldering iron only if you work safely.
6. I double that the antenna _____ operate without a transformer.
7. The specifications call for wiring material which we _____ not have.
8. If you _____ read the manual, the job is much more simple.
9. I _____ have to take your set into our service center.
10. You have three defective tubes which _____ be replaced for $7.35.

Grammatical Focus No. 2

Proper use of adjectives and adverbs

a. good and well
b. real and really
c. bad and badly
d. most and almost

a. Good is always used as an adjective.
Well may be an adjective or an adverb.

b. Real is used as an adjective.
Really is used as an adverb.

c. Bad is used as an adjective.
Badly is used as an adverb.

d. Most is used in referring to degree.
Almost is used in referring to proximity (nearness).

Exercise 1: Underline the correct usage in the following sentences:
Example: You performed good/well on the exam.

1. The customer behaved bad/badly when he saw the service charge.
2. I think that electronic servicing is good/well to learn.
3. Julio was real/really relieved to find the trouble.
4. Most/almost everyone thinks TV parts prices are too high.
5. The set performed good/well when it was in the service center.
6. The voltmeter test looked bad/badly compared to the others.
7. It takes a real/really small amount of electricity to rotate an antenna.
8. Repairs can be done in the customer's home in almost/most of the cases.
9. It's always good/well to consider safety first.
10. The signal generator was worn too bad/badly to operate well.

Exercise 2: Adjectives and adverbs. Indicate if the underlined word is an adjective or an adverb.
Example: If you know how to read blueprints the rest is simple. adverb

1. The waves on the oscilloscope became narrow when the audio was increased. _____
2. Which of these schematic diagrams will work best? _____
3. This wiring diagram is difficult to read. _____
4. Weak video tubes will produce a picture which is too dim. _____
5. The wire shorted deep in the chassis floor. _____
6. Romero appeared frustrated by the audio breakdown. _____
7. A successful career depends upon keeping abreast of technological advances. _____
8. The specifications are completely detailed in the manual. _____
9. It's hard to believe that the charges were so high! _____
10. An important skill to learn is blueprint reading. _____

Grammatical Focus No. 3

Verb usage.

Exercise 1: Singular and plural verb forms: underline the correct verb usage. Example: Even a good serviceman take/takes his time.

1. The oscilloscope show/shows the problem.
2. Maria and Julio want/wants their TV repaired.

3. A good service center make/makes a difference.
4. Your antenna increase/increases the picture quality.
5. Defective parts produce/produces a safety hazard.
6. Audio and video characteristics is/are first tested.
7. Density, lineation anf focus was/were adjusted.
8. Both technical manuals give/gives the same information.
9. Electronic servicing is/was a career you might consider.
10. Neither you nor Isidro can/may find the trouble.

Exercise 2: Past and past-participle: Underline the incorrect verb form in each of the following sentences and then write the correct form in the space provided.
Example: Did you see what the oscilloscope shown? showed

1. When no defective tubes were located, Teodoro begus to be puzzled. _____
2. Have you bring your signal generator to class? _____
3. The serviceman checked for a broke circuit. _____
4. Isidro analyze his bill carefully. _____
5. Where are my solder iron? _____
6. If it were not for these fuses your main tube would have blew. _____
7. Amperage refer to electrical resistance. _____
8. They had not understanded the charges on their bill. _____
9. A car and a valid driver's license is require in this job. _____

Exercise 3: Irregular Verbs: Select the appropriate verb form in the following sentences.

1. The lines on the oscilloscope swung/swang widely.
2. The prices on parts replacement have not fallen/fell.
3. Isidro has not spoke/spoken to Teodoro about the bill.
4. That clip sprang/sprung out when the nut was removed.
5. Those lines appear to be froze/frozen on the oscilloscope.
6. We saw/seen what kind of wages a serviceman earns.
7. They never have threw/thrown away a defective part without the customer's approval.
8. Both trainees have ran/run a check on the continuity of the circuit.
9. The signal grew/growed stronger when impedance was reduced.
10. The current has flown/flowed better with the new wiring.

Secretarial & Office

All data and accounting systems are involved with the keeping of records. The computer works with a score of other office machines to process data. Fast and capable, the computer handles vast amounts of information, and carries out complex orders. At Gateway Technical Institute, there is a study of computers in the Accounting program as well as in Data Processing.

Account Clerk: The student learns to perform the duties essential to record keeping in any business, through the practical application of basic bookkeeping and accounting skills.

Data Processing Machine Operator: The student learns to operate the equipment that feeds information into the computer, and equipment used to recover information from the computer.

CLERK TYPIST

Student Objective: The student will be able to identify the functions and duties of clerk typists and become familiar with the terms used on the job.

Vocabulary:

typewriter	to transcribe
dictaphone	to proofread
stencil	to compute
carbon copy	to file
notation	to distribute
correspondence	to compile
memorandum	to post
shorthand	to sort
receptionist	to dictate
documents	

Dialogue:

Office Manager: (Gustavo) Have you finished compiling and typing the report I gave you this morning?

Clerk Typist: (Magdelena) Yes, I was just about to ask you to sign it so I could mail it.

Gustavo: Did you make a carbon copy for our files? I might have to do some follow-up work on the report.

Magdelena: Yes, I made a carbon copy and filed it with the other reports. I did want to check to be sure the address of this firm was correct.

Gustavo: Yes, it is correct. Please make a notation of the address for future reference. Please address the envelope and mail it today. Have you sorted all the mail yet?

Magdelena: Yes, here is your mail.

Gustavo: I will have a couple more reports and some information for you to post this afternoon.

Magdelena: Yes, sir. Your next appointment is for 11:15.

Gustavo: Thank you.

Grammatical Focus No. 1
To use correct punctuation marks in sentences.

Examples:

1. I typed the letter. (The period (.) is used after a statement.)
2. Did you type the letter yesterday? (A question mark (?) is used after a question is asked.)
3. What a beautiful day! (An exclamation mark (!) is used after a sentence which expresses strong emotion.)

Exercise 1: Put the correct punctuation mark at the end of the following sentence

1. Sign your name on the last line of the letter__

2. Did you answer the telephone__

3. Did you fill out an application form__

4. I mailed three tickets to the office yesterday__

5. This is a great job__

6. She is always on time for her job__

7. Do you like to operate the telephone switchboard__

8. I made a notation on line 14__

9. Did you proofread the letter before you mailed it__

10. I didn't know how to spell memorandum, so I looked it up in the dictionary__

Grammatical Focus No. 2
The clerk typist also needs to know some additional punctuation marks. These are the comma, apostrophe, and quotation marks.

Examples:

1. Comma (,) There are many uses for the comma. We will work here with placing commas in the correct position when writing dates. Place a comma between the day of the month and the year. If no day is given, place a comma between the month and the year. Place a comma between the name of the day of the week and the month of the year.

January 1, 1967
January, 1967
Sunday, January 1, 1967

2. An apostrophe (') is used in making a contraction or in showing ownership.
   can't don't doesn't Mary's typewriter Joe's job Bob's desk

3. Quotation marks (" ") are used when the clerk typist wishes to type a direct quote (type the exact words that someone said). Quotation marks show that it is a direct quote.

   The president of the firm said, "Our business has shown a marked increase in profit in the last six months."

   "Mary, did you finish filing all the reports?" asked Louise.

Exercise 2: Put all the needed punctuation marks in the following sentences. Watch for needed marks within and at the end of the sentences.

1. I cant be present at the meeting on Saturday April 30 1976

2. Sue, please file this report, said Mr. Brown

3. The receptionists notebook was lost

4. Dont you know how to operate the dictaphone

5. Did you proofread the Monday April 5th report

6. What important meeting begins on Wednesday May 10 1976

7. The receptionists handwriting was very legible

8. Mrs Gomezs secretary has been very helpful

9. I cant leave for lunch until I finish compiling this information

10. Jan said I enjoy the work very much, Mr. Harris

Situation:

Contact the State Employment Service or other employment agencies in your area. Ask for a listing of clerk typists' positions in your area. Explain your present employment, your previous training, your skills, and your goals. Ask them for recommendations and training programs available to increase your skills. You will need to have a detailed account of your work experience and your education. If training pro-

BEST COPY AVAILABLE

grams are available, find out if you qualify for them. Determine how long they take and the times they begin. Be sure to have goals in mind so you are prepared to answer all questions.

Structures that may be useful in the situation:

I would like a listing...
I have the following...
I talked to...
Are there any training programs available?
How long? How do I qualify?
Where can I get more information?

Reading:

If you have had some clerical skills and have a knowledge of typing, some additional training may well qualify you for a clerk-typist job.

The clerk-typist position will vary depending upon the type and size of the office you work in. Typical duties include compiling and typing reports, filing records and reports, posting information, sorting and distributing mail, answering the telephone, using adding machines, typing stencils, addressing envelopes, and operating telephone switchboards.

A wide range of offices employ clerk-typists. Be sure to keep in touch with state employment services and other agencies for a list of possible positions.

You should visit several offices to observe the kinds of duties that are expected of a clerk-typist, the pay scale, and the "atmosphere" of the office.

Training programs are available form vocational schools and other agencies. Choose a training program that will qualify you for the type of clerk-typist job you feel you would most like to have.

ACCOUNT CLERK

Student Objective: The student will be familiar with the qualifications and essential duties of an account clerk.

Vocabulary:

allotment	calculate
disbursement	posting
voucher	type
claim	compute
invoice	file
statement	accurately
inventory	quickly
rental	
interest	
filing cabinet	

Dialogue:
Students discuss classes they are taking.

Maria: Have you started filing yet?
Juanita: No, I am finishing my bookkeeping. I will start filing next week.
Jose: Why do you girls use a file in an office?
Juanita: It is not a file like you use in the factory. It is a set of drawers to keep papers in so we can find them.
Maria: It is a "filing cabinet".
Jose: What else do you do?
Maria: We check bills and time cards and things like that to be sure the numbers are right.
Juanita: We have to add them up to be sure they are figured right, too.
Jose: Is math necessary too? That's an all-day job itself.
Juanita: Well, it can't be for me. I will have to work quickly and accurately.
Jose: What will some of your other duties be?
Maria: Some of the other things I will eventually do are: posting allotments, disbursements, payroll deductions and expense vouchers, computing interest on refunds, and typing invoices.
Jose: Well, good luck.

Grammatical Focus
Forming the singular and plurals of verbs.

Exercise 1: Change the singular verbs to plurals and the plurals to singular forms. Singular subjects require singular verbs. Plural subjects require plural verbs. To make the singular form, add s or es to the root. The plural form is the root.

Example: singular - Junita types rapidly. plural - Juanita and Maria type rapidly.

1. Account clerks sometimes calculate interest.
2. She performs many duties.
3. Juanita keeps accurate records.
4. They use adding machines.
5. Her work pleases her superior.
6. Clerks compute rapidly.
7. Maria collects data from invoices.
8. She makes the payroll deductions.
9. Maria and Juanita work together in the office.
10. Clerks also use the adding machines.

1.

2.

3.

4.

5.

6.

7.

8.

9.

10.

Exercise 2: Indicate the verb in each sentence and its mode (singular or plural). Example: Maria posts the allotments. verb - posts mode - singular

1. Calculators cost much money.
2. She keeps a complete set of books.
3. Maria types the report.
4. The clerk files the forms.
5. Juanita performs clerical tasks.
6. Her friends learn the use of the calculator.
7. They watch Maria make the tax deductions on the payroll checks.
8. She makes out a check for the broken calculator.
9. She drinks coffee on her break.
10. The Xerox machine reproduces copies of the statements.

	Verb	Mode
1.	_____	_____
2.	_____	_____
3.	_____	_____
4.	_____	_____
5.	_____	_____
6.	_____	_____
7.	_____	_____
8.	_____	_____
9.	_____	_____
10.	_____	_____

Exercise 3: Underline the verb and change the mode of the verb from present to past. Example: They <u>have</u> the account clerk to do some bookkeeping. Verb: had

1. Juanita figures out the schedule for the day. _____
2. She has invoices at the end of the month. _____
3. Account clerks need to know fractions and decimals. _____
4. She makes carbon copies of all memos. _____
5. She answers the telephone all day! _____
6. The supervisor checks the work. _____
7. Maria returns to correct the typing mistake. _____
8. She places her letters in the outgoing mail. _____
9. The mail clerk delivers the intercompany mail at 9:00 a.m. _____
10. Maria punches out on the time clock. _____

Situation:

Contact a vocational or business school and ask them about classes to learn to do account clerk work in an office. Ask them what skills you need, especially how well do you need to speak English. Ask what kind of jobs there are in the town. Ask when the classes start, how long they last, and how much it will cost to enroll, and if the school help students get jobs.

Structures that may be useful in the situation:

Please explain your account clerk program.
When will...
How much...
Where are...
How long...
What will I ...

Reading: Account clerk training is used in different ways.

The student who learns to do account clerk work has a wide range of choices about his work situation.

Many of them find jobs in business offices where they may spend most of the time working with numbers. Clerks check over all invoices, or bills, that tell the businessmen who much goods he receives and what it cost. The arithmetic has to be checked for accuracy. They verify the time cards so each worker gets paid for the time he worked. They may count the material on hand to be sure the inventory of the business is correct. Sometimes they answer the telephone, sort and deliver mail, or type letters. A worker in a small office will probably do more different things than one in a big office.

Account clerks can also get jobs working as time-keepers or record keepers for companies who manufacture things, build houses, or commercial buildings, or roads, or for shippers.

All these businesses need accurate records of their daily transactions. The account clerk is an important person in doing this.

DATA PROCESSING

Student Objective: One of the purposes of this unit is to make the student become aware of the valuable role that computers play in his everyday life. Also, this unit will introduce a few of the technical terms used in data processing language.

Vocabulary:

card punch	memory
verifier	digital
sorter	computer
collator	reading station
data	sequencing
characters	grouping
card hopper	selecting
merge	calculating

Dialogue: A conversation between two men; one of whom has been replaced by a computer.

Sam: Hey, what's happening, man? You look like you just lost your last friend. Man, nothing can be that bad!
Ed: Sam, my man, it's worse than that. I just lost my gig.
Sam: What do you mean? Man, I thought you had it made, pushing a pencil all day. Lay it on me! What happened?
Ed: A computer took my job. Yea, a machine replaced me, me!
Sam: That's bad! Man, that's terrible! What are you gonna do now?
Ed. You know I am not gonna be beat. I refuse to let a computer replace me. If I can't beat 'em, I am sure gonna join 'em. I'm going to learn about all the jobs associated with computers.

Grammatical Focus No. 1

Exercise 1: Synonyms are words that have the same or nearly the same meaning. For each word in Column I find a synonym in Column II and write it.

I	II
1. merge	a. computation
2. sequencing	b. record
3. digital	c. rearrange

I	II
4. sort	d. write
5. verifier	e. arranging
6. calculate	f. explain
7. data	g. restate
8. manipulation	h. combine
9. file	i. information
10. print	j. numerical
11. collate	k. confirm
12. interpret	l. compare
	m. compute
	n. distant
	o. group

Exercise 2: Many words are built on base, or root, words that you already know. The same root word can be used to complete the two unfinished words in each sentence. Find the root word and write it.

compute	program	sort
group	operate	verify
file	punch	store
	produce	

1. The _____er made an error in the _____tion.

2. A re_____er performs three functions: re_____ing, gang punching, and summary punching.

3. The computer's memory is a stor_____ area that _____s various forms of data.

4. During _____tion of the punch cards, the _____er was disconnected.

5. If you know how to use the _____er, please start _____i this stack of cards.

6. The _____ion of the computer is largely dependent on the _____er.

7. Use the keypunch machine to re _____ this card because

there are errors in the _____ es.

8. These two cards should be filed in the _____ s you just

finished _____ ing.

9. Mary _____ s cards in groups by hand while the card

_____ er isn't working.

10. My brother writes _____ s, he is a computer

_____ er.

Exercise 3: Many words are built on base words that you already know. You can usually tell what the base word is, even when part of it has been left out.
Example: open 0 opener, unopened, reopening
group - regroup, grouping, grouper

The words in each line are built on the same base word. Decide what the base word is and write it.

1. processing, reprocessing, processional, procession

_____

2. recomputation, computerize, computability, computation

_____

3. cooperativeness, cooperation, operationalist, operative

_____

4. digitalize, digital, digitate, digitalis

_____

5. programmer, reporgram, programmed

_____

6. punching, puncher, repunching

_____

7. filer, filing, refile

_____

8. storage, restorable, restoration, restorability

_____

9. verifier, verifiable, verification, verifying

_____

10. record, recordation, recording, recorder

_____

Reading:

The computer affects the life of each of us. The economic impact is significant. New vocations have been created, such as computer systems analyst, computer programmer, computer operator, and computer technicians. The uses of the computer range from the most mundane data processing task to guiding a spacecraft to a landing zone. And yet it is not even 20 years since the computer was first applied to data processing.

The student, no matter what his career choice, is likely to have substantial contact with the computer or the results of computer processing in his future job. Business administration, medicine, government, library science, teaching, engineering, and research are a few examples of vocations in which the computer is having an impact. The computer has become such an important element in the society in which we live that an introductory knowledge of computers should be a part of the knowledge of the well-educated man.

Health Programs

The allied health programs all earn a diploma at Gateway and are oriented toward assistance in patient care in the dental or medical office or laboratory, in the operating theater, or on the hospital ward.

The nursing assistant is a six-week diploma program for the person who is stable, healthy, able to adjust and work under supervision to perform a variety of routine tasks.

The students could visit the nursing labs and tour the hospital. Nursing faculty can be used as resource speakers.

HEALTH CAREERS
PRACTICAL NURSING

Job Description: Practical nursing prepares men and women to give nursing care, under the supervision of a registered nurse or physician, to patients in simple nursing situations.

Student Objectives: The student will become familiar with terminology and procedures necessary for the prevention of disease.

Vocabulary:

infection	sterile
disease	infectious
bacteria	unsterile
hygiene	contaminated
isolation	
disinfectant	immunize
sterilization	sterilize
antiseptic	infect
instruments	isolate

Dialogue:

Mary: Have you studied for the exam today?
Virginia: Yes, we are having a test on preventing disease.
Mary: I have learned how important it is to keep myself and my patient clean.
Virginia: It is the best way to protect from infection.
Mary: I never realized how many ways infection is spread.
Virginia: I also watched the nurses sterilize the instruments in surgery today.
Mary: It is very important to have sterile instruments.
Virginia: I hope we do well on our test today. See you later.

Grammatical Focus No. 1
The past tense of most verbs can be formed by adding <u>ed</u> to the present tense. These verbs are called regular verbs.
Example: work--worked
play--played
study--studied
Verbs ending in <u>y</u>, following a consonant, change the <u>y</u> to <u>i</u>, and add <u>ed</u>.

Exercise 1: Change the following verbs to past tense.

1. Jane works. 1.
2. John studies. 2.

3. We work. 3.
4. Dr. Jones operates. 4.
5. The nurse helps. 5.
6. You stop. 6.
7. She walks. 7.
8. They listen. 8.
9. Children play. 9.
10. Germs infect. 10.
11. Doctors heal. 11.
12. Friends visit. 12.
13. We attend. 13.
14. Students ask. 14.
15. Cars pass. 15.
16. We like. 16.
17. Nurses learn. 17.
18. Students watch. 18.
19. Trains carry. 19.
20. They offer. 20.
21. People talk. 21.
22. Patients call. 22.
23. Mary follows. 23.
24. Students complain. 24.
25. Teachers help. 25.

Exercise 2: Change the following verbs to past tense.

1. John and Joan want to study nursing. 1.
2. They like helping sick people. 2.
3. They learn many things about disease. 3.
4. The hospitals offer many good job opportunities. 4.
5. I enroll in classes today. 5.
6. I study very hard. 6.
7. John and Joan attend classes every day. 7.
8. The doctors operate in a sterile room. 8.
9. Some sick patiens require isolation. 9.
10. Vaccinations immunize against disease. 10.

11. Technicians sterilize surgical instruments. 11.
12. Contaminated instruments infect the patients. 12.
13. We listen to lectures in class every day. 13.
14. Most hospitals isolate infectious diseases. 14.
15. The students ask for help in class. 15.
16. Disinfectants protect people from disease. 16.
17. Scientists discover cures for some diseases. 17.
18. Doctors wash very well before operating. 18.
19. Some visitors carry infectious diseases. 19.
20. The visitors pass on the germs to the patients. 20.

Grammatical Focus No. 2

Exercise 3: Forming contractions from verbs and negatives.
Example: cannot -- can't will not -- won't

1. She did not. 1.
2. John is not 2.
3. I will not. 3.
4. Mary could not 4.
5. You should not 5.
6. We cannot. 6.
7. He must not. 7.
8. James does not. 8.
9. I have not. 9.
10. You would not. 10.
11. Lonnie has not. 11.
12. They do not. 12.
13. Mary will not. 13.
14. Friends are not. 14.
15. Jane was not. 15.
16. We were not. 16.
17. He had not. 17.
18. She is not. 18.
19. Mary has not. 19.
20. He does not. 20.

Exercise 4: Forming negative past tense. Do not use the past tense of the verb with the past negative. Example: I worked. I didn't work. Do not say: I didn't worked.

Change the sentences from past tense to past negative.

1. The nurse studied.	1. The nurse didn't study.
2. The doctor operated.	2.
3. The machine worked.	3.
4. The students attended.	4.
5. John enrolled.	5.
6. He worked hard.	6.
7. He learned a lot.	7.
8. Mary looked for work.	8.
9. She wanted a job.	9.
10. Joan walked to school.	10.
11. She liked her classes.	11.
12. She talked to her friends.	12.
13. They listened to her.	13.
14. She finished school.	14.
15. John graduated first.	15.

Situation:

Visit a school of nursing and talk to the student counselor about applying for school. Ask her what subjects you must study, how many years, of training is required, and how much money it costs to enroll. The school may be able to help you get some financial assistance. Most schools have waiting lists to get in. Find out how long you would have to wait.

Structures that may be useful in the situation:

I am interested...
I would like...
What do I need...
How much...
When could I...
Do you have...
How long...
Where would I...

Reading:

There has always been a demand for people in the nursing profession. There is a special need for men in this field.

Most training programs for practical nursing require one year of study. There are long waiting lists in most schools, so it is a good idea to inquire early to get on the waiting list.

At the end of training, the student must pass State Board Exams to receive a license. The training programs and exams are hard work, but the rewards of working as a nurse, helping people, are great. You will have a lifetime skill in an interesting profession.

Hospitality Programs

Food service jobs, part of the hospitality industry, are booming. Greater numbers of people are traveling and dining out. With increases in population, urban development, and more money available for trips and meals away from home, the spiral continues upward.

Individuals with limited skills in English are employable in the hospitality industry. Training in proper kitchen procedures, sanitation, and working with the public are available at various levels in the food service program at Gateway Technical Institute

This unit should be supplemented by visiting the food service labs on the Racine campus. Teachers in the program could be invited to talk to the class.

FOOD PREPARATION

Student Objective: The student will learn of the training and apprenticeship programs provided by local, state, and federal agencies and how to apply for them. Vocabulary and sentence structure to achieve this aim will be utilized.

Vocabulary:

memorize	profession
applied	quality
select	skills
maintain	training
quantity	preparation
isolated	methods
commercial	agencies
effective	personnel

Dialogue:

Francisco: I have been a busboy at this restaurant for three years.
Juan: Don't you like your job any more?
Francisco: Yes, but I would like to be a cook.
Juan: You would have to go into a training program to learn that.
Francisco: I know. Our teacher at night school suggested it to me. She said there are many training programs available in food preparation.
Juan: Do you think that I can apply for more training also?
Francisco: Oh, yes, I'm sure that you can.
Juan: Let's get the applications right away.

Grammatical Focus No. 1

Exercise 1: The mistake is underlined. Write in the correct answer.

1. There are <u>three</u> cups in a quart.
2. <u>Four</u> teaspoons are equal to one tablespoon.
3. The <u>busboy</u> prepares the food.
4. Apples, oranges, and grapefruit are classified as <u>vegetables</u>.
5. There are <u>nine</u> units in a dozen.
6. Milk, water, and juice is considered a <u>dry</u> measurement.
7. Restaurants show what they have to offer on a <u>recipe</u>.

BEST COPY AVAILABLE

8. Sixteen cups make up a quart.
9. Roasts are cooked in the oven for minutes.
10. There are eighteen ounces in a pound.
11. Potatoes are usually bought by the ton.
12. A beverage is something you eat.
13. Pastry, ice cream, and fruit are all beverages.
14. There are four pints in a quart.
15. Restaurant kitchens should be kept dirty.

1.	10.
2.	11.
3.	12.
4.	13.
5.	14.
6.	15.
7.	
8.	
9.	

Exercise 2: Some - any. Choose the right answer. Some is used in a positive sentence. Any is used in a negative sentence.
I have some money. I don't have any money.
Do you have some books? I don't have any books.

1. Do you have(any, some) applications?
2. No, there aren't (any, some) left.
3. When will you have (any, some) more?
4. I should have (any, some) more tomorrow.
5. Do you think that I can apply for (any, some) training?
6. I'm sure that you will be accepted for (any, some) training.
7. Does the county offer (any, some) training programs?
8. Oh, yes, the county offers (any, some) fine programs.
9. Where can I get (any, some) more information?
10. The state employment office should have (any, some) information. I don't have (any, some) information on that.

Exercise 3: Complete the questions.

QUESTION	ANSWER
1. What did you see?	1. I saw some pictures.
2. What did he eat?	2. He ate some sandwiches.
3. What _____ they _____?	3. They took that package.
4. What _____ you _____?	4. I brought my English book.

BEST COPY AVAILABLE

QUESTION	ANSWER
5. What _____?	5. I needed more training.
6. What _____?	6. I baked some fresh bread.
7. What _____?	7. I studied the vocabulary list.
8. What _____?	8. He said he would help me.
9. What _____?	9. She stacked the dishes on the tray.
10. What _____?	10. He wanted a different job.

Grammatical Focus No. 2

Exercise 4: Change these statements into questions.

1. Rose was here.	1. Was Rose here?
2. His father works in town.	2. Does his father work in town?
3. I went to school with him in Texas.	3.
4. Juan always learns the new words.	4.
5. She is studying English.	5.
6. They explained the program to him.	6.
7. You are working hard.	7.
8. The women were in the kitchen.	8.
9. Jose drove his car to the restaurant.	9.
10. He puts his money in the bank.	10.
11. The cook burned the roast.	11.
12. Maria is Juan's wife.	12.
13. His friend finished the dishes	13.
14. He lent her five dollars.	14.
15. They attend class regularly.	15.

Exercise 5: Pronunciation. Change each of these verbs to the past tense. The teacher will check your work and listen to your pronunciation.

1. describe	7. practice	13. manage	19. spill
2. notice	8. touch	14. need	20. count
3. insist	9. plan	15. decrease	
4. control	10. change	16. remain	
5. accept	11. force	17. prove	
6. learn	12. carry	18. indicate	

BEST COPY AVAILABLE

Exercise 6: Use the words in Exercise 5 in sentences of your own. You may use present or past tense.

Lesson Theme:
This story is written in present tense EVERY DAY. Retitle it to YESTERDAY and change all the underlined verbs to past tense.

EVERY DAY

Francisco gets up at 6:00 a.m. After he takes a shower and dresses, he eats breakfast. Then he meets his friend Juan and they walk to the restaurant together. Juan is a kitchen helper. Francisco toils as a busboy. They arrive at work at eight o'clock. The restaurant has many customers and they are busy all morning. At noon Francisco and Juan eat their lunch in the park. They sit on a bench and practice speaking English. They bring their workbooks with them. Francisco likes to review the new words. Juan studies his lesson also. Their class starts at 6:30 p.m. sharp! They don't like to be late. When they learn more English, they will enter* a training program in food service.

*Will enter is future tense. Change this also to past tense.

Discussion Questions:
1. What is Juan's job?
2. What does Francisco do?
3. How do they spend their lunch time?
4. Where do they go for lunch?
5. What time does their class begin?
6. What are their future plans?

Situation:

A. Contact the State Employment Service to inquire about training programs in Food Preparation that are available in your area. They may refer you to other helpful agencies.
B. Inquire of large resorts, motels, restaurants, etc., if they have their own training programs for those interested in the food service profession.
C. Go to your vocational-technical school and learn about their programs and what they can offer you in training. A counselor would be glad to assist you and answer your questions.

Structures that may be useful in the situation:

Where is that located?
How long...

Reading:

Preparation of food in commercial eating places is one of the largest industries in the country. Quantity cooking is a highly skilled craft requiring intensive training. Experienced cooks do not learn their trade by memorizing isolated recipes, but by learning general methods or skills which can be applied in a wide variety of cases.

Personnel in food service departments need to be able to select, care for, prepare, and serve quality food to maintain public health. In-service training in food preparation is an important addition in maintaining effective preparation standards.

The State Employment Service would know of any on-the-job training programs which would permit an employee to work while at the same time receiving training in food preparation. Public Service Employment is a federally backed program to assist those in need of training. The Comprehensive Employment Training Act also seeks out those who need to be in a training program before they will be able to be gainfully employed.

Suggested Job Opportunities After Training:

1. hospitals
2. college residence halls
3. school lunch programs
4. nursing homes
5. child care centers
6. restaurants
7. resorts
8. hotels
9. cafeterias
10. country clubs

ACCESSION NUMBER: VT103231

TITLE: ELECTRICAL DISCHARGE MACHINING FOR THE SECONDARY VOCATIONAL LEVEL.

PERSONAL AUTHOR: WILLIAMS, GEORGE V.

DESCRIPTOR: *TRADE AND INDUSTRIAL EDUCATION; *CURRICULUM GUIDES; *METAL WORKING OCCUPATIONS; *MACHINISTS; SECONDARY EDUCATION; POST SECONDARY EDUCATION

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 101P.; PAGE 63 AND PAGE 81 WERE NOT REPRODUCIBLE AS THEY APPEARED IN THE ORIGINAL AND WERE RETYPED AT THE CENTER FOR VOCATIONAL EDUCATION.

ABSTRACT: THE OBJECTIVES OF THIS BOOKLET ON ELECTRICAL DISCHARGE MACHINING (EDM) WERE: (1) TO SIMPLIFY TECHNICAL DATA AND INFORMATION FOR SECONDARY VOCATIONAL AND POST HIGH SCHOOL STUDENTS; (2) TO ORGANIZE A COURSE CONTENT FOR TEACHING EDM AT THE SECONDARY VOCATIONAL LEVEL AND POST HIGH SCHOOL LEVEL; (3) TO DEVELOP LEARNING SEQUENCES AND PRACTICAL EXERCISES FOR TEACHING EDM; (4) TO PROVIDE A UNIT ON SAFETY AND SAFE WORKING HABITS CONCERNING THE EDM PROCESS; AND (5) TO INFORM STUDENTS OF THE ADVANTAGES AND LIMITATIONS OF EDM. THE INTRODUCTORY CHAPTER PRESENTS THE HISTORY OF EDM AND DESCRIBES THE BASIC EDM PROCESS. THE REMAINING CHAPTERS ARE ENTITLED: BASIC COMPONENTS OF EDM, CONTROL OF THE PROCESS, MACHINING ELECTRODES, AND ELECTRODE HOLDERS. ALSO INCLUDED IS A SECTION OF MACHINING EXERCISES WHICH ARE ADAPTABLE TO ALL MACHINES AND CAN BE USED TO ACQUAINT THE OPERATOR WITH THE MACHINE AND ITS CAPABILITIES. A GLOSSARY OF TERMS AND BIBLIOGRAPHY ARE APPENDED, ALONG WITH TECHNICAL INFORMATION ON THE OPERATION OF THE CINCINNATI MODEL 141 EDM MACHINE. (NJ)

PREFACE

This research project was made possible by a grant approved by the State Board of Vocational and Technical Education of the State of Indiana.

Much data has been collected and studied for this project. Industrial personnel and industrial educators have been consulted. It has been difficult to keep the information applicable to all EDM machining due to the different types of machines available. Specific information has primarily been left out. It was felt that specific information about one certain type of machine could be obtained from the manufacturer. For example, in the exercises listed, specific power supply settings were not stated because of the differences in power supply units and the differences between tube-type and solid state units.

There is a wide variety of Electrical Discharge Machines on the market. Any instructor who wants to teach the basics of EDM but cannot fit the expense into the school budget might want to build, or have his students build, a model EDM machine. Plans for a model EDM can be found in the March 1968 issue of Popular Science and in the December 1971 issue of School Shop. These are functional models that will enable the instructor to teach the basic principles of electrical discharge machining.

Many individuals and companies contributed to this project.

Special thanks to the following:

Mr. Ed Krabacher, Cincinnati Milacron Company,
Mr. Bruce Gunn, South Bend EDM,
Mr. Dan Rayshich, Mid-Central Area Vocational School,
Mr. Tom Pantos, Mid-Central Area Vocational School,
Mr. Larry Ritchie, Mid-Central Area Vocational School,
Mr. Dennis Niswonger, Mid-Central Area Vocational School,
Mrs. Emily Leavell, Mid-Central Area Vocational School,
Ms. Nancy Oakes, Mid-Central Area Vocational School,

Shepard Tool Company, Elwood, Indiana.

OBJECTIVES

The objectives of this booklet on Electrical Discharge Machining were:

1. To simplify technical data and information so that it may be better understood by secondary vocational students and post high school students;

2. To organize a course content for teaching EDM at the secondary vocational level and post high school level;

3. To develop learning sequences and practical exercises for teaching Electrical Discharge Machining;

4. To provide a unit on safety and safe working habits concerning the EDM process;

5. To inform students of the advantages and limitations of Electrical Discharge Machining.

GEORGE WILLIAMS

Vocational Machine Trades Instructor
Mid-Central Area Vocational School
Elwood, Indiana

CHAPTER I

INTRODUCTION

THE HISTORY OF EDM

Electrical Discharge Machining as we know it today is a highly developed modern metalworking process. The basic process or idea, however, has actually been known for many years. A research of the patent files reveals that as early as December of 1889 a patent was issued to a man who discovered that an electric arc could be used to cut metals. Since that time, various people "rediscovered" the electric arc cutting tool, and patents were applied for every few years.

Soviet researchers B. R. and N. I. Lazarenko are credited with discovering EDM in 1943. They called their process "electrospark metalworking". This process depended upon a periodic flow of sparks between two electrical conductors both submerged in a dielectric fluid. Thus began the EDM process as we know it today.

Inventions and discoveries often come about because there is an urgent need for them. This was the case with EDM. During World War II, there was a short supply of industrial diamonds for use in cutting tools. Thus an alternate method for cutting hard metals was urgently required. Electrical Discharge Machining provided the alternate method,

and in so doing, opened up an entirely new metalworking process.

EDM appeared in the United States during the late 1940's and early 1950's as a "tap buster". It was used to cut broken drills and taps out of manufactured parts. This was a practical way of salvaging expensive parts that might otherwise have to be scrapped.

The new process grew through the fifties as more and more industries found that it could be easily adapted to fit their needs. Almost all types of conventional machine tools were converted to EDM. Milling machines, grinders, jig borers, and drill presses could be easily adapted to this new process. Thus the "tap buster" was refined and modernized as new and more sophisticated requirements were demanded toward the efficient equipment we now have.

Electrical Discharge Machines are found today in all sizes of shops. EDM has replaced many of the older accepted ways of manufacturing and/or at least has supplemented them. Its versatility provides an efficient method of machining intricate parts that had been so difficult before, and it has increased industry's ability to meet the demand for greater accuracy and finer detail.

THE BASIC EDM PROCESS

Electrical Discharge Machining is a process of removing metal by controlled electrical discharges. It consists of an electrode, a workpiece and a dielectric fluid into which both the workpiece and electrode are submerged. (See Figure I., page 4). The tool (electrode) is usually connected to the negative side of the power supply, and the workpiece is connected to the positive. However, the polarity can be reversed if the situation calls for it. Examples of this will be explained later.

Pulsating D-C current is sent from the Power Supply causing a voltage to be applied between the tool and the workpiece. When the space between the tool and workpiece (machining gap) becomes small enough, the dielectric fluid in the gap is converted (ionized) into a gaseous envelope. A spark passes through this envelope from the tool to the workpiece. (See Figure II., page 5)

The spark creates a crater in the workpiece. A crater is a small depression where a particle of metal has been removed. In the EDM process, thousands of sparks occur each second, and thousands of small craters are eroded from the workpiece. The erosion process also causes the electrode to wear away but usually much more slowly than the workpiece depending upon the tool and the workpiece material.

With the preceding explanation in mind, it is obvious that both the electrode and the workpiece must be conductors of electricity. It can also be deduced that the tool must never touch the work. If this happens, no spark can traverse the gap and erode craters from the metal.

BASIC CONCEPT OF ELECTRICAL DISCHARGE MACHINING

Figure I. - The polarity can be reversed for special situations.

SPARK DISCHARGE PASSING THROUGH GASEOUS ENVELOPE

Figure II. - When the machining gap becomes small enough, the dielectric fluid in the gap ionizes and allows the spark to pass to the workpiece.

Therefore, unlike conventional machining which shears or tears metal away, EDM machining does not allow the tool to come in contact with the work.

ADVANTAGES OF EDM

The advantages of EDM are many and varied. It has been especially adapted to fit many applications in the various industries. Some of the common advantages are:

1. Hardness of workpiece is no problem. The only restriction of the workpiece material is that it must be a conductor. Some operators even feel that harder workpieces machine easier than softer ones. This, of course, was the original purpose of EDM-to machine hard metals. This is advantageous because heat treating can be done before the EDM operation.
2. Intricate shapes can be machined easily. Any shape can be cut as long as the electrode can be produced. Usually the electrode is much easier to machine with conventional machine tools than the desired opening in the workpiece. Also the electrode is often made from graphite or a soft metal which is easier to machine than a hardened workpiece.
3. Good duplication is easy to obtain. Parts or openings can be duplicated accurately as long as all conditions are constant.

4. Close tolerances can be maintained. Tolerances can be controlled in various ways. They can be controlled by varying the electrode size and by varying the machine settings to control the overcut.

5. Surface finishes can be controlled. By varying the machining gap distance, the surface finish can be predetermined. By setting the controls, the electrode can "rough out" a workpiece quickly leaving a coarse surface, or the controls can be adjusted to cut slower and leave a finer finish. Most machines provide the capability of obtaining a wide range of surface finishes.

6. There is an absence of almost all mechanical forces. The only mechanical force present in EDM work is that of the dielectric fluid. The fluid is sometimes forced through the cutting area to provide the flushing action required to remove the particles. The absence of mechanical forces allows the most fragile components to be machined without distortion. Also very delicate electrodes (such as thin wires) can be used to produce intricate detail.

7. EDM does not require constant operator attention. Several industrial EDM machines can be set up and operated at the same time by one operator. Most machines have controls that will automatically stop the machine when

the job is finished or if problems occur in the machining process.

DISADVANTAGES OF EDM

Although the electrical discharge machining process has fulfilled a vital need, it is not a cure-all for all machining problems. It cannot replace many operations of conventional machine tools because of the following reasons:

1. Since the tool and the workpiece both must be conductors of electricity, EDM is restricted in the types of materials that can be utilized both in the tool and the workpiece.
2. EDM is slow compared to conventional machining. Large cavities or workpieces are often roughed out by conventional machine tools and then finished on EDM machines.
3. The spark erosion process wears the tool more than conventional tools. Thus the electrode must be made of sufficient length and also must be dressed or sharpened back to original size in order to complete the job and hold the desired tolerances.

CHAPTER II

THE BASIC COMPONENTS OF EDM

THE MACHINE

The total EDM set up involves two basic units. These are the machine and the power supply. Both are vital to the process and must be selected according to the type of work to be done.

Electrical discharge machines have been produced in a wide range of sizes to fit the specific needs of different customers. Some manufacturers produce bench type models for use in schools in order to teach the basics of EDM with minimal expense. Other manufacturers produce industrial type machines which range in size up to the 168,000 pound Cincinnati EDM used in producing large automotive trim dies. Major companies can usually fill the needs of customers with their normal line of machines; however, the major companies can, and often do, build machines to fit special requirements of their customers.

There are two basic types of machines; these are the ram-type and the quill-type. The ram-type machine (See Figure III., page 10.) is used more for heavy-duty work. It is built for accuracy and repetitive positioning of heavy electrodes. It can handle smaller, more intricate work, but it is particularly adaptive to larger workpieces and electrodes. It

Figure III. - The ram type EDM machine to the left is designed primarily for machining stamping dies or cavity work where heavy large area electrodes are required.

Figure IV. - The quill-type EDM machine to the right is particular well adapted for machining intricate parts, complex hole and cavity work, and long, precise holes.

also allows the use of split electrodes and multiple electrode set-ups.

The quill-type machine (See Figure IV., page 10.) is usually recommended for small, intricate parts or the machining of precise holes. Precision holes are obtained sometimes by utilizing a rotating collet chuck attachment which rotates the cylindrical electrode to produce a truer, more accurate diameter.

A servo system and a dielectric system are built into the EDM machine. The servo system is the "automatic feed" of the EDM machine. A circuit in the power supply constantly monitors the voltage change in the spark gap and compares it to the preselected reference voltage (controlled by the control settings of the power supply). The difference between the two voltages is the input signal that tells the servo how far and how fast to feed the electrode, and when to retract it. As a result, a very sensitive electro-hydraulic system is required to maintain a constant spark gap varying from .0005 inch to .004 inch (normal range can be greater) between the workpiece and the tool.

In order for the servo system to maintain such accuracy, the machine must be capable of minute movement without backlash. It must also be rigid enough and accurate enough to prevent any tilting of the electrode. In Electrical Discharge Machining, the tool never touches the workpiece. Therefore, the tool cannot be guided into the work as a drill can; it must rely upon the accuracy of the machine to keep it in correct position for cutting. If the tool should change position, it will not be guided back into the correct position; it will cut the opening oversize.

The EDM machine must be sturdy enough to withstand substantial forces from the flushing action of the dielectric system. For example, an electrode 3 inches by 10 inches would have approximately 600 pounds of pressure against it if the dielectric pressure for flushing the spark gap were set at 20 pounds per square inch (p. s. i.). Even higher pressure may sometimes be necessary. This pressure could deflect the ram if the machine were not rigid enough. (See Figure V., below.)

Figure V. - The above illustration shows the pressure that can build up in a confined space. Actually, the total pressure upward on the electrode can decrease due to the compression of the dielectric gases. However, care must be taken not to let the pressure become excessive.

The dielectric fluid is stored in the base unit of the machine until ready to be used. It is then pumped through a filter which removes the micro-fine particles of metal. From the filtering system, the fluid is pumped into the work tank through either the fast fill valve, into the spark gap area through the center flow system, or both.

To remove the dielectric fluid from the work tank, there is a drain valve which permits fast draining back into the base unit. During the machining process, an overflow system is used to control the level of the fluid. The Cintrojet 141 machines have a row of holes arranged vertically along one side of the tank. The holes are closed with rubber plugs. At the desired level of fluid, a plug is removed to allow excess fluid to drain back into the base storage unit. The overflow system is important when fluid is being constantly sent into the work tank through the center flow. Larger Cincinnati EDM machines have an air fill system. The level of the dielectric is maintained by air pressure.

Many machines are equipped with a vacuum system which removes fluid from the work tank. The vacuum system drains the dielectric fluid through the machining gap and pumps it back into the base unit or work tank. This will be explained in a later section on flushing.

THE POWER SUPPLY

Care must be taken in selecting the proper power supply. The type of work to be done must be analyzed and discussed with manufacturers in order to choose the proper unit to meet the work requirements.

The three most prominent types of electrical discharge power supply units are the RC type or resistance-capacitance circuit, the RCI (resistance, capacitance, inductance), and the pulse-type (electronic tube or transistor units). The tube type and the solid state are both of the pulse type; the solid state is a refinement of the tube type. Both are widely used in industry.

THE RESISTANCE-CAPACITANCE CIRCUIT

(Charmilles Corporation of America)

Figure VI. - Polarity can be reversed.

In the RC circuit (See Figure VI., page 14), as the voltage rises across the capacitor and the spark gap, the dielectric fluid ionizes. At complete ionization, the resistance between the workpiece and electrode breaks down. The energy stored in the capacitor is then discharged through a spark. This spark passes from electrode to workpiece. The length of time to discharge is much shorter than the time needed to recharge the capacitor. This happens because there is more resistance in the charging circuit than across the spark gap. When the capacitor is recharged, the cycle is repeated.

In some RC power units, the refinement of inductance has been added to create the RCI circuit. In the RCI power supplies, inductance has been introduced into the charging circuit to help control the charge and discharge rates of the capacitors.

The operation of the pulsating circuit is very much like the operation of the RC circuit except that the charging of the capacitor is controlled by an electron tube. (See Figure VII., page 16) The electron tube serves as a variable resistor. It switches in maximum current for charging the capacitor and then maximum resistance during its discharge. The charging frequency of the capacitor is controlled by the electron tube.

The solid state power supplies have many advantages over the tube type units in operation and maintenance costs. Costly tube replacement is eliminated in the solid state transistorized units. The transistors consume less power, last longer, are more reliable, require less space, produce less heat, and are less expensive to replace than electron tubes.

ELECTRON TUBE POWER SUPPLY

(Charmilles Corporation of America)

Figure VII. - The electron tube serves as a variable resistor. The solid state units provide better control over the EDM process, better machining efficiency, and a reduction of maintenance costs.

In large, open shops, the smaller 25 to 50 ampere units may not require venting. However, in small shops or labs, venting may be desirable to remove smoke or fumes caused by the machining process. Larger machines used to remove greater volumes of metal necessitate the use of a ventilation system.

THE DIELECTRIC FLUID

The dielectric fluid used in EDM is often called the coolant since this is one of its functions. There are four functions of the dielectric, and these are:

1. to provide a non-conductive barrier between the workpiece and the tool,

2. to ionize to permit a spark to pass from the tool to the workpiece when the gap is small enough,

3. to cool the eroded particles, the tool, and the workpiece, and,

4. to flush the particles, smoke, and gases away from the gap.

The dielectric fluids normally used are considered oils; however, they can be other fluids also. Some examples of dielectrics are mineral and silicone oils, kerosene, ethylene glycol polar fluids, glycerol, de-ionized water, sodium silicate solutions as well as compressed air and negative gases. The characteristics most favorable in a dielectric are low viscosity, high flash point, a dielectric strength of 200-250 volts per mil (.001"), no unpleasant odors, no harmful effects on skin or machine hoses, low in impurities, and no undesirable gap characteristics. EDM manufacturers can recommend the best dielectric for particular situations.

The first function of the fluid is to provide a non-conductive barrier so that the electric potential does not discharge sparks too soon. The second function of the dielectric is to ionize so that a spark can pass between the electrode and the workpiece. The space between the electrode and the workpiece (the machining gap) varies, depending upon the power

settings. As the electrode approaches the workpiece, the electrical potential between the two builds up until it exceeds the voltage breakdown strength of the dielectric. Then the dielectric is ionized and changed from an insulator to a conductor so that the spark can pass from tool to workpiece. (See Figure VIII., below)

Figure VIII. - The dielectric must ionize so that the spark can pass between the electrode and the workpiece.

The third function of the dielectric, to cool the eroded particles, is necessary because of the tremendous heat generated by each spark. The dielectric fluid also cools the tool and work; this can be important on heavy, prolonged roughing cuts.

The fourth function is to flush away the eroded particles to keep the gap clear. The carbon particles, if allowed to remain in the gap, can accumulate and cause DC arcing. The particles act as stepping stones for the spark, and an accumulation of these particles will concentrate the spark in one place, thereby interfering with the desired cut and stopping the erosion process.

Figure IX. - Particle build-up can interfere with desired cutting action.

THE WORKPIECE

The most important characteristic of the workpiece is that it must be a conductor of electricity. Next the piece must be no larger

than the machine's capacity. Large jobs that cannot be machined on the existing EDM unit are sometimes set up on a large milling machine or drill press and cut by adapting the EDM unit to the larger machine.

Some workpiece materials will cause much higher metal removal rates than others. This is due to two factors. These factors are:

1. the conductivity of the material-for example, copper is an excellent conductor and stainless steel is a poor one; and

2. the melting point of the material-for example, aluminum melts at approximately 1200 degrees F., and steel melts at approximately 2700 degrees F.

THE ELECTRODE

Electrodes in Electrical Discharge Machining can be compared to cutting tools in conventional machining. However, the choice of the proper electrode for a specific task is more important than the selection of a tool for a conventional job. The reason for this is because the EDM tool reproduces its own configuration in the workpiece. Therefore, careful considerations have to be made in selecting the proper electrode.

Types of Electrodes

There are different types of electrodes to consider when selecting one for the job at hand. Most essential is that an electrode must be a conductor of electricity. Since some materials are much better conductors than others, this is an important factor. Some of the more common electrode materials are: graphite, copper and copper alloys,

and brass. The list of electrical conductors that can be used as electrode material is lengthy. (See page 22.)

The more common electrode materials can be purchased in slabs, flat sheets, rods, tubes, and cylinders of various sizes ground and unground. A prime consideration in selecting an electrode might be the availability of the shape and size desired. Time and machining costs would be saved if the electrode size and shape were readily available (such as tubes, rods, or square shapes).

When the shape and size electr[illegible] desired is not readily available, there are other types to consider. These are:

1. cast or molded electrodes,
2. forged or coined electrodes,
3. metal sprayed, and
4. machinable electrodes.

Cast or molded electrodes are made from graphite. These have not been widely accepted yet, but research and experimentation are still going on to perfect this type of electrode. In the past this type of electrode has been unsatisfactory because of high electrical resistivity, poor density, inferior gap characteristics, and poor cut-to-wear ratios.

Forged or coined electrodes are usually brass or copper or copper alloys. Metal sprayed electrodes are not too common yet; however, some electro-deposited copper electrodes are used for low amperage-high detail work. Machined electrodes seem to be the most widely used.

Machinable electrodes are those that are manufactured by conventional methods. They are milled, turned, drilled, ground, etc. to the desired shape. (Machining of electrodes will be discussed in another

PROPERTIES OF COMMON EDM ELECTRODE AND WORKPIECE MATERIALS

section.) When machining electrodes, three factors must be considered; these are the shape desired, the cost, and the material. Intricate shapes are difficult to machine in harder materials. Softer, easier to machine materials should be selected for complex shapes and thin sections.

The cost of the electrode material is another prime consideration. Materials vary in expense, but poor selection of electrode material can also be costly. It is often better to utilize the more expensive material if it will get the job done more efficiently. A lesser grade of material might sacrifice in the cut-to-wear ratio, the tolerance holding capability, and the surface finish. It is not a simple task to choose the correct material since there are so many grades to choose from. Manufacturers can recommend the appropriate one.

Graphite is by far the most widely used electrode material because its cost is low compared to metals, it has good wear characteristics, it erodes the work faster, and it is machined more easily than metals.

Choosing an Electrode

Two basic considerations in choosing an electrode, in addition to machinability and cost, are wear and metal removal rate (MRR). In the EDM spark erosion process, the electrode also is eroded or worn away. The amount of wear depends upon the electrode material, the workpiece material, the electrical conductivity of each, and the polarity of the set up. Since electrode and workpiece materials have different melting points and different electrical conductivity, some combinations will cause

more wear than others. Brass melts at around 1650°F. and copper at around 2000°F. Graphite does not melt but vaporizes at a temperature above 6000°F. Spark temperatures, which can range up to 10,000°F., erode the conductive metals more quickly than the graphite.

Standard polarity means having the electrode negative and the workpiece positive. Reverse polarity is the opposite. In some instances, reverse polarity will give better wear ratios. This is beneficial where a higher quality of detail is desired on finishing cuts.

Figure X. - Standard polarity is also known as negative polarity. Reverse polarity is also known as positive polarity.

The second important factor in choosing an electrode is metal removal rate which is a measure of how fast the metal is eroded. Metal removal rate efficiency may be measured as the volume of metal removed per unit of electrical energy, or the amount of the work-piece that is removed in a given length of time (usually stated in cubic inches per hour) per average ampere.

CHAPTER III.

CONTROL OF THE PROCESS

Factors Involved in the Control of the Machining Process

Control of the EDM process involves five factors in addition to the basic components discussed in the previous section. These factors are the servo voltage, cutting current or amperage, frequency, amount of capacitance used in the discharge circuit, and stability and sensitivity of the servo system. These factors are all essential to the cutting operation and operate simultaneously.

Servo Voltage

The space between the electrode and the workpiece is called the gap, spark gap, machining gap, or cutting gap; and the voltage that passes through this space is called the gap voltage. The peak gap voltage for graphite electrodes is about 30 volts and 20 volts for metallic electrodes. The servo voltage, which is extremely important in stabilizing the cutting action, is an average peaking or striking voltage. It is the breakdown voltage used to initiate or ionize the gap. It is the ionization voltage. (See Glossary.)

The servo voltage is read on the voltmeter in the power supply. By increasing or decreasing the servo voltage, the cut can be stabilized.

When the cutting action is stable, the voltmeter will show little or no movement of the needle.

Increasing the voltage stabilizes the cut when poor flushing conditions prevent the adequate removal of chips from the cavity. Too many chips in the gap tend to reduce the voltage so that no current flows and the electrode retracts until the coolant can flush the chips away. An open circuit (no cutting action) can result if the gap is too large. Thus, the gap voltage and the servo voltage control contribute an integral part of the machining process.

Cutting Current (Amperage)

Metal removal rate depends on how much metal is removed (cubic inches/hour) by each spark in a given period of time. This is generally determined by the energy consumed. By increasing the current to the electrode, a faster machining rate can be achieved.

Using the same electrode and workpiece materials (See Figure XI., page 28), Figure A illustrates the effect of a one ampere discharge. A one ampere spark contains a certain amount of energy and will remove a certain amount of material; a two ampere spark contains twice as much energy and will remove twice as much material.

Note again that some materials have lower melting points than others and will machine faster. (Refer to the chart shown on page 22.) The lower melting point materials yield larger chips, thus producing faster cutting times. There is no significant difference between hardened steel and soft steel. In heat treating steel, the critical temperature

Figure XI. - Using the same electrode and the same workpiece, doubling the amperage will double the removal rate.

range for hardening is normally 1400°F. - 1850°F., and the melting point is much higher at approximately 2700°F. Both of these will vary with different alloys. Therefore, in order to EDM hardened or annealed steel, the spark must have a temperature far above the hardening range.

Another important consideration is that of conductivity. This

has an effect upon the erosion rate. Generally speaking, the higher the conductivity, the faster the erosion.

Amperage also affects the finish and the overcut. With increased amperage, more metal is removed and each spark discharged penetrates deeper into the workpiece leaving larger craters and a rougher finish.

Overcut is described as the space between the perpendicular wall of an electrode and the side wall of an EDM machined opening. (See Figure XII., shown below.)

Figure XII. - Overcut is the space between the perpendicular wall of an electrode and the side wall of the opening.

OVERCUT
ELECTRONIC ENVELOPE

Figure XIII. - The electronic envelope follows the shape of the electrode.

For accurate sized openings, the overcut must be controlled. Therefore, the amperage must be controlled so that the sparks do not erode too much metal from the sides of the opening.

Overcut is sometimes described as an electronic envelope. Figure XIII., page 30 shows that the electronic envelope follows the shape of the electrode no matter how irregular that shape may be.

Frequency

Surface finish is just as important in EDM machining as it is in conventional machining. EDM can produce a range of surface finishes varying from rough to fine.

The illustration shown in Figure XIV., page 32 shows the importance of frequency upon the surface finish. In all four figures the amperage, electrode, and workpiece material are all constant. By varying how many spark discharges occur per second, the surface finish can be controlled. With low frequency of discharges as in (A), large craters are formed resulting in a rough finish. As the frequency is increased, there are more sparks per second dividing the same amount of amperage. This results in smaller craters and a finer finish. It should be noted that since the amount of energy is constant, the same amount of material is being removed in all four cases. However, the increase in number of sparks reduces the energy per spark. Consequently, in (D) each spark removes a much smaller particle than a spark in (A), (B), or (C).

(Colt Industries - Elox, Inc. Division)

SURFACE FINISHES VARY WITH FREQUENCY

Figure XIV. - Frequency affects the surface finish.

Surface finish depends not only upon amperage and frequency but also upon the finish on the electrode. The electrode produces a hole or cavity according to its shape. Vertical machining lines, scratches, or nicks on the electrode will be reproduced on the workpiece. It is good practice to lightly polish electrodes with fine emery cloth to remove machining marks.

The EDM finish differs from surfaces machined by the more

conventional methods. It is composed of a series of small craters and has a nondirectional or multidirectional appearance as compared to turned or milled surfaces. The craters reflect light differently than a ground surface; consequently, the EDM surface doesn't appear as bright.

While the crater finish must sometimes be polished as in mold work, it is often advantageous to leave it in an unpolished state since it holds oil better than a ground surface. This is beneficial in stamping out parts which tend to stick to the die.

Another surface finish characteristic of the EDM machined surface is the recast white layer that results from the high temperatures required to erode the material. In heat-treatable metals, such as tool steels, this layer will be extremely hard. When high amperage is used in the final cutting operation, minute cracks may appear.

Tempering the die or part after EDM usually alleviates the problem caused by the white layer. Minute cracksare often removed by a polishing operation; however, the cracks can be a serious problem on sharp corners and thin sections.

Amount of Capacitance Used

Another factor which greatly affects control of the EDM process is the amount of capacitance used in the discharge circuit. On pages 13-16 the different types of power supplies were listed. It should be noted that there are basically two types of operating modes. These are the straight energy systems which are found in the solid state transistorized

power units, and the capacitor systems.

The solid state units have the capability of varying the pulses to an infinite degree. The on time and off time can be infinitely varied to achieve the desired results. Also, the servo voltage and amperage are controlled much more precisely than the capacitor type operating mode.

The straight energy systems produce a square wave pulse as shown in Figure XV.

Figure XV. - Square wave pulse

The on time is defined as the duration of a pulse, and the off time is the time interval between pulses.

In the capacitor systems, capacitors are merely convenient storage devices where the energy is stored until ready for use. The value of the capacitors are measured in microfarads. The higher the microfarad value, the greater is the energy storage capacity. On the South Bend-Ingersoll power supply, capacitors are available in energy storing capabilities of from .03 microfarads to 12 microfarads.

By combining capacitors, practically any microfarad value can be obtained. With a capacitor mode of operation, the capacitance determines

the metal removal rate and the finish. The duty cycle, power level, and frequency only determine the energy produced by the power supply for filling the capacitors. The higher the microfarad value selected, the greater will be the discharge energy, resulting in a higher metal removal and a rougher finish.

One advantage of the capacitor system is that the capacitors store the charge until conditions at the machining gap are ideal for a discharge. On straight energy systems, a pulse might be lost (a miss) or partially lost if the dielectric did not break down (ionize) in the gap. The illustration in Figure XVI. shows an example of this.

(South Bend Lathe EDM)

Figure XVI. - On straight energy systems, a miss can occur.

Stability and Sensitivity of the Servo System

The servo system was discussed briefly on page 11. This final factor in controlling the EDM process determines the response speed of the electrode to conditions at the machining gap. As metal is removed, the servo system monitors the gap distance and maintains a uniform distance

between the electrode and the workpiece according to conditions at the gap. If the response speed is too slow, machining time is slowed. If the response speed is too fast, the electrode might contact the workpiece and stop all cutting action.

Since the machining gap often ranges as low as .0005 of an inch, the servo system must be extremely sensitive and stable to maintain such a small distance between the electrode and workpiece.

As mentioned on pages 11 and 12, the servo system must be sturdy and stable because of the flushing pressure that might at some time be exerted upon it. (See Figure V., page 12.)

PROGRAMMING

In order to achieve the most efficient results in EDM machining, a systematic approach to each job should be taken. This means a "hit or miss" approach in setting the controls must be eliminated. EDM manufacturers print charts, tables, and graphs as well as special machining suggestions to help in obtaining the desired results in the least amount of time according to the criteria established. This means that the job must be analyzed and evaluated as to which factors are most important and least important. For example, if the surface finish of a workpiece is unimportant, the machine may be set to cut fast with a rough surface finish.

Four main concerns in electrical discharge machining are:

1. overcut, 2. metal removal rate, 3. surface finish, and 4. electrode wear. It must be determined which of these four factors is most important. Then the other factors must also be ranked in importance. Once the order of importance has been established, the charts can be used to determine the required machine settings.

The charts are merely a starting point, just as RPM charts are. The charts are representative of ideal conditions. If for some reason the conditions are not ideal, then adjustments must be made. Experienced EDM operators can decide very quickly the proper settings needed for particular jobs on the machines they operate. It is sometimes recommended that charts be made for each machine because identical machines do perform differently. This is done by keeping data from each job performed and compiling the information.

The South Bend EDM Company uses amperage charts overcut charts, and Duty Cycle Charts to aid in programming the machine for the desired results. The company also includes in its service manual the EDM Parameter Consideration Chart (See page 38.) which is most helpful.

The Cincinnati Milacron Company uses a different type of chart system. Note the Operating Data Chart No. 1 on page 39. This chart is for one particular machine, the Cintrojet 141, which is a solid state power supply. Note also that the chart is used when a graphite electrode with negative polarity (standard polarity) is used on a steel workpiece. The Cincinnati Company includes charts for its other machines and for both standard and reverse polarity in their manuals.

EDM PARAMETER CONSIDERATION CHART

The parameter chart will assist in arriving at the general power supply settings for the type of machining desired.

Variations on either side of the nominal ON-TIME settings shown are imperceptible in the finish area. In the roughing area, an increase or decrease in ON-TIME will result in a value between the two nearest nominals on the chart.

Page 41 shows the controls of the Cintrojet 141 power supply. This illustration should be helpful in understanding the following information.

A typical program might be labeled 3A2G6-5. This program is explained in the following paragraph. Note that some parts of the program are not included when they are not needed for the job.

Programming Cintrojet Power Supplies

The following is the method used for specifying and recording settings used on the Cintrojet Power Supply:

If operated in split mode, the letter "S" should precede a digit which indicates the number of modules used per split.

Number of modules being used and/or connected to one electrode.

LOCATION OF OPERATOR CONTROLS

The blocks of information from Chart No. 1, page 39, are explained below:

1. Mean Overcut - Average of top, middle and bottom overcut, measured by expanding-type gage, in thousandths of inches per side.

2. Metal Removal Rate - Metal removed in cubic inches per hour per average ampere, with ideal flow.

3. Electrode Wear - Percent of electrode wear with respect to metal removed. This is a volume ratio. An asterisk (*) in this block indicates less than 1% electrode wear ratio.

4. Finish - Surface roughness, in Micro-inches RMS.

The typical program 3A2G6-5 is for a finishing cut. The 3 is the peak current setting; A is the range setting; 2 is the on time setting; G means that a graphite electrode is to be used; 6 is the off time setting; the negative sign (-) means that standard polarity is to be used; and the 5 is the gap initiation setting. By using Chart No. 1, the following information can be obtained.

With ideal conditions, the overcut will be .0009 per side; the metal removal rate will be .019 cubic inches per hour per average ampere; the electrode wear will be 36 per cent; and the finish will be 60 RMS.

It should be noted that the Operating Data Chart No. 1 does not

provide all the information required. The off time setting must be calculated.

The Technical Information sheets found in Appendix A and the Operation sheets found in Appendix B may be used when studying this part of programming.

METHODS OF FLUSHING

Removing particles from the machining gap is probably the most important single factor for efficient electrical discharge machining. Thus it becomes very important to maintain adequate flushing at the gap to clear the area of residue. Poor flushing can easily destroy the effects of proper power settings. It can make the overcut larger than desired and destroy the accuracy of the opening. It can make the difference between a stable, efficient cut and an unstable, low efficiency cutting action.

A "stepping stone" effect can result when too much residue is left in the gap. The electrical discharges are then transferred through the gap by the particles. This situation reduces the efficiency of the discharge. Ionization will occur at a lower voltage and the magnitude of the discharges will be reduced. This in turn reduces the metal removal rate and permits the build-up of carbon on the workpiece. The carbon build-up will then reduce the efficiency of the servo sensing unit which will further reduce the cutting efficiency.

Without proper flushing, excess particles can also create a short circuit, or direct path, between the electrode and the workpiece. This creates excessive energy at one localized area of the workpiece and

results in a burning effect. This condition is commonly referred to as "DC arcing" and can easily ruin a workpiece.

The type of job determines the flushing method and amount of flushing required. For example, when a high energy discharge is being used (high power level/long duty cycle/low frequency), the size of the particles is large. These large particles have a greater tendency to cause "shorting" and must be removed. Metals that machine easily deposit more residue and require a high degree of flushing.

Although flushing is extremely important, it must also be noted that excessive flushing pressure can be detrimental. It can increase the voltage necessary to create a discharge, and can also distort smaller electrodes, and this will deform the opening being cut. Flushing must be balanced for each particular job.

The dielectric flow system, shown in Figure XVII., page 45, as described on page 13 is an example of the system used on the Cincinnati Cintrojet 141 EDM machine. Note that this system uses an overflow arrangement to control the level of the dielectric. On larger Cincinnati machines as well as many other brands, the level of the dielectric fluid is maintained by air pressure.

It is very often convenient to force dielectric coolant through hollow electrodes for the purpose of flushing. This method is called center flow pressure. This process is illustrated in Figure XVIII. on page 46. It leaves a core which drops out as the electrode passes through the workpiece. This is an excellent method of flushing when it can be

DIELECTRIC FLOW SYSTEM

(Cincinnati Cintrojet 141)
(Cincinnati Milacron Company)

Figure XVII. - One type of Dielectric Flow System

CENTER FLOW PRESSURE

Figure XVIII. - The coolant is forced through the electrode

used. Sometimes, however, the design of the electrode will not permit the use of center flow holes in the electrode. On irregular electrodes a center flow hole may not provide a uniform flushing action. A flush hole in the center of a round electrode usually provides a good uniform flushing action.

The hollow electrode can also be used to provide a vacuum center-flush method of removing particles. This is shown in Figure XIX. on page 48. The vacuum center flush method draws the dielectric fluid and the particles up through the electrode and back into the storage unit.

The vacuum flush method, shown in Figure XX. on page 49, draws the particles and coolant down through the workpiece and coolant riser and back to the storage unit. This is an excellent method to use when using thin or irregularly shaped electrodes, and it is used by many shops engaged in through hole machining.

Jet flushing, shown in Figure XXI. on page 50, is the method which directs a stream or several streams of dielectric toward the machining gap to provide the flushing action. This method is used only if the previous methods are not practical. Too much pressure by this method could deflect a thin electrode and cause a distorted opening in the workpiece.

Another system of flushing, the opposite of the vacuum flush, is to force dielectric up through the workpiece and through the machining gap. This is illustrated in Figure V. on page 12. This method requires the workpiece to have a through hole before EDM machining. This is known as "reverse flow" coolant flushing.

VACUUM CENTER-FLUSH

Figure XIX. - In this process, the dielectric fluid is drawn upward through the electrode.

VACUUM FLUSH

Figure XX. - In vacuum, the coolant and particles are drawn down and away from the machining gap.

JET FLUSH

Figure XXI. - Care must be taken not to exert too much flushing pressure on thin electrodes.

In some cases it may not be possible to have a coolant flushing hole in either the electrode or the workpiece. In this situation, it is practical to use a vibrator system of flushing. Some set-ups utilize an electrode holder which vibrates the electrode. Other set-ups utilize a vibrating worktable which causes the workpiece to vibrate. The vibrating causes a pumping action and will agitate machined particles out of the gap. The vibration system of flushing is a convenient method to use in situations where direct coolant flow is not possible.

Whichever method of flushing is used, it should be the one which will be suited to the particular job. The method used should be the one which will most efficiently remove particles from the machining gap without reducing the machining efficiency. Only then can ideal conditions be realized.

SAFETY

The subject of safety is an integral part of any machining operation and must not be regarded lightly in electrical discharge machining. The most important safety information about any piece of equipment will be found in the manufacturer's books and pamphlets pertaining to that item. The manufacturer's recommendations should be followed. They should be referred to when in doubt. Exceeding or disregarding those recommendations is an unsafe practice.

Manufacturers of EDM equipment can and do give advice on machining problems as well as safety practices. Following are a few of

the safety rules listed by the Cincinnati Milacron Company:

1. Always turn the master disconnect switch to the OFF position before attempting to clean the machine.

2. Have proper lighting around the machine.

3. Operate the EDM equipment only as set forth in the appropriate instruction manuals.

4. Consult the appropriate service manual and parts catalog before performing any service or repair work.

5. Only qualified personnel, instructed in safety and all machine functions, should be entrusted to operate this machine.

6. Report any unusual sounds, smoke, heat, damaged parts, etc. to your supervisor.

7. Never touch the electrode or platen when in the "Machining" position, as electrical shock may result. The voltages used can seriously injure an operator.

8. Do not allow dielectric oil to exceed 130 degrees F. Above this point the dielectric oil loses its effectiveness, and the possibility of fire becomes greater. Heat exchanges are recommended to control temperatures in these instances.

9. Know where all the stop buttons are located in case of an emergency.

10. Maintain an oil level above the machining area of at least 1/4 inch per 25 amps of average machining current. Failure to follow this warning may result in dangerous discharge gas fire or oil fire.

The preceding ten safety rules are just a few of the many listed by the Cincinnati Company. Operators should become familiar with the complete list before operating an EDM machine.

CHAPTER IV.

MACHINING ELECTRODES

The section on electrodes, discussed on pages 20-25, dealt with types of electrodes, electrode materials, and considerations in choosing an electrode. This section deals with machining characteristics of common electrode materials and various methods of machining electrodes.

When considering electrode materials, there are several questions to ask:

1. How easy does it machine?
2. What is the cut-to-wear ratio?
3. How fast can it remove metal?
4. What is its cost per unit volume?
5. What kind of finish and size tolerance can be produced on the electrode?

In addition, the type of power supply is important. For example, brass is the workhorse of metal electrodes for pulse-type circuitry, and copper is relied upon more in the RC-type power supplies. However, the suppliers of electrode materials have developed, and are continuing to develop, high grades of graphite as well as copper alloys and tungsten alloys that are replacing the older accepted electrode materials in many instances.

Stock is removed from the electrode as well as the workpiece during each energy discharge. Once an operator has established reliable

overcut charts, he can determine the size electrode required to machine an accurate opening. For example, if a one inch square opening is to be machined at a power supply setting which will produce a .001 overcut, the operator knows to machine the electrode to .998 inches square. This allows for .001 inch overcut on all four sides.

Figure XXII., page 56 illustrates "corner wear". Edges and corners wear much faster than the rest of the electrode. The sharper the corner, the greater the wear on the electrode. This is a factor in determining length of electrode needed. The reason for high corner wear is a result of the small area at the corner of the electrode. The sharp corners cannot dissipate the heat of the discharges as well as the flat surfaces; therefore, the corners deteriorate much faster. In addition, the electrode corners must machine more surface area of the workpiece than a flat area. This means more discharges must occur at the corners to remove the additional stock.

By measuring the length of the electrode before and after machining, the "end wear" can be determined. This is essentially the same as "volume wear" which is the difference between the volume before and after machining. Figure XXIII., page 57 illustrates the erosion of the electrode during machining.

Side wear is the difference between the original electrode length and the lowest point on the machined electrode, showing the original dimension of the electrode. This wear comparison is normally used for circular electrodes where corner wear would not be a consideration.

Figure XXII. - Electrode Corner Wear.

Individual sparks are all controlled by the "Electronic Envelope". Each spark travels the same distance so that discharges in the flat areas are not concentrated. Corners of the electrode, however, must provide the source for all the sparks required to machine the 90 degree corner of the workpiece. This results in a concentration of sparks from the corner and consequently increased erosion. For this reason, corners and fine detail must be considered in the choice of an electrode material. (Colt Industries, Elox, Inc. Division)

It is possible to keep electrode wear to a minimum by using the "low wear" or "no wear" parameters which can be obtained in the pulse

mode of operation. In this situation, there is a certain amount of re-plating of material back onto the electrode. Replating back onto the electrode is done most effectively in reverse polarity, using a long duty cycle and operating at low frequency.

Figure XXIII. - Corner wear determines electrode wear in through-hole cutting. In cavity cutting, volume wear is the controlling factor. (South Bend EDM)

Machining Characteristics

Machinability is one of the first considerations in choosing a material for an electrode which requires shaping to an exact size. Some of the characteristics of the more common electrode materials are

discussed in the following paragraphs.

Copper, which is probably the oldest metal known to man, is a base metal or a pure metallic element. Its electrical conductivity makes it a valuable electrode material. Copper can be shaped easily but becomes hard as it is worked and must be annealed. Though it is easy to shape, it is more difficult to machine because of its roughness and softness. Tools must be kept sharp and deep cuts should be taken. The softness of copper results in a poor "gummy" cutting action. The chips from drilling cling to the drill bit and must be cleared away frequently. Extreme care must be taken when tapping a hole drilled in copper. The metal builds up in the flutes and frequently results in broken taps. It is recommended that holes be drilled oversize when tapping in copper.

Milling and sawing heat a copper workpiece quickly; adequate chip clearance and ample coolant flow are used to cool and clear the chips away.

Copper's versatility is further shown by its use in alloying with other materials to produce electrode materials. Copper tungsten and copper graphite are examples of these, as well as brass.

Brass was once the primary choice for electrodes, and still is in many cases. It can be extruded, stamped, or formed and is available in sheets, rods, and tubes of various sizes. It is an alloy of copper and zinc. Brass ranges in color from reddish yellow to a silvery yellow, according to the percentage of zinc it contains. Most brasses can be readily machined with ordinary cutting tools in machine shops.

Page 63 was retyped at The Center for Vocational Education.

Brass can be rolled, cast, drawn, formed, and turned with little difficulty and is often used because of its free-working features. Like copper, brass will work-harden in forming, bending, and drawing operations and often must be annealed for further machining.

Tungsten, by itself or alloyed with other materials, is now a common electrode material. Tungsten Carbide, Silver Tungsten, and Copper Tungsten are some excellent electrode materials. Expense becomes a factor when choosing these, but their cutting results often justify the expense.

Tungsten's high melting point (6170°F.) is an important factor in its cut to wear ratio. Machining must be done with carbide tools and is quite difficult. Preheating the work to about 400°F. is sometimes recommended to ease the machining. Grinding is usually done to finish a tungsten electrode. Adequate cooling of the grinding wheel is necessary.

Carbon and graphite are terms often used to refer to graphite electrodes. Graphite is actually obtained from amorphous carbon (no definite form-referring to molecular structure). A great percentage of electrodes are now made of graphite. The reasons for this are numerous. Economy, machinability, and good wear characteristics are the primary reasons. There are many grades of graphite available now for electrodes. The cost is more with the better grades, but even so graphite proves to be more economical than other materials.

Graphite is unique in that it conducts heat and electricity like metals, but it doesn't melt. It withstands high temperatures at which

metals will melt. Graphite vaporizes at around 6700°F. This allows for good cut to wear ratios. Also graphite increases in strength with increased temperatures while metals lose strength.

Machining of graphite is easily accomplished. It can be done with equipment generally used in wood-working or metalworking with only slight modification. Machines used strictly for working graphite are usually equipped with vacuum dust collecting equipment. The dust generated by machining graphite can cause problems to both the machinist and the machine if it is not properly removed. The machinery need not be of the heavy duty type.

Large graphite electrodes can be fabricated by using two or more sections and joining them together with adhesive or bolts. This is often done on large cavity dies. (This is discussed in Chapter V.)

Machining Methods

A wide variety of machines are used for machining electrodes. Metallic electrodes are produced by extruding, stamping, forming, and machining on conventional machine tools. Graphite electrodes are also fabricated with conventional machine tools; however, the dust produced must be vacuumed away to prevent damage to the machine.

Standard band saws are used to saw graphite materials. The speed recommended is 1600-1800 surface feet per minute. Saw guides should be adjusted to allow minimal clearance to insure saw blade rigidity.

When machining graphite on the engine lathe, care must be taken not to overtighten the chuckjaws. It is advisable to use collets if possible.

Vibration must be eliminated as much as possible. High speed steel tools and carbide tools are used to machine graphite. Care must be taken not to cut too heavy, as the graphite material can break.

The gibs on milling machines should be well adjusted to prevent chatter marks on the milled electrode. This is especially true of metallic electrodes. Firm clamping and shortened tool extensions are also recommended. Overloading the machine's capacity will cause graphite material to fracture. In some cases with cheaper graphite, the material will chip away at the end of a cut leaving a ragged edge instead of a sharp corner.

Grinding is the way many electrodes are finished to close tolerances. Once again, when machining graphite the dust should be removed. A vacuum attachment ahead of the grinding wheel is recommended. Clamping graphite securely is a must. Electrodes often are "dressed" or "cut back" to remove worn ends by grinding.

Drilling is another operation done on many electrodes. Carbide tools used at high speeds are sometimes recommended, but high speed steel drills are usually used in drilling graphite. The drill must be kept free of dust which can pack into the flutes.

The Poco Graphite Company recommends that machining lubricants not be used when machining graphite, as it contaminates the product. In rare instances where water must be used, they recommend exposing the parts to temperatures of about 400°F. for one hour after machining to "decontaminate" the parts.

In addition to the basic machine tools listed, many common holding devices are used as well as special fixtures to obtain the desired electrode configurations. The dividing head or indexing head is extremely useful in milling, grinding, and drilling operations.

Duplicating machines such as Contour Mills are commonly used to fabricate electrodes. The master or pattern can be made of cast epoxy or from a master die.

Large slabs of graphite can be ground flat on Blanchard rotary grinders by blocking around the slab to hold it in place upon the magnetic table.

Graphite electrodes for extrusion dies are made by filing on die filing machines and by numerical control milling machines.

Punches for stamping dies are often "tipped" with copper tungsten or other electrode materials. The punch and tip are then machined together to the desired size and shape. Then the tipped punch is used to EDM the die opening. This method insures proper alignment and doesn't increase the cost of electrode or punch fabrication very much.

The list of machining methods for electrodes, metallic or graphite, seems endless. Each shop must discover the best or most economical way of obtaining their electrodes. The competition in this particular area has produced some excellent machining ideas.

CHAPTER V.

ELECTRODE HOLDERS

As electrical discharge machining became more sophisticated with its evolution from the simple "tap buster", the need for more and different electrode holding devices also grew. Presently, there are numerous electrode holders and accessories available through EDM machine distributors. In addition, many shops design and build their own accessories. Some electrode holders are fairly common or standard with all EDM machines, and others are adapted for special requirements. The following paragraphs discuss this aspect of electrical discharge machining.

Common Holders

The most common electrode holder is the collet. EDM collets come in different sizes and shapes. They are similar to those used on lathes and milling machines. One series of collets is available with four internal diameter sizes: 1/4", 1/2", 3/4", and 1". The electrode is held in place by a set screw. Another type of collet is the precision ground split collet. This collet tightens on the electrode as the collet is drawn up in a tapered sleeve. The only problem with this type of electrode holder is that the electrode must have a round shank or the electrode

must be affixed to an adaptor which does have a round shank. Large heavy electrodes cannot be held in collets because there is a chance that they might slip out or turn.

Oil-thru tubing chucks are used for small (1/4" diameter and smaller) tubular electrodes that require the use of centerflow flushing. These are like the Jacobs chucks found on drill presses, except that they usually have either 1/2", 3/4", or 1" diameter straight shanks to fit into a collet. They also have a hole through the entire unit to allow for the dielectric centerflow.

Another popular type of electrode holder is the adjustable V-block. These are available in different designs. They are for square or rectangular electrodes. The holders are made in different sizes to accept small to larger size electrodes. Small V-block holders are sometimes mounted directly to the platen. These can be obtained with an X and Y axis adjustment for more accurate electrode alignment. As with the collets, V-block holders permit quick and easy electrode interchanging.

Accessories

There are many accessories and attachments that can be purchased for EDM machining. Many are used in conjunction with the electrode. Some are work-holding devices, and some are for locating the electrode and workpiece more accurately.

Vibration was mentioned in the section pertaining to methods of flushing. There are vibrating electrode holders and vibrating work

tables available.

A pulser attachment, when desired, is usually built into the machine rather than being an "add on" feature. This, like the vibrating accessories, is used when flushing conditions are poor. It retracts and returns the electrode to the cut in regular pulsations. The up and down movement serves to flush away the particles.

Rotating attachments can be purchased in either built-in or added-on forms. Many machines have this feature built in. The rotation of cylindrical electrodes is extremely beneficial when machining through holes and blind holes. It results in good flushing and better roundness and finish.

A tapping attachment allows holes in hardened steel to be threaded. Some of these are manually operated while the better ones are run automatically by a separate motor. Before this attachment came about, threaded inserts had to be welded into oversize holes cut into the hardened workpiece.

A table servo unit is available which allows machining in the horizontal plane rather than the vertical. This is helpful when cutting holes in large workpieces that might otherwise be difficult to set up.

There are many accessories sold which are designed to accurately position the electrode in relation to the workpiece. Electronic edge finders and microscopic edge finders are used for positioning the workpiece. Optical measuring equipment and indicating attachments are also used for this purpose.

When there is a need, manufacturers will build an accessory designed to fulfill that need. Special dielectric systems are designed and built by EDM manufacturers and individual shops to meet special requirements. Most EDM companies are extremely cooperative in working with their customers. They are continually developing better machines and equipment. The competitiveness and ingenuity of industry has resulted in many refinements and developments.

Other Methods of Attaching Electrodes

Gluing electrodes to a holder is another holding method used in EDM machining. The base of the holder is usually a flat disk with a straight shank ground to fit in a standard collet. These are made in various sizes to fit particular requirements. They are not purchased but manufactured inexpensively by those shops which use them. Usually they have a hole drilled through for flushing purposes. This type of fixture is used in the aluminum extrusion industry for mounting irregularly shaped tools, such as T-shaped electrodes.

The adhesive used to mount electrodes is a special type of bond. It has great holding strength. There are several types of these adhesives available for mounting electrodes and for gluing electrode sections together. Some are conductive, and others are non-conductive of electricity. A non-conductive adhesive should be spread sparingly along the edge of the electrode next to the base of the holder. It should not be placed between the electrode and the base because it will hamper the

electrical conductivity necessary for cutting. It is an excellent adhesive when applied correctly. Conductive adhesives are designed to use between parts. These contain silver or copper flakes to insure conductivity.

Large electrodes and split electrodes are sometimes mounted to a plate which is bolted directly to the platen of a ram-type EDM machine. Electrode sections are also sometimes bolted together to form the complete tool. Graphite can be easily drilled and tapped. It is especially good for use in large cavity machining.

Other fixtures used for electrode holding have quick change and accurate locating features, such as a dovetail unit for sliding the electrode into place. Special holders can be fabricated which will allow machining in a horizontal plane or an upward travel rather than the conventional downward motion.

CHAPTER VI.

EXERCISES

When learning to operate an EDM machine, machining exercises can be done to acquaint the operator with the machine and its capabilities. Data should be collected during these exercises so that overcut charts can be compiled. Some of the data to collect might include the following:

1. type of workpiece,
2. type of electrode,
3. method of flushing,
4. power settings used and any adjustments made during cut,
5. time for cutting,
6. flow pressure,
7. size of electrode before and after cut,
8. amperage shown on meter during cut,
9. stability of cut-stable, intermittent, erratic,
10. depth of cut-depth shown if indicator dial is used and actual depth measured,
11. overcut, and
12. finish.

The following exercises are some that can be used effectively. Specific machine settings have been omitted because of the different terms used with EDM units made by the various manufacturers. Terminology used with an older tube-type machine is not applicable to a newer solid state machine from a different manufacturer. The following exercises can be adapted to all machines.

Surface Finish Plate

This exercise is used to show the finishes that can be obtained by EDM machining. A flat steel plate is selected for the workpiece. It should be surface ground to provide a uniform surface. Select surface finishes from the charts and the settings needed. Use six or eight settings. Depth of cut should vary because with the smoother finishes the cut will be slower. Rougher finishes will machine easily and cut deeper quickly. A one inch diameter graphite electrode is an excellent tool for this exercise. Center flow or vacuum center-flush is recommended. The electrode should be dressed after several cuts. This can be done by facing on the lathe, taking care to obtain a smooth surface. Flushing should be adjusted with the various settings to insure stability of cut.

Cavity Machining

Cavity machining is done in mold making and forging die production. EDM machining of cavities has solved many machining problems.

A simple cavity exercise can be done by using a half-round graphite electrode and a block of steel. A two inch long, one inch diameter piece of graphite can be milled or ground flat on one side and glued to an electrode holder. Flush holes can be used. Three or four holes can be drilled through the electrode. On the flat surface, a slot can be milled to connect the holes. The dielectric can then be forced through the holder and into all the flush holes.

Different settings should be used. Low amperage settings should be used at first to get the cut started. As the cut progresses, the amperage can be increased. The amperage can be reduced for better finish toward the end of the cut.

This is an excellent exercise to analyze flushing benefits and electrode wear. The flushing pressure will have to be adjusted to maintain cutting stability. The electrode should be measured for thickness before and after the cut. When the electrode makes contact with the workpiece, the indicator on the ram can be set to zero and the length of ram travel can be recorded. After the cut is completed, the depth of the cavity can be measured and compared to the travel recorded by use of the indicator on the ram. The thickness of the electrode after cutting is compared to the thickness before machining. This is a means of measuring electrode wear.

Through Hole Machining

An exercise in through hole machining involves cutting a hole completely through a workpiece. This can be done with or without a pre-drilled hole in the workpiece. If there is no hole already in the workpiece, centerflow pressure should be used. With a hole in the workpiece, vacuum flush should be used.

A split workpiece can be used for this project. A workpiece 6" x 3" x 1" can be cut lengthwise. The two sawed edges are then ground. Holes are drilled to allow bolts to pass through the two sections. The two sections, ground sides together, are bolted tight.

Holes can then be drilled in the workpiece at intervals for different cuts. A space can be left for machining a hole through the solid workpiece. Round or square electrodes can be used. Different settings and different polarities can be used. When the machining is completed, the sections can be taken apart. The surface finishes can then be checked, and the taper of the holes can be measured. This exercise will take some time to complete if fine finishes are desired. A coolant riser (see Glossary) should be used for vacuum flushing.

Comparison of Brass, Copper and Graphite Electrodes

In this exercise, three different electrodes are used on the same workpiece. The electrodes should be the same size with the same method of flush used. By using different workpiece materials, data can be analyzed to see which material is cut best with brass, copper, or graphite. Machining parameters should state which considerations are most important - the overcut, the metal removal rate, the wear, or the surface finish. The settings will vary with the different electrodes. The depth of cut could be held, and the times to cut the depths could be compared. Or a time limit could be set and the depths obtained compared. Through hole machining in this exercise could take too much time unless thin workpieces are used. Electrodes can be measured for wear and compared. In this exercise, data should be carefully compiled.

Examples

The following projects and set ups are some that have been

accomplished at Mid-Central Area Vocational School in Elwood. The main objective of these exercises was to show what can be done on the EDM machine in addition to the more common exercises.

The picture in Figure XXIV. on page 73 shows a set up for machining in the horizontal position. The graphite electrode has been bolted to the holder. On the face of the electrode, the letters VICA (backwards) have been cut on a duplicating machine. (Note: The letters have been highlighted for better visibility.) The EDM machine used did not have automatic servo feed on the worktable. Therefore, the electrode had to be fed into the work by hand. The cut had to be monitored by watching the sparking action. When the electrode touched the workpiece, the sparking stopped and the electrode had to be backed up and restarted. There was no flushing method used. The horizontal position allowed the particles to drop from the machining gap. This exercise showed that electrodes could be bolted to a holder, horizontal machining could be accomplished, and detail work could be done.

The picture in Figure XXV. on page 73 shows that carbide can be machined using a brass electrode. Brass is the usual selection for carbide; however, some companies are now producing a type of graphite for machining carbide. The brass electrode wore considerably during this exercise. (Notice on page 22 the relatively low melting point of brass.)

The electrode holder shown in Figure XXVI. on page 73 was used to machine a blind hole in the upward direction. An adult student wanted to machine a 1/2" square hole in the end of a long ratchet breaker bar.

Figure XXIV.

This set-up was used to illustrate EDM machining in the horizontal plane and detail work. The electrode is bolted to a homemade tool holder.

Figure XXV.

A brass electrode has been used to EDM a hole through a carbide insert. Centerflow was used to keep the gap free of particles.

Figure XXVI.

This homemade fixture was used to machine holes upward. This set-up is used for work-pieces that are too long to set up in the normal position.

The breaker bar was too long to set up to machine in the downward position or in the horizontal position. The machine used has the capability of cutting upward; some machines may not have this capability. The set up was the most difficult part of the project. The electrode and holder were made with a centerflow hole for flushing. A 1/2" hole was drilled in the end of the breaker bar on the lathe. This left the square corners to be cut. The hole was cut to a depth of 3/4" in approximately ten minutes.

The same electrode holder was used with a round electrode to cut out a broken dowel pin from a long bar used on a sheet metal brake.

EDM GLOSSARY

ACCURACY: Exactness or precision: EDM is capable of accuracies comparable to conventional machining. Electrical and hydraulic control systems used in EDM machines are extremely sensitive and capable of high degrees of accuracy.

AMPERAGE: The force of electrical energy used in EDM. It can be compared to horsepower in conventional machining. The higher the amperage, the greater metal removing potential.

AMPERE: Unit of electrical current.

ARC GAP: Same as machining gap and spark gap: the distance between the electrode and the work where spark discharging occurs. This distance can be controlled by the predetermined setting of amperage and voltage. (See illustration on page 18.)

AUTOMATIC CYCLING: An attachment which allows for automatic retraction and reentry of the electrode. The purpose of this retraction is to allow flushing to wash the expanded gap free of particles to facilitate more stable machining.

BREAKING THROUGH: This occurs when one corner or one side of the electrode is lower than the rest. The poor flushing condition which results slows down the cutting action.

BURNING: Sometimes used to mean cutting a hole: sometimes burning refers to "DC arcing". Under poor flushing conditions, carbon is allowed to build up on the surface of the work and the electrode. This carboning has poor electrical qualities: consequently, poor monitoring or sensing results. As the machining is allowed to continue under these adverse conditions, a compounding of carbon build-up results. In addition to building up, a burning or cavitating takes place. The discharging takes place at the closest point between electrode and work. Because the burn starts with a deposit of carbon, with poor electrical characteristics, the subsequent discharges which deposit and burn rather than machine always occurs in the same spot. The threat of such damage dictates that careful consideration must always be given to proper flushing and correct electrical settings for each job.

CAPACITORS: This is a storage component which is charged by the electrical pulses from the power supply. When fully charged, they discharge energy at the gap. Proper use of capacitors results in a near balance between the pulse frequency of the power supply and the discharge frequency at the gap. Too high a capacity value results in reduced frequency and greater energy per discharge. Too low a capacitance value results in a spill over of pulse current which causes unstable machining.

CENTER FLOW: Dielectric fluid flowing through the electrode or workpiece through the machining gap.

CONTAMINATION: When sustained machining is performed with a loaded filter, or a by-passed filter, particles remain suspended in the dielectric. This suspension of particles is referred to as contamination. The extent of contamination depends on how much machining has been performed without adequate filtering and what rate of machining has been performed.

COLLET: A device used to hold round shank electrodes in place.

COOLANT FLUSHING: Wherever possible, dielectric fluid should be circulated through the arc gap. This circulation can be induced through several methods:

a. Pumped under pressure. Introduced through holes in the electrode or hole in the workpiece.
b. Suction or vacuum. Evacuated through same type holes as pressure is induced.
c. Pulsing through vibration. A perpendicular pulsing motion keeps particles in suspension and tends to pump the particles up and out of the arc gap.
d. An intense jet of dielectric fluid directed in a plane most likely to create a wash between the electrode and work is a last resort method of flushing. Care should be taken not to create any deflection to the electrode with a high pressure stream of this nature.

COOLANT RISER: A box construction with several considerations but no fixed design. Those shops engaged in through hole machining tend to build the riser higher to allow for over travel of the electrode. They also design replacement top plates to allow for over travel of different size and quantities of electrodes. On the other hand, those engaged in sinking cavities tend to build the riser lower and with many tapped holes on the top plate. The tapped holes double for anchoring holes and reverse flushing holes. When the tapped holes are not in use, they are plugged with set screws to produce a pressure tight riser.

Page 81 was retyped at The Center for Vocational Education.

CUT-TO-WEAR: The ratio of the amount of workpiece material removed to the amount of electrode material consumed, usually measured in terms of volume or length.

DETRITUS: Metal and electrode particles which are the result of the cutting action. Also called swarf.

DIELECTRIC FLUID: A dielectric of determinable strength which must be present between the electrode and the work. The importance of the dielectric in the gap is:

a. Offers a resistance at the arc gap which can be monitored for control of positioning the electrode to the work.
b. Offers cooling effects to the highly elevated temperatures of minute areas on the work surface and the dislodged molten particles in the arc gap.
c. Flushes particles from the arc gap allowing the electrode to be servo advanced to proper proximity for additional machining to take place.

DIELECTRIC STRENGTH: The term used to designate the potential needed to break down a gap filled with a dielectric fluid.

DIGGING IN: This occurs when one corner, or one side, of the electrode is lower than the rest of the electrode or a portion of the workpiece is higher than the rest. The sparks occur at this lowest point and cause uneven cutting and poor flushing conditions.

DISCHARGE: The spark that occurs between the electrode and the workpiece.

DISCHARGE VOLTAGE: The voltage established by the electrode-workpiece combination during the on-time of the machining pulse.

DUTY CYCLE: This refers to the measure of time the current is turned on relative to the time the current is off during one pulse cycle. The greater the length of time the current is on, the greater the metal removal. Some EDM manufacturers consider the on-time plus the off time as the duty cycle.

E. D. M.: Abbreviation for Electrical Discharge Machining. Electrical Discharge Machining is a process for shaping electro-conductive materials through erosion produced by a series of spark discharges. Because it is an eroding process, practically any shape can be produced without distorting the workpiece. Because it is accomplished by spark discharging, any electro-conductive material can be machined with relatively equal ease.

ELECTRODE: Commonly referred to as the tool in EDM. The electrode has a primary requirement: it must be an electrical conductor. There are three basic types:

a. Two dimensional used for through opening machining.
b. Three dimensional used for machining cavities to shapes opposite that of the electrode.
c. Rotation cylindrical electrodes used to simulate grinding. This type of electrode is used in a modified surface grinder or an EDM machine with table servo and rotating spindle.

ELECTRODE ALIGNMENT: In keeping with overcut and taper, alignment should be controlled. Due to the fact that theremust always be an arc gap in order to allow electrical discharging, it becomes apparent that there are no forces to align the tool. Unlike a reamer following a predrilled hole, the electrode always creates its own opening. If an electrode is not perpendicular, during a plunge cut, an elliptical hole will result. In the case of a rotating plunge cut, an oversized and excessively tapered hole will result. This lack of self aligning compounds the possible error when you consider the inaccuracy of the machine, the electrode holder, and the electrode itself. Care in accurate set up cannot be over stressed.

ELECTRONIC ENVELOPE: Also called overcut; the clearance between the electrode and the workpiece. The electronic envelope follows the shape of the electrode. It is dependent on the machining parameters and not the size or shape of the electrode. (See illustration on page 30.)

FINISH, SURFACE: Refers to surface roughness of the workpiece after EDM machining. Usually measured in micro-inches RMS. See also surface finish.

FINISH CUT: The last machining cut removing a small amount of material at a comparatively low pulse energy.

FINISH ELECTRODE: That electrode which is made precisely a predetermined amount undersize based on overcut. This electrode produces a precise opening to a predetermined size and surface finish. The accuracy of an EDM opening depends on the accuracy and detail produced by the manufacture of this tool. Any inaccuracy produced in this tool will be precisely reproduced in the EDM opening. The accuracy of the EDM opening is based on controlled electrode manufacture, alignment of electrode, location of electrode, and proper electrical settings of EDM equipment.

FILTERING: Various types of filtering are employed in EDM. Most common are paper or cloth elements. The purpose is to eliminate

excessive contamination and remove particles from the dielectric which are larger than the arc gap. The filtering of dielectric is most critical during finishing operations which dictate close gap conditions.

FREQUENCY: The number of pulses as referred to in electrical discharging. Frequency affects surface finish when machining current on the meter remains constant and the frequency of discharge increases or decreases. The higher the discharge frequency at a given amperage improves the surface finish. This indicates that a given amount of work can be performed most efficiently at the highest usable amperage and the maximum frequency capable of machining at that amperage. Frequency of cycles vary from 400 cycles to 2,000,000 cycles per second, depending on type of circuit. (See illustration on page 32.)

GAP, MACHINING: The space between the electrode and the workpiece. It is not the same as overcut. (See illustration on page 18.)

GAP CABLES: The wires which conduct the machining power from the power supply to the machining gap.

GAP CURRENT: The current flowing in the machining gap.

HERTZ: Unit of frequency-in cycles per second.

INDUCTANCE: A property of a circuit tending to oppose changes in current flow through the circuit.

IONIZATION: That electrically charged area in the arc gap which has been changed from a dielectric area to high conductive path. This area is always at the closest point between the electrode and the work in a clean gap condition, or that area which is sufficiently contaminated to constitute closer gap condition, causing a stepping condition between electrode and work. (See illustration on page 18.)

IONIZATION TIME: The length of time the voltage is impressed across a gap before ionization occurs.

IONIZATION VOLTAGE: The voltage level at which the spark discharge initiates.

KILOHERTZ: One thousand Hertz; one thousand cycles per second.

LOW WEAR: Process in which the volume electrode wear is between 2% and 15%. This fills the gap between no-wear and normal negative polarity wear ratios.

MACHINING PULSE: A pulse delivered to the gap that results in an electrical discharge.

MEAN OVERCUT: The average between top and bottom overcut. The midpoint overcut in a workpiece not over one inch thick.

MICROFARAD: A measure of capacitance value as inches are to length.

MISS: A pulse delivered to the gap that does not result in a machining pulse because the gap spacing is too wide to initiate a discharge. The pulse exhibits voltage but no current, hence no energy and no machining.

NEGATIVE ELECTRODE: When the black gap lead (-) is attached to the platen or electrode, and the gap plug symbols are matched, the operation is with negative electrode. Sometimes referred to as standard polarity. Turning the gap plug to mismatch the symbols will change conditions to positive electrode. (See illustration on page 24.)

NO-WEAR: Process in which electrode wear is virtually eliminated and the cut-to-wear ratio reaches exceedingly high values. Usually considered to be less than 1% electrode wear by volume.

OFF-TIME: The time interval between pulses.

ON-TIME: The time duration of a pulse.

OVERCUT: The space between the perpendicular wall of an electrode and the side wall of an EDM machined opening. This space is controllable and is varied by amperage, voltage, and frequency. Through proper control, techniques of manufacturing precise tooling can be facilitated. Overcut refers to one side. (See illustration on page 29.)

PARAMETERS: In EDM, this term refers to all the criteria considered for machining, such as overcut, metal removal rate, surface desired, electrode wear, and machine settings.

PARTICLE: The chips in EDM are referred to as particles. These particles are spherical in appearance. It has been detected, through photo-micrographs, that on occasion these spheres are hollow. They vary in size depending on machining energy. (See illustration on page 19.)

PEAK CURRENT: The maximum value of current imposed during a machining pulse.

POLAR FLUIDS: Fluids miscible with water; fluids that can be mixed with water.

POLARITY: There are two polarities commonly referred to as "Normal" or "Standard" and "Reverse":

a. Normal polarity is where the electrode is negative and the work positive. On the vacuum tube power supply, normal polarity is used in conjunction with capacitors across the gap. There are a few electrode-work combinations which require reverse polarity for stable machining capabilities, but these are the exceptions.

b. Reverse polarity is used where excessive wear to metallic electrodes is required. Example: Where the production of an electrode to the reverse shape is required. Reverse polarity is also used on low frequency taps when using graphite as an electrode. No capacitors are used in this situation. The advantage is approximately 50% improvement in positive wear. With the newer circuit developments, this improvement can be reduced to under 1% wear. (See illustration on page 24.)

POSITIVE ELECTRODE: When the red gap lead (+) is attached to the platen or electrode, and the gap plug symbols are matched, the operation is with positive electrode. Sometimes referred to as reverse polarity. Turning the gap plug to mismatch the symbols will change conditions to negative electrode. (See illustration on page 24.)

PRESSURE FLOW: Positive pressure created by a pump to cause a flow of dielectric through an opening in the electrode or workpiece. Reads in pounds per square inch (p. s. i.).

PULSE: The signal supplied to the gap to become a machining pulse.

PULSE ENERGY: The energy in a machining pulse which is proportional to the value of the peak current and the time duration of the pulse (on-time).

PULSE WIDTH: More correctly called pulse duration. It is the time interval of the pulse on-time.

RATE, METAL REMOVAL: The amount of the workpiece that is removed in a given length of time. Usually stated in cubic inches per hour.

REPETITION RATE: The frequency or the number of pulses per second. Measured in Hertz. (See illustration on page 32.)

ROUGH CUT: A machining operation with high metal removal rates at rougher finishes.

ROUGHING ELECTRODE: The electrode which is used to remove the bulk of the material. The roughing electrode is made a predetermined amount undersize dictated by overcut and surface affected material which will be removed by the finish electrode.

SENSITIVITY CONTROLS: Variable controls located on the machine control panel. Their function is to adjust the gain of the servo amplifier, which in turn will determine the speed with which the servo reacts. (Cincinnati machines)

SERVO FEED: Is a compensating feed. The mechanism, on up-to-date equipment, consists of a hydraulic pump and reservoir, hydraulic cylinder, and an electro-hydraulic servo valve.

SERVO SYSTEM: The automatic control of the ram or table feed by the use of a reference signal. The servo voltage is compared to a reference voltage, and amplified signals are used to operate the servo drive mechanism.

SHORT: A condition when contact is made because of a particle bridging the gap, or when the electrode is making contact with the workpiece preventing the initiation of a discharge.

SOLID ELECTRODE: An electrode with no center flow holes or slots for flow.

SPARK-IN: This is a method of picking up location. The power supply is set to the highest frequency and lowest cutting current settings with no capacitance across the gap. The electrode is then advanced toward the work until it retracts. This tells you that you have reached the proper proximity of electrode to work. Location is made mechanically from this point. In the case of picking up an existing hole, the same steps are followed except that the electrode will settle in the existing hole.

When it settles at the deepest point, you are on location. Some people prefer to use a continuity light to accomplish the same purpose. With a light you can use precision measuring equipment, such as a depth micrometer in conjunction.

SPLIT ELECTRODE: Two or more electrodes on one machine insulated from each other.

SURFACE FINISH: Surface finishes range from approximately 10 RMS to approximately 800 RMS. Looking back on the contributing

factors of surface finish, we see that amperage (metal removal rate) and frequency (number of discharges per a given time) are the biggest factors. It becomes apparent that the least metal removal per discharge results in the finest finish. The acceleration of metal removal then is achieved by the increased number of times we can discharge the minute particles. Because of minimum gap conditions and limitations on discharging appreciable current at high frequency, it becomes highly uneconomical to attempt machining to 10 RMS. The secret to effective EDM machining is the proper balance of quality (surface finish and detail) and speed. Attempting to produce a surface superior to that required is time consuming. The difference in time, required to perform subsequent operations to EDM, is usually insignificant. The combination of EDM and glass peening, vapor blast, or electro polishing many times makes the difference in a competitive situation.

SWARF: Metal and electrode particles which are the result of the cutting action. Also called detritus.

TAPER: In EDM there is an inherent taper. This taper can be minimized (.0002 per inch) by special techniques. It is caused by the washing of particles through the overcut. These particles serve as stepping stones for the current to flow through, thereby allowing machining on the side walls. If the dielectric is over contaminated or excessive material is left for EDM, the taper will increase. When accurate prediction is required, proper filtering and roughing out of the opening should be controlled.

VACUUM FLOW: Dielectric fluid drawn from the worktank through the electrode or workpiece by means of a vacuum.

VARIABLE VOLTAGE: Voltage is used to monitor the arc gap. Under condition where the arc gap is difficult to flush, increasing the voltage spreads the gap and consequently improves the flushing possibilities. The higher voltage has a greater striking force which also assists in a more stable cutting under adverse conditions. Variable voltage on most EDM equipment is an attachment and is only recommended where considerable blind cavity and deep slotting is performed.

VIBRATOR: An attachment which is capable of inducing vibration in a vertical motion at various amplitudes. Care should be taken to detect any linear motion from such an attachment because size will be affected proportionate to such motion.

VOLTAGE: Measurement of electric energy expressed in volts. Monitored to control the proximity of electrode to the work for efficient

spark discharge.

WEAR RATIO: Pertains to the relative wear of the electrode (the tool) versus the work. A condition where the electrode wears more than the work is a negative wear, or wear in the wrong direction. A condition where the work wears more rapidly than the electrode is called positive wear, or wear in the right direction. The biggest contributing factors to improve wearing capabilities of an electrode are high melting point and density. These factors also affect, in reverse, the machinability of the work, from a wear standpoint, plus one additional factor, tensil strength, such as is found in high heat resistant stainless materials.

WHITE LAYER: Remelt zone; heat affected zone; the outermost surface of an EDM machine surface. The white layer is a melted layer which is hardened during the process of cooling. It is, depending on the material, an extremely hard martensitic layer. There are usually apparent cracks in such a surface. This surface is undesirable where the part is subjected to vibratory loads or high fatigue failure. Some materials have tendencies of annealing. In any case, this surface effect is minimized with lower machining currents at higher frequencies. Stress relieving has proven beneficial where stress free surfaces are required.

WORKPIECE: That product you intend to machine by means of EDM. The primary requirement here also is that the material must be electro conductive.

Technical Information

on

Programming the

Cincinnati Model 141

EDM Machine

TECHNICAL INFORMATION SHEET

COURSE UNIT TITLE: Electrical Discharge Machining

TECHNICAL INFORMATION TITLE: Power Programming the Cincinnati Milacron Model 141 EDM

INTRODUCTION: The EDM process is fairly slow when compared to conventional machining processes, such as milling or turning. Often, however, the machining time of EDM can be decreased if the operator takes time to select the proper power setting established by research performed by the EDM manufacturer.

GENERAL OBJECTIVE: To provide the student an opportunity to learn the procedure of power programming the Cincinnati Cinturjet 141 EDM for maximum machine efficiency desired.

TECHNICAL INFORMATION: When operating the EDM, the operator must decide the type of hole he is to machine by considering the following criteria:

1. How much overcut will be allowed,
2. What will be the metal removal rate,
3. The amount of electrode wear, and
4. The desired surface finish of the machined hole.

Often only one of the above mentioned factors will stand out to be the most important. For example:

> If you, as the operator, are given a job which must be done quickly and with little regard for surface finish, you would be primarily concerned with metal removal rate as the primary factor in selecting the power setting. Burning out a broken tap would be an example of this kind of power setting.

Once you have decided what factors are important to do the job, then refer to chart no. 1 on page 4 of this technical information unit.

You will note that the chart is divided into squares with numbers in each square. Each number and its position within the square represents the four factors which have already been mentioned. These factors again are:

BEST COPY AVA BEST COPY AVAILABLE

1. Overcut,
2. Metal Removal Rate,
3. Percent of Electrode Wear, and
4. Surface Finish.

To follow up with the preceding example which was concerned with high metal removal rate, the above block of information has been selected from Chart No. 1.

As you look at Chart No. 1, you will see that the information for the example is taken from the vertical column which has the number 12 at the top. This number 12 represents the peak current setting which is set by a switch located on the main power supply panel just to the right of the machine.

The left end of the horizontal column for this block of information has the symbol C1 which represents the range setting C and the "on time" setting 1 on the main control panel. However before setting this on the machine, you must take this C1 and turn to Table III on page 5 in this unit in order to find the correct setting. By looking at the vertical column, you will find the number 1. Therefore the "on time" setting for the machine is 30 microseconds.

Now proceed to find the "off time" setting by using the following formula:

$$\frac{\text{On Time}}{\text{On Time + Off Time}} = .6$$

SOLUTION:

$$\frac{30}{30 + X \text{ (off)}} = 6$$

$$\cancel{(30 + X)} \frac{30}{\cancel{30 + X}} = .6 \ (30 + X)$$

$$30 = 18.0 + .6X$$
$$30 - 18 = .6X$$
$$12 = .6X$$
$$20 = X$$

The solution is 20 microseconds.

This formula is used to find the Duty cycle. The .6 in this case means that the duty cycle will be 60%. Normal operations with negative electrodes require duty cycles ranging from 15 to 65% with an average of 50%.

No wear and low wear can be obtained by using certain electrode materials, such as graphite or copper. The work material is usually steel. Positive polarity must be used to the electrode and the duty cycle can be 90 to 95% when roughing and lowered to 50% for surface finishes of 85-100 RMS.

Having solved the equation, take the answer and go to Table III on page 5 and look in the vertical column for a matching number or the number nearest your answer. When you have found this, look across horizontally to the far left for the "off time" setting on the control panel.

Having followed this process you now have the power supply programmed for the desired results. Should you wish to use this program setting in the future, the following is the method used for specifying and recording settings which can be filed for easy reference:

Peak current switch setting 1-12
Range switch setting A B C D
On time 1-10
Graphite-Metallic switch G or M
Off time 1-10
Electrode polarity + or -

12 C 1 G 1 -

Variations on either side of the nominal ON-TIME settings shown are imperceptible in the finish area. In the roughing area, an increase or decrease in ON-TIME will result in a value between the two nearest nominals on the chart.*

For interpretation of chart data, see page 5-9.

TABLE III
ON-TIMES AND OFF-TIMES

This table shows the On-Times and Off-Times corresponding to the RANGE switch and ON-TIME and OFF-TIME settings. Example: Setting (3)12C1G1 will give an On-Time of 30 microseconds and an Off-Time of 20 microseconds.

On-Time or Off-Time Knob Setting	Time (in Microseconds)							
	Range A		Range B		Range C		Range D	
	On	Off	On	Off	On	Off	On	Off
1	.7	1.8	6	7	30	20	300	50
2	1.4	3.5	8	12	50	60	500	150
3	2.1	6.0	11.	18	80	110	800	400
4	2.6	8.5	15	24	120	170	1,200	610
5	3.3	11.0	18	29	150	230	1,500	820

APPENDIX B

Operation Sheet

for

Electrical Discharge Machining

a Through Hole on the

Cincinnati Model 141

OPERATION SHEET

OPERATION: Electrical Discharge Machining a through hole using a graphite electrode.

COURSE UNIT TITLE: Electrical Discharge Machining

INTRODUCTION: Several materials can be used for electrodes in Electrical Discharge Machining. This operation is concerned with using graphite because it is one of the more common and most economical electrode materials used in industry today.

TOOLS AND MATERIALS REQUIRED:

Adjustable wrench
Strap clamps
Threaded parallels, studs and nuts
3/8 inch diameter graphite electrode 4 inches long
Hardened steel workpiece

PROCEDURE:

Operation	Related Information
1. Clamp workpiece on parallels to workbase in EDM tank.	1. Take care that strap clamps are parallel to table and clear of area to be machined.
2. Select 3/8 collet and place in spindle, then insert graphite electrode and tighten collet.	2. The electrode must extend about 2" below collet.
3. Depress "Power on" button of control panel of the machine.	3. The "on" button of the main power supply must remain off.
4. Close drain valve at left side of tank and open fill valve at right side of tank.	4. Dielectric fluid must reach a level of at least 1/4 inch above the workpiece.
5. Turn switch on control panel of machine to rapid down until	5. Until you have acquired more experience it is recommended that

PROCEDURE:

Operation	Related Information
electrode is within 1/2" of workpiece, then switch to "stand by".	you "jog" the "rapid down" switch to "stand by" in order to avoid ramming the electrode into the workpiece.
6. Refer to Technical Information Sheet to program for power supply setting.	6. It is important to select proper power setting in order to assure best cutting action.
7. On control panel of machine, adjust the servo voltage, retract, and advance dials to a stationary setting of 5.	7. The recommended setting to begin a cut is 5. These can be adjusted later for better cutting efficiency.
8. Turn to main power supply and depress "power on" button.	8. Be sure that the "power on" light is on and other warning lights are off.
9. Place plastic guard on front of machine.	9. Machine will not operate without guard in place. (A built-in safety feature).
10. On control panel of machine, turn switch from "stand by" to "machine".	10. Watch for speed and direction of movement of electrode by observing indicator on the machine.
11. After cutting begins, go to main power supply and adjust "on time" and "off time" dials for stable cutting by observing voltage and amperage meters.	11. Stable cutting occurs when voltage registers between 50 and 60 volts, and current registers between 4 and 6 amps for 3/8 dia. electrode on this particular exercise.
12. Adjust micrometer stop above limit switch on machine to the thickness of workpiece plus .100".	12. The extra .100" is to allow for electrode wear. Going deeper will insure a straighter hole.
13. When electrode has passed through the hold and stopped, turn switch to "rapid up" on machine control panel.	13. Be sure the electrode has stopped cutting before raising the head.
14. Turn same switch to "stand by".	14. Tighten ram clamp to prevent ram from creeping downward.
15. Drain tank by opening valve on left side of tank.	15. Be sure tank is completely drained before removing door.
16. Check workpiece.	16. Be sure power is off.

TITLE: ENGLISH ON THE JOB. ANH NGU TRONG CONG VIEC. LEVEL I.

DESCRIPTOR: *ENGLISH (SECOND LANGUAGE); *INDOCHINESE; *CAREER EDUCATION; *VOCATIONAL EDUCATION; *CURRICULUM GUIDES

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 93P.; RELATED DOCUMENTS VT 103 232 THROUGH VT 103 234 IN THIS ISSUE.

ABSTRACT: THIS CURRICULUM GUIDE IS PART OF A THREE-VOLUME SERIES DEVELOPED TO PROVIDE INDOCHINESE STUDENTS WITH LANGUAGE SKILLS NEEDED IN THE WORLD OF WORK. THESE GUIDES ARE INTENDED FOR USE IN CLASSES OF ENGLISH AS A SECOND LANGUAGE. THE LESSONS PROVIDE AN OVERVIEW OF AVAILABLE VOCATIONAL PROGRAMS SO THAT STUDENTS INCREASE THEIR KNOWLEDGE OF CAREER OPPORTUNITIES AS THEY BECOME MORE PROFICIENT IN ENGLISH. THE LESSONS ARE DESIGNED TO INTRODUCE STUDENTS TO VOCATIONAL PROGRAMS IN WHICH THEY CAN BE SUCCESSFUL WITH VARYING DEGREES OF ENGLISH SKILL, WITH THE PROGRAMS THAT REQUIRE THE LEAST SKILL INTRODUCED AT LEVEL I. THIS LEVEL I GUIDE CONTAINS LESSONS ON FOOD PREPARATION, NURSING ASSISTANT, SAFETY, WELDING, MAINTENANCE, GENERAL FACTORY, MACHINE OPERATOR, AND AGRICULTURE. EACH LESSON CONSISTS OF A VOCABULARY LIST WITH VIETNAMESE TRANSLATIONS OR EXPLANATIONS FOLLOWED BY A DIALOGUE PRINTED IN BOTH LANGUAGES WHICH FORMS THE BASIS FOR SUBSEQUENT DISCUSSIONS. INSTRUCTIONS ARE PRINTED IN BOTH ENGLISH AND VIETNAMESE. THE READING CONTAINED IN EACH LESSON PROVIDES FURTHER INFORMATION CONCERNING THE VOCATIONAL PROGRAM DISCUSSED IN THE LESSON. A FINAL SECTION INCLUDES SUGGESTIONS FOR DISCUSSION TOPICS, OUTSIDE ACTIVITIES, AND ADDITIONAL PRACTICE. (NJ)

ANH NGỮ TRONG CÔNG VIỆC

Lời Tựa

Văn Phòng Trợ Giúp Định Cư Wisconsin đã soạn tài liệu này để dùng cho các lớp dạy tiếng Anh như một ngoại ngữ (ESL) trong một chương trình đặc biệt được Uỷ Ban Giáo Dục, Chuyên Nghiệp và Kỹ Thuật Tráng Niên Wisconsin tài trợ. Việc soạn thảo và thực hiện chương trình đã được Cơ Quan Đặc Trách Người Tị Nạn Đông Dương South Carolina và Đài Phát Thanh WHA giúp đỡ. Những bài học này được thâu thập từ những tài liệu giảng dạy của Uỷ Ban Giáo Dục với sự cộng tác của các trường chuyên nghiệp quận.

Những bài này được soạn ra với mục đích để giúp các học viên Đông Dương làm quen với ngôn ngữ đặc biệt dùng trong các công việc chuyên môn và hiểu biết tổng quát những chương trình chuyên nghiệp sẵn có. Khi dùng tài liệu này học viên sẽ biết thêm về nghề mà mình muốn học đồng thời cũng sẽ học thêm Anh ngữ.

Chương trình này được thực hiện để giúp các học viên có trình độ Anh ngữ khác nhau, thích hợp với trình độ của từng cá nhân; những phần ít đòi hỏi Anh ngữ được trình bày ở Trình Độ I. Một số bài như 'Health' và 'Food Preparation' sẽ giúp cho học viên mở mang tầm hiểu biết.

Các giảng viên sẽ bổ túc các bài học với những buổi hội thảo, chiếu phim, các tài liệu liên hệ, thuyết trình, thăm viếng các phòng thực tập và các cơ xưởng kỹ nghệ. Trong một vài trường hợp, "công việc mẫu" (work sample) có sẵn tại các trường chuyên nghiệp có thể được dùng như một kinh nghiệm sẵn có.

Giảng viên cũng nên dùng cuốn "Indochinese Refugee Education Guides" do Trung Tâm Ngôn Ngữ Học Ứng Dụng soạn. Những tài liệu này nói rõ những khó khăn đặc biệt mà học viên Việt Nam sẽ gặp phải khi học Anh ngữ và cũng cho nhiều thí dụ rất hay trong cách tập phát âm.

ENGLISH ON THE JOB

Introduction

The materials in this series of lessons have been developed by the Wisconsin Resettlement Assistance Office for use in English as a Second Language classes under a special project funded by the Wisconsin Board of Vocational, Technical and Adult Education. They were developed and produced with the assistance of the South Carolina Indochina Refugee Agency and WHA radio. The written texts are based upon materials originally developed by the State Board in cooperation with its districts.

The texts are designed to provide Indochinese students with language skills needed in the world of work, along with an overview of available vocational diploma programs. Students using these materials will increase their knowledge of career opportunities as they become proficient in the use of English.

An effort has been made to introduce students to programs in which they could be successful with varying degrees of English skill, with those programs requiring the least skill being introduced at Level I. In some instances, notably Health and Food Preparation, there are opportunities for a wide range of proficiency. These units were prepared on all three levels.

It is expected that teachers will supplement these units through discussion, films or film strips, related materials, resource speakers, visits to labs, and industrial tours. In some instances, the work samples available through vocational schools can be used as a "hands on" experience in the unit.

It is also highly recommended that the teacher make use of "Indochinese Refugee Education Guides" developed by the Center of Applied Linguistics. These materials illustrate the unique problems which the Vietnamese student will have in learning English and provide useful samples for use in phonic drills to improve pronunciation .

The vocational English texts and accompanying tapes have been designed to provide a maximum degree of flexibility for students and teachers. They may be used in a general ESL classroom for all foreign students, in a self-contained classroom for Vietnamese students, or in a tutorial program. Vietnamese students can use them on their own with minimal guidance. However, whenever possible, we recommend that these materials be supplemented by substantial amounts of spontaneous conversation.

Students with a fair degree of general English competency and an established career goal may wish to concentrate upon those lessons which deal with, or are related to, their vocational interests. They can thereby become familiar with many of the technical terms and jargon which are essential to every job, but which do not appear in many dictionaries and most ESL texts.

Những bài học Anh ngữ chuyên nghiệp kèm theo bằng ghi âm sẽ giúp cho sự giảng dạy trở nên linh động tối đa; có thể được dùng chung trong các lớp ESL cho các học viên ngoại quốc, trong một lớp dành riêng cho học viên Việt Nam, hay trong các chương trình dạy nghề. Học viên Việt Nam cũng có thể tự học bằng tài liệu này sau khi được hướng dẫn sơ qua. Tuy nhiên, nếu có thể, tài liệu này cần phải được bổ túc bằng các cuộc đối thoại tự nhiên.

Học viên với trình độ Anh ngữ trung bình và định theo một nghề nhất định có thể chăm chú vào những bài học liên quan đến môn chuyên nghiệp mình thích. Như vậy mới có thể quen thuộc với nhiều danh từ kỹ thuật và tiếng lóng rất cần thiết cho mọi nghề và những danh từ này không có trong các tự điển và trong các bài học ESL khác.

Trong mỗi bài học, học viên sẽ được hướng dẫn về cách đặt câu Anh ngữ, từ cách dùng động từ, cach bốt vần (Thể Tĩnh Lược), v.v. trong Trình Độ I cho đến cách dùng trạng từ và tĩnh từ trong Trình Độ III. Giảng viên sẽ bổ túc bài học bằng cách dùng bản ngữ vựng để đặt câu và thực tập đối thoại.

Mỗi bài gồm có bảng ngữ vựng với phần cắt nghĩa và dịch sang tiếng Việt. Nhiều danh từ kỹ thuật không có chữ tương đương bằng tiếng Việt, vì tân kỹ thuật học mới có tại Việt Nam lúc gần đây mà thôi, nên mỗi tiếng có câu cắt nghĩa vắn tắt. Phần lớn học viên Việt Nam quen dùng cách học thuộc lòng nên những bảng ngữ vựng này dài hơn những bảng trong các bài ESL khác. Nếu học viên không học hẳn một ngành riêng biệt nào thì số ngữ vựng chuyên nghiệp này có thể dùng để tham khảo hơn là phải học thuộc lòng.

Sau mỗi bảng ngữ vựng là một bài đối thoại dùng làm căn bản cho những bài tập và thảo luận.

Bài đối thoại cũng được dịch sang tiếng Việt , như vậy học viên có thể

With each unit is a structural English lesson ranging from verb usage and contractions, in Level I to the use of adverbs and adjectives in Level III. Teachers will supplement the unit by using the vocabulary list for sentence writing and conversation practice.

Each lesson contains a Vocabulary List with Vietnamese translations or explanations. Since modern technology has only recently been introduced in Viet Nam, many technical terms do not have Vietnamese equivalents and a brief explanation of the term has therefore been provided. Most Vietnamese students are used to a great deal of memorization, so lists are longer than would be expected in most American texts. If the student will not be active in a particular field, some of the technical vocabulary may be used as reference, rather than memorization material.

Following each vocabulary list is a Dialogue which forms the basis for subsequent exercises and discussions. This is printed in both English and Vietnamese so that the student may be completely confident in his or her understanding of the subject matter. However, students should use this and all other translated material only when necessary.

Each lesson contains several Exercises which expand upon the subject matter of the dialogue. Exercise instructions are printed in both English and Vietnamese. When necessary, Teachers' Notes and Students' notes have been included and are printed in italic. Teachers' Notes are printed only in English and Students' Notes are printed only in Vietnamese. These notes explain the grammatical differences between the two languages and will help both teachers and students cope with the special problems which Vietnamese students face when learning English.

The Reading contained in each lesson provides further information concerning the vocational program discussed in the lesson. Students should read it aloud and to themselves and discuss it in class. If a particular Reading presents comprehension problems, the student may turn to the back of the book where the Readings have each been printed in Vietnamese.

The final section in each lesson contains suggestions for discussion topics, outside activities and additional practice. Teachers may find it difficult to draw Indochinese students into classroom discussions. Vietnamese education is based upon the old European model of the student as a passive recipient of information . The student may therefore feel very uncomfortable when encouraged to question, discuss, challenge and argue with classmates and the teacher. Use discussions with other class members to demonstrate to Vietnamese students that this behavior is appropriate and expected, then gradually encourage Vietnamese students to participate in these conversations.

Each lesson has a corresponding tape which includes the Student Objective, Vocabulary, Dialogue, and Reading sections. The directions for each tape are

tin là đã hoàn toàn hiểu thấu bài học. Tuy nhiên, học viên chỉ nên dùng bài này và tất cả những tài liệu phiên dịch khác khi cần mà thôi.

Mỗi bài học sẽ gồm nhiều bài tập với mục đích giúp cho học viên quen cách đối thoại. Cách dẫn giải làm bài tập được in bằng cả tiếng Anh lẫn tiếng Việt. Khi cần, chú thích cho giảng viên và học viên được in bằng chữ nghiêng; chú thích cho giảng viên in bằng tiếng Anh và cho học viên thì bằng tiếng Việt. Những lời chú thích này cắt nghĩa những mẹo khác nhau của văn phạm giữa hai ngôn ngữ và sẽ giúp cho cả giảng viên cũng học viên biết cách tránh những khó khăn đặc biệt mà học viên Việt Nam sẽ gặp phải khi học Anh ngữ.

Bài tập đọc trong mỗi bài học giúp thêm những chi tiết liên quan đến chương trình chuyên nghiệp đã được nói đến trong bài học. Học viên cần phải đọc to lên và thảo luận về bài tập đọc đó. Nếu có một bài tập đọc nào đặc biệt khó hiểu học viên có thể xem phần dịch sang tiếng Việt in ở cuối cuốn sách.

Đoạn cuối của mỗi bài học có những đề nghị cho các đầu đề của cuộc thảo luận, thực tập thêm bên ngoài và những bài tập bổ túc. Giảng viên có thể gặp khó khăn khi muốn học viên Đông Dương tham dự vào các cuộc thảo luận: giáo dục tại Việt Nam theo phương pháp ngày xưa nên học sinh rất thụ động trong việc học hỏi. Học viên có thể cảm thấy bối rối khi được khuyến khích trả lời các câu hỏi, thảo luận, phản đối và bàn cãi với học viên cùng lớp hay với giảng viên. Giảng viên nên dùng những buổi thảo luận với các học viên để giúp cho học viên Việt Nam thấy đó là một hoạt động thích hợp trong các lớp học tại Hoa Kỳ và dần dần khuyến khích họ tham gia vào các cuộc đối thoại.

Mỗi bài học có kèm theo một cuốn bằng gồm có các phần Mục Tiêu của Học Viên, Ngữ Vựng và Tập Đọc. Những phần hướng dẫn đều được thâu bằng cả tiếng Anh lẫn tiếng Việt. Phần Ngữ Vựng và Đối Thoại chỉ có bằng tiếng Anh và

provided in both English and Vietnamese. The Vocabulary and Dialogues are in English only with pauses for student responses. These tapes allow the student to practice verbal comprehension and expression on his own. They may be stopped and replayed until the student is confident in his work. A native speaker should check the student's pronunciation frequently to insure that mistakes are not being repeated. Except for Lesson II-IX and Lesson III-VII (which must be rewound), each tape should be allowed to run its full length so that it will be at the beginning when turned over.

người đọc sẽ ngưng lại sau mỗi câu và mỗi chữ để học viên có thì giờ nhắc lại. Những cuốn băng này giúp cho học viên thực hành bằng cách tự đặt câu và bài kiểm. Học viên có thể cho băng ngưng và chạy lại cho đến khi nào hoàn toàn tin tưởng là mình đã hiểu thấu bài học. Giảng viên cần phải luôn luôn nghe lại cách phát âm của học viên để chắc chắn là họ không nhắc lại những lỗi đã phạm. Trừ bài học IX trong Trình Độ II và bài VII trong Trình Độ III (băng cần phải được quay lại vì chỉ thâu có một mặt) mỗi cuốn băng phải cho chạy hết để khi lật qua mặt bên kia, bài học kế tiếp sẽ bắt đầu.

TRÌNH ĐỘ I

CÁC CHƯƠNG TRÌNH HỌC CÁCH TIẾP ĐÃI KHÁCH

Các công việc dọn đồ ăn, một phần trong kỹ nghệ tiếp đãi khách, đang phát triển mạnh mẽ. Số người thích đi du lịch và ăn ở nhà hàng mỗi ngày một đông hơn. Dân số gia tăng, thành thị mở mang, tiền bạc dư dả để đi du lịch và ăn tại nhà hàng, tất cả những sự kiện đó đã giúp cho sự phát triển của kỹ nghệ tiếp đãi khách bành trướng.

Những người kém khả năng Anh ngữ có thể tìm công việc trong lãnh vực này. Huấn luyện về vệ sinh trong nhà bếp và giao tiếp với khách hàng có sẵn trong các trình độ trong chương trình về 'food preparation'* tại các trường kỹ thuật.

Bài học này cần được bổ túc bằng những cuộc đi thăm viếng các phòng thực tập 'food preparation'. Giảng viên của các phòng thực tập này có thể được mời đến để nói chuyện với học viên của cả lớp.

* *Food preparation: nói chung tất cả những nghề như nấu ăn, bề đồ ăn, dọn bàn, phụ bếp, rửa chén, v.v.*

LEVEL I

HOSPITALITY PROGRAMS

Food service jobs, part of the hospitality industry, are booming. Greater numbers of people are traveling and dining out. With increases in population, urban development, and more money available for trips and meals away from home, growth continues.

Individuals with limited skills in English are employable in the hospitality industry. Training in proper kitchen procedures, sanitation, and working with the public are available at various levels in the food service program at technical institutes.

This unit should be supplemented by visiting the food service labs. Teachers in the program could be invited to talk to the class.

TRÌNH ĐỘ I

BÀI I

FOOD PREPARATION*

I-A Mục Tiêu của Học Viên: dùng những ngữ vựng và những câu mẫu cần thiết trong công việc chộn sã lát.

I-B Ngữ Vựng:

1. đánh trứng
2. cục(dường), thái thành hình vuông
3. sắt lát mỏng
4. bằm, thái
5. trình bày cho đẹp
6. cắt thành từng khía (như tỉa cà rốt ngâm dồ chua)
7. xay nhỏ và chộn đều lên
8. cắt vụn, nhỏ
9. hòa tan ra
10. mài, xát thành bột
11. béo ngậy như kem
12. dồn
13. bị héo, úa
14. khô
15. ngon
16. ngon miệng
17. bay màu, mất màu sắc
18. điều kiện vệ sinh
19. tươi
20. chộn đều lên
21. rau trái
22. sốt để chộn sà lát
23. phần ăn
24. khuôn
25. cách nấu một món ăn
26. thực dồn
27. phép vệ sinh
28. dao để gọt vỏ
29. cái cân; cân
30. đo
31. trái bò
32. cái thớt
33. ướp lạnh

---

* *Food Preparation: noi chung tat ca nhunh nghe nhu nau an, phu bep, be do an, don ban, rua chen, v.v.*

LEVEL I

LESSON I

FOOD PREPARATION

I-A Student Objectives: The student will be able to understand and utilize the vocabulary and functional sentence patterns necessary in working as a salad girl.

I-B Vocabulary:

1. beat
2. cube
3. slice
4. chop
5. garnish
6. flute
7. blend
8. shred
9. dissolve
10. grate
11. creamy
12. crisp
13. wilted
14. dried
15. tasty
16. appetizing
17. discolored
18. sanitary
19. fresh
20. tossed
21. vegetables
22. dressing
23. portion
24. mold
25. recipe
26. menu
27. hygiene
28. peelers
29. weights
30. measures
31. avocado
32. cutting board
33. chill

I-C Bài Đối Thoại:

Mai: Thưa Ông tôi cần có việc làm.

Quản Lý Hãng Ăn: Cô muốn làm công việc gì?

Mai: Có lẽ tôi có thể làm trong nhà bếp.

Quản Lý: Cô có làm việc trong hãng ăn bao giờ chưa?

Mai: Dạ chưa, nhưng tôi muốn học.

Quản Lý: Có một việc làm trong nhà bếp: chuyên môn chộn sã lát.

Mai: Ồ, thế tôi thích làm việc đó.

Quản Lý: Thế sáng mai cô có mặt tại đây lúc 9 giờ nhé.

Mai: Dạ, cám ơn Ông nhiều lắm.

I-D Bài Văn Phạm - Số nhiều.

Bài Tập 1: Hãy đổi những câu sau đây sang số nhiều:

Thí dụ: This is an orange — That is a lemon

Those are lemons

I-E Bài Văn Phạm - Thể Phủ Định.

Bài Tập 1: Hãy đổi những câu sau đây thành thể phủ định bằng cách thêm not vào đúng chỗ:

Thí dụ: The floor is dirty

The floor is not dirty

I-C Dialogue:

Mai:	I need a job.
Restaurant Manager:	What kind of job do you want?
Mai:	Perhaps I could work in the kitchen.
Restaurant Manager:	Have you worked in a restaurant before?
Mai:	No, but I would like to learn.
Restaurant Manager:	There is an opening for someone to work in the kitchen making salads.
Mai:	Oh, I would like to do that.
Restaurant Manager:	Be here tomorrow morning at 9 o'clock.
Mai:	Thank you very much.

I-D Grammatical Focus - Plurals

Teachers Note: Vietnamese nouns are invariant. Plurals are formed by adding an additional word such as several, three, many, etc. Vietnamese speakers may therefore tend to ignore plural endings.

Exercise I. Make the following sentences plural.

Examples:	This is an orange.	That is a lemon.
	These are oranges.	Those are lemons.

1. This is an orange.	1. That is a lemon.
2. This is an apple.	2. That is a peach.
3. This is a pineapple.	3. That is a strawberry.
4. This is a cherry.	4. That is an avocado.
5. This is a pear.	5. That is a banana.

I-E Grammatical Focus - Negatives

Exercise I. Change the following sentences from positive to negative by adding not in the correct place.

1. The floor is dirty.

I-F Bài Văn Phạm - Hình thức của động từ.

Bài Tập 1: Hãy đổi những câu sau đây từ "I" (ngôi thứ nhất) sang "he" hay "she" (ngôi thứ ba): *(động từ theo sau đại danh từ ngôi thứ ba số ít bao giờ cũng thêm "s" hay "es")*

Thí dụ: I look

He looks, she looks

I-G Bài Văn Phạm - Cách viết tắt.

Bài tập 1: Hãy viết tắt những chữ sau đây:

Thí dụ: cup* ___c___

---

* *Xin xem bảng do lường của Mỹ ở cuối sách.*

2. The lettuce is wilted.

3. The carrots are crisp.

4. The salad dressing is creamy.

5. The tomatoes are discolored.

6. The refrigerator is cold.

7. The salad is tasty.

8. The kitchen is big.

9. The measuring cups are in the drawer.

10. The cutting board is on the table.

I-F Grammatical Focus - Verb Forms

Teachers Note: Vietnamese verbs are invariant. Students may therefore tend to ignore second person singular endings.

Exercise 1: Change the following sentences from I to he or she.

Examples:		
I look	she looks	he looks
I talk	she talks	he talks
I laugh	she laughs	he laughs

1. I peel the oranges.
2. I flute the cucumbers.
3. I slice the tomatoes.
4. I chill the melon.
5. I shred the cabbage.

1. I dice the apples.
2. I mold the gelatin.
3. I wash the utensils.
4. I wrap the lettuce.
5. I store the vegetables.

I-G Grammatical Focus - Abreviations

Exercise 1: Write the correct abbreviation for the following words.

1. cup
2. teaspoon
3. gallon
4. tablespoon
5. pint
6. quart
7. ounce
8. pound

I-H Bài Văn Phạm - Thể Nghi Vấn.

Bài Tập 1: Hãy đổi những câu sau đây sang thể nghi vấn bằng cách đổi lại thứ tự của chữ:

Thí dụ: Rose is wearing wearing a hairnet

Is Rose wearing a hairnet?

I-J Bài Tập Bổ Túc:

1. Hãy đọc đại ý của bài học:

Mai làm trong 1 hàng ăn. Đó là một hàng ăn lớn. Cô ta làm một người chọn sà lát. Mai chọn sà lát ở trong bếp. Nhà bếp cần phải sạch sẽ. Mai mặc đồng phục. Cô ta thích công việc đang làm.

Thảo luận bằng cách trả lời các câu hỏi:

1. Mai làm việc ở đâu?
2. Hàng ăn có lớn không?
3. Mai làm việc gì?
4. Nhà bếp có cần phải sạch sẽ không?
5. Mai ăn mặc thế nào?
6. Cô ta có thích công việc đó không?

2) Nói chuyện với người làm trong food preparation* để hỏi về các nhiệm vụ.

---

* *Food Preparation: nói chung tất cả các nghề như nấu ăn, dọn bàn, bê đồ ăn, phụ bếp, rửa chén, v.v.*

I-H Grammatical Focus - Questions

Exercise 1: Change the following sentences to questions by inverting the word order. (Present continuous tense.)

1. Rose is wearing a hairnet.

2. She is grating the carrots.

3. They are washing the lettuce now.

4. Mai and Rose are blending the ingredients.

5. He is making a waldorf salad.

I-I Reading:

Salad preparation is an art that can be learned. There are many kinds of salads. Some salads are made from fruit. Other salads are made from vegetables. There are also gelatin salads. Salads add zest to a meal. Learn all you can about this job.

I-J Additional Exercises:

1. Read the lesson theme:

   Mai works in a restaurant. It is a big restaurant. She works as a salad girl. Mai prepares salads in the kitchen. The kitchen must be very clean. Mai wears a uniform. She likes her job.

   Discussion questions:

   1. Where does Mai work?
   2. Is the restaurant big?
   3. What does Mai prepare?
   4. Must the kitchen be clean?
   5. What does Mai wear?
   6. Does she like her job?

2. Talk to someone who works in food preparation. Ask questions about the duties.

3. Visit a place where food is prepared such as a restaurant, cafeteria, hospital, school, hotel, or lunch counter. Explain your interest to the manager.

4. Go to the nearest state employment office and learn what jobs are available in your area.

3) Đi thăm một nơi sửa soạn thực phẩm như hãng ăn, cafeteria*, bệnh viện, trường học, khách sạn, hay quầy ăn trưa. Cắt nghĩa ý thích của bạn cho người quản lý nhà hàng biết.

4) Tới các Sở Tìm Việc gần nhất để xem có công việc nào có sẵn trong vùng bạn ở không.

Mấy câu có thể giúp ích...

Tôi thích...

Có những công việc gì có sẵn cho tôi?

Huấn luyện gì?

Bao nhiêu lâu?

Tôi có thể đi thăm?

Tôi muốn làm việc?

---

* *Cafeteria: Quán bán đồ giải khát, cà phê, bánh ngọt v.v.*

Structures that may be helpful in the situation:

I am interested in...
What jobs are available for me?
Is training...
How long...
May I visit...
I would like to work...

TRÌNH ĐỘ I

CÁC CHƯƠNG TRÌNH VỀ Y TẾ VÀ VỆ SINH

Các chương trình trong ngành y tế và vệ sinh đều được cấp chứng chỉ tại các trường kỹ thuật và được huấn luyện để săn sóc bệnh nhân trong các phòng nha khoa, phòng mạch, phòng thí nghiệm, trong phòng mổ hay trong bệnh viện.

Môn phụ tá điều dưỡng là một chương trình học 6 tuần và có cấp chứng chỉ. Nghề này thích hợp cho những người bình tĩnh, khỏe mạnh để thi hành công việc giao phó như các việc điều dưỡng thường nhật.

Học viên có thể đi thăm các khu điều dưỡng và bệnh viện. Giảng viên của Trường Cao Đẳng Điều Dưỡng có thể được mời đến thuyết trình.

LEVEL I

HEALTH PROGRAMS

The allied health programs are oriented toward assistance in patient care in the dental or medical office or laboratory, in the operating theater, or on the hospital ward.

The nursing asistant is a six-week diploma program for the person who is stable, healthy, able to adjust and work under supervision to perform a variety of routine tasks.

The students could visit the nursing labs and tour the hospital. Nursing faculty can be used as resource speakers.

TRÌNH ĐỘ I

BÀI II

PHỤ TÁ ĐIỀU DƯỠNG

II-A Mục Tiêu của Học Viên: hiểu và nhận rõ được các công việc và nhiệm vụ của người Phụ Tá Điều Dưỡng.

II-B Ngữ Vựng:

1. sức khỏe
2. bệnh viện
3. bệnh nhân
4. cuộc giải phẫu (mổ)
5. nhiệt độ
6. vệ sinh
7. căn bệnh
8. y sĩ
9. mạch
10. hãn thử biểu (ống cặp sốt)
11. thuộc về y học
12. biểu đồ để ghi nhiệt độ của bệnh nhân
13. khám bệnh, định bệnh
14. thi hành, làm

II-C Bài Đối Thoại:

Minh (Điều Dưỡng): Cô làm ơn săn sóc bệnh nhân này giúp tôi.

Anne (Phụ Tá Điều Dưỡng): Dạ, bà muốn tôi làm gì?

Minh: Bà ta cần phải được đếm mạch và ghi nhiệt độ.

Anne: Để tôi đi lấy hãn thử biểu.

Minh: Cô hãy ghi nhiệt độ trên biểu đồ nhé.

Anne: Tại sao bệnh nhân này lại nằm bệnh viện?

Minh: Bà ta sẽ được giải phẫu sáng nay.

---

* *Health có nghĩa tổng quát gồm tất cả các ngành về y khoa, giữ gìn sức khỏe, vệ sinh, v.v.*

Nursing Assistant là người giúp cho người Điều Dưỡng (y tá) trong các công việc săn sóc bệnh nhân như làm giường, thay quần áo, tắm, cho bệnh nhân ăn, đo mạch, cặp sốt, v.v.

LEVEL I

LESSON II

HEALTH CAREERS
NURSING ASSISTANT

II-A Student Objectives: The student will be able to understand and identify the functions and duties of a nursing assistant.

II-B Vocabulary:

1. health
2. hospital
3. patient
4. operation
5. temperature
6. hygiene
7. disease
8. physician
9. pulse
10. thermometer
11. medical
12. chart
13. diagnose
14. perform

II-C Dialogue:

Minh: Will you help me with this patient, please?
(Nurse)

Anne: What would you like me to do?
(Nursing Assistant)

Minh: She needs to have her temperature and pulse taken and recorded.

Anne: I will get the thermometer.

Minh: Write the temperature down on the chart.

Anne: Why is this patient in the hospital?

Minh: She is having an operation in the morning.

II-D Bài Văn Phạm - Số nhiều.

Bài Tập 1: Hãy đổi những danh từ trong những câu sau đây sang số nhiều bằng cách thêm "s":

Thí dụ: Help me with the patient

Help me with the patients

II-E Bài Văn Phạm - Thể Phủ Định.

Muốn đổi một câu từ Thể Xác Định sang Thể Phủ Định hãy thêm "not".

Bài Tập 1: Hãy đổi các câu sau đây sang Thể Phủ Định:

Thí dụ: The doctor is in.

The doctor is not in.

II-D Grammatical Focus - Plurals

Teacher's Note: Vietnamese nouns are invariant. Plurals are formed by adding an additional word such as several, three, many, etc. Vietnamese speakers may therefore tend to ignore plural endings.

Exercise 1: Change the noun to plural form by adding s.

Example: Singular - patient Plural - patients

1. Help me with the patient.
2. Operations are performed by a physician.
3. We will change the bed.
4. Write the temperature on the chart.
5. She dropped the thermometer.
6. Will you call the nurse?
7. The nurse helps the doctor.
8. Washing your hands helps to prevent disease.
9. Sick patients require good medicine.
10. The hospital must be clean.

II-E Grammatical Focus - Negatives

Exercise 1: Change the following sentences to negative form by adding the word not.

1. The doctor is in.
2. The patient can talk.
3. The nurse will help you.
4. I am a nursing assistant.
5. The patient does have a temperature.
6. The patient's pulse should be recorded.
7. You may make the bed now.

II-F Bài Văn Phạm - Thể Nghi Vấn.

Bài Tập 1: Hãy đổi những câu sau đây thành Thể Nghi Vấn bằng cách đổi lại thứ tự của chữ:

Thí dụ: The nursing assistant needs white shoes.

Does the nursing assistant need white shoes?

II-H Bài Tập Bổ Túc:

1. Hãy gọi phòng nhân viên của một bệnh viện và cho họ biết là bạn thích trở thành một người phụ tá điều dưỡng. Hỏi xem bạn cần phải được huấn luyện gì cho công việc đó.
2. Đi thăm phòng nhân viên của một bệnh viện và hỏi họ xem một người phụ tá điều dưỡng có những trách nhiệm gì?

8. I do want you to have the operation.

9. The hospital could help the patient.

10. The physicians have diagnosed the disease.

II-F Grammatical Focus - Questions

Exercise 1: Change the following sentences to questions by inverting the word order.

Example: The nursing assistant needs white shoes.
Does the nursing assistant need white shoes?

1. The doctor is in.

2. The patient is very sick.

3. The hospital is always clean.

4. The patient has got a temperature.

5. The patient must have an operation.

6. The medicine tastes good.

7. This thermometer is broken.

8. The patient's chart is missing.

9. This bed should be changed.

10. The patient is getting well.

II-G Reading

There are many different kinds of jobs available in a hospital. You should visit a hospital before you decide if you would like that kind of work. Ask some nursing assistants how they like the work. Find out how long the training program is, and how much the job pays before you decide on a career as a nursing assistant.

II-H Additional Exercises

1. Call a hospital employment office and tell them you are interested in becoming a nursing assistant. Ask what training you need for the job.

2. Visit a hospital employment office and ask them what duties are required of a nursing assistant.

3. Đi thăm một bệnh viện và yêu cầu được đi xem các phương tiện của bệnh viện để xem bạn có thích làm việc ở đó không.

Mấy câu căn bản có thể giúp ích cho cuộc đối thoại:

Có cần phải được huấn luyện để trở thành?

Bao nhiêu lâu?

Tôi có cần phải?

Tôi muốn làm việc...

Có nhiều công việc thích thú trong...

3. Visit a hospital and ask for a tour of the facilities to see if you would like to work there.

   Structures that may be useful in the situation:

   Is training required to become a ...
   How long...
   Do I need...
   I would like to work...
   There are many interesting jobs in...

TRÌNH ĐỘ I

CÁC NGÀNH LIÊN HỆ ĐẾN KỸ NGHỆ

Sự hiểu biết về an toàn rất cần thiết trong các công việc để bảo vệ cho chính mình và những người cùng làm việc với mình. Những khái niệm an toàn sẽ được trình bày cho học viên trong các lớp ESL* đầu tiên.

Nhiều học viên ESL ít hiểu biết về các loại công việc trong các ngành kỹ nghệ hiện sẵn có, và những tài năng mà mỗi việc đòi hỏi. Bốn loại công việc có ở Trình Độ I là: Hàn, Bảo Trì, General Factory*, và việc Điều Khiển Máy; những công việc này đều có cơ hội huấn luyện và có công việc làm cho những người kém khả năng Anh ngữ.

Những buổi giảng dạy lý thuyết cần được bổ túc bằng những cuộc đi thăm viếng các phòng thực tập, quan sát các lớp huấn nghệ và đi thăm các khu kỹ nghệ. Các đại diện của Urban League*, các giảng viên dạy về kỹ nghệ và các người có trách nhiệm trong giới kỹ nghệ có thể được mời đi thăm các lớp học và thảo luận về các loại công việc và các cơ hội thực tập.

---

* *ESL: học Anh ngữ như ngoại ngữ*

General Factory: nói chung tất cả các loại xưởng trong ngành kỹ nghệ

Urban League: là một hội tư có khế ước với chính phủ để giúp những người thiểu số được huấn nghệ và tìm công việc làm và là một hội rất có thế lực tại Hoa Kỳ.

LEVEL I

INDUSTRIAL RELATED

An awareness of good safety practices is needed in all types of industrial jobs for the protection of self and others. These concepts can be understood if presented early in ESL classes.

Many ESL students have a very limited knowledge of the variety of industrial jobs available and the skills each requires. The four included at Level I, Welding, Maintenance, General Factory, and Machine Operator, have both training and employment opportunities for those with limited ability in English.

The units should be supplemented with visits to the labs, observation of the classroom and industrial tours. Representatives of the Urban League, industrial teachers, or persons from industry could be invited to visit the class and discuss the types of jobs and training opportunities.

TRÌNH ĐỘ I

BÀI III

SỰ AN TOÀN

III-A <u>Mục Tiêu của Học Viên</u>: hiểu và nhận biết những chữ và những luật thông thường liên quan đến sự an toàn ở nhà và trong công việc.

III-B <u>Ngữ Vựng</u>:

1. khói
2. coi chừng
3. thận trọng
4. vào
5. tránh xa
6. chạy
7. di
8. an toàn
9. lửa
10. nóng
11. bảo vệ
12. tránh xa chỗ
13. ẩm ướt
14. bị cảm lạnh
15. giầy an toàn
16. hành lang
17. giầy điện bị mòn
18. bị cháy nắng
19. Sở Cứu Hỏa
20. bị dụng
21. dễ dễ bắt lửa

III-C <u>Bài Đối Thoại</u>:

Người Cai: Chúng tôi thấy là sự an toàn rất quan trọng trong công việc này.

Công nhân: Thưa Ông có những qui tắc đặc biệt nào mà tôi cần phải theo không?

LEVEL I

LESSON III

SAFETY

III-A Student Objective: The student will be able to understand and identify words and general rules related to safety in the home and on the job.

III-B Vocabulary:

1. smoke
2. beware
3. caution
4. enter
5. keep out
6. run
7. walk
8. safety
9. fire
10. hot
11. protective
12. away from
13. damp
14. to catch a cold
15. seat belts
16. aisles
17. frayed wires
18. sunburned
19. fire department
20. to be bumped
21. fire hazards

III-C Dialogue:

Supervisor: We feel that safety is important on this job.

Worker: Do you have special rules that I need to follow?

Người cai: Có. Anh sẽ thấy các qui tắc đặc biệt dán ở trên tường trong tất cả các khu làm việc.

Công nhân: Thưa Ông có khu nào đặc biệt được hút thuốc không?

Người cai: Chỉ được phép hút thuốc ở lounge* thôi. Cũng có những khu làm việc anh cần phải mang kiến an toàn.

Công nhân: Dạ, tôi có nhận thấy điều đó.

Người cai: Chúng tôi hãnh diện về việc giữ gìn an toàn của chúng tôi. Tôi hy vọng anh cũng sẽ hãnh diện vì điều đó.

III-D Bài Văn Phạm - Ngồi và để (hay đặt).

Ngồi thường có nghĩa là nghỉ ngơi, ở thế thẳng lên. Những thì chính của động từ "to sit" là: sit, sat, have sat, is sitting (ngồi đã ngồi, vừa ngồi, đang ngồi.)

Để có nghĩa là đặt hay để một vật gì xuống. Những thì chính của động từ "to set" là: set, set, have, is setting (đặt, đã đặt, vừa đặt, đang đặt.)

Bài Tập 1: Hãy kể động từ nào đúng, set hay sit, trong mỗi câu sau đây:

Thí dụ: He (sit, set) the gasoline away from the fire.
(Ông ta để xăng tránh xa lửa)
If you (sit, set) on the damp ground, you may catch a cold.
(Nếu anh ngồi trên mặt đất ẩm, anh có thể bị cảm)

---

* *Lounge: một phòng rộng dùng làm chỗ cho công nhân ngồi nghỉ, giải khát, hút thuốc, v.v. trong giờ nghỉ.*

Supervisor: Yes, we do. You will see them posted in all work areas.

Worker: Is there a special area for smoking?

Supervisor: Smoking is only allowed in the lounge area. There are also work areas where you must wear protective glasses.

Worker: Yes, I have noticed that.

Supervisor: We are proud of our safety record. I hope you will be proud of it also.

III-D Grammatical Focus - Sit and Set

Sit usually means to rest, to be in an upright or sitting position. (Principle parts or tenses: sit, sat, have sat, is sitting.) Set means to put or to place something. (Principle parts or tenses: set, set, have set, is setting.)

1. He (sit, set) the gasoline away from the fire.

2. If you (sit, set) on the damp ground, you may catch a cold.

3. Passengers (sitting, setting) with their seat belts fastened were not hurt in the accident.

4. The boxes have been (set, sat) out of the aisles for safety.

5. She is (sitting, setting) the light with the frayed wire on the table to be fixed.

6. He (sat, set) in the sun too long and is sunburned.

7. The telephone numbers for the doctor and fire department are (sitting, setting) near the telephone.

8. In what row were you (setting, sitting)?

9. He just (sat, set) and said nothing.

10. She remembered to (set, sit) the pans on the range with the handles away from the area where they could be bumped.

III-E Bài Văn Phạm - There are (có những) và they are (họ là).

("they are" có thể dùng thể tỉnh lược (bớt vần) trong câu chuyện thường hay thân mật: they're.)

Bài Tập 1: Hãy dùng đúng chữ "there are" hay "they're" trong mỗi câu sau đây:

Thí dụ: There are many safety rules.
(có nhiều luật lệ về sự an toàn)
They're careful to keep out of the dangerous areas.
(Họ cẩn thận tránh xa những nơi nguy hiểm)

III-F Bài Văn Phạm - Động Tự Bất Qui Tắc.

Thì quá khứ của động tự bất qui tắc không thêm "d" hoặc "ed" như động tự qui tắc. Chia các thì "past" của động tự bất qui tắc bằng cách đổi nguyên âm (vowel) hay không thay đổi gì cả.

Hãy xem những thí dụ sau đây:

Present	Past
swim	swam (bơi, lội)
write	wrote (viết)
hit	hit (đánh, đập)
do	did (làm)
drink	drank (uống)
get	got (được, mua)
forget	forgot (quên)

III-E Grammatical Focus - There Are and They're (they are)

Exercise 1: State whether "there are" or "they are" (they're) should be used in each sentence.

Examples: They're careful to keep out of the dangerous area.
There are many safety rules.

1. _____ many caution signs.
2. _____ fixing the broken stove.
3. _____ cleaning up the fire hazards.
4. _____ too many old papers near the furnace.
5. _____ fixing the frayed wires.
6. _____ many "caution" areas to beware of.
7. _____ too many hazards in that house.
8. _____ clearing the building of all fire hazards.
9. _____ to keep out of that area.
10. _____ in a no smoking area.

III-F Grammatical Focus - Irregular Verbs

Irregular verbs do not form their past by adding -d or -ed to the present form. They form the past be changing the vowel, or by making no change at all. Examples are given below:

Present	Past
swim	swam
write	wrote
hit	hit
do	did
drink	drank
freeze	froze
get	got
forget	forgot
go	went
run	ran
see	saw
set	set
sit	sat
take	took
wear	wore

Present	Past
go	went (đi)
run	ran (chạy)
see	saw (thấy)
set	set (để, đặt)
sit	sat (ngồi)
take	took (lấy)
wear	wore (mặc)

Bài Tập 1: Hãy viết đúng thì quá khứ của động từ trong những câu sau đây:

Thí dụ: Jack (fall) felt down the stairs yesterday.

Bài Tập 2: Hãy sửa đúng thì của mỗi câu sau đây khi cần:

Thí dụ: 1. correct

2. got

Teacher's Note: Vietnamese verbs are both invariant and limited. There are fewer tenses than in English and they are formed by the context of the sentence rather than verb modification.

Exercise 1: Write the sentence using the correct form of the verb in the past tense.

1. Jack (fall)_____down the stairs yesterday.
2. He got hurt because he (run)_____in the building.
3. Last week I (set)_____the gasoline away from the fire.
4. He (see)_____the DANGER sign.
5. She (take)_____the matches away from the baby.
6. The firemen (wear)_____protective clothing as they walked into the fire.
7. He (do)_____remember to smoke only in the smokers' room.
8. He (swim)_____in the water that was too deep.
9. She (forget)_____ to wear safety glasses.
10. Tom (wear)_____heavy gloves so his hands were not hurt.

Exercise 2: Write each sentence, correcting the verb tense when necessary.

1. I will set the hot greasy pan off the stove.
2. Yesterday I get special shoes with extra protection.
3. He sit by the rubbish fire to make sure it did not spread to the grass.
4. He needed the fire extinguisher but forget how to use it.
5. The child drank some of the cleaner and was taken to the hospital.
6. He left his rings at home so that his finger would not catch in the machine.
7. I seen many caution signs.
8. She write the safety rules on the paper.
9. He seen many safety violations.
10. She begin to clean up the gasoline-soaked rags and burn them.

III-H <u>Bài Tập Bổ Túc</u>:

1. Hãy thảo luận về những sự nguy hiểm bạn có thể gặp phải ở trong nhà và tìm cách nào để tránh.
2. Hãy liệt kê tất cả những đồ để bắt lửa ở trong nhà bạn.
3. Hãy kể một vài qui luật an toàn trong xưởng máy.

III-G Reading:

Safety is very important. It is important in your work and in your home. You must know the hazards and dangers so that you will not be hurt. Check your home for hazards and take time to remedy them.

III-H Additional Exercises

1. Discuss hazards you would find in the house and how to remedy them.

2. Make a list of all the fire hazards in your home.

3. What are some rules of safety in a factory?

TRÌNH ĐỘ I

BÀI IV

NGHỀ THỢ HÀN

IV-A Mục Tiêu của Học Viên: hiểu và nhận rõ được một số công việc, dụng cụ và các bộ phận của máy hàn.

IV-B Ngữ Vựng:

1. am pe
2. chảy hợp kim khi hàn
3. Để 2 miếng hàn giữa 2 điện cực và cho điện chạy qua một khoảng thời gian ngắn
4. cái biến điện
5. cực điện
6. máy hàn xì
7. máy hàn điện
8. một dụng cụ để đo đúng mối hàn sâu, rộng bao nhiêu
9. vẽ
10. hàn liền hai cạnh lại
11. đưa mỏ hàn qua lại nhiều lần
12. đưa mỏ hàn qua lại nhiều lần
13. hàn liền lại
14. biến đổi
15. làm cho dính liền với nhau
16. lắp (máy)
17. máy hàn xì
18. họa đồ
19. tìm kiếm
20. kính an toàn
21. mài
22. lối xếp đặt trước khi hàn
23. quan sát
24. một cách chính sác

IV-C Bài Đối Thoại:

Xuân (thợ hàn): Anh có biết nghĩa fuse hay pass trong nghề hàn không?

Sally (học viên): Không, tôi không biết. Hai chữ đó nghĩa là gì?

Xuân: Chúng ta hãy đi từng bước một: pass có nghĩa là chỉ lướt hay đi mỏ hàn vào vật anh định hàn một lần mà thôi.

Sally: Thế còn việc thứ hai là gì?

LEVEL I

LESSON IV

WELDING CAREER

IV-A Student Objective: The student will be able to understand and identify some of the functions, tools, and parts of a welder.

IV-B Vocabulary:

1. ampere
2. arc voltage
3. spot welding
4. transformer
5. polarity
6. gas torch
7. arc torch
8. arc angle
9. draw
10. fuse
11. weave
12. pass
13. weld
14. transform
15. bond
16. install
17. acetylene torch
18. blueprint
19. look up
20. goggles
21. grind off
22. layouts
23. look over
24. accurately

IV-C Dialogue:

Xuan (a welder): Do you know what it means to fuse or pass in welding?

Sally (a student): No, I don't, what are those two things?

Xuan: Let's take one step at a time: to pass is to make one single stroke over the object with your torch.

Sally: What is the second step?

Xuan: Fuse co nghia la dinh lien hai mep lai bang may han.

Sally: Co phai nhung viec han nay deu luon luon can den mo han phai khong?

Xuan: Dung the, cung co nhung viec khac nua, nhung hai viec nay quan trong nhat.

IV-D Bài Văn Phạm - Các thì của động từ.

Bài Tập 1: Hãy thêm "ing" vào các động tự sau đây. Những động tự tận cùng bằng "e" hãy bỏ "e" và thêm "ing."

Thí dụ: hold - holding use - using

Bài Tập 2:- Hãy đổi những động tự sau đây sang thì quá khứ:

Thí dụ: hold - held

Bài Tập 3: Hãy dùng những thì nào đúng (past hay present continuous) trong những câu sau đây: *(To Be + present participles thành present continuous: chỉ một hành động đang tiếp diễn.)*

Thí dụ: Sally fused the two pieces of metal.

Xuan: To fuse means to bond two edges with the torch.

Sally: Are these welding steps always done with a torch?

Xuan: Yes, there are other steps, but these two are the most important.

IV-D Grammatical Focus - Verb Tenses.

Teacher's Note: Vietnamese verbs are both invariant and limited. There are fewer tenses that in English and they are formed by the context of the sentence rather than verb modification.

Exercise 1: Add ing to the following verbs. On verbs that end with e drop the e and add ing:

Example: hold - holding use - using

1. inspect
2. draw
3. fuse
4. install
5. pass
6. weld
7. transform
8. bond
9. repair

Exercise 2: Change to past tense.

Example: hold - held

1. draw
2. fuse
3. install
4. pass
5. weld
6. transform
7. bond
8. inspect
9. repair

Exercise 3: Use the correct verb form (past or present continuous) in in the following sentences:

Example: Sally fused the two pieces of metal.

1. Sally (fuse)_____the two pieces of metal.
2. Xuan is (install)_____new welding equipment.
3. Xuan (bond)_____the two metal plates.

Bài Tập 4: Hãy tìm những chữ đồng nghĩa với các động tự sau dãy:

Thí dụ: Look over: inspect

IV-E Bài Văn Phạm - Thể Sác Định và Thể Phủ Định.

Bài Tập 1: Hãy đổi những câu sau dãy sang thể phủ định bằng cách thêm "not":

Thí dụ:	I can work	I will work
	I cannot work	I will not work

4. Xuan and Sally (weld)_____with gas torches.

5.& 6. Xuan and Sally (repair)_____the machinery by (pass)_____the torch over the crack.

7. (draw)_____the blueprints for the welders is a separate job.

8. Xuan and Sally (work)_____with arc or acetylene torches.

9. Sally (inspect)_____the weld for bead size.

10. The aluminum (fuse)_____ poorly.

Exercise 4: Find the meaning to match the verb:

Example: Look over: inspect

_____inspect	1. change
_____repair	2. go over
_____draw	3. form figures and designs
_____pass	4. job
_____weld	5. out of the way
_____transform	6. put in place
_____work	7. fuse
_____install	8. fix
	9. play
	10. look over

IV-E Grammatical Focus - Positives and Negatives.

Exercise 1: Change the following sentences to negative form by adding not.

Example: I can work. I will work.
I cannot work. I will not work.

1. The teacher is in.

2. The welding torches have arrived.

IV-F Bài Văn Phạm - Thể Nghi Vấn.

Bài Tập 1: Hãy đổi những câu sau đây thành thể nghi vấn bằng cách đổi lại thứ tự của chữ hay thêm "does":

Thí dụ: The welder needs a torch.

Does the welder need a torch?

("does" ở đây là trợ động từ)

The work is hard.

Is the work hard?

(muốn đổi 1 câu từ thể xác định sang thể nghi vấn (câu hỏi) thì ta đặt chủ từ (subject) sau trợ động từ hay động từ chính.)

3. The transformers are here.

4. I can arc weld very well.

5. He can weld very well.

6. The man can repair the pipes.

7. Sally will grind off the extra weld.

8. The welders will work today because the blueprints arrived.

9. Xuan will fill in the hole by welding.

10. Sally will construct the new machine.

IV-F Grammatical Focus - Questions.

Exercise 1: Change the following statements to questions by inverting the work order or adding a form of the word does:

Example: The welder needs a torch.
Does the welder need a torch?

The work is hard.
Is the work hard?

1. Blueprint reading is necessary for welders.

2. The good welder uses safety precautions.

3. Welders need to work accurately.

4. The battery acid is dangerous.

5. Welding is very specialized.

6. The welder's torch was hooked up to the gas tanks.

7. Safety is very important in welding.

8. Goggles and an apron are needed in welding to protect your eyes and clothes.

9. The welder needs very particular training.

IV-H Bài Tập Bổ Túc:

1. Hãy gọi tới trường kỹ thuật hay xưởng hãn và cho họ biết bạn thích trở thành người thợ hãn. Hỏi xem bạn cần phải thực tập những gì cho công việc đó.
2. Đi thăm một lớp dạy hãn và nói chuyện với người thợ hãn về những nhiệm vụ và trách nhiệm của họ.
3. Đi thăm một lớp dạy hãn và coi các sách giáo khoa và các dụng cụ dùng trong lớp học.

IV-G Reading:

The job of a welder can be very interesting but also very specialized. Welders construct and repair equipment, machinery, and parts by welding metal parts together according to layouts and blueprints. The two most common types of welding are arc and acetylene.

The demand for welders is expected to increase because of the wider use of welding processes. Repair and maintenance work in the metalworking industries will require more welders.

IV-H Additional Exercises:

1. Call a technical school or a welding company and tell them you are interested in becoming a welder. Ask what training you need for the job.

2. Visit a welding class and talk to a welder about the duties and responsibilities.

3. Visit a welding class and look at the textbooks and tools used in the class.

TRÌNH ĐỘ I

BÀI V

BẢO TRÌ

V-A Mục Tiêu của Học Viên: hiểu và nhận rõ được các công việc và phận sự của một công nhân bảo trì.

V-B Ngữ Vựng:

1. đánh bóng
2. lau sạch, sạch sẽ
3. thảm; lót thảm
4. bụi; lau bụi
5. chổi bằng vải hay sợi; lau bằng chổi vải (có nghĩa ẩm ướt)
6. hút bụi
7. đánh bóng
8. sì; đánh bóng bằng sì
9. bảo trì (giữ gìn phòng ốc)
10. kinh nghiệm
11. người cai
12. cái chổi
13. phòng lớn
14. sàn nhà
15. đồ đạc (bàn, ghế, tủ v.v.)
16. máy hút bụi
17. thuốc giặt tẩy
18. người học việc
19. tủ ở trong tường
20. nùi rẻ

V-C Bài Đối Thoại:

Ellen: Tôi muốn có một công việc trong lãnh vực bảo trì (giữ gìn phòng ốc)

Vị Cố Vấn ở Sở Tìm Việc: Cô có biết lau, rửa sàn nhà không?

Ellen: Dạ có, công việc tôi làm rất gọn gàng và sạch sẽ.

Vị Cố Vấn: Cô có biết cách hút bụi trên thảm không?

LEVEL I

LESSON V

MAINTENANCE

V-A Student Objective: The student will be able to understand and identify the functions and duties of a maintenance worker.

V-B Vocabulary:

1. buff
2. clean
3. carpet
4. dust
5. mop
6. vacuum
7. polish
8. wax
9. maintenance
10. experience
11. supervisor
12. broom
13. hall
14. floor
15. furniture
16. vacuum cleaner
17. detergent
18. trainee
19. closets
20. rag

V-C Dialogue: Different uses of the same word:

Ellen: I would like a job in the maintenance area.

Job Counselor: Do you know how to clean a floor?

Ellen: Yes, my work is very neat and clean.

Job Counselor: Have you ever done carpeting?

Ellen: Tôi đã dùng máy hút bụi hồi tôi làm ở văn phòng trong cao ốc. Nhưng phần lớn tôi lau quét các phòng lớn và lau bụi.

Vị Cố Vấn: Như vậy cô quen cách dùng chổi và lau bụi. Thế cô có đổ các thùng đựng rác nữa chứ?

Ellen: Dạ có, Ông xếp tôi cũng chỉ cả cách đánh xi sàn nhà nữa.

Vị Cố Vấn: Chắc cô biết cách đánh bóng và dùng xáp chứ?

Ellen: Thật ra tôi không hay đánh bóng đồ đạc mà cứ 6 tháng chúng tôi chỉ đánh si sàn nhà thôi. Tôi cũng biết cách xử dụng máy đánh bóng để làm cho sàn nhà bóng.

Vị Cố Vấn: Vì cô đã có kinh nghiệm về hút bụi, lau nhà, lau bụi, đánh xi bóng và chà bóng, tôi nghĩ là người ta sẽ thích mượn một công nhân có kinh nghiệm như cô. Để coi xem có công việc nào sẵn không.

V-D <u>Bài Văn Phạm - Các thì của động từ.</u>

<u>Thí dụ</u>: A maintenance worker <u>is cleaning</u> the bathrooms (present con continuous)

(người công n hân bảo trì phòng ốc đang lau chùi nhà tắm)

A maintenance worker <u>cleaned</u> the bathrooms (past tense)

(người công nhân bảo trì phòng ốc đã lau chùi nhà tắm)

A maintenance worker <u>will clean</u> the bathrooms (future tense)

(người công nhân bảo trì phòng ốc sẽ lau chùi nhà tắm)

Cô ta <u>đang hút bụi</u> tấm thảm.

Cô ta <u>đã hút bụi</u> tấm thảm

Cô ta <u>sẽ hút bụi</u> tấm thảm

Ellen: Yes, I have used a vacuum cleaner when I worked in an office building. But I worked mostly on mopping the halls and dusting.

Job Counselor: Then you are familiar with using a mop and removing dust. Did you empty wastebaskets also?

Ellen: Yes, and my supervisor taught me how to wax floors as well.

Job Counselor: You must know about using polish and wax too?

Ellen: I really didn't polish furniture too much and we only waxed floors about every six months. I also know how to operate a floor buffer to make them shine.

Job Counselor: Since you have had experience at vacuuming, mopping, dusting, waxing and buffing, I would think that many employers would be interested in hiring an experienced maintenance worker like yourself. Let's see what openings are available.

V-D Grammatical Focus - Verb Tenses.

Teacher's Note: Vietnamese verbs are both invariant and limited. There are fewer tenses than in English and they are formed by the context of the sentence rather than verb modification.

Examples: A maintenance worker is cleaning the bathrooms. (present continuous)
A maintenance worker cleaned the bathrooms. (past)
A maintenance worker will clean the bathrooms. (future)

She is vacuuming the carpet.
She vacuumed the carpet.
She will vacuum the carpet.

Mary đang rửa, đánh xi và chà bóng sàn nhà

Mary đã rửa, đánh xi và chà bóng sàn nhà

Mary sẽ rửa, đánh xi và chà bóng sàn nhà

Có phải cô ấy đang lau bụi và đánh bóng bàn ghế không?

Cô ấy đã lau bụi và đánh bóng sàn nhà bàn ghế chưa?

Cô ấy có sẽ lau bụi và đánh bóng bàn ghế không?

Bài Tập 1: Hãy đổi những động từ trong các câu sau đây thành thì quá khứ:

Thí dụ: John is polishing the table tops

John polished the table tops

Bài Tập 2: Hãy đổi các động từ trong những câu sau đây sang thì tương lai bằng cách thêm will. Hãy dùng chữ gốc của động từ.

Thí dụ: Mary dusts all the clocks

Mary will dust all the clocks

V-E Bài Văn Phạm - Danh từ và động từ.

Bài Tập 1: Hãy đổi những danh từ có kẻ dưới thành động từ:

Thí dụ: He put the wax on the floor.

He waxed the floor.

Mary is washing, waxing, and buffing the floor.
Mary washed, waxed, and buffed the floor.
Mary will wash, wax, and buff the floor.

Is she dusting and polishing the furniture?
Has she dusted and polished the furniture?
Will she dust and polish the furniture?

Exercise 1: Change the following sentences to use past tense verb forms:

Example: John is polishing the table tops.
John polished the table tops.

1. John is polishing the table tops.

2. The supervisor will mop Rosa's floor for her.

3. Ngoc will vacuum her own carpet the same way.

4. Is Thuy washing the windows with the right detergent?

5. Who will clean the windows in that office?

Exercise 2: Change the following sentences to use the future tense verb forms by adding "will". Use the root form of the verb:

Example: Mary dusts all the clocks.
Mary will dust all the clocks.

1. Mary dusts all the clocks.

2. He plans to sweep the stage after break time.

3. Has she finished buffing the brown tile room?

4. Is Carl using clear soap on the windows?

5. The maintenance woman just waxed the cafeteria floor.

V-E Grammatical Focus - Nouns and Verbs.

Exercise 1: Change the underlined word from a noun to a verb usage:

Example: He put the wax on the floor.
He waxed the floor.

1. Use the vacuum cleaner in the halls.

C2

V-F Bài Kiểm:

Bài Tập 1: Hãy dùng những chữ sau đây đặt thành câu hỏi:

Thí dụ: Is she washing and waxing the floor?

Bài Tập 2: Hãy trả lời những câu hỏi sau đây:

Thí dụ: What do you clean with a vacuum cleaner? carpets.

2. The dust on the desks should be removed.

3. Wax will put a nice shine on that floor.

4. Is that the right polish for that furniture?

5. My supervisor installed the carpeting on these floors himself.

6. Would you please work with a mop on these floors?

V-F Comprehension:

Exercise 1: Make a sentence which asks a question using the following terms:

Example: Is she washing and waxing the floor?

1. wash, wax

2. dust, polish

3. vacuum, carpet

4. mop, buff

Exercise 2: Answer the questions below:

Example: What do you clean with a vacuum cleaner? carpets.

1. What do you clean with a vacuum cleaner?
a) desks, b) ceilings, c) toilets, d) carpets, e) wastebaskets

2. A disinfectant soap is used in cleaning: a) a bathrooms, b) carpets c) ceiling lights, d) closets, e) sidewalks

3. The usual length of a lunch break is a) 5 minutes, b) 30 minutes, c) 2 hours d) once per week

4. Which of the following would not be used to remove dust?
a) mop, b) rag, c) rake, d) broom, e) vacuum

TRÌNH ĐỘ I

BÀI VI

GENERAL FACTORY*

VI-A Mục Tiêu của Học Viên: nhận biết được nhiều tiếng và dụng cụ trong xưởng máy.

VI-B Ngữ Vựng:

1. phiếu ghi giờ*
2. đồng hồ tính giờ*
3. bấm giờ tới*
4. bấm giờ về*
5. máy bấm phiếu
6. hộp đựng chìa khóa vặn bù-loong, đinh ốc
7. xà beng
8. ca làm ban ngày
9. một việc làm (làm khoán)
10. người cai
11. giờ ấn định
12. trả gấp rưỡi
13. đầu của chìa khóa vặn bù-loong (mỏ lét)
14. chốt vặn của chìa khóa mỏ lét*
15. người công nhân trong xưởng máy có nhiệm vụ liên lạc với nghiệp đoàn công nhân
16. đồ để vặn đinh ốc (cái tuốc nơ vít)
17. cách nghiên cứu thì giờ để làm tăng năng xuất
18. người thay thế
19. dọn dẹp trước giờ nghỉ
20. bộ máy ép
21. cái búa
22. cái kìm
23. cái đục
24. chìa khóa vặn ốc có răng cưa
25. cái dũa
26. giờ nghỉ (trong giữa buổi làm)
27. giờ phụ trội
28. ca làm
29. cơ hội

---

* *Time card, time clock, punch in, punch out: trong các xưởng máy tại Hoa Kỳ tất cả các công nhân khi đến giờ làm việc phải lấy 1 tấm phiếu cho vào một loại đồng hồ bấm giờ, nó sẽ tự động ghi giờ vào lần hay ra về để chủ hãng để kiểm soát.*

Torque wrench: một loại khóa dẹp, trên đầu có răng cưa và có thể điều chỉnh rộng hẹp đúng để vặn đinh bù-loong.

* *General Factory: nói chung tất cả các loại cơ xưởng trong ngành kỹ nghệ.*

LEVEL I

LESSON VI

GENERAL FACTORY

VI-A <u>Student Objective</u>: The student is able to identify many of the words and tools used in the factory.

VI-B <u>Vocabulary</u>:

1. time card
2. time clock
3. punch in
4. punch out
5. punch press
6. box wrench
7. ripping bar
8. day work
9. piece work
10. foreman
11. straight time
12. time and a half
13. open end wrench
14. torque wrench
15. steward
16. screwdriver
17. time study
18. relief man
19. wash-up time
20. gang press
21. hammer 22. pliers
23. chisel
24. ratchet 25. file
26. break
27. overtime
28. shift
29. opportunity

VI-C Bài Đối Thoại:

An: Tôi muốn làm việc trong xưởng này, vì có nhiều cơ hội làm thêm giờ phụ trội, và được trả lương gấp rưỡi.

Tom: Tôi biết, và tôi cũng có thể kiếm thêm khi được trả công từng việc một, vì công việc hiện giờ tôi làm rất nhanh.

An: Cũng có cách khác kiếm được thêm tiền--làm ca thứ nhì và ca thứ ba được trả khá hơn.

Tom: Tôi thích làm ban ngày hơn vì tôi thích Ông Cai và những người làm cùng với tôi.

An: Chúng mình nên bấm giờ vào làm đi, sắp trễ rồi.

VI-D Bài Văn Phạm - Thể bớt vần (Thể Tinh Lược)

Thể bớt vần của "there is" là "there's" và "there are" là "there're"

(dùng thể bớt vần trong câu chuyện thường hay thân mật)

Bài Tập 1: Hãy đổi những câu sau đây thành thể bớt vần:

Thí dụ: There is a time clock. - There's a time clock.

There are many types of time clocks. - There're many types of time clocks.

VI-C Dialogue:

An: I like to work in this factory; there's a lot of opportunity to work overtime, and get paid time and a half.

Tom: I know, and then I make extra money on piece work too because I am fast on the job I have now.

An: There is another way to make more too--the second and third shifts pay more.

Tom: I would rather stay on day work because I like the foreman and the others I work with.

An: We better punch in on the time clock, it's getting late.

VI-D Grammatical Focus - Contractions.

There is - there's there are - there're

Teacher's Note: While spoken Vietnamese has elisions, there are no written contractions.

Exercise 1: Change the following sentences using the contracted form:

Example: There is a time clock.
There's a time clock.

There are many types of time clocks.
There're many types of time clocks.

1. There is a time clock.
2. There are time cards.
3. There is a foreman.
4. There are three gang presses.
5. There is a relief man.
6. There is my steward.
7. There are the opened wrenches.
8. There are the ratchets.
9. There is a time study man.
10. There is a new break time.

VI-E Bài Văn Phạm - Các thì của động từ.

Bài Tập 1: Hãy đổi những động từ sau đây thành Thì Quá Khứ bằng cách thêm "ed" vào chữ gốc:

Thí dụ: I need a new time card. - I needed a new time card.

VI-F Bài Tập Bổ Túc:

1. Hãy đi thăm một xưởng máy và xin coi đồng hồ bấm giờ. Yêu cầu gặp người đốc công và người thư ký nghiệp đoàn.
2. So sánh nhiều loại máy ép và chìa khóa mỏ-lét.
3. Hãy kể cho bạn bè hoặc người quyến thuộc về cuộc đi thăm viếng của bạn.

VI-E Grammatical Focus - Verb Tenses.

Teacher's Note: Vietnamese verbs are both invariant and limited. There are fewer tenses than in English and they are formed by the context of the sentence rather than verb modification.

Exercise 1: Change the following verbs to past tense by adding ed to the stem:

Example: I need a new time card.
I needed a new time card.

1. I need a new time card.
2. We punch in at 7:00 a.m.
3. The work pays straight time.
4. I need a steward.
5. He wants to be the foreman.
6. Jack and Hiep work hard.
7. They all want day work.
8. The relief man needs help.
9. The punch press stops suddenly.
10. We want a break.

VI-F Additional Exercises:

1. Visit a factory and ask to see a time clock. Ask to meet a foreman and steward.
2. Compare the various types of presses and wrenches.
3. Tell a friend or relative about your visit.

TRÌNH ĐỘ I

BÀI VII

CHUYÊN VIÊN ĐIỀU KHIỂN MÁY

VII-A Mục Tiêu của Học Viên: có thể hiểu và nhận rõ được những dụng cụ khác nhau và nhiệm vụ của người điều khiển máy (thợ máy.)

VII-B Ngữ Vựng:

1. Cái ê-tô
2. bàn kẹp hay đồ để xiết chặt
3. chìa khó mở-lết để mở bù-loong
4. cái cân đo
5. thước trắc vi (một đơn vị đo lường (dài bằng 1 phần triệu của 1 thước)
6. con vít, đinh ốc
7. phép đo vòng tròn
8. đo cạnh
9. cái tuốc-nở-vít (chìa khóa vặn đinh ốc)
10. kích thước
11. xiết hay buộc chặt lại
12. làm cho vững chắc
13. một loại bù-loong đầu có 8 cạnh
14. loại đinh ốc dài một nửa inch
15. loại đinh ốc trên đầu có hai vạch chéo
16. loại đinh ốc đầu vuông
17. loại đinh bù-loong trên đầu có 6 cạnh

VII-C Bài Đối Thoại: giữa Charlie, một học viên, và Dậu, thợ máy:

Charlie: Những đồ vật gì hay dụng cụ gì quan trọng nhất mà người thợ máy dùng?

Dậu: Có nhiều đồ và dụng cụ quan trọng, nhưng có 2 vật cần nhất là cái cân đo và thước trắc vi.

Charlie: Anh có thể cắt nghĩa nó là gì không?

Dậu: Được chứ, cái cân đo là một bộ dụng cụ dùng để đo kích các đồ vật mà người thợ máy dùng.

LEVEL I

LESSON VII

MACHINE OPERATOR

VII-A Student Objective: The student will be able to understand and identify the various tools and duties of a machine operator.

VII-B Vocabulary:

1. vise
2. clamp
3. wrench
4. measure scale
5. micrometer
6. screws
7. circular measure
8. angular measure
9. screwdriver
10. dimensions
11. fasten
12. steady

Type of screws

13. Allan
14. one-half inch
15. Phillips
16. square
17. hex

VII-C Dialogue: between Charlie, a student, and Dau, a machine operator:

Charlie: What are the most important objects and tools used by an operator?

Dau: There are many objects and tools that are important, but two necessary ones are the scale of measure and the micrometer.

Charlie: Could you explain them?

Dau: Yes, the scale of measure is a set of tools that measure all the dimensions of objects used by a machine operator.

Charlie: Thế còn thước trắc-vi?

Dau: Thước trắc-vi là một dụng cụ rất chính xác dùng để đo bề dày của một đồ vật.

VII-D Bài Văn Phạm - Their và there.

Their là sở hữu chủ (thí dụ: their tools: dụng cụ của họ). There chỉ vị trí (thí dụ: over there: ở đằng kia). There is và there are có nghĩa của một thành ngữ: there is: có - there are: có những

Bài Tập 1: Hãy dùng đúng there hay their trong các câu sau đây:

Thí dụ: The men were using their Phillips screwdrivers.

VII-E Bài Văn Phạm - A and An

Dùng "a" trước một chữ bắt đầu bằng một phụ âm và dùng "an" trước một chữ bắt đầu bằng một nguyên âm.

Bài Tập 1: Hãy điền vào khoảng trống chữ "a" hay "an" trong những câu sau đây:

Thí dụ: The boy ate an apple.

Jack gave him a tool box.

Charlie: How about a micrometer?

Dau: A micrometer is a very accurate tool for measuring thickness.

VII-D Grammatical Focus - Their and There.

Their shows ownership (their tools).
There shows location (over there) and there is or there are is an idiom meaning "co" or "co nhung".

Exercise 1: Write the sentence correctly using their or there:

Example: The men were using their Phillips screwdrivers.

1. The men were using_____Phillips screwdrivers.

2. Machine operators know about_____many tools.

3. _____is the scale that is used to measure objects.

4. A clamp was used to fasten the pipe over_____.

5. _____vise was used to steady the objects.

6. & 7. _____micrometers are more accurate measures than _____rulers.

8. _____was a square screw and an Allan wrench on the bench.

9. _____are training programs available to learn machine operation.

10. The angular measure was used to measure_____machine parts.

VII-E Grammatical Focus - A and An

Use a before a word beginning with a consonant and an before a word beginning with a vowel.

Example: The boy ate an apple.
Jack gave him a tool box.

Exercise 1: Fill the blank with a or an.

1. He used _____ micrometer for more accurate measure.

2. _____ angular measure was needed for the operator.

3. _____ vise was used to steady the object.

VII-F Bài Văn Phạm - Thể bớt vắn (Thể Tỉnh Lược)

(dùng thể bớt vắn trong câu nói chuyện thường hay thân mật.)

Bài Tập 1: Hãy đổi những chữ ở Thể Tỉnh Lược sau đây thành chữ thường:

Thí dụ: He can't measure without a micrometer.

He cannot measure without a micrometer.

4. _____ student was seen in the machine shop.

5. The shop needed _____ operator for the job.

6. _____ Allan wrench is very important to machine operators.

7. The operator needed _____ hex screw.

8. It called for _____ circular measure.

9. _____ teacher with good qualifications is needed in a machine course.

10. The welder used _____ gas torch on the job.

VII-F Grammatical Focus - Contractions

Teacher's Note: While spoken Vietnamese has elisions, there are no written contractions.

Exercise 1: Change the contractions to words:

Example: He can't measure without a micrometer.
He cannot measure without a micrometer.

1. He can't measure without a micrometer.

2. He won't be able to use the hex screws on the job.

3. The teacher didn't have the necessary tools.

4. It's the first time for the machine class.

5. He didn't use the Allan wrench in this case.

6. There's a clamp on the pipe.

7. You're the only machine operator in the factory.

8. You've been the only person to go to the training.

9. The vise wasn't tight enough.

10. He hasn't found the Phillips screws.

VII-G Reading:

The job of a machine operator is a real challenge. You should visit a machine shop before you decide if you would like that type of work. Find out what the job pays, and how long the training period is before you decide on a career as a machine operator.

VII-H Bài Tập Bổ Túc:

1. Hãy gọi tới một trường kỹ thuật hay một nhà máy và cho họ biết là bạn thích trở thành một chuyên viên điều khiển máy. Hỏi xem bạn có cần phải thục tập trước khi nhận việc hay thục tập ngay trong công việc làm.
2. Coi và tìm xem nhiệm vụ của chuyên viên điều khiển máy phải làm những gì.
3. Đi thăm viếng một trường kỹ thuật hay một xưởng máy và tìm xem những công việc hay nhiệm vụ của người điều khiển máy là gì.

VII-H Additional Exercises:

1. Call a technical school or a machine shop and tell them you are interested in becoming a machine operator. Ask what training you need either before or actually on the job.

2. Look and find out what the duties of a machine operator are.

3. Visit a technical school or machine shop and find out what facilities are used and what the duties of a machine operator are.

TRÌNH ĐỘ I

NÔNG THƯỜNG

Nông Thường gồm những nghề thương mại và canh nông. Sự phối hợp quan trọng này bắt buộc phải có vì sự tiến bộ của kỹ thuật và các phương pháp phân phối. Những quan niệm mới, những sự kiểm soát của chính quyền và số lớn dân chúng cần được phục vụ,tất cả những sự kiện ấy cho ta thấy sự phối hợp chặt chẽ giữa các nhà trồng tỉa, sản xuất và biến thể thực phẩm, cùng sự đòi hỏi học vấn, hiểu biết và huấn luyện.

"Horticulture" là một khoa học hay nghệ thuật trồng tỉa, đặc biệt là trồng trọt trong vườn. Đó là sự canh tác trong vườn hay vườn cây ăn trái, nghệ thuật trồng cây ăn trái và cây cảnh, và sự sửa sang phong cảnh.

"Floriculture" là một ngành trồng bông trong chậu cảnh.

Nhiều trường có nhà ươm cây để giảng dạy chương trình này. Bài này cần được bổ túc với một cuộc đi thăm nơi trồng tỉa và các buổi thảo luận với nhà trường về các loại công việc này.

LEVEL I

AGRI-BUSINESS

Agri-business is a combination of enterprises, made up of business and agricultural interests, created by increased technology and distribution methods. New concepts, government controls, and greater numbers of people to serve, all indicate greater involvement for the grower, producer or processor, and greater need for more education, information, and training.

Horticulture is the science or art of cultivating plants, especially garden plants. It is the cultivation of a garden or orchard, the art of growing fruits and ornamental plants, and the improvement of the landscape.

Floriculture is the cultivation of ornamental flowering plants.

Some institutes operate a greenhouse for purpose of instruction in this program. This unit should include a tour of such a facility and some discussion with the faculty concerning types of employment available.

TRÌNH ĐỘ I

BÀI VIII

CANH NÔNG

VIII-A Mục Tiêu của Học Viên: quen thuộc với những chữ thông thường trong nghề nông và gặt hái được kiến thức tổng quát về nông trại và nhiệm vụ trong nông trại.

VIII-B Ngữ Vựng:

1. phân bón
2. trái
3. xe máy kéo
4. trồng cây, rau trái v.v.
5. mùa màng
6. rau trái
7. trại nuôi bò sữa
8. trái cây
9. ruộng, cánh đồng
10. chợ, thị trường
11. công việc hằng ngày trong nông trại
12. trại trồng rau trái cung cấp cho thị trường tiêu thụ
13. hạt giống
14. đất
15. hạt lúa
16. súc vật nuôi trong trại
17. trồng cây
18. gặt hái
19. hái trái cây
20. reo hạt
21. cấy dất lên
22. trồng trọt
23. vắt sữa
24. nuôi xúc vật
25. chín (trái cây chín)
26. mùa gặt
27. củ cải đỏ
28. cỏ hoang; nhổ cỏ
29. người giúp việc trong nông trại*
30. người giúp việc*

---

* *Farm laborer: người giúp việc theo từng mùa*

Hired hands: người giúp việc quanh năm

LEVEL I

LESSON VIII

AGRICULTURE

VIII-A Student Objective: To become familiar with general agriculture terms and to gain a general knowledge of farming and farm duties.

VIII-B Vocabulary:

1. fertilizer
2. farm
3. tractor
4. cash crop
5. season
6. vegetables
7. dairy farm
8. fruits
9. fields
10. market
11. chores
12. truck farm
13. seed
14. soil
15. grain
16. livestock
17. plant
18. harvest
19. pick
20. sow
21. plow
22. cultivate
23. milk
24. raise
25. ripe
26. crop
27. beet
28. weed
29. farm laborers
30. hired hands

VIII-C Bài Đối Thoại:

Thu: Tôi nghĩ rằng cà tô mát đã chín có thể hái được ngày hôm nay.

Bill: Dạ, tôi ở ngoài đồng cả ngày hôm qua và thấy nó có vẻ như đã hái được rồi.

Thu: Nãy anh nghĩ là mình có thể mang ra chợ bán được độ bao nhiêu thùng?

Bill: Tôi không chắc lắm, nhưng thế nào nó cũng được mùa.

Thu: Phân bón mới mình dùng năm nay tốt lắm.

Bill: Dạ, tôi chắc như vậy. Tất cả trái cây và rau trái hình như năm nay đều tốt cả. Thời tiết năm nay cũng tốt nữa.

Thu: Tốt, để tôi làm xong mấy việc rồi mình bắt đầu hái trái cây.

Bill: Để tôi sẽ lái xe kéo và xe wagon (một loại xe không mui) ra ngoài đồng.

Thu: Mình sẽ có thể bắt đầu dựng cái quán bán đồ rau trái ngày mai được.

VIII-D Bài Văn Phạm - Chữ viết tắt.

Nhiều chữ trong Anh ngữ được viết tắt, đặc biệt là những chữ dùng trong phép đo lường. Các chữ viết tắt luôn luôn theo sau bằng một dấu chấm.

Bài Tập 1: Hãy chọn những chữ viết tắt cho đúng những chữ sau đây:

Thí dụ: bushel bu.

VIII-C Dialogue:

Thu: I think the tomatoes are ripe enough to pick today.

Bill: Yes, I was out in the field yesterday and they seemed to be ready to harvest.

Thu: How many bushels do you think we should be able to market?

Bill: I'm not sure, but it should be a good crop.

Thu: The new fertilizer we used this year must have helped.

Bill: Yes, I'm sure it did. All the fruits and vegetables seem to be doing well this year. We've had good weather too.

Thu: Well, I'll finish my chores and then we can start picking.

Bill: I'll drive the tractor and wagon out to the field.

Thu: We will be able to start our truck farm stand tomorrow!

VIII-D Grammatical Focus - Abbreviations

Many English words are abbreviated (made shorter). This is especially true with words used in measurement. Abbreviations are always followed by a period.

(Teachers Note: The equivalency chart in the back of the book may be reproduced and made available to each student.)

Exercise 1: Match the following words with their abbreviation:

Example: bu. 1. bushel

_____1. bushel	a. oz.	_____8. gallon	h. gal.
_____2. peck	b. in.	_____9. rod	i. pt.
_____3. pint	c. yd.	_____10. square	j. pk.
_____4. quart	d. cu.	_____11. cubic	k. rd.
_____5. pound	e. sq.	_____12. foot	l. mi.
_____6. ounce	f. lb.	_____13. yard	m. bu.
_____7. mile	g. ft.	_____14. inch	n. qt.

VIII-E Bài Văn Phạm - Số nhiều.

1) Lối thông thường nhất để đổi các danh tự sang số nhiều bằng cách thêm "s" vào sau số ít. Thí dụ: girl - girls

2) Đổi thành số nhiều ở các danh tự tận cùng bằng ch, sh, x, s bằng cách thêm "es". Thí dụ: church - churches

3) Các danh tự tận cùng bằng một phụ âm (consonant) và "y", đổi sang số nhiều bằng cách đổi y thành i và thêm es.

   Thí dụ: dairy - dairies

4) Các danh tự tận cùng bằng 1 mẫu âm (vowel) và "y", thường thường đổi sang số nhiều bằng cách thêm s và không đổi chữ y.

   Thí dụ: monkey - monkeys

5) Những chữ tận cùng bằng "o" sau một phụ âm (consonant) thường thêm es để đổi sang số nhiều. Thí dụ: potato - potatoes

6) Một số chữ không thay đổi trong cả số nhiều lẫn số ít.

   Thí dụ: deer - deer

Bài Tập 1: Hãy đổi những chữ sau đây thành số nhiều:

Thí dụ: crop - crops

VIII-F Bài Văn Phạm - Chữ đồng âm.

Chữ đồng âm là những chữ có cách phát âm giống nhau nhưng viết và nghĩa khác nhau.

Bài Tập 1: Hãy chọn những chữ đúng cho các câu sau đây:

Thí dụ: A (beet, beat) is a reddish vegetable that grows underground.

VIII-E Grammatical Focus - Plurals

1. The most common way to form the plural of nouns is to add the letter s to the singular form.

2. To form the plural of a noun ending in ch, sh, x, s, add es.

3. To form the plural of a noun ending in a consonant and a y, change the y to i and add es.

4. To form the plural of a noun ending in a vowel and y, you usually add s without changing the y.

5. Words ending in o after a consonant often add es to form the plural.

6. Some words are the same in both singular and plural.

Teacher's Note: Vietnamese nouns are invariant. Plurals are formed by adding an additional word such as several, three, many, etc. Vietnamese speakers may therefore tend to ignore plural endings.

Exercise 1: Write the plural for the following words:

Examples: girl--girls church--churches monkey--monkeys, dairy--dairies deer--deer

1. potato
2. strawberry
3. crop
4. peach
5. lettuce
6. tomato
7. cherry
8. cabbage
9. apple
10. pepper

VIII-F Grammatical Focus - Homonyms

Homonyms are words that sound alike but are spelled differently and have different meanings.

Exercise 1: Choose the correct word for the following sentences.

1. A (beet, beat) is a reddish vegetable that grows underground.
2. She (beet, beat) the rug to clean it.
3. The apple trees will (bare, bear) fruit this year.
4. I saw a (bear, bare) in the woods last week.
5. I will (buy, by) three dozen eggs from the farmer.
6. He drove (buy, by) the field with his tractor.

VIII-G Bài Văn Phạm - Các thì của động từ.

1) Dùng thì hiện tại để chỉ một sự việc đang xảy ra.

2) Dùng thì quá khứ để chỉ một việc đã qua.

3) Present Perfect bao giờ cũng phải đi cùng với trợ động từ (helping verbs): was, were, have, has, hay had.

Bai Tap 1: Hãy đặt đúng những chữ grow, grew, grown vào những câu sau đây:

Thí dụ: He grows tomatoes better than he grows beets.

7. The weather was (fair, fare).

8. The bus (fair, fare) was 50¢.

9. Since the (son, sun) was shining, we decided to harvest the crops.

10. His oldest (son, sun) helps him at harvest time.

11. Our crops need lots of (rein, rain).

12. The horse's (rein, rain) was too tight.

13. (Weather, whether) is very important to the farmer.

14. He wasn't sure (whether, weather) or not the fields were dry enough to plant.

15. He wanted to (sew, sow) three fields by noon.

16. It is cheaper to (sew, sow) your own clothes.

17. The farmer is always up before the morning (dew, do) dries.

18. (Do, Dew) you really want to be a farmer?

VIII-G <u>Grammatical Focus - Verb tenses</u>

1. Use <u>grow</u> when you are talking about the present--what is happening right now.

2. Use <u>grew</u> when you are talking about the past tense--something which has already taken place.

3. Use <u>grown</u> only with a helping verb--was, were, have, has, or had.

<u>Exercise 1</u>: Put the correct word--grow, grew, or grown in the following sentences.

<u>Example</u>: He grows tomatoes better than he grows beets.

1. Sun and rain help weeds to _____.

2. We will have to plow tomorrow because the weeds have _____ so tall.

3. Some vegetables_____very tall while others_____only a few inches tall.

4. Last year we _____ as many as seven fields of corn.

5. We have_____ as many as seven fields of corn.

6. Our neighbors_____an excellent crop of potatoes this year.

7. I like to _____vegetables and fruits.

8. He _____tomatoes better than he _____beets.

VIII-I Bài Tập Bổ Túc:

Đi thăm một khu nông trại. Tìm xem họ trồng gì. Hỏi xem họ có muốn người làm tạm hay người giúp việc suốt năm không. Tìm xem công việc sẽ chỉ làm ở ngoài đồng hay là phải biết về máy móc hoặc biết cách săn sóc súc vật trong trại. Đoán xem bạn có cần phải có kinh nghiệm trước không và công việc chỉ tạm thời hay lâu dài.

Mấy câu có thể giúp ích cho cuộc đối thoại.

Ông có mướn?

Có cần phải có kinh nghiệm?

Có cần phải biết điều khiển máy không?

VIII-H Reading:

Farming is one of man's oldest and most important activities. Today farming has become very specialized. Farmers who deal with dairy cattle are called dairy farmers. They grow crops such as corn and oats to feed to their cows. They sell the milk to companies who supply our cities with milk, butter, cheese and other dairy products.

Dairy farmers might also raise chickens, pigs, and other small animals for additional income or for their own use.

Another type of farming is livestock farming. Here the farmer raises steers, and possibly other animals. He feeds them for a season and then sells them to a slaughter house company which provides the cities with meat.

Another familiar type of farming is truck farming. Here the farmer grows crops to sell, such as potatoes, and other fruits and vegetables. These crops are called cash crops. Truck farms often hire farm laborers during harvest time. Dairy farmers often hire one or two "hired hands" to help with the chores.

Farmers need to be in good health and to be able to use good judgment in planning work. Some mechanical ability is helpful. It is important to enjoy working outdoors in all kinds of weather, and to be willing to work long hours seven days a week.

Farming offers work for the farm laborers, hired hands, farm managers, and farm owners. Training is available through technical schools, but the best training available is actual work on a farm.

VIII-I Additional Exercises:

Visit an area farm. Find out the crops they produce. Inquire whether or not they employ farm laborers or hired hands. Find out whether the help would work primarily in the fields or would need knowledge of machinery or how to care for farm animals. Determine if you need previous experience and if the work is temporary or permanent.

Structures which may be helpful:

Do you employ...
Is experience necessary...
Do you have to know how to operate machinery...

TRÌNH ĐỘ I

PHẦN TẬP ĐỌC
READING

BÀI I - Cách chộn sã lát lã một nghệ thuật có thể học dược. Có nhiều loại sã lát. Có mấy loại sã lát chộn với trái cây. Có nhiều thứ khác chộn với rau. Cũng có thứ sã lát chộn với thạch. Món sã lát làm bữã ăn thêm phần dậm dã, thú vị. Bạn nên học hỏi tất cả những việc bạn có thể học về nghề này.

BÀI II - Có nhiều loại việc khác nhau trong bệnh viện. Ban nên di thăm một bệnh viện trước khi quyết định xem bạn có thích loại việc đó không. Hỏi mấy người phụ tá điều dưỡng xem họ có thích công việc đó không. Tìm xem chương trình huấn luyện mất bao nhiêu lâu, và công việc dược trả lương bao nhiêu trước khi bạn quyết định chọn nghề phụ tá điều dưỡng.

BÀI III - Sự an toàn rất quan trọng. Nó quan trọng tại nơi bạn làm việc và ngay trong nhã bạn. Bạn nên biết những sự rủi ro nguy hiểm để đề phòng. Bạn hãy coi xem trong nhã có đồ gì có thể gây ra nguy hiểm và tìm cách để sửa lại.

BÀI IV - Công việc của người thợ hãn rất lã thích thú nhưng cũng rất chuyên môn. Người thợ hãn phải làm và sửa chữã dụng cụ, máy móc cũng những bộ phận bằng cách hãn kim khí vào với nhau theo sự sắp xếp và bản họa đồ. Có hai loại hãn thông dụng nhất lã hãn bằng diện hồ quang vã hãn xì (bằng hỏi acetylene.)

Sự đòi hỏi nhiều thợ hãn sẽ gia tăng vì sự phát triển của nghề hãn ngày thêm rộng lớn. Công việc sửa chữã vã bảo trì trong các kỹ nghệ về kim khí sẽ đòi hỏi thêm nhiều thợ hãn.

BÀI VII - Công việc của chuyên viên điều khiển máy thật là một việc thử thách. Bạn nên đi thăm một xưởng máy trước khi quyết định xem bạn có thích loại công việc đó không. Tìm xem công việc được trả lương như thế nào, và thời gian huấn luyện mất bao nhiêu lâu trước khi bạn quyết định chọn nghề thợ máy.

BÀI VIII - Nghề trồng tỉa là một hoạt động xưa nhất và quan trọng nhất của loài người. Ngày nay v iệc trồng tỉa trở nên rất chuyên môn. Những người nuôi gia súc để lấy sữa gọi là "dairy farmers". Họ trồng mùa như bắp, lúa mạch để cho gia súc ăn. Họ b án sữa cho các hãng và các hãng này cung cấp lại cho dân chúng ở các thành thị, những thứ như sữa, bơ, phó mát, và những sản phẩm khác làm bằng sữa. Đôi khi trại nuôi gia súc cũng nuôi thêm gà, heo và những loại gia súc nhỏ khác để có thêm lợi tức hay để chính họ dùng.

Nông trại cũng có thể nuôi súc vật khác gọi là "livestock farming". Người ta nuôi bò đực hay bò con và có thể các gia súc khác. Họ nuôi theo mùa rồi đem bán cho các lò sát sinh để cung cấp thực phẩm cho người ở thành thị.

Một loại khác gọi là "truck farming". Ở đây người ta trồng trái cây và rau đậu để bán như khoai tây, và các loại rau trái khác. Những mùa màng này gọi là "cash crop". Nông trại trồng rau, trái thường mướn người làm công theo mùa gặt. Trại nuôi bò sữa thường mướn 1 hay 2 người giúp việc trong các công việc hàng ngày.

Nhà nông cần phải có sức khỏe và cần phải có trí xét đoán để dự tính công việc. Nên có khả năng về máy móc. Việc quan trọng là phải thích làm việc ngoài trời trong bất cứ thời tiết nào và phải có thiện chí làm việc 7 ngày một tuần và nhiều giờ trong một ngày.

Nghề nông có nhiều công việc cho người làm việc lao động ở trại, người phụ việc, người quản lý trại, cũng như cho người chủ trại. Chương trình huấn luyện có sẵn tại các trường kỹ thuật, nhưng cách huấn luyện tốt nhất là làm việc ngay trong trại.

TITLE: ENGLISH ON THE JOB. ANH NGU TRONG CONG VIEC. LEVEL II.

DESCRIPTOR: *ENGLISH (SECOND LANGUAGE); *INDOCHINESE; *CAREER EDUCATION; *VOCATIONAL EDUCATION; *CURRICULUM GUIDES

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 112P.; RELATED DOCUMENTS VT 103 232 THROUGH VT 103 234 IN THIS ISSUE.

ABSTRACT: THIS CURRICULUM GUIDE IS PART OF A THREE-VOLUME SERIES DEVELOPED FOR USE IN CLASSES OF ENGLISH AS A SECOND LANGUAGE TO PROVIDE INDOCHINESE STUDENTS WITH LANGUAGE SKILLS NEEDED IN THE WORLD OF WORK. THE LESSONS PROVIDE AN OVERVIEW OF AVAILABLE VOCATIONAL PROGRAMS SO THAT STUDENTS INCREASE THEIR KNOWLEDGE OF CAREER OPPORTUNITIES AS THEY BECOME MORE PROFICIENT IN ENGLISH. THE LESSONS ARE DESIGNED TO INTRODUCE STUDENTS TO PROGRAMS IN WHICH THEY CAN BE SUCCESSFUL WITH VARYING DEGREES OF ENGLISH SKILLS, WITH THE PROGRAMS THAT REQUIRE THE LEAST SKILL INTRODUCED AT LEVEL I. THIS LEVEL II GUIDE CONTAINS LESSONS ON WARD CLERK, GENERAL OFFICE, FOOD PREPARATION, AUTO MECHANICS, SMALL ENGINE REPAIR, BLUEPRINT READING, AUTO BODY, KEYPUNCH OPERATOR, AND UPHOLSTERY AND AUTO TRIM. EACH LESSON CONSISTS OF A VOCABULARY LIST WITH VIETNAMESE TRANSLATIONS OR EXPLANATIONS FOLLOWED BY A DIALOGUE PRINTED IN BOTH LANGUAGES WHICH FORMS THE BASIS FOR THE SUBSEQUENT EXERCISES AND DISCUSSIONS. INSTRUCTIONS ARE PRINTED IN BOTH ENGLISH AND VIETNAMESE. THE READING CONTAINED IN EACH LESSON PROVIDES FURTHER INFORMATION CONCERNING THE VOCATIONAL PROGRAM DISCUSSED IN THE LESSON. A FINAL SECTION INCLUDES SUGGESTIONS FOR DISCUSSION TOPICS, OUTSIDE ACTIVITIES, AND ADDITIONAL PRACTICE. (NJ)

ANH NGỮ TRONG CÔNG VIỆC

Lời Tựa

Văn Phòng Trợ Giúp Định Cư Wisconsin đã soạn tài liệu này để dùng cho các lớp dạy tiếng Anh như một ngoại ngữ (ESL) trong một chương trình đặc biệt được Uỷ Ban Giáo Dục, Chuyên Nghiệp và Kỹ Thuật Tráng Niên Wisconsin tài trợ. Việc soạn thảo và thực hiện chương trình đã được Cơ Quan Đặc Trách Người Tị Nạn Đông Dương South Carolina và Đài Phát Thanh WHA giúp đỡ. Những bài học này được thâu thập từ những tài liệu giảng dạy của Uỷ Ban Giáo Dục với sự cộng tác của các trường chuyên nghiệp quận.

Những bài này được soạn ra với mục đích để giúp các học viên Đông Dương làm quen với ngôn ngữ đặc biệt dùng trong các công việc chuyên môn và hiểu biết tổng quát những chương trình chuyên nghiệp sẵn có. Khi dùng tài liệu này học viên sẽ biết thêm về nghề mà mình muốn học đồng thời cũng sẽ học thêm Anh ngữ.

Chương trình này được thực hiện để giúp các học viên có trình độ Anh ngữ khác nhau, thích hợp với trình độ của từng cá nhân; những phần ít đòi hỏi Anh ngữ được trình bày ở Trình Độ I. Một số bài như 'Health' và 'Food Preparation' sẽ giúp cho học viên mở mang tầm hiểu biết.

Các giảng viên sẽ bổ túc các bài học với những buổi hội thảo, chiếu phim, các tài liệu liên hệ, thuyết trình, thăm viếng các phòng thực tập và các cơ xưởng kỹ nghệ. Trong một vài trường hợp, "công việc mẫu" (work sample) có sẵn tại các trường chuyên nghiệp có thể được dùng như một kinh nghiệm sẵn có.

Giảng viên cũng nên dùng cuốn "Indochinese Refugee Education Guides" do Trung Tâm Ngôn Ngữ Học Ứng Dụng soạn. Những tài liệu này nói rõ những khó khăn đặc biệt mà học viên Việt Nam sẽ gặp phải khi học Anh ngữ và cũng cho nhiều thí dụ rất hay trong cách tập phát âm.

ENGLISH ON THE JOB

Introduction

The materials in this series of lessons have been developed by the Wisconsin Resettlement Assistance Office for use in English as a Second Language classes under a special project funded by the Wisconsin Board of Vocational, Technical and Adult Education. They were developed and produced with the assistance of the South Carolina Indochina Refugee Agency and WHA radio. The written texts are based upon materials originally developed by the State Board in cooperation with its districts.

The texts are designed to provide Indochinese students with language skills needed in the world of work, along with an overview of available vocational diploma programs. Students using these materials will increase their knowledge of career opportunities as they become proficient in the use of English.

An effort has been made to introduce students to programs in which they could be successful with varying degrees of English skill, with those programs requiring the least skill being introduced at Level I. In some instances, notably Health and Food Preparation, there are opportunities for a wide range of proficiency. These units were prepared on all three levels.

It is expected that teachers will supplement these units through discussion, films or film strips, related materials, resource speakers, visits to labs, and industrial tours. In some instances, the work samples available through vocational schools can be used as a "hands on" experience in the unit.

It is also highly recommended that the teacher make use of "Indochinese Refugee Education Guides" developed by the Center of Applied Linguistics. These materials illustrate the unique problems which the Vietnamese student will have in learning English and provide useful samples for use in phonic drills to improve pronunciation .

The vocational English texts and accompanying tapes have been designed to provide a maximum degree of flexibility for students and teachers. They may be used in a general ESL classroom for all foreign students, in a self-contained classroom for Vietnamese students, or in a tutorial program. Vietnamese students can use them on their own with minimal guidance. However, whenever possible, we recommend that these materials be supplemented by substantial amounts of spontaneous conversation.

Students with a fair degree of general English competency and an established career goal may wish to concentrate upon those lessons which deal with, or are related to, their vocational interests. They can thereby become familiar with many of the technical terms and jargon which are essential to every job, but which do not appear in many dictionaries and most ESL texts.

Những bài học Anh ngữ chuyên nghiệp kèm theo bằng ghi âm sẽ giúp cho sự giảng dạy trở nên linh động tối đa; có thể được dùng chung trong các lớp ESL cho các học viên ngoại quốc, trong một lớp dành riêng cho học viên Việt Nam, hay trong các chương trình dạy nghề. Học viên Việt Nam cũng có thể tự học bằng tài liệu này sau khi được hướng dẫn sơ qua. Tuy nhiên, nếu có thể, tài liệu này cần phải được bổ túc bằng các cuộc đối thoại tự nhiên.

Học viên với trình độ Anh ngữ trung bình và định theo một nghề nhất định có thể chăm chú vào những bài học liên quan đến môn chuyên nghiệp mình thích. Như vậy mới có thể quen thuộc với nhiều danh từ kỹ thuật và tiếng lóng rất cần thiết cho mọi nghề và những danh từ này không có trong các tự điển và trong các bài học ESL khác.

Trong mỗi bài học, học viên sẽ được hướng dẫn về cách đặt câu Anh ngữ, từ cách dùng động từ, cách bỏt vần (Thể Tĩnh Lược), v.v. trong Trình Độ I cho đến cách dùng trạng từ và tĩnh từ trong Trình Độ III. Giảng viên sẽ bổ túc bài học bằng cách dùng bản ngữ vựng để đặt câu và thực tập đối thoại.

Mỗi bài gồm có bảng ngữ vựng với phần cắt nghĩa và dịch sang tiếng Việt. Nhiều danh từ kỹ thuật không có chữ tương đương bằng tiếng Việt, vì tân kỹ thuật học mới có tại Việt Nam lúc gần đây mà thôi, nên mỗi tiếng có câu cắt nghĩa vắn tắt. Phần lớn học viên Việt Nam quen dùng cách học thuộc lòng nên những bảng ngữ vựng này dài hơn những bảng trong các bài ESL khác. Nếu học viên không học hẳn một ngành riêng biệt nào thì số ngữ vựng chuyên nghiệp này có thể dùng để tham khảo hơn là phải học thuộc lòng.

Sau mỗi bảng ngữ vựng là một bài đối thoại dùng làm căn bản cho những bài tập và thảo luận.

Bài đối thoại cũng được dịch sang tiếng Việt , như vậy học viên có thể

With each unit is a structural English lesson ranging from verb usage and contractions, in Level I to the use of adverbs and adjectives in Level III. Teachers will supplement the unit by using the vocabulary list for sentence writing and conversation practice.

Each lesson contains a Vocabulary List with Vietnamese translations or explanations. Since modern technology has only recently been introduced in Viet Nam, many technical terms do not have Vietnamese equivalents and a brief explanation of the term has therefore been provided. Most Vietnamese students are used to a great deal of memorization, so lists are longer than would be expected in most American texts. If the student will not be active in a particular field, some of the technical vocabulary may be used as reference, rather than memorization material.

Following each vocabulary list is a Dialogue which forms the basis for subsequent exercises and discussions. This is printed in both English and Vietnamese so that the student may be completely confident in his or her understanding of the subject matter. However, students should use this and all other translated material only when necessary.

Each lesson contains several Exercises which expand upon the subject matter of the dialogue. Exercise instructions are printed in both English and Vietnamese. When necessary, Teachers' Notes and Students' notes have been included and are printed in italic. Teachers' Notes are printed only in English and Students' Notes are printed only in Vietnamese. These notes explain the grammatical differences between the two languages and will help both teachers and students cope with the special problems which Vietnamese students face when learning English.

The Reading contained in each lesson provides further information concerning the vocational program discussed in the lesson. Students should read it aloud and to themselves and discuss it in class. If a particular Reading presents comprehension problems, the student may turn to the back of the book where the Readings have each been printed in Vietnamese.

The final section in each lesson contains suggestions for discussion topics, outside activities and additional practice. Teachers may find it difficult to draw Indochinese students into classroom discussions. Vietnamese education is based upon the old European model of the student as a passive recipient of information . The student may therefore feel very uncomfortable when encouraged to question, discuss, challenge and argue with classmates and the teacher. Use discussions with other class members to demonstrate to Vietnamese students that this behavior is appropriate and expected, then gradually encourage Vietnamese students to participate in these conversations.

Each lesson has a corresponding tape which includes the Student Objective, Vocabulary, Dialogue, and Reading sections. The directions for each tape are

tin là đã hoàn toàn hiểu thấu bài học. Tuy nhiên, học viên chỉ nên dùng bài này và tất cả những tài liệu phiên dịch khác khi cần mà thôi.

Mỗi bài học sẽ gồm nhiều bài tập với mục đích giúp cho học viên quen cách đối thoại. Cách dẫn giải làm bài tập được in bằng cả tiếng Anh lẫn tiếng Việt. Khi cần, chú thích cho giảng viên và học viên được in bằng chữ nghiêng; chú thích cho giảng viên in bằng tiếng Anh và cho học viên thì bằng tiếng Việt. Những lời chú thích này cắt nghĩa những mẹo khác nhau của văn phạm giữa hai ngôn ngữ và sẽ giúp cho cả giảng viên cũng học viên biết cách tránh những khó khăn đặc biệt mà học viên Việt Nam sẽ gặp phải khi học Anh ngữ.

Bài tập đọc trong mỗi bài học giúp thêm những chi tiết liên quan đến chương trình chuyên nghiệp đã được nói đến trong bài học. Học viên cần phải đọc to lên và thảo luận về bài tập đọc đó. Nếu có một bài tập đọc nào đặc biệt khó hiểu học viên có thể xem phần dịch sang tiếng Việt in ở cuối cuốn sách.

Đoạn cuối của mỗi bài học có những đề nghị cho các đầu đề của cuộc thảo luận, thực tập thêm bên ngoài và những bài tập bổ túc. Giảng viên có thể gặp khó khăn khi muốn học viên Đông Dương Nam dự vào các cuộc thảo luận: giáo dục tại Việt Nam theo phương pháp ngày xưa nên học sinh rất thụ động trong việc học hỏi. Học viên có thể cảm thấy bối rối khi được khuyến khích trả lời các câu hỏi, thảo luận, phản đối và bàn cãi với học viên cùng lớp hay với giảng viên. Giảng viên nên dùng những buổi thảo luận với các học viên để giúp cho học viên Việt Nam thấy đó là một hoạt động thích hợp trong các lớp học tại Hoa Kỳ và dần dần khuyến khích họ tham gia vào các cuộc đối thoại.

Mỗi bài học có kèm theo một cuốn bằng gồm có các phần Mục Tiêu của Học Viên, Ngữ Vựng và Tập Đọc. Những phần hướng dẫn đều được thảo bằng cả tiếng Anh lẫn tiếng Việt. Phần Ngữ Vựng và Đối Thoại chỉ có bằng tiếng Anh và

provided in both English and Vietnamese. The Vocabulary and Dialogues are in English only with pauses for student responses. These tapes allow the student to practice verbal comprehension and expression on his own. They may be stopped and replayed until the student is confident in his work. A native speaker should check the student's pronunciation frequently to insure that mistakes are not being repeated. Except for Lesson II-IX and Lesson III-VII (which must be rewound), each tape should be allowed to run its full length so that it will be at the beginning when turned over.

người đọc sẽ ngưng lại sau mỗi câu và mỗi chữ để học viên có thì giờ nhắc lại. Những cuốn băng này giúp cho học viên thực hành bằng cách tự đặt câu và bài kiểm. Học viên có thể cho băng ngưng và chạy lại cho đến khi nào hoàn toàn tin tưởng là mình đã hiểu thấu bài học. Giảng viên cần phải luôn luôn nghe lại cách phát âm của học viên để chắc chắn là họ không nhắc lại những lỗi đã phạm. Trừ bài học IX trong Trình Độ II và bài VII trong Trình Độ III (băng cần phải được quay lại vì chỉ thâu có một mặt) mỗi cuốn băng phải cho chạy hết để khi lật qua mặt bên kia, bài học kế tiếp sẽ bắt đầu.

TRÌNH ĐỘ II

CÁC CHƯƠNG TRÌNH VỀ Y TẾ VÀ VỆ SINH*

Tất cả các chương trình về ngành Y Tế và Vệ Sinh* đều có cấp chứng chỉ sau khi học viên được hướng dẫn về cách giúp các bệnh nhân trong các phòng nha khoa, phòng mạch hay phòng thí nghiệm, trong phòng mổ hay bệnh viện.

Môn Phụ Tá Điều Dưỡng* là một chương trình học 6 tuần và có cấp chứng chỉ. Nghề này thích hợp cho những người bình tĩnh, khỏe mạnh để thi hành công việc giao phó như các việc điều dưỡng thường nhật.

Học viên có thể đi thăm các khu điều dưỡng và bệnh viện. Giảng viên của Trường Cao Đẳng Điều Dưỡng có thể được mời đến thuyết trình.

---

* *Health: có nghĩa tổng quát gồm tất cả các ngành về y khoa, giữ gìn sức khỏe, vệ sinh, v.v.*

Nursing Assistant: là người giúp cho người điều dưỡng (y tá) trong các công việc săn sóc bệnh nhân như làm giường, thay quần áo, tắm, cho bệnh nhân ăn, đo mạch, cặp sốt, v.v.

LEVEL II

Health Programs

The allied health programs are oriented toward assistance in patient care in the dental or medical office or laboratory, in the operating theater, or on the hospital ward.

The nursing assitant is a six-week diploma program for the person who is stable, healthy, able to adjust and work under supervision to perform a variety of routine tasks.

The students could visit the nursing labs and tour the hospital. Nursing faculty can be used as resource speakers.

TRÌNH ĐỘ II

BÀI I

NHỮNG NGHỀ THUỘC VỀ Y TẾ VÀ VỆ SINH

WARD CLERK (Thư Ký Nhận Bệnh)

Người Ward Clerk lo hồ sơ bệnh nhân tại các bệnh viện và viện dưỡng lão, viết lại toa bác sĩ, trả lời điện thoại, chuyển những lời nhắn lại, và ghi các chi tiết liên quan đến sự bình phục của bệnh nhân.

I-A Mục Tiêu của Học Viên: quen thuộc với các danh từ cần dùng để thi hành phận sự của người ward clerk.

I-B Ngữ Vựng:

1. hồ sơ
2. biểu đồ
3. nhiệt độ
4. người y sĩ
5. người tiếp khách
6. cuộc giải phẫu
7. mạch
8. thuốc men
9. xin, yêu cầu
10. kiêng ăn
11. sản khoa
12. nhi khoa
13. thuộc về văn phòng
14. có cảm tình
15. thuốc về y khoa
16. thuộc về khoa giải phẫu
17. thuộc về bệnh viện
18. dịch ra, chuyển ra
19. vất vả, khó nhọc
20. hoàn cảnh
21. đòi hỏi

I-C Bài Đối Thoại:

Bà Lewis: Mình có một bệnh nhân mới ở phòng 303.

Ô. Được: Thưa bà, bà có muốn tôi điền các chi tiết cá nhân vào phiếu của bà ta không?

LEVEL II

LESSON I

HEALTH CAREERS

WARD CLERK

Ward clerks prepare records on patients in hospitals and nursing homes, transcribe doctors' orders, answer telephones, relay messages, and record information regarding patients' medical progress.

I-A Student Objectives: The student will be familiar with the terminology required to carry on the duties of a ward clerk.

I-B Vocabulary:

1. records
2. charts
3. temperature
4. physician
5. receptionist
6. surgery
7. pulse
8. medication
9. requisition
10. diet
11. obstetrics
12. pediatrics
13. clerical
14. sympathetic
15. medical
16. surgical
17. clinical
18. transcribe
19. require
20. hard
21. initiation

I-C Dialogue:

Mrs. Lewis: We have a new patient in Room 303.

Mr. Duoc: Would you like me to fill out her information sheet?

Bà Lewis: Có, Ông làm ơn. Tôi đang bận đưa thuốc cho bệnh nhân.

Ô. Được: Ai là bác sĩ của bà ta?

Bà Lewis: Bác Sĩ Jones. Bác sĩ sẽ tới thăm bà ta vào buổi sáng.

Ô. Được: Tôi sẽ để sẵn biểu đồ khi bác sĩ tới.

Bà Lewis: Cám ơn Ông.

I-D <u>Bài Văn Phạm - Thể Bớt Vần (Thể Tỉnh Lược)</u>.

Hình thức của động từ ở Thể Phủ Định có thể làm ngắn đi bằng cách bớt vần. Phần lớn đổi bằng cách bỏ chữ "o" trong chữ <u>not</u> và thay bằng một dấu phẩy. Một vài trường hợp thay hẳn cách đánh vần. <u>Thí dụ</u>: will not - won't

<u>Bài Tập 1</u>: Hãy đổi những động từ trong Thể Phủ Định có kẻ dưới thành Thể Bớt Vần:

<u>Thí dụ</u>: cannot - can't

do not - don't

Mrs. Lewis: Yes. I am busy passing out medications.

Mr. Duoc: Who is her doctor?

Mrs. Lewis: Dr. Jones. He'll see her in the morning.

Mr. Duoc: I'll have the chart ready for him when he comes in.

Mrs. Lewis: Thank you.

I-D Grammatical Focus - Contractions

Many negative verb forms can be shortened to contractions. Most are changed by taking out the o in not and replacing it with an apostrophe. A few exceptions change spelling; example: will not - won't

Teacher's Note: While spoken Vietnamese has elisions, there are no written contractions.

Exercise 1: Write the sentences, changing the underlined verbs and negatives to contractions.

Example: cannot - can't do not - don't

1. The patient does not want surgery.
2. A ward clerk cannot do clinical work.
3. The patient must not go off her diet.
4. The doctor will not give her any medications.
5. Pediatrics should not care for adults.
6. The nurse is not sympathetic.
7. We could not take his temperature.
8. The records have not arrived.
9. A doctor would not do clerical work.
10. Do not disturb the patient.

Bài Tập 2: Chữ it's bao giờ cũng có nghĩa là it is hay là it has. Đó là thể bớt vắn của it is hay it has và luôn luôn có 1 dấu phẩy. Hãy đổi it is và it has thành it's trong những câu sau đây:

Thí dụ: It is going to rain - It's going to rain.

It has rained all day - It's rained all day.

I-F Bài Tập Bổ Túc:

1. Hãy đi thăm 1 trường có lớp dạy về nghề ward clerk. Nói chuyện với vị cố vấn về những môn cần thiết để lấy chứng chỉ.
2. Đi thăm phòng nhân viên của bệnh viện. Nói chuyện với vị cố vấn trong công việc về các nhiệm vụ của ward clerk.

Exercise 2: The form of "it's" always means it is or it has. It's is a contraction of it is, or it has, and always uses an apostrophe. In the following sentences, change "it is", and "it has", to "it's".

Examples: It is going to rain. It has rained all day.
It's going to rain. It's rained all day.

1. It is a good job.

2. It has advanced in pay.

3. Do you think it is difficult work?

4. It is very hard work.

5. It is too hard for me.

6. It has become more detailed.

7. It is an interesting occupation.

8. It is rewarding to help people.

9. It is necessary to be in good health.

10. It has been fun working with children in pediatrics.

I-E Reading:

Do you like to work with people? Before you decide on a career as a ward clerk, ask yourself if you like working with people. You will be spending a lot of time talking with patients, getting information from them for their hospital records, talking with doctors and nurses. You might be working in pediatrics with children, or in the obstetrics with new mothers. A ward clerk should be able to get along with all kinds of people in many different situations. People who are ill are not often easy to get along with, and you must have a lot of patience and understanding.

I-F Additional Exercises:

1. Visit a school that teaches the course for Ward Clerk. Talk to a counselor about the subjects required to receive a diploma.

2. Visit a hospital employment office. Talk to the Employment Counselor about the duties required for a Ward Clerk.

Mấy câu giúp ích cho cuộc đi thăm....

Tôi muốn dược...

Thưa Ông/Bà có thể cho tôi biết...?

Đó là một việc tôi...

Tôi không biết...

Có phải tôi sẽ làm việc với...?

Có phải tôi sẽ cần...?

Tôi nghĩ là tôi muốn...

Structures that may be useful in the situation:

I would like....
Could you tell me....
It's a job I....
I don't know....
Would I work with....
Would I need...
I think I would like....

TRÌNH ĐỘ II

CÔNG VIỆC THƯ KÝ VĂ VĂN PHÒNG

Tất cả các phương pháp ghi chép và kế toán đều liên quan đến việc lưu trữ hồ sơ, sổ sách. Máy điện toán hoạt động cùng với một số các máy khác trong văn phòng đưa đến kết toán. Máy điện toán có khả năng ghi nhận một số lớn tin tức và giải những bài toán phức tạp rất nhanh chóng. Nhiều trường chuyên nghiệp có dạy về máy điện toán trong các chương trình kế toán và phương pháp "data processing."

Thư Ký Kế Toán: phải học những nhiệm vụ cần thiết trong việc ghi chép hồ sơ của bất cứ ngành thương mại nào, qua cách thực hành kỹ thuật căn bản về việc lưu trữ hồ sơ kế toán.

Chuyên viên máy "data processing" phải học cách điều khiển máy để đưa các tin tức vào máy điện toán và máy dùng để thu lại những tin tức từ máy điện toán.

LEVEL II

Secretarial & Office

All data and accounting system are involved with the keeping of records. The computer works with a number of other office machines to process data. Fast and capable, the computer handles large amounts of information, and carries out complex orders. At many vocational schools, there is a study of computers in the Accounting program as well as in Data Processing.

Account Clerk: The student learns to perform the duties essential to record keeping in any business, through the practical application of basic bookkeeping and accounting skills.

Data Processing Machine Operator: The student learns to operate the equipment that feeds information into the computer, and equipment used to recover information from the computer.

28. đồ để kẹp giấy
29. tiếp liệu
30. đồ để đóng kẹp

LEVEL II

LESSON II

GENERAL OFFICE

II-A <u>Student Objective</u>: The student will be able to understand and identify the functions, duties, and terms of a general office worker.

II-B <u>Vocabulary</u>:

1. supervisor
2. employer
3. office
4. receptionist
5. calculator
6. typewriter
7. desk
8. bookkeeper
9. copy
10. invoice
11. telephone
12. filing cabinet
13. folder
14. employee
15. mail
16. envelope
17. conference
18. delivery
19. address
20. pleasant
21. courteous
22. numerical
23. alphabetized
24. punctual
25. accurate
26. figure
27. require
28. paper clip
29. supply
30. stapler

II-C Bài Đối Thoại:

Chủ nhân: Cô làm ơn mở thư ra hộ.

Thư ký: Dạ. Thưa Ông có muốn tôi đi đưa thư không?

Chủ nhân: Cô đưa dùm. Thế cô có cất giữ hồ sơ không?

Thư ký: Tôi sẽ xếp văn thư vào đúng hồ sơ.

Chủ nhân: Thế cô có cất những hóa đơn cho ngày hôm nay không?

Thư ký: Dạ thưa tôi đã cất theo thứ tự a, b, c rồi

Chủ nhân: Đây là mấy con số cần phải thêm vào.

Thư ký: Thưa tôi có thể dùng máy tính được không?

II-D Bài Văn Phạm - Số nhiều.

Bài Tập 1: Hãy đổi những danh tự sang số nhiều bằng cách thêm "s":

Thí dụ: singular: letter

plural: letters

II-C Dialogue:

Employer: Will you open the mail, please?

File Clerk: Yes. Would you like me to deliver it?

Employer: Please. Then will you do the filing?

File Clerk: I will put the letters in the proper file folders.

Employer: Will you file the invoices for the day?

File Clerk: I already have them alphabetized.

Employer: Here are some figures to be added.

File Clerk: May I use the calculator?

II-D Grammatical Focus - Plurals

Exercise 1: Change the nouns to plural form by adding s.
Drop a or an when necessary.

Example: singular-letter
plural-letters

Teacher's Note: Vietnamese nouns are invariant. Plurals are formed by adding a word such as several, three, many, etc. Vietnamese speakers may therefore tend to ignore plural endings.

1. Open the letter.
2. This letter requires an answer.
3. Will you file this invoice?
4. She used a paper clip.
5. The supervisor is in a conference.
6. Put the envelope in the drawer.
7. The office has a desk.
8. Type the letter neatly.
9. Please copy the notice for the bulletin board.
10. The visitor can wait in this office.

II-E Bài Văn Phạm - Thể Phủ Định.

Bài Tập 1: Hãy đổi những câu sau đây thành thể phủ định bằng cách thêm "not" vào đúng chỗ:

Thí dụ: The address is complete

The address is not complete

II-F Bài Văn Phạm - Thể Nghi Vấn (câu hỏi).

Bài Tập 1: Hãy đổi những câu sau đây thành câu hỏi bằng cách xếp lại thứ tự của chữ:

Thí dụ: Your filing should be done accurately.

Should your filing b e done accurately?

II-E Grammatical Focus - Negatives

Exercise 1: Change the following sentences to negative form by adding the word not in the correct place.

Example: The address is complete.
The address is not complete.

1. The supervisor is in the office.
2. The file drawer is open.
3. Your desk is very neat.
4. The telephone is ringing.
5. I do have many duties here.
6. The employee is late.
7. This invoice has been paid.
8. Today you can use the calculator.
9. The receptionist is answering the telephone.
10. There are many letters to be answered.

II-F Grammatical Focus - Questions

Exercise 1: Change the following statements to questions by inverting the word order.

Example: Your filing should be done accurately.
Should your filing be done accurately?

1: The supervisor is in the office.
2. You should greet visitors pleasantly.
3. The mail is ready to be sorted.
4. The conference will begin today.
5. The address on this envelope is correct.
6. More supplies are needed.
7. The letter is in the file.
8. The typewriter needs cleaning.
9. The stapler is empty.
10. The invoices are up-to-date.

II-G Bài Kiểm.

Bài Tập 1: Hãy làm bài tập sau đây:

II-G Comprehension:

Exercise 1: Complete the following exercises.

1. If an office worker opens the "in-coming", she opens the _____.

   (a) mail (b) calculator (c) stapler

2. A receptionist should answer a telephone pleasantly and promptly.

   True or false? _____

3. It is important to _____ papers in the proper place so they do not get lost.

   (a) hold (b) file (c) place aside

4. To total numbers, use a _____.

   (a) calculator (b) telephone (c) typewriter (d) invoice

5. Place the following in the proper alphabetical order for filing:

   Wrapping Machine Co.
   General Motors
   Ford Motors Company
   American Motors
   S.C. Johnson & Son, Inc.

6. It is important to keep filing accurate and up-to-date.

   True or false? _____

7. Essential office supplies include: (check 3)

   _____paper clips _____coffee cups

   _____clock _____stapler

   _____eraser _____handkerchief

8. It is easier to work if your _____ is orderly and neat.

   (a) home (b) desk (c) conference

9. A _____ is someone who greets callers and salespeople.

   (a) bookkeeper (b) receptionist (c) file clerk

II-I Bài Tập Bổ Túc:

1. Hãy đi thăm một số các văn phòng như Urban League, Spanish Center, CAP v.v. và hỏi xem nhiệm vụ của người thư ký là gì?
2. Đi thăm một hãng nhỏ và phòng nhân viên của một xưởng kỹ nghệ lớn hỏi xem nhiệm vụ của người thư ký là gì?
3. Hãy đi thăm Sở Tìm Việc để quan sát người làm văn phòng trong khi đang làm việc.
4. Đi thăm tất cả các hãng trong vùng bạn ở, nếu có các cuộc thăm viếng được tổ chức.

Mấy câu có thể giúp ích khi thảo luận về công việc ở văn phòng?

Phải cần có khả năng gì để làm công việc...?

Có cần phải có kinh nghiệm không...?

Làm thế nào để tài năng của bạn được tiến triển.

II-H **Reading:**

There are many different duties in some office jobs, while others may require doing a few things over and over. Talk to people you know and keep improving them - there may be chances to be promoted from general office work to other interesting jobs which have a higher salary. Read the want ads of your local newspaper every day to see what the requirements are for different companies and situations.

OFFICE

Our increase in business has created an immediate opening for experienced general office assitant for all around duties including receptionist, telephone, good typing, basic record keeping, and others.

Salary commensurate with ability, excellent working conditions and all fringe benefits.

Apply in person 8-4 daily
AIDE, INC.

II-I **Additional Exercises:**

A. Visit some community service offices, such as the Urban League, Spanish Center, CAP, etc., and ask what the duties of a clerk are.

B. Visit a small company and the employment office of a large industry to find out what the duties of a clerk would be.

C. Visit the State Employment Office to see office workers on the job.

D. Tour any companies in your vicinity where tours are offered.

Structure that may be useful in discussing office work:

What skills are necessary to handle the job?
Is any experience necessary...
How to improve the job skills you have...
Where to improve the skills you have...

TRÌNH ĐỘ II

CÁC CHƯƠNG TRÌNH HỌC CÁCH TIẾP ĐÃI KHÁCH

Các công việc dọn đồ ăn, một phần trong kỹ nghệ tiếp đãi khách, đang phát triển mạnh mẽ. Số người thích đi du lịch và ăn ở nhà hàng mỗi ngày một đông hơn. Dân số gia tăng, thành thị mở mang, tiền bạc dư dả để đi du lịch và ăn tại nhà hàng, tất cả những sự kiện đó đã giúp cho sự phát triển của kỹ nghệ tiếp đãi khách bành trướng.

Những người kém khả năng Anh ngữ có thể tìm công việc trong lãnh vực này. Huấn luyện về vệ sinh trong nhà bếp và giao tiếp với khách hàng có sẵn trong các trình độ trong chương trình về 'food preparation'* tại các trường kỹ thuật.

Bài học này cần được bổ túc bằng những cuộc đi thăm viếng các phòng thực tập 'food preparation'. Giảng viên của các phòng thực tập này có thể được mời đến để nói chuyện với học viên của cả lớp.

* *Food preparation: nói chung tất cả những nghề như nấu ăn, bề đồ ăn, dọn bàn, phụ bếp, rửa chén, v.v.*

LEVEL II

Hospitality Programs

Food service jobs, part of the hospitality industry, are booming. Greater numbers of people are traveling and dining out. With increases in population, urban development, and more money available for trips and meals away from home, growth continues.

Individuals with limited skills in English are employable in the hospitality industry. Training in proper kitchen procedures, sanitation, and public relations are available at various levels in the food service program at technical institutes.

This units should be supplemented by visiting food service labs or restaurants. Teachers in food services programs could be invited to talk to the class.

TRÌNH ĐỘ II

BÀI III

FOOD PREPARATION*

Nữ và Nam Hầu Bàn

III-A <u>Mục Tiêu của Học Viên</u>: quen thuộc với một số nhiệm vụ của người hầu bàn cũng như các ngữ vựng và cách đặt câu cần cho sự hiểu biết.

III-B <u>Ngữ Vựng</u>:

1. chồng lên có thứ tự
2. dọn sạch
3. sửa soạn
4. đặt mua
5. thay thế
6. để lại chỗ cũ
7. ăn cơm (tối)
8. thay thế vào
9. tiền "buộc-boa"
10. kiếm được (lợi tức)
11. gọn gàng
12. bữa điểm tâm nhẹ (bánh mì, bơ, mứt v,v.) theo lối Âu Châu
13. đặt ăn từng món riêng
14. lịch sự
15. có khả năng
16. không một vết bẩn
17. sửa soạn cẩn thận
18. ngon hơn hết
19. sự lựa chọn
20. món ăn chính
21. món ăn đặc biệt, cầu kỳ người sành điệu về những thức ăn
22. trình bày cho đẹp
23. nước xốt
24. rượu mùi (uống sau bữa ăn)

---

* <u>*Food Preparation:*</u> *nói chung tất cả những nghề như nấu ăn, phụ bếp, bê đồ ăn, dọn bàn, rửa chén, v.v.*

LEVEL II

LESSON III

FOOD PREPARATION

Waitress or Waiter

III-A Student Objectives: The student will become familiar with some of the duties of a waitress as well as the vocabulary and sentence structure needed for comprehension.

III-B Vocabulary:

1. stack
2. clear
3. prepare
4. order
5. replace
6. reset
7. dine
8. substitute
9. tip
10. earn
11. neatly
12. continental
13. ala carte
14. courteous
15. efficient
16. spotless
17. elaborate
18. prime
19. choice
20. entree
21. gourmet
22. garnishes
23. sauces
24. liqueur

25. rượu hỗn hợp, rượu "cốc-tay"

26. uống rượu trước bữa ăn (khai vị)

27. bát đựng nước rửa tay

28. bữa tiệc

29. tiền buộc boa

30. đồ uống

31. khay bày các đồ rau tươi và dưa leo muối, v.v.

32. ly rượu có chân

33. đồ sứ

34. đầu bếp

III-C Bài Đối Thoại:

Mary: Joe bị mất việc. Bây giờ tôi phải tìm việc làm để kiếm tiền.

Nhiệm: Chị có thích làm người hầu bàn không?

Mary: Tôi cũng chả biết nữa. Thế công việc có tốt không?

Nhiệm: Có chứ, tôi nghĩ là tốt. Làm nghề hầu bàn có thể có tiền "buộc boa."

Mary: Thế có chỗ nào trống ở chỗ anh làm không?

Nhiệm: Có một cô trong bốn vừa mới kết hôn và dọn nhà đi nơi khác.

Mary: Sáng mai tôi sẽ xin làm thế chỗ cô ta.

Nhiệm: Tôi sẽ nói với Ông Quản Lý là chị sẽ tới và chị là người làm việc giỏi.

III-D Bài Văn Phạm - Thì Tương Lai.

Bài Tập 1: Hãy đổi những động từ trong các câu sau đây thành thì tương lai bằng cách thêm "will":

Thí dụ: I go - I will go

I take - I will take

I see - I will see

25. coctails
26. appetizers
27. finger bowls
28. banquet
29. gratuities
30. beverages
31. relish tray
32. goblets
33. china
34. chef

III-C Dialogue:

Mary: Joe has lost his job. Now I must look for work to earn money.

Nhiem: Would you like to be a waitress?

Mary: I don't know. Is that a good job?

Nhiem: Yes, I think so. Waitresses can earn tips too.

Mary: Is there anything available where you work?

Nhiem: One of the women there just got married and moved away.

Mary: Tomorrow morning I will apply for her job.

Nhiem: I will tell the manager that you are coming and that you are a good worker.

III-D Grammatical Focus - Future Tense

Exercise 1: Change the following sentences to future time by adding will.

Examples: I go - I will go; I take - I will take; I see - I will see

1. I take a bath every morning.
2. I comb my hair neatly.
3. I walk to work.
4. I come to work on time.
5. I keep my work station clean.
6. I smile at the customers.

III-E Bài Văn Phạm - Thể Tính Lược (bớt vần).

Bài Tập 1: Hãy dùng thể bớt vần cho những động tự sau đây:

Thí dụ: do not - don't

III-F Bài Văn Phạm - Giới tự.

Bài Tập 1: Hãy dùng đúng giới tự on, to, from, by, at, for trong các câu sau đây:

Thí dụ: She always eats at the restaurant.

7. I give them menus.

8. I set the table.

9. I am courteous at all times.

10. I take orders and give them to the chef.

III-E Grammatical Focus - Contractions

Exercise 1: Write contractions for the following:

Examples: do not - don't will not - won't I am - I'm
does not - doesn't he has - he's he will - he'll
that is - that's

Teacher's Note: While spoken Vietnamese has elisions, there are no written contractions.

1. I will
2. she is
3. I am
4. what is
5. does not
6. will not
7. did not
8. they are
9. were not
10. cannot

III-F Grammatical Focus - Prepositions

Exercise 1: Write the sentences using the correct preposition from the following list: in, on, to, from, by, at, for.

Example: She always eats at the restaurant.

Teacher's Note: Because the use of prepositions is largely idiomatic, this is often confusing and deserves extensive practice. Location in Vietnamese is usually indicated in relation to the speaker rather than in relation to other objects. Confusion over the meanings of words such as "in, on, and by" can easily arise and care should be taken in demonstrating these concepts.

1. She always eats _____ the restaurant.
2. Don't sit _____ that chair.
3. He explained everything _____ me.
4. Thuy writes all the new words _____ her notebook.

III-G Bài Văn Phạm - Thì Quá Khứ.

Bài Tập 1: Hãy dùng câu xác định và phủ định để trả lời những câu hỏi sau đây:

Thí dụ: Did you serve the food?

Yes, I served the food.

No, I didn't serve the food.

III-H Bài Kiểm.

Bài Tập 1: Hãy tìm những chữ tương phản cho những chữ sau đây:

Thí dụ: up - down big - small

day - night in - out

5. They get us _____ eight o'clock in the morning.

6. I had only a sandwich _____ lunch.

7. He comes to work _____ bus.

8. She set the soup _____ the table.

9. Do you cake a sugar _____ your coffee?

10. What would you like _____ dinner?

11. I took the dessert _____ the tray.

12. There is a message _____ you.

III-G Grammatical Focus - Past Tense

Exercise 1: Give positive and negative answers to the questions.
Follow the example: Did you serve the food?
Yes, I served the food.
No, I didn't serve the food.

1. Did you wash you hands?

2. Did you wipe off the chairs?

3. Did you serve the appetizers first?

4. Did you bring the dessert?

5. Did you clear the table?

6. Did you refill the water as needed?

7. Did you provide teaspoons?

8. Did you replace dropped items with clean ones?

9. Did you present the check face down?

III-H Comprehension:

Exercise 1: Give opposites for each of the following words.

Example: up-down day-night big-small in-out

1. hot
2. on
3. late
11. top
12. food
13. full

III-J Bài Tập Bổ Túc:

1. Hãy ăn ở một nhà hàng và xét đoán công việc của người nữ hầu bàn. Ghi những nhiệm vụ khác nhau của cô ta.
2. Hãy cắt nghĩa cho bạn bè hay họ hàng tại sao bạn nghĩ là mình sẽ trở thành người hầu bàn giỏi?
3. Ở nhà tập làm người hầu bàn với những người trong gia đình hay với bạn bè.

Mấy câu giúp ích trong cuộc thảo luận về nhiệm vụ của một người hầu bàn.

Cô ấy không...

Cô ấy phải...

Tôi đi tới...

Có cần phải...?

Tôi xin đề nghị...

Ông có thích...?

Tôi có thể mang cho Bà/Cô/Ông...?

Thưa Bà/Cô/Ông cần thứ gì khác nữa không...?

4.	lose	14.	knife
5.	often	15.	arrive
6.	heavy	16.	useful
7.	high	17.	future
8.	thick	18.	sharp
9.	absent	19.	sweet
10.	sick	20.	warm

III-I Reading:

Good service is the same the world over. A good waitress is never out of work. She can use the knowledge of her profession as a career, as a part-time occupation, or at home. This knowledge, along with dependability, and honesty, will make her a valuable, successful, and trusted employee.

III-J Additional Exercises:

1. Eat in a restaurant and judge the waitress' performance. Note her different duties.

2. Explain to a friend or relative why you think you would be a good waitress.

3. Practice being a waitress at home with your family or friends.

Structures that may be useful in discussing the duties of a waitress:

She didn't...
She should have...
I'm going to...
Is it necessary to...
May I suggest...
Would you care to...
May I bring you...
Will there by anything else?

TRÌNH ĐỘ II

CÁC NGÀNH LIÊN HỆ ĐẾN KỸ NGHỆ

Sự hiểu biết về an toàn rất cần thiết trong các công việc để bảo vệ cho chính mình và những người cùng làm việc với mình. Những khái niệm an toàn sẽ được trình bày cho học viên trong các lớp ESL* đầu tiên.

Nhiều học viên ESL ít hiểu biết về các loại công việc trong các ngành kỹ nghệ hiện sẵn có, và những tài năng mà mọi việc đòi hỏi. Bốn loại công việc có trong Trình độ I là: Hàn, Bảo Trì, General Factory*, và việc Điều Khiển Máy; những công việc này đều có cơ hội huấn luyện và có công việc làm cho những người kém khả năng Anh ngữ.

Những buổi giảng dạy lý thuyết cần được bổ túc bằng những cuộc đi thăm viếng các phòng thực tập, quan sát các lớp huấn nghệ và đi thăm các khu kỹ nghệ. Các đại diện của Urban League*, các giảng viên dạy về kỹ nghệ và các người có trách nhiệm trong giới kỹ nghệ có thể được mời đi thăm các lớp học và thảo luận về các loại công việc và các cơ hội thực tập.

Thợ Máy Xe Hơi: chuyên môn căn bản gồm có: điều chỉnh máy, điều chỉnh thắng, cân bằng bánh xe, cho dầu, mỡ và bảo trì tổng quát cho xe.

Nhà cửa và xe cộ ngày nay phản ảnh một xã hội tự do, phong phú, và ai cũng có thể trang hoàng nhà và xe của mình theo ý thích riêng. Đồ đạc theo thời trang, vải vóc sang trọng, và bề trong của chiếc xe mới mẻ, rực rỡ, tất cả những thứ đó phản ảnh lối sống của chúng ta. Thủ công nghệ rất cần để làm cho xe cộ

---

* *ESL: học Anh ngữ như ngoại ngữ.*

General Factory: nói chung tất cả các loại xưởng trong ngành kỹ nghệ.

Urban League: là một hội tư có khế ước với chính phủ để giúp những người thiểu số được huấn nghệ và tìm công việc làm và là một hội rất có thế lực tại Hoa Kỳ.

LEVEL II

Industrial Related

An awareness of good safety practices is needed in all types of industrial jobs for the protection of self and others. These concepts can be understood if presented early in ESL classes.

Many ESL students have a very limited knowledge of the variety of industrial jobs available and of the skills each requires.

The units should be supplemented with visits to the labs, observation of the classroom and industrial tours. Representatives of the Urban Leaque, industrial teachers or persons from industry could be invited to visit the class and discuss the types of jobs and training opportunities.

Auto Mechanic: Basic skills in auto tune-up, brake adjustment, wheel balancing, lubrication, and general auto servicing.

The home and the automobile today reflect a freer, more affluent society, and home and car owners decorate as they wish. Period furniture, luxurious fabrics, and bright new interiors in our cars, all reflect the way we live. Craftsmanship is called for in fitting out both the car and the home. The diploma programs at Technical Institutes, described below, supply it.

cũng như nhà cửa được đẹp đẽ. Những chương trình học có cấp chứng chỉ ở các trường kỹ thuật được trình bày sau đây.

Bọc nệm và trang hoàng chiếc xe: chuyển từ công việc giản dị đến công việc phức tạp hơn, học viên học cách dùng dụng cụ, máy móc và đồ dùng như: lò xo, nhồi nệm, đo và cắt vải bọc, cách làm nệm, nhồi bông vào nệm; làm những phần bằng gỗ của xe hơi, sửa và làm lại khung xe, đánh bóng những chỗ mặt gỗ. Người bọc nệm làm việc ở những hãng làm nệm, công ty làm đồ đạc, hãng sản xuất xe hơi, của tiệm bán xe hơi và trang hoàng xe và các nhà buôn bán đồ đạc.

Làm đồng: phương pháp uốn nắn kim loại là việc thiết yếu cho lối sống của chúng ta ngày nay, các trường kỹ thuật có cung ứng ba ngành học khác nhau về nghề uốn nắn kim loại. Những người tốt nghiệp trong tất cả các lãnh vực luôn luôn được trọng dụng. Ngành làm đồng cung ứng cho tất cả các giai đoạn của việc sửa chiếc xe bị hư hại, gồm có việc vỗ phẳng những chỗ móp, làm nhẵn, mài, đánh giấy nhám, và kín các lỗ thủng. Sửa sang che đậu các chỗ khuyết điểm, sơn và thay các đồ phụ tùng và trang hoàng bề ngoài chiếc xe.

Sửa các loại máy nhỏ: kỹ thuật và cách thức sửa những dụng cụ như máy cắt cỏ, máy gạt tuyết, máy chạy sàng. Nhiều cách giảng dạy có sẵn tại các phòng thực tập.

Nghề đọc họa đồ: tài năng chuyên môn này rất cần cho nhiều công việc trong lãnh vực kỹ nghệ.

Upholstery & Auto Trim: Moving from the simple to the more complex task, the student learns how to handle tools, equipment, and supplies: spring tying, stuffing, ordering and cutting materials; cushion construction, tufting, channel back; woodworking, repair and restyling of frames; finishing and refinishing wood surfaces. The upholsterer is employed in custom upholstery shops, furniture factories, auto manufacturing, auto and body trim shops and furniture shops.

Auto body: the process of shaping metal is a vital part of the way we live today, and Technical Institutes offer several different career education choices in metal shaping. Graduates in all areas are always in demand. Auto body offers all phases of repair to damaged cars, including metal straightening, smoothing, grinding, sanding, and filling-in. Concealment of flaws, painting, and replacement of body components and trim are stressed.

Small Engine Repair: Techniques and methods for repairing equipment such as lawn mowers, snow blowers, gasoline engines. Much "hands on" instruction in a lab setting.

Blueprint Reading: Skill development necessary for many industrial jobs.

TRÌNH ĐỘ II

BÀI IV

THỢ SỬA MÁY XE HỞI

IV-A Mục Tiêu của Học Viên: hiểu một số phận sự và huấn luyện cần thiết để trở thành người thợ máy xe hởi.

IV-B Ngữ Vựng:

1. người lái buôn
2. khách hàng
3. điều chỉnh cho máy chạy đúng
4. người ghi những việc sửa chữa cho chiếc xe
5. solenoid (bộ phận ngắt điện khi muốn tắt máy)
6. sự bảo đảm
7. ignition (sự sinh điện trong máy để đốt hơi sáng cho máy nổ)
8. bộ phận trong ống pô làm giảm khói
9. chi nhánh
10. bu-di
11. bộ phận làm êm tiếng máy
12. miếng cao su của cần gạt nước
13. bị trục trặc, khuyết điểm không hoàn toàn
14. canh lửa
15. kho hàng
16. có sẵn trong kho
17. sửa chữa
18. canh ra-lăng-ti

IV-C Bài Đối Thoại:

Thụy là người ghi công việc sửa chữa và phải viết tất cả những việc phải làm. John, thợ sửa xe, sẽ làm gần hết các việc sửa chữa.

Thụy: John, ngày mai trên đường đi làm, Anh hãy mang cái xe Ford 1974 màu xanh của Ông Mark lại nhé. Tôi muốn anh điều chỉnh lại lửa điện (canh lửa). Máy xe không ngừng chạy khi anh tắt máy.

John: Thế sáng nay Ông ta gọi Anh hả?

Level II

Lesson IV

AUTO MECHANICS

IV-A Student Objective: The student will be able to understand some of the duties and training necessary in becoming an auto mechanic.

IV-B Vocabulary:

1. dealer
2. customer
3. tune-up
4. service writer
5. solenoid
6. warranty
7. ignition
8. exhaust system
9. department
10. spark plug
11. muffler
12. wiper blade
13. defective
14. timing
15. warehouse
16. in-stock
17. fix
18. idle

IV-C Dialogue:

Thuy is the service writer and must write up all work orders. John is the mechanic and will be doing most of the repair work.

Thuy: John, on your way to work tomorrow, will you bring in the blue 1974 Ford that belongs to Mark. I want you to recheck the ignition timing. The car's engine does not stop when you shut the ignition switch off.

John: Did he call you this morning?

Thụy: Không, Ông ấy gọi ngày hôm qua. Sao vậy?

John: À, tuần vừa rồi khi anh nghỉ phép, tụi tôi điều chỉnh lại máy xe của Ông ta và tôi bảo Ông ấy là mình sẽ phải thay bộ phận ngắt điện vì nó bị trục trặc. Mình không có sẵn bộ phận thay, bởi vậy chúng tôi đã đặt mua ở kho hàng Chicago.

Thụy: Khi nào thì đồ tới?

John: Tố. chắc là hôm nay ban đồ phụ tùng đã nhận bộ phận ngắt điện trong kho.

Thụy: Thế mai anh có lấy xe không?

John: Dạ có.

Thụy: Tôi sẽ kêu Ông Mark và cho ông ta biết là anh sẽ đến lấy xe và bảo cho Ông ấy yên trí là công việc làm sẽ có bảo đảm.

John: Cái xe cũng cần phải sửa lại bộ phận giảm khói trong ống pô và cần một miếng cao su cho cần gạt nước.

Thụy: Khi nào gọi điện thoại, tôi sẽ cho ông ta biết những việc trục trặc đó.

IV-D <u>Bài Văn Phạm - Số nhiều.</u>

<u>Bài Tập 1</u>: Hãy đổi những động từ số ít sang số nhiều bằng cách thêm "s"

<u>Thí dụ</u>: (singular) Ford - (plural) Fords

Thuy: No. Yesterday is when he called. Why?

John: Well, last week while you were on vacation, we gave his engine a tune-up, and I told him that we would have to replace the idle solenoid because it is defective. We didn't have the part in stock, so we ordered it from the Chicago warehouse.

Thuy: When will the part come in?

John: I believe the parts department has the solenoid in stock now.

Thuy: Will you pick up the car tomorrow?

John: Yes.

Thuy: I will call Mark and tell him that you will pick up the car and reassure him that the work will be done under warranty.

John: The car also needs exhaust system work and at least one wiper blade.

Thuy: I will tell him about those problems when I call.

IV-D Grammatical Focus - Plurals

Exercise 1: Change the noun forms from singular to plural by adding s.

Example: (singular) Ford (plural) Fords

Teacher's Note: Vietnamese nouns are invariant. Plurals are formed by adding a word such as several, three, many, etc. Vietnamese speakers may therefore tend to ignore plural endings.

1. I want to recheck the car.
2. Will you pick up the automobile?
3. We will check the timing of the engine.
4. There will be no charge to the customer.
5. We will change the part under warranty.
6. Does Mark want the spark plug replaced?

IV-E Bài Văn Phạm - Thể Phủ Định.

Bài Tập 1: Hãy đổi những câu sau đây sang Thể Phủ Định bằng cách thêm "not":

Thí dụ: I will get the car - I will not get the car

IV-F Bài Văn Phạm - Thể Nghi Vấn.

Bài Tập 1: Hãy đổi những câu sau đây thành câu hỏi bằng cách đổi lại thứ tự của chữ:

Thí dụ: The 1974 Ford is blue - Is the 1974 Ford blue?

7. There is a problem with the tire on Mark's car.

8. The car will need a quart of oil when we reset the idle speed.

9. The car needs the muffler replaced.

10. The owner will pay for the wiper blade.

IV-E Grammatical Focus - Negatives

Exercise 1: Change the following sentences from positive to negative by adding not in the correct place.

Example: I will get the car. (positive) I will not get the car. (negative)

1. He did call this morning.

2. The car can be turned off.

3. The car does idle all right.

4. Manuel is the mechanic.

5. The work will be done today.

6. The car does run too slow.

7. The solenoid is all right.

8. The car is fixed in the shop.

9. Mark is the service writer.

10. Mike does have the parts.

IV-F Grammatical Focus - Questions

Exercise 1: Change the following statements to questions by inverting the word order.

Example: The 1974 Ford is blue. (statement) - Is the 1974 Ford blue? (question)

1. John will bring in the blue Ford tomorrow.

2. The ignition timing is to be checked.

3. The car ignition will turn off.

4. Mark did call in today.

5. Thuy was on vacation last week.

IV-H <u>Bài Tập Bổ Túc</u>:

1. Hãy gọi một người buôn, bán xe hỏi và cho họ biết bạn muốn trở thành người thợ máy.
2. Sau đó thăm và thảo luận với người buôn bán xe xem bạn cần phải huấn luyện những gì và hỏi họ về học vấn và kinh nghiệm bạn cần có cho 3 trình độ căn bản trong công việc sửa xe.

Mấy câu có thể giúp ích khi nói chuyện với người buôn xe:

Cần loại huấn luyện nào cho.....?

Chương trình huấn luyện mất bao nhiêu lâu.....?

Tôi có thể xin huấn luyện ở đâu.....?

Tôi cần phải làm việc với những dụng cụ nào.....?

Tiền lương và những quyền lợi.....?

6. The solenoid is defective.

7. The part was ordered from the warehouse.

8. The part is in stock now.

9. We will pick up the car tomorrow.

10. The work is to be done under warranty.

IV-G Reading:

Before you decide on becoming a mechanic, ask several employed mechanics about how they like the work. Ask them about their training and how much they may expect to earn.

IV-H Additional Exercises:

1. Call an automobile dealer and tell them you are interested in becoming an auto mechanic.

2. Then visit and discuss with the dealer what training you would need and ask him questions about the education and experience you need for the three basic levels in a service garage.

Structures that may be useful in the conversation with the dealer:

What type of training is needed for.....?
How long is the training program.....?
Where may I obtain the training for.....?
What tools will I need to work as.....?
The job salary and benefits are.....?

TRÌNH ĐỘ II

BÀI V

THỢ SỬA CÁC LOẠI MÁY NHỎ

V-A Mục Tiêu của Học Viên: nhận biết các bộ phận của một máy nhỏ và trở nên thông thạo trong cách dùng cuốn liệt kê các bộ phận máy.

V-B Ngữ Vựng:

1. một bộ phận chạy bằng hơi nước hay điện dùng để kiểm soát, giới hạn và làm đều tốc độ của một bộ máy.
2. "biên" (một loạt các cần nhỏ dùng để truyền sự chuyển động từ pít tông đến bánh xe.)
3. "pít tông" (một bộ phận hình ống tròn đặt trong một si lanh dùng để cung cấp sự chuyển động cho một bộ máy.)
4. nắp che bộ máy
5. "si lanh" (một bộ phận hình ống trong có pít tông.)
6. một loại bù loong (có ốc xoáy ở một đầu.)
7. sách chỉ dẫn
8. "doành" (một miếng kim khí mỏng, nhẹ dùng làm miếng đệm giữa ống si lanh và đầu ống si lanh để cho chắc và kín.)
9. tham khảo
10. bu gi
11. một nhóm bánh xe răng cưa chuyển động dây truyền dùng để điều chỉnh sự phát điện trong máy
12. "xú báp" (nắp mở hay đóng, ngăn hơi nhiên liệu trong ống si lanh.)
13. "cạt-bu-ra-tơ" (một bộ phận làm tan nhiên liệu với không khí, làm nhiên liệu thành những hạt nhỏ và kiểm soát nhiên liệu theo đúng như bộ máy cần.)

Level II

Lesson V

SMALL ENGINE REPAIRMAN

V-A <u>Student Objective</u>: The student will be able to identify the parts of a small engine & be familiar with the use of a parts manual.

V-B <u>Vocabulary</u>:

1. Tecumseh
2. governor
3. linkage
4. piston
5. housing
6. cylinder
7. bolt
8. manual
9. reference
10. gaskets
11. spark plug
12. timing gear
13. valve

14. sự mòn, hư đi

15. nhíp, lò so (ống nhún)

16. một loại máy nhỏ 3 mã lực dùng để chạy máy cắt cỏ, máy bơm, máy phát điện, v.v.

V-C <u>Bài Đối Thoại</u>:

Giữa Cathy và Xưởng. Cathy, người học việc, đang cần cái "governor spring" cho máy Tecumseh cô ta đang sửa. Xưởng là chủ tiệm và có kinh nghiệm lâu năm.

Cathy: Này Xưởng, anh có thể tìm giúp tôi cái "governor spring" cho máy Tecumseh LAV 30 tôi đang sửa đây không?

Xưởng: Cathy, thế cô có coi trong cuốn sách tham khảo hay cuốn chỉ dẫn các bộ phận máy không?

Cathy: Dạ không.

Xưởng: "cạt-bu-ra-tơ" của máy Tecumseh dùng "biên" và lò so khác thường, nên cần phải có bộ phận đúng nếu không máy sẽ bị giật khi sang số.

Cathy: À, nhìn vào cái bu-ơi tôi có thể nói là lò so của cái "governor" bị mất từ nhiều tuần nay vì thấy máy bị nóng và bị mòn quá nhanh Này Anh Xưởng, có lẽ anh phải dò xem ống si lanh và pít tông bị mòn thế nào.

Xưởng: Ý kiến hay lắm. Nếu thấy là máy bị hư vì quá nóng, mình cần phải tìm các đồ phụ tùng trong cuốn chỉ dẫn các bộ phận máy bằng cách dùng đúng số của loại máy và phải đo lại tất cả các bộ phận xem bị mòn ra sao.

Cathy: Thế tất cả các phụ tùng của máy Tecumseh LAV 30 không giống nhau hay sao?

14. carburetor

15. wear

16. spring

V-C <u>Dialogue</u>: Between Cathy and Mr. Xuong; Cathy is a trainee needing a governor spring for the Tecumseh engines she is repairing. Mr. Xuong is a shop owner with many years of experience.

Cathy: Mr. Xuong! I wonder if you could help me find the governor spring for the Tecumseh model LAV 30 which I am repairing.

Xuong: Cathy, did you look the part up in the quick reference manual, or in the parts manual?

Cathy: No.

Xuong: The Tecumseh carburetors use some unusual linkages and springs and it is important to have the correct one or the engine will not run smoothly when changing speeds.

Cathy: Well, I can see that from looking at the spark plug, the engine's governor spring has been missing for several weeks because the engine shows heat damage and a lot of wear. Maybe, Mr. Xuong, you should measure the cylinder and piston for wear.

Xuong: That is a good idea. If the engine shows heat damage, we will need to look up the parts from the engine service manual by using the specific engine type number and then measure the parts for wear.

Cathy: Aren't all the parts for a Tecumseh LAV 30 the same?

Xưởng: Không, có trên một trăm loại carburators và "biên" khác nhau dùng cho cái LAV 30 và có mấy loại "head gaskets" khác nhau nữa.

Cathy: Thế số của loại máy đóng ở đâu?

Xưởng: Thường đóng ở trên bộ phận bao máy.

Cathy: Thế những bộ phận bên trong máy của máy Tecumseh LAV 30 có giống nhau không?

Xưởng: Không, những bộ phận mà hãng Sears dùng có cái "timing gear" khác và một số carburators và dầu "xú-báp" cũng vậy. Như vậy mình phải tìm kiếm các bộ phận bằng số trước khi mình dò xem nó hư thế nào.

V-D <u>Bài Văn Phạm - Số nhiều</u>.

<u>Bài Tập 1</u>: Hãy đổi những chữ có kẻ dưới từ số ít sang số nhiều bằng cách thêm "s" hay "es."

<u>Thí dụ</u>: singular: engine

plural: engine<u>s</u>

Xuong: No. There are over 100 different carburetion and linkage spring combinations used on the LAV 30 and quite a few different head gaskets.

Cathy: Where is the type number stamped?

Xuong: Usually on the engine housing.

Cathy: Are the internal engine parts all the same on a Tecumseh LAV 30?

Xuong: No. On the ones used by Sears, the timing gears are different and so are some of the carburetors and valves. So we will have to look up the part by number before we can measure the part for wear.

V-D Grammatical Focus - Plurals

Exercise 1: Change the singular to plural by adding an s.

Example: (singular) engine (plural) engines

Teacher's Note: Vietnamese nouns are invariant. Plurals are formed by adding a word such as several, three, many, etc. Vietnamese speakers may therefore tend to ignore plural endings.

1. I want to find the correct governor spring.
2. We need the correct model number.
3. Did you check the cylinder for wear?
4. Did you check the head bolt?
5. We will need the Tecumseh service manual.
6. We will need to look up the part in the service manual.
7. Will you measure the piston for wear?
8. We need to replace the gasket.
9. Replace the gasket set on the carburetor.
10. Remove the spark plug.

V-E Bài Văn Phạm - Thể Phủ Định.

Bài Tập 1: Hãy đổi những câu sau đây sang Thể Phủ Định bằng cách thêm "not" vào đúng chỗ trong mỗi câu:

Thí dụ: Engines are easy to fix (positive)

Engines are not easy to fix (negative)

Bài Tập 2: Hãy đổi những câu sau đây sang thể Phủ Định bằng cách thêm do not, did not, hay does not khi cần:

Thí dụ: The carburator works well.

The carburator does not work well.

(Khi động tụ chính chia cùng với trợ động tụ, thì động - tụ chính ở ngôi thứ 3 số ít bao giờ cũng phải bỏ "s" đi.)

V-E Grammatical Focus - Negatives

Exercise 1: Change a positive statement to a negative statement by adding the word not to the sentence.

Example: Engines are easy to fix. (positive)

Engines are not easy to fix. (negative)

1. I can find the governor spring.
2. I can find the model number.
3. I did look in the quick reference manual for a part number.
4. We must measure the cylinder for wear.
5. The engine is damaged.
6. The number is stamped on the engine housing.
7. The governor assembly is complete.
8. Xuong can help Cathy find the governor parts.
9. Cathy can find the part by herself.
10. The head gasket must be replaced.

Exercise 2: Change the following statements from positive to negative by adding do not, does not and changing the verb form when necessary.

Example: The carburetor works well.

The carburetor does not work well.

1. Jack helped Thach with the piston.
2. Friction wears the cylinder.
3. Bob dropped the engine.
4. The old manual pages fall out.
5. We need that part.
6. Get lost!
7. The piston moves up & down.
8. The old gasket leaks.
9. The spark plug fires correctly.
10. I found the governor spring.

V-F Bài Văn Phạm - Thể Nghi Vấn (câu hỏi)

Bài Tập 1: Hãy đổi những câu sau đây sang Thể Nghi Vấn bằng cách đổi lại thứ tự của chữ hay là dung do, did hay does:

Thí dụ: The Tecumseh engine is a good engine.

Is the Tecumseh engine a good engine?

The carburator works well.

Does the carburator work well?

V-H Bài Tập Bổ Túc:

1. Hãy hỏi bất cứ người chủ tiệm chữa các loại máy nhỏ nào xem những sự trục trặc gì liên quan đến việc chữa máy nhỏ.
2. Hãy đi thăm một cửa tiệm và hỏi một công nhân xem điều kiện làm việc ra sao và cần phải huấn luyện những gì?

V-F Grammatical Focus - Questions

Exercise 1: Change the following statements to questions by inverting the word order or adding a form of do.

Examples: Statement: The Tecumseh engine is a good engine.

Question: Is the Tecumseh engine a good engine?

Statement: The carburetor works well.

Question: Does the carburetor work well?

1. The engine needs repair.
2. The cylinder shows wear.
3. The governor spring is missing.
4. Jack looked the part up in the manual.
5. The cylinder head is loose.
6. The linkages and springs are unusual on Tecumseh engines.
7. Cathy will measure the engine's cylinder for wear.
8. The Tecumseh LAV 30 parts are all the same.
9. The number is on the air shroud.
10. The Sears gaskets are all the same.

V-G Reading:

There are limited kinds of jobs available in the area of small engine repair but there are thousands of industries which use small engines in their production equipment and these engines need periodic servicing and repair. If you check the newspaper you may find job openings with large firms in the area of maintenance or mechanical repair. There are several engine manufacturer schools as well as educational institutions that offer training and programs in the service and repair of small engines.

V-H Additional Exercises

1. Check with any small engine shop owner and discuss with him what kind of problems are associated with small engine work.
2. Visit of a shop and check with an employee about working conditions and what type of training is needed.

Mấy câu có thể giúp ích khi nói chuyện với người chủ hay công nhân trong một tiệm sửa các loại máy nhỏ:

Cần phải loại huấn luyện nào...?

Phải được huấn luyện trong bao nhiêu lâu...?

Cần phải dụng cụ gì...?

Tôi muốn được làm việc như...

Có những cơ hội tiến thân nào...?

Structures that may be useful in the conversation with the employer or employee of a small engine service shop.

What type of training is required in ....?
How long does the training take....?
I would like to work as...?
What advancements are there....?

TRÌNH ĐỘ II

BÀI VI

NGHỀ ĐỌC HỌA ĐỒ

VI-A Mục Tiêu của Học Viên: hiểu nghĩa và tác dụng của một bản họa đồ; làm quen với danh từ dùng trong việc vẽ họa đồ.

VI-B Ngữ Vựng:

1. bản vẽ
2. số hay thước tỷ lệ
3. kích thước
4. cái thước
5. in
6. lối sắp xếp
7. các hàng kẻ
8. diện đồ
9. kiến trúc sư
10. người vẽ họa đồ (vẽ hình của một bộ máy
11. kích thước, cách đo lường
12. bằng 2 phân 54
13. bằng 30 phân 48
14. họa đồ, kế hoạch
15. đo
16. ráp lại
17. làm, vẽ, kiến trúc
18. xây dựng, cấu tạo, kiến trúc
19. vẽ
20. coi, xem, đọc (bản họa đồ)
21. cho thấy, chỉ
22. đúng
23. chính xác

VI-C Bài Đối Thoại:

Ellen: Bức họa anh đang vẽ trông lạ quá.

Phúc: Đúng ra không phải là một bức họa mà đó là bản họa đồ.

Ellen: Một bản họa đồ?

Phúc: Dạ. Bản họa đồ chỉ dùng một vật định làm, hay định xây dựng.

LEVEL II

LESSON VI

BLUEPRINT READING

VI-A Student Objective: The student will be able to understand the meaning and function of a blueprint. He will also gain some familiarity with the terminology used in blueprinting.

VI-B Vocabulary:

1. drawing
2. scale
3. dimension
4. ruler
5. print
6. layout
7. lines
8. elevations
9. architect
10. draftsman
11. measurement
12. inch
13. foot
14. plan
15. measure
16. assemble
17. construct
18. build
19. draw
20. read
21. show
22. exact
23. accurate

VI-C Dialogue:

Ellen: That is a very strange picture you are drawing.

Phuc: It's not really a picture. It's a blueprint.

Ellen: A blueprint?

Phuc: Yes. Blueprints show exactly how something is constructed.

Ellen: Anh định nói như một căn nhà?

Phúc: Một căn nhà, một cái máy hay một dụng cụ tất cả đều xây (kiến trúc) hay chế tạo theo bản họa đồ.

Ellen: Tôi nghĩ là tôi đã thấy một người thợ mộc dùng cái này.

Phúc: Rất nhiều người trong các ngành khác nhau dùng họa đồ. Không có nó gần như là không thể xây cất các cao ốc hay ráp các máy móc.

Ellen: Trông nó khó làm quá.

Phúc: Nó không khó khi mà cô đã được huấn luyện để thành người vẽ họa đồ hay kiến trúc sư.

VI-D Bài Văn Phạm - Chủ Từ/Thuộc Từ.

Trong mỗi câu có 2 phần chính gọi là: Chủ Từ và Thuộc Từ. Chủ Từ chỉ những vật mình nói. Thuộc Từ (hay Động Từ) chỉ những gì mình muốn nói về chủ từ. Nếu thiếu Chủ Từ hoặc Thuộc Từ, chúng ta sẽ không thể làm thành một câu.

Thí dụ: The architect showed the blueprint to the carpenter.

Subject: the architect - Predicate: showed

Bài Tập 1: Hãy kẻ một giòng kẻ dưới chủ từ và 2 giòng kẻ dưới thuộc từ trong những câu sau đây:

Thí dụ: Many different people use the blueprints.

Ellen: You mean like a house.

Phuc: A house, a machine, or a tool are all made from blueprints.

Ellen: I think I saw a carpenter use one of these.

Phuc: Many different people use blueprints. Without them it would be almost impossible to build buildings or assemble machines.

Ellen: Blueprints look very hard to make.

Phuc: They are not difficult once you have the training required to become a draftsman or architect.

VI-D Grammatical Focus - Subject-predicate

There are two basic parts in every sentence. They are called subjects and predicates. Subjects name the things we are talking about. Predicates (or verbs) carry the action. If either the subject or the predicate is left out, then we do not have a sentence.

Example: The architect showed the blueprint to the carpenter.
subject: architect predicate: showed

Exercise 1: In the following sentence underline the subject once and the predicate twice.

Example: Many different people use the blueprints.

1. The architect showed the blueprint to the carpenter.
2. The scale for the building was one inch for every ten feet.
3. The blueprint required 42 pages.
4. The measurements for the new church were not accurate.
5. The engineer inspected the new bolts.

VI-E Bài Văn Phạm - Đại Danh Từ.

Đại Danh Từ là một chữ thay cho danh từ. Thí dụ: The workers assembled the machine. Workers và machine là danh từ. Đại danh từ có thể được dùng để thay cho những danh từ này. Thí dụ: They assembled it. They là đại danh từ thay cho chữ workers và it là đại danh từ thay cho chữ machine.

Bài Tập 1: Hãy viết các câu sau đây và thay những danh từ có kẻ dưới bằng những đại danh từ sau đây: I, me, he, him, she, her, you, we, us, they, them, it.

6. The draftsman took 8 hours to finish drawing the blueprint.

7. The blueprint had to be redrawn.

8. Special measuring instruments are used to draw blueprints.

9. The blueprint showed the side of the house from top to bottom.

10. The thought of designing the new hospital excited the architect.

VI-E Grammatical Focus - Pronouns

The pronoun is a word that takes the place of a noun.

Example: Workers assembled the machine.

They assembled it.

"Workers" and "machines" are nouns. They is a pronoun which replaces workers; and it is a pronun which replaces the machine.

Exercise 1: Write the following sentences, replacing the underlined nouns with pronouns. A list of pronouns are as follows: I, me, he, him, she, her, you, we, us, they, them, it.

1. Bill turned on the light above the drafting table.

2. The architect showed the blueprint to the carpenter.

3. The machine could not be assembled because the blueprints were missing.

4. The foreman could see the whole layout of the first floor by looking at the blueprint.

5. The new machinist had trouble reading the blueprint.

6. Fifty copies of the new blueprint were printed.

7. A scale model of the new bank was assembled by Jim.

8. Blueprints are also referred to as plans.

9. The light was turned on over the drafting tables.

VI-F Bài Văn Phạm - Thì của động từ. Draw, drew, drawn

1) Dùng draw (present) chỉ những hành động hiện tại, đang xảy ra ngay lúc này.

2) Dùng drew (past) chỉ những hành động đã qua, một việc đã xảy ra rồi.

3) Dùng drawn cùng với trợ động từ như was, were, has, had hay là have.

Bài Tập 1: Hãy dùng đúng chữ drawn, drew hay drawn trong những câu sau đây.

Thí dụ: The draftman draws the blueprint.

VI-F Grammatical Focus - Verb Tenses

draw, drew, drawn

1. Use draw when you are talking about the present--what is happening right now.

2. Use drew when you are talking about the past tense--something which has already taken place.

3. Use drawn only with a helping verb such as was, were, has, had, or have.

Teacher Note: Vietnamese verbs are both invariant and limited. There are fewer tenses than in English and they are formed by the context of the sentence rather than verb modification.

Exercise 1: Write the sentence using the correct word: draw, drew, or drawn.

Example: The draftsman drew the blueprint.

1. The draftsman _____ the blueprint.

2. I will_____ a layout.

3. The foreman asked if the blueprint was _____.

4. How can she _____ without a pen?

5. The building was _____ to the correct dimensions.

6. _____ up the plans by tomorrow!

7. Can Howard _____ as well as Julie?

8. He _____ the bushing to full scale.

9. I wish I could _____ blueprints like an architect.

10. He could not read the blueprint he had _____.

VI-H Bài Tập Bổ Túc:

1. Hãy dừng lại ở một chỗ đang xây cất để hỏi xem bản họa đồ; cắt nghĩa bạn là học viên và muốn được quan sát xem cách dùng bản họa đồ thế nào.
2. Hãy đi thăm một lớp dạy vẽ họa đồ ở một trường kỹ thuật. Trở nên quen thuộc với các dụng cụ và đồ dùng mà người vẽ họa đồ cần dùng.

VI-G Reading:

Blueprints play a very important role in constructing or assembling a building or machine. In fact, without them it would be almost impossible. A blueprint is like a map which shows the carpenter or machinist exactly what materials should be used and where to put them.

The draftsman or architect plays a key role in society. We are all dependent upon their skill. They take an idea and are able to draw it exactly. Each curve, line, and figure must be accurate.

Training is required to become a good draftsman or architect. It is a most challenging and rewarding profession.

VI-H Additional Exercises:

1. Stop at a construction site and ask to see the blueprints. Explain that you are a student and would like to observe how a blueprint is used.

2. Visit a drafting class at a technical institute. Become familiar with the tools and instruments used by a draftsman.

TRÌNH ĐỘ II

BÀI VII

NGHỀ LÀM ĐỒNG XE HỞI

VII-A Mục Tiêu của Học Viên: hiểu được tất cả các giai đoạn sửa chữa xe bị hủ, gồm có: vỗ phẳng kim khí, làm cho nhẵn nhụi, mài, và kín các lỗ thủng. Học viên sẽ được huấn luyện đặc biệt về sửa sang che dấu các khuyết điểm, sơn, thay đồ phụ tùng và trang hoàng cho chiếc xe.

VII-B Ngữ Vựng:

1. chỗ móp
2. mạ kền
3. vẽ xe
4. sơn
5. lượn sóng, như gợn sóng
6. dụng cụ
7. trục để kéo vật gì nặng
8. tay cầm quay trong một bộ phận máy
9. kim khí
10. một phần, một bộ phận
11. giây cua-roa
12. chất dùng để mài nhẵn (như cát, giấy nhám)
13. mỏ hàn (giống chiếc súng)
14. đánh bóng
15. thay
16. trang hoàng
17. tiếng va chạm của sắt
18. hàn bằng một chất hợp kim
19. sắt
20. đúng
21. hãn
22. co lại
23. nắp ca pô
24. chỗ bị đụng

Level II

Lesson VII

AUTO BODY

VII-A Student Objective: The student will be able to understand all phases of repair on damaged cars, including metal straightening, smoothing, grinding, sanding, filling-in. Concealment of flaws, painting, and replacement of body parts and trim are stressed.

VII-B Vocabulary:

1. dent
2. chrome
3. fender
4. paint
5. ripples
6. equipment
7. windlace
8. turret
9. metal
10. component
11. belt line
12. abrasive
13. burp gun
14. finish
15. replace
16. trim
17. ding
18. braze
19. iron
20. bump
21. weld
22. shrink
23. deck lid
24. point of impact

VII-C Bài Đối Thoại:

Chủ Nhân: Được rồi, Joe, tôi sẽ cho anh một cơ hội để tỏ cho tôi xem anh biết những gì về làm đồng chiếc xe.

Joe: Dạ Ông muốn tôi phải làm những gì?

Chủ Nhân. Tôi sẽ bảo người đốc công chỉ cho anh sửa cái ca pô xe bị bẹp. Joe, tất cả dụng cụ để làm đồng treo trên tường về phía đông và các dụng cụ sửa máy ở trên tường phía tây.

Joe: Thế cái xe đâu?

Chủ Nhân: Ở ngoài sân, đó là cái xe Chevy 1972 màu đỏ. Tôi muốn anh tháo và thay cái nắp ở đầu xe và sửa sang chỗ bị hư hại và coi lại chỗ bị dụng.

VII-D Bài Văn Phạm - Chữ đồng âm.

Sau đây là nghĩa của ba tiếng đồng âm (đọc nghe như giống nhau.)

To: toward (về phía; và dùng để đặt trước một động từ chưa chia)

Too: also (cũng)

Two: the number 2 (số hai)

Bài Tập 1: Hãy đặt đúng những chữ trên vào các câu sau đây: "to", "too" hoặc "two":

Thí dụ: Are you going to the shop?

I would like you to go too.

Now there are two of us going.

VII-C Dialogue:

Potential employer: O.K. Joe, I'll give you a chance to show me what you know about auto body repair.

Joe: What would you like me to do?

Potential employer: I'll have my foreman assign you on a smashed deck lid. Joe, all auto body tools are located on the east wall and all mechanical tools are on the west wall.

Joe: Where is the car?

Potential employer: Out in the lot and it's a 1972 red Chevy. I want you to remove and replace the deck lid and treat damages. Also, check for the initial point of impact.

VII-D Grammatical Focus - Homophones

Meanings of three words that all sound the same (homophones):

to - toward or infinitive preceding a verb

too - also or

two - the number 2

Exercise 1: Write the sentence using the correct word: to, too, or two.

Examples: Are you going to the Shop?

I would like to go, too.

Now there are two of us going.

1. There are _____ dents in the right fender.
2. Does it need a paint job _____?
3. Do you have _____ use a burp gun?
4. The ripples were ironed out _____.
5. - 6. It's _____ expensive _____ paint all of the car again.
7. This truck has _____ have new chrome.

VII-F Bài Tập Bổ Túc:

1. Hãy gọi chủ các hãng có thể mướn mình như Chevrolet-Cadillac Inc., Buick-Open Co., Lincoln-Mercury Inc. v.v. Hãy ghi lại những nhân sự của người thợ làm đồng mà hãng đòi hỏi.

2. Đi thăm một xưởng của hãng và coi tất cả các công việc xem bạn có thích làm việc ở đó không.

Mấy câu có thể giúp ích trong những trường hợp trên:

Tôi có phải dùng dụng cụ của tôi để trở thành...?

Bao nhiêu lâu...?

Tôi muốn làm việc...

VII-F Additional Execrise:

1. Call potential employers, such as Chevrolet - Cadillac Inc., Buick - Opel Co., Lincoln Mercury Inc., etc. & inquire what their requirement are for auto body repairmen.

2. Visit the agency's shop and take a tour of the facilities to see if you would like to work there.

   Structures that may be useful in the situation:

   Do I have to supply my own tools to become....?
   Is training required to become a ...?
   How long...?
   I would like to work....?

Bài Tập 2: Hãy dùng chữ nào đúng trong các câu sau đây và chỉ rõ nó là danh tự, động tự hay tính tự. (Những chữ này có thể dùng như những danh tự, động tự và tính tự.)

Thí dụ: The (dent) section was fixed_____adjective_____

8. The trim has _____ separate parts.

9. The windlace is part of the roof_____.

10. Hammers are used _____ pound out dents.

These words can be used as nouns, verbs, and adjectives:

paint, dent, trim, iron, bump

Excerise 2: Write the sentence using the correct form of the word in parentheses and identify whether it is being used as noun, verb, adjective or adverb.

Examples: The _____(dent) section was fixed.

The dented section was fixed. (adjective)

1. The _____(dent) was filled and sanded.

2. Ripples on the fender had been_____ (iron).

3._____(paint) had spilled on the chrome.

4. Cars are commonly _____ (bump) in the fender.

5. The fender was _____(dent) by the truck.

6. The _____(paint) door was not the right shade.

7. Joe _____ (iron) the ripples.

8. The _____ (trim) was covered before the car was painted.

9. He _____ (dent) the door when he opened it.

10. The auto body repairman _____(trim) the chrome.

VII-E Reading:

Auto body is a never-ending job. There is a high demand for good auto body men. Pay rates vary according to auto brand names. Visit the agency you are interested in and decide if you like that kind of work. Find out if there is additional training provided by the company or on-the-job training. Finally, ask how much the job pays before you decide on a career as an auto body man.

TRÌNH ĐỘ II

BÀI VIII

CHUYÊN VIÊN XUYÊN PHIẾU

VIII-A Mục Tiêu của Học Viên: hiểu biết công việc của một chuyên viên bấm phiếu và công dụng của máy keypunch*

VIII-B Ngữ Vựng:

1. bấm thành lỗ thủng trên mặt phiếu
2. tấm phiếu
3. phiếu được bấm thành lỗ sẵn sàng để được dùng trong máy điện toán
4. bấm theo vần a, b, c
5. bấm theo số
6. việc làm có thứ tự lần lượt hay máy tính các công việc có thứ tự
7. máy đếm, kết toán điện tử
8. mặt của máy tính, máy chữ v.v.
9. kiểm lại cho đúng
10. hộp dựng phiếu
11. hộp dựng phiếu cho phiếu chạy thẳng vào máy
12. in
13. một cột
14. tự động
15. làm bằng tay; cuốn sách chỉ dẫn nhỏ
16. người điều khiển máy
17. máy tính điện tử rất tinh vi (giải đáp được những bài tính phức tạp)
18. sự khấu trừ
19. số phiếu của mỗi nhân viên

VIII-C Bài Đối Thoại:

Người Giám Thị: Ông/Bà có thể bấm vào những phiếu lường này không?

Xuyên Phiếu Viên: Thưa Ông cần bấm để ghi cái gì trên đó ạ?

---

* *Keypunch machine: máy để bấm phiếu dùng trong máy điện toán (computer)*

LEVEL II

LESSON VIII

KEYPUNCH OPERATOR

VIII-A Student Objectives: The student will be able to understand the Operator's requirements and the function of the Keypunch machine.

VIII-B Vocabulary:

1. keypunch
2. card
3. program card
4. alphabetic punch
5. numeric punch
6. data processing
7. machine accounting
8. keyboard
9. verifier
10. card stacker
11. card hopper
12. print
13. column
14. automatic
15. manual
16. operator
17. computer
18. deduction
19. clock number

VIII-C Dialogue:

Supervisor: Can you keypunch these payroll cards?

Keypunch Operator: What would you like punched in them?

Người Giám Thị: Bà hãy bấm số phiếu của nhân viên, mục kết toán và số giờ họ làm việc vào những cột này.

Xuyên Phiếu Viên: Thưa Ông muốn bấm lên phiếu màu gì ạ?

Người Giám Thị: Bà bấm vào phiếu màu trắng, mình dùng phiếu màu xanh để ghi ngày nghỉ có ăn lương và màu vàng cho các khoản khấu trừ.

VIII-D Bài Văn Phạm - Số nhiều.

Bài Tập 1: Hãy đổi những danh tự có kẻ dưới sang số nhiều bằng cách thêm "s" (hay "es" vào những chữ tận cùng bằng x, ch, sh, s hay z):

Thí dụ:	singular:	card	singular:	dish
	plural:	cards	plural:	dishes

VIII-E Bài Văn Phạm - Thể Nghi Vấn (câu hỏi)

Bài Tập 1: Hãy đổi những câu sau đây sang thể nghi vấn bằng cách đổi chỗ của động tự chính hay thêm does:

Supervisor: Punch the clock number, the accounting data and the hours they worked in the columns shown.

Keypunch Operator: What color cards do you want them punched in?

Supervisor: Punch them on white cards, we use the blue cards for vacation pay and the yellow cards for deductions.

VIII-D Grammatical Focus - Plurals

Exercise 1: Change the underlined nouns to plural form by adding s or es. (Add es to words ending in x, ch, sh, s, or z.)

Teacher's Note: Vietnamese nouns are invariant. Plurals are formed by adding a word such as several, three, many, etc. Vietnamese speakers may therefore tend to ignore plural endings.

Example: Singular: card Singular: dish
Plural: cards Plural: dishes

1. Do not bend the card.
2. A program card is used to control the keypunch.
3. Which column should be punched?
4. The operator should work where there is good lighting.
5. She punched the wrong number.
6. Do not leave the work on top of the table.
7. Store the program card away carefully.
8. Keep the keyboard clean.
9. The cards will be run through the computer.
10. Information will be punched from the invoice.

VIII-E Grammatical Focus - Questions

Exercise 1: Change the following statements to questions by inverting the word order or adding a form of does.

Thi' du: There are 80 columns in this card.

Are there 80 columns in this card?

The keypunch operator types quickly.

Does the keypunch operator type quickly?

Examples: There are 80 columns in this card.
Are there 80 columns in this card?
The keypunch operator types quickly.
Does the keypunch operator type quickly?

1. The keypunch machine is used for punching holes in cards.

2. The program card tells the keypunch machine what you want it to do.

3. The program card is wrapped around the drum.

4. Blank cards are put into the card hopper.

5. The cards can be fed into the machine one at a time.

6. Both alphabetic and numeric information can be punched on the same card.

7. The punched cards will be used in machine accounting.

8. Telephone bills, gas and electric bills and government checks are some examples of punched card accounting.

9. Different colored cards are sometimes used for different jobs.

10. An incorrect card must be thrown away.

VIII-F Reading:

The keypunch machine, which has a keyboard similar to that of a typewriter, is used to put data, or information, onto cards in the form of punched holes. These cards are later fed into a computer to perform automatically the various operations essential to record keeping.

The machine is easy to operate. Automatic duplicating and skipping are obtained by setting up a program card. A card is punched and mounted on a program drum, which is inserted in the machine. Blank cards are put into the card hopper and can be fed manually or automatically into the machine to be punched.

There are 80 columns in a card. Each column has 12 punching positions: one each for digits 1 to 9, and one each for the zones 0, 11, and 12. The 11-zone punch is sometimes referred to as X. The digits are recorded by punching a single hole in the corresponding digit or zero position of the desired column.

A letter is a combination of one zone punch and one digit punch in the desired column. A special character is one, two or three holes in the desired column.

When a card is through being punched, it passes through the punch station and is fed into the card stacker.

VIII-G Bài Tập Bổ Túc:

1. Hay gọi phỏng nhân viên của bất cứ hãng nào có Ban Data Processing và nói cho họ biết bạn muốn trở thành chuyên viên keypunch. Hãy hỏi xem bạn cần huấn luyện về gì để làm việc đó.
2. Đi thăm sở tìm việc và hỏi họ xem những nhân viên keypunch đòi hỏi phải có khả năng gì?
3. Đi thăm một văn phòng và xin đi coi những tiện nghi làm việc của ngành "data processing" xem bạn có thích làm ở đó không.

Mấy câu có thể giúp ích cho cuộc đối thoại:

Có cần phải huấn luyện để trở thành...?

Bao nhiêu...?

Tôi cần phải biết đánh máy giỏi không...?

Tốc độ quan trọng thế nào...?

VIII-G Additional Exercises:

1. Call the employment office of any firm that has a Data Processing Dept. and tell them you are interested in becoming a keypunch operator. Ask what training you need for the job.

2. Visit the employment office and ask them what qualifications are required of their keypunch operators.

3. Visit an office and ask for a tour of their Data Processing facilities to see if you would like to work there.

Structures that may be useful in the situation:

Is training required to become a...
How much...
How good of a typist do I have to be...
How important is speed....

TRÌNH ĐỘ II

BÀI IX

NGHỀ BỌC NỆM XE VÀ TRANG HOÀNG CHIẾC XE

IX-A <u>Mục Tiêu của Học Viên</u>: trở nên thông thạo với một số ngữ vựng và công việc của người thợ bọc nệm.

IX-B <u>Ngữ Vựng</u>:

1. bọc nệm xe
2. lò xo
3. cái đai bằng vải hẹp, dệt dày để đỡ sức nặng, đặc biệt dùng khi nhồi bông vào nệm ghế
4. nhồi vào
5. đồ để nhồi gối, nệm
6. bông
7. một loại giấy sợi mềm màu trắng rất dai
8. vải vóc
9. cái khung
10. đồ đóng kẹp bằng điện
11. mỏ hàn bằng hơi nóng (hình giống như cây súng)
12. cao su mút dùng để nhồi nệm
13. chữ đồng âm (đọc giống nhưng nghĩa và viết khác nhau)
14. thương tích
15. hội
16. tranh luận, bàn cãi
17. bãi cỏ
18. vật liệu
19. liên lạc
20. sửa chữa
21. sửa lại
22. cột, buộc lại
23. đinh ngắn đầu dẹt dùng để đóng thảm hay nệm ghế
24. khâu
25. dánh vẹc ni, dánh bóng lại
26. nghỉ ngơ
27. chịu đựng, đau đớn
28. người thợ bọc nệm ghế
29. làm cho rối tung lên
30. việc bọc nệm
31. kích thước
32. ưa thích
33. vui vẻ
34. dị ứng
35. đình công

Level II

Lesson IX

UPHOLSTERY AND AUTO TRIM

IX-A Student Objectives: The student will become familiar with some of the vocabulary and duties of an upholsterer.

IX-B Vocabulary:

1. upholstery
2. springs
3. webbing
4. filling
5. cushion stuffer
6. cotton
7. sisal
8. fabric
9. frame
10. power stapler
11. heat gun
12. ply foam
13. homophones
14. injuries
15. association
16. argument
17. lawn
18. materials
19. contact
20. repair
21. fix
22. re-tying
23. tack
24. sew
25. refinish
26. suspect
27. suffer
28. upholster
29. tangle
30. upholstery (work)
31. measurement
32. favorite
33. merry
34. allergic
35. on strike

IX-C Bài Đối Thoại:

Fred liên lạc với tiệm bọc nệm của Long để sửa cái ghế ưa thích nhất của vợ anh ta.

Long: Chao Ba. Toi co the giup duoc gi khong a?

Fred: À, tôi đang tìm cách nhờ chữa lại cái ghế hư của bà xã tôi.

Long Để coi xem nó hư cái gì. Đúng, coi bộ như nó cần phải bọc lại.

Fred: Đồng ý, nhưng tôi không muốn tốn tiền quá nhiều vào việc này đâu.

Long: Được rồi, nhưng anh cần phải làm lại phần trong gồm có buộc lại mấy cái lò so, đặt thêm đai mới. Nó cũng cần phải nhồi thêm bông với đồ dùng để nhồi nệm này. Sau đấy tôi sẽ phải cho thêm ít sợi và bông vào tay ghế và đóng đanh chỗ vải bị bung ra. Khung ghế cần phải đánh bóng lại nhưng anh có thể làm lấy được nếu muốn.

Fred: Ừ, có lẽ tôi phải làm lấy tất cả và sẽ để dành được khá tiền đấy.

Long: Cái đó tùy anh, tuy nhiên tôi nghĩ là anh sẽ cần cái đồ đóng kẹp bằng điện, cái mỏ hàn nóng, đồ dùng để nhồi mặt nệm và mấy thứ dùng để đo. Anh cũng cần có loại cao su mút để nhồi và thuốc để đánh vẹc ni gỗ.

Fred: Thôi quên đi bạn, tôi không thể nào kiếm mấy thứ đó được. Thôi được rồi, vậy sửa mất bao nhiêu tiền?

Long: Có thể từ 10 đến 15 mỹ kim nếu anh có thể đánh vẹc ni lấy.

Fred: Được, tôi sẽ trả anh; nhưng hình như tôi chỉ cần một chút thực tập là làm được việc này.

Long: Đúng thế, anh có thể học ở trường chuyên nghiệp kỹ thuật, chương trình học về nghề bọc nệm và trang hoàng xe hơi.

IX-C Dialogue:

Fred contacts Long's Upholstery to have his wife's favorite chair repaired.

Long: Hello. May I help you?

Fred: Well, I'm trying to get some help fixing the wife's busted chair.

Long: Let's see what the problem is. Yes, it does look as though it will need some upholstery work.

Fred: Yeah, but I don't want to stick a lot of bread into this thing.

Long: Ok, but you're going need to have some body work done. That will include re-tying these springs and applying a new webbing. It will also need some more filling with this cushion stuffer, here. Then, I'll have to add some sisal and cotton to the arms and tack the fabric where it has come undone. The frame needs refinishing but you might want to do that yourself.

Fred: Yeh, and maybe I ought to do the whole job myself and save a bundle.

Long: That's up to you, although I think you'll need a power stapler, a heat gun, a cushion stuffer, and a few measurement items. You'll also need filling materials, ply foam, and wood finishing materials.

Fred: Forget it. I can't get that stuff together. All right, how much will it cost to get it fixed up?

Long: I'd say about ten to fifteen dollars if you can do the refinishing.

Fred: Ok, I'll pay you, but this looks like something I could do with a little training.

Long: Sure, and you can get it at Vocational Technical, in their Upholstery and Auto Trim training program.

IX-D Bài Văn Phạm - Chữ đồng âm.

Chữ đồng âm đánh vần hơi khó, vì nó đọc giống nhau nhưng nghĩa và cách viết khác nhau. Thí dụ: break (đánh bể)*

brake (cái thắng)

Bài Tập 1: Hãy chọn chữ nào đánh vần đúng cho những đồng âm dùng trong những câu sau đây:

Thí dụ: Tom was too low on his bid to refinish that chair for two dollars.

Bài Tập 2: Hãy dùng những chữ đồng âm sau đây để đặt thành câu.

Thí dụ: a) your: That power stapler will go on your next bill.

b) you're: You're much too tired to operate the heat gun safely.

IX-D Grammatical Focus - Homophones

Homophones present spelling problems because they sound alike but have different meanings and different spellings.

Example: Break - Brake

Exercise 1: Select the correct spelling for the homophones used in the following sentences.

Example: (to, two, too) Tom was too low on this bid to refinish that chair for two dollars.

1. Can Mr. Long fix the _____ and the seat on that wheelchair before he goes on _____. (break, brake)

2. That does not _____ the fact that the groom did not show up at the _____. (alter, altar)

3. Of _____ you'll have to use a fabric which is less_____. (coarse, course)

4. _____ no use to use the sisal for _____ filling. (its, it's)

5. The _____ in the pencil _____ the police to suspect the secretary. (led, lead)

6. One _____ suffered _____ injuries from the cave-in. (miner, minor)

7. _____ going to count _____ money over _____ by the telephone booth. (their, there, they're)

8. John _____ that information on to the _____ president of the association. (past, passed)

9. It is _____ to see why the _____ never got off the ground. (plain, plane)

10. There won't be a moment's _____ until they have a _____ of pie. (piece, peace)

Exercise 2: Make sentences using the homophones listed below.

Example: a) Your: That power stapler will go on your next bill.

b) You're: You're much too tired to operate the heat gun safely.

Bài Tập 3: Hãy chọn những chữ đồng âm cùng với những chữ có kẻ dưới để đặt thành một câu khác.

Thí dụ: a) a deer got tangled in the webbing of the lawn chair.

b) that rocker is very dear to me.

IX-E Bài Văn Phạm - Who/whom (relative pronouns: liên đại danh tự)

Who (ai; thay cho người nào) dùng cho chủ từ của động tự. Whom (của người nào) dùng cho túc từ (object) của động tự.

1. (who's, whose)

2. (made, maid)

3. (know, no)

4. (waist, waste)

5. (mail, male)

6. (blew, blue)

7. (hour, our)

8. (knot, not)

9. (sea, see)

10. (due, dew, do)

Exercise 3: Make another sentence using a homophone for the underlined word in each sentence.

Example: a) The deer got tangled in the webbing of the lawn chair.

b) That rocker is very dear to me.

1. The deer ran through the woods.

2. Don't you think they had a merry time?

3. He became very angry after he read the bill.

4. Your ply foam order will be in tomorrow.

5. If tacking it up will not work, I'll try to sew it.

6. Fred never had won an argument with Bob before today.

7. Hiep will need four more springs in that cushion.

8. Lana has not given us the right size staples for this stapler.

9. Did you see where Hal drove the stakes into the ground?

10. Your aunt will be expecting her sofa upholstered by Tuesday.

IX-E Grammatical Focus - Who/Whom

"Who" applies to the subject of the verb.

"Whom" applies to the object of the verb.

Bài Tập 1: Hãy dùng "who" hay "whom" trong khoảng trống của các câu sau đây:

Thí dụ: I did not know to whom the heat gun belonged.

Who will help with this safa?

IX-F Bài Văn Phạm - So sánh Hơn và Nhất.

So sánh hơn bằng cách thêm "er" hoặc "more". So sánh nhất bằng cách thêm "est" hoặc "most". Không bao giờ dùng er hoặc est cùng với những chữ more hoặc most.

Thí dụ:	weak (yếu)	fun	(vui thích)
	weaker (yếu hơn)	more fun	(vui thích hơn)
	weakest (yếu nhất)	most fun	(vui thích nhất)

Exercise 1: Write the sentences using the correct word: Who or Whom.

Examples: I did not know to whom the heat gun belonged.

Who will help with this sofa?

1. No-one has figured out to _____ Mrs. Long had talked regarding the power stapler.

2. _____ was that former employee _____ was allergic to the sisal?

3. Tach was one of the men_____ didn't think the chair could be refinished.

4. Many upholsterers _____ are on strike would rather be working.

5. Everyone _____is interested in enrolling in the Upholstery and Auto Trim course should see me now.

6. Mr. Long couldn't begin the stuffing until he knew _____ was going to pay for it.

7. The customer _____ will be here at noon should be charged for those two brown chairs.

8. Sell it to the first person _____ wants to buy it.

9. _____ did you say had borrowed the power stapler?

10. It was Robert_____ had asked you for _____ you had recovered those cushions.

IX-F Grammatical Focus - Comparatives & Superlatives

A comparison is formed by adding "-er" or "more". A superlative is formed by adding "-est" or "most." Never use the suffix -er or -est with the modifiers more or most.

Example:	weak	fun
	weaker	more fun
	weakest	most fun

Teacher's Note: Vietnamese adjectives are invariant. Comparatives and superlatives are formed only by adding a word such as more or most.

Bài Tập 1: Hãy chúa lại cho dúng nhưng chữ dưng sai bằng cách bỏ nhưng chữ thừa khi so sánh trưng 2 lần. Không cần phải dổi nhưng câu dúng.

Thí dụ: Mark's taking is more straighter than mine. more straighter

The thread is the most strong of all. strongest

IX-G Bài Văn Phạm - Cách dưng động tử bất qui tắc.

Bài Tập 1: Hãy viết dúng cách dưng của các động tử trong các câu sau dây:

Thí dụ: I had written up the charges before I knew who he was.

Exercise 1: When necessary, write the correct form of the incorrect modifiers, eliminating double comparisons. Do not change those sentences which are correct.

Examples: Mark's tacking is more straighter than mine. straighter

This thread is the most strong of all. strongest

1. This is the most loveliest fabric of the group.
2. The chair rocks more worse than before.
3. When he gets angry, his hammering becomes more loud.
4. Paul is the more faster stapler of the two.
5. The customer was more happier when Sally reduced the charges.
6. We were not sure which of the two filling materials would be more better to use.
7. Frank makes more fewer mistakes than anyone.
8. Duoc was most best at refinising.
9. Which one of the three chairs is more heavy?
10. Repairing the tears is the most costly of the work needed to be done.

IX-G Grammatical Focus - Irregular Verb Usage

Exercise 1: Write the sentence using the correct form of the verb in parentheses.

Example: (write) I had written up the charges before I knew who he was.

Teacher's Note: Vietnamese verbs are both invariant and limited. There are fewer tenses than in English and they are formed by the context of the sentence rather than verb modification.

1. (give) Yesterday Joe _____ me more work to do.
2. (break) The arm on the left side is _____.
3. (begin) The stuffing suddenly _____ to fall out.
4. (go) Had he _____ to lunch before you reached him?

5. (shrink) When I cleaned the fabric, it _____.

6. (freeze) The fact that the stuffing had _____ should not have made any difference.

7. (do) Have you _____ that type of sewing before?

8. (buy) Jack _____ the stain for the frame the same day.

9. (burst) Just as I finished tacking this side, the other_____ open!

10. (know) Fred should have _____ it would take longer than that that just to complete the upholstery work.

TRINH DO II

PHAN TAP DOC

BÀI I - Bạn có thích làm việc với người khác không? Trước khi quyết định chọn nghề ward clerk, bạn hãy tự hỏi xem mình có thích làm việc với người khác không? Bạn sẽ dùng một phần lớn thì giờ để nói chuyện với bệnh nhân, ghi các chi tiết về cá nhân họ để lập hồ sơ bệnh lý, nói chuyện với bác sĩ và y tá. Bạn có thể phải làm về ngành nhi khoa với con nít, hay là về sản khoa với các bà mẹ mới sanh. Một người ward clerk cần phải dễ dàng làm quen với đủ các loại người trong nhiều hoàn cảnh khác nhau. Những người đau ốm không phải lúc nào cũng luôn luôn dễ dàng giao thiệp với họ, và bạn cần phải có nhiều kiên nhẫn và thông cảm.

BÀI II - Một số chức vụ văn phòng có nhiều nhiệm vụ khác nhau, nhưng cũng có những chức vụ chỉ có một ít nhiệm vụ cứ lập đi lập lại. Hãy tập dượt những khả năng bạn sẵn có và tiếp tục trau giồi thêm - có thể có cơ hội lên chức từ công việc thường trong văn phòng đến những công việc quan trọng có số lương cao hơn. Hãy đọc mục quảng cáo tìm người mỗi ngày trong tờ báo địa phương để coi xem những điều kiện của các hãng và các công việc khác nhau.

BÀI III - Làm việc giỏi thì ở đâu cũng vậy. Một người hầu bàn giỏi không bao giờ thiếu việc làm. Cô ta có thể dùng sự thạo việc như là một nghề chính hay một nghề phụ hay là làm cho gia đình. Sự hiểu biết này cùng với sự tín nhiệm và thẳng thắn sẽ làm cho cô ta trở thành một công nhân có giá trị, thành công và được tin cậy.

BÀI IV - Trước khi bạn quyết định trở thành người thợ máy xe hơi, hãy hỏi thăm những người thợ đang làm xem họ có thích công việc đó không? Hỏi họ về việc huấn luyện của họ và họ có thể hy vọng kiếm được bao nhiêu tiền.

BÀI V - Mặc dù chỉ có một số hạn chế các loại công việc trong lãnh vực sửa chữa các loại máy nhỏ nhưng có hàng ngàn kỹ nghệ dùng các loại máy nhỏ trong dụng cụ sản xuất của họ và các máy này cần phải bảo trì và sửa chữa. Nếu coi trong báo hàng ngày bạn có thể tìm thấy các công việc làm trong các hãng lớn trong lãnh vực bảo trì và sửa chữa. Nhiều hãng chế tạo máy có trường để huấn luyện chuyên viên máy nhỏ và cũng có nhiều cơ quan giáo dục có những lớp với chương trình học về bảo trì và sửa chữa máy nhỏ.

BÀI VI - Bản họa đồ giữ một vai trò rất quan trọng trong việc xây cất một cao ốc hay ráp một bộ máy. Đúng ra, nếu không có nó sẽ không thể làm gì được. Một bản họa đồ cũng giống như một tấm bản đồ (địa dư), nó chỉ cho người thợ mộc hay người thợ máy phải cần những gì và đặt các đồ đó vào chỗ nào.

Người vẽ họa đồ hay kiến trúc sư giữ một vai trò quan trọng xã hội. Tất cả chúng ta đều phải tùy thuộc vào sự khéo léo, tài năng của họ. Họ lấy một ý kiến và họa nó ra thành hình một cách chính xác; mọi đường cong, đường thẳng và hình thể cần phải thật chính xác từng inch.

Người vẽ họa đồ và kiến trúc sư giỏi cần phải được huấn luyện. Đó là một nghề có rất nhiều sự thử thách và đem lại nhiều điều thích thú.

BÀI VII - Nghề làm đồng không bao giờ hết việc. Nó đòi hỏi những người thợ làm đồng giỏi. Tiền công thay đổi tùy theo hiệu xe. Hãy đi thăm đại lý của hãng nào bạn thích và quyết định xem bạn có thích công việc đó

không. Hỏi xem hãng có cho huấn luyện thêm không hay thực tập ngay trong công việc. Cuối cùng, hãy hỏi xem công việc được trả lương bao nhiêu trước khi bạn quyết định chọn nghề làm động xe hơi.

BÀI VIII - Máy xuyên phiếu có mặt máy giống như máy đánh chữ, dùng để ghi những kết toán, hay tin tức trên tấm phiếu trong hình thức những lỗ bấm. Sau đó những phiếu này được đưa vào máy điện toán để máy tự động thi hành những việc thiết yếu đến việc lưu trữ hồ sơ.

Máy dễ sử dụng. Việc chép lại bản chính và việc nhảy cách tự động làm bằng cách sắp đặt một phiếu kiểm soát. Một tấm phiếu được bấm và lắp vào "program drum" (một bộ phận tròn giống cái trống) để lắp vào máy. Phiếu trống để vào hộp đựng phiếu và có thể dùng tay hay tự động đưa vào máy để bấm.

Trên tấm phiếu có 80 cột. Mỗi cột có 12 chỗ để bấm, cho các số từ 1 đến 9 và các "vùng" 0, 11 và 12. "Vùng" 11 thỉnh thoảng được gọi là chữ X. Những số được ghi vào bằng cách bấm 1 lỗ đúng vào chỗ của nó hay chỗ của số 0 trong cột cần bấm.

Một chữ là một sự phối hợp của một "vùng" và một số trên cột. Mỗi số hay chữ sẽ được biểu lộ bằng 1, 2 hoặc 3 lỗ trong một cột.

Khi một tấm phiếu đã bấm xong, nó được chuyển từ nơi bấm qua một chỗ trong máy để cho vào hộp đựng phiếu.

TITLE: ENGLISH ON THE JOB. ANH NGU TRONG CONG VIEC. LEVEL III.

DESCRIPTOR: *CURRICULUM GUIDES; *ENGLISH (SECOND LANGUAGE); *INDOCHINESE; *CAREER EDUCATION; *VOCATIONAL EDUCATION

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 94P.; RELATED DOCUMENTS VT 103 232 THROUGH VT 103 234 IN THIS ISSUE.

ABSTRACT: INTENDED FOR USE IN CLASSES OF ENGLISH AS A SECOND LANGUAGE, THIS CURRICULUM GUIDE IS PART OF A THREE-VOLUME SERIES DEVELOPED TO PROVIDE INDOCHINESE STUDENTS WITH LANGUAGE SKILLS NEEDED IN THE WORLD OF WORK. THE LESSONS PROVIDE AN OVERVIEW OF AVAILABLE VOCATIONAL PROGRAMS SO THAT STUDENTS INCREASE THEIR KNOWLEDGE OF CAREER OPPORTUNITIES AS THEY BECOME MORE PROFICIENT IN ENGLISH. THE LESSONS ARE DESIGNED TO INTRODUCE STUDENTS TO PROGRAMS IN WHICH THEY CAN BE SUCCESSFUL WITH VARYING DEGREES OF ENGLISH SKILLS, WITH THE PROGRAMS THAT REQUIRE THE LEAST SKILL INTRODUCED AT LEVEL I. THIS LEVEL III GUIDE CONTAINS LESSONS ON CLERK TYPIST, ACCOUNT CLERK, PRACTICAL NURSING, DATA PROCESSING, MECHANICAL DRAFTING, ELECTRONIC SERVICING, AND FOOD PREPARATION. EACH LESSON CONSISTS OF A VOCABULARY LIST WITH VIETNAMESE TRANSLATIONS OR EXPLANATIONS FOLLOWED BY A DIALOGUE PRINTED IN BOTH LANGUAGES WHICH FORMS THE BASIS FOR SUBSEQUENT EXERCISES AND DISCUSSIONS. INSTRUCTIONS ARE PRINTED IN BOTH ENGLISH AND VIETNAMESE. THE READING CONTAINED IN EACH LESSON PROVIDES FURTHER INFORMATION CONCERNING THE VOCATIONAL PROGRAM DISCUSSED IN THE LESSON. A FINAL SECTION INCLUDES SUGGESTIONS FOR DISCUSSION TOPICS, OUTSIDE ACTIVITIES, AND ADDITIONAL PRACTICE. (NJ)

ANH NGỮ TRONG CÔNG VIỆC

Lời Tựa

Văn Phòng Trợ Giúp Định Cư Wisconsin đã soạn tài liệu này để dùng cho các lớp dạy tiếng Anh như một ngoại ngữ (ESL) trong một chương trình đặc biệt được Uỷ Ban Giáo Dục, Chuyên Nghiệp và Kỹ Thuật Tráng Niên Wisconsin tài trợ. Việc soạn thảo và thực hiện chương trình đã được Cơ Quan Đặc Trách Người Tị Nạn Đông Dương South Carolina và Đài Phát Thanh WHA giúp đỡ. Những bài học này được thâu thập từ những tài liệu giảng dạy của Uỷ Ban Giáo Dục với sự cộng tác của các trường chuyên nghiệp quận.

Những bài này được soạn ra với mục đích để giúp các học viên Đông Dương làm quen với ngôn ngữ đặc biệt dùng trong các công việc chuyên môn và hiểu biết tổng quát những chương trình chuyên nghiệp sẵn có. Khi dùng tài liệu này học viên sẽ biết thêm về nghề mà mình muốn học đồng thời cũng sẽ học thêm Anh ngữ.

Chương trình này được thực hiện để giúp các học viên có trình độ Anh ngữ khác nhau, thích hợp với trình độ của từng cá nhân; những phần ít đòi hỏi Anh ngữ được trình bày ở Trình Độ I. Một số bài như 'Health' và 'Food Preparation' sẽ giúp cho học viên mở mang tầm hiểu biết.

Các giảng viên sẽ bổ túc các bài học với những buổi hội thảo, chiếu phim, các tài liệu liên hệ, thuyết trình, thăm viếng các phòng thực tập và các cơ xưởng kỹ nghệ. Trong một vài trường hợp, "công việc mẫu" (work sample) có sẵn tại các trường chuyên nghiệp có thể được dùng như một kinh nghiệm sẵn có.

Giảng viên cũng nên dùng cuốn "Indochinese Refugee Education Guides" do Trung Tâm Ngôn Ngữ Học Ứng Dụng soạn. Những tài liệu này nói rõ những khó khăn đặc biệt mà học viên Việt Nam sẽ gặp phải khi học Anh ngữ và cũng cho nhiều thí dụ rất hay trong cách tập phát âm.

ENGLISH ON THE JOB

Introduction

The materials in this series of lessons have been developed by the Wisconsin Resettlement Assistance Office for use in English as a Second Language classes under a special project funded by the Wisconsin Board of Vocational, Technical and Adult Education. They were developed and produced with the assistance of the South Carolina Indochina Refugee Agency and WHA radio. The written texts are based upon materials originally developed by the State Board in cooperation with its districts.

The texts are designed to provide Indochinese students with language skills needed in the world of work, along with an overview of available vocational diploma programs. Students using these materials will increase their knowledge of career opportunities as they become proficient in the use of English.

An effort has been made to introduce students to programs in which they could be successful with varying degrees of English skill, with those programs requiring the least skill being introduced at Level I. In some instances, notably Health and Food Preparation, there are opportunities for a wide range of proficiency. These units were prepared on all three levels.

It is expected that teachers will supplement these units through discussion, films or film strips, related materials, resource speakers, visits to labs, and industrial tours. In some instances, the work samples available through vocational schools can be used as a "hands on" experience in the unit.

It is also highly recommended that the teacher make use of "Indochinese Refugee Education Guides" developed by the Center of Applied Linguistics. These materials illustrate the unique problems which the Vietnamese student will have in learning English and provide useful samples for use in phonic drills to improve pronunciation .

The vocational English texts and accompanying tapes have been designed to provide a maximum degree of flexibility for students and teachers. They may be used in a general ESL classroom for all foreign students, in a self-contained classroom for Vietnamese students, or in a tutorial program. Vietnamese students can use them on their own with minimal guidance. However, whenever possible, we recommend that these materials be supplemented by substantial amounts of spontaneous conversation.

Students with a fair degree of general English competency and an established career goal may wish to concentrate upon those lessons which deal with, or are related to, their vocational interests. They can thereby become familiar with many of the technical terms and jargon which are essential to every job, but which do not appear in many dictionaries and most ESL texts.

Những bài học Anh ngữ chuyên nghiệp kèm theo bằng ghi âm sẽ giúp cho sự giảng dạy trở nên linh động tối đa; có thể được dùng chung trong các lớp ESL cho các học viên ngoại quốc, trong một lớp dành riêng cho học viên Việt Nam, hay trong các chương trình dạy nghề. Học viên Việt Nam cũng có thể tự học bằng tài liệu này sau khi được hướng dẫn sơ qua. Tuy nhiên, nếu có thể, tài liệu này cần phải được bổ túc bằng các cuộc đối thoại tự nhiên.

Học viên với trình độ Anh ngữ trung bình và định theo một nghề nhất định có thể chăm chú vào những bài học liên quan đến môn chuyên nghiệp mình thích. Như vậy mới có thể quen thuộc với nhiều danh từ kỹ thuật và tiếng lóng rất cần thiết cho mọi nghề và những danh từ này không có trong các tự điển và trong các bài học ESL khác.

Trong mỗi bài học, học viên sẽ được hướng dẫn về cách đặt câu Anh ngữ, từ cách dùng động tự, cách bớt vần (Thể Tĩnh Lược), v.v. trong Trình Độ I cho đến cách dùng trạng tự và tĩnh tự trong Trình Độ III. Giảng viên sẽ bổ túc bài học bằng cách dùng bản ngữ vựng để đặt câu và thực tập đối thoại.

Mỗi bài gồm có bảng ngữ vựng với phần cắt nghĩa và dịch sang tiếng Việt. Nhiều danh từ kỹ thuật không có chữ tương đương bằng tiếng Việt, vì tân kỹ thuật học mới có tại Việt Nam lúc gần đây mà thôi, nên mỗi tiếng có câu cắt nghĩa vắn tắt. Phần lớn học viên Việt Nam quen dùng cách học thuộc lòng nên những bảng ngữ vựng này dài hơn những bảng trong các bài ESL khác. Nếu học viên không học hẳn một ngành riêng biệt nào thì số ngữ vựng chuyên nghiệp này có thể dùng để tham khảo hơn là phải học thuộc lòng.

Sau mỗi bảng ngữ vựng là một bài đối thoại dùng làm căn bản cho những bài tập và thảo luận.

Bài đối thoại cũng được dịch sang tiếng Việt , như vậy học viên có thể

With each unit is a structural English lesson ranging from verb usage and contractions, in Level I to the use of adverbs and adjectives in Level III. Teachers will supplement the unit by using the vocabulary list for sentence writing and conversation practice.

Each lesson contains a Vocabulary List with Vietnamese translations or explanations. Since modern technology has only recently been introduced in Viet Nam, many technical terms do not have Vietnamese equivalents and a brief explanation of the term has therefore been provided. Most Vietnamese students are used to a great deal of memorization, so lists are longer than would be expected in most American texts. If the student will not be active in a particular field, some of the technical vocabulary may be used as reference, rather than memorization material.

Following each vocabulary list is a Dialogue which forms the basis for subsequent exercises and discussions. This is printed in both English and Vietnamese so that the student may be completely confident in his or her understanding of the subject matter. However, students should use this and all other translated material only when necessary.

Each lesson contains several Exercises which expand upon the subject matter of the dialogue. Exercise instructions are printed in both English and Vietnamese. When necessary, Teachers' Notes and Students' notes have been included and are printed in italic. Teachers' Notes are printed only in English and Students' Notes are printed only in Vietnamese. These notes explain the grammatical differences between the two languages and will help both teachers and students cope with the special problems which Vietnamese students face when learning English.

The Reading contained in each lesson provides further information concerning the vocational program discussed in the lesson. Students should read it aloud and to themselves and discuss it in class. If a particular Reading presents comprehension problems, the student may turn to the back of the book where the Readings have each been printed in Vietnamese.

The final section in each lesson contains suggestions for discussion topics, outside activities and additional practice. Teachers may find it difficult to draw Indochinese students into classroom discussions. Vietnamese education is based upon the old European model of the student as a passive recipient of information . The student may therefore feel very uncomfortable when encouraged to question, discuss, challenge and argue with classmates and the teacher. Use discussions with other class members to demonstrate to Vietnamese students that this behavior is appropriate and expected, then gradually encourage Vietnamese students to participate in these conversations.

Each lesson has a corresponding tape which includes the Student Objective, Vocabulary, Dialogue, and Reading sections. The directions for each tape are

tin là đã hoàn toàn hiểu thấu bài học. Tuy nhiên, học viên chỉ nên dùng bài này và tất cả những tài liệu phiên dịch khác khi cần mà thôi.

Mỗi bài học sẽ gồm nhiều bài tập với mục đích giúp cho học viên quen cách đối thoại. Cách dẫn giải làm bài tập được in bằng cả tiếng Anh lẫn tiếng Việt. Khi cần, chú thích cho giảng viên và học viên được in bằng chữ nghiêng; chú thích cho giảng viên in bằng tiếng Anh và cho học viên thì bằng tiếng Việt. Những lời chú thích này cắt nghĩa những mẹo khác nhau của văn phạm giữa hai ngôn ngữ và sẽ giúp cho cả giảng viên cũng học viên biết cách tránh những khó khăn đặc biệt mà học viên Việt Nam sẽ gặp phải khi học Anh ngữ.

Bài tập đọc trong mỗi bài học giúp thêm những chi tiết liên quan đến chương trình chuyên nghiệp đã được nói đến trong bài học. Học viên cần phải đọc to lên và thảo luận về bài tập đọc đó. Nếu có một bài tập đọc nào đặc biệt khó hiểu học viên có thể xem phần dịch sang tiếng Việt in ở cuối cuốn sách.

Đoạn cuối của mỗi bài học có những đề nghị cho các đầu đề của cuộc thảo luận, thực tập thêm bên ngoài và những bài tập bổ túc. Giảng viên có thể gặp khó khăn khi muốn học viên Đông Dương tham dự vào các cuộc thảo luận: giáo dục tại Việt Nam theo phương pháp ngày xưa nên học sinh rất thụ động trong việc học hỏi. Học viên có thể cảm thấy bối rối khi được khuyến khích trả lời các câu hỏi, thảo luận, phản đối và bàn cãi với học viên cùng lớp hay với giảng viên. Giảng viên nên dùng những buổi thảo luận với các học viên để giúp cho học viên Việt Nam thấy đó là một hoạt động thích hợp trong các lớp học tại Hoa Kỳ và dần dần khuyến khích họ tham gia vào các cuộc đối thoại.

Mỗi bài học có kèm theo một cuốn băng gồm có các phần Mục Tiêu của Học Viên, Ngữ Vựng và Tập Đọc. Những phần hướng dẫn đều được thâu bằng cả tiếng Anh lẫn tiếng Việt. Phần Ngữ Vựng và Đối Thoại chỉ có bằng tiếng Anh và

provided in both English and Vietnamese. The Vocabulary and Dialogues are in English only with pauses for student responses. These tapes allow the student to practice verbal comprehension and expression on his own. They may be stopped and replayed until the student is confident in his work. A native speaker should check the student's pronunciation frequently to insure that mistakes are not being repeated. Except for Lesson II-IX and Lesson III-VII (which must be rewound), each tape should be allowed to run its full length so that it will be at the beginning when turned over.

người đọc sẽ ngưng lại sau mỗi câu và mỗi chữ để học viên có thì giờ nhắc lại. Những cuốn băng này giúp cho học viên thực hành bằng cách tự đặt câu và bài kiểm. Học viên có thể cho băng ngưng và chạy lại cho đến khi nào hoàn toàn tin tưởng là mình đã hiểu thấu bài học. Giảng viên cần phải luôn luôn nghe lại cách phát âm của học viên để chắc chắn là họ không nhắc lại những lỗi đã phạm. Trừ bài học IX trong Trình Độ II và bài VII trong Trình Độ III (băng cần phải được quay lại vì chỉ thâu có một mặt) mỗi cuốn băng phải cho chạy hết để khi lật qua mặt bên kia, bài học kế tiếp sẽ bắt đầu.

TRÌNH ĐỘ III

CÔNG VIỆC THƯ KÝ VĂ VĂN PHÒNG

Tất cả các phương pháp ghi chép và kế toán đều liên quan đến việc lưu trữ hồ sơ, sổ sách. Máy điện toán hoạt động cùng với một số các máy khác trong văn phòng đưa đến kết toán. Máy điện toán có khả năng ghi nhận một số lớn tin tức và giải những bài toán phức tạp rất nhanh chóng. Nhiều trường chuyên nghiệp có dạy về máy điện toán trong các chương trình kế toán và phương pháp "data processing."

Thư Ký Kế Toán: phải học những nhiệm vụ cần thiết trong việc ghi chép hồ sơ của bất cứ ngành thương mại nào, qua cách thực hành kỹ thuật căn bản về việc lưu trữ hồ sơ kế toán.

Chuyên viên máy "data processing" phải học cách điều khiển máy để đưa các tin tức vào máy điện toán và máy dùng để thu lại những tin tức từ máy điện toán.

LEVEL III

Secretarial & Office

All data and accounting system are involved with the keeping of records. The computer works with a number of other office machines to process data. Fast and capable, the computer handles large amounts of information, and carries out complex orders. At many vocational schools, there is a study of computers in the Accounting program as well as in Data Processing.

Account Clerk: The student learns to perform the duties essential to record keeping in any business, through the practical application of basic bookkeeping and accounting skills.

Data Processing Machine Operator: The student learns to operate the equipment that feeds information into the computer, and equipment used to recover information from the computer.

TRÌNH ĐỘ III

BÀI I

THƯ KÝ ĐÁNH MÁY

I-A Mục Tiêu của Học Viên: biết rõ các công việc và nhiệm vụ của người thư ký đánh máy và trở nên thông thạo trong cách sử dụng các danh từ trong công việc.

I-B Ngữ Vựng:

1. Máy đánh chữ
2. một loại máy ghi âm người thư ký dùng để nghe và đánh máy lại
3. giấy tăng sin (một loại giấy đánh máy để quay rô-nê-ô)
4. giấy than dùng để làm bản sao
5. ký hiệu
6. thư tín
7. sự vụ văn thư; sổ để ghi nhớ
8. tốc ký
9. người thư ký tiếp khách
10. tài liệu
11. chuyển dịch; chép lại
12. đọc lại cho đúng
13. tính toán với các con số
14. xếp vào hồ sơ
15. phân phối
16. góp nhặt tài liệu
17. thư từ; gởi thư
18. soạn ra
19. đọc cho người khác viết
20. bản báo cáo; báo cáo
21. theo rõi
22. hãng
23. tham chiếu
24. một vài cái
25. tổng đài điện thoại

I-C Bài Đối Thoại:

George (Trưởng Phòng): Cô đã thâu thập tài liệu và đánh máy xong cái báo cáo tôi đưa cô sáng nay chưa?

Thu Dung (Thư Ký Đánh Máy): Dạ, tôi đang định trình Ông ký để gửi đi.

Level III

Lesson I

CLERK TYPIST

I-A Student Objective: The student will be able to identify the functions and duties of clerk typists and be familiar with the terms used on the job.

I-B Vocabulary:

1. typewriter
2. dictaphone
3. stencil
4. carbon copy
5. notation
6. correspondence
7. memorandum
8. shorthand
9. receptionist
10. documents
11. transcribe
12. proofread
13. compute
14. file
15. distribute
16. compile
17. mail
18. sort
19. dictate
20. report
21. follow-up
22. firm
23. reference
24. a couple
25. telephone switchboard

I-C Dialogue:

George:
(Office Manager) Have you finished compiling and typing the report I gave you this morning?

Thu Dung:
(Clerk Typist) Yes, I was just about to ask you to sign it so I could mail it.

George: Cô có làm bản sao để lưu vào hồ sơ của mình không? có thể tôi sẽ phải theo rõi bài báo cáo.

Thu Dung: Dạ, tôi đã làm một bản sao và xếp vào cùng với các báo cáo khác. Tôi muốn coi lại cho chắc chắn xem địa chỉ của hãng này có đúng không.

George: Phải, địa chỉ đó đúng. Cô làm ơn ghi lại danh hiệu của hãng để tham chiếu sau này. Cô đánh máy luôn hộ địa chỉ lên bao bì và gửi đi ngay hôm nay. Cô đã lựa tất cả thư ra chưa?

Thu Dung: Dạ rồi, thư của Ông đây.

George: Tôi sẽ đưa thêm vài cái báo cáo và một ít tin tức để cô gửi đi chiều nay.

Thu Dung: Thưa Ông vâng. Buổi hẹn tới của Ông vào lúc 11 giờ 15.

George: Cảm ơn Cô.

I-D <u>Bài Văn Phạm: Cách chấm câu.</u>

Các dấu chấm câu ở cuối mỗi câu chỉ câu đó thuộc loại nào.

<u>Thí dụ</u>: 1) I typed a letter.

(dấu chấm (.) đứng sau một câu xác định)

2) Did you type the letter yesterday?

(dấu chấm hỏi (?) đứng sau một câu hỏi)

3) What a beautiful day !

(dấu chấm than (!) đứng sau một câu diễn tả cảm xúc hoặc cảm giác)

<u>Bài Tập 1</u>: Hãy đứng đúng chấm câu trong các câu sau đây:

<u>Thí dụ</u>: Sign your name on the last line of the letter.

George: Did you make a carbon copy for our files? I might have to do some follow-up work on the report.

Thu Dung: Yes, I made a carbon copy and filed it with the other reports. I did want to check to be sure the address of this firm was correct.

George: Yes, it is correct. Please make a notation of the address for future reference. Please address the envelope and mail it today. Have you sorted all the mail yet?

Thu Dung: Yes, here is your mail.

George: I will have a couple more reports and some information for you to mail this afternoon.

Thu Dung: Yes, sir. Your next appointment is for 11:15.

George: Thank you.

I-D Grammatical Focus - Punctuation

Punctuation marks at the end of a sentence indicate what type of sentence it is.

Examples:

1. I typed the letter. (The period (.) is used after a statement.)

2. Did you type the letter yesterday? (A question mark (?) is used after a question is asked.)

3. What a beautiful day! (An exclamation mark (!) is used after a sentence which expresses strong emotion.)

Exercise 1: Write or type the sentences using the correct punctuation.

1. Sign your name on the last line of the letter__

2. Did you answer the telephone__

3. Did you fill out an application form__

4. I mailed three tickets to the office yesterday__

5. This is a great job__

Người thư ký đánh máy cũng cần phải biết thêm một số các dấu chấm câu khác như dấu phẩy, dấu phẩy (') và dấu ngoặc kép "..."

1. Dấu phẩy (,) có nhiều cách dùng dấu phẩy. Ở đây chúng ta sẽ tập cách dùng dấu phẩy khi viết ngày tháng và các chữ số. Bạn hãy đặt dấu phẩy vào giữa chữ ngày (trong tháng) và năm. Thí dụ: January 1, 1967. Ở Hoa Kỳ, tháng luôn luôn viết trước, tiếp theo là ngày rồi đến năm. Nếu không có ngày, bạn hãy đặt một dấu phẩy giữa chữ tháng và năm. Thí dụ: January, 1967. Bạn hãy đặt một dấu phẩy giữa chữ ngày trong tuần và chữ tháng của năm. Thí dụ: Sunday, January 1, 1967. Người Mỹ chia từng nhóm 3 chữ số bằng cách dùng dấu phẩy. Cho nên, một triệu viết là 1,000,000. Dấu phẩy dùng trong tiếng Việt để phân cách các số lẻ được thay bằng một dấu chấm trong tiếng Mỹ. Như vậy, hai và lẻ mười hai viết là 2.12 ở Hoa Kỳ.

2. Một dấu phẩy (') dùng cho một chữ bớt vần hay để chỉ quyền sở hữu. Thí dụ: Can't, don't - Mary's typewriter, Joe's job.

3. Dấu ngoặc kép ("...") để chỉ một dẫn chứng trực tiếp hay muốn nhắc lại đúng những câu nói của ai. Thí dụ: The President of the firm said: "our business has shown a marked increase in profit in the last six months." - "Mary, did you finish filing all the reports?" asked Louise.

Bài Tập 2: Hãy đặt những chấm câu cần thiết trong những câu sau đây. Hãy coi kỹ những dấu cần thiết ở giữa câu và cuối câu.

Thí dụ: . can't be present at the meeting on Saturday

I can't be present at the meeting on Saturday, April 30, 1967.

6. She is always on time for her job__

7. Do you like to operate the telephone switchboard__

8. I made a notation on line 14__

9. Did you proofread the letter before you mailed it__

10. I didn't know how to spell memorandum, so I looked it up in the dictionary__

The clerk typist also needs to know some additional punctuation marks. These are the comma, apostrophe, and quotation marks.

Examples:

1. Comma, (,) There are many uses for the comma. We will work here with placing commas in the correct position when writing dates and numerals. Place a comma between the day of the month and the year. In the United States the month is always written first, followed by the day and then the year. Place a comma between the name of the day of the week and the month of the year. American numerals are grouped in threes using commas. Thus, one million is written 1,000,000. The comma, which is used in Vietnamese to separate whole numbers from fractions, is replaced by a decimal point. Thus, two and twelve hundredths is written as 2.12 in the United States.

   January 1, 1967
   January, 1967
   Sunday, January 1, 1967

2. An apostrophe (') is used in making a contraction or in showing ownership.

   can't don't doesn't Mary's typewriter Joe's job Mr. Jones' desk

3. Quotation marks (" ") are used when the clerk typist wishes to type a direct quote (type the exact words that someone said). Quotation marks show that it is a direct quote.

   The president of the firm said, "Our business has shown a marked increase in profit in the last six months."

   "Mary, did you finish filing all the reports?" asked Louise.

Exercise 2: Put all the needed punctuation marks in the following sentences. Watch for needed marks within and at the end of the sentences.

1. I cant be present at the meeting on Saturday April 30 1976

2. Sue, please file this report, said Mr. Brown

3. The receptionists notebook was lost

I-F <u>Bài Tập Bổ Túc</u>:

Bạn Hãy liên lạc với Sở Tìm Việc của tiểu bang hay những cơ quan tìm việc khác trong vùng bạn ở. Hãy hỏi họ bản liệt kê các chỗ thư ký đánh máy trong vùng của bạn. Hãy cắt nghĩa công v iệc hiện thời của bạn, sự huấn luyện trước kia, khả năng và mục đích của bạn. Nhờ họ hướng dẫn bạn và hỏi các chương trình huấn luyện có sẵn để làm gia tăng khả năng của bạn. Bạn cần phải có một bản đầy đủ các chi tiết về kinh

4. Dont you know how to operate the dictaphone

5. Did you proofread the Monday April 5th report

6. What important meeting begins on Wednesday May 10 1976

7. The receptionists handwriting was very legible

8. Mrs Thuys secretary has been very helpful

9. I cant leave for lunch until I finish compiling this information

10. Jan said I enjoy the work very much, Mr. Harris

I-E Reading:

If you have had some clerical skills and have a knowledge of typing, some additional training may well qualify you for a clerk-typist job.

The clerk-typist position will vary depending upon the type and size of the office you work in. Typical duties include compiling and typing reports, filing records and reports, posting information, sorting and distributing mail, answering the telephone, using adding machines, typing stencils, addressing envelopes, and operating telephone switchboards.

A wide range of offices employ clerk-typists. Be sure to keep in touch with state employment services and other agencies for a list of possible positions.

You should visit several offices to observe the kinds of duties that are expected of a clerk-typist, the pay scale, and the "atmosphere" of the office.

Training programs are available from vocational schools and other agencies. Choose a training program that will qualify you for the type of clerk-typist job you feel you would most like to have.

I-F Additional Exercises:

Contact the State Employment Service or other employment agencies in your area. Ask for a listing of clerk typists' positions in your area. Explain your present employment, your previous training, your skills, and your goals. Ask them for recommendations and training programs available to increase your skills. You will need to have a detailed account of your work experience and your education. If training programs are available, find out if you qualify for them. Determine how long they take and the times they begin. Be sure to have goals in mind so you are prepared to answer all questions.

nghiệm và học vấn của bạn. Nếu đã có sẵn những chương trình huấn luyện, hỏi xem bạn có đủ điều kiện theo học không? Xem kỹ chương trình huấn luyện mất bao nhiêu lâu, và khi nào khai giảng. Bạn nên nghĩ sẵn mục đích để có thể trả lời tất cả các câu hỏi.

Mấy câu có thể giúp ích cho cuộc đối thoại:

Tôi muốn xin một bản liệt kê...

Tôi có.....sau đây.....

Tôi đã nói chuyện với...

Có sẵn chương trình huấn luyện gì không...?

Bao nhiêu lâu? Làm thế nào để hội đủ điều kiện?

Tôi có thể hỏi thêm chi tiết ở đâu?

Structures that may be useful in the situation:

I would like a listing...
I have the following...
I talked to...
Are there any training programs available?
How long? How do I qualify?
Where can I get more information?

TRÌNH ĐỘ III

BÀI II

ACCOUNT CLERK (Thư Ký Kế Toán)

II-A Mục Tiêu của Học Viên: hiểu và thông thạo với những khả năng và nhiệm vụ thiết yếu của người thư ký kế toán.

II-B Ngữ Vựng:

1. một khoản tiền dành riêng cho việc gì
2. tiền xuất ra, chi ra
3. biên lai
4. sự yêu cầu hay đòi hỏi
5. hóa đơn, phiếu gửi hàng
6. bản báo cáo; sự xác nhận
7. kiểm kê, làm bản kê tất cả hàng hóa
8. cho thuê
9. tiền lời
10. tủ đựng hồ sơ
11. tính toán
12. sự vào sổ
13. đánh máy
14. tính toán (liên quan đến các con số)
15. xếp hồ sơ
16. chính xác
17. nhanh chóng
18. phiếu ghi giờ làm
19. chi phiếu lương
20. máy fôtô-copy (in ra các bản sao)
21. tính ra
22. hàng hóa
23. người giữ sổ lương; ghi phiếu lương

II-C Bài Đối Thoại: Học viên thảo luận về các lớp họ đang học.

Thu: Chị đã học cách xếp hồ sơ chưa?

Hồng: Chưa, tôi vừa học xong môn kế toán. Tôi sẽ bắt đầu học cách xếp hồ sơ vào tuần tới.

Arnold: Tại sao các cô lại đứng đưa trong văn phòng?

Level III

Lesson II

ACCOUNT CLERK

II-A Student Objective: The student will be familiar with the qualifications and essential duties of an account clerk.

II-B Vocabulary:

1. allotment
2. disbursement
3. voucher
4. claim
5. invoice
6. statement
7. inventory
8. rental
9. interest
10. filing cabinet
11. calculate
12. posting
13. type
14. compute
15. file
16. accurately
17. quickly
18. time card
19. payroll check
20. xerox machine
21. figure out
22. goods
23. time keeper

II-C Dialogue: Students discuss classes they are taking.

Thu: Have you started filing yet?

Hong: No, I am finishing my bookkeeping. I will start filing next week.

Arnold: Why do you use a file in an office?

Hồng: Không phải là cái dũa anh dùng trong xưởng máy đâu. Đó là một bộ ngăn kéo dùng để đựng giấy tờ để chúng tôi có thể dễ dàng tìm kiếm.

Thu: Đó là tủ đựng hồ sơ.

Arnold: Cô còn phải làm gì nữa?

Thu: Chúng tôi coi lại hóa đơn, phiếu lương và các việc tương tự để biết chắc là các số đó đúng.

Hồng: Chúng tôi cũng phải cộng lại xem nó có đúng thực không.

Arnold: Có cần phải biết làm toán không? Nguyên việc đó chắc cũng mất cả ngày rồi.

Hồng: Làm như vậy là không thể nào được rồi. Tôi còn phải làm cho nhanh và đúng nữa.

Arnold: Thế cô còn có nhiệm vụ nào khác không?

Thu : Có thêm mấy việc khác tôi phải làm như: vào sổ các ngân khoản dành cho từng việc, tiền xuất ra, khoản khấu trừ trong tiền lương, biên lai chi tiêu, tính tiền lời và các khoản tiền trả lại, và đánh máy hóa đơn.

Arnold: Nếu vậy chúc các cô may mắn nhé.

II-D <u>Bài Văn Phạm - Cách dùng động từ</u>.

Chủ từ thuộc số ít thì động từ cũng phải theo số ít và chủ từ ở số nhiều thì động từ cũng theo số nhiều. Danh từ và đại danh từ ở số nhiều và đại danh "I" và "you" lấy chữ gốc của động từ. Động từ chia ở ngôi thứ 3 số ít (trong các câu dùng "he", "she" hoặc "it" như chủ từ) hãy thêm <u>s</u> hoặc <u>es</u> vào chữ gốc.

<u>Thí dụ</u>: Hồng <u>types</u> rapidly.

Hồng and Thu <u>type</u> rapidly.

<u>Bài Tập 1</u>: Hãy dùng thể đúng của động từ trong những câu sau đây:

<u>Thí dụ</u>: Joan <u>work</u> well. - Joan works well.

Hong: It is not a file like you see in the factory. It is a set of drawers to keep papers in so we can find them.

Thu: It is a "filing cabinet."

Arnold: What else do you do?

Thu: We check bills and time cards and things like that to be sure the numbers are right.

Hong: We have to add them up to be sure they are figured right, too.

Arnold: Is math necessary, too? That's an all-day job in itself.

Hong: Well, it can't be for me. I have to work quickly and accurately.

Arnold: What will some of your other duties be?

Thu: Some of the other things I will eventually do are: posting allotments, disbursements; payroll deductions and expense vouchers; computing interest on funds; and typing invoices.

Arnold: Well, good luck.

II-D Grammatical Focus - Verb Usage.

Singular subjects require singular verbs. Plural subjects require plural verbs. Plural nouns and pronouns and the pronouns "I" and "you" take the root form of the verb. To make the third person singular verb form (in sentences which could use "she", "he" or "it" as subject) add s or es to the root.

Example: singular: Hông types rapidly

plural: Hông and Thu type rapidly

Exercise 1: Write the sentences using the correct form of the underlined verb.

Example: Joan work well.
Joan works well.

Teachers Note: Since both nouns and verbs are invariant, Vietnamese speakers may have difficulty with verb agreement.

Bài Tập 2: Hãy chỉ động tự trong những câu sau đây thuộc về số nhiều hay số ít:

Thí dụ: Mary posts the allotments verb: posts - singular

Bài Tập 3: Hãy đổi những động tự trong các câu sau đây thành thì quá khứ:

Thí dụ: They have the account clerk to do some bookkeeping.

They had the account clerk to do some bookkeeping.

Joan works hard.

Joan worked hard.

1. Account clerks sometimes calculates interest.

2. She perform many duties.

3. Joan keep accurate records.

4. They uses adding machines.

5. Her work please her superior.

6. Clerks computes rapidly.

7. Mary collect data from invoices.

8. She make the payroll deductions.

9. Mary and Joan works together in the office.

10. Clerks also uses the adding machines.

Exercise 2: Indicate the verb in each sentence and say whether it is singular or plural.

Example: Mary posts the allotments. verb: posts - singular

1. Calculators cost a lot of money.

2. She keeps a complete set of books.

3. Mary types the report.

4. The clerk files the forms.

5. Joan performs clerical tasks.

6. Her friends learn the use of the calculator.

7. They watch Mary make the tax deductions on the payroll checks.

8. She makes out a check for the broken calculator.

9. She drinks coffee on her break.

10. The Xerox machine reproduces copies of the statements.

Exercise 3: Change the following sentences to the past tense.

Examples: They have the account clerk to do some bookkeeping.
They had the account clerk to do some bookkeeping.
Joan works hard.
Joan worked hard.

Teacher's Note: Vietnamese verbs are both invariant and limited. There are fewer tenses than in English and they are formed by the context of the sentence rather than verb modification.

II-F <u>Bài Tập Bổ Túc</u>:

Bạn hãy liên lạc với một trường chuyên nghiệp hay thương mại và hỏi họ về các lớp học nghề account clerk trong văn phòng. Hỏi họ xem bạn cần phải có khả năng gì. Hỏi xem có loại công việc gì trong tỉnh, bao giờ lớp học bắt đầu, học trong bao nhiêu lâu, giá tiền ghi tên học mất bao nhiêu.

Mấy câu có thể giúp ích cho cuộc đối thoại:

Xin ông làm ơn cắt nghĩa chương trình account clerk...

Khi nào...?

Bao nhiêu tiền...?

Học ở đâu...?

Học bao nhiêu lâu...?

Tôi sẽ...

1. Joan figures out the schedule for the day.

2. She has invoices at the end of the month.

3. Account clerks need to know fractions and decimals.

4. She makes carbon copies of all memos.

5. She answers the telephone all day!

6. The supervisor checks the work.

7. Mary returns to correct the typing mistake.

8. She places her letters in the outgoing mail.

9. The mail clerk delivers the intercompany mail at 9:00 a.m.

10. Mary punches out on the time clock.

II-E Reading:

The student who learns to do account clerk work has a wide range of choices about his work situation.

Many clerks find jobs in business offices where they may spend most of the time working with numbers. Clerks check over all invoices, or bills, that tell the businessmen what goods he received and how much they cost. The arithemetic has to be checked for accuracy. Clerks verify the time cards so each worker gets paid for the time he worked. They may count the material on hand to be sure the inventory of the business is correct. Sometimes they answer the telephone, sort and deliver mail, or type letters. A worker in a small office will probably do more varied work than one in a big office.

Account clerks can also get jobs working as time keepers or record keepers for companies who manufacture things, ship things, or build houses, commercial buildings, or roads.

All these businesses need accurate records of their daily transactions. The account clerk is an important person in doing this.

II-F Additional Exercises:

Contact a vocational or business school and ask them about classes to learn to do account clerk work in an office. Ask them what skills you need. Ask what kind of jobs there are in town. Ask when the classes start, how long they last, and how much it will cost to enroll.

Structures that may be useful in the situation:

Please explain your account clerk program.
When will...
How much...
Where are...
How long...
What will I...

TRÌNH ĐỘ III

BÀI III

PRACTICAL NURSING (Điều Dưỡng Thực Hành)

III-A <u>Mục Tiêu của Học Viên</u>: Môn "Practical Nursing" (Điều Dưỡng Thực Hành) dạy cho nam và nữ học viên học cách săn sóc bệnh nhân dưới sự hướng dẫn của người "registered nurse" (y tá có chứng chỉ hành nghề) hay y sĩ trong các công việc giản dị. Học viên sẽ trở nên thông thạo với ngôn ngữ và phương pháp cần thiết cho sự phòng ngừa bệnh tật.

III-B <u>Ngữ Vựng</u>:

1. Sự nhiễm trùng
2. bệnh tật
3. vi khuẩn
4. sự vệ sinh
5. để riêng ra, sự cô lập
6. khử độc, tẩy uế
7. sự sát trùng, khử trùng
8. sát trùng
9. dụng cụ
10. tính sát trùng, vô khuẩn
11. sự nhiễm độc
12. không sát trùng
13. bị truyền nhiễm
14. miễn dịch (tránh khỏi truyền nhiễm)
15. sát trùng
16. nhiễm độc, sự truyền nhiễm
17. để riêng ra một nơi, tách riêng ra

III-C <u>Bài Đối Thoại</u>:

Mary: Chị đã học bài thi ngày hôm nay chưa?

Dược: Học rồi, chúng tôi đang thi cách phòng bệnh.

Mary: Tôi đã học cách giữ gìn vệ sinh cho chính mình và cho bệnh nhân quan trọng như thế nào.

Level 3

Lesson III

PRACTICAL NURSING

III-A Student Objectives: The student will become familiar with terminology and procedures necessary for the prevention of disease.

Practical nursing prepares men and women to give nursing care, under the supervision of a registered nurse or physician, to patients in simple nursing situations.

III-B Vocabulary:

1. infection
2. disease
3. bacteria
4. hygiene
5. isolation
6. disinfectant
7. sterilization
8. antiseptic
9. instruments
10. sterile
11. infectious
12. unsterile
13. contaminated
14. immunize
15. sterilize
16. infect
17. isolate
18. test
19. vaccination

III-C Dialogue:

Mary: Have you studied for the exam today?

Duoc: Yes, we are having a test on preventing disease.

Mary: I have learned how important it is to keep myself and my patient clean.

Dược: Đó là cách tốt nhất để đề phòng sự nhiễm trùng.

Mary: Trước tôi chưa ý thức được là sự nhiễm trùng truyền đi bằng nhiều lối.

Dược: Hôm nay tôi cũng coi người điều dưỡng khử trùng tất cả những dụng cụ giải phẫu.

Mary: Việc sát trùng các dụng cụ rất quan trọng.

Dược: Tôi hy vọng chúng mình làm bài thi hôm nay khá. Gặp chị sau nhé.

III-D Bài Văn Phạm - Thì Quá Khứ.

Thì quá khứ của phần lớn các động từ được hợp thành bằng cách thêm "ed" vào chữ gốc (ngữ căn). Những động từ này gọi là động từ qui tắc.

Thí dụ: work - worked
play - played
study - studied
stop - stopped

Những động từ tận cùng bằng y theo sau một chữ phụ âm, thì chữ y đổi thành i và thêm ed. Những động từ tận cùng bằng một chữ phụ âm hãy gấp đôi phụ âm đó rồi thêm ed.

Bài Tập 1: Hãy đổi những động từ sau đây thành thì quá khứ:

Thí dụ: They help - they helped
He stops - he stopped

Duoc: It is the best way to protect from infection.

Mary: I never realized how many ways infection is spread.

Duoc: I also watched the nurses sterilze the instruments in surgery today.

Mary: It is very important to have sterile instruments.

Duoc: I hope we do well on our test today. See you later.

III-D Grammatical Focus - Past Tense

The past tense of most verbs can be formed by adding ed to the root word. These verbs are called regular verbs.

Example: work--worked
play--played
study--studied
stop--stopped

Verbs ending in y, following a consonant, change the y to i, and add ed. Verbs ending in a single consonant double the consonant and add ed.

Teachers Note: Vietnamese verbs are both invariant and limited. There are fewer tenses than in English and they are formed by the context of the sentence rather than verb modification.

Exercise 1: Change the following verbs to past tense.

Examples: They help. They helped.
He stops. He stopped.

1. Jane works.
2. John studies.
3. We work.
4. Dr. Jones operates.
5. The nurse helps.
6. You stop.
7. She walks.
8. They listen.
9. Children play.
10. Germs infect.
11. Doctors heal.
12. Friends visit.
13. We attend.
14. Students ask.
15. Cars pass.
16. We like.
17. Nurses learn.
18. Students watch.

Bài Tập 2: Hãy đổi những câu sau đây sang thì quá khứ:

Thí dụ: John and Joan study nursing.

John and Joan studied nursing.

19. Trains carry.
20. They offer.
21. People talk.
22. Patients call.
23. Mary follows.
24. Students complain.
25. Teachers help.

Exercise 2: Change the following sentences to past tense.

1. John and Joan study nursing.
2. They like helping sick people.
3. They learn many things about disease.
4. The hospitals offer many good job opportunities.
5. I enroll in classes today.
6. I study very hard.
7. John and Joan attend classes every day.
8. The doctors operate in a sterile room.
9. Some sick patients require isolation.
10. Vaccinations immunize against disease.
11. Technicians sterilize surgical instruments.
12. Contaminated instruments infect the patient.
13. We listen to lectures in class every day.
14. Most hospitals isolate infectious diseases.
15. The students ask for help in class.
16. Disinfectants protect people from disease.
17. Scientists discover cures for some diseases.
18. Doctors wash very well before operating.
19. Some visitors carry infectious diseases.
20. The visitors pass on the germs to the patients.

III-E <u>Bài Văn Phạm - Thể Bớt Vần.</u>

<u>Bài Tập 1:</u> Hãy dùng thể bớt vần trong những câu sau đây, để thay cho động tự và "not":

<u>Thí dụ:</u> He had not - He hadn't

I cannot - I can't

He will not - he won't

III-E Grammatical Focus - Contractions

Exercise 1: Write the sentences below, using contractions in place of the verb and not.

Example: He had not. He hadn't.
I cannot. I can't
He will not. He won't

Teacher's Note: While spoken Vietnamese has elisions, there are no written contractions.

1. She did not.
2. John is not.
3. I will not.
4. Mary could not.
5. You should not.
6. We cannot.
7. He must not.
8. James does not.
9. I have not.
10. You would not.
11. Lonnie has not.
12. They do not.
13. Mary will not.
14. Friends are not.
15. Jane was not.
16. We were not.
17. He had not.
18. She is not
19. Mary has not.
20. He does not.

III-F <u>Bài Văn Phạm - Phủ Định trong Thì Quá Khứ.</u>

Muốn đặt một câu phủ định trong thì quá khứ, hãy dùng động tự "do" (chia theo một thứ như thường lệ) cộng thêm "not", rồi thêm chữ gốc của động tự chính.

<u>Thí dụ</u>: I worked

I did not work Đừng nói: I did not worked.

III-F Grammatical Focus - Negative Past Tense

To form a negative sentence in the past tense, use a form of the verb does, plus not, plus the root of the verb.

Example: I worked.
I did not work.
Do not say: I did not worked.

Exercise 1: Change the sentences from past tense to past negative.

Example: The nurse studied.
The nurse did not study.

1. The nurse studied.
2. The doctor operated.
3. The machine worked.
4. The students attended.
5. John enrolled.
6. He worked hard.
7. He learned a lot.
8. Mary looked for work.
9. She wanted a job.
10. Joan walked to school.
11. She liked her classes.
12. She talked to her friends.
13. They listened to her.
14. She finished school.
15. John graduated first.

III-G Reading:

There has always been a demand for people in the nursing profession. There is a special need for men in this field.

III-H Bài Tập Bổ Túc:

Bạn hãy đi thăm một trường điều dưỡng và nói chuyện cùng vị cố vấn cho học viên về cách xin nhập học. Hãy hỏi bà ấy xem bạn cần phải học môn gì, cần phải huấn luyện trong bao nhiêu năm và tiền học mất bao nhiêu? Trường có thể giúp đỡ bạn một phần nào về trợ cấp tài chánh. Phần lớn các trường đều có danh sách chờ để được nhập học. Hãy hỏi xem bạn phải đợi mất bao nhiêu lâu.

Mấy câu có thể giúp ích cho câu chuyện:

Tôi thích...

Tôi muốn...

Tôi cần phải làm gì...?

Bao nhiêu tiền...?

Khi nào tôi có thể...?

Ông có...?

Trong bao nhiêu lâu...?

Tôi phải.....ở đâu?

Most training programs for practical nursing require one year of study. There are long waiting lists in most schools, so it is a good idea to inquire early to get on the waiting list.

At the end of training, the student must pass State Board Exams to receive a license. The training programs and exams are hard work, but the rewards of working as a nurse, helping people, are great. You will have a lifetime skill in an interesting profession.

III-H Additional Exercises:

Visit a school of nursing and talk to student counselor about applying for school. Ask her what subjects you must study, how many years of training are required, and how much money it costs to enroll. The school may be able to help you get some financial assistance. Most schools have waiting lists to get in. Find out how long you would have to wait.

Structures that may be useful in the situation:

I am interested...
I would like...
What do I need...
How much...
When could I...
Do you have...
How long...
Where would I...

TRÌNH ĐỘ III

CÁC CHƯƠNG TRÌNH VỀ Y TẾ VÀ VỆ SINH*

Tất cả các chương trình về ngành Y Tế và Vệ Sinh* đều có cấp chứng chỉ sau khi học viên được hướng dẫn về cách giúp các bệnh nhân trong các phòng nha khoa, phòng mạch hay phòng thí nghiệm, trong phòng mổ hay bệnh viện.

Môn Phụ Tá Điều Dưỡng* là một chương trình học 6 tuần và có cấp chứng chỉ. Nghề này thích hợp cho những người bình tĩnh, khỏe mạnh để thi hành công việc giao phó như các việc điều dưỡng thường nhật.

Học viên có thể đi thăm các khu điều dưỡng và bệnh viện. Giảng viên của Trường Cao Đẳng Điều Dưỡng có thể được mời đến thuyết trình.

---

* *Health: có nghĩa tổng quát gồm tất cả các ngành về y khoa, giữ gìn sức khỏe, vệ sinh, v.v.*

Nursing Assistant: là người giúp cho người điều dưỡng (y tá) trong các công việc săn sóc bệnh nhân như làm giường, thay quần áo, tắm, cho bệnh nhân ăn, đo mạch, cặp sốt, v.v.

LEVEL III

Health Programs

The allied health programs assist in patient care in the dental or medical office or laboratory, in the operating theater, or on the hospital ward.

The nursing assistant program is a six-week diploma course for the stable, healthy person who can perform a variety of routine tasks under supervision.

The students could visit the nursing labs and tour the hospital. Nursing faculty can be used as resource speakers.

TRÌNH ĐỘ III

BÀI IV

ĐIỆN TOÁN

IV-A <u>Mục Tiêu của Học Viên</u>: Một trong những mục đích của bài này là để cho học viên hiểu biết vai trò quan trọng của máy điện toán ngay trong đời sống của chúng ta. Bài học này cũng giới thiệu một số những danh từ kỹ thuật dùng trong điện toán.

IV-B <u>Ngữ Vựng</u>:

1. bấm phiếu
2. kiểm lại
3. máy lựa các tấm phiếu theo những lỗ ám hiệu bấm trên phiếu
4. một bộ phận lựa những bộ phiếu đã bấm vào cùng một loại
5. tin tức, chi tiết
6. một lô các ký hiệu trong máy tính điện tử, nó có thể được sắp xếp thứ tự để cho biết các tin tức.
7. hộp đựng phiếu để chạy vào trong máy
8. sắp xếp lại (sắp xếp một loại các vật nối tiếp nhau cho có thứ tự theo như nguyên tắc không thay đổi kích thước v.v.)
9. một bộ phận trong máy điện toán dùng để lưu trữ các tin tức, chi tiết
10. để chỉ các con số
11. máy điện toán
12. một bộ phận trong máy điện toán có thể làm cho đọc được rõ một số các phiếu, characters v.v. trong một thời gian ấn định.
13. sắp đặt có thứ tự.
14. khoảng cách ở giữa những đường kẻ của tấm bảng nhựa

Level III

Lesson IV

DATA PROCESSING

IV-A <u>Student Objective</u>: One of the purposes of this unit is to make the student become aware of the valuable role that computers play in his everyday life. This unit will also introduce a few of the technical terms used in data processing.

IV-B <u>Vocabulary</u>:

1. card punch
2. verifier
3. sorter
4. collator
5. data
6. characters
7. card hopper
8. merge
9. memory
10. digital
11. computer
12. reading station
13. sequencing
14. grouping

15. việc báo cáo tình trạng và nguyên do theo như tấm phiếu chỉ

16. một tác dụng của máy kết toán

17. ngắt ra, tách ra

18. tùy theo, tùy vào

19. sự điều khiển, sự vận máy

IV-C Bài Đối Thoại:

Kim: Này, có chuyện gì vậy? Trông anh giống như là vừa mới mất người bạn cuối cùng. Thôi, không việc gì mà phải bết bát quá như vậy.

Ed: Còn bết hơn thế nữa ấy, tôi vừa mất việc xong.

Kim: Anh nói thế nghĩa là làm sao? Tôi nghĩ là anh đã có việc làm ngon rồi mà ! chỉ ngoáy bút chì suốt ngày. Thế chuyện gì xảy ra vậy?

Ed: Một cái máy điện toán đã tranh việc làm của tôi. Đúng, một cái máy đã thay thế tôi.

Kim: Cái đó thì bi thật, này, thế anh làm thế nào bây giờ?

Ed: Chị biết không, tôi sẽ không để cho nó hạ tôi được. Tôi từ chối để cho cái máy đó thay thế tôi. Nếu tôi không hạ được nó, tôi sẽ hợp tác với nó. Tôi sẽ đi học tất cả mọi công việc có liên quan đến máy điện toán.

IV-D Bài Văn Phạm - Những chữ đồng nghĩa.

Chữ đồng nghĩa là những chữ có nghĩa giống nhau hay gần giống nhau.

Bài Tập 1: Hãy tìm những chữ ở cột II cho hợp nghĩa với chữ ở cột I:

Thí dụ: 1. merge h. combine

15. selecting

16. calculating

17. disconnect

18. depend on

19. manipulation

IV-C Dialogue:

Kim: Hey, what's the matter? You look like you just lost your last friend. Nothing can be that bad!

Ed: It's worse than that. I just lost my job.

Kim: What do you mean? I thought you had it made, pushing a pencil all day. What happened?

Ed: A computer took my job. Yea, a machine replaced me, me!

Kim: That's bad! That's terrible! What are you gonna do now?

Ed: You know I am not gonna be beat. I refuse to let a computer replace me. If I can't beat them, I'm sure gonna join them. I'm going to learn about all the jobs associated with computers.

IV-D Grammatical Focus - Synonyms

Exercise 1: Synonyms are words that have the same or nearly the same meaning. For each word in Column I, find a synonym in Column II and write it.

IV-E Bài Văn Phạm - Tiếp Đầu Ngữ và Tiếp Vĩ Ngữ.

Nhiều chữ được tạo nên bởi những chữ căn bản như bạn đã biết. Nghĩa của nó thay đổi bằng cách thêm 1 chữ ở dạng đầu (Tiếp Đầu Ngữ) hay một chữ ở dạng cuối (Tiếp Vĩ Ngữ) như re, er, s, ing, tion va age. Bạn hãy lưu ý đến nguyên âm phải luôn luôn thay đổi như thế nào bằng cách bỏ chữ "e", thay chữ "y" bằng "i", hoặc gấp đôi chữ phụ âm cuối cùng.

Thí dụ: compute: computation

verify: verifier

program: programmer

I		II	
1.	merge	a.	computation
2.	sequencing	b.	record
3.	digital	c.	rearrange
4.	sort	d.	write
5.	verifier	e.	arranging
6.	calculate	f.	explain
7.	data	g.	restate
8.	manipulation	h.	combine
9.	file	i.	information
10.	print	j.	numerical
11.	collate	k.	confirm
12.	interpret	l.	information
		m.	compute
		n.	distant
		o.	group

IV-E Grammatical Focus - Prefixes and Suffixes

Many words are built on base words that you already know. Their meaning is changed by adding prefixes and suffixes such as re, er, s, ing, tion, and age. Notice how the root must often be changed by dropping the "e", changing "y" to "i", or doubling the final consonant.

Examples: compute - computation
verify - verifier
program - programmers

Teacher's Note: Vietnamese is a monosyllabic language. Adfixes are therefore unknown.

Bài Tập 1: Hãy tìm trong bảng dưới dây chữ căn bản có thể dùng để bổ túc cho 2 chữ chỉ có tiếp dấu ngữ hay tiếp vĩ ngữ trong những câu sau dây:

Thí dụ: Filing the cards in the correct drawer will keep the files straight. (file, filing, files)

Bài Tập 2: Những chữ ở mỗi hàng sau dây đều được tạo nên bởi cùng một chữ căn bản. Bạn hãy tìm xem chữ căn bản là chữ gì và hãy viết ra:

Thí dụ: open: opener, unopened, reopening

group: regroup, grouping, grouper

Exercise 1: The same base word can be used to complete the two unfinished words in each sentence, using the prefixes or suffixes provided. Find the correct root word from the list below and write it, along with the two new words.

Example: _____ing the cards in the correct drawer will keep the _____s straight.
file: filing, files

compute	program	sort
group	operate	verify
file	punch	store
	produce	

1. The _____er made an error in the _____ation.
2. A re_____er performs three functions: re_____ing gang punching, and summary punching.
3. The computer's memory is a _____age area that _____s various forms of data.
4. During _____tion of the punch cards, the _____er was not disconnected.
5. If you know how to use the _____er, please start _____ing this stack of cards.
6. The _____ion of the computer is largely dependent on the _____or.
7. Use the keypunch machine to re_____ this card because there are errors in the _____es.
8. These two cards should be filed in the _____s you just finished _____ing.
9. Mary _____s cards in groups by hand while the card _____er isn't working.
10. My brother writes _____s, he is a computer _____er.

Exercise 2: The words in each line are built on the same base word. Decide what the base word is and write it.

Example: open - opener, unopened, reopening
group - regroup, grouping, grouper

1. processing, reprocessing, processional, procession
2. recomputation, computerize, computability, computation

3. cooperativeness, cooperation, operational, operative

4. digitalize, digital, digitate, digitalis

5. programmer, reprogram, programmed

6. punching, puncher, repunching

7. filer, filing, refile

8. storage, restore, restorable, restoration

9. verifier, verifiable, verification, verifying

10. recording, recorder

IV-F Reading:

The computer affects the life of each of us. The economic impact is significant. New vocations have been created, such as computer systems analyst, computer programmer, computer operator, and computer technician. The uses of the computer range from the most elementary data processing task to guiding a spacecraft to a landing zone. And yet it is not even 20 years since the computer was first applied to data processing.

The student, no matter what his career choice, is likely to have substantial contact with the computer or the results of computer processing in his future job. Business administration, medicine, government, library science, teaching, engineering, and research are a few examples of vocations in which the computer is having an impact. The computer has become such an important element in the society in which we live that an introductory knowledge of computers should be a part of the knowledge of a well educated person.

TRÌNH ĐỘ III

CÁC NGÀNH LIÊN HỆ ĐẾN KỸ NGHỆ

Sự hiểu biết về an toàn rất cần thiết trong các công việc để bảo vệ cho chính mình và những người cùng làm việc với mình. Những khái niệm an toàn sẽ được trình bày cho học viên trong các lớp ESL* đầu tiên.

Nhiều học viên ESL ít hiểu biết về các loại công việc trong các ngành kỹ nghệ hiện sẵn có, và những tài năng mà mỗi việc đòi hỏi. Bốn loại công việc có ở Trình Độ I là: Hàn, Bảo Trì, General Factory*, và việc Điều Khiển Máy; những công việc này đều có cơ hội huấn luyện và có công việc làm cho những người kém khả năng Anh ngữ.

Những buổi giảng dạy lý thuyết cần được bổ túc bằng những cuộc đi thăm viếng các phòng thực tập, quan sát các lớp huấn nghệ và đi thăm các khu kỹ nghệ. Các đại diện của Urban League*, các giảng viên dạy về kỹ nghệ và các người có trách nhiệm trong giới kỹ nghệ có thể được mời đi thăm các lớp học và thảo luận về các loại công việc và các cơ hội thực tập.

---

* *ESL: học Anh ngữ như ngoại ngữ*

General Factory: nói chung tất cả các loại xưởng trong ngành kỹ nghệ

Urban League: là một hội tư có khế ước với chính phủ để giúp những người thiểu số được huấn nghệ và tìm công việc làm và là một hội rất có thế lực tại Hoa Kỳ.

LEVEL III

Industrial Related

An awareness of good safety practices is needed in all types of industrial jobs for the protection of self and others. These concepts can be understood if presented early in ESL classes.

Many ESL students have a very limited knowledge of the variety of industrial jobs available and of the skills each requires. The four included at Level I, Welding, Maintenance, General Factor, and Machine Operation, have both training and employment opportunities for those with limited ability in English.

The units should be supplemented with visits to the labs, observation of the classroom and industrial tours. Representatives of the Urban League, industrial teachers, or persons from industry could be invited to visit the class and discuss the types of jobs and training opportunities.

TRÌNH ĐỘ III

BÀI V

NGƯỜI VẼ HỌA ĐỒ VỀ CƠ KHÍ

V-A <u>Mục Tiêu của Học Viên</u>: hiểu và biết được công việc và nhiệm vụ của một người vẽ họa đồ về cơ khí.

V-B <u>Ngữ Vựng</u>:

1. người vẽ các chi tiết
2. người vẽ họa đồ
3. người vẽ kiểu
4. người kiểm soát lại
5. dùng vẽ theo kích thước
6. ban kỹ sư vẽ kiểu máy
7. bản họa đồ
8. kỹ sư về sản xuất
9. kỹ sư kế hoạch
10. ngay lập tức
11. ngay tức khắc
12 kế hoạch
13. cá nhân, riêng từng cái
14. kỹ sư chuyên vẽ kiểu các đồ vật mà khách hàng muốn đặt làm
15. sự ghi rõ những chi tiết v.v.
16. kẻ từng dòng
17. bản vẽ sơ lược (đầu tiên)
18. xong hoàn toàn

V-C <u>Bài Đối Thoại</u>:

Kỹ Sư Vẽ Kiểu: Tôi có một bản vẽ sơ lược và bảng chi tiết của một bộ máy cần phải vẽ kiểu ngay.

Người Vẽ Kiểu: Tôi sẽ vẽ cái máy với đầy đủ bộ phận. Sau đó người vẽ họa đồ sẽ vẽ phần máy móc mà sau khi được ráp xong sẽ thành nguyên một cái máy.

Người vẽ các chi tiết: Tôi sẽ vẽ chi tiết của từng bộ phận để người vẽ họa đồ có thể gom góp lại làm thành một bộ phận máy.

LEVEL III

LESSON V

MECHANICAL DRAFTING

V-A Student Objective: The student will be able to understand and identify the functions and duties of a mechanical draftsman.

V-B Vocabulary:

1. detailer
2. draftsman
3. designer
4. checker
5. dimension line
6. design engineering department
7. blueprint
8. product engineer
9. project engineer
10. right away
11. immediately
12. project
13. individual
14. sales engineer
15. specifications
16. tracing
17. preliminary drawing
18. complete

V-C Dialogue:

Sales Engineer: I have a preliminary drawing and specifications of a machine to be designed immediately.

Designer: I will draw the whole machine complete with all its parts. Then the draftsman will draw the mechanisms of the machine which, when put together, will make up the whole machine.

Detailer: I will then make detail drawings of the many individual parts so the draftsman can assemble them together to make his mechanisms.

V-D Bài Văn Phạm - Số nhiều.

Cách đổi danh tự từ số ít sang số nhiều: Thí dụ: singular: blueprint

plural: blueprints

Bài Tập 1: Hãy đổi những danh tự sau đây từ số ít sang số nhiều bằng cách thêm "s" và bỏ mạo tự "a" đằng trước danh tự nếu cần:

Thí dụ: Joe erased a mistake

Joe erased mistakes

V-E Bài Văn Phạm - Thể Phủ Định.

Nếu muốn đổi một câu từ thể xác định sang thể phủ định hãy thêm chữ "not" hay "does not".

Bài Tập 1: Hãy đổi những câu sau đây từ thể xác định sang thể phủ định bằng cách thêm "not hay does not vào đúng chỗ:

Thí dụ: I will help (will la tro dong tu)

I will not help

Tom checks the drawing (checks la dong tu chinh)

Tom does not check the drawing

V-D Grammatical Focus - Plurals

Changing singular nouns to plural nouns.

Example: Singular - blueprint; plural - blueprints

Teacher's Note: Vietnamese nouns are invariant. Plurals are formed by adding a word such as several, three, many, etc. Vietnamese speakers may therefore tend to ignore plural endings.

Exercise 1: Change the nouns to plural form by adding s, and drop the preceding "a" if necessary.

Example: Joe erased a mistake.
Joe erased mistakes.

1. We will make a blueprint.
2. Sales engineers will make a preliminary drawing.
3. A checker checks the drawing made by the draftsman.
4. The project incorporates the specifications.
5. A designer will draw a part.
6. The detailer will make a detailed drawing of a machine part.
7. A detailer and designer use a drafting instrument.
8. A machine will be represented by a drawing of all the parts.
9. A dimension line can be drawn on the tracing paper.
10. An erasure should be made on the drawing.

V-E Grammatical Focus - Negatives

Exercise 1: Change the following sentences from postive to negative by adding not or does not in the correct place.

Examples: I will help (auxiliary verb)
I will not help.

Tom checks the drawing. (active verb)
Tom does not check the drawing.

1. The shading is on the drawing.
2. All dimensions are done freehand.
3. Some lines on the drawing are heavier than others.
4. The checker looks over all the drawings of the project.

V-F Bài Văn Phạm - Thể Nghi Vấn.

Bài Tập 1: Hãy đổi những câu sau đây thành câu hỏi bằng cách đổi lại thứ tự của những chữ hay thêm trợ động tự "does":

Thí dụ: The project engineer should supervise the project (should la tro dong tu)
Should the project engineer supervise the projects?

The project engineer supervises the project (supervises la dong tu chinh)
Does the project engineer supervise the projects?

5. Blueprints are sent to other people.

6. The detailer sits at the drafting board when drawing detailed parts.

7. The designer must always be neat and orderly about his drawing work.

8. Drawings are always made as complete as possible.

9. The detailer always uses a pencil when drawing.

10. The checker checks a set of blueprints of the drawing project.

V-F Grammatical Focus - Questions

Exercise 1: Change the following statements to questions by inverting the word order or adding a form of do.

Examples: The project engineer should supervise the project. (auxiliary vert
Should the project engineer supervise the project?

The project engineer supervises the project. (active verb)
Does the project engineer supervise the project?

1. The draftsman uses a pen when inking.

2. The designer helps the draftsman and detailer.

3. Mistakes should be held to a minimum on a drawing.

4. The sales engineer discusses his work with the customer.

5. The product engineer checks the project of the project engineer.

6. Much time is required to complete the project.

7. Preliminary drawings are made by the sales engineer.

8. The drafting personnel draw on tracing paper.

9. Mathematics are a part of mechanical drafting.

10. The draftsman has his own set of drawing tools and instruments.

V-G Bài Kiểm - Những chữ đồng nghĩa.

Bài Tập 1: Hãy viết trọn một câu bằng cách dùng những chữ của bảng bên trái đặt vào một câu bên bảng bên mặt cho hợp nghĩa:

Thí dụ: a. Checks the drawing for errors

2. The Checker.

V-I Bài Tập Bổ Túc:

1. Hãy xin một buổi hẹn để xin làm công việc của người vẽ các chi tiết, hay người vẽ họa đồ trong ban kỹ sư vẽ kiểu máy.
2. Đi thăm một ban kỹ sư và hỏi xem làm việc ở đó cần phải có khả năng và sự hiểu biết gì?
3. Đi thăm những người thợ vẽ họa đồ và kỹ sư làm việc xem bạn có thích làm công việc của họ không?

Mấy câu có thể giúp ích cho cuộc đi thăm đó:

Cần phải huấn luyện như thế nào để trở thành một...?

Trong bao nhiêu lâu...?

Tôi cần phải ở miền nào trong nước để trở thành một...?

Tôi có thể làm công việc liên hệ gì với sự huấn luyện như...?

Tôi phải có tình trạng sức khỏe như thế nào để trở thành một...?

Tôi cần phải khá về toán như thế nào để trở thành một...?

V-G Comprehension - Matching Statements

Exercise 1: Write the complete sentence by matching the phrase on the left with the correct phrase on the right.

____1. The detailer	a. checks the drawing for errors.
____2. The checker	b. makes preliminary drawings to meet customer's needs.
____3. The designer	c. makes small detail drawings.
____4. The draftsman	d. assigns projects to the project engineer.
____5. The sales engineer	e. draws machine mechanisms.
____6. The product engineer	f. draws whole machine parts.
____7. The project engineer	g. oversees the whole project.

V-H Reading:

There are many different kinds of drafting jobs available depending upon the type of industry. There are also many related occupations if one chooses not to become a draftsman. Visits to different types of industry should be made. Thought should be given to where most drafting jobs are, pay, work hours, and how one may progress on the job.

V-I Additional Exercises:

1. Make an appointment for an interview for a detailer or draftsman's job in the design engineering department.

2. Visit an engineering department and ask what is required in job entry skills and knowledge.

3. Visit the draftsman and engineers to find out if you would like their kind of work.

Structures that may be useful in the situation:

What training is required to become a...
How long...
What part of the country must I live in to be a....
What related occupations could I enter with training in...
What physical requirements must I have to be a...
How good must I be in math to be ....

TRÌNH ĐỘ III

BÀI VI

NGHỀ SỬA CHỮA VÀ BẢO TRÌ MÁY ĐIỆN TỬ

VI-A Mục Tiêu của Học Viên: quen thuộc với một số danh từ và phận sự đòi hỏi trong nghề sửa chữa máy điện tử.

VI-B Ngữ Vựng:

1. cường độ giòng điện (số lượng am pe chạy trong dường giây điện)
2. giây ăng ten
3. cách xem bản họa đồ của một vật dịnh sửa chữa hay cấu tạo
4. tính chất của một vật có thể đo được như điện, cơ khí, độ nóng v.v.
5. tấm kim loại dùng để cắm các điện tử (tạo thành một bộ phận của một máy)
6. mạch điện liên tục soay chiều
7. luồng điện
8. năng lượng
9. lược đồ của mạch điện
10. nghề sửa chữa và bảo trì máy điện tử
11. tiêu điểm; điểm tập trung của những tia điện tử
12. cầu chì
13. điện kế đo volt (đồng hồ đo sự sai biệt về điện thế)
14. than chì dùng trong một vài loại máy điện
15. cường độ điện trở
16. sự điều chỉnh đúng hình ảnh trên màn ảnh máy truyền hình
17. một dụng cụ để ghi sự giao động của điện thế

LEVEL III

LESSON VI

ELECTRONICS SERVICING

VI-A Student Objective: The student will become familiar with some of the terms and duties required in electronic servicing.

VI-B Vocabulary:

1. amperage
2. antenna
3. blueprint reading
4. characteristics
5. chassis
6. circuit continuity
7. current
8. density
9. diagram
10. electronic servicing
11. focus
12. fuses
13. voltmeter
14. graphite
15. impedance
16. lineation
17. oscilloscope

18. một dụng cụ điện tử để biến điện năng thành những tín hiệu

19. điện trở

20. sắp đặt

21. một loại điện kế để đo bằng tín hiệu

22. sự chỉ rõ các chi tiết

23. cuốn sách chỉ dẫn về kỹ thuật

24. cái biến điện

25. đèn tube (trong các loại máy điện tử như radio, T.V. v.v.)

26. điện thế

27. sự phân tách

28. sự chạm mát, sự mát điện, giây "te"

29. sửa lại cho đúng

30. nghề sửa chữa, sự làm việc

31. hàn

32. tìm chỗ hư

33. sự tìm sửa những chỗ bị trục trặc

34. chia ra từng mục

35. bị hư, trục trặc

36. sóng âm thanh

37. sóng truyền hình, hình ảnh

38. không tổn hại, còn nguyên

39. hỏng, tổn hại

VI-C <u>Bài Đối Thoại</u>:

Bà Di tới lấy cái TV sửa và bàn cãi về cái hóa đơn của bà ta.

Bà Di: Này Anh bạn, anh không thể nào tính đến $32.34 để sửa cái TV hỏng của tôi được.

John: Tôi nghĩ lá tiền công đã tính đúng đó; nhưng bà có thể coi đây, cái hóa đơn đã chia ra từng món một.

18. receivers

19. resistance

20. schematic

21. signal generator

22. specifications

23. technical manual

24. transformer

25. tubes

26. voltage

27. analyzing

28. grounding

29. rectify

30. servicing

31. soldered

32. traced

33. troubleshooting

34. itemized

35. defective

36. audio

37. video

38. intact

39. frustrated

VI-C <u>Dialogue</u>: Mrs. Di picks up her repaired TV set and discusses her bill.

Mrs. Di: Hey. You can't be serious, charging me $32.34 to fix my busted TV.

John: Well, I'm afraid the service charges are correct; but, as you can see, the bill is <u>itemized</u>.

Bà Di: Hử! nhưng cái này chả có nghĩa gì đối với tôi cả, tôi nghĩ là anh đã ăn gian của tôi.

John: Được rồi, để tôi cắt nghĩa từng mục một. Đầu tiên, tôi coi lại tất cả các bóng đèn và tìm thấy ba cái bị hư. Giá tiền thay mất $7.35 và nó được ghi ở dưới mục các bộ phận thay. Tiền công cho 2g30 mà tôi đã phải mất để tìm các chỗ hư và coi mạch điện. Khi dùng đồng hồ đo điện để phân tách giây quấn theo cái diagram tôi thấy mỗi cái đều nguyên vẹn. Tuy nhiên, khi thử xem hình ảnh bằng cái oscilloscope, tôi thấy cần phải điều chỉnh cho năng lượng, hình ảnh và tiêu điểm.

Bà Di: Ồ, đối với tôi vẫn còn khó hiểu quá; anh nói thế có nghĩa là chính tôi có thể thay 3 cái bóng và sửa những thứ này?

John: Không, bởi vì một là bà không có dụng cụ cần thiết, hai là cần phải thử để xem tại sao hình ảnh cứ nhảy. Dùng cái điện kế "signal generator" tôi đã tìm thấy một đường giây bị tuột ra và chạm mát vào cái chassis. Rồi tôi lại phải hàn nó lại để cho công việc bình thường lại.

Bà Di: Thôi được. Đây tiền của anh đây, nhưng chắc chắn là công việc làm của anh rất tốt. Tôi đoán là anh phải có bằng đại học.

John: Bà không cần phải có bằng đại học, bà đang nói chuyện về khả năng kỹ thuật mà bà có thể học ở trường chuyên nghiệp kỹ thuật.

Bà Di: Nhất rồi, thế tên lớp đó là gì?

John: Lớp huấn luyện của tôi gọi là "chương trình sửa chữa máy điện tử" nhưng tôi cũng được chỉ dẫn thêm về "cách coi bản họa đồ" ở Trung Tâm Kiến Thức Tráng Niên cho nên chương trình học của tôi đã được dễ dàng hòn.

Bà Di: Thế à! Tôi sẽ tiếp súc với vị cố vấn và khởi sự ngay.

Mrs. Di: Yeh, but this stuff doesn't mean anything to me. I think you're ripping me off!

John: O.K. Let me explain each item. First, I checked all the tubes and found three which were defective. The replacement cost was $7.35 and that's listed under "parts". The "labor" charge was for the 2½ hours I spent "troubleshooting" and checking out circuit continuity. In analyzing the wiring diagram with the voltmeter, I found that everything was intact. However, in running a video test on the oscilloscope I did find that some adjustments were needed for proper density, lineation, and focus.

Mrs. Di: Wow! This still sounds Greek to me. You mean I could have replaced those three tubes and made the adjustments to fix the thing myself?

John: No, because for one thing you don't have the necessary equipment and for another, it was another test which indicated the reason for the picture rolling. Using a signal generator, I traced a loose wire which was grounding on the chassis. Then I just soldered it back into place and that seemed to rectify things.

Mrs. Di: O.K. Here's your money, but it sure sounds like you've got a good job. I'll bet you need a college degree.

John: No you don't. You're talking about a technical skill which can be learned at Voc. Tech.

Mrs. Di: What's the name of the course?

John: My training was in the "Electronic Servicing" program, but I did take some tutoring in Blueprint Reading at one of the Adult Learning Centers and that made it much easier when I signed up for school.

Mrs. Di: O.K. I'm going to contact a counselor and get going!

VI-D Bài Văn Phạm - Can và May

"can" có nghĩa là có khả năng để làm một việc.

"may" chỉ một việc có thể (thường chỉ sự xin phép hay có lẽ)

Bài Tập 1: Hãy dùng đúng chữ "can" hay "may" trong những câu sau đây:

Thí dụ: I can do that easily.

May I go with you?

VI-E Bài Văn Phạm - Tính Từ và Trạng Từ.

Cách dùng tính từ và trạng từ.

a. good and well

b. bad and badly

a) Good luôn luôn dùng như một tính từ.

Well có thể dùng như một tính từ hay trạng từ.

b) Bad dùng như một tính từ.

Badly dùng như một trạng từ.

Bài Tập 1: Hãy dùng những chữ trong dấu ngoặc đặt vào những câu sau đây:

Thí dụ: You performed (good/well) on the exam.

You performed well on the exam.

VI-D Grammatical Focus - Can and May

"Can" refers to ability. "May" refers to possibility (usually based upon permission or probability).

Exercise 1: Write the sentences using the correct word can or may:

Examples: I can do that easily. May I go with you?

1. _____ I please have the specifications for the oscilloscope?

2. _____ you hand me the schematic diagram?

3. I know that I _____ check the lineation first.

4. If there is no more to do, _____ I go home?

5. You _____ use the soldering iron only if you work safely.

6. I doubt that the antenna _____ operate without a transformer.

7. The specifications call for wiring material which we ___ not have.

8. If you _____ read the manual, the job is much simpler.

9. I _____ have to take your set into our service center.

10. You have three defective tubes which _____ be replaced for $7.35.

VI-E Grammatical Focus - Adjectives and Adverbs

Proper use of adjectives and adverbs

a. good and well
b. bad and badly

a. Good is always used as an adjective.
Well may be an adjective or an adverb.

b. Bad is used as an adjective.
Badly is used as an adverb.

Exercise 1: Write the sentences using the correct word in parentheses.

Example: You performed (good/well) on the exam.
You performed well on the exam.

1. The customer behaved (bad/badly) when he saw the service charge.

2. I think that electronic servicing is (good/well) to learn.

3. John was glad to find the (bad/badly) connection.

Bài Tập 2: Hãy chỉ những chữ có kẻ dưới trong những câu sau đây là tính từ hay trạng từ:

Thí dụ: If you know how to read the blueprints the rest is simple.

adverb.

VI-F Bài Văn Phạm - Cách dùng động từ.

Bài Tập 1: Hãy dùng động từ đúng trong dấu ngoặc ở những câu sau đây:

Thí dụ: A good serviceman (take/takes) his time.

4. A (bad/badly) broken TV set can be expensive to fix.

5. The set performed (good/well) when it was in the service center.

6. The voltmeter test looked (bad/badly) compared to the others.

7. It takes a very small amount of electricity to rotate a (good/well) antenna.

8. Repairs can usually be done (good/well) in the customer's home.

9. It's always (good/well) to consider safety first.

10. The signal generator was worn too (bad/badly) to operate well.

Exercise 2: Indicate if the underlined word is an adjective or an adverb.

Example: If you know how to read blueprints, the rest is simple. adverb

1. The waves on the oscilloscope became narrow when the audio was increased.

2. Which of these schematic diagrams will work best?

3. This wiring diagram is difficult to read.

4. Weak video tubes will produce a picture which is too dim.

5. The wire shorted deep in the chassis floor.

6. Robert appeared frustrated by the audio breakdown.

7. A successful career depends upon keeping abreast of technological advances.

8. The specifications are completely detailed in the manual.

9. It's hard to believe that the charges were so high.

10. An important skill to learn is blueprint reading.

VI-F Grammatical Focus - Verb Usage

Exercise 1: Write the sentences using the correct form of the verb in parentheses.

Examples: A good serviceman (take/takes) his time.
A good serviceman takes his time.

Teacher's Note: Vietnamese verbs are both invariant and limited. There are fewer tenses than in English and they are formed by the context of the sentence rather than verb modification.

Bài Tập 2: Hãy dùng thể đúng của động tự trong dấu ngoặc của những câu sau đây:

Thí dụ: The line on the oscilloscope (swung/swang) widely.

The line on the oscilloscope swang widely.

Bài Tập 3: Hãy kẻ dưới những thì sai của động tự trong mỗi câu sau đây, sau đó viết thì đúng vào chỗ trống:

Thí dụ: Did you see the oscilloscope shown? showed.

1. The oscilloscope (show/shows) the problem.

2. Mary and John (want/wants) their TV repaired.

3. A good service center (make/makes) a difference.

4. Your antenna (increase/increases) the picture quality.

5. Defective parts (produce/produces) a safety hazard.

6. Audio and video characteristics (is/are) tested first.

7. Density, lineation, and focus (was/were) adjusted.

8. Both technical manuals (give/gives) the same information.

9. Electronic servicing (is/was) a career you might consider.

10. Neither you nor Ellen (can/may) find the trouble.

Exercise 2: Write the sentences using the correct form of the verb in parentheses.

1. The lines on the oscilloscope (swung/swang) widely.

2. The prices on parts replacement have not (fallen/fell).

3. Ellen has not (spoke/spoken) to Ted about the bill.

4. That clip (sprang/sprung) out when the nut was removed.

5. Those lines appear to be (froze/frozen) on the oscilloscope.

6. We (saw/seen) what kind of wages a serviceman earns.

7. They never have (threw/thrown) away a defective part without the customer's approval.

8. Both trainees have (ran/run) a check on the continuity of the circuit.

9. The signal (grew/growed) stronger when impedance was reduced.

10. The acid has (eaten/ate) through the wire.

Exercise 3: Write the sentences using the correct past tense form for the underlined verb.

Example: Did you see what the oscilloscope shown? showed

1. When no defective tubes were located, Ted begun to be puzzled.

2. Have you bring your signal generator to class?

3. The serviceman checked for a broke circuit.

4. Thach analyze his bill carefully.

5. Where are my solder iron?

6. If it were not for these fuses your main tube would have blew.

7. Electrical resistance increase when he turned on the iron.

8. They had not understanded the charges on their bill.

9. A car and a valid driver's license is require in this job.

TRÌNH ĐỘ III

CÁC CHƯƠNG TRÌNH HỌC CÁCH TIẾP ĐÃI KHÁCH

Các công việc dọn dồ ăn, một phần trong kỹ nghệ tiếp dãi khách, đang phát triển mạnh mẽ. Số người thích đi du lịch và ăn ở nhà hàng mỗi ngày một đông hơn. Dân số gia tăng, thành thị mở mang, tiền bạc dủ dả để đi du lịch và ăn tại nhà hàng, tất cả những sự kiện đó đã giúp cho sự phát triển của kỹ nghệ tiếp dãi khách bành trướng.

Những người kém khả năng Anh ngữ có thể tìm công việc trong lãnh vực này. Huấn luyện về vệ sinh trong nhà bếp và giao tiếp với khách hàng có sẵn trong các trình độ trong chương trình về "food preparation*" tại các trường kỹ thuật.

Bài học này cần được bổ túc bằng những cuộc đi thăm viếng các phòng thực tập "food preparation". Giảng viên của các phòng thực tập này có thể được mời đến để nói chuyện với học viên của cả lớp.

---

* *Food Preparation: nói chung tất cả những nghề như nấu ăn, bày đồ ăn, dọn bàn, phụ bếp, rửa chén, v.v.*

LEVEL III

Hospitality Programs

Food service jobs, part of the hospitality industry, are booming. Greater numbers of people are traveling and dining out. With increases in population, urban development, and more money available for trips and meals away from home, growth continues.

Individuals with limited skills in English are employable in the hospitality industry. Training in proper kitchen procedures, sanitation, and public relations are available at various levels in the food service program at most vocational schools.

This unit should be supplemented by visiting the food service labs or a restaurant kitchen. Teachers in the program could be invited to talk to the class.

TRÌNH ĐỘ III

BÀI VII

FOOD PREPARATION*

VII-A Mục Tiêu của Học Viên: biết về các chương trình huấn luyện có sẵn về food preparation*; hiểu và dùng các ngữ vựng cùng cách cân, đo lường dùng trong ngành food preparation.

VII-B Ngữ Vựng:

1. ghi nhớ
2. xin một chỗ làm
3. lựa chọn
4. duy trì
5. số lượng
6. tách riêng ra
7. thương mại
8. có hiệu lực, công hiệu
9. nghề nghiệp
10. phẩm chất
11. khả năng, sự khéo léo
12. huấn luyện
13. sự sửa soạn
14. phương pháp
15. sở, chi nhánh
16. nhân viên
17. người dọn bàn
18. thịt bò lò
19. dơ bẩn
20. vườn bông, công viên
21. đúng, lanh lẹ
22. chỗ nghỉ mát
23. đồ làm bằng tay, thủ công nghệ
24. mạnh mẽ
25. có lời
26. nhấn mạnh về một điểm
27. sức lực; bắt buộc
28. giảm đi
29. còn lại
30. chứng tỏ; thử
31. làm tràn ra, chảy ra
32. sách bài làm

---

* *Food Preparation: nói chung tất cả những nghề như nấu ăn, bê đồ ăn, phụ bếp, dọn bàn, rửa chén v.v.*

Level III

Lesson VII

FOOD PREPARATION

VII-A <u>Student Objective</u>: The student will know about training programs available in food preparation and will be able to understand and use the vocabulary and weights and measures used in the kitchen.

VII-B <u>Vocabulary</u>:

1. memorize
2. applied
3. select
4. maintain
5. quantity
6. isolated
7. commercial
8. effective
9. profession
10. quality
11. skills
12. training
13. preparation
14. methods
15. agencies
16. personnel
17. busboy
18. roast
19. dirty
20. park
21. sharp
22. resorts
23. craft
24. intensive
25. gainful
26. insist
27. force
28. decrease
29. remain
30. prove
31. spill
32. workbook

VII-C Bài Đối Thoại:

Frank: Tôi làm người dọn bàn trong hàng ăn này đã 3 năm nay.

Nga: Thế anh không thích làm việc đó nữa hả?

Frank: Có chứ, nhưng tôi muốn trở thành người nấu ăn.

Nga: Anh phải ghi tên vào chương trình huấn luyện để học nghề đó.

Frank: Tôi biết. Bà giáo lớp đêm đã đề nghị với tôi rồi. Bà ấy nói có sẵn nhiều chương trình trong ngành Food preparation.

Nga: Anh nghĩ là tôi cũng có thể xin được huấn luyện thêm không?

Frank: Ồ, được chứ, tôi chắc chắn là chị có thể học được.

Nga: Thế mình đi lấy đơn xin ghi tên học ngay đi.

VII-D Bài Kiểm: Chữ kẻ dưới trong những câu sau đây sai, bạn hãy viết câu đó lại bằng cách dùng đúng chữ:

(*Chú thích: Bảng chỉ dẫn cách cân đo tương đương với mét đính kèm ở cuối cuốn sách này có thể in ra và phát cho mỗi học viên.*)

Thí dụ: There are six quarts in a gallon.

There are four quarts in a gallon.

VII-C Dialogue:

Frank: I have been a busboy at this restaurant for three years.

Nga: Don't you like your job any more?

Frank: Yes, but I would like to be a cook.

Nga: You would have to go into a training program to learn that.

Frank: I know. Our teacher at night school suggested it to me. She said there are many training programs available in food preparation.

Nga: Do you think that I can apply for more training also?

Frank: Oh yes, I'm sure that you can.

Nga: Let's get the applications right away.

VII-D Comprehension:

Exercise 1: The mistake in each sentence is underlined. Write the sentence using the correct word.

Example: There are six quarts in a gallon.
There are four quarts in a gallon.

Note: The chart of metric equivalencies provided in the back of this book may be duplicated and provided to each student.

1. There are three cups in a quart.
2. Four teaspoons are equal to one tablespoon.
3. The busboy prepares the food.
4. Apples, oranges, and grapefruit are classified as vegetables.
5. There are nine units in a dozen.
6. Milk, water, and juice are measured with dry measures.
7. Restaurants show what they have to offer on a recipe.
8. Sixteen cups make up a quart.
9. Roasts are cooked in the oven for several minutes.
10. There are eighteen ounces in a pound.
11. Potatoes are usually bought by the ton.

VII-E Bài Văn Phạm - Some/any (một vài cái)

"some" dùng trong một câu thuộc thể xác định.

"any" dùng trong một câu thuộc thể phủ định.

Thí dụ: I have some money. I don't have any money.

Do you have some books? I don't have any books.

Bai Tập 1: Bạn hãy dùng chữ đúng trong dấu ngoặc đặt vào những câu sau đây:

VII-F Bài Văn Phạm - Thể Nghi Vấn (câu hỏi).

Bài Tập 1: Hãy đổi những câu sau đây thành thể nghi vấn bằng cách xếp lại vị trí của động từ hay thêm "does":

Thí dụ: Rose was here.	His father works in town.
Was Rose here?	Does his father work in town?

12. A beverage is something you eat.

13. Pastry, ice cream, and fruit are all beverages.

14. There are four pints in a quart.

15. Restaurant kitchens should be kept dirty.

VII-E Grammatical Focus - Some/Any

Some is used in a positive sentence or question. Any is used in a negative sentence and may should be used in questions.

Example: I have some money. I don't have any money.
Do you have some books? I don't have any books.

Exercise 1: Write the sentences using the correct word in parentheses.

1. Do you have (any, some) applications?

2. No, there aren't (any, some) left.

3. When will you have (any, some) more?

4. I should have (any, some) more tomorrow.

5. Do you think that I can apply for (any, some) training?

6. I'm sure that you will be accepted for (any, some) training.

7. Does the county offer (any, some) training programs?

8. Oh yes, the county offers (any, some) fine programs.

9. Where can I get (any, some) more information?

10. The state employment office should have (any, some) information.

11. I don't have (any, some) information on that.

VII-F Grammatical Focus - Questions

Exercise 1: Change the following statements to questions by inverting the word order or adding a form of does.

Example: Rose was here.
Was Rose here?

His father works in town.
Does his father work in town?

1. I went to school with him in Texas.

2. Xuan always learns the new words.

VII-G Bài Văn Phạm - Thì Quá Khứ.

Bài Tập 1: Hãy đổi những động từ sau đây thành Thì Quá Khứ. Giảng viên sẽ coi lại bài làm và nghe cách phát âm của các bạn.

Bài Tập 2: Hãy dùng những động từ trong bài tập 1 và đặt thành câu. Bạn có thể dùng thì hiện tại hay thì quá khứ.

Bài Tập 3: Câu chuyện sau đây được viết trong thì hiện tại, xảy ra mỗi ngày. Bạn hãy đổi thời gian thành ngày hôm qua và đổi tất cả những động từ có kẻ dưới thành thì quá khứ.

*will enter là thì tương lai, bạn cũng đổi nó thành thì quá khứ.

3. She is studying English.

4. They explained the program to him.

5. You are working hard.

6. The women were in the kitchen.

7. He puts his money in the bank.

8. The cook burned the roast.

9. Mai is Xuan's wife.

10. His friend finished the dishes.

VII-G Grammatical Focus - Past Tense

Exercise 1: Change each of these verbs to the past tense. The teacher will check your work and listen to your pronunciation.

Teacher's Note: Vietnamese verbs are both invariant and limited. There are fewer tenses than in English and they are formed by the context of the sentence rather than verb modification.

1. describe	7. practice	13. manage	19. spill
2. notice	8. touch	14. need	20. count
3. insist	9. plan	15. decrease	
4. control	10. change	16. remain	
5. accept	11. force	17. prove	
6. learn	12. carry	18. indicate	

Exercise 2: Use the words in Exercise 1 above in sentences of your own. You may use present or past tense.

Exercise 3: This story is written in present tense EVERY DAY. Retitle it to YESTERDAY and change all the underlined verbs to past tense.

EVERY DAY

Xuong gets up at 6:00 a.m. After he takes a shower and dresses, he eats breakfast. Then he meets his friend Nga and they walk to the restaurant together. Nga is a kitchen helper. Xuong works as a busboy. They arrive at work at eight o'clock. The restaurant has many customers and they are busy all morning. At noon Xuong and Nga eat their lunch in the park. They sit on a bench and practice speaking English. They bring their workbooks with them. Xuong likes to review the new words. Nga studies her lesson, also. Their class starts at 6:30 p.m. sharp! They don't like to be late. When they learn more English, they will enter* a training program in food service.

*Will enter is future tense. Change this also to past tense.

VII-I Bài Tập Bổ Túc:

1. Hãy tiếp sức với Sở Tìm Việc của Tiểu Bang để hỏi về các chương trình huấn luyện về food preparation có sẵn trong vùng bạn ở. Họ có thể giới thiệu bạn đến những cơ sở khác có thể giúp bạn được.

2. Hãy hỏi những nhà hàng, quán trọ, hàng ăn v.v. tại những nơi nghỉ mát xem họ có các chương trình huấn luyện cho những người thích làm việc về ngành thực phẩm không?

3. Nên đến trường chuyên nghiệp kỹ thuật để biết về các chương trình của họ và xem họ có thể giúp bạn huấn luyện được gì. Vị cố vấn sẽ sẵn sàng hướng dẫn và trả lời các câu hỏi của bạn.

Mấy câu có thể giúp ích cho cuộc đối thoại:

Chỗ đó ở đâu?

Bao nhiêu lâu...?

Khi nào...?

Ông có...không?

Tôi xin nói chuyện với...

Có sẵn những gì...?

VII-H Reading:

Preparation of food in commercial eating places is one of the largest industries in the country. Quantity cooking is a highly skilled craft requiring intensive training. Experienced cooks do not learn their trade by memorizing isolated recipes, but by learning general methods or skills which can be applied in a wide variety of cases.

Personnel in food service departments need to be able to select, care for, prepare, and serve quality food to maintain public health. In-service training in food preparation is important in maintaining effective preparation standards.

The State Employment Service knows of any on-the-job training programs which would permit an employee to work while at the same time receiving training in food preparation. Public Service Employment is a federally backed program to assist those in need of training. The Comprehensive Employment Training Act also seeks out those who need to be in a training program before they will be able to be gainfully employed.

VII-I Additional Exercises:

1. Contact the State Employment Service to inquire about training programs in Food Preparation that are available in your area. They may refer you to other helpful agencies.

2. Inquire of large resorts, motels, restaurants, etc., if they have their own training programs for those interested in the food service profession.

3. Go to your vocational-technical school and learn about their programs and what they can offer you in training. A counselor would be glad to assist you and answer your questions.

   Structures that may be useful in the situation:

   Where is that located?
   How long...
   When does...
   Do you have...
   May I talk to...
   What is available...

TRINH DO III

PHAN TAP DOC

BÀI I - Nếu bạn đã có một chút khả năng về công việc văn phòng và biết đánh máy, thì sự huấn luyện thêm có thể giúp cho bạn đủ sức để nhận công việc của một người thư ký đánh máy.

Công việc của người thư ký đánh máy thay đổi tùy theo loại và sự rộng lớn của văn phòng bạn làm việc. Nhiệm vụ chính gồm có thâu thập tai liệu và đánh máy các báo cáo, cất giữ hồ sơ và báo cáo, dán các thông cáo, soạn và phân phối thư từ, trả lời điện thoại, sử dụng máy tính, đánh máy giấy tăng sin, đánh máy bao thư, và coi tổng đài điện thoại.

Có nhiều loại văn phòng mượn thư ký đánh máy; bạn nên giữ liên lạc với các Sở Tìm Việc của Tiểu Bang và các cơ quan khác để xem các bảng liệt kê chỗ trống.

Bạn nên đi thăm nhiều văn phòng và quan sát các nhiệm vụ mà người thư ký đánh máy phải làm, giả biểu lường, và bầu không khí làm việc trong văn phòng.

Các chương trình huấn luyện có sẵn tại các trường chuyên nghiệp và các cơ quan khác. Bạn hãy chọn một chương trình huấn luyện giúp bạn trở nên có khả năng cho loại công việc của người thư ký đánh máy mà bạn cảm thấy thích nhất.

BÀI II - Học viên học về công việc của người account clerk có nhiều cơ hội để lựa chọn công việc trong lãnh vực đó.

Có nhiều account clerk tìm việc làm trong các văn phòng thương mại và phần lớn công việc của họ là tính toán các con số. Account clerk coi lại tất

cả các phiếu gửi hàng và các hóa đơn để những nhà buôn biết mình nhận được những hàng hóa gì và giá tiền bao nhiêu. Các con tính cần phải coi lại cho chính xác. Họ kiểm lại các phiếu ghi giờ để mỗi công nhân được trả lương đúng những giờ đã làm. Họ có thể cần phải kiểm các hàng hóa còn lại xem sự kiểm kê có đúng không. Thỉnh thoảng họ trả lời điện thoại, soạn và phân phát thư tư, hay đánh máy văn thư. Một người làm việc trong một văn phòng nhỏ có thể làm nhiều công việc khác nhau hơn là một người làm trong hãng lớn.

Account clerk có thể tìm được việc làm như người giữ sổ lương hay giữ hồ sơ trong các hãng sản xuất các đồ dùng, các hãng vận tải bằng đường biển hay hãng xây cất nhà cửa, cao ốc thương mại hoặc dưỡng xá.

Tất cả các ngành thương mại này đều cần những sổ sách chính xác trong công việc giao dịch hàng ngày. Account clerk là người giữ nhiệm vụ quan trọng trong công việc này.

BÀI III - Những người làm trong ngành điều dưỡng luôn luôn được trọng dụng; trong ngành này đặc biệt rất cần đến đàn ông.

Phần lớn chương trình huấn luyện cho ngành điều dưỡng thực hành đòi hỏi phải học trong một năm. Phần nhiều các trường đều có danh sách chờ rất dài. Bạn nên tìm hỏi ngay để có tên trên danh sách chờ.

Lúc hết chương trình huấn luyện học viện phải qua kỳ thi của Hội Đồng Y Khoa Tiểu Bang để lãnh chứng chỉ hành nghề. Các chương trình huấn luyện và các kỳ thi là một công việc vất vả, nhưng việc làm của người điều dưỡng, giúp đỡ người khác đem lại nhiều thích thú. Bạn sẽ có khả năng làm một nghề quan trọng trong suốt cuộc đời bạn.

BÀI IV - Điện toán ảnh hưởng đến đời sống của mọi người trong chúng ta; ảnh hưởng về kinh tế rất quan trọng. Nhiều nghề về ngành này đã xuất hiện như

"computer systems analyst," "computer programmer," "computer operator," và "computer technician."

Máy điện toán được xử dụng từ những công việc rất tầm thường như "data processing" đến việc hướng dẫn phi thuyền không gian đến chỗ đáp mặc dù chưa đầy 20 năm từ ngày điện toán bắt đầu được áp dụng vào phương pháp "data processing".

Học viên, dù chọn nghề gì chẳng nữa, cũng sẽ giao dịch nhiều với máy điện toán hay kết quả của việc xử dụng điện toán trong các nghề tương lai của mình. Quản trị xí nghiệp, y khoa, hành chánh, quản trị thư viện, giáo dục, ngành kỹ sư, và khảo cứu là một vài thí dụ những nghề chịu nhiều ảnh hưởng của điện toán. Vì điện toán đã trở nên rất quan trọng trong xã hội chúng ta, cho nên sự hiểu biết về điện toán phải là một phần trong sự hiểu biết của một người có học thức.

BÀI V - Có sẵn nhiều loại công việc khác nhau về nghề vẽ họa đồ tùy theo từng loại kỹ nghệ. Cũng có nhiều công việc liên hệ khác nếu ta không muốn chọn nghề vẽ họa đồ; cần phải đi thăm các loại kỹ nghệ khác nhau, cần phải suy nghĩ kỹ xem chỗ nào công việc vẽ họa đồ trả lương và giờ làm việc tốt nhất và có cơ hội nào để ta tiến thân trong công việc.

BÀI VII - Nghề sửa soạn thực phẩm ở những nơi bán đồ ăn là một kỹ nghệ lớn nhất trong nước. Cách nấu nướng cho nhiều người ăn là một nghề cần nhiều khéo léo và đòi hỏi nhiều huấn luyện. Những người nấu ăn chuyên nghiệp không phải học nghề của họ bằng cách nhớ riêng từng món một, mà bằng cách học các phương pháp tổng quát hay sự khéo léo có thể áp dụng trong nhiều món ăn khác nhau.

Nhân viên trong các ban thực phẩm cần phải biết lựa chọn, chăm sóc, sửa soạn và dọn những đồ ăn có phẩm chất để giữ gìn sức khỏe cho thực khách. Huấn luyện tại chỗ trong ngành food preparation rất quan trọng trong việc duy trì các tiêu chuẩn hữu hiệu trong cách nấu nướng.

Cơ Quan Tìm Việc của Tiểu Bang biết các chương trình huấn luyện nào có thể cho phép một nhân viên vừa làm việc cùng lúc được huấn luyện về ngành Food Preparation. Public Service Employment là một chương trình được liên bang nâng đỡ để giúp đỡ những người cần được huấn luyện. Luật Comprehensive Employment Training cũng giúp cho những người cần phải theo một chương trình huấn luyện trước khi họ có thể được mướn làm.

TRÌNH ĐỘ III

BẢNG ĐO LƯỜNG

U.S. TO METRIC

Đơn vị đo lường Mỹ sang đơn vị thước tây

LENGTH			Đơn vị chiều dài

ABSTRACT: THIS PROJECT DEVELOPED FOUR 20-MINUTE CAREER AWARENESS INSERVICE TAPES AND AN INDIVIDUALIZED CURRICULUM TO ACCOMPANY EACH TAPE. THE TITLES ARE: CAREER EDUCATION IN OREGON, WHO AM I?, CAREER GUIDANCE, AND CLASSROOM ACTIVITIES IN CAREER AWARENESS. INCLUDED IN THE DOCUMENT ARE THE FOUR CURRICULUMS, EACH CONTAINING TWO SECTIONS. ONE SECTION SHOULD BE READ PRIOR TO VIEWING THE TAPE; THE SECOND CONTAINS ACTIVITIES TO BE PERFORMED BY THE STUDENTS. THESE ACTIVITIES INVOLVE CONCEPTS OF DECISION MAKING, LEARNING STYLES, APTITUDES AND INTERESTS, SELF-AWARENESS, ROLE PLAYING, AND PERSONALITY TRAITS. (AUTHOR)

ABSTRACT

TITLE:	Career Awareness Inservice for Educators
INSTITUTION:	Nat Etzel, Project Director Jackson County Intermediate Education District 101 North Grape Street Medford, Oregon 97501 (503) 779-5510
PROJECT DURATION:	February 1, 1975 through June 30, 1976

COSTS:	Federal	Local	Total
	$1,300.00	$2,350.00	$3,650.00

NUMBER OF STUDENTS AFFECTED: N/A Number of Staff Involved: 20

PROJECT DESCRIPTION: Four twenty minute half-inch video tapes have been developed on Career Education in Oregon, Who Am I?, Career Guidance, and Classroom Activities in Career Awareness. Each tape also has developed curriculum to be used in conjunction with the concepts portrayed on video.

Purpose:

The purposes of the project are to provide inservice to educators on career awareness by the use of the modern media of video tape. Accompanying each twenty minute tape is an individualized curriculum which can be used before viewing and shortly afterwards which enhances the concepts of the video presentation.

Procedures and Outcomes

The project has been designed that you read the yellow pages in the curriculum packet for each tape entitle "Prior to Viewing the Tape." After that is accomplished, the video tape is viewed. Following the showing, the activities which are in the blue pages are to be read and performed. The participants will then be able to increase their knowledge and concepts about implementing career awareness in the elementary classroom.

Cost Sharing (percent)			
Column Totals	$3,650.00	$2,350.00	$1,300.00

Revised 10/1/75

A. Background and Instruction

1. Goals and Objectives

This project has developed four - 20 minute video Career Awareness Inservice tapes plus an individualized curriculum has been developed to accompany each tape. These tapes are planned to provide inservice for educators on career awareness.

2. Rationale

If career awareness is to reach all of the students (K-6) in the elementary schools of Oregon, it seemed impossible that one State Specialist and fifteen Regional Coordinators could accomplish this goal without substantial assistance. The Career Education Coordinator of the Jackson County Intermediate Education District initiated the proposal to use a media approach in transporting Career Awareness.

3. Staff and Student Usage

At the present time, we have only field tested project with an evaluation team and material hasn't been released for county or statewide usage.

4. Setting

The video taping was conducted in the studio at the Jackson County I.E.D. by the Instructional Television Staff with some remote work accomplished at several Jackson County Elementary Schools. Accompanying curriculum was originated by John Davies, Principal of Laurel Elementary School, Junction City, Oregon, and written and perfected by Niki Laird, Eugene. Oregon.

B. Major Accomplishments or Outcome

1. Methods of Strategies

The video tape Career Education in Oregon gives an overview of Career Awareness in Oregon with particular emphasis to defining the concepts at the elementary level and its relationship to the total career education thrust. The accompanying curriculum is 25 pages of activities for educators involving the concepts of decision making, learning styles, aptitudes and interests, and self awareness.

The video tape "Who Am I?" presents the concepts of Role Playing for elementary students by using parts from Inside Out's "Bully." In this series, the producer attempted to show the value or role playing for elementary students.

The curriculum for Tape II is 12 pages of the values of role playing with elementary students.

The video tape Career Guidance III approaches the technique from the factors to consider in implementation. A role playing specialist discusses with teachers the means of implementing role playing in a classroom situation. The curriculum discusses successful methods of role playing and speaks to a number of examples.

Tape IV attempts to show several examples of Career Awareness activities. One is the industrial arts assembly line project, one on value clarification, and one showing teachers at an industrial arts workshop. The accompanying curriculum explains the examples that are shown on the tape.

Educator Outcome:

The video tape can be used individually in sequence or out, with curriculum or without, and honest attempt has been made to try and keep them as flexible as possible so maximum utilization can be made. Also, the project director feels that an inservice would greatly enhance the users effectiveness.

Dissemination and Utilization:

The project director plans to encourage a workshop with the Regional Coordinators sometime this August on usage of the video tape and accompanying curriculum. It would therefore be advisable, if acceptable to the Regional Coordinators, that they make them available to the Career Education Directors in his region, or other administrators responsible for Career Education within their district. The project would be able to furnish curriculum and tapes at costs to any LEA with the state.

Evaluation:

The video tapes and accompanying curriculum were strenuously evaluated by ten elementary teachers and three administrators from Jackson and Josephine Counties, in late May. They unanimously agreed that the project is very viable and urged its immediate completion so it could be used in the area as soon as possible.

CAREER AWARENESS IN OREGON

Prior to Viewing the Tape

The video tape presentation is designed to give an overview of career education in Oregon with particular emphasis given to defining career awareness at the elementary level and its relationship to the total program. The following excerpt will summarize the salient points discussed in the tape.

> Career education objectives are manifest at the elementary level as career awareness. Under a career focused curriculum, career awareness is not a separate subject but is developed in each classroom within traditional subject matter areas. The scope of each subject changes to incorporate the many occupational careers related to the topic being studied. As with the entire career education program, career awareness emphasizes the producer role and its relationship with other life roles. Moreover, the dignity of all work is stressed by examining the contributions of a variety of occupations to society. The student is the focal point of career awareness learning activities intended to implement the career development process. As a departure point, students are encouraged to examine personal needs in relation to various occupations. An awareness program provides opportunities for learners to participate actively in:
> -Making decisions that relate to their career development.
> -Discovering their occupational aptitudes and interests.
> -Developing their individual learning styles-ways they learn best.
> -Expressing their self awareness as it relates to career development, occupational interest, and the role of the producer.
>
> from Implementing Career Awareness at the Elementary School, Oregon State Department of Education (1975)

In the tape, you will see cuts from films from the Bread and Butterflies series which will help you to relate better to the four components of career awareness as listed above. Through participation in career awareness learning activities, you will quickly gain insight into the process which provides a view for learners of self in relation to work, attitude toward work, choices which might be made as a worker, and ways to implement these choices.

CAREER AWARENESS
LEARNING ACTIVITIES

Introduction

It might be helpful to provide more information about the components of career awareness as it has been defined before we move into the activities.

1. Decision making - It is a systematic process requiring specific skills and practice. One basic skill is the ability to use the vocabulary of the decision making process. Another vital area is information gathering skills. Methods of information gathering are based on external and rational factors as well as internal factors - values, goals, feelings.

2. Learning styles - Daily experiences of children in mastering tasks are accompanied by feelings of desire, hope, adequacy, inadequacy, acceptance, etc. These feelings have profound effect on the learning process itself and the concept individuals develop of themselves.

3. Aptitudes and interests - People are often identified as "being good with" or "having a knack for" or "being gifted with" or "having a mind for" something. These are certain behaviors from which one can conclude that a person has a certain ability or aptitude. These kinds of abilities are as important to success in many kinds of work and non-work activities as are the aptitudes measured by standardized tests.

4. Self awareness - Central to career development is clarification of the self concept. There is a complicated and personal character involved which can be achieved only through suffusing career education with many efforts to tie a growing understanding of work life with a growing understanding of self and what one wants from life.

Essential to a well planned program is an understanding of the intent and purpose of these components, their relationship to one another and their application, i.e. translating to learners what they can do with what they have learned.

Consideration must also be given to the awareness of the great variety of occupations and the interdependence of workers. This may not be left to chance for every experience that a child has in learning about people around him/her help him/her to learn about the self and the opportunities open to him/her.

At the primary level, occupational information is usually limited to the immediate environment and firsthand experiences of children. Learners' career horizons broaden through pertinent experiences in and around the school to discover who works, why people work, when and where people work.

At the intermediate level when aspirations are determined by needs and likes, the pupil characteristically believes that they can become whatever they want to become. Occupational role models are needed, especially for girls whose aspirational levels are rising and opportunities expand.

Introduction (cont.)

At the upper elementary level determination of aspirations begins to move from the basis of likes to capacity, from "I like the job," or "It is exciting and interesting," to "I am good at art," or "I am editor of the school newspaper," or "My best scores are in reading." At this level, learner relate interests and abilities to different jobs; explore the educational requirements of jobs; and identify changes in the job market including the wide variety of new occupations that exist.

Statewide Goals for Schooling

Each individual will have the opportunity to develop to the best of his or her ability the knowledge, skills, and attitudes necessary to function in each life role.

1. In preparation for the role of LEARNER:

   Each individual will develop the basic skills of reading, writing, computation, spelling, speaking, listening, and problem-solving; and will develop a positive attitude toward learning as a lifelong endeavor.

2. In preparation for the role of INDIVIDUAL:

   Each learner will develop the skills to achieve fulfillment as a self-directed person; acquire the knowledge to achieve and maintain physical and mental health; and develop the capacity to cope with change through an understanding of the arts, humanities, scientific processes, and the principles involved in making moral and ethical choices.

3. In preparation for the role of PRODUCER:

   Each individual will learn of the variety of occupations; will learn to appreciate the dignity and value of work and the mutual responsibilities of employers nad employees; and will learn to identify personal talents and interests, make appropriate career choices, and develop career skills.

4. In preparation for the role of CITIZEN:

   Each individual will learn to act in a responsible manner; will learn of the rights and responsibilites of citizens of the community, state, nation, and world; and will learn to understand, respect, and interact with other cultures, generations, and races.

5. In preparation for the role of CONSUMER:

   Each individual will acquire knowledge and develop skills in the management of personal resources to provide wisely for personal and family needs and meet obligations to self, family and society.

6. In preparation for the role of FAMILY MEMBER:

   Each individual will learn of the rights and responsibilities of family members, and acquire the skills and knowledge to strengthen and enjoy family life.

Participants' Role in Learning Activities

Now you are ready to supervise and/or participate in learning activities. In the next few pages you will find four learning activities as follows: 1) What are the Risks? 2) Reporting My Observations; 3) Discovering What I Can Do; 4)

These are presented to you through an evolutionary process which includes four steps. This is done to give you as many "how to's" as possible and thus provide a good learning experience.

Step I presents an activity involving decision-making skills (What Are The Risks?). It will provide a model from which you will work with other activities.

Step II
Observations). This is the result of pulling together some scattered suggestions and building them around the same format as that used in Activity 1.

Step III will have you divide into four groups and start some of your own rewriting.

Step IV provides you with suggestions and considerations which should be helpful to you in rewriting.

STEP I

The first activity (What Are The Risks?) is complete and ready for you to use in the classroom. This was taken from a module of sequenced learning activities developed through a Career Education Curriculum Project at the University of Missouri-Columbia. If it is appropriate the group should read through the activity and have the supervisor lead the participation. If time does not permit, the activity can be taken back to the group on learners' response at a later date.

There are some unique qualities of the format which you should give attention to:

(a) Right after the activity title are suggested curriculum areas where the skill can be presented.

(b) Development of vocabulary is considered very important.

(c) Adaptions are given special consideration so that no learner is excluded from full participation.

Risks involve...

danger.

bad feelings.

loss.

damage.

dislike.

DECISION-MAKING SKILLS

ACTIVITY ONE: WHAT ARE THE RISKS? (MATH, SCIENCE, LANGUAGE ARTS)

Performance Objective: The learner will identify risks in consequences.

Class Grouping Whole Class

Total Time About four sessions

Concepts and Vocabulary Alternative, consequence, risk

Learner Prerequisites Learners should have a definition of decision making; understand that decisions (both difficult and easy) are made everyday; that alternatives exist with each decision made; that these alternatives must be ranked.

Educator's Preparation Tasks Prepare continuum; prepare a transparency and copies of the "Risks" sheet (see Resource II); set up continuum line; On the left, place a sign saying "I will take this risk", in the center, a sign saying "I won't take this risk"; prepare a transparency, or more preferably, a chart of "Risks Involve.." (see Resource I); read through the entire activity and adapt it for your group.

Materials/Resources None

Skills Responding on a chart, listening, relating information to oneself, evaluating information

RISK: (risk) n. The chance of injury, damage, or loss; dangerous; chance; hazard.

REMEMBER (AND TALK ABOUT WITH LEARNERS FROM TIME TO TIME): - EVERYDAY SIMPLE DECISIONS INVOLVE RISK - WE ARE NOT ALWAYS AWARE OF THE RISKS WE TAKE - IMPORTANT PERSONAL DECISIONS ARE SELDOM WITHOUT RISK - BIG DECISIONS MAY INVOLVE BIG RISKS - OUR VALUES INFLUENCE OUR RISK TAKING

Process

a. Present and explain vocabulary. Say something like: When we have to make a decision, we have alternatives or choices. Each alternative has at least one consequence. A consequence is what might happen after we decide and act upon a certain alternative. Some of these consequences have risks. A risk is a chance we take because we cannot know ahead of time exactly what will happen. If we each had a crystal ball, we could see into the future and wouldn't need to take risks. We all take risks when we make decisions. Explain that some risks involve damage to something. Some risks involve an important persons's disliking you. Some risks involve losing something. As you talk, point to the chart "Risks Involve....." (see Resource I).

b. Ask learners to chose alternatives for the question, "How can you get from where you are in the classroom to the hall?"

Choose one alternative and write it on the chalkboard or overhead projector. Ask learners to think quietly for the consequences (things that might happen) if they choose this alternative.

Let the whole class brainstorm to get a wide range of possible consequences. List their suggestions on the chalkboard or overhead projector.

> Many bad decisions are made as a result of failure to give enough consideration to the consequences.

c. Then focus on one of these consequences. Read it to the group. Brainstorm again for a list of risks.

> Then explain that placing themselves on the line will help them get in touch with their values. Read the signs and explain to learners that they may stand at any point along the line or at either end.

d. Say: "The decision you have to make is how you will go from the classroom to the hallway. One alternative is to climb out the window and go around. Now if you do that alternative or choice one consequence might be that you may get hurt becuase our room is oh the second floor and you will have to jump."

> It is expected that there will be unanimous internal constraint against actually jumping out the window!

e. "I will read some risks involved in that consequence (see Resource II). After I read each one I want you all to place yourself on the continuum to show how you feel about taking that risk."

> If their movement and interaction is decidedly not task-oriented, they may need to do some physical and then relaxation exercises. This segment of the activity can then be started again. If they have seized upon this activity as only a break from sitting still, then learners may need more breaks from sitting still.

After reading each risk ask:
--what are the advantages in taking this risk?
--disadvantages?
--what could make you change your mind?

f. For all but the pre-readers distribute copies of "Risks" (see Resource II). Show the transparency and read it aloud as learners follow and respond on the sheet. Do this so that no learner is excluded because of reading difficulty. When finished, go through the sheet again. Ask children to raise their hands to show whether they will, might, or won't take the risk in question. Collect and display the sheets. Display them all - not just the neatly done ones. Save them for future reference. At that time do the worksheet and/or continuum activity. Talk about changing goals and how they influence our values and risk-taking.

Bernhardt, Edna Erickson, You Can Decide. University of Missouri-Columbia: College of Education, 1975. (Developed by Career Education Curriculum Project, Norman C. Gysbers, Director)

RISKS

What I must decide:	How will I get from where I am now in the classroom to the hallway?
An alternative:	Climb out the window. Drop to the ground. Walk around to the front door. Use the stairs.
One consequence of that alternative:	We are on the second floor so I will have to jump.

R I S K S	I will take this risk	I might take this risk	I won't take this risk
I might break my leg.			
The teacher might get upset if I broke the rule about windows.			
I might squash the bushes below the window.			
I might disturb the other children.			

Use the chart presented below to relate the concept of risks to the learner's role of "Leisurer". Fold the spring section back out of sight and tape up the chart. Read an discuss the chart in the fall. When all have signed it in their spare time, remove it and post it again in the spring with the fall section covered. When all have signed, remove the covering and compare. Focus on responses that changed and those that remained the same both times. Allow learners the opportunity to give possible reasons for this. Perhaps they can isolate specific events in their lives that caused the changes.

		Fall Sign below, please				Spring Sign below, please			
I must decide	A likely consequence might be that ...	I will take this risk	I might take this risk	I won't take this risk	This is not a risk for me	I will take this risk	I might take this risk	I won't take this risk	This is not a risk for me
...if I'm going to ask a friend to play	...the friend might say no and this would make me feel bad								
...if I will climb the fence to get my ball	...the teacher might get angry and not like it								
...if I will leave my coat outside on the playground today.	...I might lose it because someone might come along and take it.								
...if I'm going to play catcher without the catcher's mitt.	...I might catch a fly on the end of my finger that would hurt.								

STEP II

The second activity (Reporting my observations) is taken from among a list of those suggested in Career Development at the Primary Level by Chicago Public Schools. A few of the suggestions which appeared appropriate to helping learners develop individual learning styles provided the framework. These were built up using a similar approach to that used in Activity I. Incorporation of specific curriculum areas along with vocabulary and concept development, the activity will become meaningful from the outset. Continual consideration should be given to the application of the learning experiences so that the learner can see the usefulness of the experience.

DEVELOPING LEARNING STYLES

ACTIVITY TWO: REPORTING MY OBSERVATIONS (Science, Language Arts)

Performance Objective: Learners will report observations list contrasting aspects of familiar environments.

Class Grouping Whole class

Total Time About three sessions

Concepts and Vocabulary Observations, Atmosphere, Reactions, Background

Learner Prerequisites Depends on the sequence that is planned

Educator's Preparation Tasks Prepare copies of "Classroom Objects" sheet (see Resource III)

Materials/Resources None

Skills Listening,

> Teacher should attempt to relate own observations to learners - these should be observations made at home and in the community as well as in the classroom.

Process

a. Explain the vocabulary by describing a situation where a group of people are walking together on a tour of a large old house which has some historical significance. They are all making observations as they tour - they see or notice objects. Because it is an historical building there is an atmosphere or surrounding influence of thoughtfulness. However, as each person observes an object they will probably have a different reaction or an action in response to that object than do the others. This is because of the difference in each person's background or their past experiences.

> Point out that observations are not made only when we are in new or different surroundings. We make observations in places where we might be every day.

b. Ask learners to tell how objects in the classroom are observed using the chart "Classroom Objects" (see Resource III). Extra blanks are left so that additions can be made if there are other objects your classroom. Note that some of the objects can be in more than one space. This discussion should include the use of the objects as well. Go through each item on the list asking the learner sho made the contribution to describe its use. Then ask the others if they think there are different uses for that object.

> Be sure that learners understand that they have different reactions to different objects than do their classmates.

c. This list of objects and their use can be applied in showing learners how the influence of surroundings or the atmosphere will make a difference in our observations. You can explain for example that the clock in the classroom is used to show us when it's time for lunch, recess, or to start another task. The clock at home is used to tell us when it's time to go to school, to go to bed, to eat dinner.

> Encourage learners to move the object to places other than home, perhaps to work settings as they discuss different surroundings.

d. Expand the concept of atmosphere and make it more individualized by asking students to relate their feelings in different surroundings. This will reinforce the point made earlier about how feelings influence our observations. Ask them how they feel - - -

the first snowfall of the season
the fifty-first snowfall of the season
Valentine's Day
the first day of school
the last day of school
on a rainy Saturday

e. Follow this with the question, "How do these sound to you?"

pumpkin pie in July
a barbecue on the ice
turkey in June
a picnic in December
a sleigh ride in May

Adaptions

a. Pictures might be pasted in the left column of the Classroom Objects sheet for younger learners.

b. For the younger learners the last two discussion groups might be grouped on the floor in a circle to facilitate a good sharing atmosphere.

Relate school curriculum to the world of work by talking with one of your working parents.
Ask:
-how would you describe the atmosphere at work?
-does it change sometimes? how?
-do you perform your job differently when these changes take place?
-do you think you perform your job differently depending on your mood?

Resource III

Put an X in the correct space to tell us how you observe classroom objects.

	SEE	HEAR	TASTE	TOUCH	SMELL
Clock					
Window					
Desk					
Piano					
Chalkboard					
Terrarium					
Water fountain					
Aquarium					
Fluorescent light					

23

STEP III

Now it's your turn! You have two activities to take back to your classrooms - one in decision making skills and another in developing individual learning styles. The next two will provide you with a group of four which covers each of the components of career awareness as discussed. Some thinking and writing is going to be required first. In order to facilitate this you should break into four groups as follows:

A - Activity Three at the primary level

B - Activity Three at the intermediate level

C - Activity Four at the primary level

D - Activity Four at the intermediate level

APTITUDES AND INTERESTS

ACTIVITY THREE: DISCOVERING WHAT I CAN DO (_____)

Performance Objectives: To identify individual talents and abilities; to demonstrate one's special skills; to describe ways in which' individual assets differ.

Class Grouping

Total Time

Concepts and Vocabulary ability, talents, interests, individual unique

Learner Prerequisites

Educator's Preparation Tasks

Materials/Resources

Skills

Process

a. Show us what you can do:

Bounce like a ball	Wiggle like a snake
Hop like a rabbit	Strut like a peacock
Whistle like a teakettle	Cry like a baby
Croak like a frog	Squeak like a mouse
Run like a football player	Bark like a dog
Smile like a happy person	Growl like a bear

b. Make a list or booklet of words about yourself. Title the list or booklet Words About Me or draw pictures to illustrate the words.

c. Say to the class, "I know many things." Then tell as many things as you can in one minute.

d. Place some articles on a table in front of the room such as a rock, a piece of paper, an egg carton, a paper clip. Come to the table and select an article. Show or tell what you can do with it.

e. The following are activities that some of you can do well now, but you will be better able to do some of them when you are older. Talk about the reasons for thinking you can do them better when you are older.

Basketball	Ironing your clothes
Mowing the lawn	Swimming
Washing dishes	Subtraction
Writing a story	

f. Finish the story:

Today I can hop on one foot _____

Tomorrow I will be able to _____

Today I can spell my name _____

Soon I will be able to _____

Today I can run, tomorrow I will be able to _____

Think of some other stories like this. Draw a picture to complete each story.

g. Bring to school something you have made and tell us about it.

SELF AWARENESS

ACTIVITY FOUR: WHAT DO I FEEL? (_____)

Performance Objective: To share feelings.

Class Grouping

Total Time

Concepts and Vocabulary Feelings, angry, lonesome, share

Learner Prerequisites

Educator's Preparations Tasks

Materials/Resources

Skills

Process

a. Listen to the record. How does it make you feel? Note: Any action-type records which allow the learners to interpret the words or musical rhythms which help them learn to control their bodies and to express their feelings. This experience will give them personal satisfactions and understandings of how to coordinate their bodies. It will also provide an awareness that things which are seen, heard, and said are related to how we feel.

   Draw a picture which shows what you think is happening while the music is playing.

b. Invite two people who can speak together in a language other than English to talk before your group. Discuss how members of the group felt while listening without understanding the conversation.

c. "I feel" Game:
   Form a circle. Choose a leader to stand in the middle of the circle. The leader pulls a card from the box which has a sentence on it. The leader reads the sentence and points to someone in the circle to react. They must begin by saying, "I feel," and then make a face to show that feeling.

   How do you feel when you.....
   - lost your turn in line/game
   - knock something off a table
   - are not satisfied with your school work
   - have something taken away from you
   - don't know how to do or make something
   - want something that belongs to someone else
   - are scolded by mother/father
   - move away from your friends

" I Feel" (cont.)

do a good job
share with a friend
make a new friend
enter a dark room
see a new baby
cut your finger
are lost
win a prize
are home alone
lose a pet
are hit by another child
don't know an answer
get a new pet
trip and fall
hear a loud noise
get a hug from mom
smell cookies baking
hurt someone

d. Cut out magazine pictures of people. Bring them to school. Show your picture to the class. Tell how you think the person in the picture feels. Put all pictures on the bulletin board under the word which tells you about the person in each picture. Note: Prepare a "Feelings Bulletin Board". Post word categories such as:

Sad Happy Angry Frightened Surprised

e. We sometimes have more than one feeling at a time. Play the game, "But". Here are some examples:

I was happy to come to school, but I was sorry to see my brother look so sad.

I was unhappy to be sick in bed, but happy to get so many toys.

Think of some others. Note: Each player in turn may hold a large cardboard face which we turned upside down will visually indicate the "But".

Make notes for the teacher, as appropriate and cut them to tape into the space needed in the activity.

STEP IV

The last two activities provide you with suggestions for the process only. It will be your task to complete the activity with additional information as follows: the curriculum areas in which the skill can be presented; the vocabulary or concepts to be developed; essential information in the blanks left in bold. The empty boxes on the following page should be filled in and placed as needed. The primary purpose here is to emphasize the application of what has been learned. This may be in the form of timely reminders for the teacher or important points which the teacher should call attention to at a certain time. The list of questions which follow should help you develop appropriate and pertinent points of reminder. Keep these in mind as you work through the activity. Don't worry about including everything in the list.

CONSIDERATIONS FOR GROUPS A AND C

1. Have the roles of family members been identified and described?

2. Are various tasks the learner performs in the family provided?

3. Have workers in the community been identified?

4. Has it been shown that some work requires individual effort and other work requires group participation?

5. Is there an attempt to provide understanding of the monetary system?

6. Will learner recognize why most members of the community seek work?

7. How can self be described in relationship to family and school?

8. Have uniqueness of family, citizen, individual, producer, learner, and consumer life roles been shown?

9. Has it been shown how learners can begin to appreciate, understand, and function in a constructive manner in relationship to the physical environment?

10. What are acceptable behaviors in the home, school, and community?

11. What interpersonal skills could be developed?

12. Will learners recognize the learning involved within this career development activity?

13. Could you introduce play as formative exercise for future habits within the work role?

14. What interpersonal relationship could be identified?

15. Are there any examples of decision-making identified?

16. Are basic methods of communication introduced?

17. Has the need for creativity in many occupations been shown?

18. Will learners become aware that the world of work requires certain physical movements or skills?

CONSIDERATIONS FOR GROUPS B AND D:

1. Has the work of others been identified and the individual's dependence on other members of the community been realized?

2. Has home environment as a factor in career development been shown?

3. Will learners understand the societal need of work and workers?

4. Has the community been shown as a resource for career development?

5. Has the school environment been shown as a resource for career development?

6. Can the economic system and the elements of production, distribution, or consumption be included?

7. Has the impact of economics been demonstrated relative to the citizen, family, individual, producer, learner, and consumer life roles?

8. Have any careers which learners could explore in the junior high school been introduced?

9. Can additional interpersonal skills especially as they affect the life roles be identified?

10. Will learners identify strength and weaknesses and how they can affect job choice?

11. Can you show that different experiences may create different work habits and attitudes?

12. Will learners be able to evaluate personal strengths, weaknesses, likes and dislikes as they apply to present career interests?

13. Has a decision making process been included?

14. Are communication skills needed in various occupations discussed.

15. Have you shown how basic methods of communication skills help individuals complete works tasks and participate in life roles?

16. Has decision making in an occupational role been identified?

17. Will learners demonstrate that certain occupations require certain physical movements or skills?

18. Have you shown learners how they can apply skills learned to job performance in the classroom and their relationship with careers?

Oregon State Board of Education, Implementing Career Awareness in the Elementary School. (1975) The considerations given here are taken from the student outcomes written in this source. Compiled and developed by: Niki Laird

ROLE PLAYING IN THE CLASSROOM

Prior to Viewing the Tape

The tape you will be viewing has been produced by Inside/Out and is available for classroom use by writing to Len Tritsch, Health Specialist, Oregon Department of Education, 942 Lancaster Drive NE, Salem, Oregon.

In this film entitled"Bully " you will see portrayals of jealously, frustration and fear at work between two boys as well as concrete examples of teacher insensitivity. The story is left open ended so that students can arrive at a conclusion through role play.

Before dealing with this particular story, let's turn our attention to role playing in the classroom. A definition, taken from Role Playing for Social Values by Shaftel and Shaftel, will provide a broad base from which to start. They state the purpose (s) of role play as follows:

> The experiences inherent in the role-playing process have their own rewards. There is much to be gained from the spontaneity training, the interaction of feelings and ideas, the stimulation of group interaction. (p. 83)

> To describe role playing in still other terms; it is the opportunity to explore, through spontaneous (that is, unrehearsed) improvisation and carefully guided discussion, typical group problem situations in which individuals are helped to become sensitive to the feelings of the people involved, where the consequences of choices made are delineated by the group and where members are helped to explore the kinds of behavior that society will sanction. In this process, young people are guided to become sensitive to feelings, to the personal consequences of the choices they make, and to the consequences of those choices for other people. The group members practice many roles, or different approaches to roles; and gradually they develop skills for solving problems of social conduct and interpersonal relations. (p. 84)

Even though current experimental research provides only limited support for role play, there are other reasons why it should be considered for regular use in conjunction with other classroom procedures.

ROLE PLAY.....

1. applies many of the accepted principles of learning
2. employs principles of democracy
3. emphasizes behavior in contrast to mere memorization

The latter point is of special significance; the traditional approach to learning tends to consider facts as ends in themselves while the role play point of view considers them as guides to useful behavior. In role play, one practices talking and listening, leadership, analysis, sensitivity to others and to norms.

The Career Awareness Guidelines, Oregon Department of Education, lists student outcomes at specific checkpoints in the student's career development. One area in particular should be mentioned at this point; stated as follows:

> "Students should experience activities in decision making, communicating, and creating as related to the world of work."

Critical to achieving this general objective is the ability to extend traditional individual learning to include social learning - all methods being part of one all-inclusive process.

As you are watching the tape, try to identify the major problems or issues of each individual in each of the situations shown.

HOW TO GET STARTED

As with any nontraditional approach attempted in the classroom the most difficult task before you is getting started. There are lots of unknowns upon which one can build fears and apprehensions. Recognizing this to be a problem for the classroom teacher, Chesler and Fox make some suggestions in Role-Playing Methods in the Classroom. Because they are practical and usable, they are included here for your future reference.

A first step might be practicing and exploring the technique with friends and/or family colleagues. Possibly a group of interested teachers could meet after school or in the evening for an informal session.

A second step in self preparation might be to interest a small group of students in staying after school to try some "creative dramatics." In learning this technique, it can become a cooperative project and as such introduced to the rest of the class.

The teacher using role play for the first time should start with very simple situations that are familiar to the students and in which the action is clear cut. The first few sessions should be brief and stopped while student interest is still high.

In preparing for a role-playing session, the teacher may find it helpful to write out briefing sheets to give to each participant in the role play. The card below is an example of the information.

> Don: You're good at art. You're well along in modeling an Irish setter. You know your mind and take suggestions if they are good; if not, you do as you please. Evelyn and Florence are also making figures.

Name tags might be used to indicate the name, position, or characteristics of the persons to be portrayed: "Pip" "Fourth Grader" or "Stubborn". These name tags also help to differentiate the actor student from the role being played.

USES OF ROLE PLAY

Note: You should be aware in the outset that the open-ended problem story is just one example of role play technique. For purposes of this lesson, emphasis will be not on methods, but on its use in helping to solve classroom interpersonal problems to teach human relations skills in the classroom.

The success of role play as a meaningful activity is centered upon pertinent and timely questions to direct the thinking process, based upon predetermined objectives.

The following are examples of the type of questioning which classroom teachers have developed to teach the difficult areas of values and interpersonal relations.

The first was written by Nancy Bauer in The Instructor (August/September 1970). The specific questions are divided into six broad areas and designed to teach values without forcing children to accept the viewpoint of teacher, society, or classmates. The teacher is not asking, "What am I thinking?" but rather, "What do you think?"

1. Observation of data gathering - What happened? What did each person involved think? What did each one do? Did anything else happen?

2. Analysis - What makes this a problem? Do we need anymore information? What do other people think about the problem? What might make them think so?

3. Synthesis - What do you think is the most important issue in the problem situation?

4. Alternatives - What might the people involved do? What would you do in a similar situation?

5. Predicting consequences - What probably would happen if each alternative was carried out?

6. Noting values - What value is strengthened by each alternative? What difference does it make what solution is chosen? Who is affected by the chosen action?

The second example provided here show how role play can be used to turn negative experiences like the one in "Bully" into positive opportunities for thought and understanding. The activity is designed to help students explore interpersonal relations, to help them think about their own feelings and those of other.

In an article entitle "Me and Him" in The Instructor (Feb. 1972) Joseph Malkiewicz provides examples of problem situations which he observed among his children at home as well as in the classroom. More than likely, all of you can think of at least one situation you have observed in the last couple of weeks which could make for an open-ended story like those that follow:

Billy was playing with his toy cars in the bedroom he shared with his younger brother, Mark.

He had all his toy cars set up in the middle of the floor. There were small toy houses, gas stations, and stores to make it all look as if Billy's toy cars were driving in a city.

Billy stood up and looked at what he had built. Then he went to ask his mother to come and look at it.

While he was out of the bedroom, Mark walked in and saw the toy city. He kicked all the toys, and scattered them about the room.

When Mark heard Billy returning with their mother, he hid behind the bed.

"What happened?" Billy cried, when he and his mother entered the room.

QUESTIONS FOR DISCUSSION:

1. What must Billy feel inside of himself right now?
2. Do we hurt other's feelings when we damage their things?
3. What should Mark do?
4. What should his mother say?

****

Tommy was learning how to swim. At least that's what his parents hoped when they sent him to the school every morning during the summer.

Tommy hated to go, but he was ashamed to tell his Mom and Dad. The fact was that Tommy was afraid of the water and the other boys in his class didn't help.

"Come on° Jump in, Tommy. It's not deep. It's not even over my head," yelled Gregory, who was in the water already.

"Go ahead; jum," said Mr. Sweeney, the swimming teacher. "He's chicken!", shouted Bob. "He's chicken."

Tommy just stood at the edge of the pool, looking down at the clear water. He wanted to run and hide. He wanted to cry.

"He's chicken!", shouted some of the other boys.

"What am I going to do?", thought Tommy.

QUESTIONS FOR DISCUSSION:

1. What do you think you would do if you were Tommy?
2. Can we all learn to do things the way others can?
3. Why might Tommy be afraid of the water?
4. Why might Tommy be ashamed to tell his parents?

****

"Today, I couldn't find my new pencil," Mary told her mother when she came home from school. "I bet Scott took it from my desk when I was with my group."

"Have you told your teacher, Mary?", asked Mother.

"Yes, but she just says 'I can't do anything about it, Mary. You have to take care of your own things.'"

The next day in school, Mary was working with some other children on a project at the bulletin board when she saw Scott put his hand in her desk.

"Get out of my desk, Scott, I saw you. You had your hand in there," she was yelling, and everyone in the room looked at both of them. "What did you take this time, Scott?"

"Nothing," replied Scott.

"Now let's see," said their teacher.

"I didn't take anything. Honest I didn't," insisted Scott.

QUESTIONS FOR DISCUSSION:

1. What should Mary do?
2. What should Scott do?
3. Why do some people take things which don't belong to them?
4. What might happen to Scott?

****

Nancy walked into the house crying.

"What's the matter, Nancy?", asked Mother.

"Terry and Lisa keep running away from me. They won't let me play with them," sobbed Nancy.

Nancy's mother went to the door. "Terry," she called. "Come here - you too, Lisa."

Mother asked them why Nancy couldn't play with them.

"She's such a baby, Mommy," said Terry.

"She's your sister, Terry," snapped Mother angrily.

"I know, Mommy, but she bugs me and Lisa."

"She's your baby sister and she wants to be with you."

"But....

"That's enough, Terry," interrupted Mother.

QUESTIONS FOR DISCUSSION:

1. Are Terry and Lisa right in wanting to play by themselves?
2. What can Mother do for Nancy?
3. What do you suppose Terry is thinking to herself now?
4. How would you solve this problem?

Maximizing Interaction in the Classroom

An essential ingredient for the teacher using role play is listening. In developing better listening skills, you will want to start with the question, "Why am I here?" Do you plan to get anything out of the discussion? You will need to have a reason for listening if you're going to hear the important things that students will be expressing about themselves.

By attending to students from this point of view, they will in turn feel secure in exploring their feelings and expressing themselves. Students will express themselves in many different ways. The teacher can respond to the student's experiences in many different ways. The teacher can meet the child's needs by his or her physical and verbal responses.

The following are offered as suggestions which will help to increase the interaction in the group discussion. These are provided to the teacher who is concerned with meeting individual needs of students in their classroom.

1. Treat the children the way you would like them to treat you. Remember that you are a model as you act to lead, stimulate and influence the group.

2. Give children the opportunity to advise you on matters in the classroom.

3. Don't be afraid or embarrassed to share some of your self doubt, things you are working through, information about yourself.

4. Make regular perception checks and actively listen to what the child is thinking or feeling.

5. Have faith in the child's ability to work things through on his own.

6. Ask the children if they're interested in your suggestion or opinion. If they are not, drop the subject.

7. Treat children as social equals.

Activity I

The first step in teaching with role play is to make certain you have the right classroom environment for interaction to occur. In planning any lesson, unit, etc., there are a sequence of teaching concerns which should be considered. In using role play, these are of great significance in helping you to show students what you are trying to accomplish. Student understanding is critical to the success of role play. These concerns have to do with community building, instilling motivation, information gathering and sharing, and value exploration. The following are activities which you will do at this time to help you get a feeling for what the activities are designed to do.*

I. Community Building

Each person in the group should offer an instance when they have come into a group for the first time. In addition, you should recount the experience and tell how it felt to be new in a group. Each person will then reflect individually and write down three or four questions that they might ask in order to get to know somebody. After you have had time to think of a few questions, stand and go to a person that you don't know well or at all and spend four minutes getting to know that person better, using some of the questions that you have constructed. At the end of four minutes, each pair should spend two more minutes working together trying to identify things that they have in common. Several possibilities are open at this point. You can leave your partners, find new partners and repeat the process; or each pair could join another pair forming groups of four where each person introduces his partner to the other members of the group; or conduct a general discussion, focusing on things that you may have in common, the feelings that people have in a new situation, and ways that the group can become a better community.

II. Achievement Motivation

This activity centers upon discussion which will show that the teacher does not have to be present in order for important learning to take place. You will also see that learning is not merely the acquiring and storing bits of information for easy retrieval at the teacher's demand. First, the group should discuss how they learned to walk, talk, ride a bicycle, throw a ball, find their way home, buy things with money, run the television set or record player, etc. Then try to identify as many people as possible who could be called "teacher" - storekeepers, brothers and sisters, etc.

Using the following list of alternative learning styles, discuss your experiences with each and the possible uses of each style.

1. class discussion
2. lecture
3. reading and report
4. large and small group discussion with or without leader
5. individual study
6. film
7. field work
8. case study
9. simulation and role play

III. Information Gathering

This group will start with the question, "What do you know, and what do you want to know?" The subject is role play (for your class it might be the pilgrims' first Thanksgiving, the anatomy of a frog, the concept of prejudice). Now, brainstorm all the things that you know about the subject, and make note of these things that you know about the subject, and make note of these items. After four or five minutes, reflect individually on what things you would like to know about the subject. After a minute or two for reflection, say what some of the things are that you really want to know about the subject. Write these questions down on the board or piece of paper.

When the list of questions has been gathered, look over the list to see if there are any questions that individuals in the group might be able to answer or shed light on.

Note: There may be certain pieces of misinformation among the items "known" but you should write down every item which is brainstormed no matter how wrong or inaccurate it may be. If there is an instant arbiter of what shall and shall not be placed on this list, then some individuals will be reluctant to volunteer for fear of being put down. Also, it is important to know if misinformation does exist and to what extent it does. Finally, many pieces of information may appear incorrect from your perspective but later become valid through supporting evidence from the individual.

IV. Value Exploration

You will be given three situations to rank as you perceive them from best to worst, or, if you perceive them as all good (or bad) from most to least good (or bad). Rankings should be made individually. Then they may be compared and discussed with the others in the group.

1. Rank these situations:

   a. you are in Air Force bombadier about to drop bombs on suspected enemy troop concentrations, knowing that innocent civilians are likely to be killed and injured as well.

   b. You are the executioner who must pull the switch on a convicted murderer in the electric chair.

   c. You are a home-owner who is about to shoot at a dark moving shape which has entered your home at night.

   After discussing your rank-orders, try the next:

2. If you were the principal of this school, rank these situations as to their desirability to you:

   a. The students love you.

   b. Your colleagues respect your opinion.

   c. Your school is the showplace of the district.

   After discussing your rank-ordering of these situations, try to expand this list by making up a situation that would be more desirable than the one you put at the top, and one that would be less desirable than your bottom-ranked situation. Now try ranking these:

3. Rank these actions that you might take when you see another student copying off your paper in a test:

   a. Do nothing.

   b. Hide your paper as well as you can with your arm, realizing that you cannot work as well in that position.

   c. Call the professor and ask if you can change your seat.

   What other possibilities can you come up with?

4. A person in your class whom you don't like very well has been accused of taking some lunch money from the teacher's desk. You saw someone else take the money. How do you rank the following?

   a. Do nothing.

   b. Defend the person openly, knowing that you will be pressured to tell who really took the money.

   c. Write an anonymous letter to the principal explaining the situation without identifying the person.

What are some other possibilities? Students can learn to make up rank-order situations to help clarify important issues in their own lives.

* Hawley, Robert C. Human Values in the Classroom. Amherst, Mass: Education Research Associates (1973)

Activity II

You have explored some activities which will help you toward establishing a good classroom environment for interaction. There is another step in this sequence of learning which deserves special attention in the discussion of role play in the classroom that is fostering open communication.

Hawley in Human Values in the Classroom describes communication on six continuums as follows:

DEFENSE-PRODUCING		SUPPORTIVE
Evaluation (Value laden message)	.1. .2. .3. .4. .5. .6. 7	Descriptive (Idea, fact message)
Controlling ("I want to control)	.1. .2. .3. .4. .5. .6. 7.	Cooperative ("I want to work with you")
Hidden (Hidden purpose)	.1. .2. .3. .4. .5. .6. 7.	Open (Direct and clear)
Neutral (Lack of concern for feelings)	.1. .2. .3. .4. .5. .6. 7.	Empathetic (Concern for feelings)
Superior. (Teacher is powerful)	.1. .2. .3. .4. .5. .6. 7.	Equal (Play down teacher superiority)
Certain (Teacher not open to modification)	.1. .2. .3. .4. .5. .6. 7.	Provisional (Teacher information is provisional)

Messages, both verbal and nonverbal which appear to evaluate the listener are defense-raising. The put-down is a good example of a highly evaluative kind of communication which is popular among students: "Wouldn't you know it?" or "That's just like you!" or "Nice going." Or nonverbally hitting the forehead with the butt of the palm and rolling the eyes.

Descriptive communication, on the other hand, is less likely to arouse defensiveness and more likely to engender a climate of mutual supportiveness. Messages which present feelings, ideas, or facts, but which do not imply that the receiver should change his attitudes or behavior can be seen as at the descriptive end of the continuum.

In a group discussion, move through the list and cite other examples of verbal and nonverbal messages of each end of each continuum. Ask youself, "How do my students see me?" Try to think how your students might rate you on each of these continuums. What behaviors of yours do you expect raise defensiveness in students? What behaviors do you expect raise supportiveness?

To improve your communication patterns in the classroom, pick one or two items where your students might rate your behavior as defense-raising. Then brainstorm ways to modify your behavior so that your communication will engender more support in that area.

Tape 3

ROLE PLAY IN THE CLASSROOM

Prior to Viewing the Tape

You have seen an open ended problem situation on the last video tape and have had the opportunity to become acquainted with the discussion phase of the role play technique. What is said in the discussion is critical in the teaching of values, interpersonal relations, and decision-making. However, in using role play, you need to be aware that several steps are involved in this technique.

These steps are in order as follows:

1. Warming Up the Group

   The "warm up" serves to present the problem to the group. The problem should be presented in a clear and concise manner. For example, before viewing the tape, the teacher might ask, "Why do people feel jealous of others?" This could be followed with a discussion of what it feels like to be jealous. Of course, the nature of the question will be geared to the group's ability to deal with abstracts.

2. Selecting Role Players

   Participants should be selected by the teacher based on the discussion that followed the problem story. The choice may be a student who will play an exceptionally strong role or a student who will be in an opposite role from their own.

3. Setting the Stage

   Review with the participants and the audience the problem situation. Make sure that each role player knows his role.

4. Prepare the Audience to be Participating Observers

   Make sure the audience employs good "listening" skills. Ask the class to observe and listen to the role playing, and try to see if they think that what the participants say and do could really happen. The students

should gain ability to empathize by "putting themselves in the other person's position" or "walking a mile in his shoes."

5. Role Playing (the enactment)

Don't interupt a player who is at a loss for words, uses strong language or gestures wildly. Do not evaluate a student on acting ability. This is not in keeping with the objective of role play.

6. Discussion and Evaluation

This is an important phase of role play. Children learn what is and is not acceptable to their peers. The class will, in all likelihood, be very anxious to tell what they were thinking during the enactment. You will want to pose questions at regular intervals to provide the class with an opportunity to explore alternatives. You might say, "We have seen what would happen if someone acted in that manner. What do you think would happen if this (state alternative) action had been taken?"

7. Reenactments

Here is another important step. You now offer the same players, or different players if you desire, the second or third chance at the same problem situation (the second or third chance that does not come in real life very often). This offers the students the opportunity to learn from their mistakes, or the suggestions of others, in a situation that is neither threatening nor socially damaging.

8. Further Discussions

(Repeat Step 6 following each reenactment.)

9. Sharing Experiences and Generalizing

This is where we sum up what we have learned, and express our new feelings on the subject encountered. Keep in mind that all role play activities do not lend themselves to generalizations.

CAUTIONS

You will have objectives in mind when using role play, but keep in mind that outcomes develop gradually. You should not expect quick dramatic changes in attitudes or behavior from role play exercies. Role play, like games and simulations, are essentially long range in effect.

Interaction is the heart of social life and as such must be the heart of role play. As the convener, you should note certain cautions which will facilitate and enhance the interaction.

1. There are no wrong answers.
2. Avoid any semblence of a hidden agenda. If a story ignites a concern which is more meaningful to the goup, pursue it rather than the story's problem.
3. Respect the student's "right to pass."
4. Don't confront with too high level of risk.
5. Don't put students on the spot concerning their views.
6. Don't focus too narrowly on predetermined teaching objectives. Let children develop their own generalizations and insights.
7. Encourage variations in the interpretation after the dramatization.
8. Avoid overdirection at the risk of rushing, even though you are working within a time frame. However, retain a sense of timing. When you feel that a problem being explored cannot be expanded further, change direction.
9. Emphasize the fact that this is not to be a theatrical situation.
10. Be patient.

A. CHANGING TEACHER'S BEHAVIOR SCENE (I)

You are a fifth grade teacher. Your class recognizes you as an authoritarian muscle leader upon whom they rely for the dispensation of knowledge. You have been very introspective the last couple of days due to some things said in a family argument over the weekend. You have spent considerably less time lecturing to the class. Your attention has been turned to work at your desk and you are filling the time for the class by allowing them to work together on a project.

B.

You are a fifth grade student. Your teacher is usually a strong authoritarian type who allows little or no interaction among the class. However, this behavior changed the last few days now and the class has been allowed twice as must time to work together on a project. Prior to this time it had been pursued on an individual basis with the teacher providing all of the direction and decision-making. The class has enjoyed this arrangement and everyone is excited about it. Because of this enthusiasm you are prompted to approachthe teacher after school and share the feeling of the class.

C.

A is a fifth grade teacher; B is a student in the class. A is a strong authoritarian type who maintains strict control of the class. However, this behavior has changed dramatically, the result of a serious family flare-up. The class has been delighted with the change. The teacher has not wanted to spend time lecturing and as a result has allowed some group work on a class project. One of the students approaches the teacher after school to express the positive feeling of the class.

ALLOWING CHILD'S CREATIVITY SCENE (II)

A.

You're a third grade teacher. You have decided to try some role play using familiar stories. You introduced "Three Little Pigs" and chose volunteers to role play. The class is having a lively discussion of the reenactment, but you notice that the time is up on what you had planned.

B.

You are a third grade student. Your teacher is having you role play "Three Little Pigs". The volunteers did a good job with the role play, but it occurred to you that the story might be fun to do if the Mother Pig decided to leave instead of sending the pigs out. You ask the teacher if a group could reenact the changed story and volunteer to be one of the pigs.

C.

This is a third grade classroom. The teacher is using role play for the first time and has started with familiar stories. They have just completed "Three Little Pigs" and are engaged in a lively discussion of the reenactment. The teacher notices that time has run out when one of the students asks for another reenactment, changing the story this time.

KIDS HAVE RIGHTS SCENE (III)

A.

You are a fourth grade teacher. You have set up an interest corner in the classroom, and have told the students they may go there when they are free. You have also told them that they should consider it their corner. A student with whom you have had some discipline problems is in the interest corner by himself. He does not appear to be actively involved in anything. You are curious about his intentions and go over to ask him what he plans to do.

B.

You are a fourth grade student. You are an average student but you don't like your teacher because you think she picks on you. An interest corner has been set up in the classroom where students can go when they are free. You have just hurried to complete an assignment so that you could go to the corner. You want to get away from the class for awhile. You are sitting there thinking things through when the teacher comes over to you. You thought that the teacher was only invited to the corner.

C.

This is a fourth grade classroom. The teacher has just set up and supplied an interest corner which is supposed to be for children only. They have been told they may go to the corner whenever they are free. One of the "problem" students has just completed the assignment and goes to the corner to sit alone for a while. The teacher is concerned about the productivity of the student and approaches with a question.

OBJECTIVES vs. CHILD'S NEEDS SCENE (IV)

A.

You are a second grade teacher. You spent at least four hours last night finishing the plans for a unit on intercultural understanding. Your primary concern at this point is getting it off to a good start. You have asked some good probe questions and the class in involved in a lively discussion. You are really encouraged when one of the students who is very quiet and shy raises his hand.

B.

You are a second grade student. You don't have a lot of friends in the class mainly because you are very shy and quiet. You have just had a very exciting weekend. It was Easter and your parents took you to the Easter egg hunt at the city park. There must have been 1,000 kids there!! And a lot of them were older than you. Anyway, you found the most eggs and got a swell prize for your efforts.

C.

This is a second grade classroom. The day has just begun and the teacher is introducing a unit on intercultural understanding. It has involved many hours of planning and she is very anxious to get it off to a good start. Right at the climax of a good discussion one of the students makes an announcement of a personal nature.

DECISIONS, DECISIONS SCENE (V)

A.

You are an elementary school principal. You invitied a group to come and talk to the kids in an assembly and they have just notified you of the date that they will be available. You don't note any major activity already scheduled so you agree on the date and make the necessary arrangements. Checking the other schedules in the school you note that one of the teachers is planning an all day field trip. You are anxious to have all the classes in attendance so you go to talk with the teacher about the possibilities of postponing the trip.

B.

You are a first grade teacher. Your class is well into a unit and part of it will include a field trip which everyone is really looking forward to. You have made all the arrangements in setting it up and have planned follow-up for the class. You have attempted to involve the kids in planning for this trip and to help in some decision making.

C.

This is a first grade classroom. Everyone has been talking about and looking forward to an upcoming field trip. It should be a meaningful experience as the trip is part of a unit and some follow-up has been planned. The principal comes into the room and tells the teacher that it is necessary to have a school assembly and there is a conflict with the field trip.

CLASSROOM ACTIVITIES IN CAREER AWARENESS

CAREER AWARENESS

CLASSROOM ACTIVITIES

Prior to Viewing the Tape

One should view this tape with the rational that career awareness activities can affect the student's self image, and that with the growth process, teachers and parents become models. The first segment of the tape shows a group of teachers participating in an Elementary Industrial Arts Workshop. The teachers were provided an opportunity to get hands on experience with activities which they might offer to students within the classroom. A product was presented as the goal and they were told, "this is what you are going to make today." Ultimately, they were involved in a mass production activity.

Many teachers are well aware of this type of activity, but let's pause for a moment for a closer look at this element. The tape will show the same activity used in a classroom situation. Students will be involved in the same task as preceding one with teacher. Give particular attention to the differences as well as the similarities in the approaches and methods taken by the two groups. In both situations, there will be a considerable amount of movement and involvement.

Children don't know all the proper methods - see if you can identify a girl holding the wrong end of the wood as she is sawing it. As a result of conducting Industrial Arts in the classroom, children will:

1. Learn about their environment
2. Become relatively free from the pressures of various needs, fears and demands of adults.

3. Explore and build and understanding to their world.

4. Be able to solve their problems.

5. Think productively.

The students involved in the activity are hammering, sawing, sanding, drilling. With this activity are a multitude of personal learning experiences. Some of these are brought out through an interview with two of the students. The purpose of the interview was to help students identify the relationship to the world of work and other life roles.

In the interview, the students are asked if that was the first time they had worked on an assembly line; what was their job? Did they enjoy it? Did they make mistakes? How would they feel about doing this job when they grew up? If they thought about the paycheck? Listen carefully and try to note any different approaches which could have been used.

Kids who are bored with this work should be helped in recognizing this, not from a negative point of view but as it relates to the child's present interests. How many kids hear the dismay of their parents each morning in having to go to work? Unfortunately, far too many of them will be able to relate this concept. People have more reasons for working than just survival. Kids have to be exposed to sets of reasons for working other than those based on economics. With this emphasis, we might be able to avert another generation of "white collar woes" and "blue collar blues."[1]

Work opportunities in the school need to be made available; more meaningful application of basics to uses outside of the classroom needs to occur. This experience allows the child to develop personal data which creates

[1]Hoyt, Kenneth B. Career Education: Contributions to an Evolving Concept. Salt Lake City, Utah: Olympus Pub. Co. 1975.

the basis for future career decisions. Student's should be encouraged to ask themselves, "Did I really enjoy school today?" "Why, or why not?" Central to this discussion is the fact that a person must first be someone before he or she can become something.

Through the use of this program, it is hoped that teachers will be able to go beyond persistent belief that the purpose of education is simply education. What about preparation for the real world?

TRUCK

8

MASS PRODUCED TRUCK ACTIVITY

INPUT

This learning module will allow all of the students in the class to participate. The preliminary discussion should include the process of manufacturing, transportation and how the workers in a corporation are all dependent upon each other. The whole concept of manufacturing and mass production allows us to have uniform products at a reasonable cost. This unit should help the students to understand about the economic structure of the country.

DIRECTIONS

All material should be be proper thickness and width. The teacher should construct a truck to be sure it all works and fits together and be a resource if students have difficulty.

Cutters. Using panel saws or back saws with fixtures.

1. Axels - 3/4 x 3/4 same length as width of truck body
2. Cabs - 1 3/4 x 1 3/4 same length as width of truck body
3. Supports - 3/4 x 3/4 same length as body width minus thickness of 2 sides
4. Sides - 1/4 x 1 1/2 x 5
5. Motor - 3/4 x 1 1/4 x 2 1/2
6. Body or bed - 3/4" x 2 1/2" x 10"
7. Wheels - 2 3/4 or 3" 1/8" masonite - cut with hole saw

Assembly. With glue and brads.
The assembly should be done in the order the class decides. This should be trial and error, to avoid awkward situations.

1. Axles to body - drill axles for screws first
2. Cab, motor, supports to body
3. Fasten sides to supports. Do any painting before wheels
4. Wheels last - with screw drivers

COMMENT

This activity can utilize the talents of each class member. Please share with us any activity that you have used or thought of that could demonstrate this concept to students of any grade level or age.

MASS PRODUCED TRUCK ACTIVITY

INPUT

This learning module will allow all of the students in the class to participate. This activity can utilize the talents of each class member. Please share with us any activity that you have used or thought of that could demonstrate this concept to students of any grade level or age.

Part II

In the second part of the tape you will see a classroom of fourth graders who have been asked to rank a group of personality traits. Following this is the subsequent small group discussion which is centered on their responses. In this discussion you will note the frequent reference made to what the teacher would find most desirable. In other words, they are ranking first those traits which they feel either their parents and/or teacher might rank at the top. Adult values have a greater impact on the elementary child than we realize.

The students are involved in relatively easy to understand concepts such as honesty, cleanliness, etc. For purposes of this discussion you are asked to apply this same thinking to some of the basic principles of the teaching process (e.g. curiosity, open-mindedness, objectivity, respect for evidence, and the capacity to think critically). Recognizing that we live in a world of permanent change educators need to adopt and live by these principles in order to teach them effectively. Attitude is the key word. As teachers we should try to find answers from within. In order to do this a set of assumptions is essential as a framework. To help illustrate, consider the case of the objective educator reflecting the assumption that in a conflict situation all sides usually have legitimate concerns opposed to the teacher who freely takes sides.

Try ranking the items found on the next page and compare your ranking with the students in the tape.

TRAITS OF A STUDENT

Grades 3-6

Objective: The activity allows students to clarify their values as to which traits of a student are most important to them.

Outcomes: Students will:

- Gain additional vocabulary development
- Develop and utilize listening skills
- Begin to clarify values
- Become aware of a process for decision-making

(10 min.) Phase one

Place on the board the following student traits:

1. honest
2. good sport
3. happy
4. smart
5. clean
6. cooperative
7. dependable

Be sure to only read the list and do not interpret any meanings for the children. The directions are (using my numbers) to rank the list of traits I have provided. Do this activity by yourself. Student's list may look like this:

2. good sport
4. smart
3. happy
1. honest
7. dependable
6. cooperative
5. clean

(10 min.) Phase two:

Tell the children to find one other child they would like to share their list. Let them pair themselves off naturally. Tell them you are allowing 5 minutes for each of them to explain the reasons for their ranking.

(10 min.) Phase three:

Instruct student to get into groups of five. They have the task of appointing a recorder and a convener. Once again, natural selection should occur rather than numbering off or having teacher composed groups. By consensus, each group is to come up with a rank order of the traits. When agreement has been reached, they are to place their ranking on the graph on the board.

Example

Groups

1	2	3	4	5
4	4	4	3	3
1	1	3	4	4
2	3	1	1	2
3	2	2	7	1
5	7	5	6	7
6	5	7	6	6
7	6	6	2	5

Phase Four

(60 Min.) This part of the activity can probably be done the next day. Allow each group to explain the reason for their ranking. Then carry out and open class discussion about the similarities and differences of groups.

NOTE Be sure to tell yourself 100 times the night before starting the last phase, "I will not pass judgment or place my values on the student's decisions or discussions."

Part III

In the last part of the tape you will see classroom activity which many of you have done. There is no interaction amoung students in this part. You merely observe how one teacher does the activity. There is an opportunity, however, to reinforce some of what has been said to this point. Student involvement and interaction is essential to this activity and this creates a certain level of "noise" in the classroom. Are you as a classroom teacher comfortable with student involvement and interaction? If so, this acceptance will be noted quickly by the children and their concern will turn to productivity.

READ BEFORE GROUP DISCUSSION

A final word about the classroom environment. While we will all readily admit that the type of classroom environment is a critical factor, there is a little understanding of how to nurture a good learning environment. We can look at it as a content/context situation. You have just seen some examples of the content. For purposes of this discussion, context will be defined as the appropriate environment for successful learning to occur. Two points are to be made here: 1) Research shows us that in the elementary school years the child needs to learn how to make and do things with others - the dangers in development during this time are inferiority and inadequacy, which leads us to the second point; 2) Maslow's hierarchy of needs, the second level, cites the psychological need for love, hence the need for an environment capable of providing love and fostering growth of self esteem.[2] This is offered as a possible lead to better understanding of what we are trying to achieve and production of desired results.

[2]Dillon, Stephen V. et al. "In Defense of Playfullness." Elementary School Journal January '75, pp. 207-13.

Topics for group discussion:

1. The first part of the tape includes an interview with two children conducted for the purpose of showing the relationship between life roles and the activity. Discuss this relationship specifically, i.e. what is the tie with the roles of producer, individual, family member, consumer, learner, citizen.

2. Play is the source of most of what children learn before they are school age. Discuss the value of play as the child's source of learning.

3. Educators tend to "thingify" students in order to confront them as institutional abstractions rather than concrete persons. Name a label commonly placed on kids in the classroom; describe at least two ways in which the classroom environment might be altered to allow for the innocence and reality of the child.

4. Parents and/or teachers are influential in kids' perceptions of their own priorities and values. This was evidenced in the student discussion of personality traits. With this assumption as a given, discuss how this might relate to your own classroom and/or school situation.

TITLE: THE DECISION-ORIENTED EVALUATION SYSTEM.

DESCRIPTOR: *PROGRAM DESCRIPTIONS; *PROGRAM EVALUATION; *CAREER EDUCATION; *VOCATIONAL EDUCATION

IDENTIFIER: PONTIAC; MICHIGAN

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 20P.; RELATED DOCUMENTS VT 103 203 AND VT 103 204 AND VT 103 255 THROUGH VT 103 258 IN THIS ISSUE.

ABSTRACT: THIS REPORT DESCRIBES A PROJECT TO DETERMINE THE SIGNIFICANCE OF CAREER, VOCATIONAL, AND COOPERATIVE EDUCATION PROGRAMS IN THE PONTIAC, MICHIGAN SCHOOLS AND TO DEVELOP AN EVALUATION SYSTEM INTENDED TO GUIDE VOCATIONAL PROGRAM DECISIONS. IN MEETING THESE GOALS, THE FOLLOWING OBJECTIVES WERE ACCOMPLISHED: (1) THE UNIT COSTS FOR VOCATIONAL AND GENERAL EDUCATION PROGRAMS IN THE SENIOR HIGH SCHOOLS WERE DETERMINED; (2) THE NEEDS OF THE EMPLOYERS IN THE COMMUNITY WITH RESPECT TO EMPLOYEE SKILLS WERE ASSESSED; (3) THE LONG RANGE IMPACT OF THE VOCATIONAL EDUCATION PROGRAM WAS ASSESSED THROUGH A FOLLOWUP QUESTIONNAIRE OF RECENT GRADUATES; (4) THE LEGAL REQUIREMENTS FOR EMPLOYMENT OF MINORS WERE DEFINED AND DESCRIBED IN A MANUAL FOR EMPLOYERS; AND (5) THE LEGAL REQUIREMENTS FOR EMPLOYEES WERE DEFINED AND DESCRIBED IN A MANUAL. REVIEWED IN THIS REPORT ARE THE ACTIVITIES COMPLETED IN MEETING THE OBJECTIVES. THE REPORT ALSO DESCRIBES THE SETTING OF THE STUDY, THE ACHIEVEMENT AND ASPIRATIONS OF THE STUDENTS, AND THE EXISTING VOCATIONAL EDUCATION PROGRAMS. (AUTHOR/NJ)

ACKNOWLEDGMENTS

The Research and Evaluation Department and the staff of the Decision-Oriented Evaluation System of the Pontiac Schools, express deep appreciation for the assistance received from many sources in the conduct of the study reported in this publication. The graduates of Pontiac Central and Northern High Schools and Pontiac area employers who responded to questionnaires and interviews were very cooperative and supportive of the study. The vocational and cooperative education staff members and the business management staff of the Pontiac School District who provided consultant service, made generous contributions of time and information. Special thanks to Mr. M.C. Prottengeier, Director of Vocational Education, and Mr. Donald Kaiser, Placement Consultant.

This publication was prepared pursuant to a contract with the Office of Education, U.S. Department of Health, Education and Welfare. Contractors undertaking such projects under Government sponsorship are encouraged to express freely their judgement in professional and technical matters. Points of view or opinions do not, therefore, necessarily represent official Office of Education position or policy.

DANA P. WHITMER, SUPERINTENDENT

FOREWORD

The preparation of students to become skilled, productive, and self-fulfilled workers is one of the schools' major functions. There is widespread concern among employers, labor organizations, and governmental agencies about the effectiveness of the schools' contribution to the skill preparation and work attitudes of young people. Such concern is not misplaced, for studies of the American work force indicate the strong presence of dissatisfaction, uncertainty, and hostility toward their jobs among American workers. In response to these evidences of unease about the role of work in the life of the nation, educational planners have given increasing attention to school programs which contribute to the work-readiness of youth.

The School District of the City of Pontiac, located in an industrial center and serving a working population, is very conscious of its responsibility to assist Pontiac students in making a successful transition from school to work. Recent years have seen substantial progress in our programs in career development, career education, and vocational education. We are proud of our progress, but we are aware that many of our students are not prepared sufficiently to cope with their uncertain vocational futures. The Decision-Oriented Evaluation System (DOES), a project funded under Part C, Vocational Education Act, and reported in part in this publication, has afforded the Pontiac schools an excellent opportunity to examine and evaluate portions of the district's programs in vocational education and work experience. The findings from the study will provide valuable information for school district planners and decision makers in determining future program directions. It is our sincere hope that the DOES report will be of assistance to other educators, as they examine their programs in vocational education.

Dana P. Whitmer

DECISION ORIENTED EVALUATION SYSTEM

A review of the products - April 1976

The Pontiac School District has spent the past twenty months researching various dimensions of the district's Vocational Education program. The goal of this research was to ".... provide information for decision makers." This the project staff has done.

The information in the final report is valuable to the Pontiac School District and the educational community at large. The project staff have:

1) determined the unit costs for vocational and general education program in the senior high school setting

2) assessed the needs of the employers in the community with respect to employee skills

3) assessed the long range impact of the vocational education program through a follow-up questionnaire of recent school graduates

4) defined the legal requirements for employment of minors and described this in a manual for employers

5) defined the legal requirements for employees (both underaged and majority-aged youth). A description of the available choices, restrictions, and the employment requirements are in a manual developed by the project.

The staff have used accepted research techniques in compiling the data and forming the conclusions. The information can be regarded as reliable in that professional standards were maintained in its collection.

The D.O.E.S. project has made an important beginning in developing an Educational Resource Management System (ERMS).

The Unit Costing Model developed by the project is readily adaptable to school districts throughout the state and nation.

The other products, too, have the virtue of utility beyond Pontiac School District boundaries. The questionnaires, the employer manual, and the employee manual are useful to school districts wishing to improve the quality of information regarding their vocational education program.

Howard Heitzeg

Howard Heitzeg
Supervisor of Research & Evaluation
Waterford School District

SETTING OF STUDY

Pontiac is a middle-sized industrial city located on the northern fringe of the Detroit metropolitan area. Its population is 85,000. The school district of the City of Pontiac extends beyond the city limits to include a population of 120,000. Oakland County, of which Pontiac is the county seat, has a population of close to a million and among the highest per capita incomes in the nation. Of the seventy communities in the tri-county metropolitan area, Pontiac ranked sixty-seventh in income, with a mean family income of $9,681 in 1969 (Census Bureau). A half billion dollar, state equalized, property tax base is dominated by industry, mainly by three General Motors Plants: Pontiac Motor Division, Truck and Coach Division and Fisher Body. Forty per cent of industrial employment in Oakland County is centered in Pontiac. In full employment years, 45,000 industrial workers and 25,000 clerical, service and government workers are employed within city limits.

Pontiac is an old town, settled in the early 1800's and incorporated in 1861. It grew at a modest rate for many years. When the General Motors Corporation was founded in Pontiac, based on the existing carriage trade, its population and that of nearby communities mushroomed as the demand for labor grew. People were attracted by openings for both skilled and unskilled workers, by high wages and, later, by union protection and benefits and a relative lack of discrimination in hiring. Labor advertisements drew members of various nationality groups who settled here with their families, including Irish, Italians, Polish, Greeks, Albanians, Russians, Hungarians and others. Sharecroppers and small farmers from the South, miners from Appalachia and Mexican-American migrant workers came to stay during and after the war years. A small native American population,

many in the construction industries based here, lives in Pontiac. Professionals and semi-professionals of Asian and Indian extraction make their homes here. The remarkable ethnic diversity of Pontiac for a city of its size had led to some problems. There has been a long-term trend for auto executives, lower-level managers, and professionals to move outside the city limits, leaving behind handsome but aging homes. Housing has been rigidly segregated in Pontiac until recently, with most black families residing on the city's south side. Incidents of racial conflict closed various schools in the years before 1971. The rate of crimes against people made Pontiac one of the five most dangerous cities in the country until a decline in the crime rate began two years ago.

On February 17, 1970, as a result of a suit filed by the NAACP cooperating attorneys in Pontiac, U.S. District Judge Damon J. Keith ordered immediate integration of Pontiac schools and the submission of a complete desegregation plan. Judge Keith found that the nine new schools built between 1955 and 1963 served only to reinforce segregation patterns.

The school board voted to appeal to the U.S. District Court, which denied a stay of execution of Judge Keith's order on April 30, 1970. The board then announced that it would appeal to the Sixth Circuit Court of Appeals in Cincinnati. On May 28, approximately 3 weeks after the Supreme Court's decision in the Charlotte-Mecklenburg case, the Appeals Court upheld Keith's order. On July 12, the Pontiac School Board submitted a revised integration plan to Judge Keith, and on August 25 formally filed an appeal with the U.S. Supreme Court.

On September 2, Judge Keith refused an injunction against implementation of the busing order. On October 26, the U.S. Supreme Court denied certiorari to hear the appeal of the Pontiac Board of Education.

Schools were reorganized into clusters so that students would stay together throughout their school years (except kindergarten) and would move from building to building as groups. Single grade schools were established for grades 7, 8 and 9. (Grade 9 was moved into the high schools for the first time in the 1974-75 school year.) The high schools were affected only indirectly by the court order. Their ethnic makeup now reflects the school district more completely.

Chronic poverty has developed along with the cyclical recessions to which Pontiac is heavily subject. The 1969 (Census Bureau), ten per cent of white families and twice that proportion of black families had incomes below the poverty level. In March, 1973, 9,285 Pontiac children under 18 received AFDC funds and that caseload is growing. Ten years ago, close to 2500 schoolchildren got free or reduced-price lunches. Today 44 per cent of all students in schools with lunch programs (K-8, 5900 students) receive free or reduced-price lunches. Summer free lunch programs feed over 5500 children. There are nearly 7,000 children from families with incomes of less that $3,000 in this city of 85,000.

ACHIEVEMENT AND ASPIRATIONS

Among Pontiac residents over 25, 37.3 per cent have graduated from high school. The average number of school years completed is 10.5 for males, and 10.8 for females. Several thousand residents have less than a 6th grade education and close to a thousand, no formal education. About 4500 adult residents have some college experience or have earned degrees, and among this group are most of the managers, high-level clerical and service workers, and highly skilled manual workers.

On national norm-referenced tests of academic achievement (Metropolitan Achievement Tests), Pontiac students perform at about the 25th percentile; that is, 75 per cent of the nation's students do better in reading and math than Pontiac students.

On the state's objective-referenced tests (Michigan Educational Assessment Program), designed to measure minimal essential skills which nearly all students should be able to master, Pontiac students fare no better. Compared to the statewide results on these tests, Pontiac 4th and 7th graders have been in the first or lowest percentile.

There is a wide disparity between achieved scores of black, white, and Latino students. White students gain the highest scores, and Latino students, the lowest.

Intensive effort, categorical aid programs, the gradual introduction of objective-referenced teaching, and increased home-school cooperation may be helping to turn the tide of achievement. Significant improvement in 1974 and 1975 is indicated in a variety of test results. Nevertheless, achievement is at a generally low level with, of course, numerous individual exceptions.

Despite this, Pontiac parents and students have high aspirations for jobs and higher education. The realization that low-skill jobs are unstable and that their number is shrinking has been borne in on many people in the last few years. More black and Latino students are staying in high school to graduate; many, if not most, dropouts find their way into Adult Education or some other kind of training.

VOCATIONAL EDUCATION IN PONTIAC

Vocational education in Pontiac has held an important position in the total school program for many years. Its purpose has always been to prepare students for entry into employment upon their leaving the schools. However, the status and the success of vocational education programs have fluctuated with changes in social and economic conditions in the Pontiac area and the nation at large. Prior to, during, and following World War II the Pontiac vocational education programs enjoyed a vigorous and respected position during that period of industrial and economic expansion. Business and

manufacturing settings in the community provided work placements for young people with a wide range of skills and backgrounds. Many students perceived vocational training and local work placement as appropriate steps in their career development, and their parents and the community concurred with their views.

The post war effect of the G.I. Bill was to place the achievement of a college education within the reach of many who would not have considered such a goal in previous years. Consequently, college attendance became an almost universal value. Youth, parents, business and industry, came to view college preparation as an essential to success in an expanding population and a growing economy, an attitude which only now is being readjusted to fit a new reality. The over-emphasis upon the importance of a college education had a profound effect upon vocational education programs. Capable and motivated students, who, formerly would have entered vocational programs, were urged into college preparatory curricula. Vocational classes which had enrolled students of varied talents and abilities became the province of students of limited academic achievement and commitment to success in school. Naturally, these trends had a negative effect upon the status and success of vocational programs.

One of the few beneficiaries of the recent declines in employment, production, and college attendance has been vocational education. The combination of a very competitive job market and the need among school graduates for salable skills has led to a widespread resurgence of vocational education programs. The variety of skills being taught in schools, the number of vocational training centers, and the political and economic support for the funding of vocational education have all increased substantially in recent years.

To support the re-emphasis of vocational preparation, educational planners have recognized the needs of young people for training which extends beyong the skills needed for specific job performance. Employers and educators are cooperating to design programs which address the values, attitudes and inter-personal relations associated with successful participation in the world of work.

These trends have been embodied in the educational concepts of career development and career education, areas in which the Pontiac Schools have taken a position of leadership. Beginning in 1971, experimental programs specifically designed to meet the career development needs of Pontiac students have been instituted and tested. The following brief descriptions illustrate programs having a significance for high school students.

P.A.L.S. - Pontiac Adult Student Learning System

A federally funded Part D project that provides students with Career exploration skills, Communication skills, Decision Making skills, Program Planning and Development skills. Internships are a vital part of the program that allow students to use their skills in a real life situation. Students are taught to transfer these skills to living, learning and working areas of their lives. Significant evaluation results have been obtained through this program.

C.A.S.T. - Career Achievement Skills Training

A Part "C" federally funded project that trained teachers, counselors and administrators in human, education and career skills. Over 100 participants are now trainers and are continuing to in-service others in these skills K-12.

C.A.O.S. - Computer Assisted Occupational Search

A self exploration system that is used in both the PALS, CAST, Adult Education, Project Growth and NEOVEC students, this program can be infused into any high school program that relates its program to occupational clusters.

It allows students to apply their values to jobs, to access career information, to reference information sources using, DOT, and to expand values. Again good evaluation results were obtained.

V.I.E.W. - Vocational Information for Education and Work

A project that was developed by the State Department of Michigan which provides updated microfiche to be used by students, teachers, and counselors in obtaining information about a wide variety of occupations.

The students in the PALS program are trained to use this system and help students in both high schools to explore careers in the library. They also work with teachers and community agencies to help them use their system with their populations.

NEOVEC - North East Oakland Vocational Education Center

A skills training center that provides 11-12 grade student career preparation skills in sixteen areas. Students going through the regular high school PALS programs and work study programs develop career plans that would use the skills center to obtain skills.

THE DECISION-ORIENTED EVALUATION SYSTEM (DOES)

To determine the significance of the described career programs for the long-established vocational and cooperative education programs in Pontiac and to develop an evaluation system intended to guide vocational program decisions, the Decision-Oriented Evaluation System (DOES) project reported in this and the attached documents was instituted.

The end product, or overarching goal, of the DOES project was to--"produce information designed to improve vocational education." Meeting this goal required the attainment of five (5) program objectives listed below:

1. To identify those aspects of alternative work experience programs which produce positive approaches with business, industry and community organizations.

2. To determine methods for improving student and employer satisfaction in work experience programs.

3. To clarify legal and other barriers to work experience programs.

4. To determine program costs on a per student basis and compare program costs in terms of student outcomes.

Reviewed in this report are the activities that the project staff completed to meet the objectives.

PROGRAM OBJECTIVE 1:

To identify those aspects of alternative work experience programs which produce positive approaches with business, industry, and community organizations.

Activities Performed

The project staff designed survey instruments to ascertain student and employer perceptions held towards work experience programs and to determine the impact of the work experience programs on job performance. A copy of the student questionnaire is included in the accompanying document describing student responses.

The student survey was sent to recent graduates (class of 1972) of the Pontiac High Schools. Initial response to the student questionnaire was very low, due probably to the high mobility of this age group. Project staff intensified their efforts to collect the information via telephone calls and at times through personal contact. Staff collected information from 75% of the initial sample and estimated that they gathered data from 89% of those for whom current addresses could be obtained. Analysis of the data from the student questionnaires, along with information received from the employer survey was completed. Questionnaire data was coupled with information contained in the students' records to facilitate a student profile illustrating their personal traits and their chosen school courses with "on the job success". The publication of the DOES project entitled, Did School Help Me Go to Work? Experiences of '72 Graduates contains the description and analysis of the findings from the extensive study of 1972 graduates from the two Pontiac high schools and accompanies this summary report.

PROGRAM OBJECTIVE 2:

To determine methods for improving student and employer satisfaction in work experience programs.

Activities Performed

Employers of the students of the class of 1972 were surveyed to determine their satisfaction with the skills, experience and attitudes of the young employees. Questionnaires were sent to employers in Pontiac and immediate

vicinity. The employer population surveyed was comprised of those who had hired cooperative education workers, had worked with Pontiac Adult Learning System youth, were identified as current employers by the 1972 graduate respondents, or were randomly selected from the Polk's business listing for any employer having a Pontiac address.

The questionnaire was designed to assess several areas of employer opinion in regard to 1) attitudes and work readiness of young, new employees, 2) general preparation and 3) vocational preparation of students by Pontiac Schools, 4) value of work education programs, and 5) recommendations for schools in work education preparation of students.

Letters were also sent to selected firms reminding them of the questionnaire they had received and informing them that a DOES staff member would be calling to request an interview. The letters requested that those to be interviewed consider four elements of the work preparation of youth:

a. The academic skills necessary to work effectively.

b. The job performance skills which a student might bring from his school training.

c. The attitudes and values appropriate to employment.

d. Evaluation and recommendations for school programs including cooperative education which seek to increase work preparedness of students.

However, emphasis was made that the interviewers were seeking the employers' opinions and that there was no intention to limit the interviews to the listed areas. The selected employers were very cooperative in granting interviews.

The completed findings and analysis of the employer questionnaires and interviews are included in the DOES publication, Do Schools Prepare Good Workers? Views of Employers, which accompanies this summary report.

PROGRAM OBJECTIVE 3:

To clarify legal and other barriers to work experience programs.

Activities Performed

Objective 3 was the most elusive of the DOES program's tasks in terms of gaining expert opinions and recommendations for action. Legal and educational authorities responded to DOES inquiries by referring the staff back to the established laws and restrictions and avoiding comment on problem areas and needed revisions of those areas. The assorted documents from the United States and Michigan Department of Labor which list and interpret child labor laws were obtained early in the term of the project. Copies of the documents' title pages were included in Appendix of the DOES Progress Report of March 1, 1975. Review of these documents did not provide a clear-cut direction to the project staff in the completion of this portion of the study. Consultations were held with a local attorney, experienced in the laws of affecting youth employment. As a result of discussion between the attorney and the project staff, a meeting of school district personnel who have responsibility for the work placement of youth was arranged.

After discussing specific questions and areas of confusion with vocational teachers, cooperative education coordinators, and school administrators, it became apparent that the legal questions raised by the school personnel could be grouped into two major categories:

1. Those related to purely "legal" matters, such as minimum wage and hour restrictions, hazardous occupations, confidentiality of student information contained in school records, etc.

2. Those related to "pseudo-legal" matters such as the issuance or or revocation of work permits, disciplining of students who fail to meet school or work requirements related to their placements, methods to increase employer participation, etc.

The responses to "legal" questions which could be prepared, based upon application of existing laws, form the body of two DOES project publications which are included among the materials accompanying this report.

1. Youth Employment Laws: a Handbook for Supervisors of Young Workers

Presents responses by a qualified attorney to actual questions which were raised by school personnel involved in the work placement of students and which can be answered by the application of law. The pertinent youth employment laws are gathered, condensed, and interpreted, so that this handbook represents an easily-used reference for school personnel and employers.

Answers to "pseudo-legal" questions were not attempted, since they arise out of practice, working relationships, and company and school policies, which are not governed by established law.

2. The Young Worker and the Law: a Guide for 14-18 Year Olds

Was designed for use by young people who are employed or seeking employment. It is written in an informal style using clear, direct language and is intended as a guide for young workers to the steps in obtaining employment and to their rights and responsibilities as beginning employees. The document was prepared by a reading specialist working in cooperation with the consulting attorney.

PROGRAM OBJECTIVE 4:

To determine vocational education program costs on a per student basis and compare them to non-vocational, non-laboratory program costs.

Activities Performed

In this study, certain principles of cost anaylsis were applied to vocational education programs in the Pontiac Schools in order to provide a more detailed financial picture upon which to base program evaluations and decisions. Four major objectives formed the basis for the study of cost analysis of vocational education programs in the Pontiac Schools:

1. To determine the costs per unit of student credit of vocational education programs and compare them to the costs of non-vocational education programs.

2. To determine and compare the initial costs of constructing and equipping instructional facilities for the twenty-six vocational education programs and a non-laboratory example of a non-vocational education program.

3. To determine the cost per year of operating each of the twenty-six vocational education programs and a non-vocational education program.

4. To determine the existence and extent of difference in vocational program costs between the Pontiac high school and the Northeast Oakland Vocational Education Center.

Numerous studies and articles in cost effectiveness related to vocational education were reviewed. The essence of their content was that: a. writings in cost effectiveness tend to be theoretical rather than applicable, b. most cost data available is simply descriptive and needs to be refined to provide measured units of student outcome, c. analysis of expenditures by educational level is inadequate at present and is essential to sound decision making, d. vocational education is more costly than non-vocational education, but observed results seem to indicate benefits meriting the added cost.

Several decisions and limitations were established in order to conduct the study within the limits of time, personnel, and resources available. The function system of cost analysis was used in the study, since it is compatible with a new accounting system to be installed in the Pontiac Schools in 1976-77 and provides cost data at the instructional program or course level. The new Pontiac Central High School was used as the model for study of vocational education costs, since its recent completion date would provide current construction and equipment costs. Administrative costs outside the building level were excluded from the study, because the identification of their relationship to vocational education would be extremely difficult. Instead,

an indirect cost percentage which is used for all programs was employed by the study.

Procedures in the conduct of the study were to gather costs by function and category, identify student enrollments per class, and compute costs to deliver one-half credit per semester per enrollee on an annual basis. Costs to provide resources for learning were measured; educational benefits to students were not measured.

Educational costs were gathered and categorized by six functions:

1. Building cost of the room.
2. Utilities
3. Maintenance
4. Equipment and furnishings
5. Consumable supplies
6. Salary (including fringe benefits and cost of living adjustments)

The six functions were applied to each instructional program within the three vocational education areas of business, home economics, and industrial education, and to cooperative education and a typical non-laboratory, non-vocational education program. Functional costs were related to a salary index and operational budget formula to facilitate replication of the process in settings other than Pontiac. Further, costs for depreciation of facilities and equipment were computed. Tables for all of these data for Pontiac Central High School and the Northeast Oakland Vocational Education Center provided detailed analysis of the program costs for the two buildings. The tables and a detailed description of the procedures and findings of this portion of the DOES project are contained in the accompanying publication, A Cost-Effective View of Vocational Education Programs.

It has been Pontiac's custom in the past to submit reports of special projects under one cover. As the various products of the DOES study neared completion, their bulk and variety suggested the adoption of a different

format.

This summary report serves to describe Pontiac as a setting for the DOES project and to review the design and conduct of the project.

The four major goals and the information assembled and reported to meet them are directed to audiences with particular interests. To aid these audiences in gaining quick access to information related to their interests, the four major goals are reported in five separately bound documents.

Their titles, which have been cited in this summary report, are listed below:

<u>The Young Worker and the Law:</u> a guide for 14-18 year olds

<u>Youth Employment Laws:</u> a handbook for supervisors of young workers

ABSTRACT: THIS STUDY SOUGHT TO DETERMINE WHETHER VOCATIONAL TRAINING AND PARTICULARLY PARTICIPATION IN THE PONTIAC SCHOOLS WORK EXPERIENCE PROGRAM (WEP) MADE A DIFFERENCE IN THE WORK HISTORY, JOB SATISFACTION, WAGE LEVEL, AND JOB SECURITY OF HIGH SCHOOL GRADUATES. DATA WERE COLLECTED VIA MAILED QUESTIONNAIRE FROM A STRATIFIED SAMPLE OF 1972 WEP GRADUATES IN FOUR AREAS AND FROM NON-WORK EXPERIENCE GRADUATES. THE REPORT INCLUDES A DESCRIPTION OF THE 1972 GRADUATES, THEIR VOCATIONAL BACKGROUNDS, THEIR WORK HISTORY, AND THEIR WORK EXPERIENCE BEFORE AND AFTER GRADUATION. SURVEY DATA FROM THE 198 RESPONDENTS ARE PRESENTED AS SELECTED OUTCOMES OF THE WEP EFFECTS ACCORDING TO THE VARIABLES OF JOB PREPARATION BACKGROUND, SEX, AND RACE. THE OVERALL CONCLUSION WAS THAT GRADUATES WITH BOTH WORK EXPERIENCE AND VOCATIONAL COURSE WORK CONSISTENTLY DO BETTER THAN THOSE WITH ONLY WORK EXPERIENCE. WORK EXPERIENCE GRADUATES ARE WORK-ORIENTED, ABLE TO OBTAIN JOBS THEY LIKE FAIRLY EASILY, EARN ADEQUATE INCOMES, AND HAVE SECURE JOBS. APPENDIXES CONSIST OF A DETAILED DESCRIPTION OF THE GRADUATE POPULATION AND SAMPLE SELECTION PROCESS, SAMPLE DATA COLLECTION FORMS, AND DATA REDUCTION CODEBOOKS FOR SELECTED ITEMS. (NJ)

ACKNOWLEDGMENTS

The Research and Evaluation Department and the staff of the Decision-Oriented Evaluation System of the Pontiac Schools, express deep appreciation for the assistance received from many sources in the conduct of the study reported in this publication. The graduates of Pontiac Central and Northern High Schools and Pontiac area employers who responded to questionnaires and interviews were very cooperative and supportive of the study. The vocational and cooperative education staff members and the business management staff of the Pontiac School District who provided consultant service, made generous contributions of time and information. Special thanks to Mr. M.C. Prottengeier, Director of Vocational Education, and Mr. Donald Kaiser, Placement Consultant.

This publication was prepared pursuant to a contract with the Office of Education, U.S. Department of Health, Education and Welfare. Contractors undertaking such projects under Government sponsorship are encouraged to express freely their judgement in professional and technical matters. Points of view or opinions do not, therefore, necessarily represent official Office of Education position or policy.

FOREWARD

The preparation of students to become skilled, productive, and self-fulfilled workers is one of the schools' major functions. There is widespread concern among employers, labor organizations, and governmental agencies about the effectiveness of the schools' contribution to the skill preparation and work attitudes of young people. Such concern is not misplaced, for studies of the American work force indicate the strong presence of dissatisfaction, uncertainty, and hostility toward their jobs among American workers. In response to these evidences of unease about the role of work in the life of the nation, educational planners have given increasing attention to school programs which contribute to the work-readiness of youth.

The School District of the City of Pontiac, located in an industrial center and serving a working population, is very conscious of its responsibility to assist Pontiac students in making a successful transition from school to work. Recent years have seen substantial progress in our programs in career development, career education, and vocational education. We are proud of our progress, but we are aware that many of our students are not prepared sufficiently to cope with their uncertain vocational futures. The Decision-Oriented Evaluation System (DOES), a project funded under Part C, Vocational Education Act, and reported in part in this publication, has afforded the Pontiac schools an excellent opportunity to examine and evaluate portions of the district's programs in vocational education and work experience. The findings from the study will provide valuable information for school district planners and decision makers in determining future program directions. It is our sincere hope that the DOES report will be of assistance to other educators, as they examine their programs in vocational education.

Dana P. Whitmer

PREFACE

The study of the 1972 Pontiac high school graduates reported in this publication is part of a larger examination of the effects of work experience programs, funded under the provisions of Public Law 90576, Vocational Education, Part C, "Research and Training in Vocational Education." The project from which this report is derived was entitled Decision Oriented Evaluation System for Alternative Work Experience Program (DOES) and was conducted by the Research and Evaluation Department of the Pontiac Schools, Pontiac, Michigan.

The Pontiac Schools submitted its proposal for funding and conducted the DOES project in response to two major concerns which are prevalent in vocational education: the need to examine the effectiveness of vocational programs, and the apparent difficulty experienced by many young people in making a successful transition from school to work. The two Pontiac high schools have long-established, well equipped and staffed vocational education programs, and a cooperative education program (work experience) in which nearly one-third of twelfth grade students participate.

To combine the concerns for program evaluation and successful transition of youth from school to work, four

goals were selected for the DOES project:

1. To determine methods for improving student and employer satisfaction in work experience programs
2. To use evaluation evidence to make decisions on standards for alternative work experience programs
3. To clarify legal and other barriers to work experience programs
4. To determine program costs on a per student basis and compare program costs in terms of student outcomes

Goals One, Three, and Four implied particular tasks for the DOES project staff. (1) Two populations of 1972 Pontiac high school graduates, one of participants in the cooperative education program, and another of non-participants, were surveyed to determine their occupational placement and their evaluation of their educational preparation for work. (2) A substantial number of employers who provide cooperative education work placements for high school students were surveyed and/or interviewed to obtain their views on the schools' preparation of young people for work. (3) An attorney was engaged to examine and clarify the legal and quasi-legal barriers which affect the employment of school-age youth. (4) A detailed analysis of Pontiac's vocational education program was conducted to determine their costs per academic credit for facilities, equipment, and instruction and to compare them to the per credit costs

of non-vocational programs. During the conduct of the project, Goal Two (decision making based on evaluation evidence) has been addressed through continued consultation with vocational education administrators and instructors about project activities and products and their potential value in the modification of vocational education programs.

CHAPTER I

INTRODUCTION AND METHODOLOGY

Several individuals, including parents, employers, and educators, have voiced concern about the vocational preparation and work adjustment difficulties of recent high school graduates as they enter full-time employment. These concerns are typically expressed as questions about both the process and the performance of the high schools in preparing students for careers and work. Typical questions are: Why do high school students take vocational courses, and what are the effects of their training experiences? How do high school students make vocational decisions? What are the major influences upon students' formulation of their post high school plans? What are the effects of participation in school-sponsored work experience programs upon the career decisions, work placement, and job satisfaction of Pontiac graduates? What are the perceptions of graduates about work after they have been out of school a year or two?

To answer these questions, the DOES project conducted an evaluation of the impact of vocational

education and work experience programs (Cooperative Education)* on students educated in the district high schools. Many factors, outside the direct influence or control of the schools, combine to affect the adult work experiences of recent high school graduates. Regardless of individual vocational backgrounds, the graduates' chances for employment are strongly restricted by local labor market conditions, the state of the economy, governmental labor-economic policies, and the all-too-pervasive skepticism many employers exhibit toward young workers (see Slawski and Packard, 1976:13-19).

But most people work at some time in their life, and job opportunities must favor the vocationally prepared graduate at some point. All employment cannot be viewed as simply accidental--a random distribution of jobs to whomever is available. Schools can do little to control the non-school factors that affect employment. But schools can do something about that which they do control--their vocational education programs. They can examine and modify them to better prepare their graduates for jobs.

Most public institutions today find themselves under increasing demands by their clients. Schools are no exception to this, and their principle clients,

---

*In the 1971-72 school year, nearly all Work Experience Program participants were identified as Co-op. In this report, these terms are used synonymously. Additional types of work experience have since become part of an expanding Pontiac Work Experience Program.

students, are increasingly interested in jobs. Vocational teachers, counselors, coordinators, and administrators can expect to be held more and more accountable for the effectiveness of their programs in preparing students for work.

This report is based upon data collected on the students who graduated from Pontiac high schools in 1972. The vocational education program in the Pontiac Schools has changed over the past few years. More courses are offered every year and opportunities for placement are expanding. However, we believe that the basic experience of high school vocational education has not changed despite program growth, making our data still relevant to today's graduates. In addition, a longer term perspective on graduates may enable us to design better programs for the work careers of our students.

RESEARCH OBJECTIVES

It was our objective to determine whether vocational training and particularly participation in the Pontiac Schools Work Experience Program, made a difference in the work history, job satisfaction, wage level, and job security of high school graduates. We hoped to find out how graduates who completed the Work Experience Program adjusted to work, how they were influenced in their selection of employment, and how they compared with graduates who did not participate in the Work Experience Program.

The overall goal was to produce information that would assist local vocational educators in their decisions. As this group assesses the effects of the Work Experience Program, they need to have on hand information that specifies the relationship of the Pontiac Schools' vocational preparation programs to employment outcomes for the districts graduates.

In Pontiac, as well as in many other school districts, we suspect that there is a strong "compensatory" aspect to vocational education programs. Indeed, it is believed by many that only the less academically-able students enroll in vocational classes. Whatever is the reality, vocational education has a nortoriously "bad image" among many students and educators that is relatively unsupported by data. It is our belief that work experience and vocational education courses may have differing levels of importance in determining the benefits for each graduate of vocational education. For example, some students may require more course work in preparation for obtaining and keeping a job, while others may benefit more from the practical experience of work. Work experience itself may even convince some graduates to seek a different career or it may confirm their vocational choice. And some students may not require either course work or work experience to secure employment that they desire or find satisfactory. Better information about these types of students would greatly assist vocational administrators as they make decisions designed to maintain or improve the high school vocational program.

RESEARCH DESIGN

We gathered data on the 1972 graduates from two sources: school district student records and a mailed survey of a sample of the graduates. Our target population were the 1972 graduates who had participated in the Work Experience Program. Approximately one-third (32 percent) of the over one thousand 1972 graduates had completed this program in one of four areas: business education, distributive education, home economics and health education, and trade and industrial education.

In support of our plan to gather data from both records and graduates, several activities were initiated. Consultations were conducted with many people who would be interested in the potential findings of the study and with those who might provide assistance in the planning and execution of the research. Local vocational education administrators and teachers were informed of the project as were the staffs of the vocational departments of the Oakland Intermediate School District and the Michigan Department of Education. Many area employers and university educators were solicited for advice and information.

A review of research literature located techniques, instruments, and findings of potential use. School district administrators were consulted to determine possible legal restrictions on the use of student data files. The extent and relevance of the permanent and cumulative

student records concerning academic background, attendance, demographics, standardized testing, and work experience was determined.

These preparatory activities assisted us in developing our research design by helping us identify and assess our personnel resources, locate existing student data, and more specifically define our objectives. The final preliminary step was the selection of a research team which consisted of two members with guidance and counseling experience, a vocational instructor, a consulting sociologist, and the Director of Research and Evaluation for the Pontiac School District.

SAMPLE

Over one thousand (N=1023) students graduated from Pontiac high schools in 1972. A list of these graduates was compiled using data from the two high schools. Records secured from the Vocational Education Department identified those graduates who had participated in the Work Experience Program (N=327) and their vocational area.

Since the Work Experience Program (WEP) graduates were our primary concern, we over-sampled this group in order to guarantee a minimum case base in each of the four work experience areas. Approximately equal numbers of graduates were selected from each program area (business, N=34; distributive education, N=33; home economics-health, N=30; and trade and industrial, N=30). In effect, this

resulted in sampling each of the four sub-groups at a different rate since each area accounted for a different proportion of the total WEP population. In order to make comparisons with the total graduate population, we also sampled graduates who had not participated in the Work Experience Program. Our sample consisted of 127 work experience graduates (stratified in four areas) and 132 non-work experience graduates for a total of 259.

Because of the sampling procedures used, the high response rate, and some statistical weighting of respondents (see discussion below), we are confident that the sample and respondent data accurately represent the 1972 graduate population. A complete description of the population and sample selection process can be found in Appendix A of this report.

DATA COLLECTION

The team determined general guidelines, according to the goals and objectives of the proposal, for the development of the student survey questionnaire. Several local sources were consulted to elicit areas of interest, and other vocational follow-up surveys from local, state, and national sources were examined to identify useful items. Research topic areas and proposed items were revised and a preliminary draft was developed which was pre-tested with fifty Pontiac adult education students. In addition, district vocational education personnel and

Research and Evaluation staff reviewed the instrument. A cover letter, a stamped self-addressed return envelope, a pencil, and a thirty-one item questionnaire were mailed to the survey population (see Appendix B for copies of these materials). The format of the questionnaire was designed for ease of use by the respondent and for convenience in data reduction.

A return rate of 43.3 percent was accomplished on the first mailing. Two follow-up mailings, telephone calls, and personal contact with non-respondents were initiated. These efforts yielded 198 usable questionnaires for a final rate of return of 76.4 percent. One problem with the research was the difficulty of obtaining current addresses for the graduates. No systematic records are kept by the schools which forced us to create our own address list from many sources. Our rate of return for those for whom we could locate a current address was 89 percent. Our experience suggests that earlier identification of potential follow-up candidates before graduation will ease subsequent location of these graduates and reduce non-response bias.

In addition to the survey information, selected data was gathered from each respondent's permanent student record file. Project staff members were authorized by district administrators to obtain the

following information: (a) high school attended, (b) student number, (c) sex, (d) grade point average, (e) rank in graduating class, (f) month and year of birth, (g) parent's educational levels, (h) vocational course credits, and (i) Differential Aptitude Test Scores.

DATA ANALYSIS

All questionnaires returned were prepared for analysis by numerically coding all responses; open-ended responses were categorized (see Appendix C for coding categories). Each respondent's survey data was then merged with the background data gathered from the student records. Confidentiality of survey and student record data was maintained through the use of arbitrary case numbers.

So that our stratified sample respondents (N=198) would more nearly represent their actual proportion of the work experienced and non-work experienced graduates, weight factors were assigned to each of the four work experience areas creating a "weighted case base" of 738. This weighted case base therefore, proportionately represents the 1972 population of graduates (see Appendix B for an explanation of this process).

Preliminary analysis of all survey responses was completed for several independent variables: sex, ethnic category, grade point average, vocational course

work, and WEP participation. In the presentations that follow, survey data are presented according to these variables when appropriate. Several dependent variables such as wage level, job satisfaction, and job security are also utilized as predictors on occasion. Finally, a summary concept, Job Preparation (see explanation in Chapter III) is used to present much of our analysis of the effects of the WEP in Chapter V. Chapter VI is a separate description of selected outcomes considering the sexual and racial status of the respondents.

Not all of the data gathered by the project are presented here, nor has our analysis been exhaustive. Some of the information obtained proved to be so incomplete, inaccurate, or ambiguous that presentation at this time would be confusing or misleading. Specifically, data gathered from student records on parent educational level was incomplete for nearly one-fifth of our respondents. Since much of this information is recorded during early elementary grades through interviews with children, there is a question as to its accuracy. Attendance data for our respondents also are not reported. Subsequent to our data collection efforts, we learned that attendance records could be seriously misleading as a result of subjective recording methods used by teachers. For example, students late to some classes, who are marked absent at the beginning of the class, are not "re-recorded" as tardy. Other

teachers count a certain number of tardies as an absence. Although school district policy has been consistent in this area, there are widespread differences in teacher attendance recording practices.

We had hoped to use this information on parent educational level and student attendance to investigate some common assumptions made about their relationship to the career aspirations and employability of Pontiac high school graduates. If these concerns have merit, alternate sources of data will be necessary before they can be adequately understood. Our cautions here should not be interpreted as a general indictment of all school district records on students and parents.

Additional reliable and valid data gathered during this investigation, such as student grade point average, rank in graduating class, and Differential Aptitude scores, are not extensively treated in this report due to time considerations as well as overall research concerns. Since this project's primary focus was the effects of the Work Experience Program, these data must await future analysis.

CHAPTER II

OVERVIEW OF FINDINGS

PROJECT REVIEW

This study has provided us with a very necessary and useful set of data with which to examine the effects of vocational education on Pontiac's high school graduates. Our decision to study the 1972 graduating class was guided by our interest in the potential outcomes of participation in a supervised Work Experience Program. We have studied the high school and post graduation work histories, experiences, and attitudes of graduates who participated in the Work Experience Program (Co-op) during high school. These participants were compared with non-Work Experience Program participants for differences in background, attitudes, and employment.

Data were gathered from school district records and from a survey mailed to a stratified sample of the 1972 graduates. Responses and background data were analyzed by several independent variables including extent of vocational education background (Job Preparation), sexual and racial status, job satisfaction and security, and income. We think this analysis has been beneficial to our understanding of the impact of the Work Experience Program as well

as of the vocational education and employment experiences of high school graduates in general. Additional analyses are contemplated to better understand some of the interrelationships of the many variables studied; subtle or complex relationships have not as yet been extensively explored.

This chapter, then, is a summary of the main findings of our study according to Job Preparation background, sex, and race. This presentation is organized according to these three major concepts. For more specific information, the reader should review the appropriate chapter in this report (see Chapter V for Job Preparation and Chapter VI for sex and race).

JOB PREPARATION FINDINGS*

SELECTION OF VOCATIONAL COURSES. Respondents with no Job Preparation were most likely to select their vocational courses because of interest or hobbies (70 percent), while those with some Job Preparation were most influenced by the "type of work" the course may represent. Those with only work experience (and one related vocational course) also were substantially influenced by "good pay and working conditions" (20 percent). Respondents with both vocational course credits and work experience selected vocational courses because of interests and hobbies (42 percent) and the type of work it represented (26 percent).

---

*See pp.45-47 for an explanation of this concept.

COURSE SELECTION AND POST SCHOOL WORK PLANS. Respondents with only work experience and those with work experience and vocational course credits were the most definite about their post graduation work plans when they selected their vocational courses. One-fourth of both groups (26 percent and 25 percent respectively) "definitely planned" to work in a field related to their high school vocational courses. Only 14 percent of respondents with only a vocational course background and 18 percent of those without a vocational Job Preparation background definitely intended to seek course-related employment after graduation. Interestingly, one-fifth (21 percent) of those respondents with the greatest Job Preparation (VC-WE Prep) reported that they did not know what they were going to do after graduation at the time they selected their vocational courses.

POST HIGH SCHOOL JOB PLANS. While one-fourth (25 percent) of the respondents did not plan to work after graduation, 33 percent of those with no Job Preparation did not plan to work compared to 18 percent of those with only vocational courses, 28 percent of those with only work experience, and 19 percent of those with both courses and work experience. Those with work experience (42 percent) and those with work experience and vocational credits (38 percent) were most likely to plan to get a job "directly related" to the vocational courses studied in school.

EFFECT OF VOCATIONAL COURSES ON CAREER/JOB CHOICE. Vocational courses had the greatest effect on respondents with no Job Preparation. Forty-two percent said it "confirmed" their job choice compared to 35 percent of the work experience respondents and 32 percent of those with both work experience and vocational course work. Work experienced respondents were also most likely to report that vocational courses had "no effect" on their job choices (over 60 percent); they were least likely to report that their courses "changed" their job choices (four percent or less). Therefore, those without work experience were more likely to have "changed" their job choice because of vocational courses; those with no Job Preparation were most likely to have had their job choice "confirmed" by a vocational course. Apparently work experienced respondents were more sure of their job choices when they began course work and were not negatively influenced.

IMPORTANCE OF SEVERAL FACTORS IN GRADUATES' POST HIGH SCHOOL PLANS. For all respondents, regardless of vocational background, parents or relatives received the highest proportion of "very important" ratings (36 percent). School subjects were rated as "very important" by 29 percent, and work experience in high school (not necessarily supervised) by 27 percent. Overall, no major differences in response are noted by Job Preparation background. However, those with no Job Preparation were most likely to say their parents or relatives were "very important" in their post high school plans (40 percent). Non-work experienced respondents also were

most likely to rate high school counselors, teachers, and friends as "very important" in their plans.

UNAVAILABLE HIGH SCHOOL CURRICULUM. Over six-in-ten respondents (63 percent) reported that there were areas or courses they wanted in high school which were not offered. There is a strong relationship between work experience and this response. Only 50 percent of those with no preparation and 60 percent of those with only vocational courses wanted curriculum they thought unavailable. Nearly three-fourths (74 percent) of the work experience only group, and 80 percent of those with both work experience and courses wanted additional curriculum. In addition, 35 percent of the specific courses listed as desirable by all respondents were vocational.

HIGH SCHOOL JOB HISTORY. Seven-in-ten of all respondents (72 percent) had worked at a job during high school for one month or longer. Work experienced respondents were most likely to have worked (100 percent of work experienced only and 90 percent of VC-WE Prep respondents) at least one month while in school. However, over three-fifths of the No Prep respondents (63 percent) and the vocational courses only respondents (61 percent) also had worked one month or longer while in high school.

HIGH SCHOOL JOB AREAS. Jobs held by respondents during high school were fairly evenly distributed among the four work experience categories (business, 19 percent;

distributive education and health-home economics, 24 percent; trade and industrial, 20 percent; other jobs, 13 percent). Respondents with both work experience and vocational credits, and those with only vocational credits were most likely to have trade and industrial jobs (32 percent and 26 percent respectively). Those with only work experience and those with no Job Preparation were those most likely to have the business related jobs (37 percent and 26 percent respectively). Distributive education related jobs most likely to be held by respondent with work experience and vocational courses (29 percent) with the other three Job Preparation categories having approximately equal proportions in this area.

TYPE AND YEAR OF HIGH SCHOOL JOB. Most of the jobs (66 percent or more) held by work experienced respondents were Co-op jobs while those with no Job Preparation or only vocational were more likely to have jobs that were not related to the vocational program (69 percent and 58 percent respectively). No difference was noted for the year respondents held their jobs and their vocational background. Most (78 percent) who worked did so during their junior and/or senior year of high school.

RELATIONSHIP OF HIGH SCHOOL JOBS TO COURSES OF STUDY. Respondents with no Job Preparation were more likely to have job "not related" to their high school courses of study (65 percent) then were work experience only respondents (44 percent) or VOCWE Prep respondents (55 percent).

Work experience only respondents reported the largest proportion (29 percent) of "directly related" jobs compared to 22 percent of all respondents.

FIRST POST HIGH SCHOOL JOB. Nearly all respondents (93 percent) had been employed since graduation. Over one-half (54 percent) continued a job they already had or started immediately after graduation. Twenty percent started within two months after high school. The majority (74 percent) were working very soon after graduation. However, work experienced were even more likely to be working soon. Eighty-three percent of those with both work experience and vocational courses and 85 percent of those with only work experience were employed within two months of graduation; only 71 percent of those with no Job Preparation and 69 percent of those with only vocational courses were employed so soon after high school. Further, 19 percent of those with no Job Preparation were not employed until more than seven months after graduation. Work experienced graduates, clearly, are more likely to go to work after high school and begin their jobs sooner.

JOBS AND PARENTS, RELATIVES, AND FRIENDS. Nearly six-in-ten (58 percent) respondents reported they did not have a parent, relative, or friend in the same line of work they entered after high school. Those respondents with only work experience were significantly less likely to have parents, relatives, or friends in their field of work (81 percent).

Those with no Job Preparation had the highest proportion with friends in their job area (24 percent). The vocational course preparation group and those with course work and work experience had the highest proportion of parents or relatives in the same line of work (31 and 30 percent respectively).

VOCATIONAL AREA OF FIRST JOBS. Respondents with only work experience are most likely to have a business education related job (35 percent), and those with only vocational credits are the most likely to have a distributive education related job (28 percent). Those with both vocational credits and work experience have the largest proportion (36 percent) in trade and industrial, while the largest groups of respondents with no Job Preparation had health-home economics related (27 percent) or trade and industrial jobs (27 percent).

NATURE OF BUSINESS OF FIRST JOB LOCATION. Most jobs the respondents held were at trade and industrial businesses (34 percent combined) and at businesses involving the distribution and sale of products (21 percent). The industrial nature of Pontiac and its identity as a retailing center for the area are borne out by these statistics. Further, the number (23 percent) of work experience only respondents employed in the general business category is nearly three times that for all respondents (8 percent). The proportion of No Prep respondents employed in home economics-health related businesses (23 percent) is higher

than for the total respondent group (16 percent). And, the percentage of respondents with both vocational credits who work for trade and industrial businesses (42 percent) exceeds that for all groups (34 percent). Respondents were most likely to work for businesses employing eleven to forty-nine employees (34 percent) or employing 100 or more (30 percent). This pattern holds regardless of Job Preparation background, especially for those with no Job Preparation background.

FIRST JOB EARNINGS. The range of income on the respondents first jobs was from fifty cents to $7.10 per hour. The median was $2.00 per hour, the minimum wage in 1972. Those with both vocational credits and work experience were more likely, than those with other Job Preparation backgrounds, to be in the lowest quarter of the wage distribution (34 percent) or in the highest quarter (30 percent). Those with only work experience were more likely to be found in the two lowest quarters (61 percent).

METHOD OF OBTAINING FIRST JOB. Forty-seven percent of the respondents reported they obtained their first jobs "on my own". One-third (33 percent) "got help from parents, relatives or friends". Respondents with only work experience were the most likely to utilize school-related sources of help (42 percent), while one-fifth (21 percent) of the VC-WE Prep respondents got help from school sources. Non-work experienced respondents, No Prep and VC Prep, obtained less help from school sources (18 percent and 14 percent

respectively). Most respondents, therefore, obtained help from non-school sources, especially parents and relatives, while the largest proportion reported they obtained their first post high school job without assistance.

ALL POST HIGH SCHOOL JOBS. When all post high school jobs are considered (rather than only the first) the largest proportion are in the trade and industrial area (30 percent) with approximately equal distributions in business, distributive education, and health-home economics related jobs. Those with no Job Preparation were more likely to have health-home economics related jobs (32 percent), while those with only vocational credits and those with both credit and work experience were more likely to have trade and industrial jobs (31 percent and 44 percent respectively).

Most of these jobs were full-time (78 percent). Those with No Prep were the least likely to have had full-time jobs (65 percent), and those with both work experience and vocational credits were most likely to have had full-time employment (84 percent).

RELATIONSHIP OF POST HIGH SCHOOL JOBS TO COURSES OF STUDY. Slightly more respondents (27 percent) with both credits and work experience have had jobs "directly related" to their high school courses of study then have all respondents (19 percent). Those with no Job Preparation were more likely than others to have had jobs "not related" to their high school courses of study.

REASONS CITED FOR LEAVING JOBS. Most respondents (42 percent) cited reasons for leaving a job since graduation that we categorized as desire to "change their life style" (e.g.,go to school, move away, take a vacation, seek other training, marriage). One-fourth of all reasons cited were to go to school. Over one-third (35 percent) were categorized as a "voluntary change of job" (e.g., get better pay, promoted, quit). Only 17 percent of the reasons cited were categorized as "involuntary loss of job" (e.g., laid-off, business closed, job ended), and only 6 percent involved "personal" reasons such as pregnancy, health, or transportation problems. These data, while possibly self-serving or unclear at times, clearly indicate that the respondents were (in 1974-75) not drastically affected by the national economic problems; most of those who left their jobs did so to make a voluntary change in their life style or job, especially to go to school.

Those with no Job Preparation were more likely to cite "change in life style" reasons for leaving a job (61 percent) as did those with only work experience (73 percent). Those with only vocational credit preparation were most likely to cite "voluntary change of job" reasons (49 percent), and those with both vocational credits and work experience had the highest proportion of those who involuntarily lost their jobs (28 percent).

PRESENT EMPLOYMENT SITUATION. One-half (50 percent) of the respondents reported that they were currently (January 1975) working full-time (30 hours or more per week). This was consistently true for all those with some Job Preparation background. Of those with no Job Preparation, only 34 percent were employed full-time; one-fifth of this group were not working and going to school full-time as compared to only 11 percent for all respondents. Seventeen percent of the No Prep group were also working and going to school. Twelve percent were unemployed and looking for work. However, 18 percent of those with only a vocational credit background were in this status compared to 3 percent of the work experience only respondents and 9 percent of those with both vocational credits and work experience.

PRESENT OR MOST RECENT JOB. There is a strong relationship between Job Preparation background and earnings per hour on the respondents' present or most recent job. Nearly two-thirds (65 percent) of those with both vocational credits and work experience are in the upper half of the income distribution, while those with only work experiences are least likely (30 percent) to be in the upper half. Those with No Prep or only vocational course preparation are about equally divided into the upper and lower halfs (53 percent and 50 percent respectively in the upper half).

RATINGS OF CURRENT EARNINGS. Only 10 percent of the respondents felt that their current income was "impossible to live on", but 27 percent did think it was "barely enough" to

meet their needs. Those with both vocational credits and work experience preparation were most likely to rate their earnings as "enough to have some extras" (22 percent) or "enough to have extras and save some" (19 percent). The work experience only respondents and those with no preparation were least likely to rate their earnings as "enough" and more likely to rate it as "impossible" (14 percent and 11 percent respectively) or "barely enough to meet needs" (32 percent and 38 percent respectively).

One-fourth or more of all respondents also rated their chances for increased wages (other than normal or cost of living increases) as "poor" or "none at all." Roughly one-third of each Job Preparation group thought their chances for wage increases were "good" or "excellent." However, those with no Job Preparation were more likely to think they had no chance for wage increases (19 percent) compared to 14 percent for all respondents, or that their chances were "excellent" (14 percent) compared to 10 percent for all respondents. Those with both vocational credits and work experience had the most even distribution of responses from "none" to "excellent."

JOB SATISFACTION. Overall, respondents were satisfied with their current or most recent jobs. Nearly four-in-ten (39 percent) reported themselves as "satisfied" and over one-fifth (22 percent) said they were "very satisfied." There is a relationship between work experience and general job satisfaction. Those with both work experience and vocational courses (32 percent) were most likely to be "very satisfied"

with their jobs, but only 19 percent of those with only work experience were "very satisfied." Interestingly, 30 percent of those with no Job Preparation were "very satisfied," while only 12 percent of those with only a vocational course background were "very satisfied" with their jobs. Approximately an equal number from each Job Preparation background category were "dissatisfied" or "very dissatisfied" with their jobs, although, those with the greatest Job Preparation were the least "dissatisfied" (6 percent) of the respondents.

SATISFACTION WITH SEVERAL JOB RELATED ITEMS. Respondents reported themselves "very satisfied" with the people they work with (42 percent), the distance they travel to work (41 percent), the training they are getting (36 percent) and the things they work with at work (32 percent). The lowest number of "very satisfied" responses were indicated for their wages (16 percent), promotion possibilities (19 percent) and hours (23 percent).

Job Preparation background is mildly related to high levels of satisfaction with several job related items. Respondents with no Job Preparation appear to be more generally satisfied than other respondents, particularly those with only a work experience background. The work experience only respondents were "very satisfied" with the people they work with (50 percent) and least satisfied with their promotion possibilities (15 percent), the training they are getting, and their wages (16 percent each). Those

with both work experience and vocational courses were "very satisfied" with the things they do at work and the distance traveled to work (40 percent each); they were least satisfied with their promotion possibilities (13 percent), their hours and working conditions (19 percent each).

JOB SECURITY. The largest groups of respondents (37 percent) felt that their current job was theirs "for as long as I want it," or that it was "one I can depend on for several years" (25 percent). Three-in-ten (29 percent) did feel their job was "uncertain," but less than one percent said their job would definitely "end soon." The No Prep respondents felt highly secure in their jobs with over one-third (36 percent) saying they could depend on it for several years, with those with only vocational credits the least secure (17 percent) as measured by this response. Yet this group also had the highest percentage of response (49 percent) that their job would be theirs for as long as they wanted it.

Combining the two "secure" responses, shows that 68 percent of those with no Job Preparation have "secure" jobs, while those with both work experience and vocational credits have the least security (56 percent). Overall, however, the respondents perceived their current or most recent jobs in January 1975 as secure. Additional research in this area would be beneficial in light of the poor national and local economies of the last year or so (1974-1976).

SEX AND RACE FINDINGS

SELECTION OF COURSES. Males were more likely to report they selected vocational courses because of interests or hobbies (55 percent vs. 28 percent). Females, however, were more likely than males to "want to do that type of work" (37 percent vs. 25 percent) or to be attracted by perceived "good pay and working conditions" (17 percent vs. 1 percent). No difference is noted for blacks and whites.

POST HIGH SCHOOL WORK PLANS. There are substantial differences in the responses of both males and females and blacks and whites about their post-high school work plans when they selected courses. One-fifth (19 percent) said they definitely planned to work in their vocational field after graduation, but one-fourth (25 percent) of the females and 26 percent of the blacks chose this reply. More blacks and males (34 percent) also said they were not planning to work in the field of training, although they qualified their replies by saying they were not really certain.

KIND OF JOB WANTED AFTER GRADUATION. No important differences are found between blacks and whites in regard to the kinds of post-high school jobs wanted. One-fourth (25 percent) did not plan to get a job after graduation. About one-third (33 percent) did plan to get a job directly related to vocational courses studied in school. This pattern also holds true for males and females. Males, less likely to have planned to get a job

slightly related to their courses than were females (19 percent vs. 34 percent). Conversely, more males (24 percent) said they would get a job unrelated to their course work than did females (6 percent).

VOCATIONAL COURSES AND CONFIRMATION OF JOB CHOICE. Blacks and males were less likely to report that the vocational courses they took confirmed their job choices (22 percent of the males and 23 percent of the blacks) compared to 32 percent of the total group. Females were most likely to perceive this effect of vocational education.

IMPORTANCE OF SEVERAL FACTORS IN POST-HIGH SCHOOL PLANS.

Blacks (43 percent) were more likely to rate parents and relatives as very important in their post-high school plans compared to whites (32 percent). No difference was noted for sex.

Blacks (66 percent) and females (58 percent) were more likely to rate their friends as not important than were whites (51 percent) or males (47 percent).

Males (22 percent) were more likely than females (14 percent) to rate their Co-op teacher or employer as very important. No difference was found for race.

More females (60 percent) than males (49 percent) said their high school counselor or teachers were not important to their post-high school plans. Race was not significant.

Sex was unrelated to ratings of importance of work experience (not necessarily WEP). Blacks (33 percent) were more likely to rate it as very important than were whites (25 percent); and also more likely to rate work experience as not important (38 percent) compared to whites (30 percent).

Whites (78 percent) and females (67 percent) were most likely to rate their NEOVEC teacher or counselor as not important compared to males (55 percent) and blacks (44 percent).

Blacks were over twice as likely as whites (48 percent vs. 21 percent) to rate their school subjects as being important while whites (28 percent) were more likely to rate subjects as not important. Males were also more likely than females to rate school subjects as not important (32 percent vs. 20 percent).

UNOFFERED COURSES WANTED IN HIGH SCHOOL. No differences were found in response to this question. Over six-in-ten of all groups thought these were unavailable courses they wanted in high school.

HIGH SCHOOL EMPLOYMENT. Seven-in-ten (72 percent) reported they had worked during high school for one month or longer. More males (88 percent) reported working than did females (61 percent). No difference was found between blacks and whites.

POST-HIGH SCHOOL EMPLOYMENT. Nearly all (96 percent) said they had been employed since graduation; all males (100 percent), 94 percent of the females, 97 percent of the whites, and 92 percent of the blacks.

TIME BETWEEN GRADUATION AND FIRST JOB. Nearly three-fourths (74 percent) had their first job within two months after graduation; this was not as true for blacks (58 percent) compared to whites (80 percent). No difference was found for sex.

PARENT, RELATIVE, OR FRIEND IN SAME LINE OF WORK. One-third (33 percent) of the males had a parent or relative in the same field compared to 17 percent of the females. Whites were more likely to have parents, relatives, or friends, in the same line of work (75 percent of blacks did not compared to 55 percent of whites).

INCOME ON FIRST JOB. Males were more likely to be in the upper half ($2.00 and over) of the income distribution on their first job (72 percent males, 41 percent for females). Interestingly, blacks (64 percent) were more likely to be in the upper half than were whites (53 percent).

HELP GETTING FIRST JOB. The largest group (47 percent) reported they got their first job on their own (slightly fewer blacks 41 percent, than whites, 48 percent). Fewer blacks (22 percent) got help from parents, relatives, or friends than did whites (37 percent). One-fourth (24 percent) of the blacks received help through the co-op program compared to ten percent of the whites; blacks were more likely to report getting first job help from a school source. No difference was found for sex.

AVERAGE HOURS WORKED PER WEEK. No major difference was found by race, although more blacks reported working over forty hours. Females, however, were more likely to work less

than forty hours per week on their job (39 percent) than were males (15 percent).

INCOME ON CURRENT OR MOST RECENT JOB. Males and whites tended to be associated with higher income than females and blacks. Twice as many males (72 percent) as females (36 percent) were found in the upper half of the income distribution; whites more than blacks (55 percent vs. 45 percent). Overall, there is no relationship between race and perception of adequacy of wages. Males did tend to rate their wages as better than did females; 27 percent of the males said their earnings were "enough to have extras and save some", but only 9 percent of the females said this. One-half of the blacks rated their chances for wage increases as "fair" compared to only 28 percent of the whites; whites were slightly lesss optimistic rating their chances as "poor" or "none at all" more often. Males were more optomistic then females; 16 percent of the males rated their chances as "excellent" and 30 percent said they were "good".

JOB SATISFACTION. Females and whites were more satisfied with their current or most recent job than were males and blacks. While more males said they were very satisfied (26 percent), more also said they were dissatisfied (17 percent). More females reported they were satisfied with their job (47 percent) than males (30 percent). Three times more whites then blacks reported they were very satisfied with their job (25 percent vs. 8 percent). About the same number of blacks and whites said they were satisfied at work.

When job satisfaction is probed more extensively, males continued to report themselves as very satisfied more than did females on seven of eleven items. Females registered stronger dissatisfaction than males with wages, fringe benefits, and promotion possibilities. Whites were more often satisfied than were blacks on each of the eleven items.

SECURITY OF CURRENT JOB. There were no major response differences in general for sex or race. Blacks did indicate more than whites that their current job was secure and was theirs for as long as they wanted it (48 percent vs. 37 percent).

RESPONDENTS' PRESENT SITUATION. Males and whites were slightly more likely than females and blacks to be working full-time. Males were also slightly more likely to be going to school full-time or to be in the military service. Females were more likely to report that they were working part-time (10 percent), or they they were either looking (14 percent) or not looking for work (13 percent).

MARITAL AND PARENTHOOD STATUS. More blacks (78 percent) and males (78 percent) were still single (never married) then whites (64 percent) and females (62 percent). Less than one percent had been divorced or widowed. Three-in-ten (30 percent) of the graduates were parents. Females (37 percent) and blacks (37 percent) were more often parents than males (19 percent) and whites (27 percent). Most of the parents had only one child.

In summary, Pontiac high school students are extensively involved in vocational education courses and work experiences. They enroll in a wide variety of vocational courses for reasons that indicate an early orientation toward "going to work". Work experienced graduates plan to get jobs after high school related to their vocational courses. Their career/job choices are remarkably stable from tenth grade through graduation with few indicating that vocational programs "changed" their work choice. Parents and relatives, school subjects, and work itself are the most important influences on their post school plans

Most students work at some job during high school that lasts one month or longer and have worked full-time since graduation. High school jobs, which are school sponsored, are most likely the only jobs held by those with work experience. Those with work experience start their jobs very soon after graduation but do not earn significantly more or less than other graduates -- starting pay is universally low. Work-experienced graduates are likely to be earning more than others on their current or most recent job and to rate their pay as "enough" or better.

Our overall conclusion is that graduates with work experience are not dramatically different from other graduates and certainly not on any "negative indicators". Graduates with both vocational course work and work experience consistently "do better" than those with only work experience and certainly as well as those with no Job Preparation. Work experienced graduates are work-oriented, able to get jobs they like without extreme difficulty and a minimum of assistance, earn an adequate income, and have secure jobs.

CHAPTER III

DESCRIPTION OF THE 1972 GRADUATES AND THEIR VOCATIONAL BACKGROUNDS

GENERAL DESCRIPTION

The 1972 graduating class from Pontiac's two high schools numbered 1,023. They were a diverse group as might be expected in so large a population. Over half (52.7 percent were males and 47.3 percent were females; 60.9 percent were white, 34.8 percent were black, 4.0 percent were Latino, and 0.3 percent were identified as American Indian, Oriental or members of other groups. Three-fourths (74 percent) took at least one vocational class during high school, and one-third (32 percent) participated in the Work Experience Program.

Certain background data were gathered on each survey respondent from school district records as well as from the questionnaire. Based on these background data, we can create a general description of the 1972 graduates as they are two and one-half years after high school.

More females responded to this survey than did males (58.0 percent vs. 41.2 percent), and more of the respondents were from Northern High School (57.9 percent) than from Central High (42.1 percent). Racially, 67.3 percent

were white, 23.7 percent were black, 1.6 percent were Latino, and less than one percent were Oriental; none were American Indian. We were unable to determine accurately the racial identification of 6.7 percent of the respondents. Some respondents removed or obliterated the code number on their questionnaire thereby obscuring their identity. Few discrepancies in the district's data on sex and race were encountered; those which could not be resolved were recorded as missing data. Future research instruments should provide for the gathering of these data directly from respondents. As can be seen from previously presented data, our respondents are slightly over-represented by females and whites. This is noted at those points in the report where these biases might be significant.

The respondents ranged in age from as young as 19 to as old as 24. The majority (72.2 percent) were born in 1954; thus, they were at least twenty years of age at the time of the survey (December 1974 through January 1975). One-fifth (20.7 percent) were born in 1955 with the remaining 7.1 percent born as early as 1951 and as late as 1955.

Nearly one-third (31 percent) of the respondents were married, while the majority were still single (68.5 percent). Less than one percent (0.5 percent) were divorced and none were widowed. Thirty percent (30.3 percent) said they were parents, and most of these graduates (87.2 percent) reported that they had only one child; 7.8 percent of the

parent-graduates reported they had two children; equal numbers (2.5 percent) reported they had three or four children. While these data do not seem out-of-line for this age group, we may have a slight over-representation of married graduates who are parents in light of the number of female respondents.

The respondents' grade point averages (from district records) ranged, on a four-point scale, from a low of 1.2 to a high of 3.9. The mean and median GPA were both 2.48 (the mode was 2.2, N=65). Their individual "rank" in their graduating classes ranged from one to 521.

In addition to the above data, we obtained the percentile scores for each respondent on the eight areas of the Differential Aptitude Test. The DAT is generally administered to all Pontiac students in the ninth grade for use by high school student services staff in academic and vocational counseling. The range of DAT scores received by the respondents was from the first percentile to the ninety-ninth on four of the nine scores, and it was nearly as wide for the other five scores (see Table 1). In general, the respondents' mean and median DAT scores are below the test norms (50th percentile) except for the Clerical Speed and Accuracy Test (mean=54.6; median=54.8). The lowest mean/median percentile scores were on the two Language Usage Tests, Spelling and Grammer (means=37.7 and 33.8 respectively; medians 30.6 and 34.0 respectively). As measured by DAT scores, Pontiac's 1972 graduates scored below the national norms on seven of the eight test areas,

especially in Language Usage (Spelling/Grammer). These generally low DAT scores, may be an indicator of potential employment difficulties, especially on jobs involving substantial reading and writing skill.

TABLE 1

DIFFERENTIAL APTITUDE TEST SCORES FOR RESPONDENTS BY TEST AREA (PERCENTILES)

Test Area	Range Lo	Range Hi	Mean	Median	Weighted Base
Verbal Reasoning (VR)	1	95	42.1	39.4	645
Numerical Ability (NA)	1	97	42.4	40.5	645
Verbal Reasoning/Numerical Ability (Total)	1	97	41.3	40.2	645
Abstract Reasoning (AR) ...	3	99	46.5	40.2	645
Clerical Speed and Accuracy (CSA)	1	99	54.6	54.8	642
Mechanical Reasoning (MR)	1	99	41.7	40.8	645
Space Relations (SP)	1	99	46.8	45.3	645
Spelling (LU-I)	1	97	37.7	30.6	645
Grammar (LU-II)	1	97	33.8	34.0	645

Additional background data were obtained from district records on the respondents' attendance in the tenth, eleventh, and twelfth grades and their parent's educational levels. We had hoped to develop an indicator of socio-economic status (SES) from these data to test certain assumptions about vocational graduates, such as their ability to obtain and hold employment. These data are not reported here, however, because we are not confident of their accuracy. Because of subjective attendance procedures, and the difficulty of verifying any parent data found in student records, we cannot use these data. Future studies that require a SES measure will necessitate the development of an indicator that does not rely on school district records associated with individual students.

VOCATIONAL COURSE CREDITS

In 1972, the vocational education program in Pontiac was well established. Students in the regular high school program were able to elect courses in areas ranging from general office practices to wood shop and welding. Indeed, these courses were popular with high school students. In addition, many other courses in the two local comprehensive high schools were identified as "vocational". If all of these courses are considered part of vocational education, more than three-fourths of the graduates had participated in vocational education courses. Many, however, had enrolled in only one class for one semester. It is our belief that this definition of a vocational student is too

inclusive. For the purpose of this study, only credits earned in courses specifically labeled as vocational and eligible for reimbursement from the state were defined as vocational. These criteria eliminated such classes as Beginning Typing, Boy's Foods, and Child Development from our list of vocational courses, a slight restriction of our definition.

Moreover, we see vocational education as an ordered course of training to develop a specific set of skills and attitudes related to an occupational area. Consequently, we decided to restrict further our definition by including only those students who had earned at least one full credit in vocational courses.* Using this definition, nearly six-in-ten (59.1 percent) of the respondents had earned at least one full credit in a reimbursed vocational course (see Table 2). Specifically, over one-fourth (26.6 percent) of the respondents had one or more credits in the trade and industrial area. An approximately equal number had one or more credits in business (16.7), distributive education (14.3 percent), and home economics and health (14.2 percent). The combined percentage of these four areas (71.8 percent) exceeds the above reported level of those with one or more vocational credits (59.1 percent) because there were many cross-area enrollments. That is, some students earned one or more

---

*A student earns one-half credit by completing a course which meets one hour per day, five days a week, for one semester.

credits in two or more of the four vocational areas. Thus, we can see that vocational course work was an important part of the curriculum for the high school graduate of 1972.

TABLE 2

RESPONDENTS WITH ONE OR MORE VOCATIONAL COURSE CREDITS BY AREA

	Total	100.0%
	Weighted Base	(738)

WORK EXPERIENCE PROGRAM

In addition to vocational courses, one-third of the 1972 graduates participated in the Work Experience Program (often termed Co-op).* This high school credit program provides on-the-job training related to the students' vocational course experience. According to the Pontiac School District, this field experience is a highly desirable aspect of vocational education. The Cooperative Education

> ...approach to learning draws upon community resources to expand educational programs beyond the walls of the classroom or laboratory. Students benefit from cooperative education programs by receiving a supervised experience to allow for a smooth transition from school to work. (School District of the City of Pontiac, 1974:1)

Not all students are eligible to participate in the Work Experience Program. Those students selected for this program (1) were 16 years of age or older, (2) were pursuing a vocational objective, (3) had a good attendance record, and (4) completed or were taking a preparatory program of instruction prior to entering the program and had passed a set of performance objectives for the level of employment which the student was entering. Other guidelines provide for the selection of the training station, the work of the coordinator, the related instruction, the training agreement/plan, student evaluation, and the responsibilities for the student and the employer.

---

*As mentioned earlier, the terms "work experience" and "Co-op" are used synonomously in this report, since all of the 1972 WEP participants were Co-ops. Other types of field experiences are now part of the Work Experience Program.

The sequence of events for a typical Work Experience Program graduate in 1972 was as follows:

1. Complete introductory and advanced course work during sophomore or junior year in a chosen vocational area
2. Meet with coordinator during junior year to develop plan for work experience
3. Secure parental, teacher, and school approvals to participate and then complete application for program
4. Interview for job(s) and complete approved training agreement/plan with coordinator and employer
5. Complete school courses and work experience program
6. Graduate from high school and obtain job placement

Almost one-third (32 percent) of the 1972 graduating class had participated successfully in one of the programs from these areas: business, distributive education, home economics-health, and trade and industrial (see Table 3). Work Experience Program placements in the areas of business (10.8 percent), distributive education (9.0 percent), and trade and industrial (7.9 percent) involved about equal number of students. Home economics-health placements (4.2 percent) involved fewer students.

TABLE 3

PARTICIPATION OF 1972 GRADUATES IN WORK EXPERIENCE PROGRAM BY AREA

Work Experience Graduates		32%
Business	10.8%	
Distributive Education	9.0	
Home Economics-Health	4.2	
Trade and Industrial	7.9	
Non-Work Experience Graduates		68%
Total		100%
Weighted Base		(1023)

Typical business and distributive education placements were secretarial and clerical work in offices, sales and cashier work in retail stores, and stock room work in a variety of businesses. Typical home economics and/or health placements were as cooks or waiters/waitresses in restaurants, child care assistants in day care centers, and nursing assistants in hospitals and nursing homes. Trade and industrial placements were highly varied for each area of course work and included sales, repair-maintenance, and production in such fields as auto body repair, drafting, electricity, welding, and auto mechanics.

A majority of vocational educators would likely see it as ideal if most vocational students, with sufficient credits and preparation, participated in the Work Experience Program. As the data above shows (Tables 2 and 3), substantial numbers of graduates did have sufficient credits to participate in the Work Experience Program, but did not. Over one-sixth (16.7 percent) of the respondents had one or more credits in business, but only one-tenth (10.8 percent) had a WEP placement in this area. Equal numbers of respondents had one or more credits in distributive education or home economics-health (14.3 percent and 14.2 percent respectively); but only 4.2 percent of the respondents had a placement in the home economics-health field, while 9 percent had a distributive education WEP placement. Finally, over one-fourth (26.6 percent) of the respondents had one or more credits in trade and industrial courses, but a mere 7.6 had WEP placements in this area.

There are several possible reasons for this. Historically, there has been a limit to the number of available placement stations either because of the local economy or employer reluctance to become involved in the program (see Slawski and Packard, 1976:28-32), as well as a limited number of school district coordinators to supervise students out-on-the-job. Furthermore, students without adequate related instruction (in the estimation of the instructor), or lacking transportation or parental permission cannot be placed. Finally, some students who enroll in vocational courses are not interested in working while in school.

Regardless of the validity of these possible explanations for non-participation, it is obvious that substantial numbers of credit-qualified vocational students did not participate in the Work Experience Program while in high school.

JOB PREPARATION CONCEPT*

As mentioned above, all vocational course credits were grouped into one of four areas: business, distributive education, health and home economics, and trade and industrial. For the purpose of our analysis of the Job Preparation of the graduates, specific vocational areas have been ignored in favor of a dichotomous treatment. Therefore, a respondent is considered to have vocational credit, only if he has one or more credits from any combination of four areas. As Table 3 indicates, there was substantial cross-area enrollment in vocational courses. Therefore, we thought it would be most beneficial to examine these data according to a level of vocational course credits (one or more) rather than by course area. It was not the primary intention of this project to investigate the effects of course credits or course areas. Rather, our interest was the Work Experience Program and its effect on vocational students.

---

*I am indebted to Edward Slawski, of this department, for the suggestion of this analytical concept. His assistance in the development of the presentation of these data is greatly appreciated by the author.

Students with only course credits are a part of this analysis for comparative purposes, since course work with or without a field work experience is a form of Job Preparation.

Likewise, we chose to dichotomize work experience into participation or non-participation. This was done so that we could create a summary concept which would indicate the nature of a respondent's Job Preparation. While analysis of these data by specific areas of work experience would be of interest, it is our view that the primary analytic concern was the effect of <u>any</u> participation in the Work Experience Program.

By combining our measures of vocational course credits and Work Experience Program participation, we constructed our indicator of Job Preparation background. From Table 4, we can see that about one-third (31.4 percent) of the graduates had participated in the Work Experience Program, and nearly six-in-ten (59.1 percent) had one or more vocational credits. Over four-in-ten (41.4 percent) had one or more vocational credits but no work experience, since many students take vocational classes without ever participating in the Work Experience Program. Far fewer of the graduates (13.7 percent) had work experience credit without having one or more vocational credits; this group fulfilled only the related vocational course requirement (one-half credit) before they had their work experience. Almost one-sixth (17.7 percent) had both vocational credits (one or more) and work experience as part of their Job Preparation background.

TABLE 4

JOB PREPARATION BACKGROUND OF RESPONDENTS

WORK EXPERIENCE BY VOCATIONAL COURSE CREDITS

Work Experience Program Participation	Vocational Course Credits*		
	No	Yes	Total
Yes	13.7%	17.7%	31.4%
No	27.1%	41.4%	68.5%
Total	40.8%	59.1%	99.9%
Weighted Base			(738)

*One or more credits.

Job Preparation, therefore, is a summary of the nature of a graduates vocational education background. One group had no Job Preparation (No Prep) in terms of vocational courses or supervised work experience. A second group, those with only vocational courses (VC Prep), and a third with only work experience (WE Prep), had an intermediate level of Job Preparation. The fourth group, those with both vocational courses and work experience (VC-WE Prep), had the broadest form of school-sponsored Job Preparation.

Our primary interest in this project were those graduates with work experience. In Chapter V, we will examine the outcomes of this survey in greater detail utilizing the Job Preparation concept to identify some of the effects of participation in the Work Experience Program.

CHAPTER IV

OUTCOMES FOR 1972 GRADUATES

WORK HISTORY AND EXPERIENCES

This description of the 1972 graduates begins with a presentation of their work history and work experience before and after graduation. Most of the graduates had worked during school. When they were asked if they had been "employed in any job during high school which lasted one month or longer", 72.3 percent said "yes" (Q.10).

HIGH SCHOOL JOB HISTORY. Those who said they had worked at least one month while in high school were asked to complete a chart describing their high school job history (Q.11). Table 5 indicates a fairly even distribution of their jobs when they are categorized into the four Work Experience areas and miscellaneous. Nearly seven-in-ten respondents (69.5 percent) indicated they had held at least one job verifying our data from Question 10 above; one-fourth (25.3 percent) indicated two or more jobs (data not presented).

The balanced grouping of jobs among the five categories seems to indicate that the existing employment opportunities and the organization of the vocational education programs

TABLE 5

have a compatible and functional relationship.

Question 11 also asked them to indicate whether the job was Work Study, Co-op, or neither of these. Co-op (Work Experience Program) accounted for 38 percent of the jobs held, and Work Study accounted for 11.2 percent. The largest group (47.8 percent) said they had held a job which was neither Work Study nor Co-op. A few (3 percent) said they did not know enough about their jobs to categorize them. The next part of Question 11 asked the graduates to state the year(s) they held their

TABLE 6

TYPE OF JOB(S) HELD BY RESPONDENTS DURING HIGH SCHOOL

Q.11 (2)	Was job Work Study, Co-op, neither, or don't know?	
	Work Study	11.2%

high school job(s). As Table 7 shows, nearly one-half (47.5 percent) held their job or jobs during 1972, their senior year. Three-in-ten (30.1 percent) had jobs during their junior year (1971). Approximately one-sixth (16.1 percent) held their first job during their sophomore year in high school (1970). For the majority of our respondents, work began during their junior and senior years of high school.

TABLE 7

YEAR RESPONDENT HELD FIRST AND SECOND JOB WHILE IN HIGH SCHOOL

Q.11 (3) Year held.			
	First Job	Second Job	Total
1972 (Senior)	44.9%	54.8%	47.5%
1971 (Junior)	28.9	33.8	30.1
1970 (Soph.)	16.1	6.4	13.6
1969 (Fresh.).....	8.9	1.9	7.1

1967	1.0	3.1	1.5
Total	99.8%	100.0%	99.8%
Weighted Base	(492)	(169)	(661)

The last section of Question 11 asked the respondents about the relationship of their jobs to their school courses of study. Over one-fifth (21.6 percent) of the jobs held were thought by the respondents to be "directly related" to their courses of study, while another fifth (19 percent) thought their jobs were "slightly related" (see Table 8). Almost six-in-ten (57.4 percent) said their jobs were not related to their high school courses of study. Table 8 also shows that for those who had a second job, a higher number (27.4 percent) said this job was "directly related",

TABLE 8

RELATIONSHIP OF FIRST AND SECOND HIGH SCHOOL JOB(S) TO RESPONDENTS COURSE OF STUDY

Q.11 (4) Was job directly related, slightly related, not related or don't know to your school course of study?

Relationship	First Job	Second Job	Total
Directly related	19.6%	27.4%	21.6%
Slightly related	21.1	13.2	19.0
Not related	56.8	59.4	57.4
Don't Know	2.6	0.0	1.8
Total	100.1%	100.0%	99.8%
Weighted Base	(495)	(172)	(667)

than said their first job was "directly related" (19.6 percent).

In summary, a majority of respondents had held jobs for one month or longer while they were in high school. These jobs were fairly evenly distributed in regard to vocational areas; a majority of them, however, were neither Work Study nor Co-op jobs. Most respondents began to work during their junior and senior years of high school at jobs that were not related to their high school courses of study.

FIRST POST HIGH SCHOOL JOB. In addition to the respondents' high school work histories, information was requested about how they obtained their first post high school jobs and about the quality of their work experience since graduation. In response to Question 12, nearly all of the respondents (93.4 percent) indicated that they had been employed full-time or part-time since high school graduation. Very few (3.7 percent) said they had not been employed; 2.9 percent did not answer the question.

Those who said they had been employed since graduation were asked how soon after graduation they obtained their first jobs (Q.13). Over one-third (36 percent) said they had continued jobs they already held; 18.1 percent said they had started to work immediately after graduation; and one-fifth (20.2 percent) said they had begun employment from one to two months after graduation (see Table 9). Thus, of those who had been employed, almost three-fourths (74.3 percent) began their first jobs within two months of graduation. The remaining one-fourth got their jobs three to six months after graduation (13.2 percent) or after seven months (12.6 percent).

In anticipation of the large percentage of graduates who had worked since graduation, the questionnaire sought additional information about how the respondents obtained their first jobs and about their rates of pay. Our next question (Q.14) asked whether or not respondents had parents, relatives, or friends employed in the same lines

TABLE 9

TIME BETWEEN GRADUATION AND RESPONDENTS' FIRST JOB

Q.13 How soon after graduation did you get your first job?

I continued a job I already had	36.0%
I started immediately after graduation	18.1
I started between 1 and 2 months after graduation	20.2
I started between 2 and 6 months after graduation	13.2
I started more than 7 months after graduation	12.6
Total	100.0%
Weighted Base	(690)

of work which the graduates had entered (see Table 10). Almost six-in-ten (58.1 percent) replies were negative; about one-fourth (24.2 percent) indicated parents or relatives, and 17.7 percent indicated friends in the same lines of work. A majority, apparently, did not get their first jobs primarily because of the influence or help of relatives or friends.

TABLE 10

RESPONDENTS WITH PARENTS, RELATIVES, OR FRIENDS IN SAME LINE OF WORK

Q.14 Did you have a parent, relative, or friend in the same line of work that you entered?

No	58.1%
Yes, Parent or Relative..	24.2
Yes, Friend	17.7
Total	100.0%
Weighted Base	(688)

A third question (Q.18) provided additional information on how graduates obtained their first jobs. The largest group (44.5 percent) reported they located their jobs on their own (see Table 11). Slightly less than one-third (31.3 percent) indicated help from parents, relatives or friends. Thus, while approximately 42 percent cited parents, relatives or friends in the same line of work (see discussion above), about ten percent fewer reported help from these sources. Slightly more than one-seventh (12.9 percent) listed help from the Co-op Program, 2.7 percent received help from the vocational school (few respondents attended NEOVEC),

TABLE 11

HELP RESPONDENT RECEIVED IN OBTAINING FIRST JOB

Q.18 How did you get your first job?

I got the job on my own	44.5%
I got help from parents, relative or friend	31.3
I got help through the Co-op program	12.9
I got help through Vocational School	2.7
I got help through high school teacher or counselor	3.6
Other sources	5.0
Total	100.0%
Weighted Base	(690)

3.6 percent were helped by high school teachers or counselors, and 5 percent cited other sources. Graduates probably received help from a combination of these sources. We view their responses to this question as their perception of the "most important" sources of assistance in obtaining their first employment.

It is important to note the high percentage (44.5 percent) who stated that they obtained their first jobs

"on my own". This response may be interpreted in several ways:

1. A reluctance to ask for help
2. A desire to be independent ("on one's own")
3. A lack of confidence in assistance from others or, more optimistically
4. An indication that schools are preparing many students to locate their own jobs

Any of these conclusions would be speculative, at this point. Clearly, however, a majority of respondents reported that they located their first post high school jobs without assistance of the school.

We asked our respondents to state the names or titles of their first jobs (Q.15). Nearly all reported their jobs in sufficient detail to categorize them in one of five areas related to high school vocational education (see Table 12). Over one-fourth (27.8 percent) of these first jobs were trade or industrial in nature, while one-fifth (21 percent) were jobs related to distributive education and health-home economics. The business area, primarily secretarial and clerical, accounted for 18.7 percent of these jobs, while "other" jobs were held by 10.7 percent of our respondents. Our next question (Q.16) asked for the name of the employer or company of the graduates' first jobs. These data were coded by the type of business and the number of employees; the additional information

TABLE 12

Total	100.1%
Weighted Base	(691)

necessary to do this was gathered through telephone calls or interviews. Table 13 summarizes the types of businesses where the graduates obtained their first jobs.

While the largest group was employed by distributive/retailing/sales companies (21.3 percent), the trade and industrial companies combined to account for over one-third of the first jobs (33.6 percent). Nearly one-sixth (15.9 percent) held their first jobs at a home economics related concern, such as a restaurant, a clothing repair facility, or a day care center. Nearly one-tenth (9.7 percent) were employed by health services

establishments as were those in service occupations (10.9 percent). The smallest group (7.6 percent) were employed in general businesses, primarily small shops.

These businesses also were categorized according to number of employees (see Table 14). Approximately one-third (33.9 percent) of the first jobs were at companies that employed 11 to 49 people. Almost three-in-ten respondents (29.6 percent), however, worked for large businesses employing 100 or more. About an equal number worked for concerns employing 1 to 10 people (16.8 percent) or 50 to 99 (14.9 percent). Few of the respondents (4.8 percent) were self-employed on their first jobs.

TABLE 14

NUMBER OF EMPLOYEES AT RESPONDENTS' FIRST JOB LOCATIONS

1 to 10	16.8%
11 to 49	33.9
50 to 99	14.9
100 or more	29.6
Other (self-employed)	4.8
Total	100.0%
Weighted Base	(670)

Respondents also were asked to state how much they earned per hour on their first jobs (Q.17). The range of income reported began at a low of fifty cents per hour and reached as high as $7.10 per hour; the median was slightly in excess of two dollars per hour (the minimum wage in 1972). Table 15 shows the distribution of first job earnings per hour in brackets of fifty

---

TABLE 15

RESPONDENTS' EARNINGS PER HOUR ON THEIR FIRST JOBS (in brackets of fifty cents)

Q.17 About how much did you earn on your first job? (Please write in).

Under $1.50	7.4%
$1.50 to 1.99	38.6
$2.00 to 2.49	19.9
$2.50 to 2.99	12.2
$3.00 to 3.49	5.1
$3.50 to 3.99	2.5
$4.00 to 4.49	4.5
$4.50 to 4.99	4.8
$5.00 and over	5.1
Total	100.0%
Weighted Base	(674)

cents. Although well over one-half (54 percent) of the graduates were earning at least the minimum wage with about one-third (32.1 percent) earning $2.00 to $2.99 per hour, the largest group (38.6 percent) were found in the $1.50 to $1.99 bracket. While a majority of graduates were making more than the minimum wage on their first jobs, few (21.9 percent) were earning over three dollars per hour. These first job wages are an indication that Pontiac graduates began their adult work experience at the lower end of the wage scale.

The next question (Q. 19) asked the graduates to list all their post high school jobs and to indicate certain descriptive characteristics for each. They reported jobs in each of the four vocational areas, with over three-in-ten (30.4 percent) in the trade and industrial area (see Table 16). Almost equal members were reported in health-home economics (20.2 percent), distributive education (19.1 percent), and business related jobs (18.7 percent). Over one-tenth (11.5 percent) were categorized as "other" (e.g., teacher aide, police cadet). This distribution indicates that there are definitely jobs in the local areas, available to Pontiac graduates, that are related to the vocational programs offered in the schools. The industrial nature of the local economy as well as high school course enrollment in reflected in the preponderance of trade and industrial jobs.

TABLE 16

AREAS OF POST HIGH SCHOOL JOBS HELD BY GRADUATES

Weighted Base	(1078)

*Combined total of post high school jobs reported.

• Question 19 also asked the respondents to state the relationship of their post high school jobs to their high school courses of study (see Table 17). Nearly six-in-ten (57 percent) of the jobs were identified by our respondents as "not related" to their course of study. Nearly one-fourth (23 percent) however, were thought to be "slightly related" and 19 percent were reported as "directly related"; only one percent of the jobs were not categorized. Data presented above would indicate that most of the jobs

TABLE 17

Total	100.0%
Weighted Base	(1046)

graduates have held, as well as the companies employing them, are related to the high school vocational program. However, responses to Question 19 seem to indicate that a large number of graduates do not move from specific courses of study into jobs directly related to their studies. Further study of the relationship between school vocational programs and the subsequent employment of graduates is needed.

The last section of Question 19 asked the respondents to state their reasons for leaving any of the jobs they have held since graduation (see Table 18). Their verbatim responses were coded into approximately fifty categories

and then recoded into the final categories listed in Table 18. These "reasons" were grouped into four areas which were of interest to this project.

The reader is cautioned in interpreting these data. Some of the reasons given for leaving were impossible to understand or code (e.g., "just because", "it's my business"). In addition, the authors believe that there is a tendency to offer self-serving responses when discussing changes of employment. For example, not one graduate was "fired" from any job. Finally, we must interpret these responses as the respondents' current perceptions of their reasons for leaving jobs. For many, there were probably multiple and/or vague reasons that motivated the decision to leave. As we can see from the table, 41.7 percent of the reasons graduates gave for leaving their jobs indicated a desire to change their life styles; over one-half of the reasons in this area specifically mentioned going to school (24.5 percent). The second largest grouping were those reasons that indicated a Voluntary Change of Jobs. Over one-third (34.9 percent) of the reasons cited fall in this area, particularly getting a "better paying" job (15.7 percent) and "getting a better job" (9.8 percent). Some of these reasons could be interpreted as negative reasons for leaving a job. For example, 3.8 percent of the reasons given were simple "dissatisfaction with the job", and 1.5 percent were "I quit".

TABLE 18

REASONS CITED BY RESPONDENTS FOR LEAVING JOBS HELD SINCE GRADUATION (Some recoding of responses).

Q.19 Reason you left.

Voluntary Change of Job		34.9%
Better pay	15.7%	
Get a better job...	9.8	
Dissatisfied with job...	3.8	
Promoted/Transferred...	2.0	
Returned to previous job...	1.7	
Quit...	1.5	
Become self-employed...	0.5	
Involuntary Loss of Job		17.1%
Laid Off/Bumped	11.8%	
Business closed...	4.5	
Job ended...	0.8	
Change in Life Style		41.7%
Go to school	24.5%	
Moved away...	8.2	
Take a vacation...	5.3	
Seek other training...	1.7

Join military...	0.5	
Personal Reasons		6.3%
Pregnancy	3.2%	
Health...	2.4	
Transportation...	0.8	
	Total	100.0%
	Weighted Base	(662)

The remaining two areas of Table 18 are Involuntary Loss of Job and Personal Reasons. The respondents said, that of the jobs they left, 17.1 percent of their departures were involuntary. The largest number of these job losses were "lay-offs" (11.8 percent). Interestingly, not one graduate reported losing a job by being "fired". Only 6.3 percent of the reasons given were categorized as Personal. While this is the smallest area of reasons given, some of the reasons categorized under other areas may actually conceal personal situations which may have contributed to leaving a job (e.g., quit, moved away, vacation, and join the military).

The latter part of the survey asked several questions about the graduates' current or most recent jobs. Their working hours and wages, their evaluation of their wages, and their chances for increased earnings were explored. Two additional questions asked for descriptions of their present situations (working, school, military) and, for those who were employed, the security of their current job.

PRESENT EMPLOYMENT SITUATION. Nearly one-half of the respondents (49.6 percent) described their present situations as "working full-time" (Q.27). Another 6.3 percent reported that they were "working part-time" (see Table 19). Over one-tenth (11.6 percent), however, reported that they were "unemployed, and looking for work",

TABLE 19

RESPONDENTS DESCRIPTION OF PRESENT SITUATION

Q.27 Which of the following best describes your present situation?

a.	Working full-time (more than 30 hrs. per week)	49.6%
b.	Working part-time (less than 30 hrs. per week)	6.3
c.	Not working - going to school full-time	11.3
d.	Not working - going to school part-time	0.0
e.	Working and going to school	11.0
f.	The military service	2.8
g.	Unemployed, looking for employment	11.6
h.	Unemployed, not looking for employment	7.5
	Total	100.1%
	Weighted Base	(675)

while 7.5 percent also said they were "unemployed but were not looking for employment". Eleven percent said they were "unemployed and were going to school", and about an equal number (11.3 percent) said they were "not working and going to school full-time". Only 2.8 percent said they were "in the military service." If all the

items that indicate the respondent is employed are combined, we find that nearly seven-in-ten (69.7 percent) are working.

PRESENT OR MOST RECENT JOB DESCRIPTION. The respondents also reported their hours and wages on their current or most recent jobs. Nearly seven-in-ten (69.3 percent) reported they were employed forty or more hours per week on their current or most recent job, (Q.20), (see Table 20). The actual range of hours reported per week was from a low of eight to a high of seventy-five hours; the largest response category was forty hours per week, with over

---

TABLE 20

AVERAGE HOURS WORKED PER WEEK ON PRESENT OR MOST RECENT JOB

Q.20 On the average, how many hours do (did) you work per week on your present or most recent job? (Please write in.)

19 hours or less...	5.7%
20 to 29 hours...	10.1
30 to 39 hours...	15.0
40 to 49 hours...	63.5

Weighted Base	(685)

one-half (52.5 percent) citing these hours (the complete distribution is not presented here). We can definitely conclude that while some graduates are employed part-time, the majority of the graduates have had full-time employment since graduation.

In regard to earnings, respondents were asked (Q.21) to state how much they were earning per hour on their current jobs (see Table 21). Compared to their incomes on their first jobs (see again Table 15), where 46 percent earned $1.99 or less per hour, only 7.1 percent currently earned less than $1.99 per hour. Progress was also indicated at the upper end of the wage scale; only 5.1 percent earned $5.00 or more per hour on their first job, while nearly one-fifth (19.1 percent) currently earned this amount. The actual distribution of current earnings per hour was from 60 cents to $8.50, with a median of $3.00 per hour (complete data not presented here. This is an increase in the median of about $1.00 per hour from the first job earnings.

We asked the respondents to rate their current wages (Q.22) on a continuum from low ("impossible to live on") to high ("enough to have extra and save some") (see Table 22). One-tenth (10.3 percent) said their wages were "impossible to live on", and over one-fourth (27.3 percent) said their wages were "barely enough to meet needs". The majority (62.4 percent), however, reported their income was "enough to live comfortable", or even better. One-in-six (16.6

TABLE 21

EARNINGS PER HOUR ON PRESENT OR MOST RECENT JOB

Q.21 Approximately how much do (did) you earn per hour on your present or most recent job? (Please write in.)

Under $1.50...	1.4%
$1.50 to 1.99...	5.7

percent) rated their wages as "good enough to have extras and save some". While a substantial minority indicate they are not earning enough, most feel they have an adequate income.

TABLE 22

RATING OF WAGES ON PRESENT OR LAST JOB

Q.22 On your present (or last job held) how would you rate your wages?

Impossible to live on...	10.3%
Barely enough to meet needs...	27.3
Enough to live comfortable...	30.8
Enough to be able to have some extras...	15.0
Enough to have extras, and save some...	16.6
Total	100.0%
Weighted Base	(689)

In response to the question (Q.23) asking them to rate their chances for increased wages (other than cost of living increases) on the current or most recent job (see Table 23), almost one-third (32.8 percent) said their chances were "fair", and one-fourth (24.2 percent) said "good", while one-tenth (9.7 percent) rated their chances as "excellent". That is, two-thirds (66.7 percent) rated their chances for increased wages as "fair" or better. One-fifth (19.5 percent) rated their wage increase chances as "poor" and 13.7 percent said their chances were "none at all". Although a substantial

TABLE 23

RATING OF CHANCES FOR INCREASED WAGES OTHER THAN COST OF LIVING INCREASES

Q.23 How are (were) the chances for increased wages, other than normal or cost of living increases?

None at all...	13.7%
Poor...	19.5
Fair...	32.9
Good...	24.2
Excellent...	9.7
Total	100.0%
Weighted Base	(673)

number of respondents (one-third) did not feel that they had much of an opportunity to get better pay, the majority (two-thirds) felt that they had a fair chance or better.

Our last question in this series (Q.26) asked the respondents to rate the security of their current jobs (see Table 24). Their responses indicated that a majority of them thought their current jobs were fairly secure. Almost four-in-ten (39.2 percent) said their jobs would be theirs for as long as they want them, and one-fourth (24.6 percent) said they could depend

TABLE 24

RATING OF SECURITY OF CURRENT JOB

Q.26	If you are now employed, how would you rate the security of your current job?	
	It will end soon, forcing me to change positions...	0.1%
	It is one I can depend on for several years...	24.6
	It will be mine for as long as I want it...	39.2
	The job is uncertain, I am unsure about the future...	29.0
	I never thought about it...	6.9
	Total	100.1%
	Weighted Base	(472)

on their jobs for several years. However, 29 percent did rate the future of their jobs as uncertain; few said that their jobs would definitely "end soon". Interestingly, 6.9 percent said they had "never thought about it". These responses are probably based on the graduates' perceptions of their job security. If there is a basis, in fact, for their ratings, we can conclude that most of their job futures are secure.

VOCATIONAL DECISIONS AND WORK ATTITUDES

This series of questions was included to provide some general information about the vocational decisions made by high school students and their work attitudes.

The first question asked whether the respondents had taken "any vocational, co-op, or industrial arts courses in high school?" Since this data was available for each respondent from school district student records, this question served primarily to determine whether the respondent should answer the next four questions which applied only to vocational students. Slightly over two-thirds (67.6 percent) indicated that they had taken at least some vocational courses; this percentage is consistent with data available to us from district records (see Chapter III for a description of respondents' course work background).

SELECTION OF VOCATIONAL COURSES. The next question (Q.2) asked the vocational students why they selected the courses they took (see Table 25). Nearly eight-in-ten (79.7 percent) selected one of the first three responses, indicating that they took the vocational courses for reasons that we characterize as "job oriented". The largest group (39.8 percent) wanted to learn more about the subject because of interests or hobbies, and 31.7 percent wanted to do the type of work for which the course offered training. Another 8.2 percent selected

TABLE 25

REASONS VOCATIONAL GRADUATES SELECTED VOCATIONAL COURSES IN SCHOOL

Q.2 If you took vocational, co-op, or industrial arts courses, why did you select the courses you did?

I wanted to learn more about it because of my interest or hobbies...	39.8%
I wanted to do that type of work...	31.7
Jobs in that field offered good pay and working conditions...	8.2
My parents advised me to take them...	0.0
My counselor or teacher suggested I take them...	2.6
I took vocational courses because my friends took them...	0.6
I preferred vocational courses to other available courses...	9.7
Other reasons...	7.4
Total	100.0%
Weighted Base	(516)

their courses because "jobs in that field offered good pay and working conditions". The remaining 20.7 percent indicated they took the classes for several reasons unrelated to jobs.

To follow-up on the above answer choices, graduates were asked about their post high school plans at the time they selected their vocational courses (Q.3). As Table 26 reveals, approximately one-fifth (18.9 percent) said "Yes, I definitely planned to go to work in that field after high school". More of the respondents (29.6 percent) said "Yes", but they were "not really certain" of this. In combined form, these two choices do represent at least a tentative vocational choice by nearly one-half (48.5 percent) of the respondents.

TABLE 26

RELATIONSHIP BETWEEN VOCATIONAL GRADUATES, VOCATIONAL COURSE SELECTION, AND POST HIGH SCHOOL WORK PLANS

Q.3 At the time you selected your high school vocational courses, did you plan to go to work in that field after high school?

Yes, I definitely planned to work in that field...	18.9%
Yes, but I was not really certain...	29.6
No, but I was not really certain...	24.3
No, I definitely did not plan to work in that field...	12.1
I really did not know what I was going to do after graduation...	15.1
Total	100.0%
Weighted Base	(513)

Several questions were designed to help clarify the post high school plans of vocational graduates. They were asked whether they planned to get a full-time job after graduation, and if so, how it was related to their vocational course work. They were also asked to evaluate the importance of their high school vocational experiences in their career choice. Finally, they were asked to rate the importance of several factors or people on their post graduation plans.

The first question in this series (Q.4) asked the vocational graduates about the kinds of jobs they wanted

TABLE 27

POST HIGH SCHOOL JOB PLANS OF VOCATIONAL GRADUATES

Q.4 If you planned to get a full-time job after your high school graduation, what kind of job did you want?

I planned to get a job:

Directly related to the vocational courses I studied in school...	33.4%
Slightly related to the vocational courses I studied in school...	27.9
Not related to the vocational courses I studied in school...	13.6
I did not plan to get a job after graduation...	25.0
Total	99.9%
Weighted Base	(485)

after graduation, if they planned to go to work (see Table 27). Their response to this question indicated that while the vocational graduates had a strong desire to get full-time jobs after graduation, one-fourth (25 percent) reported that they had not planned to do so. Almost two-thirds (61.3 percent) said they had planned to get full-time jobs related (directly or slightly) to the vocational courses studied in school. Fewer (13.6 percent) planned to get a full-time, non-related job.

Our data further indicate that "vocational, co-op, or industrial arts courses in high school", (Q.5), were moderately important factors in the vocational respondents' career choices (see Table 28). Over half (57.5 percent) reported that their vocational courses "had no effect" on their job choice. Almost one-third (32.1 percent) thought their vocational courses had "confirmed" their job choices, while only one-tenth (10.3 percent) indicated that courses had "changed" their job choices. For most vocational graduates, course work did not have an important effect on their job choices; however, it did confirm the job choices of one-third of this group.

TENTH GRADE AND GRADUATION CAREER DESIRES. In the hope of learning more about the students' career-job decision-making process, they were asked to state what careers or jobs they wanted when they began tenth grade and when they graduated from high school (Q.6 and Q.7).

TABLE 28

EFFECT OF HIGH SCHOOL VOCATIONAL COURSES ON RESPONDENTS JOB CHOICE

Q.5 How important were your vocational, co-op or industrial arts courses in high school for your career choice?

Did these courses confirm your job choice, change your job choice, or have no effect on your job choice?

Vocational Education Courses:	
Confirmed my job choice...	32.1%
Changed my job choice...	10.3
Had no effect on my job choice...	57.5
Total	99.9%
Weighted Base	(410)

Over one hundred specific jobs were indicated for both questions. These responses were coded into approximately fifty categories. Table 29 shows these data further collapsed into several categories. The reader should be cautioned in interpreting these data, in that this type of question requires the respondent to attempt to recall career aspirations from five years in the past. This task is difficult for many respondents. Our data, therefore, should be viewed as the respondents' "best recollection" of their tenth grade and graduation job choices.

TABLE 29

SELECTED JOB CHOICE AREAS OF RESPONDENTS IN TENTH GRADE AND AT HIGH SCHOOL GRADUATION

Q.6 At the time you entered the tenth grade, what career or job did you want? (Please write in.)

Q.7 When you graduated from high school, what kind of job did you want? (Please write in.)

Job Area	Tenth Grade	Graduation	Change
Business	14.9%	20.7%	+ 5.8%
Health	14.4	10.2	- 4.2
Home Economics	3.3	3.5	+ 0.2
Trade and Industrial	9.6	15.4	+ 5.8
Other, professional	14.5	10.9	- 3.6
Other, miscellaneous	10.2	15.8	+ 5.6
Don't Know	25.5	15.4	-10.1
Missing Data (no answer)	7.6	8.1	+ 0.5
Total	100.0%	100.0%	
Weighted Base	(738)	(738)	

The largest job choice area of the respondents at both times was business (14.9 percent in tenth, 20.7 percent at graduation), and the smallest area of job choice in tenth grade and at graduation was home economics (3.3 percent and 3.5 percent respectively). Over one-fourth (25.5 percent) of the respondents did

not know what jobs they wanted when they were in tenth grade. Only 15.4 percent did not know at graduation, indicating that many of them had made job choices by their graduation.

IMPORTANT FACTORS IN GRADUATES' POST HIGH SCHOOL PLANS. The next question in this series (Q.8), asked all respondents to rate the importance of several factors or people in their choices of what to do after graduation. Those who indicated that the factor "did not apply" to them have been removed from the data presented in Table 30.

More than one-half of the respondents felt that four of the factors were "not important" influences in their post high school planning (friends, co-op teacher or or employer, high school counselor or teacher, and/or NEOVEC teacher or counselor). Three factors, however, were reported to be very or somewhat important by over half of the respondents (parents or relatives, work experience in high school, and school subjects). The most important factor for all respondents was "parents or relatives" with over one-third (35.5 percent) rating them as "very important". "School subjects" was rated as "very important" by 29 percent of the respondents, and 26.8 percent rated their work experience in high school as "very important" in their choice of what to do after graduation. Clearly, to our respondents,

TABLE 30

IMPORTANCE OF SEVERAL FACTORS IN RESPONDENTS POST HIGH SCHOOL PLANS (Percentage)

Q.8 How important was each of the following in your choice of what to do after high school graduation?

	VERY IMPORTANT*	SOMEWHAT IMPORTANT	NOT IMPORTANT	Wt. Base
A. Parents or relatives	35.3%	42.4%	22.1%	644
G. School subjects	29.0	45.9	25.1	638
E. Work experience in high school	26.8	38.7	34.6	531
C. Co-op teacher or employer	16.5	31.0	52.5	496
D. High school counselor or teacher	11.3	33.4	55.3	574
B. Friends	10.4	35.3	54.2	566
F. NEOVEC teacher or counselor	9.0	28.0	62.9	247

*Factors are arranged in decending order of "very important" response level.

parents and relatives, school subjects, and work experience are important factors in their post high school plans.

The last question concerning the decisions of high school students (Q.9), simply asked the graduates, whether there were areas or courses that they wanted to take in high school which were not offered. Almost two-

thirds (62.8 percent) said "yes", indicating a substantial desire for unavailable courses. More than one-third (35.1 percent) of the courses listed by the graduates were specifically vocational in nature; i.e., business communications, medical technology, data processing, and cosmetology (total responses are not reported here, but are available). We can conclude, therefore, that there was a general interest among graduates in curriculum offerings which they felt were not available, and that a substantial portion of this interest was in vocational courses.

JOB SATISFACTION. Later in the survey, the respondents were asked to answer some questions about their satisfaction with their jobs. For most people, job satisfaction is an important aspect of work. Since this concept is not easy to measure, information on job satisfaction was obtained through several questions on factors that might affect job satisfaction.

To begin, the graduates were asked to rate their satisfaction with their current or most recent jobs (Q.24). As Table 31 shows, over one-fifth (21.5 percent) rated themselves as "very satisfied" with their most recent job, and almost two-fifths (39.4 percent) said they were "satisfied". Few said they were "dissatisfied" (8.7 percent) or "very dissatisfied" (1.3 percent). Three-in-ten (29.1 percent) said they were "neither satisfied or dissatisfied with their job. The majority,

TABLE 31

RESPONDENTS SATISFACTION WITH MOST RECENT JOB

Q.24 How satisfied are (were) you with this job?	
Very satisfied...	21.5%
Satisfied...	39.4
Neither satisfied nor dissatisfied...	29.1
Dissatisfied...	8.7
Very dissatisfied...	1.3
Total	100.0%
Weighted Base	(678)

therefore, (60.9 percent) rate themselves as at least satisfied with their jobs, while a small group (10 percent) indicated dissatisfaction.

In general, the 1972 graduates are satisfied with their current or most recent jobs. To better understand the nature of their job satisfaction, they were asked to indicate their level of satisfaction with several job-related items (Q.25). As Table 32 shows, our respondents were "very satisfied" with the people they work with (42.1 percent), the distance they travel to work (40.8 percent), and the training they are getting (35.7 percent). They were "dissatisfied" with their

TABLE 32

SATISFACTION OF RESPONDENTS WITH SEVERAL ITEMS CONCERNING THEIR MOST RECENT JOBS

Q.25 How satisfied are (were) you with the following things on your present or most recent job?

ITEM	VERY SATISFIED	SATISFIED	DIS-SATISFIED	Wt. Base
A. Things I do	30.9%	60.7%	8.5%	674
B. Things I work with	32.0	57.3	10.7	662
C. People I work with	42.1	49.9	8.0	672
D. People I work for	27.1	54.1	18.7	667
E. Wages	16.0	49.9	34.1	669
F. Hours	22.7	62.4	14.9	678
G. Fringe Benefits	24.8	43.1	32.1	585
H. Working conditions ..	26.4	60.3	13.3	662
I. Distance to work	40.8	49.7	9.5	660
J. Promotion Possibilities	19.2	37.0	43.6	578
K. Training I am getting	35.7	42.6	21.5	568

promotion possibilities (43.6 percent), wages (34.1 percent), and fringe benefits (32.1 percent). They were least "dissatisfied" with the people they work with (8 percent), the things they do at work (8.5 percent), and the distance they travel to work (9.5 percent).

This dissatisfaction is probably attributable to the levels of jobs they are holding and the fact that they are beginning employees. The promotion possibilities, wages, and fringe benefits would probably be lower on low level jobs for new employees. It is interesting to note that while over one-fifth (21.5 percent) were dissatisfied with the training they were receiving, over one-third (35.7 percent) were very satisfied with their training. Obviously, there is a discrepancy between the training offered and the training expected for many graduates on their initial post high school jobs. Further, fourteen percent of the respondents (data not shown) said that this item did not apply to them; that is, that they weren't getting training and didn't expect it.

CHAPTER V

SELECTED OUTCOMES BY JOB PREPARATION BACKGROUND

In this chapter, we will again inspect the responses of the 1972 graduates. This presentation, however, will more specifically investigate the relationship of the various responses considering the vocational course work and work experience background of the respondents. To facilitate our analysis we developed a summary concept we have termed Job Preparation. As presented in Chapter III, this concept is an indicator of the nature of the vocational education background of each respondent (see again Table 3).

The following definitions and abreviations of Job Preparation background should be kept in mind as the reader interprets the tables and data in this chapter.

1. No Preparation (No Prep). These respondents did not participate in the Work Experience Program nor earn more than one-half vocational course credits (one course).

2. Vocational Course Preparation (VC Prep). These respondents earned one or more vocational course credits but did not participate in the Work Experience Program.

3. Work Experience Preparation (WE Prep). These respondents did participate in the Work Experience Program but did not earn more than one-half vocational course credits.

4. Vocational Course and Work Experience Preparation (VC-WE Prep). These respondents earned one or more vocational course credits and participated in the Work Experience Program.

These definitions will be used throughout this chapter without further explanation.

WORK HISTORY AND EXPERIENCES

Over seven-in-ten (72.3 percent) respondents indicated they had been employed at a job during high school which lasted one month or longer (Q.10).
As Table 33 shows, all of the work experience (WE Prep) respondents (100 percent) and nine-in-ten (89.8 percent) of those with both work experience and vocational course credits (VC-WE Prep) had held a job during high school for one month or longer. Less than two-thirds of those with no Preparation (63.2 percent) or only vocational course credits (VC Prep) (61.1 percent) had worked a month or more during school. We can conclude, that while a majority of the graduates had worked while in high school, those who had participated in the Work Experience Program were more likely to have held a job for one month or longer.

TABLE 33

PERCENTAGE OF RESPONDENTS EMPLOYED ONE MONTH OR LONGER DURING HIGH SCHOOL BY JOB PREPARATION

	NO Prep	VC Prep	WE Prep	VC-WE Prep	Total
Yes	63.2%	61.1%	100.0%	89.8%	72.3%
No	36.8	38.9	0.0	10.2	27.7
Total	100.0%	100.0%	100.0%	100.0%	100.0%
Weighted Base	(200)	(285)	(101)	(128)	(714)

HIGH SCHOOL JOB HISTORY

Those who had worked one month or longer during high school were asked to complete a chart describing their high school work history (Q. 11). Table 34 indicates a fairly even distribution of jobs held among the four job area categories. There is, however, a substantial difference in the Job Preparation background of these respondents when they are categorized by job area. While only one-fifth (20.3 percent) of the total jobs held were in the trade and industrial area, nearly one-third (32.1 percent) of those with both vocational credits and work experience had jobs in this area. Trade and industrial jobs are more likely to be held by those with the most Job Preparation. Business area jobs accounted for (18.7 percent) of the total jobs held, but over one-third (36.9 percent) of those with only Work Experience

Program participation (WE Prep) held jobs in this area. One-fourth (25.8 percent) of those with no Job Preparation also held business area jobs. The proportion of jobs held in the four Job Preparation categories was fairly constant for the distributive education and health-home economics job areas.

TABLE 34

AREAS OF JOB(S) REPORTED BY RESPONDENTS WHILE IN HIGH SCHOOL BY JOB PREPARATION

Responses*	NO Prep	VC Prep	WE Prep	VC-WE Prep	Total
Business	25.8%	8.5%	36.9%	13.7%	18.7%
Distributive Ed ..	19.0	23.6	23.0	28.6	23.6
Health-Home Econ..	26.4	25.2	23.8	19.6	24.0
Trade and Industrial	12.9	25.6	2.5	32.1	20.3
Other	16.0	17.1	13.9	6.0	13.4
Total	100.1%	100.0%	100.1%	100.0%	100.0%
Weighted Base	(163)	(246)	(122)	(168)	(700)

* Actual responses were recoded into these five categories.

It would seem that Job Preparation background is most deterministic for trade and industrial jobs and least important for business area jobs. That is, business jobs are easier to obtain without substantial Job Preparation, while trade and industrial jobs are more sensitive to the level of Job Preparation. Miscellaneous (other) jobs appear to be unrelated to the Job Preparation background of the student, although those with substantial preparation tend to not have this type of job (6 percent).

Table 35 presents information about the types of jobs held by respondents while in high school. None of these data are surprising. Thirty-eight percent of the total jobs reported were identified as Co-op (Work Experience); most of those with both vocational credits and work experience held these job (65.7 percent) as did those which only work experience (69.2 percent). Those with no Job Preparation were most likely to have jobs which were neither work study nor Co-op (69 percent).

TABLE 35

TYPE OF JOB(S) HELD BY RESPONDENTS DURING HIGH SCHOOL BY JOB PREPARATION

These data show that most of the jobs held by those who have participated in the Work Experience Program are Work Experience jobs; they do not have a large number of non-Work Experience jobs while in high school.

No difference was noted by Job Preparation for the year the respondents held their jobs (Q. 11.3). Most (77.6 percent) worked during their junior and senior years of high school.

Slight differences were noted in the respondents indications of the relationship of their jobs to their high school courses of study (see Table 36). About one-fifth (21.6 percent)

TABLE 36

RELATIONSHIP OF RESPONDENTS HIGH SCHOOL JOBS TO COURSES OF STUDY BY JOB PREPARATION

Weighted Base	(147)	(238)	(117)	(165)	(667)

of the jobs reported held during high school were thought to be "directly related"; almost one-fifth (19 percent) of the jobs were identified as "slightly related." No major differences are found for those with varying degrees of Job Preparation, although those with only work experience had the highest number (29.1 percent) of "directly related" jobs and "slightly related" jobs (27.4 percent). Respondents with no preparation or only vocational courses reported slightly higher levels of jobs that were "not related" to their high school courses of study (64.6 percent and 62 percent respectively).

FIRST POST HIGH SCHOOL JOB

Question 12 asked if the graduates had been employed since graduation and nearly all (93.4 percent) reported that they had. No significant difference was found in response to this item according to Job Preparation background since nearly all respondents had been employed.

We asked those who had been employed, when they had started their first job after graduation (Q. 13). Over one-half (54.1 percent) reported they continued a job they already had or started a job immediately after graduation (see Table 37). One-fifth (20.2 percent) said they started between one and two months after graduation. Thus, the majority (74.3 percent) were working very soon after finishing high school.

As Table 37 reveals there are differences when Job Preparation background is considered. Over eight-in-ten of the work experienced graduates (85 percent) and those with both work experience and vocational credit (83 percent) obtained their first job within two months of graduation, compared to 71 percent of the no preparation group and 69 percent of the vocational credit only group.

TABLE 37

TIME BETWEEN GRADUATION AND RESPONDENTS FIRST JOB
BY JOB PREPARATION

	NO Prep	VC Prep	WE Prep	VC-WE Prep	Total
Continued job I already had ...	35.1%	21.2%	54.3%	55.8%	36.0%
Started immediately after graduation	18.9	21.2	20.5	8.1	18.1
Started between 1 and 2 months after graduation	16.2	26.9	10.2	19.1	20.2
Started between 2 and 6 months after graduation	10.8	17.3	11.6	9.3	13.2
Started more than 7 months after graduation	18.9	13.5	5.4	7.7	12.6
Total	99.9%	100.1%	100.0%	100.0%	100.1%
Weighted Base	(195)	(274)	(96)	(125)	(69)

We can conclude, that while most graduates had full-or part-time jobs within two months of graduation, there is a relationship between Job Preparation and how soon graduates begin to work. Those with work experience are more likely than those without this background to be working soon after graduation. This group is also the least likely to wait as long as seven months after high school before starting to work.

Our next question (Q. 14) gave us an indication of the number of graduates who had parents, relatives, or friends in the same line of work they entered. Most respondents (58.1 percent) said they did not have a parent, relative, or friend in the same line of work; one-fourth (24.2 percent) said they had a parent or relative, and 17.7 percent said they had a friend.

Our analysis of these data, by Job Preparation background, produced some interesting statistics (see Table 38). When we look at respondents who said they did have a parent, relative, or friend in the same line of work, some difference is found by Job Preparation. Work experience only graduates had a very low percentage (18.8 percent) who answered "Yes" to this question. Only 7.9 percent of this group and 18.9 percent of the No Prep group said they had parents or relatives compared to over thirty percent for the other two categories of Job Preparation. The No Prep group, however, was the most likely to report they had a friend in the same line of work they entered (24.3 percent). Job Preparation, therefore, seems mildly related to the responses to this item. The major finding here is that those graduates with only work experience are significantly less likely to have a parent, relative, or friend in the same line of work they entered.

TABLE 38

PERCENTAGE OF RESPONDENTS WITH PARENTS, RELATIVES, OR FRIENDS IN THE SAME LINE OF WORK BY JOB PREPARATION

Weighted Base	(195)	(274)	(94)	(125)	(688)

Another question (Q. 18) provided additional data on how graduates obtained their first jobs. The largest group said they found their job on their own (46.8 percent) and one-third (33 percent) reported help from parents, relatives or friends (see Table 39).

TABLE 39

Weighted Base	(179)	(263)	(89)	(124)	(656)

*Data for "other sources" is not included in Table 39.

Our particular interest in asking this question, was obtaining some information about the use of school-related assistance by graduates in getting their first job. Table 39 shows that overall, one-fifth (20 percent) of our respondents said they got their first job through help from a school-related source. Job Preparation background is not highly related to the

use of school sources except for one group, work experienced only; over two-fifths (42.4 percent) report that they obtained their first post high school job from a school-related source.

TABLE 40

VOCATIONAL AREA OF RESPONDENTS' FIRST JOBS BY JOB PREPARATION

Responses*	NO PREP	VC PREP	WE PREP	VC-WE PREP	TOTAL
Business	18.9%	13.3%	34.8%	19.5%	18.7%
Distributive Education	16.4	28.3	11.2	18.8	21.0

Trade and Industrial	26.7	31.9	4.5	35.9	27.8
Other	10.8	9.3	19.1	7.8	10.7
Total	100.0%	100.0%	99.9%	100.0%	100.1%
Weighted Base	(195)	(279)	(89)	(128)	(691)

*Actual responses were recoded into these five categories.

Table 40 presents the data gathered from Question 15 about the area of the respondents' first job. While the distribution is fairly even for the four areas, there are marked differences in the Job Preparation background and the likelihood of obtaining work in one of

the areas.

Business jobs are most likely to be obtained by respondents with only work experience (34.8 percent). These are more likely secretarial-clerical jobs that are related to the actual work experience setting the respondent had while in school. Distributive education related jobs were most likely to be held by those with only vocational credits (28.3 percent) and seem unrelated to the presence of work experience in a respondent's background. Health and home economics related employment was more often obtained by those with work experience only (30.3 percent) or no Job Preparation (27.2 percent). Trade and industrial jobs were most sensitive to work experience and vocational credit Job Preparation (35.9 percent). The largest group who obtained work in "other" areas (service, education, unskilled labor) were those with only work experience (19.1 percent).

While these data do not reveal a dramatic relationship between the Job Preparation background of the respondents and the areas of their first jobs, those with the greatest preparation are more likely to obtain trade and industrial jobs than in other areas. These jobs, apparently, require and attract those with substantial vocational backgrounds. Respondents who have only a work experience preparation seem most likely to locate work in a business or health and home economics related job, possibly in offices, day care center, or

restaurants.

Table 41 presents data gathered concerning the nature of the business the respondents worked at on their first job (Q. 16). This data was obtained to further describe their employment situation by where they worked as compared with what they did there.

TABLE 41

Weighted Base	(184)	(269)	(96)	(127)	(675)

*Actual responses were recoded.

As this table indicates, over one-fifth (21.3 percent) of the respondents had jobs in a retail business involving primarily the distribution or sales of products. However, one-third (33.6 percent) had jobs at trade and industrial concerns if the three categories are combined.

Inspection of the Job Preparation categories in Table 41 does not reveal major differences in the nature of the businesses and the proportion of respondents who are so employed. Three major exceptions to this observation are noted: (1) The number of work experience only respondents who were employed in the general business category (22.8 percent) was nearly three times that for all respondents (7.6 percent). (2) The proportion of graduates with no Job Preparation employed in home economics and food related businesses (22.9 percent) was higher than the overall proportion (15.9 percent). (3) The percentage of respondents with vocational credits and work experience who work for trade and industrial businesses (41.9 percent, three categories combined) exceeded the overall proportion of respondents (33.6 percent) in this area.

The reasons for these exceptions must be speculative. However, in light of data presented above (see Table 37), we might conclude that those work experienced only graduates who were employed by general businesses have been able to continue or obtain employment related to their work experience in high school. The large group

of respondents in the home economics/food businesses with no Job Preparation may possibly occupy several positions requiring substantial training; in fact, jobs in this business area may be some of the only ones available to these graduates without additional training. And finally, additional training may have a better "pay-off" in the trade and industrial area, especially in the automobile industry. This vast area can offer many different types of jobs to graduates with major differences in Job Preparation background. Therefore, while many graduates without Job Preparation could work for these businesses, those with both work experience and vocational credits seemed even more able to secure work with these companies.

By using the information gathered in Q. 16, we were able to locate additional data about the number of employees who work at the various businesses reported. Table 42 summarizes this data.

TABLE 42

NUMBER OF EMPLOYEES AT RESPONDENTS' FIRST JOB LOCATIONS BY JOB PREPARATION

Responses*	NO PREP	VC PREP	WE PREP	VC-WE PREP	TOTAL
1 to 10	8.6%	16.0%	21.4%	27.1%	16.8%
11 to 49	42.9	30.0	30.4	31.5	33.9

100 or more	28.6	28.0	30.7	33.7	29.6
Other (self-employed)	2.9	6.0	5.7	4.4	4.8
Total	100.1%	100.0%	99.9%	100.0%	100.0%
Weighted Base	(184)	(263)	(96)	(127)	(670)

*Data gathered from information supplied in Q. 16.

The greatest proportion of our respondents are employed at locations that have eleven to forty-nine employees (33.9 percent) or one hundred or more employees (29.6 percent). Very few (4.8 percent) are self-employed. No major differences are evident in the proportion of respondents for each Job Preparation category if the respondents were self-employed or work where there were one hundred or more employees. Those respondents who had a substantial Job Preparation background (vocational credits and work-experience) had a larger proportion

(27.1 percent) employed at locations with one to ten employees than did the total of all respondents (16.8 percent). The No Prep group had the lowest percentage (8.6 percent) at this level, but also had the highest number (42.9 percent) of those employed. Businesses with fifty to ninty-nine employees employed 14.9 percent of the respondents but only 3.3 percent of those with both vocational credit and work experience.

Our last question (Q. 17) dealing with the respondents first post high school job asked them to indicate their earnings per hour on this job. The range of income was from fifty cents to $7.10 per hour. These responses were categorized into approximately four equal quarters for this presentation (see Table 43). The two middle groups did not equal 25 percent each because of the distribution of actual earnings immediately above and below $2.00 per hour (many of the actual responses cited

TABLE 43

RESPONDENTS' EARNINGS PER HOUR ON THEIR FIRST JOBS BY JOB PREPARATION

*Actual responses recoded into four categories.

were concentrated at exactly $2.00; see Table 15 for a more specific breakdown of the distribution). Job Preparation does appear to be related to the respondents earnings per hour on their first jobs. Those with only work experience were more likely to be found in the two lowest quarters (60.8 percent) than all respondents (45.3 percent); those with both work experience and vocational credits, however, were almost as likely to be located in the two highest groups (48.7 percent) as were all respondents (54.7 percent). Respondents with no Job

Preparation or only vocational credits earn more per hour on their first jobs than did the other two job preparation categories.

POST HIGH SCHOOL JOB HISTORY

We asked the respondents to complete a post high school job history chart to learn more about all their employment experiences since graduation (Q. 19). Table 44 presents a compilation of their responses to the first section of this question. Over one thousand jobs were reported with the largest grouping in the trade and industrial.

TABLE 44

VOCATIONAL AREAS OF POST HIGH SCHOOL JOBS HELD BY GRADUATES BY JOB PREPARATION

Responses*	NO PREP	VC PREP	WE PREP	VC-WE PREP	TOTAL

*Actual responses recoded.

area (30.4 percent). Job Preparation background is significant for the VC-WE Prep group in two areas. Well over two-fifths (43.5 percent) of this group have had trade and industrial jobs, while only 10 percent have had health-home economics related employment compared to one-fifth (20.2 percent) of all the respondents. The No Prep respondents have had 31.5 percent of their jobs in the health-home economics area, substantially higher than the total group. Clearly, Job Preparation is related to two of the job areas for our graduates. Those with no Preparation had a high concentration of employment in health-home economics related jobs, while those with substantial Job Preparation (VC-WE) had a low concentration in this area but a high proportion of the trade and industrial jobs.

Most of these jobs were identified as full-time (73.2 percent) as opposed to part-time (26.8 percent). There was a definite relationship between Job Preparation background and full-time employment (see Table 45). Those with the most Job Preparation (VC-WE) were most likely to be employed full-time (84 percent) while those with no Job Preparation were least likely to be employed full-time (65.1 percent).

TABLE 45

PERCENTAGE OF RESPONDENTS WITH FULL-TIME AND PART-TIME EMPLOYMENT BY JOB PREPARATION

	NO PREP	VC PREP	WE PREP	VC-WE PREP	TOTAL
Full-time	65.1%	74.5%	72.5%	84.0%	73.2%
Part-time	34.9	25.5	27.5	16.0	26.8
Total	100.0%	100.0%	100.0%	100.0%	100.0%
Weighted Base	(284)	(411)	(149)	(194)	(1038)

Another way to categorize the types of jobs the respondents have obtained since graduation is their relationship to the respondents' course of study while in school (see Table 46). A majority (57 percent) of the jobs held were identified as "not related" by respondents. However, only 43.4 percent of the VC-WE respondents held related jobs while over two-thirds (68.3 percent) of the No Prep respondents held unrelated jobs. Correspondingly, over one-fourth (26.5 percent) of the VC-WE respondents had worked at jobs directly related to their high school courses of study. Job Preparation background is associated with the relationship of jobs held to high school course of study; those with no Job Preparation background were not likely to have related jobs and those with both vocational credits and work experience were most likely to have course related employment.

Weighted Base	(189)	(256)	(93)	(124)	(662)

*Actual responses were recoded into these four categories.

Table 47 summarizes a difficult set of data to interpret. The four categories are collapsed from numerous open-ended statements reported by the respondents (see Table 18 for typical individual responses included under each category of "reason for leaving"). These four categories were chosen by the authors because of the general concern that young employees are often the first victims of a poor economy. As can be seen in Table 47, Involuntary Loss of Job was only cited for 17.1 percent of the jobs left. While some respondents, who actually "lost" their jobs, may have preferred to indicate a different type of reason (i.e., went to school, quit, took a vacation) to avoid any possible stigma attached to losing a job, clearly the majority left their jobs by choice. In reality, many respondents may have left jobs for a variety of reasons that overlap our four categories. However, we are forced to accept the information they supplied at face value.

There is a strong relationship between the reasons cited for leaving a job and Job Preparation background. Specifically, those respondents with no Job Preparation or only work experience were far more likely to cite reasons we have categorized under Change in Life Style (61.4 percent and 73.1 percent respectively). Analysis of this is difficult; the preponderance of responses for these two Job Preparation categories under this

category were "going to school, take a vacation, and moved" (data not presented here). Interestingly, one-fourth (24.5 percent) of all reasons cited for leaving a job were school-oriented.

Almost one-half (49.2 percent) of respondents with only a vocational course credit background cited voluntary reasons for changing jobs (i.e., "better pay, better job, job dissatisfaction"), while only one-fifth (19.6 percent) of those with no Job Preparation gave reasons of this type. The respondents with the broadest Job Preparation background (VC-WE) reported the highest proportion (28.2 percent) of the reasons in the Involuntary Loss of Job area.

PRESENT EMPLOYMENT SITUATION

Question 27 asked the respondents to describe their present situation as to their employment, school, or military status. One-half (49.6 percent) of all respondents stated they were working full-time, yet only one-third (34.3 percent) of the no Preparation respondents had full-time jobs (see Table 48). They were more likely to be working part-time (11.4 percent) and going to school full-time (20 percent). Those with both work experience and vocational credits had no major response differences from the total group. Almost one-fifth (19.1 percent) of the respondents were unemployed; those with only vocational credits had the highest rate of unemployment (17.6 percent).

TABLE 48

PRESENT OR MOST RECENT JOB DESCRIPTION

Question 20 examined the number of hours worked per week on the respondents' present or most recent job (see Table 49). While the figures are not dramatically different for the four Job Preparation categories, 81.2 percent of the work experience-vocational course respondents were employed full-time (40 or more hours per week), whereas only 67.3 percent of the vocational credit respondents were employed full-time. Among those who worked more than forty hours a week, one in three (33.7 percent) were work experience and vocational credit respondents compared to only one-fifth of the no preparation, vocational credit only, and work experience only groups.

TABLE 49

AVERAGE HOURS WORKED PER WEEK ON PRESENT OR MOST RECENT JOB BY JOB PREPARATION

Responses*	NO PREP	VC PREP	WE PREP	VC-WE PREP	TOTAL
39 or less hours...	28.9%	32.8%	27.6%	18.9%	28.5%
40 hours.....	50.0	46.6	54.2	47.5	48.7
Over 40 hours.....	21.1	20.7	18.2	33.7	22.7
Total	100.0%	100.1%	100.0%	100.1%	99.9%
Weighted Base	(200)	(306)	(101)	(131)	(738)

*Actual responses recorded.

Question 21 asked what the hourly wage was on the respondents' present or most recent job. For our analysis we split the distribution into equal halves. The most striking difference can be seen between those with only work experience preparation and those with both work experience and vocational credit (see Table 50).

TABLE 50

EARNINGS PER HOUR ON PRESENT OR MOST RECENT JOB BY JOB PREPARATION

Responses*	NO PREP	VC PREP	WE PREP	VC-WE PREP	TOTAL
Upper half	52.9%	50.0%	29.6%	64.8%	50.7%
Lower half	47.1	50.0	70.4	35.2	49.3
Total	100.0%	100.0%	100.0%	100.0%	100.0%
Weighted Base	(179)	(263)	(88)	(114)	(645)

*Actual earnings reported were recoded into upper and lower halves.

More (64.8 percent) of those with the greatest Job Preparation (VC-WE) earned significantly more per hour on their present or most recent job than did any of the other groups, especially those with only work experience. In fact, seven-in-ten (70.4 percent) of those with a work experience only Job Preparation background are in the lower half of the earnings distribution. This result is even more striking if we consider that the no Job Preparation and vocational credit only groups were evenly divided in the wage distribution. Therefore, having substantial Job Preparation (VC-WE) apparently gave the respondents a chance for a position offering higher earnings; in this study, almost twice as many of this group (64.8 percent) had high income than low income (35.2 percent).

In addition to asking how much they earned per hour, we also asked them to evaluate how well they could live on their wages (Q. 22). As Table 51 shows, over three-fifths (62.4 percent) considered their wages as "comfortable" or better. Respondents with both vocational credit and work experience (VC-WE) were most likely to rate their wages as sufficient; over seven-in-ten (72.5 percent) said their wages were "comfortable" or better. Those with no preparation or only work experience were most likely to rate their wages as barely enough to meet their needs or "impossible to live on". In summary, those respondents who had taken vocational courses (VC or VC-WE) were more likely to rate their current wages as

TABLE 51

RESPONDENTS RATING OF WAGES ON THEIR PRESENT OR LAST JOB BY JOB PREPARATION

	NO PREP	VC PREP	WE PREP	VC-WE PREP	TOTAL
Impossible to live on	10.8%	9.6%	14.2%	8.2%	10.3%
Barely enough to meet needs	37.8	21.2	32.2	19.3	27.3

Enough to be able to have some extras	10.8	17.3	7.3	22.1	15.0
Enough to have extras and save some	16.2	17.3	12.2	18.8	16.6
Total	99.9%	100.0%	99.9%	100.0%	100.0%
Weighted Base	(195)	(274)	(95)	(125)	(689)

"comfortable" or better than were those with no Job Preparation or only work experience preparation.

The last question in this series describing the present jobs held by the respondents asked them to rate the security of their current jobs (Q. 26). As can be seen in Table 52, the majority said their job would be theirs "for as long as I want it" (39.2 percent), or that it was "one I can depend on for several years" (24.6 percent). Less than three-in-ten (29 percent) felt their job futures were "uncertain" with almost none (0.3 percent) saying their jobs "will end soon." A small number (6.9 percent) said they had "never thought about it."

TABLE 52

RESPONDENTS' RATING OF SECURITY OF CURRENT JOB BY JOB PREPARATION

	NO Prep	VC Prep	WE Prep	VC-WE Prep	Total
It will end soon, forcing me to change positions	0.0%	0.0%	0.0%	1.4%	0.3%
It is one I can depend on for several years ..	36.4	17.1	23.9	25.1	24.6
It will be mine for as long as I want it ...	31.8	48.6	39.3	30.4	39.2
The job is uncertain; I am unsure about the future	31.8	22.9	32.2	34.8	29.0
I never thought about it	0.0	11.4	4.5	8.3	6.9
Total	100.0%	100.0%	99.9%	100.0%	100.0%
Weighted Base	(116)	(134)	(72)	(99)	(472)

The largest group who thought they could depend on their jobs for several years were those with no Preparation, over one-third (36.4 percent) of whom felt secure. Those with only vocational credits constituted the smallest percentage (17.1 percent) in this category, yet this group had the most agreement with the response (48.6 percent) that the job was theirs for as long as they wanted it. Those with only vocational credits also had the highest rate of

response that they had never thought about the security of their current job (11.4 percent).

By combining the two "secure" responses ("depend on for several years" and "mine for as long as I want it"), we find that those with no Job Preparation background had the highest level of "security" (68.2 percent), and those with substantial Job Preparation (VC-WE) had the lowest number with secure jobs (55.5 percent). The meaning of this difference is not clear to us. Since the respondents had only recently entered the labor force, job security may be associated with those types of jobs requiring minimum Job Preparation but with limited chance for advancement. Those respondents with both course and work experience preparation may be able to secure positions requiring substantial Job Preparation but with more potential advancement. These jobs may be more sensitive to economic pressures and job performance evaluations; thus, they are more "insecure." In general, however, a majority of all Job Preparation categories report having secure jobs.

One additional question concerning wages asked the respondent to rate their chances for increased wages on their present job, other than normal or cost of living increases (Q. 23). It is important to notice (see Table 53), that well over one-fourth of the respondents in each Job Preparation group considered their chances for higher wages as "poor" or "none at

all." Roughly one-third of each group perceived their chances for increased wages as "good" or "excellent." The most noticeable difference are found at the extremes of the responses. Of those who had participated in only the Work Experience Program, less than one-tenth (8.4 percent) felt there was no chance for increased wages compared to almost one-fifth (18.9 percent) of those with no Preparation. Interestingly, only 6.6 percent of the VC-WE preparation respondents rated their chances as "excellent," while 13.5 percent of the No Prep group thought their chances for a wage increase were "excellent."

TABLE 53

RATING OF CHANCES FOR INCREASED WAGES OTHER THAN COST OF LIVING INCREASES BY JOB PREPARATION

	NO PREP	VC PREP	WE PREP	VC-WE PREP	TOTAL
None at all	18.9%	12.2%	8.4%	12.6%	13.7%
Poor	18.9	18.4	20.0	22.2	19.5
Fair	29.7	34.7	40.5	28.4	32.9
Good	18.9	26.5	20.8	30.3	24.2
Excellent	13.5	8.2	10.3	6.6	9.7
Total	99.9%	100.0%	100.0%	100.1%	100.0%
Weighted Base	(195)	(258)	(95)	(125)	(673)

Few differences, therefore, are noted in response for the four Job Preparation groups other than those mentioned above. Perceptions of wage increase possibilities may vary from day to day according to several factors including the state of economy, interpersonal relations at work, and receiving of past increases. In additon, those who rate their chances as "fair" or "better" may be those who are earning the least and have the most to gain. Our understanding of their responses to this question is limited. We simply note that those respondents with no Job Preparation report the highest perceptions of both "excellent" or no chances for wage increases, while those with the greatest level of Job Preparation (VC-WE) have more evenly distributed responses which approximate those given by all respondents.

VOCATIONAL DECISIONS AND WORK ATTITUDES

SELECTION OF VOCATIONAL COURSES. Question 2 asked the respondents to indicate why they selected the vocational courses they took in high school. Table 54 presents their responses by Job Preparation background, the differences are easily seen. Four-in-ten (39.8 percent) of the respondents selected their vocational courses because they "wanted to learn more about it" because

TABLE 54

REASONS VOCATIONAL GRADUATES SELECTED VOCATIONAL COURSES IN SCHOOL BY JOB PREPARATION

	NO Prep	VC Prep	WE Prep	VC-WE Prep	Total
I wanted to learn more about it because of my interest or hobbies	70.0%	34.9%	16.9%	42.3%	39.8%
I wanted to do that type of work ...	5.9	41.9	39.3	26.2	31.7
Jobs in that field offered good pay and working conditions	5.9	7.0	20.2	3.6	8.2
My parents advised me to take them.	0.0	0.0	0.0	0.0	0.0
My counselor or teacher suggested I take them.	0.0	4.7	3.3	0.0	2.6
I took vocational courses because my friends took them	0.0	0.0	0.0	2.8	0.6
I preferred vocational courses to other available courses ...	5.9	9.3	7.7	14.9	9.7
Other reasons	11.8	2.3	12.6	10.1	7.4
Total	100.1%	100.1%	100.0%	99.9%	100.0%
Weighted Base	(90)	(227)	(85)	(115)	(516)

of their "interests or hobbies." Seven-in-ten (70.6 percent) respondents with no Job Preparation selected their vocational courses because of interests or hobbies, while only 16.9 percent of those with only work experience indicate this reason. The work experience only respondents were more likely to select their vocational courses because they "wanted to do that type of work" (39.3 percent). Work experience only respondents were also far more likely than any other respondents to report they selected their vocational courses because "jobs in that field offered good pay and working conditions" (20.2 percent). Those respondents with some type of Job Preparation were more likely to say they selected courses because they "wanted to do that type of work" than were those with no Job Preparation.

In conclusion, respondents with no Job Preparation most likely selected their vocational courses because of "interests or hobbies," while those with some job preparation were most influenced by the "type of work" the course may have represented. Those with only work experience also were substantially influenced by "good pay and working conditions." Those with both work experience and vocational credits appeared to have been most influenced in their selection of vocational courses by "interest or hobbies" and the "type of work."

In addition to asking the respondents why they selected their vocational courses, we also asked if they had planned "to go to work in that field after high school" (Q. 3). Nearly one-fifth (18.9 percent) said they "definitely planned to work" in the field of their vocational course work (see Table 55). Almost three-in-ten (29.6 percent) also said "yes," but that they were "not really certain." Those with both vocational credits and work experience and those with only work experience were the most definite (24.6 percent and 26 percent respectively) about their work plans. Three-in-ten (30.5 percent) of the VC-WE Prep respondents also said "yes," but they were "not really certain" as did 34.9 percent of the vocational credit only respondents.

Interestingly, one-fifth (21 percent) of those respondents with the greatest Job Preparation (VC-WE Prep) reported they did not know what they were going to do after graduation when they selected their vocational courses. It is clear, however, that those with a work experience Job Preparation background (WE Prep or VC-WE Prep) were the most definite in their post high school work plans when they began their vocational course work.

TABLE 55

RELATIONSHIP BETWEEN VOCATIONAL GRADUATES' VOCATIONAL COURSE SELECTION AND POST HIGH SCHOOL WORK PLANS BY JOB PREPARATION

	NO Prep	VC Prep	WE Prep	VC-WE Prep	Total

Weighted Base	(90)	(227)	(82)	(115)	(513)

Job Preparation background is also related to a respondents job plans after graduation (Q. 4). One-fourth (25 percent) of the respondents did not plan "to get a job after graduation" (see Table 56). Forty-four percent of the No Prep respondents did not plan to work, while substantial majorities of respondents in the three other

Job Preparation categories did plan to work after graduation. Three-in-ten (30.8 percent) of the VC Prep group, 42 percent of the WE Prep group, and 37.5 percent of the VC-WE Prep group all planned to get jobs "directly related" to their high school vocational courses.

TABLE 56

POST HIGH SCHOOL JOB PLANS OF VOCATIONAL GRADUATES BY JOB PREPARATION

	NO Prep	VC Prep	WE Prep	VC-WE Prep	Total
I did not plan to get a job after graduation	44.4%	17.9%	28.1%	19.3%	25.0%
I planned to get a job directly related to the vocational courses I studied in school	27.8	30.8	42.0	37.5	33.4
I planned to get a job slightly related to the vocational courses I studied in school	22.2	33.3	17.1	30.3	27.9
I planned to get a job not related to the vocational courses I studied in school	5.6	17.9	12.8	12.9	13.6
Total	100.0%	99.9%	100.0%	100.0%	100.0%
Weighted Base	(95)	(206)	(76)	(108)	(485)

Question 5 asked the respondents to evaluate the effect of taking vocational courses on their career or job choices (see Table 57). One-third (32.1 percent) said that taking vocational courses "confirmed" their job schoice, but 57.5 percent said the courses "had no effect" on their job choice. Only one-in-ten (10.3 percent) felt it had "changed" their job choice. Very few (3 percent) of the respondents with both vocational courses and work experience thought their courses had "changed" their job choice. The VC-WE Prep group's largest response rate (64.8 percent) indicated that taking vocational classes had "no effect" on their job choice, while the No Prep groups highest response rate indicated that vocational course work "confirmed" their job choice.

We might conclude that the VC-WE Prep group had more definite job plans before they took vocational courses when compared to No Prep respondents. The No Prep respondents not only had the highest incidence of job choice "change" because of vocational courses, but they also had the highest level of confirmation. This would indicate that they were less "sure" of their job plans when they began vocational course work and dropped out of the vocational program rather soon (by definition, they had one-half or no vocational credits).

TABLE 57

TENTH GRADE AND GRADUATION CAREER CHOICES. Questions 6 and 7 asked the respondents to recall what careers they had wanted when they were in tenth grade and then when they graduated from high school (see Tables 58 and 59). The "don't know" responses are included because we thought the level of the response was important to note for these two questions.

The tenth grade, over one-fourth (25.5 percent) did not know what career they wanted. The next largest group of responses (24.1 percent) indicated a job that are coded as "other" (e.g., teacher, lawyer, artist). Approximately equal numbers

TABLE 58

TENTH GRADE CAREER CHOICE BY JOB PREPARATION

Job Area*	NO Prep	VC Prep	WE Prep	VC-WE Prep	Total
Business	2.5%	19.0%	22.0%	19.1%	14.9%
Health	18.4	12.1	29.9	1.1	14.4
Home Economics	2.6	5.2	1.4	4.7	3.9

*Actual responses recoded.

wanted business or health area jobs (14.9 percent and 14.4 percent respectively). Major differences are found within the four Job Preparation areas. Those with VC-WE Prep were most likely to not know what job they wanted in tenth grade (38.2 percent) or to want a trade and industrial job (19.1 percent). Those with no preparation were also very unsure of their job choice in tenth grade; 31.6 percent did not know while 34.5 percent wanted a job categorized by us as "other"

and 18.4 percent wanted a health related job. Those with work experience or vocational courses had more mixed responses. The WE Prep group listed 29.9 percent of their tenth grade job choice in the health field, 22 percent in business, and one-fourth in "other" (25.9 percent); one-tenth (11.9 percent) did not know. Those with only vocational credits were most likely to list "other" (23.9 percent), business (19 percent), health (12.1 percent) or to not know (20.7 percent). There is a clear relationship between Job Preparation background and tenth grade job choice. There is some difficulty in interpreting these responses because the question asks the respondents to recall their aspirations some years in the past. This question may actually indicate the careers they have entered since there is a strong relationship between the relative levels of response for tenth grade and at graduation (see Table 59). Or it could indicate that tenth grade students who know what career they want tend to have fairly stable career aspirations.

Our inspection of Table 59 indicates a lower overall response rate of "don't know" (15.4 percent). This should not be surprising since those nearing graduation would be likely to have a more definite career choice. It could also mean that they could more easily remember their aspirations at that time because it was more recent or they were already employed. The actual levels of response for each job area and Job Preparation category are different than the tenth grade

TABLE 59

*Actual responses recoded.

responses. However, the relative levels among the Job Preparation categories remains fairly consistant. If these responses can be believed at their face value, we might conclude that career aspirations, regardless of Job Preparation background, are fairly stable from tenth grade through high school graduation.

The most dramatic changes noted are for those with no preparation and UC-WE Prep who didn't know what career they wanted in tenth grade. The most increase in job area choice was found for trade and industrial (+5.8 percent) and business (+5.9 percent) careers.

IMPORTANCE OF SEVERAL FACTORS IN GRADUATES' POST HIGH SCHOOL PLANS. Since many people and experiences have differing levels of influence on students, we asked the respondents to rate the importance of several factors as they made their post high school plans (Q. 8). Our discussion here focuses on those respondents who rated these various factors as "very important" (see Table 60). Parents or relatives were rated as "very important" by over one-third (35.5 percent) of the respondents, the highest proportion of all the factors. School subjects were rated as "very important" factors in post high school plans by nearly three-in-ten (29 percent) respondents,

and 26.8 percent rated their work experiences in high school were "very important."

Overall, major differences in response are not noted by Job Preparation background; all four categories definitely rated parents or relatives, school subjects, or work experience as "very important" factors. The No Prep respondents were the most likely to say that their parents or relatives were "very important" in their plans (40 percent). Those respondents with both vocational credit and work experience were least likely to rate their school subjects as "very important" (20.8 percent), while one-third (32.4 percent) of the No Prep group thought their school subjects were "very important" to their post school plans. Possibly, the respondents with no Job Preparation rated their parents or relatives and school subjects as so important because they were the least prepared for specific jobs. Perhaps the low percentage (compared to the other categories) of VC-WE Prep respondents who rated school subjects as "very important" indicates the worth of this type of Job Preparation background a combination of both work experience and vocational courses.

TABLE 60

PERCENTAGE OF RESPONDENTS RATING SEVERAL FACTORS AS "VERY IMPORTANT" IN POST HIGH SCHOOL PLANS BY JOB PREPARATION

Factors*	NO Prep	VC Prep	WE Prep	VC-WE Prep	Total
Parents and realtives	40.0% (184)	31.2% (253)	34.5% (97)	38.8% (109)	35.5% (643)
School subjects ...	32.4 (179)	30.6 (258)	27.6 (89)	20.8 (111)	29.0 (638)
Work experience in high school	25.0 (126)	29.3 (216)	26.4 (77)	24.1 (111)	26.8 (531)
Co-op teacher or employer	18.2 (116)	15.4 (206)	11.4 (77)	20.8 (98)	16.5 (496)
High school counselor or teacher	12.1 (174)	14.3 (221)	10.6 (87)	3.0 (92)	11.3 (574)
Friends	12.5 (169)	11.9 (221)	6.7 (82)	6.4 (94)	10.4 (566)
NEOVEC teacher or counselor	0.0 (58)	14.3 (111)	9.4 (35)	7.5 (44)	9.0 (247)

*Factors are listed in decending order of "very important" responses; "other" not reported.

The four other factors listed in Table 60 were not rated as "very important" by many respondents. One-sixth (16.5 percent) thought their Co-op teacher or employer was " very important" in their post high school plans; those with substantial Job Preparation (VC-WE) were most likely to report this (20.8 percent), but those with only work experience were least likely to rate Co-op teachers or employers as "very important" (11.4 percent). Interestingly, high school counselors, teachers, or friends were rated as "very important" influences by only one-tenth of the respondents. Friends, however, were perceived as "very important" by more of the No Prep and VC Prep respondents (12.5 percent and 11.9 percent respectively) than by those respondents with work experience (less than seven percent). The response rates concerning the NEOVEC teachers or counselor are not clear since so few of the respondents attended this school, and therefore, they could not account for a substantial proportion of the total response.

JOB SATISFACTION. The data in Table 61 reveals, that in general, the respondents were satisfied with their current or most recent job. One-third (32.2 percent) of the VC-WE Prep respondents rated themselves as "very satisfied", and 29.7 percent of the No Prep group also said they were "very satisfied" with their jobs. Only 11.8 percent of the VC Prep group were "very satisfied." The WE Prep group had the lowest proportion of respondents if "very satisfied" and "satisfied" are combined (47.7 percent). Far more of the respondents in the three other Job Preparation categories

felt "satisfied" or "very satisfied" with their jobs. Approximately an equal number in each category were "dissatisfied" or "very dissatisfied" with their jobs.

TABLE 61

RESPONDENTS' SATISFACTION WITH MOST RECENT JOB BY JOB PREPARATION

	NO Prep	VC Prep	WE Prep	VC-WE Prep	Total
Very satisfied	29.7%	11.8%	18.6%	32.2%	21.5%
Satisfied	27.0	56.9	29.1	28.4	39.4
Neither satisfied or dissatisfied.	29.7	23.5	41.6	30.2	29.0
Dissatisfied	10.8	7.8	10.7	5.7	8.7
Very dissatisfied..	2.7	0.0	0.0	3.5	1.4
Total	99.9%	100.0%	100.0%	100.0%	100.0%
Weighted Base	(195)	(269)	(95)	(119)	(678)

Satisfaction with a job, while measurable as overall perception of a workers experience, is a composite of many factors. To better understand the relationship between Job Preparation and job satisfaction, we asked the respondents to rate their satisfaction with eleven job-related items (Q. 25). The respondents in this study who were "very satisfied" with each of the items are presented in Table 62. They were most satisfied with the people they work with (42.1

percent), the distance they travel to work (40.8 percent), and the training they were getting at work (35.8 percent). The lowest numbers reported they were "very satisfied" with their wages (16 percent), promotion possibilities (19.3 percent), and hours (22.7 percent). Although there are certainly differences in the responses to each item, it should be noted that there are less then eight percentage points spread among the middle five items.

The responses by the respondents with vocational course preparation (VC Prep) tended to reflect the ratings of the total respondents except for one item, fringe benefits. The work experience only respondents were much less likely to say they were "very satisfied" with their distance to work (23.7 percent) or the training they were getting (15.5 percent). The major response differences by Job Preparation background are found at the extremes. Those with no preparation are most likely to rate themselves as "very satisfied" with the distance they travel to work (48.6 percent), the training they get at work (51.9 percent), their working conditions (30.6 percent), and their promotion possibilities (27.6 percent). In fact, their rate of "very satisfied" responses exceeds that of the total group on all eleven items indicating a high level of job satisfaction for those with no Job Preparation. Respondents with both vocational credits and work experience (VC-WE Prep) were most likely to be "very satisfied" with the things they do at work (39.9 percent) and their "fringe benefits" (34.9 percent), but they were

much less satisfied with their "working conditions" (18.7 percent).

In summary, Job Preparation background is mildly related to high levels of satisfaction with several job-related items. Respondents were "very satisfied" with such factors as the people they work with, distance to work, and on-the-job training. They were least satisfied with their wages, chances for promotion, and their hours and fringe benefits. Those with no Job Preparation were generally more satisfied then were other respondents, paricularly those with only a work experience background. The responses of the VC-WE Prep group are mixed; three response levels for this group the highest and five were the lowest.

TABLE 62

PERCENTAGE OF RESPONDENTS "VERY SATISFIED" WITH SEVERAL JOB-RELATED ITEMS BY JOB PREPARATION

Item*	NO Prep	VC Prep	WE Prep	VC-WE Prep	Total
People I work with.	42.9% (184)	42.3% (274)	50.4% (89)	34.6% (125)	42.1% (672)

*Responses presented in decending order of level of "very satisfied" response.

CHAPTER VI

SELECTED OUTCOMES BY SEXUAL AND RACIAL STATUS

Any current study of the role of work in the lives of a segment of the population is incomplete, if it does not consider the influence of sex and race. Student record information enabled the DOES staff to identify accurately the sex and race of all 1972 graduates who responded to the Follow-up Survey. Specific items on the survey instrument were selected to determine any significant differences in the responses from male and female students and from black and white students.*

It is often assumed that merely knowing someone's sex and/or race is sufficient to make generalizations about the individual's background vocational background and work experiences. The findings of this study show that this generalization is not always true, especially for race.

---

*To better determine the association of sex and/or race with survey items, we computed Pearson product-moment correlations between sex (male=0, female=1) and race (white=0, black=1) and each variable. Some re-coding of item responses was required; this is noted in the text or in Appendix C. All probabilities were .05 or greater; these are not specified since we were not testing specific hypotheses related to sex or race.

SELECTION OF VOCATIONAL COURSES. Table 63 reveals that forty percent of the respondents took vocational courses because of their interests or hobbies, while one-third (32 percent) took them because they wanted to do the type of work presented in the course. No major dif-

TABLE 63

REASONS VOCATIONAL GRADUATES SELECTED VOCATIONAL COURSES IN SCHOOL BY SEX AND RACE

(M=male, F=female, W=white, B=black, T=total)

	M	F	W	B	T
I wanted to learn more about it because of my interest or hobbies	55%	28%	37%	41%	40%

Weighted Base	(216)	(295)	(331)	(134)	(516)

ference in response is noted for blacks and whites; however, there are significant differences in the responses of males and females. More males (55 percent) said they took vocational courses because of their interests or hobbies; only 28 percent of the females selected this response.

However, fourteen percent of the females, in contrast to one percent of the males, said that the good pay and working conditions in their vocational field attracted them.

POST HIGH SCHOOL WORK PLANS. There are substantial differences in the responses of both males and females and blacks and whites about their post-high school work plans (see Table 64). Only one-fifth (19 percent) of the vocational respondents said they definitely planned to work in their vocational field after graduation, but one-fourth (25 percent) of the females and 26 percent of the black respondents chose this reply. More blacks and males (34 percent) said they were not planning to work in the field of training after high school, although they qualified their replies by saying they were not really certain.

Weighted Base	(213)	(295)	(328)	(134)	(513)

KIND OF JOB WANTED AFTER GRADUATION. As Table 65 shows no important differences can be found between blacks and whites in regard to the kinds of post-high school jobs they want. Approximately one-fourth (25 percent) did not plan to get a job after graduation. About one-third (33 percent), however, did plan to get a job directly related to the vocational courses they studied in school. This pattern also holds true for males and females. Males, however, were much less likely to say they planned to get a job slightly related to their courses than were females (19 percent vs. 34 percent respectively). Conversely, many males (24 percent) said they would get a job unrelated

to their course work, while very few females (6 percent) chose this response. This difference is statistically significant (r=.20); females who say they plan to work are more likely than males to plan to get a job directly or slightly related to their high school vocational course work.

TABLE 65

Weighted Base	(188)	(291)	(316)	(121)	(485)

VOCATIONAL COURSES AND CONFIRMATION OF JOB CHOICE. Blacks and males were less likely to report that the vocational courses they took confirmed their job choices; only 22 percent of the males and 23 percent of the blacks saw vocational courses as confirming their job choice compared to 32 percent of the total group (see Table 66). Females were most likely to perceive this effect of vocational education; this difference was slightly significant for females compared to males on this item (r=.18).

TABLE 66

EFFECT OF HIGH SCHOOL VOCATIONAL COURSES ON RESPONDENTS JOB CHOICE BY SEX AND RACE

	M	F	W	B	T
Vocational education courses confirmed my job choice	22%	40%	33%	23%	32%
Vocational education courses changed my job choice	13	9	11	12	10

Weighted Base	(161)	(243)	(265)	(107)	(410)

IMPORTANCE OF PARENTS OR RELATIVES IN POST-HIGH SCHOOL PLANS. No significant differences were found in the ratings of the importance of parents or relatives to our respondents' plans after graduation. Approximately the same number (22 percent) said their relatives and parents were not important in making post high school plans. More blacks (43 percent) than whites (32 percent), however, did say their parents and relatives were very important to them, concerning their post high school plans.

TABLE 67

IMPORTANCE OF PARENTS OR RELATIVES IN RESPONDENTS' POST HIGH SCHOOL PLANS BY SEX AND RACE

Weighted Base	(263)	(375)	(414)	(164)	(643)

IMPORTANCE OF FRIENDS IN POST-HIGH SCHOOL PLANS. Nearly two-thirds (66 percent) of the black respondents, compared to one-half (51 percent) of the whites, said their friends were not an important factor in their post-high school plans. More females (58 percent) than males (47 percent)

said their friends were not an important influence on them. About an equal number said their friends were a very important factor (see Table 68). There was a significant correlation (r=.10) between sex and response to this item with males more likely to rate their friends as important and females more likely to rate their friends as not important.

TABLE 68

IMPORTANCE OF FRIENDS IN RESPONDENTS POST HIGH SCHOOL PLANS BY SEX AND RACE

	M	F	W	B	T
Very Important	12%	10%	11%	9%	10%

Weighted Base	(225)	(335)	(365)	(150)	(566)

IMPORTANCE OF CO-OP TEACHER OR EMPLOYER IN POST-HIGH SCHOOL PLANS. No significant difference existed in the response to this item for blacks and whites (see Table 69). However, there was a significant difference between males and females. Males were more likely than females to rate their co-op teachers or employers as important to their

post-high school plans. The difference between males and females is significant (r=.15).

TABLE 69

IMPORTANCE OF CO-OP TEACHER OR EMPLOYER IN RESPONDENTS POST HIGH SCHOOL PLANS BY SEX AND RACE

	M	F	W	B	T
Very Important	22%	14%	17%	13%	17%

Weighted Base	(193)	(298)	(315)	(127)	(496)

IMPORTANCE OF HIGH SCHOOL COUNSELORS AND TEACHERS IN POST-HIGH SCHOOL PLANS. Once again, race was not related to the responses to this item, but sex was related. Males were significantly (r=.10) more likely to rate their high school counselors or teachers as important factors in their post-high school plans were females. Slightly more blacks (61 percent) than whites (56 percent) saw their counselors and teachers as unimportant factors.

TABLE 70

IMPORTANCE OF HIGH SCHOOL COUNSELORS OR TEACHERS IN RESPONDENTS' POST HIGH SCHOOL PLANS BY SEX AND RACE

Weighted Base	(218)	(351)	(365)	(151)	(574)

IMPORTANCE OF WORK EXPERIENCE IN POST-HIGH SCHOOL PLANS. Sex was not related to the respondents' ratings of the importance of work experience for post-high school plans. Race is slightly related since blacks were more likely than whites to view work experience as either very important or not important while whites are more likely to see it as slightly important.

TABLE 71

IMPORTANCE OF WORK EXPERIENCE IN RESPONDENTS' POST HIGH SCHOOL PLANS BY SEX AND RACE

	M	F	W	B	T
Very Important	28%	26%	25%	33%	27%

Weighted Base	(197)	(329)	(325)	(139)	(531)

IMPORTANCE OF NEOVEC TEACHER OR COUNSELOR. While the utility of this item is restricted to those graduates who had attended the Northeast Oakland Vocational Education Center, there is a strong relationship between sex, race, and response to this item. Females and whites were much more likely to say NEOVEC teachers and counselors were not important factors in their post-high school plans; more males and blacks rated them as important factors. Sex and race are significantly correlated with importance ($r = .11$ and $r = .25$ respectively).

TABLE 72

IMPORTANCE OF NEOVEC TEACHER OR COUNSELOR IN RESPONDENTS' POST HIGH SCHOOL PLANS BY SEX AND RACE

	M	F	W	B	T

Weighted Base	(76)	(171)	(148)	(69)	(247)

IMPORTANCE OF SCHOOL SUBJECTS IN POST-HIGH SCHOOL PLANS. Substantially more whites (28 percent) and males (32 percent) did not perceive their school subjects to have been important factors on their choice of what to do after high school graduation. The difference is most visible between blacks and whites. Nearly one-half (48 percent) of the blacks rated school subjects as very important while only one-fifth (21 percent) of the whites felt this way. More females also rated school subjects as very or slightly important compared to males. This is a significant correlation (r=.13).

TABLE 73

IMPORTANCE OF SCHOOL SUBJECTS IN RESPONDENTS POST HIGH SCHOOL PLANS BY SEX AND RACE

	M	F	W	B	T
Very Important	26%	31%	21%	48%	29%

Weighted Base	(243)	(389)	(407)	(164)	(638)

UNOFFERED COURSES WANTED IN HIGH SCHOOL. No differences were found in response to this question (Question 9). Sixty-three percent of the males, sixty-four percent of the females, sixty-six percent of the whites, and sixty-two percent of the blacks answered yes, there were courses they wanted in school that were not offered.

HIGH SCHOOL EMPLOYMENT. Seven-in-ten (72 percent) of our respondents reported they had worked during high school for one month or longer; significantly (r=.29) more males (88 percent) reported working during high school than did females (61 percent). No difference was found between blacks and whites.

TIME BETWEEN GRADUATION AND FIRST JOB. While Table 76 indicates nearly three-fourths (74 percent) of our respondents had their first job within two months after graduation, this time interval was not as true for blacks. The length of time between graduation and the first job was significantly longer (r=.11) for blacks. No difference was found in length of time to the first job for males and females.

TABLE 76

PARENT, RELATIVE, OR FRIEND IN SAME LINE OF WORK. Nearly six-in-ten (58 percent) of our respondents reported that they did not have a parent, relative, or friend in the same line of work they entered. One-third (33 percent) of the males, however, did have a parent or relative in the same field, compared to only 17 percent of the females. Whites, also were more likely to have parents, relatives, or friends, in the same line of work; 75 percent of the blacks responded no compared to 55 percent of the whites. Both sex and race were significantly correlated with having parents, relatives, or friends in the same line of work (sex, r=.16; race, r=.13).

TABLE 77

Weighted Base	(289)	(394)	(468)	(154)	(688)

INCOME ON FIRST JOB. As Table 78 shows, males were much more likely to be in the upper half ($2.00 and over) of the income distribution on their first job (72 percent males, 41 percent for females). Interestingly, the black respondents were more likely to be in the upper half than were the whites. The relationship between males and the first job income was significantly correlated (r=.36).

TABLE 78
